Thus, while the Soviet Government has publicly announced its policy of non-interference in the internal affairs of the countries brought under the orbit of her control, Pravda indicated to the Finns in no uncertain terms how they must vote. Russia's attitude, revealed in her government-dominated press, is vastly more significant for Finland's future than the freedom claimed for the recent elections. Equally significant and even more ominous is the fact that the Russian newspapers, once the election was over, have taken to accusing the Finnish authorities of being too lenient and formalistic in bringing to trial so-called war criminals. It is not difficult to see the directions which further pressure and intervention will take.

FINLAND'S STORY

In 1940 American sympathy for Finland, to use the words of William Henry Chamberlain, was "warm, instinctive, and practically universal." President Roosevelt called it "axiomatic."

During the past 2 years the mists of war propaganda have clouded Finland's case and Americans have been unable to hear her story. Finland's voice has been largely silenced in this country. Do Americans realize that for almost 2 years prior to the throwing out of the Finnish Minister the Legation in Washington was not permitted to present Finland's side? The Minister and his staff stood with hands tied while their enemies were permitted to hit at them as they chose. The floodgates of Russian propaganda were opened, and there was utmost freedom for one-sided Communist and anti-Finnish statements and misstatements. This is surely a curious logic when a people considered the most literate in the world, a people who maintain free assemblies and meet with honor their obligations, are discounted and suppressed while the spokesmen for a totalitarian power, "a dictatorship as absolute as any other," are free to speak.

Today strong voices are being raised in protest over the sacrifice of Poland on the altar of expediency and power politics. It is inevitable that Americans will compare the achievements and decisions of the great powers with their expressed war aims. The only real hope for Finland, Poland, the Baltic countries, and other small democracies, will lie in an enlightened and vocal public opinion guided by the principles of justice and fairness. Security and peace plans are now in the making. The great majority of Americans are sincere in their desire to cooperate for world security and a lasting peace. We are equally sincere in asking that reason, justice, and fair play will be brought to work on the peace.

The tremendous responsibility of the leading powers is clearly set forth in an editorial of the New York Times in these words, "Under the Crimea Charter, the United States, Great Britain, and Soviet Russia assumed joint responsibility for developments in Europe, and pledged themselves in particular to see to it that the liberated people of Europe, including the former Axis satellites, have a chance to attain liberty and self-government, through the democratic process of free elections under conditions of internal peace." (March 11, 1945.)

Finland was never an Axis satellite. She was not an ally of Germany and had no commitments to her. Throughout the war she maintained consistently that her defensive struggle against Russia was wholly independent of the major conflict. In fairness to Finland and to our own long-standing friendship and sympathy for her we should consider carefully the record of events in the successive phases of her effort to retain independence.

RUSSIA ATTACKS FINLAND

In October 1939, when it was already plain that Russia intended to invade Finland after the same manner in which she took over the Baltic democracies, President Roosevelt made an effort to stay hostilities and sent an urgent personal note to President Mikhail Kalinin of the U. S. S. R. expressing the earnest hope that the Soviet Union would make no demands on Finland which are inconsistent with the maintenance and development of amicable and peaceful relations between the two countries and the independence of each (New York Times, October 14, 1939). In his note the President referred to the long-standing and deep friendship which exists between the United States and Finland.

In his reply of October 16, 1939, President Kalinin reminded President Roosevelt that Russia in 1917 recognized Finland's independence, and expressly stated that the sole aim of the negotiations (with Finland) is the * * * strengthening of friendly cooperation between both countries in the cause of guaranteeing the security of the Soviet Union and Finland (New York Times, October 18, 1939).

Thus at the very moment when Russia was making plans to attack Finland she sought to deceive the world in regard to her real intentions.

A survey of events since the first Finnish-Russian war which began with Russia's aggression against Finland in 1939 shows that Finland was from the very beginning concerned with only one aim, the preservation of her own independence and territorial integrity. She was not an ally of Germany, she had no commitments to Germany, she was not out for conquest, nor did she have any grandiose ambitions of destroying communism in Russia. She was fighting for her own very existence, and that is all.

In 1939 Finland was attacked by Russia. What happened then was an open story to the entire world. Finland's struggle was hailed as a defense of liberty and justice. A great flood of sympathy was released particularly in America over this wholly unwarranted and ruthless aggression by a neighbor fifty times stronger. The League of Nations unanimously expelled Soviet Russia from membership because of her attack on Finland. President Roosevelt, in an address before the American Youth Congress (New York Times, February 11, 1940), summed up the feelings of the American people in these telling words:

"Here is a small republic in northern Europe. A republic which, without any question whatever, wishes solely to maintain its own territorial and governmental integrity. Nobody with any pretense of common sense believes that Finland had any ulterior designs on the integrity or the safety of the Soviet Union.

"The American sympathy is 93 percent with the Finns in their effort to stave oq invasion of their own soil. That American sympathy by now is axiomatic.

"The Soviet Union, as a matter of practical fact, as everybody knows who has got the courage to face the fact, the practical fact known to you and known to all the world, is run by a dictatorship, a dictatorship as absolute as any other dictatorship in the world.

"It has allied itself with another dictatorship and it has invaded a neighbor so infinitesimally small that it could do no conceivable, possible harm to the Soviet Union, a small nation that seeks only to live at peace as a democracy and a liberal forward-looking democracy at that."

Finland's courageous and skillful defense has not been forgotten. The odds, however, were too great, and America's refusal to allow her to purchase arms probably was a decisive factor in her collapse. When the Russians broke through the Mannerheim Line on the Karelian Isthmus and reached Viipuri, Finland was compelled to submit to a peace which deprived her of approximately a tenth of her territory, including the historic city of Viipuri, the naval base of Hanko, the shore of Lake Ladoga, and other territory in the north of Finland. Almost a half million Finns "in one of the most impressive informal plebiscites of modern history * * * moved voluntarily and en masse into the shrunken part of Finland. Practically none chose to remain under Soviet rule." (American Mercury, July 1944, p. 11.) The Treaty of Moscow deprived Finland not only of a substantial section of territory but also of approximately 15 percent of her productive capacity. This was Finland's reward for defending herself against unprovoked aggression.

STRIVING TO MAINTAIN THE PEACE

The interval of peace following the treaty of March 1940 was a trying one for Finland. She scrupulously observed the details of this treaty, but the Soviet Government lost no time in exerting pressure of various sorts in order to gain a stronger hold. The Soviet diplomatic and consular corps was more than doubled in size (in Helsinki alone there were 31 in the diplomatic corps and 120 assist-

ants), and efforts to develop a fifth column among the Finns were none too subtle. Constant espionage was carried on by these nominal consular officials, for whom permission to travel in restricted areas, with freedom from any control by Finnish authorities, was insistently demanded by Moscow.

The words of a British publication, all the more striking because Great Britain was formally at war with Finland, portray clearly the difficulties Finland had with Russia during this period. This magazine, The Nineteenth Century and Afterwards, said in its March 1944 issue:

"Although Russia had declared herself satisfied with the treaty, she profited by the helplessness to which Finland had been reduced to impinge upon Finnish domestic affairs and Finnish foreign policy. For example, Finland attempted to promote a defensive association of the Nordic countries, which, had it come into existence, would have drawn Finland, Norway, and Sweden together against Germany. Under Russian pressure Finland was obliged to desist. The personnel in the Russian Legation at Helsinki and in the Russian consulates throughout the country was numerous far beyond normal needs, and there was constant interference in Finnish internal affairs. Demands which had not been made in the peace negotiations were made when Finland was unable to resist them. Amongst these demands were the demilitarization of the Aaland Islands under Russian control, a preponderant Russian share in the management of the Petsamo nickel mines, the surrender of rolling stock beyond the amount stipulated in the treaty, compensation for goods removed from the ceded areas, the cession of the Vallenkoski Rapids (which were entirely on the Finnish side of the frontier). All Finnish attempts to promote trade with Russia and to promote a better understanding in the realms of science and of letters were rebuffed. When Mr. Molotov was in Berlin during the month of November 1940 he demanded that Russia have a free hand in Finland. The demand was refused by the German Government. It is not surprising that the Finns, who have little sympathy with the Germans—and still less for national socialism—should have felt some relief." (Quoted from the CONGRESSIONAL RECORD, May 3, 1944, p. 3887.)

Among other demands not included in the Moscow Treaty was the request of the Soviet Union that Finland permit Russia to run its own trains to and from Hanko through southern Finland. The trains were used for the transportation of Russian troops and munitions. Finland objected strenuously to this request but was finally compelled to consent in July 1940. At this time Russia and Germany were in close collaboration against the allies. With the precedent established by Russia, Germany was able to secure the consent of Finland to the transit of German troops to and from Norway through the wilderness of Lapland. Thus the German movement of troops was through northern Finland, the Russian movement through the vital areas of southern Finland. Interestingly enough, the Soviet Union did not protest the permission given the Germans (in September 1940), and when she attacked Finland a second time, no reference was made to the German transit. Russia didn't even use it as a pretext.

It has been found to be excellent anti-Finnish propaganda to cite the presence of German troops in Finland. And it is, if one omits to mention why?

RUSSIA ATTACKS AGAIN

Finland did not enter war against Russia a second time because of Nazi sympathies. Russia was the aggressor again in June 1941. This was the eventful month when Germany invaded Russia. While Russian propaganda has attempted to make out that Finland used the opportunity to regain lost territory, the facts speak otherwise. Note carefully the following:

Our own State Department's press release, dated December 18, 1941, giving the official chronology of events in 1941, has these cryptic and tragic words concerning what happened on June 22, 1941:

"Germany invades the Soviet Union; the latter raids Finland; Hitler's speech and Ribbentrop's statement on declaration of war against the Soviet Union." (New York Times, June 23, 1941, pp. 1: 8, 4: 2.)

On the very day, June 22, 1941, when the Russian-German war started, Russia resumed active hostilities against Finland. On that same day the Russians bombed the Aaland Islands and attempted to bomb two Finnish warships. On the 23d, Abo (Turku) was bombed by 24 Russian airplanes. The open city of Willmanstrand was bombed on the same day—so was the Malm airdrome near Helsinki. The Russian Government was asked for an explanation, but no answer came.

Finland herself had refrained from any military action. On the 24th, the Finnish minister in London assured Mr. Eden that Finland would remain on the defensive. But by the 26th more than 10 Finnish towns had been bombed by the Russians and had suffered heavy casualties. On that day, President Risto Ryti broadcast a declaration that Finland would fight in self-defense. "There was a unanimous vote of support for the government when it reluctantly, and after some days of delay, entered the war against Russia for the second time, in June 1941. This unanimous vote was for the same reason as the unanimous vote of the American Congress after Japan had bombed Pearl Harbor. It was in response to days of one-sided bombing of Finnish cities by Soviet airplanes." ("The Tragic Case of Finland," American Mercury, July 1944).

So it was not until after Russia had repeatedly attacked Finland and after there was no longer the slightest question of her intentions that the Finnish Parliament approved military resistance, and only after Russia had refused to answer repeated Finnish requests for explanations of the attacks.

The Finns had been utterly exhausted by the previous war with Russia. But it was clear that their last chance of survival as an independent nation was disappearing. They fought in self-defense for a second time. Their army regained the territory wrested from Finland in March 1940, and pushed only into Soviet Karelia where they established a natural defensive position. For 2 years there was little more than patrol activity on this front. In fact, it became known as a "sit-down war." It is an unsubstantiated Soviet canard that Finnish guns took part in the bombardment of Leningrad which because of its closeness they could have easily bombarded at any time had they so decided. They took no part in the German offensive against that city.

Not only did the Finns refrain from joining in offensive action against Leningrad, but at the very time the Russian resistance at that city was described as most desperate the Finnish Army was only about 28 miles from Murmansk Junction and could have cut that important Russian supply road if she had wanted to. The Finns did not push this great military advantage, and it is impossible to believe that the reason was aught else than their trust in us. If the Russian defensive position was as desperate as has been described it may well be that this fact was a decisive factor.

HARSH PEACE TERMS

Finland was not dominated by Nazi Germany, for if she had been she could not even have begun to discuss armistice or peace terms with Russia, as she did in February 1944. William Henry Chamberlain has pointed out that Finland's taking the initiative in opening peace negotiations is convincing proof that she was not a puppet in the hands of Germany. (The Tragic Case of Finland—the American Mercury, July 1944, p. 13.)

Time and again Russia's first peace terms for Finland were referred to as "reasonable." It is little wonder if some Americans were misled into thinking the Finns to be stubborn, stupid, and perhaps indeed Nazi-dominated in failing to jump at the chance of getting out of the war.

Even a superficial study of the terms should make it clear that they were anything but reasonable. Russia's first set of terms, given through representatives in Stockholm, demanded the breaking off of relations with Germany, internment of German troops in Finland, the restoration of the frontier enforced by the Moscow Treaty in 1940, postponement of reparations discussions, demobilization of the army, and the disposition of Finland's port on the Arctic Ocean, Petsamo, for later negotiations.

In spite of the harshness of these terms, the Finnish Government decided to continue negotiations and was supported in its attitude by the Parliament. After some exchanges of notes Finland sent Paasikivi and Enckell to Moscow to discuss the terms. Near the end of March the Soviet Government gave new armistice terms and, through clever propaganda, gave the world to understand that Finland was to receive more lenient and moderate conditions.

The terms, however, laying down six conditions, were more specific than before and far more harsh:

Finland was to sever relations with Germany, intern German troops, and withdraw Finnish troops to the 1940 border all during the month of April. Soviet war prisoners and civilians were to be returned to Russia immediately; only if the armistice became a peace treaty, exchange of prisoners would be reciprocal. Half of the Finnish army was to be demobilized during May and the entire Finnish army returned to peacetime strength during June and July. In addition, Russia demanded that Finland pay an indemnity of $600,000,000 American dollars in goods within 5 years' time. Petsamo and the Petsamo area were to be ceded to the Soviet Union.

These terms fixed a time limit on internment of German troops physically impossible to fulfill. According to American press reports, there were approximately a hundred thousand German troops in northern Finland, and these could very easily get reinforcements from Norway. Either Finland would have become engaged in a two-front war, or, being compelled to accept Russian aid and admit Russian troops, would have sacrificed everything for which she had fought since 1939. The withdrawal of Finnish troops to the 1940 border would also have been next to impossible within the time limit demanded, and it was complicated by the further problem of moving the entire population of 300,000 people with all their goods from the Karelian area to other parts of Finland. Not one of these people would have voluntarily remained in Karelia. With the cession of her second largest city, Viipuri, and the extensive system of natural waterways and railways in eastern Finland, and with the loss of 15 percent of her yearly exports, the economic unity of Finland would have been broken completely.

In the light of the above and of the fact that Finland had lost much of her productive capacity through the loss of manpower and other factors of war, the demand for an indemnity of $600,000,000, to be paid in the brief time of 5 years, was the most crushing term of all.

In the first place, Finland was not the aggressor, and hence the staggering indemnity was contrary to all principles of justice and decency. In the second place, the indemnity

amount, perhaps seemingly small to Americans now accustomed to speaking easily in billions, was more than the total national income of Finland during the peak years prior to the war. Its payment would have absorbed all Finnish exports; moreover, payment was to be made in goods with prices not determined in advance, enabling Russia arbitrarily to set her own prices. For America in a similar position an equivalent sum would be roughly $120,000,000,000.

Acceptance of the terms would have brought Finland to economic starvation and servitude in an impossible attempt to pay an impossible indemnity. Failure to have paid to the full would have only given Russia a pretext for finally seizing Finland and accomplishing her announced aim of exterminating the Finns "from the face of the earth." (Fravda, June 23, 1941.)

The Finnish Parliament rejected the Soviet terms unanimously. The Finnish people themselves knew them to be unjust and impossible of fulfillment. Acceptance would have been disastrous to the very existence of the nation. The Russian terms were an ultimatum, and Finland was given no opportunity to present counterproposals. It was a take-it-or-leave-it proposition.

RUSSIAN PRESSURE BRINGS ABOUT DIPLOMATIC BREAK

On June 15, 1944, Finland paid its debt installment of $148,000, which it theretofore had been paying regularly and promptly for years. On the following day Finland's minister to the United States, Mr. Procopé, was ordered to leave the country on account of activities described as "inimical" to the United States. A few days later diplomatic relations with Finland were severed.

In the meantime, Russia marked the opening of the second front in Europe (on the part of the Anglo-American forces) by launching a large-scale attack, not at once against Germany but against Finland. While for the gigantic Russian Army this was a relatively minor undertaking, "yet the fact remains that on Moscow's list of political priorities the defeat of Finland has been given precedence over that of Germany." See Human Events, June 21, 1944. Puny Finnish defenses were no match for the Soviet powerhouse, strengthened immeasurably since the winter war of 1939 by American planes and tanks. The Mannerheim Line on the Karelian Isthmus was soon breached.

Under constant pressure from Russia, our State Department had warned the Finns to "get out of the war" or to take the consequences. To the little nation of some 3,000,000 souls who had desperately tried to keep out, this phrase must have had a callous ring. Aside from the fact that Finland was not the aggressor either in 1941 or 1939, it appears obvious that such warnings could have no practical meaning as long as the United States and Great Britain could offer her no honorable way out or assure her that surrendering did not mean loss of independence. In the words of William Henry Chamberlain, "Had the American Government, with Soviet consent and authorization, been able to offer Finland at any time a peace settlement based on restoration of the 1939 frontier, backed up by some international guaranty, the Finnish Government could have been rightly accused of obstinacy and bad judgment in refusing to accept such a settlement." (American Mercury, July 1944, p. 13.) The fact is that no such offer was ever made.

To the overwhelming majority of Americans and especially Americans of Finnish extraction, now heartsick over the fate of the country of their forebears, the reference to "inimical activities" on the part of Finland's Minister and the repeated suggestion that Finland was pro-Nazi simply did not make sense. Minister Procopé was recognized as an outstanding diplomat in Washington, in spirit thoroughly American. His dismissal made it possible for American Communists to hint that the last "Axis listening post" had been removed from Washington, a suggestion which was rank injustice to a man who had served as President of the Council of the League of Nations and who was regarded in Washington and throughout Europe as a man of unimpeachable integrity. The senior Senator from Michigan, ARTHUR H. VANDENBERG, paid this tribute to Procopé a few days later: "I cannot find it in my heart to believe that Hjalmar Procopé, a gallant Finnish patriot, is guilty of anything which does not stem from distraught anxiety for his beleaguered homeland and from complete devotion to the harassed life blood of the magnificent Finnish democracy. It leaves me morally certain, in the absence of proof to the contrary, that he has never harbored so much as one vagrant thought that was consciously hostile to our own United States." (CONGRESSIONAL RECORD, June 19, 1944, p. 6142.)

In that same address Senator VANDENBERG, whose statesmanship has made him an outstanding delegate to the World Security Conference, made this significant statement: "Only 24 hours before his recall, this Minister once more paid Finland's debt instaliment, inherited from World War No. 1, still uniquely faithful to her undefiled word even in the midst of new and desperate travail. This is not the act of an enemy. For the sake of history, and perhaps, for the sake of belated justice in the post-war world to come, I cannot forget these things, amid the bewildering contradictions of this crashing conflict."

A CRUSHING ARMISTICE

"The armistice terms which Russia and Britain have imposed on Finland are so severe that she may not survive as an independent nation. If the purpose is to make her a puppet of Russia, a good start has been made. If the intent is to build a free, healthy, and peaceful Europe, then the allies began with a failure. * * * The idea that such a tiny state can be a menace to Russia, the mightiest land power in the world, is fantastic claptrap." (Editorial in New York World-Telegram, September 22, 1944.)

On the diplomatic front Russia had now gained what she wanted. She could put the pressure on Finland without concern for possible interference from her allies.

The power of Russia's armies was more than Finland could withstand. On September 20, 1944, she was compelled to accept the armistice terms demanded by the Soviet Union, terms no less devastating than those offered earlier.

Petsamo, in the north, was ceded to the Soviet Union. In place of Hanko, Russia demanded and received on a 50-year-lease basis the even more strategic Porkkala Peninsula, on the south coast of Finland. The frontier established by the Moscow treaty in 1940 was restored. Finland undertook to withdraw her troops at once beyond the line of this frontier and to transfer her army to a peacetime basis within 2½ months.

German land, naval, and air forces remaining in the country were to be disarmed and turned over to the Soviet. The attempt to fulfill this clause has proved to be, as was to be expected, a bloody business, involving the exhausted Finnish Army in a prolonged and bitter struggle in the north, where the Germans have systematically destroyed Finnish towns and homes in a slow retreat into Norway. Oscar Jacobi, writing in Colliers (January 20, 1945), says he had a good look at the fighting in the north, where "men died or suffered all the hardships of a major-scale war." Thousands of Finns, torn from their homes in the northernmost areas, have now had to move southward through the new devastation, complicating the already desperate housing and food situation.

In regard to the reparations clause forced on the Finns, Jacobi writes:

"The Moscow armistice agreement was worded so as to give the Russians wide latitude in interpretation—something about which the Finns felt—and still feel—very uneasy. In the reparations clause they got their first bitter taste of this loose wording. The $600,000,000 originally asked for by the Russians was reduced in the treaty to $300,000,000, which pleased the Finns no end. But there was a catch to it.

"Reparations are to be paid not in cash but in kind, and the Russians have decided they will credit Finnish deliveries against reparations only at prices obtaining in 1938. Since these are vastly lower than today's, Moscow's dictum means in reality that the Finns will have to deliver products worth $700,000,000 at today's prices." (Colliers, January 20, 1945, p. 69.)

For America, in a similar position, an equivalent sum would be roughly $140,000,000,000. Some sum for a nation with a population no larger than the city of Brooklyn. A terrific price for resisting unprovoked aggression.

War criminals: Among the articles of the armistice was also the agreement to collaborate with the Soviet "in the task of the detention of persons accused of war crimes, and the trials of such persons." This follows the invariable Russian pattern.

Genuine war criminals should not go unpunished. Finland's only "crime," however, was in defending herself against unprovoked aggression, in 1941 as in 1939, and in choosing to stand up for her rights and to fight for her freedom against the forces of vicious despotism. Finland's leaders were motivated by their concern for Finland's future. They were pro-Finnish and not pro-Nazi. In a note to Great Britain on October 6, 1941, the Finnish Government said: "Finland wages her defensive war free from all political obligations, but grateful that she need not this time fight alone."

That the concern of Finland's people and her leaders at the time they chose to defend themselves against impossible odds was not without ground is now plain from reports that come from Europe. "What has already happened in the Baltic Nations is a fearful story," writes Dr. A. L. Warnhuis. "I was told that 600,000 of these people * * * have fled before the advancing Russian armies. * * * It is Russia as a nation state and its imperialism that is feared. * * * The fear persists, and we ought to be concerned about this great issue and do everything that is right and possible in reenforcing the Soviet promise of noninterference in domestic affairs." (News Bulletin, National Lutheran Council, January 26, 1945.)

The armistice has also made it possible for Russia to extend her grip on Finland in various ways without making her interference in domestic affairs appear too obvious and yet in time permitting her hold to become ever stronger. Finland has been compelled to disband all patriotic organizations and at the same time to release from prison all Communists and any others who had been confined for treason. These are the ones who are making the loudest cry over war criminals and the need for people's tribunals to try them. It is they who are and will provide the link between Finnish Communists and Moscow and who, to prove that their hearts are in the right place, are serving as willing errand boys to create the proper possibilities for further Russian interference. Seeking to cooperate with the Soviet in the matter of trials by taking them up through the orderly procedure of her democratic courts, Finland has now been accused by the Russian news agency Tass of investigating crimes in a formalistic manner. (New York Times, March 21, 1945.) With the strong backing of Russia, the extreme leftists will keep clamoring for the establishment of people's tribunals empowered to deal out summary justice in the true Soviet manner. The Soviet's record in bringing such justice into the Baltic countries and

Poland promises to make Finland's ordeal of peace even more fearful than her ordeal of war.

Some may still ask, "Is not Russia our ally?" We may well ask in turn, "Does this justify her as an aggressor against a democratic neutral nation which has always been our friend?" Moscow does not conceal her objective of absorbing Finland into the Soviet Union. "Nor is this a new ambition," comments Human Events (June 21, 1944). "As far back as January 1940, Mr. Herbert B. Elliston, a former British national, who is now chief editorial writer for the Washington Post, reported from Helsinki: 'There is no doubt that the price asked of the British for a Russian pact included acquiescence in the extinguishment of Finnish independence. The Finns are grateful to the British for refusing to be accessory to the crime, a word, incidentally, which sounds like a Sunday school picnic to one who witnessed the bombing of Helsinki.'"

The great statesman and diplomat, Andrew D. White, who was United States Minister to Russia in 1892–94, wrote in regard to Russia's traditional policy and attitude toward Finland: "To say nothing of the policy of Russia in Poland and elsewhere, her dealings with Finland thus far form one of the blackest spots on the history of the empire." (Autobiography of Andrew D. White, Century Co., 1917, p. 70.)

IS FINLAND WORTH SAVING?

The aims for which we have been fighting this bloodiest of wars persist in intruding on our consciences even while the heat of battle is at its fiercest, and their demands for attention will mount as the making of the peace approaches.

If ever, it is now that Americans should steep themselves in the philosophy of our ideals clearly expressed in the statements of our statesmen and leaders.

A great interpreter of the American spirit, President Woodrow Wilson, has voiced the reasons why we are constantly concerned with the liberty and welfare of other countries:

"Why is it that all nations turn to us with the instinctive feeling that if anything touches humanity it touches us? Because it knows that ever since we were born as a nation we have undertaken to be the champions of humanity and of the rights of men. Without that ideal there would be nothing that would distinguish America from her predecessors in the history of Nations." (The New Democracy, II, p. 44.)

And America's spiritual heritage and destiny are set forth in these immortal words:

"America has never seen its destiny with the physical eye. * * * The destiny of America is an ideal destiny. * * * It is her incumbent privilege to declare and stand for the rights of men. Nothing less is worth fighting for, nothing less is worth sacrificing for." (The New Democracy, II, p. 68.)

The small nations whose future is now being determined for a long time to come cherish dearly those very rights for which we ourselves have been willing to go to war. The great English historian and statesman, Viscount Bryce, author of The American Commonwealth, the classic work on American government and institutions, has stated the case of the small nation in these words:

"The small states, whose absorption is now threatened, have been potent and useful—perhaps the most potent and useful—factors in the advance of civilization. It is in them and by them that most of what is precious in religion, in philosophy, in literature, in science, and in art has been produced.

"We may be able to arrest the forces which seem to be making for that extinction, but we certainly ought not to strengthen them. Rather we ought to maintain and defend the smaller states." (Essays and Addresses in War Time, 1918, pp. 12, 14.)

The principle of self-determination for nations is a fundamental American doctrine. This is evident from the following declaration of President Wilson:

"National aspirations must be respected: peoples may now be dominated and governed only by their consent. * * * Peoples and provinces are not to be bartered about from sovereignty to sovereignty as if they were mere chattels and pawns in a game. * * * The day of conquest and aggrandizement has gone by."

The saving of Finland and the other democracies from the disaster which has overtaken them is, therefore, more than a matter of sentimental feeling for America. The principles and ideals for which we have always stood are involved. When President Roosevelt and Mr. Churchill wrote the Atlantic Charter, they restated in simple and clear terms those same ideals of self-determination and freedom which are part and parcel of America's heritage—ideals stated first in our Declaration of Independence.

Whatever may have been said later in the interests of expediency concerning the Atlantic Charter, its promises that the victors would not "seek aggrandizement, territorial or otherwise"; that "There shall be no territorial changes which do not accord with the freely expressed wishes of the peoples concerned"; that the peace should "respect the right of all peoples to choose the form of government under which they will live"; that "sovereign rights and self-government shall be restored to those who have been forcibly deprived of them," are in perfect accord with the ideals of our American heritage. In his recent message to Congress, President Roosevelt asserted that "we shall not hesitate to use our influence—and to use it now—to secure so far as is humanly possible the fulfillment of the principles of the Atlantic Charter."

Our traditional policy of friendliness and help toward small democracies, which is entailed in our own undying love of freedom, will not permit us to stand by and to watch a helpless people be deliberately destroyed without our exerting every possible influence "to arrest the forces which seem to be making for that extinction." Especially must this be true in the present conflict in which the liberation of countries which have felt the iron heel of the dictator is one of our declared aims. We were once a small Nation ourselves. We have fought for justice and self-determination. Every corpuscle in our body rebels against the philosophy that "might is right." To allow anything less than full freedom and governmental and territorial integrity to Finland or to the other threatened countries would be virtually to repudiate the principles for which we have always stood and for which we have again gone to war.

A voice from America's past arises even today to remind us of our tremendous responsibility. In an address in New York City on December 15, 1916, that great American Secretary of State, Elihu Root, expressed thoughts which are applicable to Finland. If the word "Finland" were substituted for "Belgium," one would think that he were speaking of Finland today. We commend his thoughts to every American for consideration:

"Poor Belgium, peaceful, industrious, God-fearing, law-abiding Belgium, she had no quarrel with anyone; she sought no nation's territory, she coveted no neighbor's goods; she threatened no one's security, but she stood in the way of a mightier nation's purpose and she was stricken to the earth. [This is exactly Finland's present tragic situation.]

"What we have to do is not merely to protest in the name of humanity it is to assert a right, it is to call upon the world to assert a right, a right under the law of nations for the protection of humanity and of civilization. This is our concern."

Even if Finland were a backward and uncivilized country, she would be entitled to America's support. It happens, however, that Finland, to quote Cecil Gray, an English writer, in his book on Sibelius, is "one of the most—if not, indeed, as is very probable, quite the most—advanced and progressive country in Europe today."

Her political constitution, adds Gray, "is the last word in enlightened democracy." In fact, her constitution is largely modeled after our own. Representative government, free speech, a free press, and other cherished liberties of freemen are to be found in Finland the same as in America. According to an editorial in the New York Times, March 1, 1940, "Finland, in the last 20 years, has been a projection of American democratic institutions in the Old World. Her guiding principles have been ours, her democracy is as genuine as our own."

Everyone knows how under the compulsions of war there is tremendous pressure to suspend at least temporarily many of the democratic traditions and processes of a nation. The following dispatch, sent by Jack Fleischer, United Press correspondent, as late as March 20, 1944, tells its own remarkable story of the staying power of Finland's democracy even under the burdens of war and the pressures exerted by Germany:

"The Finns still possess the right of free speech and exercise it greatly. Foreign broadcasts are not forbidden, and huge numbers listen to the London radio regularly.

"Anti-Jewish legislation, which the Nazis wanted, never made headway in Finland and, according to information from leading Jews of the country, 2,000 Jews are able to live with the same rights as other Finns and are aiding in the war effort." (New York Times, March 21, 1944.)

It is facts like this which give concrete significance to Finland's assurance that she was waging her defensive war "free from all political obligations."

We know of no more fitting conclusion to our discussion of Finland's case than two eloquent tributes paid her during the winter war, one by a Briton, the other by an American.

Winston Churchill, the great British leader, stated in a world-wide radio broadcast:

"Only Finland—superb, nay sublime, in the jaws of peril—Finland shows what free men can do. The service rendered by Finland to mankind is magnificent. We cannot tell what the fate of Finland may be, but no more mournful spectacle could be presented to what is left of civilized mankind than that this splendid northern race should be at last worn down and reduced to servitude worse than death by the full brutish force of overwhelming numbers. If the light of freedom which still burns so brightly in the frozen North should finally be quenched, it might well herald a return to the Dark Ages, when every vestige of human progress during 2,000 years would be engulfed."

No technical step of conventional unfriendliness which war exigencies may require, writes William Henry Chamberlain, can erase from the memory of Americans this splendid tribute, and he adds, "It would be a bitter irony for Finland, for Great Britain, and for the world if Winston Churchill should find himself compelled by circumstances to contribute to the realization of the prediction so forcefully expressed in these last two sentences."

We feel that the final tribute to Finland should come from an American. The following is from the Christian Science Monitor:

"If you were to name the greatest nation in the world, would it be the richest; would it be the one whose possessions are the most wide-flung; would it be the most populous or that which boasted of the most destructive guns and the most powerful army? Perhaps it would be that nation which paid its debts, which, courageous as the Greeks at Thermopylae, fights a barbarian horde, which faces annihilation rather than compromise its liberty—whose men today die

on the battlefield and whose women and babies starve and freeze behind the lines. If this is the nation you would seek, there stands Finland."

Is Finland worth saving? Are we in this war to save Europe from Hitler and hand it over to Stalin?

Facts and material furnished by Save Finland Committee, O. J. Larson, chairman, 406 Lonsdale Building, Duluth, Minn.

Address of Hon. James A. Farley, Chairman of the Board, the Coca-Cola Export Corporation

EXTENSION OF REMARKS

OF

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. PHILBIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address by the Honorable James A. Farley, before the Northampton Rotary Club, Northampton, Mass., Monday evening, March 26, 1945:

We have heard a great deal in these past few years about the American way of life. I certainly have no quarrel with those who have so ably and eloquently discussed that subject. But I have wondered sometimes if, in our glorification of the American way of life, we have not forgotten that a way of life is, in the last analysis, the product of human beings. It is not a social or a political philosophy that some one has thought out and handed to other people as a guide for their activities. It is, rather, a name that we give to the habits and methods and characteristics of men acting in their relation to other men. In short, the American way of life is the product of a human being which we call an American.

Today, I would like to consider for a moment that average American who has created the American way of life; who, in doing so, has built a great nation, and, in the name of that nation, is impressing his character upon a wide and distracted world.

It took a good many things to create the average American. In the first place, he was the product of a problem that may be with us as long as men live upon this earth. He was the product of a continent called Europe, which has suffered for centuries from the fact that it could produce more people than it could feed. In these days, as we get into the habit of looking at the map of the world, we see in true perspective exactly what Europe is. It is a peninsula thrust out to the west and the south of a great continent. In many places its land is poor and its capacity for the production of food is low. Its natural resources are, and have always been, scarce and of doubtful value. For the most part, its coast line, especially in the north, is forbidding, and, in many months of the year, almost inaccessible. Its rivers, in spite of the exalted songs and stories that have been written about them, are not great rivers. Its mountains, with a few exceptions, are not supremely great mountains. But its population has, at least in modern times, been excessively great. That population has been stricken time and again with indescribable calamities. It has been ravaged by disease; it has been beset by hunger. And because of these factors of inadequate resources and superabundant population, it has been cursed with the most bloody and continuous wars that have marked the history of the earth.

Those who made America, were the product of that background. They left that barren and unfruitful continent for many reasons; some because they were hungry; some because they sought religious consolation; some because they disagreed with the political life of Europe; others because they sought adventure; and others because for many reasons they were persecuted and injured at home. They came to America at various times, in various ways, and for various purposes. Here they found the answer to the bitter necessities that they had experienced in Europe. They found that while there were hardships in the wilderness, those hardships were nevertheless capable of being surmounted by courage and hard work and fortitude and patience. Unlike those of Europe, our hardships in America were not man-made. Nature in America, while it exacted a price, was an honest merchant because when men invested their labor and their courage, nature paid them a fair and ample wage. This was all early Americans asked for, and this they were able to get. They brought with them the elements of culture, and constitutional government, and the instinct of workmanship, and technical skills, for in spite of its limitations, Europe at least provided that much for its children.

But Americans found it possible, because they were in the land of promise, to build upon these beginnings and to build better than they had known before. The culture that they imported expanded in America. Constitutional government found new ways of enabling men and women to live together. They multiplied their technical skills because they found ample resources to which they might apply that skill. And in the long years after they had founded a civilization upon the narrow ledge of this continent, they discovered that whenever the curse of overcrowding impeded their movements, they could move farther into the continent and find freedom all over again. And so the growth of America for four centuries was a process of endless new discovery. They went west because the West eternally satisfied their necessities.

It is out of great experience that great men are born, and it is out of great enterprise that a great people is born. As the boundless vistas of American opportunity opened and the population grew and prospered, so did each individual expand in his own views. For, in the last analysis, America was built upon individual men and women. They found in the beginning, as they struggled for self-determination and independence, that in spite of the fact that they had sought refuge from the jealousies and conflicts of Europe, that the source of those jealousies and conflicts had, like evil angels, preceded them to this continent. They found, even before national independence was created, that greedy empires had sought through military power to preempt the great American domain, and that on the south and the west and the north, and in the great sea at the east, they were surrounded by the encircling armies of European imperialism.

One of the most heartening things that we can recall, as in this war we are beset by aggression on the east and aggression on the west, is that when we were, so far as population is concerned, only a fraction of what we are now, we were beset by the same dangers. In spite of our precarious position, we fought and won a war for independence. We established ourselves as a nation, 13 States, in total area only a fraction of what we are now, by uniting in a desire to be free. By the courage of our men and women, by our enterprise, by our power to expand, by purchase, by diplomacy, and when all else failed, by war, we set about the task of freeing this country of the threat of foreign dangers. From the Thirteen Colonies, Americans moved to the West and created new States out of the wilderness. They skillfully played the ambitions of the French, the Spanish, and the English in such a manner as to acquire a vast territory beyond the Mississippi. And as they acquired territory, unlike the practice of imperial Rome, they made each acquisition of territory truly their own by settlement and development. These were not men who made compromises with forces that threatened them. They were men who destroyed those threats by their own indomitable strength and courage.

If the American Nation has, in its resources, in its political institutions, and in its culture preeminence in the world today, it is because strong men found three circumstances that favored the growth of a great nation.

The first of these circumstances was the great area of the country and the richness of its resources. No nation, truly great in every way, can be created without natural circumstances that favor its growth. There have been nations great in a spiritual sense which have grown in a small area and with a small population, but from time to time they have been the prey of physically stronger neighbors. The United States avoided that eternal threat of danger by the happy circumstance of its own position and size.

The second circumstance that favored our growth was the wise policy, inherent in the pioneers who settled this country, of creating, as they grew, political institutions that preserve individual freedom while they offer the broadest protection from selfish influences. They created a constitution sufficiently flexible to afford for all generations to come the possibility of change and growth.

The third circumstance that favored the growth of a great civilization was the fact that America was a meeting place of many cultures, many ideals, and many diversified points of view. It has been the genius of Americans to accept immigrants of many sorts, to permit them to make their contribution to our common life, and at the same time to assimilate them and their descendants in a truly unified American tradition. We have stretched out our hands to the unhappy people of Europe. We have offered them opportunity for a better life than they had at home, and all we have asked is that they have strong hands and loyal hearts.

In the course of our growth we have, in general, avoided interference in the affairs of other countries. We have not been anxious to make others as we are. We have generously contributed whenever we could to permit other countries to live their own lives, to be free of oppression, and to grow as God and nature intended that they should. But we have not sought to impress our own culture upon others. We have learned this hard lesson from our own experience, because as we grew as a nation, we asked no help from others; we merely wanted the privilege of freedom to grow as we could.

A few years after the establishment of this Nation as an independent republic, our statesmen conceived that our duty, in fact, that our safety, demanded that we, as the strongest nation in the Americas, should assert leadership in the two Americas in permitting other small republics to grow as we had grown. Out of this arose the most specific American statement of foreign policy that we have ever created—the Monroe Doctrine. The development of this policy with reference to the Western Hemisphere required, on our part, not only great strength but great forbearance, for we did not conceive it to be the destiny of the United States to create an empire in the Western Hemisphere. The wisdom of our policy of living at peace with our neighbors, while at the same time we offer them the broad protection of our power, is witnessed by the fact that

in this war, we have the friendship and solid support of almost all those countries.

But all of this national greatness comes back fundamentally to the American as an individual. Only sound men can make a sound nation. It has been the habit of pessimistic people to speak of the disintegration of American character. When at times we have seen evidence here and there that wealth and security have made people careless and pleasure loving, there have been those who have claimed that the fiber of America has become soft and that the inner integrity of our people has been destroyed. But these evidences of weakness were, after all, superficial and passing. Fundamentally, the American remains as he has always been. In this war we have the proof of this inherent soundness. It is not alone that Americans in uniform have upheld in every corner of the world the finest traditions of courage and skill. It is also a fact that on the home front Americans have maintained order, have willingly accepted supervision, and have turned with incredible industry and skill to the task of production.

There have been nations, like Germany and Japan, that exalted their efficiency. But the test of 1943 and 1944 has shown that efficiency is not created by the mere proclamation of an intention to be efficient. Efficiency rises from the strength of free people. In spite of many unfortunate failures of foresight, our American industrial life is adding glories to its achievements. American women in the homes, on the farms, in the factories, in the hospitals, and in the armed forces themselves are proving themselves to be the worthy successors of those women who stood loyally beside their kin in Washington's Army. American States and cities are making their contribution to the national effort. Everywhere we find a spirit of cooperation and of loyalty to the cause of victory.

Our task, as we look to the future beyond this war, will be, in spite of the suggestions of those who have formulas for security and happiness, to bear in mind that the United States was not built upon formulas; it was built upon the individual. We shall retain the power that is essential to the maintenance of America's responsibilities in the world only so far as we retain the spirit of the pioneer in each individual American. The door of opportunity must be kept open. The American boy must be taught from experience that whatever he attains depends upon his own inner integrity. We have won the past by hard work and honesty and self-reliance. There is no better formula through which we can win the future. The greatness of the past, in its achievements, lights the way for progress that is assured if no man-made shadows blur the road. It is for us to preserve for our posterity what our forefathers created for us, a Nation of free people, ever helpful to others, but always selfish for the continuance, within our own domain, of the American way of life.

Despite our errors of omission and commission we remain steadfast in our Americanism. This is a great country. The greatness of our people today indicates the greatness we can attain in the future if we keep our feet on the ground and our eyes straight ahead toward the victory that is inevitable and the harvest it must produce. That our armed forces may achieve the heights the sooner is our earnest desire. That this accomplishment may come to pass with a minimum of suffering is our hope. We are all united toward a single end. Our thoughts today are concerned with the responsibility of completing the terrific task immediately ahead. We rightly interrupt our worries to utter an earnest prayer for the well being of our comrades in the ranks, their officers and their Commander in Chief, that wisdom may guide their effort and out of the sacrifices they so willingly make, this terrible struggle may the more quickly end in the ways of peace.

Comptroller Asks Wholesale Cuts in United States Agencies

EXTENSION OF REMARKS

OF

HON. ROY O. WOODRUFF

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. WOODRUFF of Michigan. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following article from the Washington Star:

COMPTROLLER ASKS WHOLESALE CUTS IN UNITED STATES AGENCIES—USE OF BUSH AX OR MEAT CLEAVER URGED BY WARREN

Wholesale amputation of Government agencies with a bush ax or a meat cleaver was recommended today by Comptroller General Lindsay C. Warren.

Testifying before a Senate Banking and Currency Subcommittee in favor of a bill to bring all Government corporations under the financial control of Congress, Mr. Warren said:

"If the present trend of creating Government corporations continues or is not curbed, we will soon have a government by Government corporations."

ONE HUNDRED AND ONE GOVERNMENT CORPORATIONS

Asserting there now are 101 Government corporations, Mr. Warren said:

"They are largely independent of congressional control and free from accountability to the Executive. This thing we call government has reached gargantuan proportions and is sprawled all over the lot.

"It has become greater than Congress, its creator, and at times arrogantly snaps its fingers in the face of Congress.

"The most necessary thing I know of today along governmental lines is a thoroughgoing reorganization of the executive branch of Government. It should be done scientifically.

"But once the decision is made, then a bush ax or a meat cleaver should be used."

SEES YELPS AND SNARLS

"The only way to reorganize is to reorganize," Mr. Warren said with emphasis. It calls for great courage. Duplication and overlapping are widely prevalent. Untold millions could be saved and efficiency created to a high degree."

"Of course," he added, "there would be loud yelps and snarls—that is always true when powers are curbed, consolidations made, or appropriations reduced or discontinued."

San Francisco Conference

EXTENSION OF REMARKS

OF

HON. HELEN GAHAGAN DOUGLAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mrs. DOUGLAS of California. Mr. Speaker, under leave to extend my remarks in the RECORD, I include several newspaper articles.

Mr. Speaker, Drew Pearson has written three important articles on the San Francisco Conference which should be read widely. However, the press of the Nation has seen fit to suppress the last of these articles—one telling of the dealing by American banks with the Nazis after Pearl Harbor. I am informed that this article was suppressed at the insistence of J. P. Morgan & Co. and the Chase Bank.

Mr. Speaker, the freedom of the press and the freedom of speech guaranteed under the Constitution must not be trampled upon by private interests.

The statements contained in these articles, if substantiated, are of central importance to the thinking of our country. Friendly relations between the great and small powers is a matter of concern to all of us—our future is involved. It must not be jeopardized by the suppression of facts in our press.

The articles follow:

THE WASHINGTON MERRY-GO-ROUND

(By Drew Pearson)

(Wednesday, April 25, 1945)

SAN FRANCISCO.—The eyes of about 12,000,000 servicemen will be watching the Conference that opens here today. So will their mothers. So will their wives, who wonder whether the children they bear in this war must be reared to fight another. So will the eyes of all the hungry, weary peoples of war-torn Europe, still hoping with a hope that flickers but never quite dies that finally we can construct a machinery for lasting peace.

And it is no exaggeration to say that the seeds of the next war will be nourished or rooted up at San Francisco. The events happening at this Conference, in its backstage lobbies, and in the chanceries of Europe right now, can spell the difference between peace and war 20 years later.

SEEDS FOR WORLD WAR NO. 3 ALREADY PLANTED

Actually the seeds have already been planted but the roots are not deep and they can be torn up.

The seeds have been planted by groups in England, the United States and Russia who already have begun playing the type of power politics which can only end in eventual war between the two strongest nations emerging from the present conflict—the United States of America and the Union of Soviet Socialist Republics.

Already certain groups inside the State Department and the British Foreign Office have begun jockeying to build up Germany after the war as a bulwark against Russia. Already United States admirals have focused the attention of the entire world on the island bases we are taking from Japan, so that Russia is becoming suspicious they will be aimed against her.

So no matter how high geared and beautifully perfected the machinery for peace devised at San Francisco, it cannot succeed unless it rests on a foundation of good will and mutual trust.

There will be a lot of argument here about 3 votes for Russia, 6 votes for Britain, and 20 indirect Latin-American votes for the United States. But the real fact is that the question of votes becomes pure theory if one big nation doesn't want to cooperate.

If the tremendous armed forces of the United States of America and the Union of Soviet Socialist Republics get fidgety and looking for something to do; if the admirals and generals try to become statesmen; if the State Department career boys begin playing balance-of-power politics, then all the votes and all the peace machinery arranged at San Francisco won't help.

The tragic fact is that already there is evidence that the brass hats in at least two

ccuntries, plus certain diplomats, are getting nervous trigger fingers.

Already there is a strong suspicion that Stalin can't control his own generals. Already there is more than a suspicion that Roosevelt could not control his admirals.

"TRUSTEESHIP" A HOT POTATO

One such case concerns the Pacific island bases taken from Japan. For more than 2 years, the late President argued that all islands taken by the United States of America should be held by us, but under the United Nations trusteeship, whereby other nations were given airplane and shipping privileges on these islands—provided they give us reciprocal rights on their islands.

At Yalta something along that line was agreed to by Roosevelt personally. And when he returned, a directive to that effect was sent to the State, War, and Navy Departments, plus the Interior Department, which administers insular possessions. But when the representatives of these four Departments sat down to work out the details for carrying out the President's directive, two Departments—the Army and Navy—kicked over the traces. The third, the State Department, went along reluctantly, leaving only the Interior Department to obey the directive wholeheartedly.

Finally, Admiral Ernest King, commander of the fleet, took things into his own hands and made a public statement against the President's policy regarding Pacific islands. In other words, he went over the head of his Commander in Chief. Although this was a most serious thing to do, even domestically, its international repercussions were even more serious.

The Russians, whose intelligence is the best in the world, already knew that Admiral King is the man who has wanted to build up a big Navy now as protection against Russia later. They also know that Admiral King has opposed Russia coming into the war against Japan, and wants the United States to do the job alone.

The Russians also know that a certain number of professional United States military and naval brass hats side with King. (This is not true of General Marshall or General Eisenhower and the more responsible commanders in the United States Army.)

And the unfortunate fact is that this probably has played into the hands of the Russian generals who are needling Stalin.

RUSSIAN HISTORY MAY REPEAT

Information as to what goes on inside Russia is always difficult, but there has been increasing suspicion of late that Stalin does not control his own generals. This is what has happened repeatedly in Russian history. When the generals built themselves up in wartime, they dominated the Czar.

And today, the men who once were strong in the Soviet have much less to say. Ex-Foreign Minister Molotov, a great believer in international cooperation, is now completely out of the picture. Foreign Minister Molotov has less authority.

The generals, in turn, are considered responsible for the previous policy of having a messenger-boy Ambassador whom they could easily control at San Francisco. Also, it is strongly suspected that they inspired Stalin's demands that the United States Ninth Army retire from the Berlin suburbs on April 13 so the Red Army could enter first.

Tragedy is that some United States war chiefs, by going over the White House heads, are strengthening the Red general's hand. The Russians are a suspicious people anyway. They have been made more so by being shut up by us in the diplomatic closet. When we refuse to recognize a nation as a member of international society, naturally that nation does not forget the rebuff easily.

And meanwhile, the State Department, together with the old Cliveden set in England which wanted to bleed both England and Russia white, have already quietly gone about plans to rebuild Germany as a bulwark against Russia. Thus the seeds for future peace or war are being planted before this war is ended.

EDITOR'S NOTE.—There will be another column on backstage factors at San Francisco showing how the State Department, 3 days after the President died, reversed President Roosevelt's policy of a tough peace for Germany.

THE WASHINGTON MERRY-GO-ROUND

(By Drew Pearson)

(Thursday, April 26, 1945)

SAN FRANCISCO.—Last fall it leaked out that there was a drastic difference of opinion between the State Department and the Treasury over a soft peace for Germany, and after several weeks of discussion, President Roosevelt definitely threw his weight with the Treasury in favor of a hard peace.

Top War Department officials, influenced by the atrocities committeed against American and Allied prisoners, finally agreed with the President, and even the State Department reluctantly swung into line.

For a long time it has been no secret that a group inside the State Department favored a soft peace for Germany with a view to making her a bulwark against Russia after the war. But as long as Roosevelt was in the White House, the State Department appeasers kept quiet.

However, on the day after his body was buried, a meeting of the German Reparations Committee was held in the office of Assistant Secretary Will Clayton at which both the State and War Departments suddenly reversed Roosevelt's policy of a hard peace.

Specifically, they argued against the removal of Nazi factories, machine tools, plant equipment, or goods out of Germany. The Russians have proposed the removal of German war plants to help build up the hundreds of Russian factories destroyed by Germany. But the State and War Departments maintained that no such German equipment could be removed from Germany without the unanimous consent of the Reparations Commission. Naturally, this means that either the United States or Great Britain could block such removal since both sit on the Commission.

At this meeting Assistant Secretary of State Clayton argued that American policy should favor leaving factory equipment and machinery in Germany so she can get back on a sound economic basis. He even mentioned the fact that Germany would need to import cotton to manufacture clothes and should be permitted to have enough exports to pay for the imported cotton. (Clayton is the biggest cotton exporter in the world and did a heavy business with the Nazis before the war.)

RUSSIANS REMEMBER

Unfortunately, the Russians are all too familiar with the attitude of the State and War Departments toward them. Unfortunately also, some observers believe this distrust of the United States State Department is one reason why the Russians demand a strong, all-Communist Poland.

However, no matter how efficient the peace machinery devised at San Francisco, it will not work if the two strongest powers supposed to keep the peace already have begun jockeying against each other.

The Russians cannot forget, among other things, the strategy of the Cliveden set in England (with which Churchill was once sympathetic) to stir up war between Germany and Russia while England sat on the sidelines. The Russians also know all too well the type of anti-Russian conversation that goes on at the home of Mrs. Evelyn Walsh (Hope Diamond) McLean, when she entertains the elite of Washington society at her famous dinners at what is sometimes called the headquarters of the American Cliveden set.

The Russians knew in advance, for instance, that the Douglas Aircraft Co. had sold the plans for its DC-4 to Japan for $1,000,000 before Pearl Harbor.

And they have been especially interested in the War Department's survey of the damage done to German war plants by United States planes, a survey to be undertaken by a group of bankers and top insurance executives, including Henry C. Alexander, vice president of J. P. Morgan; Fred Searles, Jr., president of several J. P. Morgan mine companies; Franklin D'Olier, president of the Prudential Life Insurance Co.; and Robert P. Russell, president of Standard Oil Development Co.

Considering the manner in which Standard Oil of New Jersey collaborated with Hitler's cartels even after the war broke in Europe, and considering how the J. P. Morgan branch bank in Paris collaborated with the Nazis even after Pearl Harbor, you can't blame the Russians for wondering whether this survey actually isn't for the purpose of getting a line on German industry and building it up after the war.

AMERICAN INDUSTRY WANTS IN

Already, the State Department is being bombarded by American industrialists who owned factories in Germany before the war and want to get back to start operating them. Among the leading pressure boys is Graeme Howard, vice president of General Motors in charge of operations in Europe (and Germany). Howard helped organize Franco's truck transport service during the Spanish Civil War, has a personal interest in the Opel Auto Works in Germany, and has been busy as a hound dog around the State Department wanting to get back to Germany.

Naturally they can't have a hard peace if they are to build up Germany, so they don't want German factories and machine tools carted off to Russia.

Another factor making the Russians suspicious is the British demand that food which the Russian Army finds in Germany be used to feed the German people rather than to feed starving Poles and Russian slave laborers. Shortly before he left London, both Foreign Minister Eden and Sir James Grigg, British War Minister, took the position, in secret talks with United States officials, that food found in Germany must be used to feed the German, not Polish and Russian civilians. The British argument is that if German food is diverted to the Poles and Russians, the Allies will have to import more to feed the Germans.

SUSPECT O. S. S.

Finally, the Russians are probably most suspicious of the mysterious United States espionage organization called O. S. S. The O. S. S. or Office of Strategic Services, has, strangely, distributed some of the most powerful bankers' representatives in the United States of America at key points where they can influence United States policy in occupied Germany.

The roster of O. S. S. men who have been or are operating in Europe reads like a blue-stocking list of the first 60 families. It includes: Paul Mellon, son of Andrew Mellon; Junius and Henry Morgan of the house of Morgan; Alfred du Pont; Lester Armour of the Chicago Armours; Gordon Auchincloss; John Auchincloss; Warwick Potter; Harold Coolidge; William Van Allen of the Astor family; and Allan Dulles, attorney for various international bankers with previous connections in Germany.

Some of these may not deserve the suspicion focused upon them. But others more than make up for it. And anyone listening for 30 minutes to their conversation about the next war and building up Germany as a partner in that war, can understand why the Russians wrongly accused us of a deal

to permit the American Army to enter Berlin first.

This is the kind of underlying suspicion which must be killed immediately and permanently if the machinery of San Francisco is to bring about permanent peace.

THE WASHINGTON MERRY-GO-ROUND

(By Drew Pearson)

(Friday, April 27, 1945)

SAN FRANCISCO.—When the American Army swept into Germany it was fortunate enough to capture an interesting figure in Dr. H. J. Caesar, the counterpart of our Alien Property Custodian who had charge of all American banks and alien property seized in France.

Dr. Caesar was cross-examined at length. From him came highly enlightening and hitherto secret information about the manner in which certain British and American branch banks in Paris collaborated with the Germans after the fall of France. His testimony high-lights the main issue underlying the problem of future peace—namely, whether, despite all the plans worked out at San Francisco, certain Allied business firms together with their friends in the State Department, the Army, and the British Foreign Office are going to maneuver behind the scenes to strengthen Germany once again as a bulwark against Russia.

This largely lies at the root of the ticklish Polish question. Russia wants a Poland which will cooperate with her and be a buffer against another German invasion. If there were no fear of future Germany, there might be less insistence on a puppet Poland.

Ex-Justice Jimmy Byrnes described this graphically to Senators upon his return from Yalta. Telling how Stalin got excited on the question of Poland, Byrnes quoted Stalin as saying: "You speak of English honor, Mr. Prime Minister, and your desire to protect the safety of Russia. But twice in 25 years German armies have marched across Poland to attack Russia. If that happens again will the English armies come to our defense?"

Before Poland was invaded last time it will be remembered that British business interests were quite willing, even apparently anxious, to have the Sudetenland taken away from Czechoslovakia. President Benes complained bitterly regarding Lord Runciman's attitude on this, but the British appeasers' policy was to strengthen Germany at the expense of Russia's friend and buffer ally, Czechoslovakia.

Finally, it was American and British banks which poured money into Germany for years before the war and then maneuvered to have reparations and war debts canceled in order to protect their own loans. The Chase National Bank was one of the worst offenders. That is why a lot of people in Washington, Moscow, and the world at large are watching to see whether history will repeat. That is why the evidence unearthed from the secret files of German Alien Property Custodian Caesar is so significant. It indicates that even during the present war, the Paris branches of Chase and J. P. Morgan were quite willing and anxious to do business with the Germans—though British banks were more so.

Dr. Caesar testified that "the protection afforded to Chase was justified on the ground that it had been active on behalf of Germany before the war in such matters as the German "stand still" credit negotiations.

"The British banks," he said, "were even more preferred by the Germans than the branches of Chase and Morgans. The German occupying authorities decreed that British and Canadian banks in the occupied zone of France 'shall no longer be considered as enemy banks.' These branches provided long-term credits to assist the German war machine. They supplied the Germans with general economic information obtained through their offices in unoccupied France, and they were particularly useful as depositories to the German authorities."

But especially significant were some of the letters found in Dr. Caesar's files. One indicated that the J. P. Morgan Co. had gone out of its way to curry favor with the Nazis by showing that the Morgans had nothing to do with Jews. One memo sent to German Banking Czar Caesar by Mr. Lecestre, a high official of the Morgan firm read: "On the attached sheet there is represented some information relative to the predecessors of Mr. J. P. Morgan, actual head of J. P. Morgan & Co., Inc., New York. Following the tradition of his father, Mr. Morgan never admitted Jews as associates of fellow workers.

"The Morgan House has been frequently found in its business in opposition to the great Jewish banking houses in the United States, such as Kuhn, Loeb & Co. As to Morgan & Co., Paris, the personnel, since the foundation of the bank in 1868, has never included a Jew."

The memo is dated January 15, 1943, more than a year after Germany declared war on the United States. Another memo found in the files of the German Alien Property Custodian, dated May 6, 1941, is signed by Berenberg-Gosler, Paris representative of the Reichskreditgesselschaft. It reads in part: "Subject: Morgan & Cie.

"During a dinner to which I was invited by the French partner of this firm, Mr. Pesson-Didion, Mr. P. D. again spoke indignantly about the clique in America which continually attempts to draw the United States into an unjustifiable as well as ridiculous war. He told me that I would know from my stay in New York and Boston, the views of the partners of his firm and also how they hate Roosevelt—that Roosevelt is driving America toward a catastrophe by his economic and foreign policies. The development over the last 30 years represents a policy of racial favoritism, insofar as the old established Anglo-Saxon, Swedish, and German element had to relinquish its power to the Polish, Czech, and Jewish elements which immigrated since 1900. For the New York and Boston circles this development is terrible. He hopes that one of these days the increased immigration of Jews will unleash such anti-Semitism that a sudden turn-about will follow. Mr. P. D. compares Roosevelt with Leon Blum and his actions with the blessing of the Front Populaire, for which France paid dearly.

"He expressed the hope that the inter-European and particularly the intercontinental business will, after settlement of the present German-British conflict, take such an upswing that his firm will be in a position to take an active part in the developments through the granting of reparation credits.

"With respect to England, Mr. P. D. hopes that the Conservative Party under Sir Samuel Hoare and Lord Londonderry will get the upper hand over the Churchill clique one of these days, and that the worse may still be avoided for England. The principal culprit in this war is Roosevelt, who by vague promises instigated by the criminal clique surrounding him, had driven England as well as France into this war, against their will.

"These remarks were made to me by Mr. P. D. privately, since in the States the Morgans are very friendly toward a firm for which I worked, namely Kidder, Peabody and Co., and they also know one of my distant relatives in Boston. Mr. P. D.'s remarks may well be taken to reflect the opinion of this international Aryan banking firm."

This is one sample of the big business maneuvering which went on behind the scenes during and before this war, and which can lay the seeds for World War No. 3. Unless stamped out it may undo all the peace machinery to be erected at San Francisco.

God Sustain Our Arms Today

EXTENSION OF REMARKS

OF

HON. MATTHEW M. NEELY

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. NEELY. Mr. Speaker, in pursuance of permission duly granted, I extend my remarks for the purpose of inserting in the RECORD a war hymn entitled "God Sustain Our Arms Today," which was composed by Col. Julian G. Hearne, Jr., of Wheeling, who is an eminent member of a distinguished West Virginia family. Colonel Hearne is at present commanding the Twenty-fourth Infantry Regiment in the Pacific area. The hymn is as follows:

GOD SUSTAIN OUR ARMS TODAY

(The war hymn of the United Nations)

(Words and music by Col. Julian G. Hearne, Jr.)

God sustain our arms today;
Bless our country's cause we pray;
Bless our boys where'er they go.
In the Tropics and in snow.
Grant them courage, strength, and skill;
May they ever serve Thy will.
God sustain our arms today,
And bring a righteous peace, we pray.

A National Necessity

EXTENSION OF REMARKS

OF

HON. HOMER A. RAMEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. RAMEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Washington Post of May 1, 1945:

A NATIONAL NECESSITY

Our future foreign policy will be determined in no small measure by the fate of House Joint Resolution 60 on which debate will begin today. That resolution proposes a constitutional amendment for abolition of the two-thirds rule in the making of treaties. In a preliminary speech to the House yesterday, Congressman MERROW rightly said that "the Seventy-ninth Congress will not be required to pass judgment on any issue of greater significance. * * *"

In one respect it is unfortunate that this historic debate is overshadowed by the approaching end of the war in Europe and the United Nations Conference. Nevertheless, it comes at an appropriate moment. For the unfinished business to which our troops are attending in Germany and our statesmen in San Francisco may never be appropriately finished unless Congress does its duty by voting to abolish minority control over treaty-making.

John Quincy Adams once said that the Constitution was "extorted from the grinding necessity of a reluctant nation." To this Mr. MERROW added that "the grinding necessity of a world in chaos is demanding the proposed amendment." The making of a lasting peace is uppermost in virtually every

mind. The means through which peace can be made is the treaty power. To leave that power in the control of 33 men, a minority of the Senate and a small fraction of the entire Congress, would be, under present circumstances, a bid for national suicide.

The hearings before the House Judiciary Committee brought out the fact that whatever reason existed for adoption of the two-thirds rule in the first place has long since disappeared. Dr. Charles Warren, historian of the Supreme Court, is authority for the statement that "you will search in vain to find any political theory on which that two-thirds clause was founded." It represented only an arrangement of convenience because the Southern States feared loss of their navigation rights on the Mississippi, then controlled by Spain, and the New England States feared encroachment upon their fishery rights. At one time the convention adopted without dissent a resolution by Madison to exclude treaties of peace from the operation of the two-thirds rule. The final agreement requiring a two-thirds vote for validation of all treaties represented a deviation from sound principle for the sake of minimizing opposition to the national charter.

Now the tragic aftermath of that compromise must be dealt with. Treaty-making has become as vital to stability and peace in our world as was national legislation in those days to the interests of the liberated States. We must not withhold from the majority elected to shape our national policies control over our relations to the world of which we are a part. Of course, the matter will not be determined in the House. The real fight will come in the Senate. But if the House adds an overwhelming demand for democratization of our foreign policy to demands already coming from the people, we suspect that senatorial resistance to this imperative change will begin to crack.

Pacific Bases Declared Vital to United States Security

EXTENSION OF REMARKS

OF

HON. ROY O. WOODRUFF

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. WOODRUFF of Michigan. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following article by David Lawrence from the Washington Star:

PACIFIC BASES DECLARED VITAL TO UNITED STATES SECURITY—RUSSIAN AND AMERICAN DEMANDS FOR TERRITORIES COMPARED

(By David Lawrence)

Is the security of the United States any less important to the American people than the security of Russia is to the Russian people?

One would think that question was easily answered, and yet there are in the Government here persons who argue that Russia may annex almost a third of the territory of Poland, an ally, but that the United States shall not be permitted to obtain a tiny area of ground from the enemy less than 30 miles square for future strategic bases in the Pacific.

It seems that what Russia got out of the Yalta Conference by way of additional territory is not a violation of the Atlantic Charter or, if it is, it doesn't matter, but the moment spokesmen for the Army and Navy of the United States ask for possession of Iwo Jima and the Bonin Islands, as well as the islands formerly held by Japan north of the Equator, they are criticized for wanting to violate the Atlantic Charter's provision forbidding "territorial aggrandizement."

"WHY?" IS NOT CLEAR

Just why it is all right for Russia to take territory from an ally but not all right for America to keep a small group of islands wrested from the Japanese at a heavy cost of American lives is not clear, but the fact is that such conversations go on behind closed doors in some of the conferences which are being held to determine future American policy.

There is a distinct difference between strategic areas such as would give us bases in the Pacific and territories that are annexed as in the case of Poland. In the former there are no large groups of people who have had their independence and no economic resources to exploit. All that is wanted by our Army, Navy, and Air Forces are bases for airplanes and carrier task forces so there can never be another Pearl Harbor.

The late President Roosevelt assured the Army and Navy that they would have complete control of the bases, but he suggested that title be vested in some kind of trusteeship. The question was never finally settled because the Army and Navy folks were debating it.

All that has been settled is that the specific areas to be put under trusteeships will not be brought up at San Francisco. That agreement was reached at Yalta, but pressure has come lately to upset it, and the American delegation was importuned to discuss the whole trusteeship problem. Only the formula of trusteeships and machinery of administration in the abstract will be discussed.

This correspondent did not voice approval of the Yalta settlement, but it is a decision made by the late President and the heads of the British and Russian Governments, and the United States Government is apparently bound by it. By that Yalta Conference one-third of Poland was to be awarded to Russia and the so-called Curzon Line was stanchly defended by its supporters as one way to give Russia the security she wanted. Advocates of the settlement were not in the slightest degree disturbed by the outcry that the annexation violated the Atlantic Charter. But some of them today are arguing that a "trusteeship" which gives America outright possession of vital bases is a quibble and a subterfuge.

SURPRISING MATTER

It is surprising that where the safety of the United States is concerned the matter becomes a quibble, but when the safety of Russia is concerned there is approval on the ground that Russia must have her security.

It may be argued that two wrongs do not make a right, and there is logic in such a criticism. But if the Soviet Government would be willing to rectify the Yalta arrangement and agree to a trusteeship over one-third of Poland, instead of outright annexation, it might be that Americans would be free to consider the same kind of trusteeship for the islands in the Pacific north of the Equator. Certainly there is no reason to be less generous to the United States than the Yalta Conference has already been to Russia.

There are many complicated problems of annexation of territory, but there is a difference between land-grabbing for economic reasons or for exaggerated ideas of what constitutes the spoils of war—something which the Atlantic Charter really described in its prohibition against aggrandizement—and the plea for security bases involving tiny islands that have no political, ethnological, or economic problems and can be used solely for defense against attacks from the sea or air against the American people.

The Question

EXTENSION OF REMARKS

OF

HON. ROY O. WOODRUFF

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Saturday, March 24, 1945

Mr. WOODRUFF of Michigan. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following poem by Frank Carl Smith:

THE QUESTION

(By Frank Carl Smith)

(Dedicated to peace with justice)

Is this a fight to free man's mind
From tyranny and sham—
To revive the hopes of human kind
For a better future plan?

What good are battles fought, tho' victory won,
If seething hates more power brew,
And in the years to come
Revive the lust for greed anew?

Are humans to be but shells of men,
Of starving, roaming, homeless tribes?
Is right o'er might soon to begin
Bringing hope that man survives?

Can man afford so much wealth destroy?
Will debt piled on cities lain in ashes deep
Build a better tomorrow, that we might employ
Our God-given skills and society keep?

How long will man stand silent
And see his brothers maimed,
And all his earthly wares are spent
With countless millions dead—unnamed?

Who are these guardians of death,
Whose fancy words betray
The cause of human freedom
And thoughtless masses sway?

Will man e'er learn to live
In tolerance, and number quarrels few,
And, thus, in living, learn to give,
That men be brethren, shall come true?

How can we let our future rest,
When blood-stained hands of every race
Revive the force that we suppress
And bring our triumph to disgrace?

Must we underwrite the spoils of war?
Will our conscience then be free—
Knowing that all men of truth deplore
Vengeance to honor in victory?

Is human greed so strong, and mind so frail,
That peace with justice cannot reign?
Does not the victor's fruits entail
His own past be searched again?

If we allow a lust for power
As empire's tribute to the ages carve,
We betray our God this very hour,
For hate will thrive and liberty starve.

Malice Toward None

EXTENSION OF REMARKS

OF

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. DINGELL. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an interesting and timely

editorial comment from the Flint (Mich.) Journal of April 22, 1945. I commend it to you because it reflects the broad tolerance and generosity of one of the finest citizens in America. It is at the same time a tribute to James A. Farley.

MALICE TOWARD NONE

President Truman, in his speech to the armed forces, chose a famous paragraph from Lincoln's second inaugural address "to indicate my sentiments, and to describe my hope for the future"—

"With malice toward none; with charity for all; with firmness in the right, as God gives us to see the right, let us strive on to finish the work we are in; to bind up our Nation's wounds; to care for him who shall have borne the battle, and for his widow, and his orphans—to do all which may achieve and cherish a just and lasting peace among ourselves, and with all nations."

It is both heartening and significant that the new President has turned to the example of Lincoln. "To bind up our Nation's wounds" has more than war meaning. War is the greatest of unifying forces, but peace lies ahead. Interests that were divergent before the war must be helped to find common ground. Lincoln's achievements as a politician of highest type, a master of compromise, show the way.

James A. Farley, in a notable Lincoln Day address, said:

"I do not know that Lincoln's principal significance is as a politician, but that was certainly one of his great contributions, and it is worth thinking about a little in these times.

"It is not easy for us today to believe that Lincoln was pictured in his lifetime as a weak man. It was said that he did not follow a clear line of policy; that he wavered, and that he was dominated by stronger men around him. * * *

"Being a first-class political leader, Lincoln had the wisdom to call in and consult all sorts and kinds of men. Again, with fine political instinct, he frequently allowed his visitors to believe that they were really initiating the policy of the country. * * * Only later, as the whole truth comes out, have we discovered that it was Mr. Lincoln who made the policy, though he was humble enough and adroit enough to allow lesser men to believe that they were running the Government.

"Somewhat the same thing was true of his alleged indecision. We know today that he was constantly calculating the political support needed to bring the Union together. He was constantly trying to bridge the wide gap between all sorts of groups. Each one of these groups thought they had the method of saving the country; yet Mr. Lincoln knew that if the country was to be saved, he needed to get them all working together."

Despite his strong antislavery feeling, Lincoln, in his 1860 campaign, "was careful to emphasize those elements which would hold the country together, rather than those which would split it in two," Mr. Farley said. If Lincoln had not had to wait until March 1861 to take office, he believes the war might have been avoided. In the months between Lincoln's election and inauguration, the extremists had their way over the moderates who, on both sides, probably were in the majority. Lincoln had no chance to use political methods for a solution.

"Perhaps we—all of us—will be a little more humble and a little better advised if we take the lesson to ourselves," Mr. Farley continued. "Bitter feelings are not unknown in politics today. We do not have to go back to the Civil War to find people who feel strongly about national affairs, indulge in personalities, and very sincerely believe evil of men without reason. * * * All of us in time may learn to feel that the men who are trying for a common agreement are usually safer guides than the men who are trying to make divisions and stir up hostility."

As true now as in Lincoln's time is his doctrine "that democracy would be impossible if nobody ever agreed," Mr. Farley said.

"Consequently I know that if issues are not discussed on their merits, but on personality; if any political group tries to stir up hatred, and, of course, thereby provokes hatred on the other side, or if resort is had to the tactics of abuse, it becomes increasingly difficult for these groups ever to agree again."

Although, as Mr. Farley added, "even in our wildest political conflicts today we do usually remember that there is something to be said for the other fellow's point of view," there have been many times in the recent past when some have at least come close to forgetting. As we face the difficult adjustment to peace, all groups and interests can best serve their country by proceeding "with malice toward none, with charity for all."

Secretary of State Stettinius' Address at San Francisco

EXTENSION OF REMARKS

OF

HON. LUTHER A. JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. LUTHER A. JOHNSON. Mr. Speaker, under leave granted to extend my remarks, I submit herewith the address of Secretary of State Edward R. Stettinius, Jr., at the second meeting of the United Nations Conference on International Organization at San Francisco:

Fellow Delegates to the United Nations Conference on International Organization, 3 years ago the forces of tyranny and aggression seemed on the very point of conquering the world. Today, on every front, they are face to fact with defeat—utter and complete defeat.

It has taken years of toil and sacrifice to bring us to this moment. But the doom of the aggressor nations was sealed long ago. It was sealed in Washington on January 1, 1942, when the United Nations Declaration was signed.

Our enemies could conquer only by keeping us divided. Instead we confronted them with a free and voluntary association of nations united in purpose and without equal in human and material resources. This unity neither force nor subterfuge has broken. Against the common will and the common strength of the United Nations, our enemies have hurled their propaganda and their armed might in vain.

For centuries to come, men will point to the United Nations as history's most convincing proof of what miracles can be accomplished by nations joined together in a righteous cause. It is a unity achieved in spite of differences of language and custom, of cultural tradition, and of economic structure. It is a unity which proves that no differences of race, color, creed, history, or geography can divide peoples united in a higher community of interest and purpose.

Our first objective has been the defeat of our enemies. But from the beginning the United Nations have pursued another objective—one which is equally necessary to each one of us. It is the objective which gives ultimate meaning to all the sacrifice and suffering of these tragic years. We are united not only for survival, not only for military victory. We are united above all in the necessity to assure a just and an enduring peace in which the peoples of the world can work together to achieve at last freedom from fear and from want.

We have made a better beginning toward the fulfillment of this purpose than nations have ever made before.

For this purpose the responsible leaders of our nations and their representatives have met in Moscow and in Teheran, in Cairo, in Quebec, at Dumbarton Oaks, and in the Crimea.

Because of our common understanding that economic security goes hand in hand with security from war, United Nations conferences were held in Atlantic City, Hot Springs, and Bretton Woods on cooperative measures for relief, to meet common problems in food and agriculture and to prepare the financial basis for economic reconstruction and an expanding world economy in the post-war world.

At Mexico City the Inter-American Conference on Problems of War and Peace strengthened the ties between the republics of the Western Hemisphere and prepared the way for a close integration of the inter-American system with the world organization.

Yes; the United Nations have long been at work together on many preparations required in building the structure of lasting peace.

Here at San Francisco we have come to the decisive point in these preparations. The purpose of this Conference is to prepare the charter of an international organization to maintain peace with justice in a free world of free men.

I believe that it was a wise, indeed a necessary, decision to limit the work of this Conference to that great task.

It was a wise decision because writing the constitution of a world organization to maintain peace in the future is a task wholly separate from the punishment of the international gangsters who started this war.

It was a necessary decision because establishment of the world organization must be kept above and apart from the peace settlements if the organization is to be able to deal freely and justly with future threats to the peace that may arise from any cause, including these settlements.

Preparation of the charter of the world organization should not, therefore, be entangled with the many and complex political and economic issues involved in the defeat of Germany and Japan. And the imminent collapse of organized German resistance makes it all the more important that the world organization be established at the earliest possible moment.

To deal with these other issues there will have to be many other conferences and many other decisions, both national and international. We have no time to lose.

Success at this Conference will not of itself assure enduring peace. The whole structure will take years to build. But without agreement on a charter of the world organization, the structure of peace cannot be built at all.

A house cannot be built without a plan or without a foundation. Here at San Francisco the United Nations must draw the plan and lay the foundation.

Upon this foundation and in accordance with this plan the framework of the structure will be erected when the United Nations have ratified the charter by their respective constitutional processes and brought the world organization into being. It is only around this framework that we can complete the structure of peace with all the other agreements on political, economic, and social problems which we must reach together.

At this Conference we have, therefore, undertaken a responsibility on which all else depends. We have undertaken to draw up the charter of an international organization strong enough to prevent war and flexible

enough to allow for peaceful development and change.

The outlines of such a charter are contained in the proposals formulated at Dumbarton Oaks last fall by the representatives of the Republic of China, the Union of Soviet Socialist Republics, the United Kingdom, and the United States of America.

These proposals were formulated after years of preliminary study. They represent in their essentials the highest common denominator of thought among the four sponsoring nations. They are being presented to this conference as affording the basis of the charter of an international organization.

The proposals were submitted months ago to the most searching examination by the Governments and peoples of all the United Nations. Since then many constructive suggestions have been made toward their improvement. Some of these suggestions—and others which may emerge from our discussions here—will undoubtedly be reflected in the final draft of the charter. And the charter itself should be open to whatever later amendment experience may dictate as wise.

We must always bear in mind, however, that there are at least two conditions essential to the establishment of a world organization which can successfully maintain peace.

One of these conditions is that those peace-loving nations which have the military and industrial strength required to prevent or suppress aggression must agree and act together against aggression. If they do not agree and act together, aggression cannot be prevented or suppressed without a major war. This fact has certainly been spelled out by our experience in this war.

That is why the first step toward establishment of the world organization was to prepare proposals on which the nations sponsoring this Conference could agree. That is why, in the structure and powers of the security council of the world organization proposed in the Dumbarton Oaks plan, provision was made for this essential agreement and unit of action by the major nations. Without this we cannot hope to build a world organization which will provide security to all nations, large and small. Without this we cannot hope to develop enduring institutions in which all free nations may participate on a basis of sovereign equality and in which justice and respect for law will apply to the powerful as well as to the weak.

The second essential condition of success in our endeavor is the voluntary cooperation of all peaceful nations, large and small, acting with full respect for the equal sovereignty of each, to promote justice among nations, to foster respect for basic human rights, and to solve those common problems upon which the security and the economic and social advancement of their peoples so largely depend. There can be no end to the tyranny of fear and want unless the proposed world organization commends the allegiance of both the mind and the conscience of mankind.

The International Court, the Assembly, and the Economic and Social Council and its related agencies are the institutions proposed at Dumbarton Oaks which would have the major responsibility in these fields. They are of the utmost importance. Widespread economic insecurity and poverty, ignorance and oppression, breed conflict and give aggressors their chance. Measures for security against aggression, no matter how effectively contrived, will not alone provide the assurance of lasting peace. We have also to work effectively in close cooperation together toward rising standards of living and greater freedom and opportunity for all peoples, of every race and creed and color.

In the preparations for this conference we have sought from the beginning to build with vision and with justice, but to build always upon the realities and upon hard-won experience.

To build upon a millenial idealism, however fine in theory, would be to build upon quicksand. To build only on the collaboration and interests of the major nations would be to deny the community of interests of all nations.

We have sought instead to assure that the strength of the major nations will be used both justly and effectively for the common welfare—under the law of a world charter in which all peaceful nations are joined together.

We began by seeking common understanding among the sponsoring nations on basic objectives and on the essential machinery for action. These are the nations which have united their strength against the aggressors so successfully in this war. We proceed now by seeking agreement among all the nations, large and small, which have been united against the common enemy.

This is a conference of United Nations, the nations that loved peace and freedom enough to fight for them. The international organization we seek to build is one that is based upon this inescapable fact of our time—that peace and security will be the right of those nations which are willing to share in the responsibilty for keeping them. Tyranny and barbarism have never recognized neutrality. They never will. We do not intend to build a world organization that will overlook this cardinal fact. We do propose that, after it is established, the organization be open to membership of all other nations which have demonstrated their willingness and ability to fulfill their obligations under the charter.

I have reviewed briefly the preparations for this Conference and our thinking on some of the major problems that we must meet here.

We cannot expect at this Conference to produce a charter which will answer all the questions or resolve all the problems. No charter, no constitution, no basic document was ever drafted that was not open to improvement.

We Americans have a convincing proof of that in our own history. Our Constitution under which this Republic has grown and prospered for a hundred and fifty years, was by no means satisfactory to all the citizens when it issued from the Constitutional Convention of Philadelphia in 1787—or even satisfactory to all the delegates to that Convention. It lacked many provisions which numerous Americans of that day believed to be essential. Yet it was adopted by the requisite number of States in 1789. Only 4 years after the Constitution was written the first 10 amendments went into effect, and 11 other amendments have been made since then.

What was true of the Thirteen States which joined to form the United States is true also of the nations which have met in this Conference to consider the proposed organization of the world for security and peace. Let us construct the charter of the world organization as soundly as we can. But let us not sacrifice approval to perfection.

Let us act now in the sure knowledge that our work can be improved upon with time, but that if we fail to act we are likely to lose altogether the opportunity which has been given us to prevent another world war.

Fellow delegates, as we enter upon our great task we cannot forget the millions of men of our armed forces who have given their lives to this cause, nor the other millions of men, women, and children who have suffered the cruel agonies of starvation, torture, and death. We cannot forget the untold destruction that has been wrought. Nor can we forget how close our whole civilization has come to utter ruin.

It is our supreme responsibility, at this Conference and afterward, to see to it that this calamity never again falls upon the world.

Vision we must have to see clearly that without peace and security for all nations, there will be no peace and security for any one of us.

Courage we must have to carry us through trying delays and temporary misunderstandings and lesser differences to the fulfillment of our common purpose.

Faith we must have in the ability of mankind to make peace with the same resolute devotion that the United Nations peoples have given to fighting this war.

That vision, that courage, that faith, inspired the great American leader whose life was given to the cause for which we have here met—Franklin Delano Roosevelt.

It is only with such vision, courage, and faith—expressed in a thousand different ways—that the United Nations have been able to travel so far along the hard road to final victory. It is only with this vision, courage, and faith that we shall make peace secure for ourselves—and for succeeding generations.

Veterans' Housing

EXTENSION OF REMARKS

OF

HON. WALTER H. JUDD

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. JUDD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution:

UNIVERSITY OF MINNESOTA,
Minneapolis, April 24, 1945.

RESOLUTION CONCERNING VETERANS' HOUSING

The regents of the University of Minnesota, on April 13, 1945, adopted the following resolution:

"Whereas the termination of the war will release from service large numbers of veterans who will wish to return to or enter upon college and university courses; and

"Whereas the provisions of the Public Laws 16 and 346 will stimulate many of them to pursue a higher education; and

"Whereas this post-war increase in enrollment above the normal will result in serious problems of housing veterans for the colleges and universities, whose facilities even now are generally limited; and

"Whereas unless the veterans are adequately housed they will not be able to take advantage of the educational programs which will prepare them for resuming their place in civilian life: Therefore be it

"*Resolved*, That the regents of the University of Minnesota, in cooperation with other State and publicly supported institutions of higher education, urge upon the Congress the enactment of legislation to provide funds on a matching basis for the construction of housing for veterans at such institutions; and be it further

"*Resolved*, That the proper administrative officers of the University of Minnesota are authorized to take such steps in cooperation with other publicly supported institutions, and looking toward the construction of adequate housing for veterans, as may be deemed desirable to indicate to the Congress the need and the desirability for legislation."

Trade Agreements

EXTENSION OF REMARKS

OF

HON. BEN F. JENSEN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 27, 1945

Mr. JENSEN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following testimony before the Ways and Means Committee, May 1, 1945, by Carl H. Wilken, economic analyst, Raw Materials National Council, Sioux City, Iowa, prepared and presented in behalf of the National Association of Commissioners, Secretaries and Directors of Agriculture, and the Raw Materials National Council, Sioux City, Iowa:

Mr. Chairman, members of the Ways and Means Committee, this is either the third or fourth time I have appeared before this committee in regard to trade agreements and the effect of tariffs. My testimony in previous hearings has been based on the record of the United States in the past.

In previous testimony I have pointed out that our raw material income and especially our farm income is the governing factor in our economy. This basic fact has not changed, even though conditions have.

Since my last appearance before this committee, I have carried on a detailed study of our economy and the correlation which exists between the various segments such as agriculture, employment, mining, manufacturing, transportation, trade, etc. The gross farm income in the United States is the foundation from which all the others ratio out, with almost mathematical precision.

The Curtis Publishing Co., of Philadelphia, after checking the analysis, the various graphs and tabulations, published an article in regard to our research work in the December issue of the Country Gentleman.

The article was entitled "The Key to Prosperity" and in it they accepted the basic laws of exchange and ratios that we found in analyzing the past record of the Nation. The ratio is quite simple, namely, that in the United States each dollar of farm income creates a dollar for factory pay rolls and $7 of national income.

The United States Chamber of Commerce, in their report on agricultural income in April 1944, also pointed out the quite constant ratio of $1 of farm income to $7 of national income that apparently exists.

No one has been able to refute this ratio which we first presented to a subcommittee of the United States Senate in Sioux City, Iowa, at a farm hearing in 1937. The ratio has not changed since that time even with a war economy, but there are those who ask, "Well, how do you know the farm income comes first?" To a man with a practical nature the very fact that a man must eat before he can work should be proof enough. For the benefit of the committee, I want to point out briefly why in our capital form of economy the farm income is the governing factor.

In our Nation we have roughly 9,000,000 business units, of which approximately 3,000,000 are nonagricultural. The other 6,000,000 business units are our 6,000,000 farms. Each of these farms is a business unit producing and processing products for trade and commerce, and the capital investment in each on the average is as large as the average capital investment in the 3,000,000 which are nonagricultural. Therefore, it ought to be self-evident that with agriculture having two-thirds of the capital investment in productive enterprise in the United States, any rise or fall in farm income automatically creates a rise or fall in the income of the Nation as a whole.

With this ratio of income in existence, this committee can have a quite accurate yardstick to gage the results of any action which it may take in regard to tariffs or post-war taxes.

Any legislation which tends to reduce our farm income, either through curtailment of production or lower prices to the extent of a billion dollars will automatically force the wiping out of a billion dollars of factory pay rolls and $7,000,000,000 of national income. Greater reductions pyramid according to the ratio.

The loss of such income is automatically reflected in less tax collections and a loss in employment because of the reduction in consumer buying power throughout the Nation. Our loss in foreign trade will also ratio to our loss in farm income. For example, in 1938 our imports dropped to $1,960,000,000 from a total of $3,083,000,000 in 1937. The trade agreements were in operation and the drop cannot be blamed on tariffs which in my estimation are a barrier to trade only when they are above or below the American parity price level and even then to only a limited extent.

The real barrier to trade in the United States and the rest of the world is the price of raw materials and the resulting loss of purchasing power when farm prices drop. The loss in imports was the result of a drop in farm prices. In 1938 our gross farm income dropped over $1,000,000,000 and our national income dropped over $7,000,000,000 or in ratio to the formula I have given you.

A similar happening took place from 1929 to 1932. With a drop of over $6,000,000,000 in farm income from 1929 to 1932 our national income dropped approximately $45,000,000,000. This loss in farm income caused the wiping out of almost all our domestic and foreign trade with the exception of the necessities of life such as food and clothing and transportation.

The facts which I have pointed out to you are not theory but the record of what took place.

Instead of correcting the price of agricultural products we brought forth the trade agreements and various other measures as a cure. The only real measure of success which we had in the period from 1930 to 1940 was to increase the national debt.

The trade agreements were brought forth to increase the exports of farm products. The facts were that no power on earth could have restored our exports of farm products because our agricultural economy has been deficient ever since 1922.

It is true that in the case of cotton and wheat we had a surplus of about $400,000,000, but in spite of this our net imports of farm products from 1934 to 1941 ran about $600,000,000 per year. In 1941 with consumer buying power restored in the United States our net imports of farm products were over a billion dollars.

Since 1910–14 our exports of farm products, using that period as a yardstick of 100, dropped progressively to 49.4 percent in 1940 while on the other hand our imports increased progressively to 209.8 percent.

This record is positive proof that our agricultural tariffs since 1922 have not been a barrier to imports of farm products.

In the period 1910–14 up to 1940 our farm production increased 32.5 percent while our population growth was 38.9 percent. In spite of all this we passed and are asking for extension of the trade agreements to dispose of surplus farm products. Since 1940 our increase in population, on the basis of our American income level, is a greater market than all our export trade in 1940. In addition an increase of $80 per year in the wages of our 55,000,000 workers is equivalent to all exports in 1940.

The simple facts are, gentlemen, that our foreign trade depends on the production of American products and the price we maintain on them. Our foreign trade is merely a byproduct of our American economy.

I think I can prove this to better advantage by pointing out that of the 9,000,000 business units, nonagricultural and agricultural, all of them put together exported products equal to less than 5 percent of our national income during the 1933–40 period. I would like to point out in addition that of the 3,000,000 nonagricultural units, 96 percent of them employ 19 men or less. I have pointed out that the two-thirds of our capital industry agriculture had net imports of its products. With 96 percent of the nonagricultural units employing less than 19 men and many of them domestic trade and service units, it should be quite apparent that the only group who receive any benefit from the trade agreements are the large industrial groups, sometimes called the "economic royalists. They hire the best economists and that may give the committee the reason why a large percentage of our economists are for the trade agreements.

The depression of 1929 was completely misinterpreted by our economists. It was not due to lack of foreign trade because our Nation has had more than its share of world trade. With only 6 percent of the world's population we have been having, good times and bad, about 15 percent of the world trade. We might ask ourselves just how much are we entitled to? It appears that if we reach out for a greater percentage than we now have we may get into quarrels with other nations.

We have had tariffs ever since the first session of the first Congress. During all that period of over 150 years we have outstripped all the rest of the world with both a higher living standard and a much greater increase in our own productive capacity.

This being true let us also ask ourselves the question, why all the effort to obtain foreign trade when we can produce everything with the exception of 5 percent in the United States. Any attempt to increase our foreign trade will force us to reduce our own production and therefore be against our own interests and the world as a whole.

Our position in the world of tomorrow should be that of a referee and not that of a commercial power. To put us in a position of exporting manufactured goods in exchange for raw materials will be a direct repudiation of the Atlantic Charter. In the Atlantic Charter we proclaimed that we were going to make raw materials available for all the world. With only 6 percent of the world's population we have 25 percent of the available war material supplies and we cannot live up to the Atlantic Charter and import raw materials which other nations should have.

The real cause for the depression in 1929 was not tariffs but a complete break-down in the world's monetary system. Devaluation of foreign currencies had the indirect effect of wiping out most of our tariffs before the trade agreements program was put into operation. The result of this break-down in world price levels forced our price level to follow because we did not adjust our tariffs to offset the currency devaluation.

The break-down in our price level in the 1930–41 period forced the United States to suffer a loss of approximately sixty-seven and five-tenths billion dollars of farm income in the 12-year period, and in turn a loss of $473,000,000,000 of national income. Of this loss approximately $25,000,000,000 was our loss in export trade that we could and should have had with proper tariff protection.

If through the trade agreements, Bretton Woods, Dumbarton Oaks, and other announced polices we permit our price level to be reduced to the 1939 level, our Nation will take a loss of $75,000,000,000 per year. I therefore urge this committee to tread slowly on unknown waters.

In order to give the members of the committee an idea of the loss which their own States will suffer, I will give a few examples.

My own State of Iowa, by being forced to produce and sell at the 1939 level, will lose a billion dollars. New York State, which has often been a promoter of high tariffs for industry and low tariffs for raw materials because of its investments in industry, will lose over $8,000,000,000, or more than all the foreign trade that we can hope to gain under a program of W. P. A. loans to the rest of the world.

The State of Virginia will lose a billion dollars, Michigan will lose $3,000,000,000, and incidentally, a market for about 3,000,000 cars; Illinois, five billion; Ohio, four billion; and California, five billion.

Our total farm income will drop off $10,000,000,000, our factory pay rolls will be reduced $10,000,000,000, retail sales will be off $45,000,000,000 from our present potential, and we will have 20,000,000 unemployed.

I am here merely to warn you of what can and will happen if some of the announced policies and plans are carried out. I am for all the foreign trade which our economy will permit, and I am for the restoration of a sound world monetary system as a foundation for world peace. It cannot be done, however, by bankrupting the United States.

I have followed the meetings at Dumbarton Oaks, Bretton Woods, the meeting in Mexico, and have read of how the trade-agreement program is the cornerstone of them all. The program which is being proposed and planned in behind the scenes will force our price level back to the 1939 level and will bring about the results I have mentioned.

We are seemingly throwing all caution and leadership to the four winds and placing the resources of the United States in the hands of the rest of the world to use and price as they see fit. With our production and resources priced at the world level, we are a bankrupt Nation.

I don't think that this committee wants that to happen and we don't have to permit it to happen. To prevent it, however, we must present a program to the rest of the world which will permit a solvent United States. Instead of a program which would have us join world poverty we must have one in which the rest of the world can join us in prosperity. Such a program can be offered.

Let us analyze briefly foreign trade and commerce. The ability to buy depends on one of two things, income obtained through credit by the buyer or a price for the production of each nation so that they can earn the income for exchange.

The world economy of the past has been based primarily on loans. Because of an exploitive price level which prevented the repayment of loans the world banker, England, landed in bankruptcy. Now we are being asked through the Bretton Woods agreement to underwrite world trade and through the extension of the trade agreements maintain a low price level which in turn will mean that the loans will never be repaid.

And what have we to gain? A few weeks ago I attended a meeting addressed by Mr. Clayton and one of the points he made in favor of the whole program which we are being asked to rather blindly accept was that it would employ about 6 percent of our labor force in export trade. He forgot to mention that if we were to be paid for the exports with imports, we would also import at least the same labor equivalent. The simple facts are that foreign trade paid for with goods will not increase our employment. Of course, if we wish to make loans to buy our own goods, then we can gain employment for the time being. But even then at a very high cost. At present levels it costs roughly a sum of $3,000,000,000 to create a million jobs. Or, stated in another way, 50,000,000 workers at $3,000 per year create the buying power for the Nation as represented by $150,000,000,000 of national income.

There may be some doubt in the committee's mind that present plans will bring about 1939 price levels. I would like to give you my reasons for that conclusion.

In the first place, approximately 60 percent of the world's population is earning 20 cents a day or less. They have no great buying power, and if our raw-material producers are forced to compete at that level even our efficiency cannot meet their ability to buy.

As examples of these imports, I want to give you a few samples as given in the plans of the National Planning Association, 800 Twenty-first Street NW., Washington, D. C., in regard to future world trade.

They expect to bring in, for example, 2,000,000,000 pounds of fats and oils which, of course, will compete with cottonseed oil, butter, lard, and other oils; 1,000,000,000 pounds of meats; 1,000,000,000 pounds of burlap; 1,000,000,000 barrels of petroleum; 600,000,000 pounds of copper; 1,000,000,000 pounds of zinc; and practically all our needs of manganese. The prices listed are such that if the program is put into operation, it will close our mines, force down the price and production of agricultural products and the resulting loss in income I mentioned.

The names listed in this planning association are very close to and in accord with the sponsors of present plans for peace and trade. The world cannot recover without a solvent United States, and to me the plan means chaos. Smaller nations, of course, had no choice and accepted what was offered.

If a program had been worked out to give nations a proper price for their product, they would have, in my opinion, accepted even more readily. With a proper price for their products to earn exchange they wouldn't have to borrow money.

The Bretton Woods agreement, in my estimation, practically threw gold and silver to the four winds as monetary metals. In theory they have evidently decided that scraps of paper are just as good. It is my frank opinion that the two-thirds of the world which does not have a banking system as we have, will want coinage or hard money. If that is the case, which I think it is, why not be realistic and have metal coinage as a foundation for world exchange.

Gold can be set up at its present value at $35 per ounce, a price to which the world has become accustomed; silver can be brought to parity with gold, using as an example the price ratio that existed between the two metals in 1910–14.

Commodity prices could then be stabilized at our parity level, the price we need for national solvency, and we would have world parity and a chance for the world to have prosperity instead of poverty as a foundation for world peace. If we are going to agree to something, then let us use arithmetic and agree to something that doesn't put the skids under our own Nation.

With such a world program this committee could safely remove all tariffs even for the protection of the steel barons. We should be realistic, however, and realize that in much the same way that we as a nation grew to our level through tariffs, other nations who wish to establish industry will need them to get under way.

With world prices stabilized at the American price level, world trade could be quadrupled in a few years.

You have a right to ask whether such a program would be acceptable to other nations. I think I can safely say that it would.

At the recent Mexican Conference our State Department presented a blueprint for world free trade. The South American countries didn't want it. Mexico wants to protect its growing steel industry and Brazil desires to protect industries she has started during the war. I feel that they should be given that right.

The final result of the meeting was a very important section, namely, subsection (b) of resolution 15.

"That a fair and equitable relationship should be sought between the prices of agricultural and mineral products and those of manufactured articles and that all prices should be fair to producers and consumers alike."

That in essence is parity prices for raw materials and can be implemented with gold and silver at parity as I have outlined above. With the matter of parity agreed to by all the nations at the Mexican Conference the question is at what level?

To maintain a solvent United States we must maintain our price level as it now exists. Therefore, we have only one choice, and that is to protect our price level with tariffs at the parity level until such time as world parity, with our parity level as the yardstick, is properly implemented with a reorganization of the world monetary system and with basic commodities stabilized at parity with the exchange medium.

The program outlined is not theoretical but based on the factual dislocation of money and commodity prices in the period following 1910–14. In fact, our parity price level was the world level in both the 1910–14 and 1925–29 periods. Our price level of today as given by the Bureau of Labor Index for all commodities is 105 percent of the 1926 level. The only thing which will prevent our parity level from becoming the yardstick for world price levels is the leadership on our part to bring it about.

The citizens of the United States are relying on this committee to be one of the first to protect our Nation. Sometime in the future you are going to be asked to make proper tax levies with which to refund the national debt, and it is only natural that you should wish to maintain the income of the United States.

There are two parts to economy. One is production, and the other is price. Nature gave us the raw-material resources to produce, the Constitution of the United States gave Congress the right to regulate the value of the American dollar, which, in turn, is the price of our production. Failure to properly protect the value of our dollar either through the price of commodities or other measures such as tariffs is to fail to protect the welfare of the American people and our form of government.

The time has come when we must make a decision. To join the world economy by reducing our price level to world levels will mean a return to the economy of the seventeenth century and going back to an economy that our forefathers ran away from.

To restore world economy on the basis of our American economy means that we would give to the world the kind of economy which time has proved as the one which gave the people in the United States the highest standard of living in the world and at the same time the lowest food cost on the basis of per capita income of any nation in the world.

My advice to the committee is make haste slowly. If you don't feel that this measure before you can be amended to require that no trade agreements can be made for imports below the American parity level, you can at least merely extend the law for 1 year in order that we may know how the cards are stacked.

As I have pointed out, we have $75,000,000,000 per year at stake, and it is no time to play "blind pitch."

In closing, I wish to point out:

1. That the trade-agreements program did not increase the export of farm products but instead increased imports of farm products which in turn prevented the recovery of our normal condition of parity prices for farm products.

2. That the trade agreements, when deductions are made for loans and foreign travel, did not increase our exports of all products.

3. That our dollar value of foreign trade is determined by the governing factor of our own economy, our farm income.

4. That the physical imports will ratio to the percentage of farm parity.

5. That a reduction of our price level to the world level will mean national bankruptcy and the continuation of world poverty.

6. That the course which we should follow is to maintain our parity price level and with it as a yardstick, to help reorganize the world monetary system and commodity price level, thus protecting the solvency of the United States and at the same time give the world an opportunity to have prosperity through production rather than loans at our expense.

Officials Keep People Confused So Inflation Continues Unchecked—Financial Authority Gives Clear Picture of Our Inflation Danger

EXTENSION OF REMARKS

OF

HON. HOWARD H. BUFFETT

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. BUFFETT. Mr. Speaker, after the war ends, if not before, it is almost certain that deficit spending by the Government will be recognized as America's most critical problem.

To the man on the street this problem becomes real as his money loses more and more of its buying power. Thus far the steady inflation and expansion of our currency and bank credits has been kept obscured—so effectively, perhaps, that even we in Congress have become caloused to this danger. But continued self-deception on this danger can result in a financial disaster that may hit with a sudden fury and national destructiveness far surpassing the Japanese attack at Pearl Harbor. I discussed this danger of an economic Pearl Harbor in this House 2 years ago. I deeply believe that I have no duty in Congress more vital than to continue to endeavor to focus attention on this insidious danger.

The painful symptoms of inflation are rising prices. They have been concealed by the economic drugs or anesthesia known as the O. P. A., subsidies, rationing, and so forth.

Nevertheless, as actual inflation, deficit spending, has gained momentum, several economic developments have become quite distressing. The acute meat shortage and the black markets are examples. Unfortunately historical data indicates these conditions are self-accelerating, unless genuine corrective measures are adopted.

Surely we in Congress can serve America best by facing this problem realistically. A. A. Mol, now of New York, was in business in Holland during the currency chaos that followed World War No. 1. His experience with inflation, deflation, and devaluation in surrounding European countries at that time, plus continued study of currency problems since, qualifies him in my judgment as one of America's few experts on inflation.

The following is a partial statement of his views:

It is difficult to talk about inflation because various people mean various things by the word "inflation." Therefore, people often discuss this subject without understanding each other.

To the man in the street, "inflation" is a word to indicate rapidly rising cost of living, and deflation means a rapid decrease in the cost of living. In this sense the word indicates the final symptom of the phenomenon.

The economist goes a step further back and thinks of inflation and deflation as the economic causes for changes in cost of living. He differentiates between types of causes for such changes. There are two main types.

The first type is called business inflation and deflation. This form of change in the cost of living is by its nature self-limiting in extent and gives rise to the fluctuations in cost of living and in business activity which we know under the name of business cycle. It is possible to look for the causes of the business cycle one step further back than the economist does. They lie in the nature of living matter. This does not concern our subject.

The second form of inflation may, after its cause, be called government inflation. It is the result of continued large government deficits and leads over a period of time to increasingly rapid rise in the cost of living in terms of currency. Government inflation is not self-limiting in extent; it strongly tends to be self-accelerating. Its end is not deflation; it is stabilization. An angle of government inflation which temporarily is obscured and eliminated under war conditions, is that it leads to a rise in the cost of living in proportion to average wages paid and, consequently, to a decrease in tonnage buying power on the part of the population.

In the case of government inflation it also is possible to go one step further back in looking for the cause than the economist does. In doing that, one discovers that the cause of government inflation lies in the attitude of mind of the majority of the population. Consequently, if one wishes to forecast and understand conditions of post-war government inflation in various nations, one is obliged to study the attitude of the populations.

When we find that—

The people of a nation are willing to pull in their belts and to sacrifice the comforts of today and tomorrow in order to build a better future next year.

The people of a nation insist on caring for their unemployed within their own families and indignantly refuse government contributions.

Business managements after the war offer to work off stocks of raw materials and work in process on government orders in the most economical manner, as far as is possible in their normal business, and charge to the government only actual losses taken, instead of tossing the baby into the lap of the government.

Candidates for office present to the electorate basic thoughts about what they believe to be good and right, and are willing to stand or fall on the judgment the voters render on the merit of their thoughts, instead of spending their efforts on grass-root listening and vote catching.

Top executives in business lie awake at night thinking up a dollar or a pound, or a guilder, extra profit for stockholders and, in doing so, create millions of jobs.

Industry prefers improving the value of its product over continuing to plug the old product with dubious claims.

Returning soldiers make a full 8-hour workday out of finding or originating a job.

The people encourage the Government to continue high taxation, reasonably divided over all classes of the population, including their own.

Parliaments pass tax laws which divide the load of government in proportion to the capacity to pay and to the benefit which each group of citizens derives from law and order, without looking at the ballot box.

Hundreds of similar signs appear.

Then we shall know that such a nation is sound in mind and in heart. Then, until the next world war demands another interruption, it shall have a period of sound finance and of prosperity. Then we need not worry over the details of its future, because then we know that it shall have the strength to meet them as they come along. Man is able to build up and to tear down his physical surroundings with amazing speed, and it is the will that lives in him which causes it to be done.

If, however, the people of a nation are pleasure loving to an exaggerated degree, and if they are shortsighted and willing to sell next year's happiness for tomorrow's creature comfort, then we know that that nation shall have major inflation with all its attendant major horrors, no matter what the economists may say about the economic stage setting within the individual nation and no matter what control measures are taken. Then also it is useless to worry about the details of the inevitable, because it is the spirit of the people within the nation which creates the major trend and so long as that spirit does not change, there is no escape from the trend.

This is not just theory. The deciding influence of the attitude of the people was demonstrated in dozens of countries after the end of the First World War. The war caused economic exhaustion all over Europe. The economic settings in different countries were similar, although not identical. Out of these similar settings there came galloping inflation in Austria, in Germany, in Hungary, in Poland, there came major inflation in France, Italy, and Belgium which destroyed about 90 percent of the buying power of the money unit in 25 years, and there came deliberately created deflation and return to the gold standard in England and in Holland. The difference in the economic results came forth out of the difference in the spirit of the people. That spirit will also determine the financial future of nations after the Second World War.

FORECAST OF PRACTICALLY WORLD-WIDE MAJOR GOVERNMENT INFLATION

We can gauge the spirit at this time in the various nations of the world by the criteria I have put down and by dozens of others which each observer can think up himself. These criteria form the basis for judgment regarding the future of the various national money units of the world.

Probably the spirit in the United States at this time is better than in any other nation which has actively participated in the war. There is less cause for suppressed desire because there has been no violent suffering in the home territory. Notwithstanding this relatively favorable position, if we go down the list of the various criteria, the judgment about the mental attitude of our own population, in each and every case straight down the line, must at this time be unfavorable.

Unless the voting majority of the American Nation is re-educated by brilliant leaders, or unless the population changes its mind through the hard lessons of suffering, we must conclude that the population will vote

in one Congress after another with the instruction to spend and to sell out the future for tomorrow. Congress has the duty to reflect the will of the population. That means the prospect of progressive currency depreciation in terms of buying power. It does not mean that there could not be one, or even more, setbacks in the cost of living. It means, however, that, if and when setbacks occur in the cost of living and when, consequently, business pulls in its horns frightened by falling commodity prices, the sluice gates of spending will be opened wide. The result of temporary setbacks in the cost of living, if they should occur, will be further acceleration of the process of inflation, although inflation will go also on without them.

Mr. Speaker, the warning contained in Mr. Mol's analysis of our inflation problem must not be ignored. Nor has this problem been made easier by clever propaganda which has confused the people of America by making them think that the O. P. A. or other devices can enable us to avoid a day of reckoning from the many years of deficit spending.

The responsibility for this strain and peril to the public credit rests on the New Deal administration. However, as these difficulties eventually become critical, it is probable that clever efforts will be made to shift responsibility for this financial Frankenstein away from the New Deal that nursed it to its present terrifying proportions. With the propaganda machinery already in the hands of the Government, plus the dominated radio and movie, it is possible such an attempt to evade and shift responsibility could be effectively made. It behooves all lovers of liberty to be watching for its appearance. The administration borrowed and spent the money. Those acts created the existing concealed inflation, and in the final outcome the administration must be held accountable by the American people.

Undoubtedly, our new President, Harry S. Truman, is aware of this dangerous situation. In any and all constructive efforts that he makes to solve it, he should have the energetic support of Congress, regardless of party. There are, of course, only two genuinely constructive methods for correcting this evil—increased governmental revenues and/or decreased governmental expenditures. More controls in the Gestapo fashion are not constructive, and only intensify the universal trend toward ruthless regimentation of the people.

Although the Republican minority has, with few exceptions, opposed the reckless spending of the Administration, both before and during the war, it must put its shoulder to the wheel in getting the Nation back to a balanced budget.

When the President attacks this job courageously, it will be everybody's job to help him. Regardless of the guilt attached to the Democratic Party because of their reckless waste, all of us must help end it. The people must never allow those who have held full power from 1933 on to evade their responsibility for this inflation, but we of the minority must help unstintedly when this problem is honestly reckoned with. A balanced Budget is the all-American goal, and the future of America depends upon it.

International Office for Education

EXTENSION OF REMARKS

OF

HON. EUGENE J. KEOGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. KEOGH. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement made by the presidents and chancelors of 500 American universities and colleges, calling for the establishment of an International Office for Education, which declaration was forwarded to the American delegation at the San Francisco Conference. A House resolution by Mr. MUNDT, of South Dakota, covers the suggestion of an International Office for Education.

The declaration is as follows:

Widespread discussion of the proposals for an international security organization to maintain the peace following the Dumbarton Oaks Conference is an encouraging indication of the maturing of America's thinking on its foreign and international policies. Educators are, naturally, particularly interested in the formation of public opinion on our foreign policy and our place in an interdependent world.

It is of the utmost importance to remember that the peace of the world cannot be maintained by police power or economic or social arrangements alone. For the success of a world security organization there must be developed a climate of world opinion which not only wants such institutions and arrangements but also wants them to succeed. This requires the establishment of some means by which the nations and peoples of the world can attain to a higher standard of education and a better understanding of one another.

There can be no realism in international covenants which are not founded upon moral aims and a desire of peoples to understand others as well as to be understood by them. We believe that any international organization which ignores this fundamental principle will prove to be unrealistic and will speedily dissolve into power struggles and imperialist competition.

In a letter written by Thomas Jefferson to James Madison on December 20, 1787, the author of the American Declaration of Independence gave his views on the dependence of peace upon the spread of education:

"And say, finally, whether peace is best preserved by giving energy to the government or information to the people. This last is the most certain and the most legitimate engine of government. Educate and inform the whole mass of the people. Enable them to see that it is their interest to preserve peace and order, and they will preserve them. And it requires no very high degree of education to convince them of this. They are the only sure reliance for the preservation of our liberty."

That sure reliance can be made world-wide. A world opinion which wants peace and which organizes and educates for understanding among nations and peoples is the only sure foundation for a secure peace structure.

The great fear in every heart is that there may be a new war, a third world war, in which D-day may become doomsday. Everyone is aware of the economic dislocations which have resulted from this war. But culture and cultural institutions and personnel have suffered even more grievously. What is left of these institutions should now be enlisted to heal the torn world and to turn men's minds and emotions to the creation of a common well-being. This is a positive approach to a field in which cultural values have too long and too effectively been exploited for destructive purposes through propaganda and psychological warfare.

In furtherance of a climate of world opinion which wants peace and understanding between nations and peoples and in aid of the development of such understanding, we deem it necessary that there be created an International Office for Education. International interest in education must now include not only the instruction offered by universities and furthered by meetings of scientists and scholars, but also elementary, secondary, and adult education of a more informal character.

We therefore urge that the proposals for the creation of an International Office for Education to further educational and cultural relations be given prompt consideration and that action to this end be taken by our Government in collaboration with the other governments of the world.

The Healthful Midlands

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. MUNDT. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Omaha World-Herald:

THE HEALTHFUL MIDLANDS

Representative KARL MUNDT (Republican, South Dakota) arose in the House the other day to chortle a bit about the fact that his State is the healthiest place in America as shown by the lowest mortality and longevity statistics.

The Dakotas, Minnesota, Iowa, Nebraska, Kansas, and Oklahoma have the lowest mortality rate in the Nation. It is a fact that isn't trumpeted nearly as much as it should be.

We are cussed for our climate and we have become almost self-conscious about its extremes. We know it is alternately darned hot and darned cold, that it sometimes rains when it shouldn't, and often doesn't rain when it should.

All in all, however, such contrary weather seems to breed a hardy race. We not only put up with the jibes of those bareheaded, short-pantied Floridans and Californians, but we live longer and have a good time doing it.

The "Four Freedoms" After V-Day

EXTENSION OF REMARKS

OF

HON. ROBERT B. CHIPERFIELD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. CHIPERFIELD. Mr. Speaker, under leave to extend my remarks in the

RECORD, I include the following address entitled "The Four Freedoms After V-Day" by Carter Davidson, president, Knox College, Galesburg, Ill.:

I am making my remarks today in the form of an appeal to President Harry Truman which I feel represents the sentiment of millions of American citizens today.

We realize, Mr. President, that you have been placed suddenly in a spot of great responsibility and difficulty at one of the most dangerous and trying times in the history of the world. We hope that you are going to be strengthened to meet these new responsibilities by a realization that you are backed by the opinions of 140,000,000 Americans. We have hopes that you will succeed, because in the first place you have come from a farm in Missouri and know what the opinions of the Middle West really are and what heart beats of this great Mississippi Valley can be. In the second place, we are hopeful, because you have been a judge and a Senator. As the first, you must have gained a concept of justice and equity. As a Senator you must have learned what is feasible in American Government. And finally, we are hopeful because of the symbolism in your name. If you live up to it and tell the American people the truth about problems which you and they face together, your career as President is going to be a success.

Before long we will be celebrating V-day. At the moment the V will stand for victory, but there will be those who will urge you to change its meaning at once to violence and vengeance. We ask you to remember when this times comes that in America V also has stood for the virtues and the values of a democratic system. After V-day there will be many forces pushing us this way and that, but we ask you, Mr. President, to think chiefly of the foundations upon which our country rests. During the war it has been quite suitable for us to think of the four freedoms as freedom from want and from fear, freedom of speech and of worship, but after V-day we hope these freedoms can be expanded into the four freedoms which have been America's gift to the world and which we want to see restored.

First and foremost of these is our political freedom, a democratic society under a republican form of government. We have been told that the democratic method is too slow for the use in time of war, and we have willingly made concessions, but when the war is over we want to get back to that form of government in which all opinions are truly represented, and a democratic method is used. We agree that Hitler's nazi-ism was quicker, and perhaps Russia's communism is more efficient, but when the price for speed and efficiency is our freedom, the cost is too high.

You will be told by many people that the form of government which we worked out in 1789 is no longer applicable to the problems of 1945, and therefore we must change our Government into a form of socialism in which the main control resides in the Federal Government. Let me remind you, however, that the system of government established in the Constitution of 1789 is the great American contribution to political thought and world society. It has proven its value through more than 150 years of trial, so that we feel justified in asking that the problems which face America today be solved in accord with the principles of the Constitution rather than change our form of government to find an easy solution to our current difficulties. I find it hard to picture Franklin and Hamilton and Washington getting together in the summer of 1787 in Philadelphia to figure out ways in which they could secure old-age pensions, a minimum daily wage, and a Federal bonus for themselves. Their thoughts were centered upon the same problem where your thoughts must be turning, How can we best preserve the freedom of the individual in our social organization? There will be those among your advisers who will point to the article in the Constitution giving Congress power to legislate for the general welfare, and they will tell you that the clause clears the way for you to do anything that you would like with the Government. But let me remind you. Mr. Truman, that even in 1789 there were those who were frightened by threat of these implied powers to our freedoms, and therefore they immediately passed the first 10 amendments to the Constitution, the Bill of Rights, of all American freemen, and the tenth amendment was put in specifically to limit these powers. It states: "The powers not delegated to the United States by the Constitution nor prohibited by it to the States are reserved to the States, respectively, or to the people." We trust that you are going to try to return our political freedom to us, Mr. President, by reserving these powers to the States and to the people.

The second freedom which we would like to see given back after the war is freedom of individual enterprise. Millions of people came to America because in their homelands they had to work in the places and at the tasks and for the wages which the government or the local landowners had established by law. In America they could work if and when they wanted, at the tasks, in the places, and on the terms which they set for themselves. That freedom is what has made American production the greatest in the world. Today it is threatened from three directions. On one side the great corporations, achieving almost a complete monopoly of the means of production, are fighting to crush the individual who wants to set up in business for himself. The impersonality of the great corporation is a menace not only to the workers and the consumers but also the corporation itself. Our corporations must be given back their individual personality and feeling of responsibility. Attacking the individual from another direction is the labor organization which insists that only these individuals whom it approves shall be allowed to work, and they shall be permitted to do only a certain amount of work at a definitely fixed wage; membership in some unions shall be very difficult to secure because of the apprentice system, and in others membership shall be compulsory under the closed shop. All of us are deeply appreciative of what the labor unions have done for the conditions and laborers in America, and we admit the right of labor to organize and bargain collectively. Nevertheless, we feel that the freedom of the individual requires that the union should achieve a greater sense of responsibility and should become guardians of freedom rather than of regimentation. In the quarrels between labor and capital, the Federal Government should be the arbiter, making decisions in the light of our principle of free enterprise, of free labor in a free industry. In recent years, however, the Federal Government has itself become a business corporation and has served in many cases to crush individual initiative. We ask, Mr. Truman, that you give serious consideration to ways in which American system of free enterprise can be restored to America.

When our pilgrim forefathers came to America for freedom of religion they were not interested in providing a haven for irreligious lethargy, nor would they have been satisfied with the trappings of an efficient church organization. They were interested not merely in freedom from certain tyrannical restrictions, but were interested also in freedom for truly religious living. In asking for freedom of religion, therefore, we do not ask that America pay no attention to what goes on religiously, but rather that Americans be encouraged to build a civilization which is based upon morality and virtue strengthened by the convictions which religion can give. We do not ask for a state church, for that would be the end of religious freedom, but we do hope for an America in which religion will be a guiding force.

And finally, Mr. President, I would not be doing justice to my task as president of an independent college if I did not say a word about the fourth freedom, freedom of education. In the rest of the world only those who were born into the right class of society, or who had unusual mental gifts, were given the opportunity of education. The American idea has been that our democracy could not function without citizens educated up to the limit of their capacities. There was no mention made in the Constitution of Federal control of education. This was not an error, but an intentional omission on the part of the framers of that document; they believed, as we should believe today, that education is so individual a matter that it must be kept close to the grass roots, and its control must rest in the hands of the parents, the local school boards, and the independent boards of trustees. In education the authority must go from Galesburg and the country schoolhouse to Washington, and not in the other direction. Therefore, Mr. Truman, we view with alarm recent bills in Congress which would imply that the Federal Government is now going to take over our educational system. I know that these bills are entitled "Federal Aid" bills. If I remember my Latin from the study of Virgil, there was a line in the Aeneid in which one of the Trojans, looking at the famous wooden horse used by the Greeks to conquer Troy, made the remark: "Timeo Danaos et dona ferentes." The literal translation is: "I fear the Greeks even when they are bringing gifts." To bring this quotation up-to-date in our present situation I would translate it: "I am afraid of Federal control of education, even though it is called assistance."

These "four freedoms" of political democracy, industrial enterprise, religion and education will stand or fall together. If one of them is destroyed the others disappear also. Hitler realized this fact, and therefore took over the German educational system as soon as he came to power. The destruction of educational freedom by the Nazis spelled the doom of all other freedoms in Germany, therefore, all four of these freedoms, Mr. President, must be vigorously defended in America.

To you, Mr. Truman, has been given a great responsibility. Along with it, however, there goes a wonderful opportunity. If you can restore these "four freedoms"—political, industrial, religious, and educational—to Americans, then it will be a country which will inspire not only our soldiers and sailors to fight and die for it, but also all citizens to work and live for it in the centuries ahead.

Excerpts From Address of Herbert C. Pell

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. CELLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to insert the following address made by the former United States Representative on the War Crimes Commission, Mr. Herbert C. Pell. This speech was delivered at Carnegie Hall in New York City on April 19, 1945, at a meeting sponsored by the American

League for a Free Palestine on the occasion of the second anniversary of the Battle of the Warsaw Ghetto. Mr. Pell's defiant fight for punishment of atrocities committed against the Hebrew people of Europe by the Germans, and his very eloquent plea for justice for the remaining Hebrew people of Europe by giving them recognition as one of the United Nations is most worthy of our attention.

The text of Mr. Pell's address follows:

We are gathered here tonight to honor those valiant fighters of the Battle of the Warsaw Ghetto who, 2 years ago, in a moment of sublime heroism, took up arms in a proportion of one against a thousand and have demonstrated before the whole world that they prefer rather to die fighting than to live on as slaves, without dignity of man. They did this after they were convinced that the German atrocities, the unspeakable policy of extermination, the horrifying tortures and the death of hundreds of thousands did not arouse the sense of humanity, of compassion, and of justice of decent people in the civilized world. They undertook the lost Battle of the Warsaw Ghetto after democratic governments failed to take up Hitler's challenge. They decided to choose the path of certain death after more than a million of their kin had been exterminated before the very eyes of all of us without arousing even a stern warning on behalf of our Government.

I am making this statement as a private citizen with no official position, but I firmly believe that everything that is done by us who are not in the armed forces will be ultimately judged by one standard only—have we contributed toward preventing a third world war which would end civilization? Nothing less means anything in comparison to this.

Now, I am sure that if the Battle of the Warsaw Ghetto will pass into oblivion, and the torture and death of the millions of Jews in eastern Europe will be forgotten and relegated to the unpleasant incidents of the past, with no moral drawn as to our present policy, I am afraid that we will never bar the road to another war. For the conviction and punishment of those responsible for the suffering of this war is not a matter of revenge, but of justice. The persecution of minorities is an easy and from ancient times regularly used means of establishing tyrannical governments which inevitably become belligerent sooner or later. Every such government must canalize discontent and transmute the hostility provoked by its own methods at home into hatreds of foreign countries.

Persecution of a minority will tend at first to consolidate the gang and will cow the opposition of all citizens, even those not belonging to the persecuted minority. Let us suppose a shopkeeper in Berlin sees a Jewish shop next to his raided and wrecked. It is manifest that such a man will hesitate before opposing the Nazi organizations.

It is because we did not move when the first Jewish shop was raided and wrecked that we are paying now so dearly in blood, in tears, and in superhuman efforts.

Now the things that have happened in the last 4 years will live for a long time in the memory of people, and so will the policy of the victors.

We are told to forgive those who have injured us and to turn the other cheek, but it must be remembered that we have not been told to forgive injustice to others or to turn the cheek of somebody else. We cannot forgive the Germans what they have done to the Jews, and we cannot ask the Jewish survivors to start experimenting their policy of turning the other cheek all over again. They did it for too long and have paid for it too dearly.

Therefore, I believe that from this turmoil and from this turbulent ocean of suffering two main trends of policy should be made efficacious lest we resign ourselves to further catastrophes. The first is the punishment of the Germans for their crimes. It will not do merely to make a handful of martyrs. The Gestapo, which is a volunteer organization which nobody is forced to join, should be punished. All those in any way guilty of outrages should be punished so that in the future anyone in any country tempted to join such an organization will feel that he is putting a rope around his neck. The fear of punishment will not prevent men from taking the position of leaders. There will always be people ready to swap life for glory, but it may make their recruiting more difficult.

If this course involves some or many cases of personal injustice, it must involve them. It is better that half a dozen innocent German subjects should hang today than that millions of equally innocent people should suffer in 25 years.

For a year, I have supported these views in the War Crimes Commission. I honestly do not think that anyone could have upheld them more vigorously or have been more successful in inducing his associates on the Commission to accept them.

The second policy of action of the United Nations, but first of all of our own great and glorious Nation, is the restoration of the Hebrew people of Europe and Palestine to life, dignity, and political status. We must give the Jewish survivors a choice, we have to grant them the right to self-determination and to decide whether they want to go back to the ghettoes, whether they want to go back to Germany, and Austria, and Poland, and Hungary, and Rumania, all those countries where they have been treated, not only in the last 5, 10, or 15 years but for generations and centuries, in the most ignoble manner, where they have been persecuted and always subject to pogroms, or whether they want to take up a new life as a distinct national unit and to go back to that country on the eastern shores of the Mediterranean which they, for thousands of years, considered their national territory. As a first step in this direction, they have to be granted at least the privilege of being invited into the War Crimes Commission as full-fledged and honorable members, then their participation in other councils of the United Nations will follow.

I am primarily interested in the country in which my son will live and which I shall not see. I want the United States to be much greater, nobler, stronger than this country is today. The judgment of our descendants in 40 years is more important than political expediency. We owe peace to our children and on this debt we dare not default, and I solemnly declare now that I am thinking of my son and I am thinking of all those unborn children in America and I will see myself damned in the most literal and theological sense of the word before I will leave a stone unturned that might save them from a third world war.

Lilienthal and T. V. A.

EXTENSION OF REMARKS

OF

HON. JOHN W. FLANNAGAN, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. FLANNAGAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Washington Daily News of May 2, 1945:

LILIENTHAL AND T. V. A.

We hope it's true, as reported, that President Truman has decided to name Director David Lilienthal, of the Tennessee Valley Authority, for another 9-year term, in spite of the strong opposition registered at the White House yesterday by Senator MCKELLAR, of Tennessee.

No governmental undertaking has been more successful than T. V. A., and the reason is largely Mr. Lilienthal's management.

As head of that great project he has applied a definite philosophy. He has insisted on decentralization, on unified authority and responsibility, on making T. V. A. acceptable to and popular with the immediate region where it operates as well as the taxpayers of the Nation. And to accomplish this he has insisted on keeping T. V. A. free from politics. That freedom from politics is what got Senator MCKELLAR sore.

T. V. A.'s record shines, not only as it relates to electric power, but to flood control, navigation, soil conservation, reforestation, and the providing of cheap fertilizer. For Mr. Lilienthal to be bounced because he has resisted pressure that would make T. V. A. a feather bed for political appointees would be a grave injustice—a simple case of executing a man for making good.

Instead, if other such projects are to be authorized—M. V. A. and the like—we'd like to see Mr. Lilienthal supervise them and apply his T. V. A. principles, so that the multimillions spent on them won't be thrown to the political birdies.

Senator MCKELLAR, as President pro tempore of the Senate since Franklin D. Roosevelt's death, is in a powerful and responsible position. President Truman has honored him highly by asking him to sit in on meetings of the Cabinet. Under the circumstances, we do not believe the Senator will choose to make any very determined fight if Mr. Truman recognizes and rewards splendid service by renominating Director Lilienthal. Or that Mr. MCKELLAR's colleagues will give him much support if he does undertake to carry a Tennessee political feud to the floor of the Senate.

The Black Hills as World Headquarters

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. MUNDT. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial:

THE BLACK HILLS AS WORLD HEADQUARTERS

Some persons may have concluded hastily that the endeavor to establish the headquarters of the United Nations in the Black Hills is just a publicity stunt.

Actually, it is much more than that and the primary sponsors of the idea have reason to believe that their suggestion will command a respectful hearing.

Gov. M. Q. Sharpe, very properly, is interesting himself seriously in the undertaking and is assembling facts and comments that will be of value in advancing the case for the Black Hills.

A summary he just prepared points out significantly the reasons why the headquarters should be in the United States and also why the Black Hills are exceptionally well suited for the site. The Governor's summary, which deserves study, follows:

"1. Our country was the first to declare as a national policy, and ever after to carry it out, an idea which was really the first basic step upward to an eventual world organization for permanent peace: All men are created free and equal.

"2. The history of our country shows without exception that all races, creeds, colors, nationalities are here accorded equality of rights under the law and equality of opportunity in economic and social affairs. So thoroughly have we been influenced by that idea that we have fought various wars to maintain it at home and abroad. Therefore, the United Nations would find here an environment where all believe in and practice an idea that must be one of the basic foundation stones of an organization for permanent world peace.

"3. Our country and especially our State of South Dakota has always maintained the policy of complete separation of church and state and complete freedom of religion for all. Therefore, the Christians, the Buddhists, the Mohammedans, and all other great religious movements of the world would find here an environment in which they can build their churches, temples, mosques, and practice their religion as they desire without interference by the State or objection by the people.

"4. South Dakota is located around the geographic center of the North American Continent. It is about equidistant from both the Occident and the Orient. Delegates and visitors from Europe, Asia, and Africa could meet here free from the local influences and past history and with a feeling of freedom from the advantages of location to one or the other. It is the most convenient to all and the most impartial location available for all for a world capital.

"5. In the Black Hills of South Dakota exist areas of impressive grandeur, majestic mountain peaks, beautiful rolling hill country covered with stately ponderosa pine and ornamental timber in profusion, interesting geological flora and fauna conditions of all kinds, mountain streams and lakes having no superiors anywhere for pure water supply, and an equable, energizing climate with never an extreme of heat or cold, wind or rain, all of them suitable and appropriate for a world capital.

"6. In this same Black Hills area are numerous spacious sites for establishment of a world city which will be an international area not blanketed by the proximity of any other large city and where the world may construct from the virgin, primitive conditions existing, its own city in its own time, in its own way, and with its own name. Ample transportation and communication opportunities of all kinds exist."

World Peace

EXTENSION OF REMARKS

OF

HON. WILLIAM T. GRANAHAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. GRANAHAN. Mr. Speaker, under leave to extend my remarks and include a resolution adopted by the Wynnefield Community Committee for Memorial Meeting of Philadelphia, I desire to call the attention of the House to a movement which had its inception in Wynnefield, a residential section of my constituency in Philadelphia, and the section in which I live. The implications and purposes of this movement appear to be of national significance. I can safely state that it represents the temper and desires of most of the people in my entire district. And being such, I wish to pass it on to all Members of Congress.

A number of citizens in Wynnefield recently met to discuss the appalling sacrifices of the 13,000,000 American families who have been directly affected by this war. They were impelled to give vocal and public expression to the desire that "our boys shall not have died in vain." So they called a preliminary meeting of some public-spirited members of my community, as well as representatives of the churches, synagogues, public schools, and other groups of the community. They discussed the subject of a memorial meeting by the entire community, in which every organization and individual of the section is to participate, to honor those who have already made the supreme sacrifice.

This organization meeting took place at the hall of the Jewish War Veterans, Fifty-fourth Street and Overbrook Avenue, Philadelphia, Pa., Tuesday, April 3, 1945. Representative members of a number of our local institutions were present, including members of the Republican and Democratic executive ward committees. The suggestion of a memorial meeting was enthusiastically and unanimously endorsed.

It was the sense of this meeting that the entire community of Wynnefield be dedicated to the purposes for which our boys are fighting, and it was decided to hold a memorial meeting the last week in May at the Mann Public School. Many suggestions were offered, subcommittees were appointed, and long discussions ensued before the assembly decided to arrange the memorial meeting the last week in May at the Mann Public School, a central point. The principal of the Mann Public School, J. Wesley Foote, who was present at the meeting, offered his assistance in every way. There were further meetings at the Jewish War Veterans' post, at St. Barbara's Church, and at the homes of the individuals who were interested. After conferences with businessmen, labor leaders, judges of our courts, and with other prominent citizens, the various ideas and suggestions finally crystallized into the following program:

First. To hold a memorial meeting on May 28 at the Mann Public School.

The meeting to be presided over by one of the common pleas judges of the community.

The principal speaker to be the Honorable FRANCIS J. MYERS, United States Senator.

A minister, rabbi, and priest to deliver invocations.

Three short essays on world peace, selected as the result of contests amongst school pupils, to be read by pupils of the community.

The war veterans, boy scouts, and Red Cross to take part in the ceremonies.

Second. Resolutions be adopted by the sponsors of the meeting in favor of a world organization for peace, a broadened social security base, and remunerative employment for all.

Third. To pledge the community to such resolutions and to send copies of the resolutions to the President of the United States, the Secretary of State, the United States delegates to the San Francisco Conference, and to me, the Congressman of the district.

Fourth. To organize a nonpartisan community council which shall be thoroughly representative of the community, and of its inhabitants.

I am advised that the prevailing view of these organizers is that it shall become a permanent representative body of the community, with the ultimate aim of establishing a permanent memorial for our departed warriors and their and our beloved chief, the late President Franklin Delano Roosevelt.

I believe the Wynnefield Council will make its opinion known to this body, and to all other legislative assemblies and agencies which will deal with the winning of the war and the peace; which deal with the welfare of our returning veterans, and with the elimination of bigotry and prejudice. It will endeavor to explain various problems to the entire community in open meetings, and to help frame policies to maintain amity among nations and among individuals, as a responsible community should under our democratic form of government.

Now I subscribe to these purposes. I know that men in public office often give lip service to these ideals; and that in practice some of these flaunt the spirit of our Declaration of Independence, our Constitution, and its Bill of Rights, because of their short-sightedness. I intend to be present at the memorial meeting on May 28 at the Mann Public School, and to watch closely the work and resolutions of the Wynnefield Council which will be formed after this memorial meeting.

I hope this work of the citizens in Wynnefield will be an inspiration to other communities all over our country, and so that all of us in Congress may have the benefit of first-hand information regarding the desires and the temper of the people we represent. I look upon such an organization as a healthy sign, that the citizens of our land are deeply interested in the complex problems which face them and us in our victorious post-war world.

Mr. Speaker, I also desire to have printed in the RECORD the resolutions that I received from this committee, as follows:

Whereas the freedom and liberty of the entire world was threatened; and

Whereas all freedom-loving people sent forth their brave men and women in defense of their institutions that were threatened with destruction; and

Whereas our men and women in the armed forces have made the supreme sacrifice in order that we and generations to come may live in a secure, peaceful, and happy world; and

Whereas on April 12, 1945, the American people and the entire freedom-loving people of the world suffered another casualty in the loss of our beloved President, Franklin Delano Roosevelt; and

Whereas all these whose memories we cherish sacrificed their lives for those ideals and objectives that will assure freedom, security, and a lasting peace for us in fraternity with the nations of the world; and

Whereas it is our determination that those who passed into eternity shall not have died in vain:

Now, therefore, we, the citizens of Wynnefield community in the city of Philadelphia, do hereby promise and pledge our wholehearted support to our new President, Harry S. Truman, the members of his Cabinet, and to our delegates at the San Francisco Conference who are engaged in the construction of a world peace organization in everlasting combination and cooperation with the United Nations, and we have further resolved to take, and do take, this solemn pledge: We solemnly pledge to consecrate ourselves to the memory of those who sleep beneath the crosses and the stars. We do hereby further rededicate ourselves and offer our resources and energy to the men and women in our armed forces. We promise that it is and shall remain our sacred obligation to help build the kind of world for which they fought and died. It shall be our sacred task to rally our entire community in united support for freedom, security, and equality of opportunity to all. We shall not rest until bigotry and fear are forever abolished from our great land, and until security and enduring peace are established throughout the world.

Cleveland Postal Employees Support Seventh War Loan Drive

EXTENSION OF REMARKS

OF

HON. MICHAEL A. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. FEIGHAN. Mr. Speaker, the people of Cleveland, beneficiaries of the very effective services rendered by the willing and efficient employees in the Cleveland postal area, are very proud, and rightly so, of the patriotic response and contribution to the war effort made by these employees.

Under the inspiring leadership of Mr. Joseph P. Nolan, post-office inspector in charge, these patriotic men and women are achieving a record which is well worth bringing to the attention of the Members of the Congress, and to the people of the Nation.

Incident to the Seventh War Loan drive, and utilizing the voluntary payroll-savings plan, it appears evident that the personnel of the Cleveland, Ohio, post office is doing its full duty. The first unit completely canvassed—the supervisory force—subscribed to the extent of 99.2 percent, and the second unit—the Claims and Inquiry Section—92 percent. Following the energetic leadership of their respective local presidents, it is a foregone conclusion that the clerks, carriers, motor-vehicle employees, mail handlers, messengers, and custodial service men will make an equally favorable showing.

The personnel of the Cleveland post office leads all industrial and other large groups, locally, and claims national leadership among postal establishments throughout the United States, in this important respect.

The post office contribution to the 1945 campaign for the war chest exceeded all previous records.

Lions Club Honors Memory of President Roosevelt

EXTENSION OF REMARKS

OF

HON. ESTES KEFAUVER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. KEFAUVER. Mr. Speaker, our great departed leader was a member of Lions International. Various Lions clubs throughout the United States have joined in paying tribute to his memory. Under leave to extend my remarks, I include a resolution adopted by a standing vote, with heads bowed, by the Chattanooga Lions Club on April 25, 1945. The resolution was signed by officers of the club—Ben Duggan, J. A. Sherrill, and Lee Allen.

The resolution is as follows:

Whereas God in His infinite wisdom has called to his reward our President, Commander in Chief, and fellow Lion, Franklin Delano Roosevelt, and the United States and the world has lost a great leader and humanitarian; and

Whereas President Roosevelt was an active member of Lions International, and his life and work exemplified the ideals and principles of Lionism: Now, therefore, be it

Resolved, That the Lions Club of Chattanooga does hereby join with Americans and with the peoples of all nations in recognition of the great loss to our country and to the world in the untimely passing of a great and beloved leader whose vision was pointed toward a universal peace and brotherhood of men; and be it further

Resolved, That copies of this resolution be spread upon the minutes of the club and that copies be furnished to the press of the city of Chattanooga.

Unconditional Surrender of German Forces in Italy

EXTENSION OF REMARKS

OF

HON. FRANK T. STARKEY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. STARKEY. Mr. Speaker, I want to express my joy over the great news announced today by President Truman—the unconditional surrender of all German forces in Italy.

I especially want to pay tribute to the brave men through whose efforts and gallantry this glorious result has been achieved.

For many months, Mr. Speaker, ever since our troops hit the beaches in Normandy, the Allied forces in Italy have considered themselves to be on the forgotten front. This was because, quite naturally, a major share of the headlines in the Nation's newspapers was devoted to happenings in France, Belgium, Holland, and Germany. But that did not mean there was no longer war in Italy. There Allied soldiers still were fighting, where they had been fighting for months before D-day in France. And Allied soldiers were still dying there, in the cause of freedom.

I believe that today we should pause to pay special tribute to the soldiers of the American Fifth Army and their commander, Gen. Mark Clark, and to their comrades of the British Eighth Army, who chased the Fascists out of Africa, and who conquered Sicily and Italy.

And I want to add my personal tribute, in which I know I will be joined by millions of other Americans, to the Thirty-fourth Infantry Division, which has been the spearhead of the Fifth Army through most of the fighting in Italy.

The Thirty-fourth, or Red Bull Division, as it is known from its shoulder patch, originally was made up of National Guard men from my home State of Minnesota, and its sister States, Iowa, North and South Dakota, once commanded by Ellard A. Walsh, of St. Paul, now Minnesota's adjutant general.

The units comprising this division left their home stations early in 1941. One of its regiments, the One Hundred and Thirty-fifth Infantry which traces its traditions to the Civil War in which it served as the First Minnesota Infantry, provided the first troops to land in Europe in this war. Within 3 months of the attack on Pearl Harbor the regiment disembarked at a North Ireland port.

Two other of its regiments, the One Hundred and Fifty-first Artillery from Minnesota and the One Hundred and Sixty-eighth Infantry from Iowa, also carry on their standard and colors, battle streamers won in France in 1917 and 1918 when they were part of the famed Forty-second, or Rainbow, Division.

The Thirty-fourth provided many of the men for the first American Ranger units, men who took part in the Dieppe raid. It made the landing in north Africa in November 1942. It fought at Kasserine Pass and through Tunisia to the Fascist surrender at Bizerte. It was in the thick of things at Anzio, Salerno, and Cassino, through all the major fighting in Italy. Seldom have its units been out of action since the north Africa landing.

The division is now recognized as the most decorated in the Army, in addition to having more combat days than any other. Here, for example, are some recent figures on decorations received by members of the division:

More than 15,000 Purple Hearts, 9 Medals of Honor, 98 Distinguished Service Crosses, 116 Legion of Merit Medals, 1,052 Silver Star Medals, 51 Soldier's Medals, 1,713 Bronze Star Medals, 3 Presidential Unit Citations, 7 British awards, 7 French awards, 6 Italian awards, 1 Distinguished Service Medal, 1 Distinguished Flying Cross, 34 Air Medals with 52 Oak Leaf Clusters, 525 divisional citations, 6 War Department meritorious service unit plaques, and 15 Army commendations of the unit.

As may be guessed from the more than 15,000 Purple Hearts awarded in the division, all its members no longer are from Minnesota, Iowa, and the Dakotas. Replacements from every other State in the Union were required to keep the di-

vision at strength, and these all made gallant contributions to its record. The people of Minnesota, Iowa, North and South Dakota, however, may take special pride on this great day in the knowledge of what their gallant sons have contributed to America's brilliant military history.

England Mourns President Roosevelt's Death

EXTENSION OF REMARKS
OF
HON. LUTHER A. JOHNSON
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. LUTHER A. JOHNSON. Mr. Speaker, the sorrow of the American people at the death of our late President, Franklin D. Roosevelt, is well known but it is interesting to know that this sorrow is not confined to this country but is worldwide.

A letter from Mr. J. E. Evans-Jackson, a prominent lawyer of London, England, whom I know personally, has just been received by Mr. C. P. Carter, of Washington, which doubtless expresses the feelings of the English people upon the tragic loss of President Roosevelt, and upon leave granted, same is submitted herewith:

DEAR CHAUNCEY CARTER: We all received the news of President Roosevelt's death with great sorrow and express to you our deep sympathy in the loss the United States has sustained, a loss in which this country shares.

The people of this country held the late President in deep affection and had the greatest admiration for his courage, honesty, strength of purpose, and not least, for his farsightedness and wisdom.

It is sad that he should not have lived to see the final victories over Germany and Japan and the way of life for which these two countries stand; victory to which he contributed so largely. It is also a tragedy for the world that it is deprived of his wisdom in shaping the peace and settling the many difficult problems which will face the nations in the next few years.

We shall never forget, at the time the British Empire stood alone against the Axis Powers, the words of hope and friendship which President Roosevelt broadcast. They were as water to men parched in the desert.

Yours very sincerely,
J. E. EVANS-JACKSON.

A Time for Action

EXTENSION OF REMARKS
OF
HON. ROY O. WOODRUFF
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Monday, April 30, 1945

Mr. WOODRUFF of Michigan. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following article from the Industrial Relations Review for April 1945:

A TIME FOR ACTION

A few weeks ago, and within a few days of each other, two men—one an Englishman and the other an American—made important statements which carry with them a solemn warning which all United States citizens should take to heart. One statement comes from Prime Minister Winston Churchill, in an address to his Conservative Party in London. The other, unusual as it may seem, was made by Matthew Woll, vice president of the American Federation of Labor, in an address before the Rotary Club of New York. The statements of these two men follow:

Winston Churchill, Prime Minister of England: "Let there be no mistake about it. It is no easy cheap-jack utopia of airy phrases that lies before us.

"There is no time for windy platitudes. The Conservative Party had far better go down telling the truth and acting in accordance with the verities of our position than gain a span of shabbily bought office by easy and fickle froth and chatter.

"Woe betide those public men who seek to slide into power down the slippery slope of vain and profligate undertakings. This is no time for humbug and blandishment, but for grim and stark facts and figures, and action to meet immediate needs.

"It would be very easy for us all to promise or even to give each other presents, bonuses, and gratuities in the most enthusiastic manner but if we woke up in the morning and found that the pound sterling ($4) bought only 5 shillings ($1) worth of goods or services, we should have committed the crime of cheating the soldiers and workers of the country.

"You hear all this talk by the stay-at-home left-wing intelligentsia that the soldiers will hold us guilty if we do not have a new world waiting for them on their return. The brave new world is to be already waiting for them when they disembark. * * *

"But that is not what the fighting men are looking forward to.

"They are not looking forward to a new world constructed behind their backs by politicians who seek their votes. Most of them have lived long enough in uncomfortable proximity to another world to be thinking of that. * * *

"They do not regard themselves as a slumbred serf population chased into battle from a land of misery and want. They love their country and the scenes of their youth and manhood and they have shown themselves ready to die not only in defense of their material satisfactions but for its honor.

"When they are home and settled down and their country is again a going concern, paying its way and standing on its own in the post-war world, then will be the time for them to settle what form and shape our society should assume. * * *

"No restriction upon well-established British liberties that is not proved indispensable to the prosecution of the war and the transition from war to peace can be tolerated.

"Control for control's sake is senseless. Controls under the pretext of war or its aftermath which are in fact designed to favor the accomplishment of totalitarian systems, however innocently designed, whatever guise they take, whatever slogans they mouth, are a fraud which should be mercilessly exposed to the British public.

"At the head of our mainmast we fly the flag of free enterprise. We are determined that native genius and the spirit of adventure and of risk taking, in peace as in war, shall bear our fortunes forward, finding profitable work and trade for our people, and that good, thrifty housekeeping, both national and private, shall sustain our economy."

MATTHEW WOLL, VICE PRESIDENT OF THE A. F. OF L.

"The struggle will be long and bitter if any group in the United States attempts to make the American people a nation of fuehrer worshippers, goose-stepping totalitarian robots.

"Today, despite the allegiance of the overwhelming percentage of the American people to the democratic way of living, there is evidence of a trend to totalitarianism in small but influential groups. The growing reliance of the Executive on directives and government by decree is but one evidence of this impatience with our traditional, representative method of doing things.

"Another evidence of this trend is the gullibility with which some respectable sections of the community have accepted the brand of political and economic eyewash sold by the American Communists.

"Admiration of communism before the war was confined largely to a handful of party members and its lunatic fringe of intellectuals. Today the penetration of communism has reached alarming proportions.

"Labor unions, church organizations, cultural bodies have adopted the ever-changing party line. But most disquieting is the Communist penertation of conservative business groups. Interests close to some of our largest banking institutions have become fellow travelers, strange as it may sound.

"American communism can thrive best in a totalitarian atmosphere. Every move to concentrate greater power in the hands of Government meets with a chorus of American Communist approval, and since it is generally agreed that big government is the enemy of economic voluntarism or free enterprise, and since communism in America today is completely behind the growing tendency toward total control over the Nation's industrial enterprise, those in business who soft-pedal communism are, in effect, digging their own graves.

"Today there is a shrinking of democratic processes and a continual enlargement of the role of the Government as a final arbiter. Before it is too late, it is time we all demanded a priority on initiative; a priority on freedom, and the willingness to think things through, without the help of some ghost writer in one of the countless Government bureaus.

"Newspapers and radios which permit the skillful penetration of pro-Communist columnists and commentators are unwittingly preparing the day when their properties will be completely controlled, if not owned, by the growing, ruthless bureaucratic elite whose ultimate goal is nothing short of total control.

"Unless we think clearly and plan intelligently now, while the war is on, we may find ourselves with military victory on our heads but unwittingly encumbered by the enemy's social philosophy."

No one single action that can be taken by our citizens will so effectively rid our country of the dangers of the "left-wing intelligentsia," "communism," "totalitarian systems," and "government by decree," or do more to give us a "priority on freedom and initiative" and enable us to fly from our mainmast "the flag of free enterprise" than the repeal of the National Labor Relations (Wagner) Act.

Never was there a more propitious time than now to start this long deferred move. It can be repealed. The way to do it is simple. Write your Congressman and both your Senators to repeal the Wagner Act. Tell all whom you see to write their Congressmen: "Repeal the Wagner Act." Make those words your slogan. Soon throughout the Nation "repeal the Wagner Act" will rise to such a crescendo that Congressmen will take heed, will introduce the bill in Congress, and will repeal the Wagner Act.

Then we shall have done more, in a shorter space of time, for the preservation of our American way of life that we could have done by any other single act. Repeal the Wagner Act—now is the time to get the movement under way. To start this movement we have just mailed a marked copy of this issue to

each Member of the Senate and House, and to President Truman.

P. S.—Lest we be accused of "labor baiting" in starting this movement, listen to what Thomas E. Flynn, executive assistant to Dan Tobin, president of the teamsters' union, and another vice president (along with Matthew Woll) of the A. F. of L., said at the recent southern conference of the teamsters' union held in New Orleans: "I am thoroughly disgusted with the National Labor Relations Board. I can say that speaking for the entire international union. We have nothing to hope for from the N. L. R. B. Therefore, our only recourse appears to be to ask Congress to repeal the Wagner Act and wipe out the N. L. R. B. which has become nothing more than a standing committee for the C. I. O."

Making Jobs by Closing American Factories

EXTENSION OF REMARKS

OF

HON. P. W. GRIFFITHS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. GRIFFITHS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Morgan County (Ohio) Herald, concerning the effect in my district of Ohio of lowering the tariff on the importations of pottery and chinaware.

The editorial is as follows:

MAKING JOBS BY CLOSING AMERICAN FACTORIES

Readers of the Zanesville papers, no doubt noted the page ad carried by the southeastern Ohio pottery manufacturers a few days since, asking that all interested parties write their Congressmen in protest against any tariff reduction on pottery. They stated their case fully and frankly—they cannot pay wages upon which labor can exist at the American standard and compete with the pottery makers in Czechoslovakia, Japan, and other low wage standard countries. They directed attention to what the pottery industry means, in particular to towns such as Roseville and Crooksville. If their factories are forced out of existence by the importation of a flood of earthenware, fabricated by cheap labor abroad, they will be compelled to close their doors, with consequences which cannot be other than economically disastrous to those communities.

We do not believe the potters are exaggerating the situation in their industry. In the typical pre-war year of 1937, imports of household china were 44 times that of domestic production. Chinaware that was made in Japan comprised a large part of prewar importation. For instance, a 104-piece earthenware dinner set which sold at $38.50 could scarcely compete with a Japanese china set, after it had been transported 7,000 miles across the ocean with a 70 percent duty paid at the American port of entry. And, as everyone knows, china is more costly than earthen dinnerware, being thinner, harder, and more brittle.

Much has been said about 60,000,000 jobs after the war. At the same time we are being told at Washington by free traders that if we are going to have peace we must have trade agreements and economic as well as political comity. We wish our exponents of free trade would tell us how the potter, for instance, is going to exist when with a 70-percent protective tariff he could not compete with imports before the war? Since the war the potter's wages and costs, which include almost confiscatory income taxes, have doubled his cost of production. Lower the tariff and what does he do—what can he do but close his doors? When his plant is closed, men are thrown out of employment and places such as Crooksville and Roseville become ghost towns. How are you going to create jobs by destroying productive industry which employs labor and which is the lifeblood of the Nation?

Vote Bretton Woods Now

EXTENSION OF REMARKS

OF

HON. ANDREW J. BIEMILLER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. BIEMILLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial which appeared in the Milwaukee Journal on April 30, 1945, entitled "Vote Bretton Woods Now":

VOTE BRETTON WOODS NOW

Congress has under consideration in committee the Bretton Woods plan for a World Reconstruction and Development Bank and an International Currency Stabilization Fund.

This plan is designed to make exchange of goods and services between nations easier. So great a step cannot be taken without difference of opinion. Everyone agrees the purpose is desirable. But some business associations, notably the American Bankers' Association, oppose the second part of the program—that is, the International Fund.

With due respect to the bankers, one may recall that under their leadership—or lack of it—we never got anywhere about reforming our currency. They did not support the Federal Reserve Act in 1913, though a few years later they were loud in its praise. The leadership, if anything is to be done, must be elsewhere.

Senator BREWSTER, of Maine, spoke for a party truce in Congress, lest expression of strong feelings endanger the work of the San Francisco Conference. Senator PEPPER, of Florida, speaking on the same program, was more to the point when he declared that favorable action now on Bretton Woods would give great impetus to the San Francisco meeting.

No one supposes the Bretton Woods plan is perfect. But it would be a beginning. If the nations take some risk in setting up a fund, the risk to this country is no more than a month of this war is costing.

Speaking at a regional meeting of the Catholic Association for International Peace, held at Marquette University, the Reverend Thomas F. Divine, dean of the school of business administration, made the point that needs to be made concerning the stabilization fund:

"In spite of all the objections raised against the fund, we consider its advantages to outweigh its disadvantages. As no satisfactory alternative has been offered, the choice is between accepting the fund and doing nothing in the way of international cooperation for exchange stabilization."

It is the old choice—the choice we made in adopting the Declaration of Independence and the Constitution, and at many a lesser crossroads of our history. We have succeeded when we did something; our regrets are for times when we failed to act. Let Congress, by adopting the Bretton Woods plan now, send word to San Francisco that the United States is in earnest about cooperation—that we are not going back to isolationism in any respect.

Chattanooga's Experiences With T. V. A.

EXTENSION OF REMARKS

OF

HON. ESTES KEFAUVER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. KEFAUVER. Mr. Speaker, under leave to extend my remarks, I include an excellent address by S. R. Finley, general superintendent, Electric Power Board of Chattanooga. The address was delivered at a meeting of the Arkansas Valley Association, Muskogee, Okla., on April 12, 1945.

Mr. Finley is one of the most capable and best-informed municipal electrical superintendents of the Nation.

The address follows:

I want to make it abundantly clear in the discussion of Chattanooga's experiences with T. V. A. that I am not employed by the T. V. A. and never have been. Nobody in the T. V. A. has asked me to come out here, nor do I know any one of them who has any knowledge of what I am going to say about our experiences in Chattanooga with the T. V. A. project. I went to Chattanooga in 1937, upon the invitation of the Electric Power Board of Chattanooga, to become its chief engineer and direct their efforts in connection with their desire to acquire an electrict distribution system. The people of Chattanooga had decided about 2 years previously, by a referendum vote on the ratio of 19,000 to 8,000, to acquire for themselves an electric distribution system.

At that time I had never heard of any preconceived plan to take over the destinies of the region, nor have I since. So far as I know, there is not now in existence any definite thing called a T. V. A. plan. From my knowledge of the T. V. A.'s program, and observation of it, and experiences with it, I would define the Tennessee Valley Authority as a regional authority carrying out a mandate from the Congress in connection with certain things which the Congress of the United States deemed necessary in that area. If there has ever been a preconceived plan to completely do over the area, or to revise the ways and lives of the people there, then I have never heard of it, nor has there been any effort made to force such a thing upon our section. The only people I know of that have to do anything which the T. V. A. says are the employees of the T. V. A., and that, of course, holds good in most any kind of a well-run business. Certainly the few thousand permanent employees of the Authority are among the minority in the millions of people where the T. V. A. project is in operation.

* * * * *

Chattanooga is the only large city, aside from Knoxville, located directly upon the Tennessee River, Nashville being upon the Cumberland River and not even in the river's drainage area, and Memphis being located upon the Mississippi River. For generations, until the advent of the T. V. A. project, the principal physical parts of which are now almost complete, the Tennessee River and its tributaries have been an unmanageable stream. Its tributaries rise in the mountains of North Carolina, southwestern Virginia, and northern Georgia and the main

stream is formed just below Knoxville and flows southward across the State to Chattanooga, and thence southeastward and westward across Tennessee and northern Alabama and turning north again at the northeastern tip of Mississippi, recrosses the State of Tennessee and portions of Kentucky, emptying into the Ohio River just below Paducah. Its length from Paducah to Knoxville is about 650 miles and in this distance it has a fall of about 500 feet. The tributaries are fed by the snows and heavy rains which fall in the mountains where the tributaries form, and until the advent of the T. V. A., the river annually overran its banks, destroying much valuable land and property, and was always generally a flood menace, particularly in the upper portions of the main stream. Our own city of Chattanooga has had the name of a "flood city" and much of the area within the city limits was known to be subject to annual floods.

In discussing our experiences with T. V. A. during these past 12 years, I think I can say that we think many of the original purposes of it have been brought to a full and satisfactory completion, and that we are very happy with the results, and because of them we have prospered a great deal. The same is true for many other sections in the valley, throughout the entire 41,000 square miles in the drainage basin of the river. We have come to look upon the T. V. A. to be exactly what it was originally intended to be. It is true that it is a Government corporation, clothed with the authority of Congress, and its three directors are appointed by the President. However, it is vastly different from most functions of government in that it has the flexibility and opportunity for initiative and enterprise, in its field, that has usually been enjoyed only by private corporations. It has taken us some time in Chattanooga to have this feeling about T. V. A., and there are those among us yet who are unable to distinguish it from the normal governmental bureau. They are, however, gradually diminishing in number, as they observe more and more the operations of the T. V. A., become acquainted with it, and realize the benefits that have come to Chattanooga, that could only come from this type of a Government function. Even though our public power operation, the Electric Power Board of Chattanooga, is only connected with the T. V. A. by our wholesale power contract, some citizens even yet after nearly 6 years of operation, refer to us as the T. V. A.

The reason for this is that many people look upon the T. V. A., on account of its widespread controversial past, as only a giant electric enterprise. The facts are, that the electrical part of it is only one of its several important parts. It is true that the T. V. A.'s income from the sale of electricity at wholesale to its municipal and industrial customers is now providing enough money to pay its expenses of operation, depreciation, tax replacements, and the operating expenses of its other programs. T. V. A. reports of its financial operations will show that its income from its sale of electricity to the 130 municipal contractors, rural electric cooperatives, industrial customers, and private utilities, after paying the expenses of electrical operation, is enough to repay the Federal Government over a period of years the money advanced for that part of the project which has been deemed as allocated to the power part. For this reason, we do not consider ourselves a recipient of special gifts from the Federal Treasury at the expense of other taxpayers in the Nation. Instead, with our own money, secured from our customers by the sale of electricity at retail, we are paying to the T. V. A. for electricity at wholesale, enough money to cover the electrical expenses of the project, with enough over to repay the Federal Government, or to pay the T. V. A.'s other operating expenses of agricultural research and demonstration, recreation, and use of public lands, fertilizer development, flood control, and navigation. Let me say again, that with our own money, we are paying for this something that is being used to the advantage and development of our section.

One of the great beneficial experiences which has come to Chattanooga from the T. V. A. project has been that of flood protection. It may be true that we will need some additional local flood protection works, to absolutely protect ourselves from any future flood damage, but without the protection given to our city by the T. V. A. system of flood control on the main stream, then no system of local flood protection works would have been financially feasible or available. As late as January 1943, at least a million dollars in damages was saved us by the reduction of a flood crest and there have been other instances where operation of the T. V. A. system of dams has saved us from additional flood ravaging. I want to say here and now, that the T. V. A. dams do generate electric power. Of course they do, and they were built with that as one of their purposes. However, these dams are also flood control and navigation dams, and these nine dams upon the main river channel, eight of which were constructed by T. V. A., and one purchased in the power company deal, along with the tributary reservoirs, provide much head water and main stream storage, and all operated together as a unit are capable of providing flood protection to flood danger points upon the Tennessee River, one of which has always been Chattanooga. No one can say that we will never have another flood in Chattanooga, but the chances are that we won't, and certainly the constantly recurring minor floods that have been our annual experiences in the past have been eliminated. A number of industries in our city who have suffered from floods in the past have a feeling of security in the future, and there are available new industrial sites for developments and large areas of land we hope in the future to put to use. Certainly a fine measure of flood protection provided to Chattanooga has been one of our most beneficial experiences with the T. V. A.

It is hard to discuss flood control without relating it to navigation. The Tennessee River is really not exactly a great river anymore. It is a moderately flowing body of water subdivided into 9 great lakes. Each lake is at a different level from the one below and above it, and there is throughout the length, or soon will be, a 9-foot navigation channel from Knoxville to the mouth of the river. The use of this channel for transportation of freight by water has been increasing by leaps and bounds. Chattanooga now receives a large amount of grain, petroleum products, sand and gravel and other bulk products by water, and, when materials and equipment are available for expansion of barge lines following the war, a great deal more freight traffic will move in and out of Chattanooga by barges. We have not lost sight of the fact that this 9-foot navigation channel places us with direct access by water with the upper and lower Mississippi waterways system, including the Ohio. Our modest river terminal in Chattanooga, built by the T. V. A., even though having been in operation only a short time, is already paying its operating expenses from our constantly growing river freight. Steel barges are of course the future vehicles of river transportation. The large ones will hold up to 3,000 tons of freight, as much as 75 railroad boxcars and a tow boat can push a couple of dozen of them. An oil barge carries 9,000 barrels of oil compared to 240 in a tank car, and a coal barge will carry 2,000 tons, equivalent to 50 carloads. This matter of heavy material transportation to and from Chattanooga, as Chattanooga is essentially an industrial city, with its industry dominated by its iron and steel industries, textiles, food products, chemical and wood products, is going to be one of our great benefits in the future. In years to come this river channel will be the basis for creation of much additional industrial wealth. Its use requires no regulation as to rates, for it is simply a natural economic resource of the people being put to use by the people for the benefit of the people. I can say frankly that you won't find our railroads promoting the use of river transportation. Wha they really object to is the complete development of the Mississippi River and its branches as a waterways transportation system, for they know that this is a method of transportation that can be used without the permission of Wall Street or the financial interests that dominate the railroad systems. In the South the differential freight-rate procedure in use upon the railroads has been a brake upon our industrial progress. River traffic on the Tennessee River, and this would apply to Chattanooga, has increased to nearly 6 times in volume since the advent of the T. V. A. development. Our brief experiences in the past convince us that the future in river transportation, brought on by the T. V. A. development, is going to be of immense value. We have uses for phosphates, limestone, tobacco, cotton, ores, grain, iron and steel, and petroleum and many other heavy materials upon which, as one of our benefits, there will be great saving in existing freight charges.

I am the administrative head of a public power system which purchases its electrical energy from the T. V. A., and it would be unnatural if I did not comment upon that phase of the benefits which our city has enjoyed from the program. The people of Chattanooga put themselves into the public power business in 1935 as I have previously stated by a referendum vote of 19,000 to 8,000. They did that after a heated campaign which nearly wrecked the hithertofore peaceful composure of the community. Let me say that it does not take very much to start an argument in east Tennessee. The original settlers there were pushed over into that area just after colonial times by the growth of the seaboard States. Apparently the experience made them a little objectionable to being pushed around so they just turned in and pushed the Indians out and the bears back into the caves in the mountains. Even now when there is nobody else to fight with, we just naturally start an argument among ourselves and the public power campaign in Chattanooga preceding the election in 1935 was really a big top performance. I wasn't there when it happened, but the echoes were still reverberating when I came in 1937, and even at that late date, all of the split families, broken business partnerships, disrupted church congregations and neighborhoods, and what not had not gotten back together again. After a good healthy start, however, toward building for themselves an electric power distribution system, a deal was finally consumated in August of 1939 in which the T. V. A., Chattanooga and 27 other municipalities and electric cooperatives acquired the entire property of the Tennessee Electric Power Co. (save their street car systems) for $78,000,000. Chattanooga's share of this purchase price was $10,850,000 and many have been kind enough to say that it was the best investment that Chattanooga ever made. The purchase price paid permitted the power company to pay off in full all of its bondholders, its preferred stockholders, and even left a good many million dollars for the common stock which was of rather doubtful value. Practically all of the existing employees of the company who desired to remain in the services of the T. V. A. and the municipalities were retained. Many of them immediately began receiving higher salaries than they had been paid, and today are still important members of our organization in Chattanooga, the T. V. A., and other contractors.

I think Chattanooga recognizes that in our nearly 6 years of operation, our public power

system has benefited us a great deal. During that time, based on the average rates charged in 1938, the last full year of operation by the private company, electricity users served by the Chattanooga system have saved over $13,000,000 in their cost of electricity. These savings have extended to all classes of customers and exceed the purchase price of $10,850,000 paid for the system. The rates being charged by the private power company at the time of purchase were not abnormally high, as rates go among private power companies, but the savings made were so apparent, so real and noticeable, that they could not help but be noticed by the users of electricity. Naturally they look upon this as one of the benefits that have come from the T. V. A. project.

Each year our publicly owned system has paid as tax equivalents amounts representing taxes formerly paid upon the private company's property which we acquired, and in 1944 our power board readjusted our principle of tax payments so as to include payments at the going rate, upon 75 percent of the net additions and extensions made to the property. As a result of this, for 1944 the city of Chattanooga received 40 percent more in ad valorem taxes from our board than it did from the privately owned company in 1938. Likewise, the city has annually had a cash saving of over $50,000 in its cost of electricity for such city uses as street lighting, school lighting, public-building lighting, etc. I might add that the city is billed the same as any other customer for its use of electricity, within that class of service which its use represents, and they pay these bills to our board just like any other customer. We do not furnish the city free street lighting or free public-building lighting, and our board's relation with them is upon a regular commercial basis. In turn, our payments of tax equivalents come to them just as do property owners who pay taxes.

* * * * *

The philosophy of our board, and we know this reflects the views of those whom we serve, with reference to the use of the income of the system, is that this income should not be diverted to pay other governmental expenses of the city, nor to be used as a support for those functions of government such as public schools, fire, and police, that are normally supported by taxes. As I previously stated, our board pays a tax equivalent to the city government in a most liberal manner. The city in turn pays its bill for its electricity uses just the same as do the board's other 47,000 customers. Our operation is one belonging to the people of Chattanooga, serving themselves and the surrounding area electric service at cost, and recognizing that the cost of this electric service cannot be a true cost, if that cost is loaded down with the cost of other things not a part of their electric service. This is the real objective of publicly owned electricity in that it is sold at the lowest possible cost for the social and economic benefits of the people in the community. If its cost is loaded down with expenses other than those belonging to the operation, then there can be no cheap electric power, and instead of this great servant of mankind being made a blessing to any community, its inevitable high cost will act as a brake upon the community's development, both socially and economically.

That our cheap cost of electric power has been a tremendous benefit to our community, aside from the savings made in its cost, is amply borne out by the fact that many of those already using electricity have greatly expanded and enlarged their uses of it providing more industrial expansion and development. A number of old steam engines and privately owned plants formerly used by industry have been shut down and discarded. The cheap rates have promoted much use of air conditioning, additional home uses, and new industrial processes have been installed involving electro-chemical applications, electric heating, and other commercial uses.

Almost solely as a result of the low rates for electricity and likewise on account of the assured availability of a large volume of water, a nationally known corporation has purchased land in Chattanooga and after the war will establish a large nylon plant, employing approximately 800 people initially with plans to expand this to over 3,000 later. It's not hard to see that 3,000 additional jobs in our city at the liberal wage scale which the Du Pont Corporation pays will be of great benefit.

The privately owned power company previously sold electrical appliances in competition with local dealers and did a pretty good job of it. Our board immediately discontinued this practice when we purchased the company and began an energetic sales-promotion program to encourage the sale of electrical appliances by private dealers. In the first 2 years following the purchase of the system by our board and the inaugurating of the low rates which we placed into effect, the sale of electrical appliances by private dealers in Chattanooga was phenomenal, greatly exceeding those being previously made by the private power company and those dealers who had previously sold them. Many new dealers went into the business and those already in greatly expanded their sales program. Compared to 1938, a year in which the power company and dealers sold approximately a million dollars worth of appliances, in 1941 the dealers by themselves sold over $3,000,000 worth. Our board services electrical appliances with repairs. At the present time we have a staff of over 36 repairmen. We do this work upon a basis of charges which reflect the cost of doing it and to keep the large volume of electrical appliances in use upon our lines in repairs is no small job, as anyone in the business can tell you.

In Chattanooga we believe that there is a great use in the future to be made of electrical appliances by many people, particularly in the low-income group, who now do not have the appliances already in common use. To these will be added many new appliances for the use of electricity as a result of the technical developments made in the use of electricity for war purposes. Our household use in Chattanooga now ranks among the highest in any similar size city in the Nation and we believe that in the 5 years following the end of the war that this already high average will double itself.

I have perhaps devoted more time than I should to the benefits we have derived from the electrical phase of our experiences with T. V. A., but they have been so wholeheartedly recognized that I thought they should be mentioned. So far Chattanooga has found as a result of this experience that it can operate its own electricity system upon a business basis, keep it free from politics as they are usually recognized, and realize from it for themselves large savings in cost of service. Instead of putting private businesses out of commission, possibilities for additional privately owned businesses have been established. In the 2 years preceding the war I know our newspapers regarded highly the large increase in electrical-appliance advertising that came to them from the dealers and our board as a result of the widespread electrical-appliance business estimated by our board's low retail rates.

* * * * *

We folks in Tennessee, like people everywhere, like to have opportunities for recreation and fun. A great benefit accrues to those who have these opportunities and the T. V. A. lakes have opened up a whole new field of pleasure. After all, the whole Tennessee River is now nothing but a chain of nine large lakes. Around Chattanooga there is now much boating, fishing, outdoor water sports, and additional recreational opportunities that make our section a mecca for those who enjoy outdoor life. Very definitely one of the great benefits we have received as a result of our experiences so far with T. V. A. has been the development of a greatly enlarged outdoor recreation life for our citizens.

Chattanooga is an industrial city. We are not a great distributing center, but we are fortunate in having extensive railroad connections. Our city is not in particular a clean city, for there is some smoke and soot. Likewise, we have a population, many of whom have been in the low-income group and not always been able to obtain the most desirable living quarters. This condition is likewise true in practically every large city. We have approximately 40,000 Negroes in our city and we know we have a very high TB rate, and the same as other cities, have some undesirable health conditions. For its employees, and in connection with its health and sanitation program in its reservoirs, malaria control, and other kindred activities, T. V. A. has had a rather comprehensive health and sanitation department whose headquarters are in our city. The very presence of this has acted as a stimulant to many of us to work toward improved health conditions in the community. Gradually we are improving these, as are other cities, and in the program the experiences and cooperation of T. V. A. have been most helpful.

We have in Chattanooga the headquarters of the Department of Electrical Operations of the T. V. A., which is the paying partner in the program. They are in their own building adjoining which our Board has built a new building. In their Electrical Department are many trained and experienced electric-utility men, all of whom live in our city, are customers of our Board, and whose experiences are available to us any time we care to consider them. We run our own power operation independent of them, and they do not in any sense dominate or control our operations nor tell us how to run our business. We differ with them sometimes in our common problems, but quite often we find they can be very helpful and we have had a fine relationship. In fact, our only connection with the T. V. A. directly is our wholesale power contract, under which we purchase our electricity requirements. The rates which we charge are a matter of agreement between ourselves and the T. V. A. and likewise in the contract we agree to dispose of our revenues only in a certain specified manner. * * *

In concluding this discussion about our experiences with the T. V. A. and the way it has been carried out, I want to make mention of something I think is important, and something that we should not lose sight of. The T. V. A. headquarters and its officials are right in the area where the work is being done. All of the discussions with reference to it, and consultations between it and local groups, can be held literally right on the spot, and decisions made there about them. This is in pleasing contrast to the gradually growing centralization of authority and decisions that have to be made in Washington. If the T. V. A. had been run from Washington, as are most governmental projects which comprise even one, or more of the programs which T. V. A. administers in our valley, I am frank to say that I do not believe it would have been carried on nearly as well, nor such splendid results obtained. Visitors from other Government projects that carry out one or more of the programs of T. V. A., have told me that they would give almost anything, if their area had the same set-up as the T. V. A. project has. The administration of it, of course, by its board of three directors, has had a great deal to do with it and those of us who know the T. V. A. program best and its results, are quite frank in paying the highest tribute to David Lilienthal, the chairman of its board, and its other two directors. We think so

much of the method used in the Tennessee Valley and the mechanics for doing it, that we want the T. V. A. law left alone in Congress, with no crippling legislation to retard its progress and destroy its effectiveness. Sometimes we have had to quarrel with our own Tennessee Representatives in Congress about this, for they have thought otherwise. There have been some minor mistakes made in the program in our area, which is but natural, but anyone who has visited the area and seen the results first hand, can understand that the benefits have greatly overshadowed any minor mistakes. I am quite frank to say that if it had to be done all over again, I would want it done in our area, by the same type of regional authority that has accomplished the splendid benefits so far to the area, in many of which our city of Chattanooga has been a recipient.

And now, in closing, let me state that no discussion of T. V. A., nor our experiences with it, would be complete without expressing the thought, that through it, we in Chattanooga and Tennessee and throughout the valley, have had a very great opportunity to expand our contribution to the war effort. Long known as the Volunteer State, the resources of our section have had an opportunity, through the T. V. A. program, to go to war along with the manpower of our section. There is no question that this contribution of materials and resources would have been much less, had we not had a T. V. A. program, and as some of them were so very vital to the war effort, the very progress of the war might have been affected.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. GEORGE E. OUTLAND

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. OUTLAND. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter published in the News-Press of Santa Barbara, Calif.:

TRIBUTE WRITTEN TO FRANKLIN D. ROOSEVELT

EDITOR, NEWS-PRESS:

It is but natural that a typically great American should become the first-accepted citizen of the world in this modern machine age. It is also natural that this man should be one who was tempered in the fires of personal pain, politics, and wealth. Yes; this man of faith was our late beloved and immortal President, Franklin Delano Roosevelt.

He has left not only his indelible tracks around the world, that spelled out in deeds: "We have nothing to fear but fear itself." But he also left the seeds planted in his tracks that will sprout and grow and flower into that better world for all.

He and many thousands of others have given their life's blood to nourish this yet unsprouted plant; and feed and protect it to maturity from being smothered by fowl weeds and ill winds.

It is inevitable, even though this may be a century plant, that enough people of good will and forcefulness will now spring to the propagation of this potential plant of world freedom, of which our late President will ever be the symbol.

Some of the planted seeds could well be named "Bretton Woods"; and the San Francisco Peace Conference can become the "April showers" that sprout the seed and push the young and tender plants through the earth's crust into the sunlight.

Yes; "Having served his own generation by the will of God, he fell on sleep." But the spirit of this first citizen of the modern world is an indestructible crusading spirit that will permeate many souls of many lands of many future generations. It is this cause of world freedom I wish to serve, that I, too, may become worthy, in the eyes of my Creator, to humble world citizenship.

ODIN G. BUELL.

Social Security Accounts of Members of the Armed Forces

EXTENSION OF REMARKS

OF

HON. ANDREW J. BIEMILLER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. BIEMILLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following enrolled copy of Assembly Joint Resolution 63, adopted by the 1945 session of the Wisconsin Legislature, memorializing the Congress of the United States to enact legislation to provide wage credits on the social-security accounts of members of the armed forces during their period of service:

Assembly Joint Resolution 63

Joint resolution memorializing the Congress to enact legislation to provide wage credits on the social-security accounts of members of the armed forces during their period of service.

Whereas by the end of the war there will be approximately 15,000,000 men and women in the armed forces of the United States and Wisconsin's share will be approximately 300,000; and

Whereas most of these men and women will have lost from 1 to 4 years or even longer from the accumulation of benefits provided by the social-security law; and

Whereas this will effect a real loss in the benefits to be received at the time of retirement inasmuch as such benefits are dependent upon contributions by both employee and employer; and

Whereas the social-security law is wholly a Federal program; and

Whereas it is the sense of the people of Wisconsin manifested in their respective representatives in the legislature that the returning veteran justly deserves and is entitled to fair and generous treatment: Now, therefore, be it

Resolved by the assembly (the senate concurring), That this legislature hereby respectfully memorializes the Congress to enact with all convenient speed appropriate legislation providing that men and women in the armed forces shall receive appropriate wage credits on their social-security accounts for their period of military service; and be it further

Resolved, That properly attested copies of this resolution be transmitted to the President and to the clerk of each House of Congress and to each Wisconsin Member thereof.

OSCAR RENNEBOHM,
President of the Senate.
LAWRENCE R. LARSEN,
Chief Clerk of the Senate.
DONALD C. MCDOWELL,
Speaker of the Assembly.
ARTHUR L. MAY,
Chief Clerk of the Assembly.

Lithuania's Freedom Cause in Connection With the International Security Conference at San Francisco

EXTENSION OF REMARKS

OF

HON. JOSEPH E. TALBOT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. TALBOT. Mr. Speaker, under leave to extend my remarks in the RECORD, I desire to include the following resolution adopted by Waterbury Lithuanian-American Council, Waterbury, Conn., regarding Lithuania's freedom cause in connection with the International Security Conference at San Francisco:

Whereas the Moscow Conference in October 1943, proclaimed that it recognizes the necessity of establishing as soon as possible a general organization based on the principle of the sovereign equality of all peace-loving nations, and open to membership to all such States, large and small, for the maintenance of international peace and security; and

Whereas the Government of the United States as far back as March 22, 1944, proclaimed that the principle of sovereign equality of all peace-loving nations, irrespective of size and strength, as partners in a future system of general security will be the foundation upon which the future international organization will be constructed, and further, that each sovereign nation, large or small, is according to law the equal of every other nation; and

Whereas the people of Lithuania during 3 years of Nazi occupation continued to fight the Nazi occupant by every means, thus contributing to the final defeat of Nazi Germany; and

Whereas the Republic of Lithuania has always been a peace-loving nation, and to this day continues to be a member of the League of Nations; and

Whereas the Government of the United States of America recognizes the Republic of Lithuania as a sovereign state: Now, therefore, be it

Resolved, That the American delegates to the International Security Conference at San Francisco insist on the application of the principle of justice and sovereign equality for all nations, large and small, thus upholding the democratic structure of the whole post-war security organization, as expressed in the Atlantic Charter, the Moscow Declaration, the statement of the Secretary of State of March 22, 1944, and countless other solemn proclamations; be it further

Resolved, That a duly accredited representative of the Republic of Lithuania be admitted to the forthcoming deliberations in San Francisco as a conference member; be it finally

Resolved, That the military occupation of the territory of the Republic of Lithuania be placed under the supervision of the inter-allied control body, that the Lithuanian people be given the right to organize their own government and proceed with uncoerced democratic elections. The United Lithuanian Organizations of Waterbury, Conn., call attention to the fact that while the U. S. S. R. continues to repeat praise-worthy sentences about democracy and humanitarian principles, the reign of terror inaugurated by the N. K. G. E. against the entire population in eastern Europe continues unabated on the eve of the International Security Conference.

PETER VILEISIS, *Chairman.*
ANTHONY LAZDAUSKAS,
Secretary.

Under Secretary of State Joseph C. Grew's Address Concerning the San Francisco Conference

EXTENSION OF REMARKS

OF

HON. LUTHER A. JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. LUTHER A. JOHNSON. Mr. Speaker, under leave granted to extend my remarks, I submit herewith the address delivered by Hon. Joseph C. Grew, Acting Secretary of State, at the Washington Cathedral Service of Prayer for the United Nations Conference on International Organization on Sunday, April 29, 1945:

Throughout the ages, one of the basic aspirations of mankind has been the attainment of security: Physical security against the elements, the ravages of disease and the depradations of fellowmen; economic security against poverty and hunger; spiritual security and the peace that passeth understanding.

Similarly, nations have sought security, both economic and strategic, from disruptive forces within and from aggressive forces beyond their borders.

Yet time and again ambitious leaders have used unprovoked aggression as a means of enhancing their power and prestige.

Time and again the civilized world has been plunged into havoc by an Alexander, a Genghis Khan, a kaiser, a duce, a fuehrer, or a Japanese military clique whose megalomania knew no bounds.

Under this constant threat, peaceful men have searched for some way out of the tragic dilemma of war—some device for preventing violence and brigandage through mutual agreement, justice, and common defense.

The Greeks tried it in the fifth century before Christ. Their Delian League was a federation of sovereign city states. Its purpose was to suppress piracy and build a common defense against the aggressive Persians.

The Romans made a world-wide experiment in peace by domination—but like all such attempts since then, it fell eventually, undermined by its own progressive decadence.

In more recent times, men we now know were true prophets of peace offered the world blueprints so far in advance of their own day that they were never tried. William Penn, in 1693, and Immanuel Kant, just a hundred years later, propounded remarkably modern schemes for federal union under systems of international law. Kant boldly proposed a world federation of free and democratic peoples. But theirs were voices crying in the wilderness.

Even after the bitter lessons of revolution and Napeoleonic conquests, the best that the Congress of Vienna could offer Europe was an uneasy alliance based on shifting force. And this alliance in its turn collapsed.

In the late nineteenth century the world knew a period of armed peace, but it was not until the eve of the twentieth century that the nations of the earth came together at the Hague to make a concerted attack on the causes of war.

The foundations of the structure of modern peace were laid at the Hague Conferences of 1899 and 1907. The structure itself, alas, was delayed and neglected as the storms of war gathered and descended upon an incredibly unsuspecting world.

There has been a tendency in recent years to belittle the League of Nations, as regards both its concept and its achievements. Those who would write off the League as a poor attempt at peace building are, it seems to me, evading the plain fact that its provisions were never faithfully carried out in times of crisis. The League machinery, imperfect though it was, failed not through use but through disuse, and Woodrow Wilson's prophecy has come to pass:

"I look for the time," he said on Memorial Day, 1919, "when every man who puts his counsel against the united service of mankind in the League of Nations will be just as ashamed of it as if he now regretted the Union of the States."

Today, as we survey the holocaust of two world wars within a quarter century, as we count the cost in death and disaster, in torture and starvation, in ruined lands and blackened cities—above all, in the loss of our youngest and best—we are determined as never before to find the way to a peace that will endure. And at long last we are willing to face the ultimate stubborn realities, to make the sacrifices and give the service necessary to attain that great objective.

Reluctantly we have come to the realization that there is no certain security in strategic frontiers, great oceans, or vast distances that never again can we or any other people find security in isolation.

We know beyond peradventure that another war, coming upon an intensive development in military, electrical, and chemical science could wipe great masses of civilians off the face of the earth in a matter of very brief time. With that certain knowledge, can any effort, any sacrifice be considered too high a price for preventing future tidal waves of militarism, and for permitting mankind to live and progress in confidence, security, and peace?

We human beings may not change much through the ages, but at least we do learn from grim experience. The seeds of conflict are buried deep in human nature; they cannot be destroyed merely by the signing of a pact. What can be done, what must and will be done, is to create conditions, month by month and year by year, under which those seeds cannot germinate.

That, as I see it, is the fundamental task that lies before us today.

The San Francisco Conference has begun. We may describe it, without fear of overstatement, as one of the most momentous gatherings of history. We may approach it with sober confidence and high hope.

What justification, you may ask, exists for this confidence and hope?

By what new alchemy do we propose, now, miraculously to snatch success out of the failures of the past?

I believe we shall succeed, not through any miracle, but through a combination of hard work and faith.

We and our allies have been slowly and painstakingly hammering out—by a combination of hard work and faith—the shape of a new kind of peace: Not a Roman or Teutonic peace by domination; not a reactionary peace designed to freeze an antiquated social and economic order; not a peace of rival blocs but a flexible, dynamic, progressive peace by cooperation and mutual accommodation. A peace which shall hold out the promise of better conditions of life for so many people of this earth that they will be drawn into its orbit through enlightened self-interest.

The proposals before the San Francisco Conference, while neither perfect nor complete, do, however, provide a realistic basis for developing such a peace.

They contain, in the proposal for the Security Council, machinery for the adjustment of grievances and the settlement of disputes by all the methods that have been evolved and effectively used by peaceful nations.

They also contain provisions for the immediate use of overwhelming force to restrain or punish any member or outsider who may breach the peace of the international community. It is hoped, of course, that the very existence of this force and the clear intention to use it will make it unnecessary to use it.

But it is in the Assembly of the United Nations that the great constructive work for peace will, we hope, be planned and undertaken. It is there that the genius of all nations, large and small, will make its full contribution to the solution of problems which have defied man's best efforts for centuries.

Through the Economic and Social Council and the other specialized bodies which will come under its general supervision, the Assembly will direct the attack on hunger, poverty, and disease. It will be concerned with the progressive disarmament of nations, as conditions of security permit. With the help of the International Court of Justice, it will undertake the building of a code of international law to serve the needs of a modern world community.

The Assembly can become a true parliament of man. It can cultivate the seeds of peace by creating the soil and the climate congenial to their growth.

Leadership in such an enterprise will spring from national character and genius, as it does in any civilized society from which force has been outlawed.

We come, then, to what is, for us, the paramount question: What part can we, the American people, most usefully play in this bold enterprise?

I think I am faithfully interpreting our innermost desires and convictions when I say that, as a great democracy, we come to the council table of the United Nations not to dominate but to serve humanity—to serve not only through leadership but through example.

"Whosoever would become great among you, shall be your minister; and whosoever would be first among you shall be servant of all."

The opportunity to serve a stricken humanity will come to us only if, at the height of our power, we can be humble. Our character as a people has never faced a harder test.

Alone among the great powers, we shall emerge from this most destructive of all wars with our cities unscathed, our fertile fields and natural resources untouched by the devastation of war.

The average level of our standard of living has, if anything, been raised by the necessity for unprecedented employment in war production.

In becoming the arsenal of democracy, we have demonstrated a productive capacity undreamed of before the war, and we intend to use that capacity to satisfy the peacetime wants of all Americans and many in need abroad.

On the day of final victory we shall awake to find ourselves possessed of the greatest military power in all history.

We have proved that our democratic system can withstand the imposition of wartime controls, and indeed draw added strength from the fact that they were self-imposed.

These are thoughts that might induce complacency. If that should happen we should be lost, and our victory would be empty. But we can be confident that it will not happen, because this generation of young Americans has grown up in a period of leadership which understood the uses of power and accepted its responsibilities. When the challenge to our freedom came, Franklin Roosevelt knew whence the power of the American people would come, and with vision and great courage he drew it forth.

"Our strength is measured not only in terms of the might of our armaments," he said. "It is measured not only in terms of the horsepower of our machines.

"The true measure of our strength lies deeply imbedded in the social and economic justice of the system in which we live.

"For you can build ships and tanks and planes and guns galore; but they will not be enough. You must place behind them an invincible faith in the institutions which they have been built to defend."

That was said in 1940, in the darkest hour of the war, when one great democracy, France, lay prostrate, and another, Britain, had been shaken by the blows of the Luftwaffe.

Yet we and they, and our great allies in Russia and China and elsewhere, together proved that faith was invincible, and we shall keep on proving it until all the world believes.

The other day, one of our Air Force officers was interviewing a young Nazi prisoner, dazed but obviously impressed by the weight of the military colossus that had descended upon him.

"We are beaten," he said bitterly, "beaten by your American assembly line." He knew only the half truth that is more dangerous than falsehood. That he shall understand the power of our faith is one of the conditions of a lasting peace.

For he was beaten—and he and his kind must learn it—by the aroused and wrathful conscience of the Allied people. He was beaten by peaceful citizens of the United Nations, men who left their homes and families to learn the unfamiliar and uncongenial business of waging war.

Because they loved freedom and justice, they fought with a fury that no tyranny can withstand. Because they and their families love peace and decency, we and the other peoples of the world can look forward confidently to a better and happier future for mankind.

But love of freedom and justice and belief in certain victory are not in themselves enough. We and the other peace-loving nations must have faith in Almighty God as the ultimate ruling force in our lives and theirs.

It was faith that brought our forefathers to this land of ours, that inspired the founding of our Nation, and that has been the underlying force in our progress and our development throughout our history.

The very religious freedom which is a fountainhead of our democracy would have been swept away along with our other freedoms had the dictators had their way. And now, as peace approaches, having fought the good fight, we must realize that only through this spiritual dynamic can our individual and national freedom be preserved. Our faith in God must be alive and vibrant in our daily lives if we are to gain the full rewards of victory. Only at our peril can we neglect that faith in the coming days of peace.

If only our faith, which the churches have helped to build and preserve, is robust; if only that faith is an active and not merely a passive factor in our daily lives, then can we draw with confident assurance from the great reservoir of spiritual strength and guidance which is ever at our disposal if we but seek it.

Many have prayed in moments of darkness and discouragement; our fighting men have prayed in crisis and peril, and we at home have prayed for them and for the world's deliverance from war. In the times of tranquillity to come, that spiritual faith in our individual and collective lives must be the cornerstone upon which we shall build the enduring security and peace to which we are dedicated.

For man cannot build a lasting peace by material means alone. But, if he has faith and draws on the spiritual help from God which has been promised to those who believe, man can do what to the unbeliever is impossible.

Let us therefore pray, in our churches and in our homes, today and in the days to come, for our representatives and for the representatives of many peoples as they embark at San Francisco upon the great undertaking which can, with God's help, deliver mankind from the scourge of war. And as we pray let us be of good courage and high hope, remembering Christ's words:

"Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you.

"For everyone that asketh receiveth; and he that seeketh findeth; and to him that knocketh it shall be opened."

Parley Faces Peril, Historian Declares

EXTENSION OF REMARKS

OF

HON. WILLIAM S. HILL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. HILL. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include the following address made by William B. Ziff, as reported by the North American Newspaper Alliance in the Miami Daily News, April 15, 1945, on the conference now being held in San Francisco to promote a world peace organization:

PARLEY FACES PERIL, HISTORIAN DECLARES

(By William B. Ziff)

NEW YORK, April 14.—It is evident that, whatever the accomplishments of men in the fields of science and technological advancement, the world is still today in the horse-and-buggy stage internationally.

The question of world organization is no longer some pleasant academic affair which can be retained or rejected at some later time, after we have seen how it has worked out. Its aspect instead is relentlessly realistic and immediate.

This time we will have to guess right—or else.

I address myself to this question because I am afraid that we are taking the wrong road. I am afraid that we have found ourselves on a detour full of easy and facile expediencies, which will end finally in disillusion, and in the mire of the international fear, distrust, and war.

We must make certain today that what we achieve is the reality of freedom and security—not its shadow.

I refer, of course, to the present effort to create a new League of Nations, which is now being brought to the attention of the American public.

TRADE AND ECONOMICS INVOLVED

I am not suggesting that we withdraw from the rest of the world.

It is a question of whether the present archaic political structures which act like so many watertight compartments to keep men separated from each other can be broken down, and whether they can be consolidated along rational lines to meet the needs of this century. It is a question of trade, of economics, of manufacture, of military defense and of those cultural and social adjustments which must apply in a machine age.

Above all, the question certainly is not one of charters or politics alone.

Those who support a world league would like to effect an international security organization based not on the common law which applies to individuals everywhere, but on a series of pacts and arrangements between the various nations as they now exist.

Those nations which break the convenant are to have their heads bashed in by the use of force and sanctions in the hands of the more pious states.

Though such a league may appear to be a step in the right direction, it is a commitment to chaos.

When one compares the background of the Concert of Europe created in 1815 at the Congress of Vienna with that of the Dumbarton Oaks league, it is amazing to notice the similarities. The leading powers of the time were determined to create a condition of permanent balance among themselves. Assurances were exchanged, and an article written into the compact which bound the great powers of the time to meet at fixed intervals and to arrive at a peaceful settlement of all problems. This arrangement looked forward to the final disarmament of the Continent, to the establishment of a permanent international court, and to the rule of international justice.

Instead of being reduced by these measures, militarism gained rapidly. The concert of Europe ended in the usual clash of interests.

AMERICA HAS SPURNED TREATIES

The cause for these failures is not hard to find. It involves the nature of the sovereign state itself.

The need for military security, for markets, for raw materials, for seaports, river routes, or new settlement areas, will determine the course of the sovereign state without relation to any pacts, treaties, or guarantees which might exist.

Even the United States, presumably as moral as any nation in history, has not hesitated to disregard treaty obligations and arrangements where it deemed it necessary to do so.

Indeed, the agreement at Chapultepec by which trade preference is to be given the Latin-American republics must have the effect of fracturing the entire spirit of the San Francisco Conference. To deal thus with Latin America, no matter how laudable the purpose, means the creation of bilateral or favored-nation agreements.

Our present approach toward some type of sane international order is in the wrong direction. Every historic experience has proved it to be false and unsound. You will not make it more sound by trying it over again.

The old Wilsonian League started out with quite as high ideals and, if anything, with an even nobler purpose. It failed to function because it could not reconcile two utterly antagonistic ideas—the rule of international law, and the sovereign independence of the individual state. As long as a state is sovereign, it is its own judge as to its need and it relationship to the world. It cannot be ruled by law—it can only be coerced by superior military power in the hands of other states.

As far as the old League was concerned, it had almost all the superstructure which is now under other terms proposed for the new league.

How, if the relatively easy method of economic quarantine failed because the member nations themselves would not adhere to the pledge for unified action, can we expect nations to permit the use of their armed forces against a threatened aggression?

RULE OF FORCE NOT LAW

Now aggression is a matter of definition. Hitler declared that Poland had been the aggressor in the present war. Japan called Korea and China aggressors.

Further, the rule of force is at no point connected with law. Force in the case of a sovereign state means coercive military power. It certainly is not the police power which it is so glibly described.

Harry Hopkins, in the American magazine, asserted recently that the "earth is not civilized enough to make world-wide disarmament practical for peace-loving nations." General Arnold also has pointed out that the United States by virtue of its riches will be the "first target" of the next world aggressor.

All of this, mind you, is said with the knowledge that we intend to enter a new world league.

This is a confession of failure in advance. It is a confession on the part of high officers of the administration that the best we can hope for is a new armaments race, a new contest for power within the League itself.

I submit that this is a mistaken concept of world security, and that it does not bear the slightest relations to those real issues which must be determined and settled if the world is to be at peace.

Permanent peace can come only when the fundamental imbalances which now give weight to the business of power politics, are removed. These imbalances rest on the present unequal distribution of opportunity, power, and natural wealth among the nations.

Markets, manufacturers, and military operations today are all on a hemispheric scale. They cannot successfully be conducted otherwise. The existence of a great many minor nationalisms throws a sabot into the whole machinery of international operation, and is an invitation to world disunity and anarchy.

In the old days a country like Bulgaria, which produced stalwart men and fine horses, could create a cavalry quite equal to that of any state. Today, only a great nation can produce that mechanized cavalry called a tank corps, or those cavalrymen of the air called the air corps.

Possession of such hardening agents as vanadium, chrome, and beryllium alone can be of major consequence in a military struggle. The lack of certain tropic materials may be a decisive handicap.

The new world of mechanical mastery demands new approaches to the existing problems. It suggests not the setting up of international police forces, which themselves would become immediately an object of intrigue and conspiracy in a new global contest for power, but great regional amalgamations capable of fulfilling the needs of this age.

I proposed now that we take the first step—that step toward which the whole history of this hemisphere has pointed from the beginning and which the revolutionary changes in our social order now makes mandatory—the physical union of the Western Hemisphere.

Such an amalgamation of the West, it appears to me, is the terminal conclusion of all plans for tomorrow's security, as well as for the proper exploitation of the wealth of this hemisphere for the benefit of all its citizens. If, in their broad aspects, national policies rest on military, economic, and geographic considerations, we are violating every precept of sound judgment if we do not bend our energies toward the political consolidation of the American nations, both on this and our sister continent to the south.

If such a power system were to have every advantage an ultimate extension of its borders would provide, it should embrace also the British Isles and the great bulk of islands in the Pacific, as units molded into a common framework of government and of cooperative action.

EXAMPLE FOR REST OF WORLD

The presumption is that these units would be more or less equal in power and resources; that each would possess a balanced table of physical resources and opportunity, so as not to have any important section of its economy at the mercy of others, and that to this degree the reasons for war would diminish.

The rest of the world will not be far behind once we have set the example. Perhaps, indeed, the example already has been set for us by the actions of the Union of Soviet Socialist Republics.

Such an arrangement could easily take place within the superstructure provided by Dumbarton Oaks. It would make of what must otherwise prove to be an unsound and illusory project, a workable framework for world collaboration. Such collaboration can be effective between a small number of giant units, all more or less equal to each other in physical power and attributes. The pretense that it will work with the present set-up, which presumes that little Latvia or Bulgaria is coequal to the United States and the Soviet Union in the affairs of the world, is a dangerous piece of thinking which comes under the head of folly.

If a common union existed, our military installations in the Caribbean, over the North Polar routes, or in the dangerously exposed eastern hump of South America, could be erected as a result of long-range planning. They would not need suddenly to be improvised at some last insecure moment when immediate danger threatened.

By the consolidation of the Americas and the great bulk of the islands in the Pacific, together with the British Isles, there would be created a modern military fortress which could be breached from no side without the gravest risk to the aggressor.

Here, too, would be new frontiers, new vistas, and new opportunities by which the economic level of the peoples of our respective areas could go forward toward a new West of exploitation and development. This entire vast expanse, together with its approaches in the two oceans, would constitute a self-contained consuming area which, like the Soviet Union, need not seek markets elsewhere to exist.

ISOLATION THE ONLY ALTERNATIVE

This would open up for Great Britain, as well as the United States, extensive new frontiers which would be a stimulus to the spiritual side of our nature as well as to its industrial and mercantile side. The effect would be to create new enthusiasms in a civilization which otherwise will be in danger of constriction through the failure of its own powers.

The alternative to this enlightened course is, of course, continued isolation. The possibilities are not pleasant to survey. The loss of Britain, Canada, or the island empire of the South Seas would be unfortunate in the extreme. Latin America could easily be our heel of Achilles. If Europe should come under one totalitarian rule, or Asia industrialize its teeming millions and unite against us, the question of our survival would be determined by the status and sympathies of the Latin south.

Latin-Americans judge us now not altogether as friends but as potential competitors, as people who wish to hold them under our thumb and to give them nothing in the way of equality.

When hostilities cease the sellers' market, which now makes South America prosperous, will come to an abrupt end.

We will begin perhaps to buy tin from the British in Malaya, and will be once more in open competition with Brazilian cotton and Argentine meats and hides for world markets. It is estimated that, within 3 years after the liberation of eastern Asia, there will be a world surplus of some 1,300,000 tons of rubber a year. The price of rubber will tumble, as will that of other important commodities.

LATIN AMERICA'S VIEW OF THE UNITED STATES

It is at this point that the economy on which Latin America rests may find itself in the most extreme jeopardy. These states will be in agitation and perhaps in revolutionary ferment as a result.

If they cannot turn to us as friends who will receive them in our community of states, they will turn against us and will seek some other answer to their problems.

We will then find ourselves quarreling not only with Latin America, but with England and other states, over many questions. We will find ourselves apprehensive and contentious over details of commercial advantage, and will survey with unconcealed fear the gigantic growth which will have made the Soviet Union the most powerful nation the world has yet seen.

As far as differences of cultural and national interests are concerned, we need only point out the existence of exactly such divergencies among the people of the Soviet Union, or Switzerland, or even in little Belgium, which is made up of two distinct peoples. Or for that matter, our own neighbor, Canada.

Brazil has large German-speaking communities, as has Chile. Paraguay is mostly Indian, speaking the Guarani language. The great majority of Bolivia's 3,500,000 inhabitants are Indians who speak Aymara and Quechua, not Spanish.

All of these peoples would operate in the full freedom of their own autonomous development, and would fit without difficulty into the grand over-all plan of union. Although remaining autonomous, as is the citizen of Quebec, in Canada, they would, nevertheless, have a common political destiny, a common defense, a common industrial economy, and their collective areas would constitute a common market for the products of their skill and labor.

The difficulties of bringing such a result about may be great, but they are not insuperable. Even the American Union itself was for a period of 6 years a league of independent, quarreling States.

SENTIMENT STRONG FOR UNION

In Australia and New Zealand I am convinced that a plan of union enunciated by us, would find strong support. This may be less true of Canada, but I believe that that Dominion can be won to the idea. As far as Britain is concerned, it is not to be forgotten that Churchill once flew to France, when all seemed lost, and offered the French, not collaboration within a league, but unity under the roof of a single parliament. The incident proves that a potential acceptance exists in Britain, too, for just this type of Federation.

The entire tradition of Latin America is not for separation but for union. That greatest of all Latin-American leaders, Simón Bolívar, spoke not for separatism. His principles and his design for the future, unqualifiedly were for union.

At the height of his career Bolívar wrote: "Why should South America not stand under a single government? The bloody spectacle of Europe should be a warning to us."

It is my belief that the hour is at hand, and that the great clock of destiny is striking.

We Americans, as citizens of the most powerful, the richest and most influential of the free States of the West, have only to speak our minds and set the pattern. The rest will be a matter of normal evolution in response to the quickening spirit of freemen everywhere in our hemisphere and in the islands of the two oceans which are conjoined with it.

Justitia Fiat, Coelum Ruat

EXTENSION OF REMARKS

OF

HON. JOHN B. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. SULLIVAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a statement made by me on Sunday, April 29, 1945, in a radio broadcast of the Washington story over the Blue Network, on the question, Shall retaliation in kind be made for the atrocities committed by the Nazis?

The statement follows:

The first human reaction of every decent civilized person to the atrocities practiced by the Nazis is horror, revulsion, and indignation.

No punishment could be too brutal, no torture too cruel, to inflict upon the Nazi beasts in retaliation for the abuse of those helpless victims whose ashes and bones and twisted bodies cry out for vengeance. These are the natural human reactions.

But we are living in a civilized society. We have attained that high standard of civilization through centuries of struggle. Law and order and justice have been the tools by which we have molded it.

The civilized nations at this very moment are striving earnestly to build a peaceful world by peaceful means. Law and order and justice must be the foundation upon which it rests.

In isolated cases, in our own communities, atrocities have been perpetrated by the lawless, terrible crimes of violence and bestiality have been committed by psychopaths, but we do not mete out justice by retaliating in barbarous fashion. Cruel and unusual punishment is not the way of civilized society.

The Nazis have sought to destroy our civilization.

In their lust for power, they have ignored the dignity of the human being, made to the image and likeness of his Creator. They have descended to the lowest depths of degradation.

The criminals must be punished. The punishment must fit the crime. It must be certain and swift. The determination that justice be done must move us. Calm reason should fix the penalty.

Sympathy for the guilty does not dictate this course. We are simply unwilling to brutalize and degrade ourselves by adopting the methods of the Nazis. We are unwilling to abandon law and order and justice for the sake of vengeance.

The way of a just man is often hard. The way of just nations, too, is often hard.

Justitia fiat, coelum ruat. Let justice be done even though the heavens fall.

Historical Society Gets 1793 Book on Shorthand

EXTENSION OF REMARKS

OF

HON. PHILIP A. TRAYNOR

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. TRAYNOR. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Wilmington Morning News, Wilmington, Del., Wednesday, May 2, 1945:

HISTORICAL SOCIETY GETS 1793 BOOK ON SHORTHAND—GIFT OF MISS MARY BRINGHURST SHOWS CONGRESSMEN AND OTHER LEADERS 152 YEARS AGO FOUND ITS STUDY PROFITABLE

Would-be stenographers and embryonic business executives weren't the only ones who were struggling with the complexities of shorthand in 1793.

In a book of shorthand, recently given to the Delaware Historical Society by Miss Mary Bringhurst, is a list of Congressmen and leaders of the country who endorsed and purchased the book published by H. & P. Rice, Philadelphia, in 1793. Among the subscribers was Joseph Bringhurst, Jr., an ancestor of the well-known Wilmington family.

Thomas Jefferson, Peter Caverly, and George Booth were others who found the study of shorthand profitable.

The book, now on display at Old Town Hall, is entitled "The System of Shorthand Practiced by Mr. Thomas Lloyd in Taking the Debates of Congress." In the preface, the superiority of this system of shorthand over all other systems is eloquently stated. The author modestly said that more complicated systems were to his simplified one as the Chinese alphabet is to the English alphabet. "The Chinese have unhappily succeeded in an attempt to express every word by a different character," the preface states.

Miss Bringhurst, who donated this curious piece of Delawareana, is the sister of the late Edward Bringhurst 5th, who died December 8, 1939.

She lives at Rockwood, the family home, where her brother lived all his life.

Republic of Poland Submits Memorandum to the San Francisco Conference

EXTENSION OF REMARKS

OF

HON. GEORGE G. SADOWSKI

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. SADOWSKI. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include a memorandum on some aspects of a world security organization submitted by the Government of the Republic of Poland to the Conference of the United Nations in session at San Francisco in April 1945:

The Polish Government considers that its omission in the invitations extended to the governments of all the other United Nations to attend the Conference opening on April 25, 1945, in San Francisco, does not release the Polish Government from its primary duty, as the only legal representative of the Polish Nation, to submit constructive suggestions on behalf of Poland to the United Nations at the San Francisco Conference with a view of contributing in a spirit of international collaboration to the establishment of a world-security organization. These objectives are no less dear to the Polish Nation than to other freedom-loving nations.

Throughout this war, and from its very outset the Polish Government and the Polish people have given constant proof of their attachment to the ideals and aims in the name of which the United Nations are waging this war in defense of human freedom and of the independence of nations.

Poland was the first to oppose armed resistance to German aggression. Ever since the Polish armed forces, in Poland and abroad, under the direction of the Polish Government continue actively to fight against the common enemy on land, on sea, and in the air. The Polish Nation has not had a single Quisling.

Conscious of its responsibility to the Polish Nation, which is deeply attached to its traditions of Allied loyalty, of love of peace, and ever faithful to its secular policy of constructive international collaboration—the Polish Government submits to the United Nations in conference at San Francisco the following considerations and suggestions:

I. CONSIDERATIONS

A. At the close of this unprecedented total war the entire Polish Nation and undoubtedly every man and woman the world over sincerely crave for a just and secure peace settlement founded on the permanent harmonious functioning of a world security organization led and guaranteed by the big powers in full and willing collaboration with the smaller ones.

B. For more than 5 years, freedom-loving peoples have all been fighting relentlessly, the weak and the strong, the military and the civilians, to make possible the establishment of a better world founded upon the principles of freedom and justice, free from wars of conquest, from oppression of the weak by the strong; a world in which power would be used only as a last resort to maintain and defend the rights and liberties of man, but never to suppress them.

C. In civilized countries all citizens are equal before the law. In a civilized world all nations, as groups of individuals, must be equal before the law and juridically equal amongst themselves, regardless of their size, importance, or power.

D. The inequality which exists between the big and small powers should not be measured in terms of power supremacy but only in terms of power responsibility. The big powers cannot escape responsibility for the maintenance and the defense of a just peace settlement, even by force, if the necessity should arise.

However, to be just and durable, a security system should be operated on the firm basis of the collaboration of all nations concerned, the big and the small, as their joint responsibility, in direct proportion to their respective possibilities.

E. Peaceful international collaboration is essential to the creation of international confidence without which real security could not be established. Therefore, the initiative which led to the holding of the Dumbarton Oaks and the San Francisco Conferences, as well as their timing, certainly deserves wholehearted approval.

F. However, in wartime responsible statesmen are mainly absorbed by military problems in which the power of armed force necessarily plays a dominant part as the chief element of victory. Wartime thinking tends temporarily to relegate to secondary importance fundamental principles, moral and cultural forces, and spiritual ideals, so indispensable to the establishment of a world security organization for the maintenance of a just and durable peace.

G. Consequently, it may be inadvisable for the United Nations to attempt to complete the erection of a rigid structure of a world security system while hostilities are still in progress, as such finality might lead to a dangerous freezing of a world status imposed by war conditions, and inconsistent with the common program of purpose and principles embodied in the Atlantic Charter, to which the United Nations subscribed in the declaration signed by them on January 1, 1942.

H. This war has definitely proved that in modern times war can only be waged by a big power endowed with a great industrial potential and vast territory over which it can distribute and effectively defend its war industries. On the other hand, no smaller power can prepare or wage war unless it becomes the satellite of a big aggressor power.

Hence, apart from the basic reasons of justice and of the right to self-determination of peoples, a sound security organization requires that the real independence of smaller states be preserved and scrupulously maintained.

If a world security system is to be established under the joint guaranty of the big powers in willing, permanent collaboration with the smaller states, it would be unjust, illogical and superfluous for any one of the big powers to seek additional insurance of its own security by means of territorial aggrandizement at the cost of neighboring states or by tending to reduce their independence and sovereign rights.

I. In the light of this reasoning, the veto formula agreed upon at the Crimea Conference should be revised by the United Nations, as, in its present form, it could secure the world only against aggression by a

small state, while it would be inapplicable in the case of aggression by a big power.

II. SUGGESTIONS

1. The Dumbarton Oaks proposals are a first step on the way to a formulation of the statute of a World Security Organization. The welcome result of the constructive criticism provoked by the Dumbarton Oaks proposals is most effectively proved by the fact that a few months later another greatly improved document of international collaboration for security, known as the Act of Chapultepec, issued from the conference recently held in Mexico City.

The Act of Chapultepec differs substantially and advantageously from the Dumbarton Oak proposals. It established explicitly international relations on the basis of justice, law, the respect of treaties, the equality of states, good-neighbor policy, noninterference in internal and external affairs of states, the nonrecognition of territorial acquisitions by force; and on the recognition of the principle that every state is equally entitled to political independence and to respect of its territorial integrity.

From the general standpoint of the high aim of establishing an indivisible peace in an united and indivisible world, it appears both indispensable and logical to apply the same civilized norms of justice to international relations in both hemispheres.

The Polish Government suggests that these noble principles of justice and democracy, adopted by the free nations of the Western Hemisphere and reaffirmed by them in the Act of Chapultepec, be adopted in their entirety by the United Nations at the San Francisco Conference and embodied in the text of the charter of the World Security Organization.

2. The necessity for the introduction of the principles of the Act of Chapultepec in the charter of the World Security Organization additionally arises from the very text of the Act of Chapultepec. Namely, part III of the Act of Chapultepec stipulates that it shall be consistent with the purposes and principles of the World Security Organization. Consequently, failure to coordinate the principles of the charter of the World Security Organization with those of the Act of Chapultepec would result in rendering the Act of Chapultepec inoperative.

The importance of this suggestion should be weighed in the light of the second paragraph of chapter VIII of section C of the Dumbarton Oaks proposals which foresees that no enforcement action should be taken under regional arrangements or by regional agencies without the authorization of the security council. If the voting formula suggested by the Crimea Conference were to be adopted, such authorization of the security council should be made by an affirmative vote of seven members, including the concurring votes of the permanent members. In fact, any one of the permanent members of the security council, even when a party to the dispute, could delay or even prevent the operation of the security stipulations of the Act of Chapultepec. Assuming, for example, that a non-American power were preparing an act of aggression against an American power, such a non-American power would have the possibility of rendering inoperative the security agreement signed by 20 nations of the Western Hemisphere.

In the light of all the above-enumerated considerations and of the observations relating to the functioning of specific regional arrangements:

The Polish Government suggests that the voting procedure of the Security Council be amended to provide that all decisions of the Security Council be taken by simple majority vote of all its members including those of the states permanently represented on the Council. Furthermore, that a state which is a party to a dispute should not be entitled to cast its vote on any question relating to the dispute, and that a state should not be entitled to cast its vote when its failure to act in accordance with the provisions of the charter is under consideration.

3. The General Assembly, according to the Dumbarton Oaks proposals, is not granted the attributes of a policy-making body in international problems of the greatest importance, namely, in those of permanent security and the maintenance of peace.

The Dumbarton Oaks proposals tend further to reduce the importance of the General Assembly by stipulating that its right to make recommendations should not include any subjects being dealt with by the Security Council. This limitation would considerably reduce the value of the General Assembly not only as a consultative body but even as a debating forum. It should be remembered that the General Assembly is the only body of the World Security Organization in which all the signatory nations will be represented and should have the opoprtunity of expressing their views. It is therefore a forum of special value for the smaller States, and particularly for those not represented on the Security Council. Any curtailment of the rights and privileges normally enjoyed by member states on such an international Assembly would seriously limit those States in their effective participation in the task of maintaining security and peace.

The way in which the Dumbarton Oaks proposals tend to deprive the General Assembly—the only body on which all the United Nations are to be represented—of equality with the Council, and to limit even its freedom of discussion, is difficult to reconcile with the declared principle of "the sovereign equality of the peace-loving nations."

The Polish Government suggests that the General Assembly of the World Security Organization be given the right of unrestricted discussion of and initiative in, all questions pertaining to problems of world security and peace.

4. The experience of the League of Nations shows that one of the main difficulties of maintaining peace was due to the divergence of views and interpretations regarding the definition of aggression. It may be useful to remind the United Nations at this stage that the most comprehensive and clear definition was supplied on behalf of the Union of Soviet Socialist Republics by Foreign Commissar Maxim M. Litvinov and was embodied in the Convention for the definition of aggression concluded between the representatives of Soviet Russia, Estonia, Latvia, Poland, Rumania, Iran, Turkey, and Afghanistan, and later adhered to by Finland. In the preamble of this agreement, signed in London on July 3, 1933, it was stated that the signatories, "Mindful of the fact that the Briand-Kellogg Pact, * * * prohibits all aggression," have agreed in article 2 that: "The aggressor in an international conflict shall * * * be considered to be that state which is the first to commit any of the following actions:

"1. Declaration of war upon another state;

"2. Invasion by its armed forces, with or without a declaration of war, of the territory of another state;

"3. Attack by its land, naval, or air forces, with or without a declaration of war, on the territory, vessels, or aircraft of another state;

"4. Naval blockade of the coasts or ports of another state;

"5. Provision of support to armed bands formed in its territory which have invaded the territory of another state, or refusal, notwithstanding the request of the invaded state, to take, in its own territory, all the measures in its power to deprive those bands of all assistance or protection."

Article 3 goes on to say: "No political, military, economic or other considerations may serve as an excuse or justification for the aggression referred to."

In a special annex to article 3 of this convention for the definition of aggression, the high contracting parties, signatories of the convention, further stated:

"Desiring, subject to the express reservation that the absolute validity of the rule laid down in article 3 of that convention shall be in no way restricted to furnish certain indications for determining the aggressor,

"Declare that no act of aggression within the meaning article 2 of that convention can be justified on either of the following grounds, among others:

"(a) The internal condition of a state:

"E. g., its political, economic, or social structure; alleged defects in its administration; disturbances due to strikes, revolutions, counterrevolutions, or civil war.

"(b) The international conduct of a state:

"E. g., the violation or threatened violation of the material or moral rights or interests of a foreign state or its nationals; the rupture of diplomatic or economic relations; economic or financial boycotts; disputes relating to economic, financial, or other obligations toward foreign states; frontier incidents not forming any of the cases of aggression specified in article 2.

"The high contracting parties further agree to recognize that the present convention can never legitimate any violations of international law that may be implied in the circumstances comprised in the above list."

This Convention for the Definition of Aggression was freely entered into in 1933 by a big power, with seven lessor states. It is to be hoped that this important, realistic instrument of international law will be taken into account by the United Nations in working out the future world security system.

The Polish Government suggests that a clear and comprehensive definition of aggression, on the lines of the definition quoted above, be embodied in the charter of the World Security Organization.

LONDON, *April 1945.*

How To Avoid Federal Control of Education

EXTENSION OF REMARKS

OF

HON. WALTER E. BREHM

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 2, 1945

Mr. BREHM. Mr. Speaker, this statement by the Educational Policies Commission is the most complete analysis that I have ever seen on the important subject How To Avoid Federal Control of Education. The statement follows:

THE THREAT OF FEDERAL CONTROL OF EDUCATION

For more than a quarter of a century, education in the United States has drifted toward Federal domination. This drift has continued at an accelerated rate during the war. Present indications are that, unless this movement is sharply checked by an alert citizenry, it will continue even more rapidly after the war.

Following 1929 a mounting number of school systems, especially those in the poorer sections of the Nation, found themselves in a serious financial situation. The Federal Government responded through a series of indirect measures. Under the Works Progress Administration, funds were made available to

help keep schools open. Other relief funds were used to establish and operate nursery schools and other educational services.

More recently, through the "Lanham Act" the Federal Government is distributing hundreds of millions of dollars for educational purposes in communities where war industries and training centers have been established. Again, meticulous Federal controls accompany these allocations. The "G. I. bill of rights" bypasses State educational authorities almost completely.

Continuance of recent and current trends in Federal-State relations in education will, within a short period of time, result in the transfer of responsibility for the control of education in the United States from State and local communities to the National Government. If our education becomes federalized, it will not be because the people desire it. In fact, the federalization of education is inconsistent with the best American traditions and the best interests of our future American life.

If national control of schools becomes a reality, it will come by a process of accretion and infiltration. It will result from responses to many small emergencies and from the pressures of many special interests. It will not come as the fulfillment of a policy consciously adopted after mature deliberation by the majority of the American people; it will happen by default, resulting from failure to give this important matter the attention it deserves. No one Presidential directive or piece of legislation will be decisive in itself.

Although new factors in our contemporary civilization require closer organization and increased centralization of some of the areas of our life, a central control in other areas is a definite threat to our American plan of social organization. The fact that the national government must be the predominant authority in waging warfare and in determining the routes of transcontinental highways does not mean that it should similarly dominate such areas as the distribution of news and the education of the young. Education should be placed high on the list of services to be continued under State and local control. The ability to make distinctions as to what should be and what should not be centralized permits some nations to preserve their liberty. Those who cannot so distinguish may succumb to totalitarianism.

SOUND FEDERAL-STATE RELATIONSHIPS

Federalization of education in the United States can be prevented by application of the following principles:

1. The Nation as a whole, as well as the States and localities, has a stake in education, and the Federal Government should continue to exercise, within properly defined limits, educational functions demanded by changing national conditions and needs.

Citizens are citizens of the Nation as well as of States and localities and thus the outcomes of education have their effects, both good and bad, upon the Nation as a whole. Accordingly, the Nation should exercise educational responsibilities which are essential to its welfare. Requisite Federal action, however, can and should be limited to functions which supplement and assist, rather than displace, States and localities in the conduct of education.

2. In its relations to education in the States the Federal Government should limit its action to two broad functions: (a) financial assistance, and (b) leadership of a stimulating, but noncoercive character.

Four factors now largely determine whether a child is offered adequate or meager school facilities. These are economic status of the family, fiscal competence of the community, place of residence, and race. Education should be a major force in eliminating class distinctions and in equalizing the social conditions under which men live. However, as it operates in some parts of our country, education accentuates class difference, creates and perpetuates disparities in the conditions of men, and thus imperils the very foundations of the American way of life.

Federal financial assistance to education in the States is absolutely necessary if educational opportunity is to be provided throughout the Nation. This fact has been clearly established by a series of fiscal investigations. That such aid can be extended by methods which do not invalidate State and local control of education has also been demonstrated.

The requirements accompanying Federal grants to the States should be limited to minimum items, such as post-audit and the publication of reports to assure the use of these funds for the purposes for which they are granted.

By the Federal leadership function is meant all activities such as research and investigation, conferences, the encouragement of interstate communication, and cooperation, the preparation of reports and recommendations for educational development, and all other similar methods which lead to educational progress on the basis of understanding and consent, as opposed to coercion and compulsion.

3. The Federal Government should limit such direct control and administration of education as it exercises to certain special enterprises.

This proposition recognizes that there are certain educational undertakings which the Federal Government should directly control and administer, such as the academies at West Point and Annapolis. The number and scope of Federal educational enterprises and functions, however, should be kept within restricted limits. There is justification for the direct administration of an educational activity by a Federal agency when this activity is an integral part of some recognized function of the Federal Government and does not duplicate activities nor involve the administration of education in the States.

4. The Federal Government in its relation to education should recognize that this is a service of primary importance, which makes its greatest contribution to the general welfare as a well organized, integrated enterprise designed to develop well-balanced citizens for democracy, rather than as a means of advancing unrelated aims or special interests.

This proposition holds that education is a matter of primary concern; that youth can be best prepared for democratic citizenship when their activities are guided by the mature experience of qualified teachers; that the curriculum should not be a patchwork of poorly related activities dictated by passing enthusiasms, ephemeral needs, and pressure groups; that the educational systems must be well organized, both as to their general control and administrative direction, eliminating competition between Federal and State governments.

5. The decentralized pattern of public educational organization developed in the United States during a period of more than a century and a half, involving basic control and administration of education by the States and localities, is sound policy and should be continued.

The inherent merits of decentralized control derive from the necessity of keeping education attuned to the evolving demands of a dynamic industrial nation; from the desire to permit educational diversity; from the wish to keep education close to the people; and from the fear that, if education became centralized in the Federal Government, it might more readily be captured for political or other improper purposes. Educational progress in this country is due in substantial degree to the experimentation and adaptation which go on continuously in the State and local school systems.

THE DISTRIBUTION OF FEDERAL FUNDS FOR EDUCATION

The mistake is often made of assuming that financial aid for education is synonymous with control of its program and administration. This is not the case. The presence or absence of control, as a by-product of financing, depends upon the terms of the legislation. Federal funds for education should be allocated to the States in terms of the following six policies:

1. General grants are preferable to special grants: A grant of so many dollars per pupil in attendance, available for the financing of all phases of education, or a grant to aid States in establishing an acceptable minimum of financial support in all districts, is a general grant. A specific grant is one specified for use in developing a particular school subject or type of service at some particular educational level or for a limited age group of children or youths. General grants permit the development of balanced educational programs with the needs of children and of society as a whole in mind. Special grants tend to direct attention unduly to particular phases of education.

2. The proportion of a Federal grant for education going to each State should be determined on the basis of objective factors: Objective factors would be, for example, the number of children attending school, or the number of youth of a certain age in the school district, or the fiscal capacity of the district. An objective basis of allocation is one that two competent persons can use independently and get the same result as to the amount due each State.

3. The granting of Federal funds for special educational purposes, accompanied with the requirement that similar sums be appropriated from State or local revenues, is undesirable. The two most serious objections to such matching requirements are: (a) the richest States or localities tend to receive the largest amounts of Federal money since they can most readily match Federal appropriations, and (b) subsidies so granted result in unbalanced educational programs.

4. State plans for the use of Federal educational funds should be prepared prior to their distribution and these plans should be worked out jointly between the agents of the States and the Federal Government. The role of Federal officials in this process should be limited to advisory functions.

5. Each Federal act to aid the financing of education should provide that the State legislature must formally accept the provisions of the act and designate the State office to administer it.

6. Federal funds granted to a State should be available for use in schools which the State itself recognizes as eligible to be supported from public funds.

FEDERAL LEADERSHIP IN EDUCATION

The National Government will be unable to organize properly its relations to education until it establishes an adequate Federal educational office. The present inadequacy of the United States Office of Education results neither from lack of competence nor from lack of effort on the part of its leadership and staff. Rather, it stems from its lack of status and financial support, and from the willingness of Congress to authorize or permit noneducational Federal agencies to develop their own elaborate, and often expensive and overlapping agencies for dealing with education in the States, and even for the direct control and administration of major educational functions.

An essential step in correcting this situation would be the establishment of an adequate Federal educational agency as an independent office of the Federal Government. This agency must not be a subordinate bureau of some powerful department or independent agency of Government. It must have sufficient rank to deal directly with

Congress and the President so that the voice of education will be heard in Washington.

Until such time as Congress takes fundamental action to establish an appropriate Federal educational office, the existing Office of Education should be granted more adequate funds. The President in his latest budget message recommended more funds for a far-reaching improvement of the Office of Education. Such funds are necessary if the Office is to undertake the services which should be provided by such an agency. These funds would be a small fraction of the appropriations now made annually by Congress for a variety of educational activities.

The functions of the reorganized Federal educational office should not be mainly administrative, so far as the conduct of education in the States is concerned. Some of the principal duties of the new office would be: To serve as the agency of the Federal Government for dealing with education in the States; to administer all Federal educational undertakings except those which, for peculiar and valid reasons, are exercised by some other department of the Federal Government; to serve as an agency through which the Federal Government transmits funds appropriated for education in States; to conduct over-all national investigations and researches; to organize temporary demonstrations of promising new educational undertakings; to collect and disseminate useful information concerning education.

Our democratic technical society requires an abundance of good education. In the long run, the best way to provide that education is under a decentralized pattern of educational organization which keeps the schools close to the people and responsive to their needs and wishes.

Peacetime Military Training

EXTENSION OF REMARKS

OF

HON. ARTHUR CAPPER

OF KANSAS

IN THE SENATE OF THE UNITED STATES

Thursday, May 3 (legislative day of Monday, April 16), 1945

Mr. CAPPER. Mr. President, I send to the desk and ask unanimous consent to have printed in the Appendix of the RECORD an excerpt from an article by Lt. Col. Roscoe S. Conkling, entitled "The Case Against Compulsory Peacetime Military Training."

Colonel Conkling is eminently qualified to write on this subject. In World War No. 1 he was the organizer and first director of the draft in New York City. In that war he also served as a lieutenant colonel in the Judge Advocate General's Department, and was one of General Crowder's executive officers at national draft headquarters. He is a former deputy attorney general of the State of New York. He was recommissioned major and later lieutenant colonel, in July 1942, to become a member of the Presidential Appeal Board. He served in that capacity at the National Selective Service headquarters in Washington, D. C., until January 25, 1945, when he returned to inactive status at his own request.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

WHY THE REGULAR ARMY AND NAVY URGES IT

The proponents of peacetime compulsory military training among high officers of the Regular Army and Navy are unquestionably well-meaning and loyal Americans. But the human trait of self-interest permeating their advocacy of the project cannot be gainsaid; consequently the value of their advice is decreased, its importance diluted. The greater the number of soldiers and sailors, the greater the number of officers; and with the increase in officer personnel the higher soars the rank of the regular officer with its increased pay and importance. With the expansion of our Army to 10,000,000, or thereabout, regular captains and lieutenants have been promoted to brigadier generals; majors, lieutenant colonels, and colonels to major generals, lieutenant generals, and generals. Reduce that army to 1,000,000 or less and, with exceptions here and there, generals again become colonels, lieutenant colonels, and majors. Their pay is decreased, their authority contracted, and their social positions receive a jolting set-back. Is it any wonder that with the ending of hostilities and the demobilization of our armed forces to relatively small peacetime limitations these presently high-ranging regular officers should avidly grasp at any plan which would continue their high pay and place, or at least demote them as slightly as possible? The reduction of base pay, together with longevity accumulations and incidentals, aggregating six, eight, ten, twelve, or more thousand dollars annually, to base pay of $333 a month for a colonel, $300 for a lieutenant colonel, $250 for a major, and correspondingly reduced "incidentals," cannot be thrust out of mind, however conscientious the effort. The demotion of naval officers likewise takes place, although perhaps not quite so severely, with the reduction of the naval arm from war to peacetime strength. Consequently, the urging of the Regular Establishments of the Army and Navy for compulsory peacetime military training should be viewed in the light of their officers' self-interest when the country is weighing this tremendous project so novel to America. It would, indeed, be wise if Regular Army and Navy officers refrained entirely or were prohibited from joining in any way in the promotion of this general proposition, except upon request of Congress. Certainly all efforts in which they are now directly and indirectly indulging to effect legislation favoring it should cease at once. They cannot possibly forget their self-interest, for subconscious of it they must be, however sincere their desire for the Nation's welfare.

TEN MILLION SOLDIERS' AND SAILORS' LIPS ARE SEALED

Recently revised Army Regulations provide that "except as authorized by the War Department, efforts by any person in the active service of the United States * * * to procure or oppose or in any manner influence legislation affecting the Army * * * are forbidden."

In other words, if the Army, which today is in truth the War Department, will permit it, a commissioned or noncommissioned officer or a private may speak out publicly in opposition to peacetime compulsory military training. If it will not authorize free discussion, the lips of every man and woman of the 10,000,000 or more comprising the United States armed forces are sealed. Yet the Secretaries of War and Navy and their assistants, members of the General Staff, and other high ranking officers are free to promote and propagandize at will, often at Government expense, for the enactment of this proposed law. And it is a peacetime not wartime measure affecting, after their demobilization, perhaps disastrously for many years to come, the lives and living as well as the purses of our citizen soldiery now held incommunicado, their children, and kin; while most of those, themselves so vocal but enforcing the silence of their opposition, will be the enriched beneficiaries of the legislation they so desperately sponsor. There can be little doubt as to the War Department's attitude if authorization to oppose is sought by any serviceman. As a matter of fact this writer, through channels, sought of his commanding general, in writing, not approval or indorsement of his opposition to compulsory military training, but merely his superior's formal expression that he had no objection to such being publicly set forth. It is known that his application was received and discussed with other staff officers, but it was not forwarded to the War Department for its authorization and probably found its way into the wastebasket—for nothing has been heard of it since.

If American doctrine and tradition are not to be completely destroyed, we should continue to keep the military out of the lawmaking which orders our peacetime living.[1] Such has been our way since the founding of the Republic and such has been demonstrated to be the way to keep the United States of America the leading, most beloved nation on earth; and this notwithstanding when forced into war, but only then, it becomes the most feared. When called upon, its hosts of civilian soldiery sweep their enemies before them, establish peace, and at once return to their peacetime pursuits, despising war and warmaking.

WHY RESERVE AND SPECIALIST OFFICERS APPROVE IT

At first signs of gathering war clouds over America the War and Navy Departments began their hurried enlargement of administrative personnel, and thousands of civilians have been commissioned. These officers have been so rapidly promoted, often almost automatically every 6 months, that throughout all the service commands and especially within the military district of Washington, we now have a mighty host of generals, colonels, lieutenant colonels, and majors; naval captains, commanders, lieutenant commanders, and lieutenants. Many never see front-line or even field-training service at home, although some spend a few weeks taking an indoctrination course which is usually more or less a useless procedure, for upon its completion they promptly return to their desks in the Navy Department and in such sections of the Army as the Quartermaster's, Finance, Adjutant General's, Air Force, Provost Marshal General's, Judge Advocate General's, Selective Service (National and State), etc. They make up the greater part of the officers seen in uniform-weary centers such as our large cities and especially in Washington itself. And, incidentally, observing the unusually large number of newly made administrative Army and Navy officers appearing on the streets of the Nation's Capital, and elsewhere, one wonders why so many of this multitude holding commissioned rank and performing office duties are and have been from the beginning of their service well within the younger brackets of the draft ages. Certainly a great majority, when first commissioned, were and probably are now between the ages of 21 and 31, or 35 at most, while not so fortunate men between 35 and 45 with dependent families and settled and

[1] President Wilson on July 8, 1918, at the beginning of the great American offensive of World War No. 1 at Belleau Wood and Chateau Thierry, sharply reminded the American people: "A very fundamental principle of our institutions is that the military power is subordinate to the civil"; that the armed forces of the country must be instruments of the civilian authority which determines the Nation's policies and that this was the idea of the framers of the Constitution he sought to perpetuate.

important home-community interests have been inducted into the armed services in droves.

Great numbers of these young men hold ordinary office jobs, mostly of a clerical nature, and have been recruited from every vocation and from every section of the country: real estate agents and insurance men, salesmen and customer's men from stock and bond houses, bank clerks, haberdashery, textile, footwear and other salesmen, lawyers and government clerks. Numerous indeed are young Federal employees from the various Government departments who were on the ground when draft agitation began in Congress and knew the ropes as to the securing of commissions, or how to locate and get the desirable assignments for the duration if they had already, since the last war, been endowed with the status of reserve officers.

For these Army and Navy officers, the armed services are indeed glamorous and lucrative. It is probably true that the majority of them receive a far greater net income than their civilian jobs ever afforded in fact or in contemplation. Coupled with this is the exhilaration of receiving a military salute from every private, non-commissioned and lower-ranking officer of all arms of the services they happen to pass on the highway, constantly reminding them and confirming their satisfaction at knowing they are labeled and recognized as superior by so many of their fellow men. Of course they live in comfort; far from the dreaded battlefields. That is militarism; one side of it; the easy side. And it is among this grouping of our unarmed forces that the prospect of universal military service is so attractive and so worth insisting upon for the good of the Nation, and, incidentally, for the possibility that they themselves will be retained in a new military structure and avoid going back home, minus the striking and labeling uniform, to work at the prosaic old job where superiority must be demonstrated by merit and in free fields open to all competitors.

The desk officers of the Army and Navy, regular, specialist, and reserve, know full well compulsory universal military training will necessitate a huge personnel of high rank to maintain a peacetime Army and Navy of a million or more boys, added to the enlarged Army and Navy we shall undoubtedly maintain for many years after this war. And therein lies their chance of retention in their present high pay and place jobs or, at worst, possibly a mild demotion.

ARMY AND NAVY PROPONENTS TAKING ADVANTAGE OF WAR FERVOR

Probably the unfairest aspect of the effort to force compulsory military training upon us is the strategy of its proponents—somehow to get legislation for it quickly passed while we are in the midst of war enthusiasm—or hysteria; when everyone is working hard for victory and countless numbers are worrying about their loved ones or suffering from the bereavements of war. They know that at the conclusion of hostilities the millions of actual fighting men won't want to listen to agitation for more soldiering. Their first thought will be to forget their harrowing experiences and be freemen again, not uniformed robots to be told where and when and what, 24 hours a day. That questionably will be the attitude of those who come back to us whole in body and sound of mind. Of the others—"Well, always thinking or talking about it will do no good. That was yesterday, last month, last year. Thank God it's over." Those of us who experienced the aftermath of World War No. 1 are entirely familiar with that point of view of returning fighting men. War stories will be rejected without demur by book and periodical publishers. Motion pictures with war plots or even short war scenes will become taboo. Consequently, after the hysteria of actual warfare has subsided compulsory peacetime military training legislation can receive Nation-wide and thoughtful consideration by our civilian population with both sides of the proposition fully developed. Informed and free opponents of it will be available who can testify from knowledge and experience as to the horrors and uselessness of peacetime and fanatical youth militarization among our enemies, from which we may judge its inevitable results if forced upon the boyhood of the United States. At least we shall not be rushed pell-mell into this monstrous de-Americanizing project by the one-sided, opposition-crushing, and self-interested campaigning of a comparatively few high rankers of the Army and Navy, aided by well-financed civilian groups such as those who profit fabulously by the sale of military products; uniforms and other prescribed wearing apparel, quartermaster's supplies, constantly obsolescing air, sea, and ground vehicles, armaments, etc.; and aided also by that hidden and ruthless alien movement—call it what you will—the leadership of which has not yet been identified, but which is spreading its tentacles throughout the land and seeks to strangle our tried and revered American ways and manner of free, peaceful, and prosperous living.

America fights, how well our enemies twice within a quarter of a century and to their sorrow have learned, when it has to, or is dragged into war. But it is not a warrior nation and certainly, in its normal life, frowns dourly upon grandiose militaristic activity. Yet its doctrines and traditions have proved the most successful of all the nations of history.

THE SELF-INTERESTED PROPAGANDA AGENCIES EARLY AT WORK

It would be interesting to know how many heads or groups in various sections of the War and Navy Departments, with or without the sanction or encouragement of the Secretaries or their assistants, with or without the support of certain members of the General Staff or, indeed, with or without the nod of the President, himself, have long been busily engaged in developing plans and propaganda for the introduction of legislation now; for a law requiring a year or more of compulsory military training of American boys between 18, 19, and 20 years old, to be begun as demobilization of our returning fighting forces gets under way.

Publicity was not only discouraged but darkly frowned upon within one Washington military department while several nonfighting colonels, naval captains and commanders who, although charged with urgent duties pertaining to the daily progress of this war, spent most of their time during a recent period conferring, discussing, and drafting legislation for compulsory military training. And by no process of reasoning could this activity be regarded as within their jurisdiction or line of duty. The project actually had been under consideration since May 1943; perhaps even before then. These Regular, Specialist, and Reserve Army and Navy officers worked diligently during July and August of 1944 in order to have something definite and in print to submit to one of the Army's most publicized nonfighting major generals upon his return from a tour of the country during which he sponsored, cautiously, in public speeches the compulsory military training idea. Whether this was by direction of his superiors or on his own initiative is not known. But, previous to his departure, he had quietly charged this selected few of his staff with the preparation of a bill to be made ready for quick presentation to Congress. Incidentally, this "law-making" body undoubtedly entertained no other idea in their completed proposals than that this major general should be named the Director of Universal Military Training. And the most enthusiastic of his legally unauthorized bill-drafting coterie were no doubt convinced that they would continue with him indefinitely in supervising the compulsory military training of our youngsters long after World War No. 2's armies had been disbanded and their components were back at their jobs making a living—and figuring out how to pay the taxes staring at them from the future, in addition to paying a tremendous price for the militarizing of their teen-aged sons. The estimate of annual cost for the training of these youngsters arrived at by the major general's "planners" was from one to one and one-half billion dollars per million trainees; about $1,000 to $1,500 "a head."

Who directs this attempted transportation of old world peacetime military servitude to free America; this revival and modernization of medievalism? It undoubtedly does not spring from the minds and hearts of even a substantial number of our national legislators. While at least two bills pertaining to it were introduced in the Seventy-eighth Congress, they were permitted to slumber undisturbed for months. The subject was "too hot at the moment" is reported to have been observed by some Congressmen before the November elections. Shortly after the election recess a special committee of the House was appointed and announced it would begin hearings on compulsory military training within a few days. A flood of church, labor, and other opposition appeared. The militarists' demand for haste was somewhat offset temporarily and the House committee chairman, the day after Thanksgiving, decided that the committee would be unable to complete hearings in 1944; that the measure would have to go over for consideration by the new Congress convening in January 1945. Representative WADSWORTH and a few others, when not urging complete regimentation of all Americans via national service legislation, discourse in patriotic banalities on the "mental, physical, and civic" value of the militarization of our youth. But the legislators of the outgoing Congress generally appeared to be occupied with more important items having to do with the welfare of the Nation at war, not peacetime militarization of its boyhood.

A poll by Fortune magazine last July purported to indicate public favor for peacetime drafting of boys as they become 18 years of age. Who inspired this poll at that time or how much thoughtful opinion is involved is, of course, problematical. Concurrently with the issue of Fortune the Director of Selective Service, before the Commerce and Industry Association in New York City, adroitly turning to the importance of "conditioning and training youth for the future national defense" following a discussion of the rejection of registrants in draft operations in this and World War No. 1, remarked that so long as "Selective Service has custody of the greatest inventory of manpower America has ever made" it must collaborate in every possible way to insure that "by training and rehabilitation more men can assume the entire burden of citizenship." A dainty morsel tossed out to test its palatability.

A few weeks later Colonel McDermott, director of selective service for New York City, appeared before the microphone and urged adoption of military peacetime training in a public radio debate. A prominent minister of one of the city's churches opposed him. This draft official's stereotyped theme was "national security, national health and welfare" and inculcation of the democratic spirit by "its powerful influence in breaking down and eliminating racial, religious, and class barriers and prejudices." His exhortations followed the usual pattern which seems to have been designed especially for the proponents of youth training in their stealthy

but ever bolder advocacy of militarizing the Nation. Then, in a heroic effort to tell us why we should at once undertake this form of un-Americanism, he delivered himself of this novel and profound thought: "History and the frailties of human nature have taught us that war may come again."

Following this broadcast debate by the director of selective service for New York City, the New York Herald Tribune published a Washington correspondent's story telling us that "selective-service officials, planning for any post-war compulsory military training system which might result from pending legislation, were disclosed to favor administration of such a program by a joint Army-Navy board * * * and if Congress does choose to give control of universal service to such a board, Maj. Gen. Lewis B. Hershey, the draft Director, and some of his present staff 'might' want to stay on, selective-service officials said."

The gently persuasive emanations of high-ranking selective-service officers, however, made no noticeable impression upon the country at large; bolder urging became necessary. On September 26 the Director of Selective Service abandoned his dulcet and generalized approvals of the measure and boldly told the Buffalo Chamber of Commerce he was "heartily in favor of peacetime military training," and dangling the scarecrow "defense" before his audience, warned:

"Today's warfare has changed in a manner that the risk of unpreparedness is tantamount to courting disaster. Our national growth requires manpower and armament in adequate numbers and quality to protect it from sudden aggression. * * * Relief from this training should be permitted only in cases where extreme physical or mental conditions exists."

In other words every American boy who can walk without crutches or is not a congenital imbecile, must leave his job or school and go to military training camp for a year or more when he becomes 18 or 19 years old; irrespective of whether he is the sole or partial support and comfort of a widowed mother or a physically or mentally incapacitated father, or necessary to aid in feeding and clothing younger brothers and sisters and thus help keep intact an American family unit; irrespective of whether he is needed on the typically American little farm which produces our food and which his father and mother have worked drudging years to develop; irrespective of breaking into the required hours of apprenticeship he's been building to become a journeyman machinist, plumber, carpenter, tinsmith, or other tradesman; irrespective of interfering with his preparation for law, medicine, engineering, dentistry—and this not in war but in peacetime. Thus the Director of Selective Service put officially and squarely before his Buffalo listeners the idealistic proposals of the militarist minded of America who are urging to the utmost Universal Compulsory Military Training—for the good of America? or in their own personal interest!

Equal Rights for Women

EXTENSION OF REMARKS

OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. REED of New York. Mr. Speaker, I have just received a resolution introduced by Senator Brees, which has been passed by the Legislature of the State of New York. Under leave to extend my remarks, I hereby include the resolution, as follows:

STATE OF NEW YORK, IN ASSEMBLY,
Albany, March 24, 1945.

Whereas the women of America have shared equally with men in the hardships and sacrifices incident to the building of this Nation; and

Whereas they have shared equally in the pain and distress which have been involved in the maintenance of the American Republic and the ideals of free government against the aggression of tyrants and have participated, and are today participating, in the battles precipitated by the enemies of freedom; and

Whereas this Nation was "conceived in liberty and dedicated to the proposition that all men are created equal," and such declaration has no actual or implied limitations on equality before the law by reason of sex; and

Whereas the rights of women before the law are much abridged in many States, and this legal discrimination on the basis of sex constitutes an intolerable burden upon thousands of women who are solely dependent upon their own efforts for their livelihood and is a source of irritation and annoyance to many thousands of others who recognize in this discrimination a flat contradiction of the American principle of equality, wholly out of accord with the status of American women which they have reached by their achievements in other fields of human endeavor: Now, therefore, be it

Resolved (if the senate concur), That the Congress of the United States be, and it hereby is, respectfully memorialized to adopt and submit to the several States the equal-rights amendment to the Constitution of the United States, which amendment is now pending before the Congress; and be it further

Resolved (if the senate concur), That copies of this resolution be transmitted to the President of the United States, the Secretary of the United States Senate, the Clerk of the House of Representatives, and to each Member of Congress elected from the State of New York

By order of the assembly:

ANSLEY B. BORKOWSKI,
Clerk.

In senate, March 24, 1945, concurred in without amendment.

By order of the senate:

WILLIAM S. KING,
Clerk.

Labor Problems in the Pacific Northwest

EXTENSION OF REMARKS

OF

HON. HUGH DE LACY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. DE LACY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a statement of the Honorable CHARLES R. SAVAGE before the Senate Special Committee to Study and Survey Problems of Small Business Enterprises on April 10, 1945; a letter dated April 12, 1945, from Mr. I. W. Wilson, vice president of the Aluminum Co. of America, to the Honorable JAMES E. MURRAY, chairman of the aforementioned committee; and the subsequent statement of Congressman SAVAGE to Senator MURRAY, on April 20, 1945:

STATEMENT OF HON. CHARLES R. SAVAGE BEFORE THE SENATE SPECIAL COMMITTEE TO STUDY AND SURVEY PROBLEMS OF SMALL BUSINESS ENTERPRISES ON APRIL 10, 1945

I would like to comment very briefly on certain labor problems in the production of aluminum in the Pacific Northwest. These problems have evidently been handled not very effectively by either the Federal war agencies concerned or by the Aluminum Co. of America. The result has been the false charge of labor shortage given as a reason for curtailment of aluminum production in Oregon and Washington during part of 1944 and for difficulties now in reopening potlines at the Troutdale aluminum plant. The weak handling of the labor situation has been partly responsible for the alleged need to buy more Canadian aluminum under the new Shipshaw contract. There is no sign now that proper measures will be taken to correct the aluminum labor situation in the Northwest. I make these comments in the hope that this committee will lend its efforts toward securing appropriate action.

My conception of the fallacious labor policy of Alcoa is based on my several years' experience on local, State and international committees, negotiating on labor-management problems in the Northwest and from serving on an appeals board for the War Manpower Commission since the freeze of manpower in the timber and nonferrous metals industries. My tracks, in fact, often used to cross those of the eminent gentleman from Oregon, WAYNE L. MORSE, now Senator from that State, though in a much lesser capacity I assure you.

Today, the War Production Board contends that it is difficult to obtain 250 workers to reopen half of the Troutdale, Oreg., aluminum plant. This difficulty of course plays into the hands of those who are more interested in buying metal from the Aluminum Co. of Canada than in using our own economical Northwest aluminum plants. The labor difficulties are very easily explained. They could have been overcome; but there was no real intention among the Federal war agencies concerned to overcome them.

The problem today is no different from that 1 year ago, when exactly the same situation existed at all the Northwest aluminum plants. Today shipyard workers are gradually being released in the Portland area, but they are refusing to go to the aluminum plants. The War Manpower director for Oregon has indicated to some Federal officials that he expects a few tens of thousands of shipyard workers to be released in the Portland area this summer, but there is no reason to believe that the aluminum plants will get the few hundred they need. There are too many other jobs available paying better wages and offering better working conditions. That is the heart of the difficulty. The blame for this situation must fall initially upon the Aluminum Co. of America for its conservative policy in holding back until too late the necessary wage increases and then not granting large enough increases. And the blame must also fall upon the same officials of the Federal war agencies who protest that they want to get the Northwest aluminum plants into full operation but will not lift a finger to request necessary wage action from the War Labor Board.

If the committee will look into this matter, it will find that wage rates in the Northwest shipyards have been more attractive than aluminum-plant wages ever since April 23, 1941—4 years ago—when Henry Kaiser entered an agreement on the Pacific coast with the American Federation of Labor's metal-trades department. At that time common shipyard labor could get 95 cents an hour for day-shift work, 10 percent more for late-afternoon-shift work, and 15 percent more for night shift. But in the aluminum plants during 1942 the basic hourly rate was 75

cents. A man could earn at the shipyards in 48 hours nearly $50 per week but only $39 at the aluminum plants.

This entire situation was looked into by a public committee called the Oregon Industrial Area Labor Supply Committee representing various Federal agencies and private business groups. In July 1942 that committee submitted a report on the troubles of Alcoa in hiring men. Among the explanations for Alcoa's troubles, in the opinion of the committee, were the low wage rates compared with other plants. Also, there was a lack of confidence between management and the workers because of the company policy of requiring that decisions on labor problems be settled in Pittsburgh, 3,000 miles away. Finally, working and social conditions in the aluminum plant were not attractive.

To show this Senate committee the utter lack of understanding by officials concerned over what had to be done, I want to compare Alcoa's failure in securing labor with the success of many other plants in the Portland-Vancouver area. I will cite figures from the War Manpower Commission which I have examined.

In January 1942 the Alcoa plant at Vancouver, Wash., employed 1,000 workers. In July 1943 the plant was operating with a labor shortage and was threatened with partial shut-down. It has lost in one year and a half 156 workers. But, in the same year and a half, 9 shipyards in the Portland-Vancouver area put on 104,000 new workers, and 3 aircraft-part plants put on over 2,000 workers.

In that same year and a half, the Government aluminum plant at Troutdale had delays in opening aluminum potlines which Alcoa blamed on a labor shortage. The plants needed only 100 to 150 men for each pot line, and only a few hundred men altogether. And yet it could not obtain these men during a period when other plants in the same area were putting on 106,000 new workers.

This is one of the most amazing stories of ineptitude and blundering by a private company and Federal war-agency officials. Aluminum was critical in 1942 and 1943; the Troutdale plant was vitally needed; yet there were months of delay in opening portions of the plant, and Alcoa actually slowed down construction of part of the plant because it claimed it could not get workers to operate the pot lines. Of course, it could not get them with its lower wage rates and its unattractive working conditions and its continuous labor troubles with the local unions. But here was a company charged with the highest responsibility of producing aluminum needed for our war plane program, failing to live up to its responsibility because it chose to follow labor policies that were out of line with conditions in the Pacific Northwest.

If the committee will look into this matter, it will find that Alcoa did try certain steps. The company recruited men in the South and the Middle West. It offered to pay transportation of men to the Northwest. It offered rewards of War bonds to its own employees who brought in other workers. It advertised extensively in the newspapers. It went through motions of vigorously seeking labor. But it failed to adopt the only measures that would have held the men it needed—large wage-rate increases and better working arrangements with labor.

In April 1944, 1 year ago, the War Production Board was considering further cut-backs of production in American aluminum plants. In view of the fuel shortage it decided to reduce production at the eastern plants that got their electric energy from coal and to keep in production the plants in the Northwest that use hydroelectric power. But at Troutdale, labor was leaving faster than new men were coming in. The plant was threatened with partial if not entire shut-down. The War Production Board took the official position that it wanted Troutdale to continue to operate if it could obtain the manpower, but the W. P. B. would not lift a finger to change the conditions necessary to get that manpower. Many conferences were held between representatives of the Department of the Interior, Bonneville Power Administration, Congressmen from the Northwest, and officials of the War Manpower Commission and War Production Board. Recommendations were made to certify to the War Labor Board that conditions required wage increases. But the W. P. B. refused to grant that certification, assuring everyone of course, that it really wanted to see Troutdale continue in operation, but that it couldn't ask for wage increases because aluminum was not sufficiently critical. Well, on May 11, 1944, one fourth of Troutdale shut down and for a few months it was nip and tuck to prevent the entire plant from shutting down. Why should labor stay in a plant to produce aluminum that the W. P. B. did not think was sufficiently important. That was the common reaction of the workers. It is shown in the amazing figures of labor turnover for the 10 months from March 1, 1943, to January 1, 1944. In those months, Alcoa complained it could not get labor. Yet in the 5 Northwest aluminum plants, 3 of which Alcoa operated, 5,367 workers were hired but only 1,000 remained. These figures are from the War Manpower Commission. They show conclusively that there never was a labor shortage for the Northwest aluminum plants. Instead, there was an ineffective, fumbling policy by Alcoa and Government officials that prevented the aluminum plants from holding on to the abundant supplies of labor that poured through those plants like a sieve.

Today, the situation is no better. Wage rates are still higher in the shipyards although the difference has been reduced by slow, inadequate increases made by the Aluminum company. Workers all know that it is hot and unpleasant in an aluminum plant compared with the shipyards and the forests of the Northwest. They do not intend to accept the 95 cents an hour starting wage for a pot-room worker when they can get higher wages elsewhere for doing unskilled work, like $1 an hour for warehouse work in the teamster's union.

Today we are buying Canadian aluminum from friends of the Aluminum Co. of America because Alcoa, aided by the indifference or neglect of Federal officials, has failed to adopt labor policies that would get out production in the Northwest plants. This country has relied upon one company for most of its aluminum production and has permitted that company to determine when and how much aluminum we got, and when we should go to Canada to buy aluminum, all because we have permitted that company to run affairs its own way.

I urge this committee to examine this story and to go back and find out the months of delay that occurred in opening aluminum pot lines in other plants operated by Alcoa. Certainly we admit that what Alcoa produced was eventually the aluminum that is winning this war. But this committee will find, I'm sure, that we got less aluminum and more expensive aluminum by relying on Alcoa for determining such vital matters as its own labor policies. We paid for this in the extra costs of Canadian aluminum—nearly 19 cents per pound compared to 12 cents in the Northwest plants. We paid for this in the delays in producing aluminum during 1942. We paid for this in other ways, as the Truman committee has pointed out in citing the delays in launching our aluminum program because Federal officials relied upon Alcoa for advice in 1940 and 1941. And we will pay for this in the shut-down of Northwest plants and maybe even in their abandonment and loss of jobs to workers unless we do something about it.

I think that this committee should lend its full efforts to see that the Government plants are put into new competitive hands so that never again will this country have to rely on one company for a crucial war material like aluminum. Never again should we have another Shipshaw scandal. Meanwhile, I hope this committee will see what can be done to get the Federal agencies and the Aluminum Co. to secure proper wage increases in the Northwest aluminum plants and keep those plants running until new competitors will take them over.

ALUMINUM CO. OF AMERICA,
Washington, D. C., April 12, 1945.

Hon. JAMES E. MURRAY,
Chairman, Special Committee to Study and Survey Problems of Small Business Enterprises,
Senate Office Building,
Washington, D. C.

DEAR SIR: This morning at the hearing before the Special Committee to Study and Survey Problems of Small Business Enterprises, Senator WHERRY referred to a statement filed by Congressman DE LACY at the previous day's hearing on behalf of Congressman SAVAGE. I have examined that statement as it appears in the transcript of the hearing on April 11, 1945, and would respectfully ask that in the interest of placing the facts as to the wage situation in the Northwest before your committee, you permit this letter to become a part of the record as was suggested by Senator WHERRY.

Congressman SAVAGE has apparently been misinformed regarding wages and labor turn-over in the aluminum industry and the number of available workers in the Pacific Northwest. Wage scales in the Pacific Northwest are said to be the highest or among the highest in the United States and Alcoa has met or bettered the prevailing rates for similar work in that community, as in every other community in which it has operations. Nor has Alcoa failed to keep pace with wartime rising wage scales. For example, during the period between early 1941 and the present, the wage rate of potmen, the least skilled of the aluminum plant operating labor, in the Vancouver Alcoa plant has increased 46 percent and other classification rates have increased in like proportion. Of the total percentage increase, 41 percent or by far the greater portion was negotiated during the period when the company was free to make wage increases without War Labor Board approval. The remaining 5 percent of the total was awarded after the stabilization date when wage increases became subject to War Labor Board approval. The most recent application to the War Labor Board made jointly by the company and the union in June 1944, for a further general increase, was denied by the War Labor Board. From 1941 to the present, the average weekly take home pay of all hourly rated workers in the Vancouver plant has more than doubled due to wage increases and longer workweeks. At the present time many base rated potmen are earning more than $100 a week, including overtime earnings.

Labor turnover in the Vancouver Alcoa plant has been exceptionally low in comparison with other war industries in this area. We point with pride to the fact that whereas the Vancouver plant only began operations in 1940, nearly 60 percent of our employees in that plant have been with us more than 2 years and nearly 25 percent more than 4 years. All of the Alcoa plants have given considerable numbers of men to the armed services. In the Northwest region designated by the War Manpower Commission as an area of acute labor shortage, replacements for these men have sometimes been difficult to find and periods of serious manpower shortage have been experienced. However, through the loyalty of our workmen who have worked long hours, our production schedules have always been met.

Our plants are new and modern, with every engineering feature for comfortable working conditions.

Congressman SAVAGE's statement will undoubtedly further complicate the efforts of Alcoa and the War Manpower Commission to recruit men for the aluminum plants in the Northwest, the output of which is so badly needed for the war effort. It certainly will not encorage workmen to seek employment in these plants.

I wish to take this opportunity to express to you and the committee our appreciation for the opportunities which have been given us to supply information to the committee and to assure you of our earnest desire to cooperate in every way with you.

Very truly yours,

ALUMINUM CO. OF AMERICA,
I. W. WILSON, *Vice President.*

STATEMENT OF THE HONORABLE CHARLES R. SAVAGE TO SENATOR JAMES E. MURRAY, CHAIRMAN, SENATE SPECIAL COMMITTEE TO STUDY PROBLEMS OF AMERICAN SMALL BUSINESS, ON APRIL 20, 1945

DEAR SENATOR MURRAY: In reply to your letter of April 16, 1945, I am very pleased to comment on the letter of Mr. I. W. Wilson, of the Aluminum Co. of America dealing with my statement before the Small Business Committee on April 11, 1945.

The essential points raised by Mr. Wilson seem to be:

"1. Wage scales in the Pacific Northwest are said to be the highest or among the highest in the United States and Alcoa has met or bettered the prevailing wage rates rates for similar work in that community. * * *

"2. Labor turn-over at the Vancouver Alcoa plant has been exceptionally low in comparison with other war industries in this area.

"3. In the Northwest region designated by the War Manpower Commission as an area of acute labor shortage, replacements for these men have sometimes been difficult to find and periods of serious manpower shortage have been experienced. However, through the loyalty of our workmen, who have worked long hours, our production schedules have always been met."

My statement before your committee was to the effect that with respect to reopening half of the Troutdale plant, owned by the Government and leased by Alcoa:

1. It is doubtful that the needed workers can be obtained because "there are too many other jobs available paying better wages and offering better working conditions. That is the heart of the difficulty. The blame for this situation must fall initially upon the Aluminum Co. of America for its conservative policy of holding back until too late the necessary wage increases and then not granting large enough increases. And the blame must fall upon the same officials of the Federal war agencies who protest that they want to get the Northwest aluminum plants into full operation but will not lift a finger to request necessary wage action from the War Labor Board.

"If the committee will look into this matter, it will find that wage rates in the Northwest shipyards have been more attractive than aluminum plant wages ever since April 23, 1941. * * *"

2. During a year and a half, 1942–43, the Alcoa plant at Vancouver lost 156 workers and the Alcoa managed plant at Troutdale had delays in opening pot lines which Alcoa blamed on a labor shortage while 9 shipyards and 3 aircraft-part plants in the Portland-Vancouver area put on over 106,000 net workers. Alcoa could not get the few hundred workers it needed because of "its lower wage rates and its unattractive working conditions and its continuous labor troubles with the local unions."

3. In April 1944 at the Troutdale plant labor was leaving faster than it came in. Figures on labor turn-over in the Northwest aluminum plants during 1943, show there were ample workers placed in the plants but most of them left. Consequently, there never was a true labor shortage. Labor poured through the aluminum plants like a sieve, going to other more attractive and better paid employment.

4. Alcoa's wage policy coupled with ineffective action by interested Federal agencies was responsible for failure to produce as much aluminum as was possible in the Northwest and naturally contributed to the need for the United States to buy Canadian aluminum.

Mr. Wilson's reply in no way answers these contentions. To his first point, I have no difference at all. It is true that wage scales in the Northwest are among the highest in the country and it is also true that Alcoa has met or bettered the prevailing rates for similar work in that community. That is Mr. Wilson's contention. It simply has no bearing on the problem. The difficulty was that the shipyards and aircraft plants offered higher wage rates and more attractive working conditions than the Alcoa aluminum plants and therefore labor was difficult for Alcoa to hold. It is beside the point to argue that Alcoa paid wage rates equal or better to those for similar work. The work with which Alcoa competed for jobs was a different kind of work for which unskilled workers could qualify just as well as in an aluminum plant. Alcoa failed to compete for the supply of workers in the Portland area as is shown by the delays in opening Troutdale pot lines and by the forced shutdown of one line in May 1944. Alcoa should have set its wage rates with respect to the shipyard rates if it truly wanted to meet production schedules at Troutdale. It did not do so.

On June 3, 1942, Mr. C. S. Thayer, general manager of the Alcoa Vancouver plant, appeared before the Oregon Industrial Area Committee and the minutes of that meeting include the following: "Mr. Thayer stated that the existing problem of Alcoa is to keep their plant running; their difficulty is keeping their men on the job. They have had a turn-over of 500 men in the 900 normally employed at the plant within the last 3 months. Alcoa is unable to pay their employees comparable wages offered in the shipyards and the company is unable to raise wages until officials of the company, now in Washington, D. C., advise of the decisions made in the conferences being held there with the War Labor Board. Until that time the Vancouver plant is unable to offer their men any prospect of salary increase attractive enough to prevent their men from leaving."

This statement supports my contention. Mr. Wilson stresses the fact that Alcoa did raise wages considerably before it had to have War Labor Board approval. The record shows that when it had freedom of action, it did not raise wages sufficiently. If it had, Mr. Thayer would not have gone before the Oregon Industrial Area Committee.

In his second point, Mr. Wilson states that turn-over at the Vancouver plant has been exceptionally low in comparison with other war industries in the area. I have examined turn-over statistics from the Department of Labor which show for the country as a whole that in the aluminum-production plants, turn-over rates were higher than in aircraft and shipyard plants. War Manpower Commission figures show that at Vancouver, Wash., Alcoa's turn-over rate was relatively low. From March 1, 1943 to January 1, 1944, the average turn-over was 5 workers for every 100 employed. But at Troutdale, which Alcoa operates, and about which Mr. Wilson made no statement, the turn-over rate for the same period was 15 workers for every 100 employed. And the War Manpower Commission figures show that turn-over in the Government plants operated by Alcoa averaged 3½ times greater than in the plants owned by the company. This is not unusual when we consider that workers looked at Alcoa's own plants as offering permanent employment. But that problem should have spurred Alcoa, as trustee for the Government charged with high responsibility, to take adequate measures to secure and hold labor in the Government plants. It did not do so. It never opened one-third of the reduction plant at Riverbank, Calif., and two-fifths of the plant at Los Angeles, Calif., because of difficulties in obtaining and holding men. Alcoa failed to produce all the aluminum it was scheduled to produce. That is an unassailable fact.

Mr. Wilson, in his third point, argues that Alcoa's production schedules have always been met. In reply I cite this record:

a. At Los Angeles, pot lines 4 and 5 were originally scheduled for operation in October and December, 1942, respectively. They were completed after delays and never put in operation. These pot lines would have produced 3,000,000 pounds per month. From December 1942 to April 1945, Alcoa failed to produce at these lines 96,000,000 pounds of metal.

b. At Riverbank, Calif., pot line 3 was originally scheduled for operation in April 1943. It was completed after delays and never put into operation. From April 1943 until April 1945, Alcoa failed to produce at this line 72,000,000 pounds of metal.

c. At Troutdale, Oreg., the record shows the following delays for each pot line:

	Scheduled date for service	Date operation began	Months lost
No. 1	Apr. 1, 1942	May 15, 1942	1½
No. 2	June 19, 1942	Oct. 15, 1942	4
No. 3	July 19, 1942	Aug. 10, 1943	12
No. 4	Feb. 1, 1944	Sept. 5, 1943	7

During the lost time of 24½ months, Alcoa failed to produce 73,000,000 pounds of metal.

On May 11, 1944, one Troutdale pot line was shut down because Alcoa could not hold the labor. From May 11, 1944, to April 11, 1945, Alcoa failed to produce at this line 33,000,000 pounds of metal.

d. All of the foregoing failures to produce metal add up to 274,000,000 pounds of metal. These failures may be fairly attributed to Alcoa's labor policies and the ineffective measures adopted by the Federal war agencies concerned. And these failures exceed the 250,000,000 pounds of aluminum which the Metals Reserve Company contracted in March 1945, to buy from the Canadian Aluminum Co.

The committee will be interested to learn, I am sure, that currently the Troutdale plant, operated by Alcoa, and the labor union of that plant, are requesting a wage increase from the War Labor Board amounting to about 7 cents an hour on the basic wage. This proposed action was being discussed during the week April 16–22. I think it speaks eloquently for itself in reply to any claim that wage rates at Troutdale have been sufficient to hold labor in the past.

In concluding, I think it only fair to make one observation. In the Northwest, Alcoa found itself up against a very high wage level established in the shipyards. This level was out of line with prewar wage rates and may have seemed to Alcoa as out of line for the postwar period. Alcoa operates plants throughout the country, and may have been concerned with the effects, on its other plants, of establishing very high wages in the Northwest. But Alcoa did find a similar problem when it came to buying electric

power. In the eastern plants it operated for the Government, it had to pay electric rates that were normally uneconomic. But it paid those high rates in order to produce aluminum.

It even arranged with the Defense Plant Corporation to obtain a refund from the D. P. C. for power costing more than 3 mills per kilowatt-hour in all the Government plants. If it made that kind of arrangement with D. P. C., why did it not try to make a similar arrangement if it felt that it should not be asked to permanently pay very high wage rates in the Northwest. Why should Alcoa have distinguished between rates for electricity and rates for human labor? In either case, it should have been prepared to pay the rates necessary to get out the aluminum. The record shows that it did not.

I therefore repeat my observation that while Alcoa is largely responsible for the metal we are using to win this war, Alcoa's policies have not always been in the national interest. It is too dangerous to rely upon one company for so vital a war material. Government policy should correct this situation now that we have the opportunity through the disposal of the Government-owned plants.

In support of my statements I am attaching two pieces of evidence. The first is a press release issued by Mr. P. R. Schermerhowe, president of Local 338, United Steel Workers of America; the second, a letter written by Mr. Howard E. Endicott, of Vancouver, Wash., a former employee at the Alcoa Vancouver plant.

Sincerely yours,

CHARLES R. SAVAGE.

Liquor Imports and Trade Treaties

EXTENSION OF REMARKS

OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. REED of New York. Mr. Chairman, there are millions of persons in this country who feel that there is something virtuous, highly moral, and spiritually satisfying in the so-called reciprocal trade-agreements program. It has been heralded as a political Sermon on the Mount.

The pious platitudes in support of the trade-treaty program, printed at Government expense and widely distributed throughout the Nation to women's clubs, are noteworthy for what is suppressed rather than for what the documents contain. Not one word appears in all this propaganda, sent out to the good Christian men and women who are opposed to flooding this country with hard liquor from abroad, with reference to the reduction in tariffs on liquor.

The Congress, representing the sentiment of the temperate citizens, has from time to time placed a high duty on whisky, rum, gin, brandy, cordials, bitters, champagne, and other liquors. These high rates of duty on liquors, enacted by Congress, kept the flow of foreign whisky, gin, and other liquors from flooding the United States.

The petitions from the people protesting against the evil, especially against permitting the liquor traffic in and around our military camps, have been presented to the Congress by the thousands.

Instead of respecting public opinion on this question, as Congress had done by enacting high rates of duty to keep foreign liquor out of this country, the administration ignored public opinion and secretly entered into trade treaties with foreign countries reducing the duty on liquors, as follows:

Articles	Rate changed	Modified rate
	Per proof gallon	*Per proof gallon*
Whisky of all types	$5	$2.50
Rum:		
Cuban	4	2.50
Other than Cuban	5	2.50
Gin	5	2.50
Brandy	5	2.50
Cordials, etc	5	2.50
Bitters containing spirits	5	2.50
	Per gallon	*Per gallon*
Champagne	$6	$3.00

This lowered the floodgates for liquors, and even with the shortage of ships to fight the war, there seems to be space in some of them to import booze.

The average annual importation of liquors during the period 1931 to 1935 was 8,590,000 gallons. This was before the Trade Treaty Act. Under the Trade Treaty Act, the average yearly importation has amounted to 17,907,000 gallons. For the period from 1936 to 1939, inclusive, under the New Deal trade-treaty program, a total of 89,537,000 gallons of liquor were imported.

Was this lowering of duties on whisky, gin, and other liquors done in the open? Not at all. Did any one of the millions of persons, urging Congress to suppress the traffic in and around military camps rather than increase it, have an opportunity to be heard? They did not. Did foreigners sit in on this secret conclave when the revenue was being bartered away and the liquor barrier was being lowered? Yes, the representatives from 26 foreign countries sat in this liquor huddle, but millions of American citizens and their elected representatives were denied a voice in the formulation or consummation of these trade treaties. I say that such a procedure is un-American; it invites the practice of deception, intrigue, and fraud.

What I have said with reference to the star-chamber methods of procedure in reference to liquor applies to the vital interests of agriculture, industry, and labor.

The Cotton South and the Bretton Woods Agreement

EXTENSION OF REMARKS

OF

HON. ORVILLE ZIMMERMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. ZIMMERMAN. Mr. Speaker, the cotton South is deeply interested in the action which Congress will take on the Bretton Woods agreement as outlined in H. R. 2211. The future of our Cotton Belt is closely interwoven with what we do to carry into effect the proposed Bretton Woods agreement, which will also be considered at the San Francisco Conference. A resolution adopted by the board of directors of the Memphis Cotton Exchange was set out in a letter from the secretary of that organization to me, which, under leave granted, I am filing herewith as part of my remarks:

MEMPHIS COTTON EXCHANGE,
MEMPHIS, TENN., *April 23, 1945.*

Hon. ORVILLE ZIMMERMAN,
House Office Building,
Washington, D. C.

DEAR MR. ZIMMERMAN: At the last regular meeting of the board of directors of the Memphis Cotton Exchange the subject of the Bretton Woods Agreement Act, as outlined in H. R. 2211, was discussed at length, after which the following statement, outlining the position of the Memphis spot cotton trade, was unanimous adopted:

"We, the officers and directors of the Memphis Cotton Exchange, recognizing that the early passage by Congress of H. R. 2211 is of vital importance to the essential expansion of world trade, and to the accomplishment of lasting peace—do unanimously approve the Bretton Woods proposals and call upon our Senators and Congressmen to lend their most vigorous support to their adoption.

"Ours is the largest spot cotton market in the world. As cotton is the major export commodity of the United States, we believe that experience qualifies us to say that if the Bretton Woods proposals are not speedily accepted by our Government all plans and aspirations for creating a stable, lasting peace will be frustrated.

"Experience and reason both prove that no body politic can long remain healthy and vigorous without the fundamental support of adequate, free-flowing trade, which in turn depends upon a sound and reliable monetary system."

We consider this bill of major importance and your valued assistance and most vigorous support toward its adoption is respectfully urged.

Yours very truly,

A. H. BOWERS,
Executive Vice President and Secretary.

Ray McLain Draws Praise From Newsman

EXTENSION OF REMARKS

OF

HON. A. S. MIKE MONRONEY

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. MONRONEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to include in the RECORD an article from the Daily Oklahoman reprinting a tribute paid to Oklahoma's fighting civilian soldier, Maj. Gen. Ray McLain. General McLain has distinguished himself on every front in the European theater of war, and his rise to the command of the Nineteenth Army Corps undoubtedly places him as one of the outstanding civilian soldiers of World War No. 2.

The noted war correspondent for the AP, Wes Gallagher, has recognized this

distinguished record as shown by the following article:

RAY M'LAIN DRAWS PRAISE FROM NEWSMAN

The Associated Press wires last week carried a tribute to Maj. Gen. Ray McLain, banker-soldier who heads the Nineteenth Army Corps.

A story by Wes Gallagher from the western front, said:

"A small, business-like banker has established himself as one of the top-flight American generals in the United States Ninth Army's dash from Rhine to the Elbe.

"He is Maj. Gen. Raymond S. McLain, in peacetime an Oklahoma City banker and the only National Guard general in the American Army to reach the rank of corps commander.

"McLain * * * was given the dual task of meeting the First Army to close the Ruhr pocket and at the same time push at top speed for the Elbe. He had to go in two directions at once.

"At one time advance spearheads of his two wings were fighting more than 125 miles apart. Both his flanks were exposed when he reached the Elbe because the corps on each flank had not been able to keep pace with the Nineteenth.

"The Nineteenth Corps, with the Second Armored and Thirtieth and Eighty-third Infantry Divisions, reached the river days before other American or British forces.

"Genial and seldom perturbed, McLain * * * spends more hours in a jeep than any other general on the front. Every hour during daylight he travels about the front from division to division seeing for himself. At night he conducts staff work."

Yalta

EXTENSION OF REMARKS

OF

HON. RALPH W. GWINN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. GWINN of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following excerpt from the National Republican Club Bulletin dated March 27, 1945, concerning Yalta as it relates to Poland and its relation to Russia:

YALTA

We are very happy to note that some Republicans in Congress have had the courage to take a definite stand on our foreign policy and world cooperation. The statements of Senator VANDENBERG on world cooperation and on the Yalta agreement have justly merited the attention and approval of many of our citizens.

Much good has been accomplished at Yalta, and some of the decisions made are a step in the right direction. However, we hope that the Yalta agreement will be followed by one in which not only the Big Three but also the smaller nations participate as equals and that no small nation is treated unjustly. Only in this manner can we justify the heroic sacrifices made by American boys on the battle fronts of the world.

Among the nations whose sons and daughters have given their lives for the cause of freedom is Poland.

In September 1939, when most of us in this country were living in normalcy and in the spirit of happy isolation, when the American Communists paraded in Times Square and chanted "The Yanks are not coming," when some of the nations of Europe surrendered to Hitler with little or no fight, there was one brave nation who staked and sacrificed all for the cause of freedom. Just as in the Middle Ages, when the hordes of mongols overran eastern and most of central Europe, when the Russian princes paid homage and tribute to the Tartar lords, and civilization was saved by the brave Polish nation; just as in 1683, when the Turks and the Tartars were about to destroy the western civilization at Vienna and the brave Polish soldiers lifted the siege, defeated the barbarians, and saved Europe again, so in 1939, Poland, without adequate weapons, defied and fought Hitler.

Poland was encouraged to fight by the promise of Britain and France that they would fight for her independence and the inviolability of her boundaries. After weeks of bitter fighting, during which Polish cities and villages were devastated, hundreds of thousands of Poles killed, Poland went down in defeat and then the massacre in German-occupied Poland continued systematically.

Although in each country occupied by Hitler, a collaborationist regime was established, Hitler could not find in Poland a Petain, a Laval, a Degrelle, or a Quisling, and no Polish collaborationist regime was established. However, thousands of Poles succeeded in escaping from Poland and under the leadership of the Polish Government, which fled from Warsaw to London, they established valiant armies that bled and fought courageously on the sands of Libya, at Cassino, at Bastogne, and many other places. When Britain's Air Force was still in the process of development, the Polish eagles of the air were often spoken of gratefully by Mr. Churchill and other British leaders.

When Hitler invaded Russia, it is our recollection that Russia promised to guarantee Poland's independence. The Russian people have rendered a great service to humanity. Without their valiant fight, the Rhine would not yet have been crossed, without them, Hitler might have won—without them, and their victory, there probably would be no Poland at all. No doubt some adjustments in Poland's eastern boundary are justifiable, but we cannot see the justice in making a decision as to Poland's future and boundaries without the participation of the Polish Government in London, which is the only one that has been recognized by us. We hope that the Russian people can be persuaded to be magnanimous and help to the best of their ability to give to the Poles, Lithuanians, Estonians, and Latvians, whom their heroic armies liberated from Nazi oppression, a new birth of true freedom.

MacArthur Came Through

EXTENSION OF REMARKS

OF

HON. CARL T. CURTIS

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. CURTIS. Mr. Speaker, the successful and heroic recapture of the Philippines by Gen. Douglas MacArthur and the armed forces of the United States has prompted Miss Mattie Richards Tyler, a Washington poet, of 3945 Connecticut Avenue NW., to write a poem entitled "MacArthur Came Through."

Mr. Speaker, I wish to extend my remarks by including Miss Tyler's poem, as follows:

MAC ARTHUR CAME THROUGH

Just a night and a host of stars,
Men imprisoned behind walls and bars,
Women and children far from home,
Captives, exiles, with thoughts that roam
To food for the body, food for the soul,
Clothes to cover (clean and whole),
Loved ones, fireside, comfortable bed,
Music to solace, books to be read!

Just a night and a host of stars,
Filth and hunger and prison bars!
What was the promise MacArthur gave?
That he would come back one day and save
Those of us who were left behind.
MacArthur will come; he is just that kind.
We must have faith, be unafraid;
MacArthur has promised to come with aid.

Three long years since the Philippines fell
And we were plunged into darkest hell;
Three long years since the Death March rang
A challenge above war's din and clang;
Three long years since MacArthur bowed
To superior orders, but solemnly vowed;
"I came through, and I shall return!"
For 3 long years those words were to burn
In the gallant heart of him who spoke—
A man of purpose who inspired and awoke
Those who obeyed his every command,
Knowing the strength of his mind and hand.

Just a night, another dark night,
And 3 long years since that last grim fight!
Some have died, the rest have grown gaunt,
Men and women and children in want!
What is that pounding against the prison?
Have the dead awakened? have they arisen?
Oh, to break down these prison bars!
Dear God, what is that illumined by stars?
I am mad, I have cracked; it cannot be true,
I'm losing my mind, I'm finished, I'm through!
Then out of the darkness, clear as a bell:
"It's the Yanks! It's the Yanks! We are here. All is well!"

Just a night and a host of stars,
The Yanks have crashed through the prison bars;
From cell to cell they fight their way,
As the Japs fall back and right holds sway.
The Yanks have come, Oh, God is good!
MacArthur came through! We knew he would.
Just a night, but our hearts soar high
As the Stars and Stripes salute the sky;
And when morning comes the world will learn
That MacArthur meant: "I shall return!"

—*Mattie Richards Tyler.*

The Needs of the Republican River Valley

EXTENSION OF REMARKS

OF

HON. CARL T. CURTIS

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. CURTIS. Mr. Speaker, throughout the time I have been a member of this Congress, I have on frequent occasions called attention to the needs of the Republican River Valley.

In 1935 a terrible flood occurred, taking the lives of 110 people in the district which I now have the honor to serve. To this day, not one bit of construction has actually started. We need not only flood protection, but we need to save our soil and we must have supplemental water. A program of flood control and irriga-

tion will bring about the saving of our soil.

The people of the Republican River V .lley are intelligent, hard-working, and thrifty individuals. They need a program of water conservation to stabilize their economy and make them prosperous. This will repay the Government manyfold.

The statistics show that in addition to the fact that the farmers who use the water pay for the project, that on Federal irrigation projects the annual taxes collecetd amount to approximately 5 percent of the cost of the project. Farm land without sufficient water does not produce income sufficient for any great amount of taxes.

Mr. Speaker, I would like to include in my remarks a petition signed by members of the fifty-eighth session of the Nebraska State Legislature. The petition is as follows:

To Senators BUTLER and WHERRY and Congressmen CURTIS, STEFAN, BUFFETT, and MILLER:

We, the undersigned, members of the fifty-eighth session of the Nebraska State Legislature, commend the United States Army engineers, Bureau of Reclamation, Department of Agriculture, and all other Federal agencies for the over-all plan for development of the Republican River drainage basin; that we express our confidence in the ability of the Federal Government and its present agencies to develop this plan; and that we urge construction in accordance with the plans as drafted by the Army engineers and the Bureau of Reclamation as approved by the Congress of the United States. Time will prove whether an authority is necessary for its operation.

Ed Hoyt, Arthur Carmody, Daniel Garber, H. L. Pizer, Fay Wood, Carl P. Jeffords, Lester H. Anderson, Earl J. Lee, Don E. Hanna, Edwin Schultz, William A. Crossland, William Hern, James A. Ryan, Harry F. Burnham, John F. Doyle, Ernest C. Raasch, Sidney J. Cullingham, Walter R. Raecke, Fred Seaton, C. Petrus Peterson, Tom Dooley, Sam Klaver, Thomas H. Adams, Lloyd Kain, C. N. Ogden, D. H. Cronin, Joseph C. Reavis, Ladd J. Hubka, D. W. Burney, Charles F. Tvrdik, A. J. Brodahl, H. P. Heiliger, J. E. Conklin, John E. Mekota, R. A. Babcock, Frank Sorrell, Harry A. Foster, James H. Anderson.

Well Played

EXTENSION OF REMARKS

OF

HON. A. S. MIKE MONRONEY

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. MONRONEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to call attention to the House to the recent editorial from the Daily Oklahoman on the death of State Senator Fidler.

Senator Fidler was one of the outstanding members of the State legislature for 16 years and served with distinction with several Members of the present United States Congress, including Representatives ROSS RIZLEY, PAUL STEWART, JED JOHNSON, and BILL STIGLER.

His passing is a distinct and profound loss to the State of Oklahoma.

WELL PLAYED

Rarely does a State possess so much civic strength and official talent that it can lose as good a man as Senator Fidler without suffering a real loss. Men who served with Fidler in the Oklahoma Senate and men who were acquainted with his official activities count him among the most efficient and faithful public servants the State has ever known. His 16 years in the senate covered some of the best years and some of the most sordid in the State's official history, and he retired from office with the profound respect of everyone who was acquainted with his career. He was a faithful servant of his district and his State, and in the hour of his passing there will be a unanimous verdict of commendation.

Justice for Poland

EXTENSION OF REMARKS

OF

HON. JOSEPH F. GUFFEY

OF PENNSYLVANIA

IN THE SENATE OF THE UNITED STATES

Thursday, May 3 (legislative day of Monday, April 16), 1945

Mr. GUFFEY. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a statement entitled "Justice for Poland" by our colleague the junior Senator from New York [Mr. MEAD].

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

On this, the one hundred and fifty-fourth anniversary of the Polish Constitution, it is fitting that we pay tribute to Poland's contribution to the cause of humanity, and that we recognize the justness of the claims of her people for true representation at the San Francisco Conference.

At the outbreak of hostilities in Europe in 1939, brave Poland, after concluding an alliance with Great Britain, offered the first resistance to the then overwhelming strength of Hitler and his Nazi war machine. The epic struggle of Poland, shut off as she was from any real assistance by other powers, will live forever. The heroism of Poland inspired the freedom-loving nations of the world and brought home to them the Axis threat to civilization. By thus engaging Hitler in the early days of the war, Poland prevented a surprise attack by Hitler on France and England, who were unprepared. Had Poland compromised, instead of resisting aggression, the whole course of history might have been changed. Instead of the present anticipated total military victory in Europe for the United Nations, the war might have been won by Hitler long before now.

After Poland was overrun by the enemy, her forces rallied in the defense of France. Polish units served with valor in north Africa, while the Polish Air Force added strength to the R. A. F. over Europe.

It is our solemn duty to befriend the nation which has done so much for us and for humanity. The people of Poland were the first to bear arms. Certainly, their government should be truly representative of the people who fought the brave fight and made the sacrifices.

The prospect for a just and lasting peace depends not only upon mutual understanding and good faith as between the United States, Great Britain, and Russia, but, equally important, it is necessary that all nations, great and small, be given the consideration which they merit to the end that they shall have confidence in the justness of the framework upon which the peace is to be built. That framework is now being laid at San Francisco. If the people of Poland are satisfied that those who speak for them in establishing the framework are truly their representatives in a Polish provisional government of national unity as envisioned by the pledge of the Yalta declaration, we will have gone far in attaining our objectives.

Government Need of Private Brain Power

EXTENSION OF REMARKS

OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Thursday, May 3 (legislative day of Monday, April 16), 1945

Mr. WILEY. Mr. President, I ask unanimous consent to have printed in the RECORD an article written by me entitled "Government Needs Its Private Brain Power," which was published in the May issue of Forbes.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GOVERNMENT NEEDS ITS PRIVATE BRAIN POWER

(By ALEXANDER WILEY, United States Senator from Wisconsin)

One of the most refreshing influences on Government during this war has been the influx of dollar-a-year men and other captains and lieutenants of industry, labor, and agriculture. These men have spearheaded much-needed minor revolutions in many emergency and old-line Federal agencies. Into the ponderous maze of bureaucracy they have brought crisp, efficient, hard-hitting brain power. Accustomed to the most modern management techniques of private enterprise, to streamlined organizations, direct and terse communications, clear-cut personnel policies, etc., they have made short shrift of many of the archaic traditions of Government departments.

For a long time they had been on the receiving end of voluminous questionnaires, discourteous orders, arbitrary restrictions, tardy instructions, and incomprehensible counsel from Government. So it was only natural that they would reform their authority-mad bureaucratic underlings.

BUSINESS VERSUS BUREAUCRACY

They had kept their own enterprises in the black, met pay rolls, paid out stiff individual and corporate taxes. So it was only natural that they would sound a loud note of economy in the symphony of Federal extravagance.

They had beaten private production dead lines, ended bottlenecks, constantly improved product standards and specifications. So it was only natural that they would do expert trouble shooting and efficiently improvise against the ever-changing needs of the military situation.

They had perfected salesmanship, refined merchandising, polished public relations. So it was only natural that they would enlist in the war effort the wholehearted aid of the press, the radio, and the motion pictures, and would help to keep the general public as a gracious and willing customer for war appeals.

They had risen in their own corporations, unions and associations, by dint of perspiration and inspiration, foresight, hindsight,

and insight. So it was only natural that they would recruit staffs of Federal officials of similar competence and shelve the old fuddy-duds who had risen to high government position through mere seniority.

Of course, some of these good will and good work ambassadors from private enterprise could not "take to" the Federal Government, and sooner or later resigned. Of course, most of them did not receive a free hand, but were hamstrung at every turn in their enlightened efforts toward public service. Of course, they were often abused by the synthetic thinkers of the Left through smear accusations of alleged complicity with their former concerns.

But, luckily for the Nation, a large number of these cracker-jack executives stuck it out in the Federal service. They bore the taunts, the ridicule, and the lack of thanks for their financial and other sacrifices.

The living testimonial to the work to which they have so ably contributed is the niagara of food, ships, planes, and other matériel which has flooded out to the far-flung battle fronts. Now, however, with the war in Europe happily approaching a close, many of these men are yielding to their natural desire to resume their former connections. Already, many have returned to their former posts.

They are, of course, receiving little encouragement from the Government, as a whole, to do otherwise. Yet the tremendous production needs of the war in the Pacific still requires their wizardry. And even after victory in the Far East there will be important domestic battles which will require their services in government.

These men will be needed as never before in the war for prosperity. They will be needed to cooperate with their fellows in industry, labor, and agriculture to insure the conditions essential to prosperity, such as speedy reconversion, the progressive relaxation of Federal controls, assistance in community planning, streamlined reduction of Federal bureaucracy, maintenance of demand at high levels, etc.

NEEDED NOW

Moreover, they will be needed for the impact they may bring to bear toward basic beneficial changes in Federal policy. Such changes would include: The return to the States and localities of powers properly within their jurisdiction and the revision of the current widespread notion that government exists to support the people, rather than that government should be supported by the people.

Now, therefore, is the time to encourage these executives to stand by their economic battle stations until the afore-mentioned battles are won. The welfare of the Nation—that of its 12,000,000 service men and women, its millions of demobilized war workers, and everyone else—demands that these men be permitted and stimulated to continue their grand job. Let government retain within the public service its gold mine of private brain power.

Palestine's Place in the New World

EXTENSION OF REMARKS

OF

HON. OWEN BREWSTER

OF MAINE

IN THE SENATE OF THE UNITED STATES

Thursday, May 3 (legislative day of Monday, April 16), 1945

Mr. BREWSTER. Mr. President, I as unanimous consent to have printed in the Appendix of the RECORD an address entitled "Palestine's Place in the New World," delivered by Louis Bromfield at a dinner sponsored by the New Zionist Organization of America, in New York City, March 18, 1945, to commemorate the thirtieth anniversary of the creation of the Jewish Legion in World War No. 1.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

PALESTINE'S PLACE IN THE NEW WORLD

I am glad to be here tonight on the occasion honoring Colonel Patterson, so valiant a fighter for so many years in behalf of the cause of the Jewish people and that of a Free Jewish Palestine. By comparison my own interest and activity is recent, although I believe it to be no less sincere.

The cause of Palestine, like that of India, is one which is not too well understood by the average American. It is not simply a Jewish question, or one which concerns Great Britain and Palestine alone. It is the responsibility of the whole of a world which has shrunk, in the generation immediately past, to a fifth or less of its present size. Whether we wish it or not, the American people are involved today in what happens in the most remote regions of the earth. It is no longer merely a question of being involved through aloof moral principle or abstract reasoning. What happens in the Balkans, in Indochina, in the Near East, affects immediately our interests in the world and even our economy at home.

DECLINE OF IMPERIALISM

Tonight I would like to speak concerning the place of a Free Jewish Palestine in the new world—that shrunken world which makes neighbors of all of us, that world in which there is no longer a place for great scattered empires exploited by three or four small nations. In this new world, the power, the dominance, political, economic, and military, will belong inevitably to those nations which occupy huge, self-contained areas of the earth's surface, with enormous natural resources and immense supplies of manpower for military, industrial, and agricultural purposes. It is those nations with which will lie the responsibility for prosperity, order, and peace. In that new world a solution must be found for India, for Palestine, for the remote islands and colonies of the Dutch and French empires. Who can believe that after this war the people of the British Commonwealth, the people of Russia, and the people of this Nation will be content to allow such problems as those of India and of Palestine to drag along, compromised and befuddled and exploited in the interests of a small nation, or even a small class, thousands of miles away? Who can believe that England, France, or Holland will return upon the same terms to the colonies of the East, swarming with people who by now no longer look upon the white man as either infallible or unconquerable.

It may be that I am stating all this too bluntly. If so, it is because, out of long experience at first hand with political and economic conditions in many parts of the earth, I am inclined to be a realist. I believe that perhaps the worst enemies of world peace and world government are those perfectionists and Utopians who expect a paradise on earth to emerge overnight in this confused and tortured world. No such thing will happen. If and when the paradise arrives, none of us will be living. Mankind has never progressed by utopian plans which an individual or a group sought to impose upon the rest of the world, but always slowly and painfully. It might almost be said that man's progress is only through necessity, the hard way. It might be said that this is the natural and immutable law.

In this new world before us, there lies an absolute necessity for realism. In this new world certain problems cry out for a solution upon sound and practical terms. Certain questions must be answered before we can hope for lasting peace or orderly government.

RUSSIAN REALISM

Russia and Stalin have shown by far the greatest understanding of what this new world is to be. They had laid and are laying their future plans along realistic lines based upon economic union among nations large and small over a vast area of the earth's surface. The policy of Great Britain is one dictated to her by the circumstances of history. It is always well to remember that Great Britain is not a single nation. She is three things—the British Isles, the Commonwealth of Nations, and the Colonies which comprise the Empire. Save by a return to the world as it was before 1939, the curious world institution known as Great Britain can no longer exist as a great united national force. Churchill, John Simon, Samuel Hoare and other imperialists would prefer a return to the world of before 1914, but this even the Tory recognizes as impossible.

BRITAIN'S "BURDEN"

It would be absurd to belittle the great courage, the great wisdom, the great leadership of Mr. Churchill in the time of England's crisis, but it would be equally absurd to overlook the fact, already forgotten by some, that Mr. Churchill has always been England's most stubborn Tory, its principal advocate of imperialism and the long-exploded Kipling philosophy of the white man's burden. Mr. Churchill was the most bitter opponent of the Irish settlement and of the Indian constitution. Today when he betrays Great Britain's promises to Palestine—when he prevents any settlement of the India question, when he intervenes in Greece, in Italy, in Belgium, he is not fighting in the interests of humanity or the establishment of a new and better world in which a lasting peace may be established—he is fighting with his back to the wall, to restore an old imperialist world which cannot be restored, a world in which the great advantages belonged not simply to the people of the British Isles but to a comparatively small class of that people.

AMERICA'S "ABSTENTION"

As for ourselves, our record, as determined by our Government in Washington, has been no better than that of Great Britain, perhaps worse, for it has been until now largely one of indirection and confusion, of compromise and bargaining, without any apparent direction. While making high-sounding declarations concerning freedom and democracy, we have compromised with Spain, with Vichy, even with Great Britain in utter contradiction to our proper ideals of democracy and government. Nowhere at any time can it be said that we have exerted the full weight of our enormous power and prestige to bring order, justice, and liberty into the creation of a better world. At times it has seemed indeed that our Government was more occupied with playing a game of intrigue in which the object of the opponents was to outsmart each other than with the establishment of sound principles and the foundations of a more decent world. In all history there is no greater example of aimlessness than the doctrine of abstention enunciated by our Secretary of State only to be denied and repudiated the next day.

NO ROOM FOR NONPRODUCTIVE POPULATIONS

How does all this affect the Palestine question? It affects it directly. Who in this room can doubt that if there had been firm and honest insistence from Washington that Palestine be opened to the pitiful hordes of mid-European and Balkan Jewish refugees, it would not have been done? We need to say now with complete honesty, "There is no such thing as Moslem unity. It is no

more than a shabby excuse to keep control of Palestine." I know personally many Indian Moslem leaders and their contempt is unbounded toward the greater part of the Moslem population of north Africa and parts of Arabia for the degraded practices which are loosely called Islamic. We need to say now, "If this crowded world is to advance, there can be no place in it for shiftless, nonproductive, half-bandit populations. Is it not better for the world that Palestine should belong outright to the Jews whose historic home it is, who have turned it from a desert into a blossoming and prosperous garden, than to a people who had reduced it over the centuries to a state of wretched poverty and banditry?" Have we not the right to ask why General Spears, an expert in devious ways, remains in the Near East, sent there to intrigue against the French and the Palestinian Jews who are the Allies of the British and ourselves? Who can doubt that but for oil and the proximity of the Near East to trade routes, the Arabs would long ago have been given the shrift?

AMERICA'S OPPORTUNITY

In the new world—if it is what we hope it will be—if we are to have peace—there can be small place for old-fashioned imperialism. Our course as Americans is clear enough. Stalin has no doubts as to the course of Russia. Churchill's course is determined for him. We alone have the power and the opportunity to exert immense pressure toward the righting of many imperialistic wrongs. We cannot do it by "abstention." We cannot do it playing a game of old-fashioned political intrigue, and we cannot do it by issuing periodically political statements telling the Jews and the Christians affiliated with them that they are nice people and that some day somebody will do something about Palestine. The people of the United States deserve recognition in the world and in our own Government of their power of leadership as the most disinterested of all those nations working toward the goal of peace and decency in the world.

INDEPENDENCE PROTECTED BY FORCE

If the nations of the world accomplish nothing more than a vague structure, without power, without respect, imposed upon a world without regard for the facts and the fundamental rights of all nations, they will succeed no better than they succeeded at Versailles or at Geneva. We shall have once more only a world structure which becomes no more than a center of international intrigues and a center to foster imperialism and trample upon the rights of small nations and peoples. Self-determination coupled with wholesale freedom is not enough. Those of us who knew Europe well between the two wars know well the iniquities of such a doctrine. The rights and independence of small peoples must be guaranteed and protected by force if necessary.

In the establishment of a proper and effective structure of world government, the leadership lies naturally with the United States, the most powerful and what is more important, the most disinterested of nations. Until now we have failed to take that leadership. We have failed to insist that we do not return through a patchwork of compromise and intrigue to the tragic world before 1939, but to step forward and upward.

MANDATE SYSTEM VERSUS PEACE

In such an advance, justice and the rights of small nations like Palestine play a large role. There will be no peace so long as small nations are mandated to great nations whose fate is dependent upon the imperialistic exploitation of other peoples. Palestine is not the problem of any one nation. It is the problem of all nations, of all people, everywhere—interested in freedom, justice, and opportunity. In the new world there will be no place for backward, unproductive peoples artificially protected by imperialist nations. There will be a place only for peaceful, productive nations, contributing materially to the welfare of the world as a whole. In that category, Palestine has certainly earned a place. Indeed Palestine might well serve as a model. For that reason if for no other she merits the respect and protection of all those who sincerely seek the establishment of a decent world.

The U. S. S. "Oregon"

EXTENSION OF REMARKS

OF

HON. SHERIDAN DOWNEY

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Thursday, May 3 (legislative day of Monday, April 16), 1945

Mr. DOWNEY. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "Restore the Old *Oregon* as Patriotic Symbol" from the Argonaut of April 6, 1945.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RESTORE THE OLD "OREGON" AS PATRIOTIC SYMBOL

The *Oregon* of Spanish-American War fame had been fitted out as a national symbol by the pennies of school children. Following Pearl Harbor, someone in an excess of zeal for the collection of scrap iron, condemned the gallant ship, and after long behind the scenes debate it was towed out as junk to serve as a breakwater off the Hawaiian Islands. The scheme was as impractical as it was short-sighted and hysterical, and the splendid old hull, that the Spaniards could not sink, floats uselessly, but not forgotten. It should be returned in good condition to the children of Oregon State who paid to have it preserved as a national monument.

"The *Oregon*," writes Admiral H. E. Yarnell, "is one of our great historic ships. She was built in San Francisco by the Union Iron Works (now Bethlehem Steel), and no ship was ever better built. All of the ships built by that company were superbly constructed. * * *

"I think every naval officer has a deep affection for the ships on which he served, especially in his younger days. I joined the ship on June 19, 1897, at Esquimalt and was detached in March 1899 at Manila."

The following officers who served on the *Oregon* during her cruise from San Francisco to Cuba in 1898 are still living: Admiral J. M. Reeves, Rear Admiral Frank Lyon, Capt. R. Z. Johnston, Capt. C. R. Miller, Fleet Admiral W. D. Leahy, Vice Admiral C. S. Kempff, Admiral H. E. Yarnell. These are honorable names and they should be honored in their ship. They rolled around Cape Horn on a perilous voyage, 17,000 sea miles in 81 days, demonstrating in the suspenseful nation the need for the Panama Canal for the protection of two coasts, 3,500 miles apart.

On March 6, 1898, the battleship *Oregon*, commanded by Charles E. Clark, was ordered to leave Seattle, sail around Cape Horn, and join the Atlantic Fleet. While off the Chilean coast, on April 30, Captain Clark was notified that a state of war existed between the United States and Spain, and he was ordered to make all possible speed to the Cuban shores, on forced draft. On May 25, after the completion of this remarkable voyage, that famous ship the *Oregon* steamed in the lead of all the Atlantic Fleet, fighting the Battle of Santiago, preventing the escape of the *Vizcaya* and the *Cristobal Colon*, in the action which decided the Spanish-American War.

That is history.

National spirit depends on the preservation of historical appreciation. What children see and visit, they remember. To glory in their country's flag, they should view it not as the symbol of a vague abstraction, but as a banner of honor which has floated in hours of peril over buildings and forts and ships. Children should know that the story of their country began long before they were born, and that a price in courage was paid for all that they enjoy.

We believe that as a matter of national honor the *Oregon* should be restored. The rusting of the *Oregon* indicates a decadence in our patriotic perspective. If the *Oregon* does not matter, there are a lot of other values, of which she is a symbol, which will too soon be of slight popular concern.

In restoring the *Oregon* the Navy Department, supported by the Congress, shall have the opportunity of demonstrating to the heroes of this generation that it is not the American way to forget them in the next.

The San Francisco Conference

EXTENSION OF REMARKS

OF

HON. J. WILLIAM FULBRIGHT

OF ARKANSAS

IN THE SENATE OF THE UNITED STATES

Thursday, May 3 (legislative day of Monday, April 16), 1945

Mr. FULBRIGHT. Mr. President, I wish to have printed in the Appendix of the RECORD two matters relating to the San Francisco Conference, and in connection with them, and as introductory thereto, I should like to read two or three paragraphs from an editorial in the St. Louis Post-Dispatch, containing a quotation from Alexis de Tocqueville, published in 1835, as follows:

OUR LINK WITH RUSSIA

When Alexis de Tocqueville in 1835 published the first volume of his monumental study, Democracy in America, he ended the book with the following amazingly prophetic words:

"There are at the present time two great nations in the world, which started from different points, but seem to tend toward the same end. I allude to the Russians and the Americans.

"All other nations seem to have nearly reached their natural limits, and they have only to maintain their power; but these are still in the act of growth. All the others have stopped, or continue to advance with extreme difficulty; these alone are proceeding with ease and celerity along a path to which no limit can be perceived. * * *

"Their starting point is different and their courses are not the same; yet each of them seems marked out by the will of Heaven to sway the destinies of half the globe."

This must have seemed a wild statement at that time, and for many years thereafter. When the French political scientist wrote, America was a youthful Republic, its President the frontiersman and fighter, Andrew Jackson. Russia was ruled by Czar Nicholas I, an absolute monarch who gave his people few if any liberties.

Today the prophecy of 110 years ago is being brilliantly fulfilled. The two great nations have proved not only to tend toward the same end, but to be well on the way to achieving it. Their progress toward that

end—the smashing of Nazi power and the creation of enduring peace—has been recorded in the headlines for months past. Momentarily the tangible symbol of that epochal cooperation is expected in the joining of their military forces in the heart of Hitler's empire.

I ask that following that there be printed an editorial entitled "Pandora's Box at U. N. C. I. O.," from the Washington Post of May 1, 1945, and the column Today and Tomorrow, by Walter Lippmann, from the Washington Post of this morning.

There being no objection, the matters were ordered to be printed in the RECORD, as follows:

PANDORA'S BOX AT U. N. C. I. O.

(The following editorial was wired before the afternoon (Washington time: evening) plenary session at which Argentina was formally admitted to the Conference after Molotov's press and public protests.)

SAN FRANCISCO, Monday.—Intrigue of the most egregious variety seems to have been going on at San Francisco at the hands of the bush-league diplomats of the State Department headed by Secretary Stettinius. The intrigue has centered on Argentina. Under the Yalta agreement, as generally understood, Farrell's Argentina hasn't even the shadow of a pretext for asking a ticket of admission to this Conference. The understanding was that invitees should comprise the United Nations plus a specified list of associated powers, provided they declared war by March 1. Argentina wasn't on the specified list. Argentina didn't declare war until March 27. Yet the State Department, which has been insisting rightly upon the integrity of the Yalta agreements and invoking the memory of President Roosevelt to sanctify those agreements, has actually jimmied the Conference open so that Farrell's Argentines, who are supposed to be waiting at Los Angeles for the expected call, can be admitted. In the meantime the State Department has been sedulously spreading the rumor that the agitation arose among the Latins and that they could not restrain it.

The intrigue would be disgraceful even if conducted by master hands. At the hands of the amateurs of the State Department, this kind of blundering is worse than criminal, for the consequences may be grievous. First, as one delegate put it, any tampering with the Yalta understandings undermines the very structure of the San Francisco Conference. A moral blow has been administered to this Conference, in other words, which cannot yet be assessed. Already the cynical comment is being heard, "It will be Franco's turn next." Secondly, what has happened about Argentina has prejudiced our relations at this Conference with Soviet Russia.

It is understood that Molotov is honestly amazed at the inexpertness and disingenuousness of the week-end play as pulled upon the Russians. On Saturday their proposal for seats for the Ukraine and White Russia was submitted to the steering committee. It was accepted, except that at the seemingly formal suggestion of Colombia the names were referred to the inner executive committee for preparation of proper official invitations. Argentina wasn't mentioned. The steering committee, testifying to an accomplished fact, actually went on to confer on Molotov's further request that the Ukraine and White Russia should be given chairmanships on the subcommittees of the working commissions. Over the week end Argentina popped out of the shadows. And this morning Argentina was brought up alongside White Russia and the Ukraine which Molotov thought had been admitted.

It was a crude device and it aroused Molotov's ire in hair-raising fashion. During the storm Molotov referred to the week-end intrigue, protested against the bracketing of the war-making Ukraine and White Russia with the Fascist Farrelites among the peace-loving nations, and threw huge anti-Argentine chunks of Mr. Hull's and President Roosevelt's speeches and notes at the heads of the little Machiavellis of our State Department.

Molotov cannot think of this week-end's offensive work as anything but stupidity. He must know that at this crucial period of world history we consider that nothing is more precious after the maintenance of our principles than the preservation of the wartime community of interest between Moscow and Washington. All he can conclude is that incompetence has taken hold of our foreign relations. However, Molotov is not averse to playing poker with men who compared with him, didn't even know the rudiments of the game. Some sharp trading must now be expected along with constitution making, and, let warning be pondered, today's proceedings have given the Russians a mountain of chips.

On Saturday the head of the American delegation was told that the high purposes of this great convention might be tarnished by a riot of speculation on deals over tickets of admission. He must have known the damage that was being done by the "monkey business." If he didn't, his eyes have been opened and his ears have been reddened by today's proceedings.

Another "victory" of this sort and we may have to call for the undertaker. It is time for the President to call a halt to this foolishness and return the American delegation to its job, which is to frame a constitution for the world of peace-loving nations, lest Mr. Stettinius seek to follow up his "victory" by trying to score another in behalf of Franco. The idea of allowing Argentina to come between us and the Russians could not have been entertained if statesmanship had not taken a week-end holiday at San Francisco.

TODAY AND TOMORROW

(By Walter Lippmann)

MONDAY'S SHOWDOWN

SAN FRANCISCO.—When Mr. Stettinius mounted the rostrum and demanded an immediate vote on the admission of Argentina, he adopted a line of conduct which, if it becomes our regular line, will have the most dangerous consequences. M. Molotov had asked for more time in which to seek a diplomatic settlement. The question before the plenary session was whether to grant this request. It was not whether Argentina is a Fascist state and, therefore, more or less eligible to membership than the unreconstructed Warsaw Government, or than the Ukrainian and White Russians Republics. The question was whether these issues about which the Allies disagree should continue to be dealt with by diplomacy which aims at agreement or should be settled abruptly by an open test of political power in the form of a showdown vote.

On this question Mr. Stettinius, to the astonishment and dismay of every experienced observer I have talked with, took the position that his diplomacy was exhausted and that there must be a show-down. He got the show-down and he won. But when he examines the result, he will wish he had paused long enough to realize what he was doing.

The debate itself was a clear warning not to force a show-down that afternoon. After M. Molotov had asked for more time, there were five speeches. One was by M. Spaak, of Belgium, who supported the plea for time to seek a diplomatic settlement. The other four were by Colombia, Mexico, Peru, and the United States. All four demanded an immediate show-down by vote. Thus the only countries which demanded a show-down were in the Western Hemisphere. No European country, no British Empire country, no Asiatic country argued for the American demand. That should have been enough to make Mr. Stettinius pause.

The first vote, which was the crucial one because it dealt with the question of diplomacy or a show-down vote, was carried by a majority composed of the American and British Nations. Of the Big Five who are to be permanent members of the security council, only Britain supported the United States. France and China did not support us. And the Soviet Union, of course, was opposed. Moreover, with the exception of the Netherlands, not one single liberated country of Europe supported us. Mr. Stettinius carried the vote by a large majority, because the British Empire Nations, except New Zealand, alined themselves with the American Republics. The combination had a lot of votes, but, unhappily, the nations which did not support us were the very ones with whom, through whom, and by whom peace, when it is made, will have to be maintained.

The United States, it is said, was compelled to force the issue, because the Latin-American Republics insisted upon the admission of Argentina as the price of their agreeing to the Yalta decision to admit the Ukraine and White Russia. They had the votes, nearly half the votes in the Conference, and they exercised their political power.

If this is what happened, the American republics were badly advised. For in using their voting strength at the outset in order to force liberated Europe and the Soviet Union to accept a country with so bad a war record as Argentina, they have called attention dramatically to the fact that the voting power of the Americas is out of all proportion to their political weight in the world and to their contributions to security in fighting this war or in preventing another.

The vote in the Conference on Tuesday was a preview of where power will reside in the general assembly. Let us not have any illusions that the Soviet Union, that France, or the other important continental countries which are near to Germany, will vest in such an assembly any real authority in matters affecting their vital interests. The assembly may be based on the sovereign equality of states but, as the events of Tuesday demonstrated, it will be dominated by the American Republics with the help of British votes whenever the United States draws upon its political credit in the British countries.

Moreover, the event will diminish the authority of the whole organization. For what Mr. Stettinius demonstrated, quite unintentionally no doubt, was that the mechanism of this organization can be used to short-circuit diplomatic agreement among the leading powers, that in the hands of men who lack experience and wisdom and are impatient and not objective, it may not reinforce diplomacy but destroy diplomacy. As a result the powers will be more than ever determined to keep the things that really matter most to them away from the organization. For matters of great moment must be handled not by show-down, roll calls, "victories"—God save the mark—but by diplomacy which is based, as Field Marshal Smuts put it so sagely in his address, on the intention to make the right of unanimity, to operate as "a duty to unanimity."

The first week of the Conference has shown that the United Nations are not yet ready to dispense with the kind of authoritative guidance which Roosevelt, Churchill, and Stalin supplied. Their unity still depends on the heads of states; it cannot yet be left to subordinate officials, even such high ones as foreign ministers, who so quickly tend to become enmeshed with controversies their departments specialize in, and to lose sight of the forest for the trees.

When M. Molotov leaves, as he will shortly, the Prime Minister and the President will

need to talk seriously with Marshal Stalin so that together they may find ways to steady and guide the very uncertain management of this Conference.

Office of Price Administration

EXTENSION OF REMARKS

OF

HON. EDWARD J. GARDNER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. GARDNER. Mr. Speaker, I have today introduced a resolution authorizing an investigation of the Office of Price Administration to determine whether or not the actual operation of the price-control and rationing program has been fair, impartial, and equitable in its administration and enforcement, and whether or not the regulations governing price control and rationing were fair and equitable as written.

In the past few days two reports have been issued showing the necessity for curtailment of available civilian supplies of food in the United States—one by Judge Rosenman, and the other by Leo T. Crowley, as Chairman of the Inter-Agency Committee on Foreign Shipments. Both of these reports indicate that a further curtailment of civilian supplies will be necessary in the year 1945, and thereafter in order to assist in fulfilling the requirements of the Army and some foreign needs.

We cannot conscientiously ask the people of the United States to accept a further curtailment in civilian commodities unless we can definitely assure them that the regulations under which they are operating are fairly, impartially, and equitably written and administered.

It has been fairly well established by testimony before the House Food Investigating Committee that the regulations upon meat have not been fairly and equitably written, and also that the enforcement and administration of the regulations have not been equitable nor impartial in practical application.

On March 1, 1945, I entered into the RECORD a statement outlining the inequitable administration and enforcement proceedings in the handling of institutional users' allotments in the Cincinnati district, and I now find that I have evidence of further abuse in this respect in the same district and which in some cases reaches into the regional office of OPA at Cleveland, Ohio. In the city of Dayton, which is administered by the Cincinnati district and the Cleveland regional office, we have a case where an intermediary meat distributor who was charged on six counts, with a maximum possible penalty of $15,000 and 3 years, was actually fined $500 and no civil action for the recovery of the alleged overcharge was ever taken by the OPA.

Another meat case in Dayton, Ohio, which resulted in an indictment before a grand jury on 12 counts, with a possible penalty of a $60,000 fine and 12 years' imprisonment, ended with a $500 fine to the principal involved and a $1,000 fine to the agent, and no civil action has ever been taken to recover the overcharges involved. The investigation of this case was extensive and exhaustive, and the prosecution was furnished with invoices and checks showing the overcharge.

In a banana case handled in the Cincinnati district the investigation covered 5 weeks and involved an operation which handled over 1,000,000 pounds annually; it resulted in an overcharge showing of over $23,000. The complete investigation was reported to the Cincinnati office November 1, 1944, and on April 1, 1945, this case was sent back to Dayton for reinvestigation.

Rumors are current that a rent-control case against a Dayton hotel and a rent-control case against a Columbus hotel have not been pushed to hearings because the Cleveland office had requested that no action be taken.

A newspaper ad tie-in with soap sales was completely investigated in Springfield in December 1943 and reported to Cincinnati at that time, but no action was taken.

These items indicate the need for explanation regarding the lack of prompt enforcement measures on relatively big cases. On small cases the Cincinnati district will send out notices to alleged violators ordering them to send their checks for $50 in to Cincinnati despite the fact that the man charged with the violation had no opportunity to meet his accuser nor defend himself.

In matters of price control I find evidence that a canning plant which produced tomato puree in the reason of 1944 is up to this time without an authorized ceiling price, and the commodity is in storage awaiting final determination of the proper price. This plant is a small plant; and in all cases where large plants are involved there is evidence that the price allotted is higher than the one which is in negotiation for this small plant.

The limits upon personal investigation are such as to prohibit full and complete documentary evidence upon charges of this kind, and the only way in which the matter can be thoroughly examined and the facts brought to the surface is by a complete and thorough examination of the files of the Office of Price Administration. It is for this reason that I have introduced the resolution asking that such investigation be authorized.

The recent statement by the President of the United States, to wit: "Irresponsible criticism should not be permitted to break down the confidence of the people in an essential wartime program and hard-working wartime agency," has my sincere approval. I hope that nothing will interfere with the continued operation of price control and rationing of scarce commodities. However, any such program which is not completely fair and equitable is contrary to the concept of American government, and the only way that we can determine whether or not the criticisms are irresponsible is to obtain testimony under oath regarding the alleged inequitable and unfair regulations or administration and enforcement of such regultaions.

The resolution is offered for the purpose of determining:

First. Whether or not the acts of the Price Control Division have been fair and equitable in application upon all persons engaged in similar enterprises.

Second. Whether the rationing program developed by the Rationing Division has been fair equitable to all persons, business enterprises, or others engaged in business in the United States.

Third. Whether the rent control regulations have been fair and equitable to renters and owners of property.

Fourth. Whether the Legal Division and the Enforcement Division administered such regulations of price, rent, and rationing in a fair and equitable manner.

Fifth. Whether the Administrative, Management, and Planning Divisions have operated in a fair and equitable manner toward the citizens of the United States.

Sixth. Whether the Field Administration Division, through its regional and district offices, has handled the various price, rent, and rationing regulations in a fair and equitable manner.

Seventh. Whether the War Price and Rationing boards in the local communities have administered the various price, rent, and rationing regulations in a fair and equitable manner.

Eighth. Where the individual responsibility rests for any unfairness or inequity in such administration.

The resolution is directed to the administration and division of the available civilian supplies within the United States and the control of prices thereon. It does not concern itself with the allocation of commodities among the Army, our allies, liberated countries, and the civilians within the United States. The resolution is concerned simply with determining whether or not the effect of the regulations, as administered and enforced, has been fair and equitable in all respects.

Pay Increase for Postal Employees

EXTENSION OF REMARKS

OF

HON. JAMES G. FULTON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. FULTON. Mr. Speaker, I am speaking today in favor of a raise for our good and faithful Federal employees, who have done such a magnificent job during the past years and have received such little recognition for their services. We all know the cost of living has advanced very materially, and yet we find that the postal employees have received no basic pay increase for 20 years. They get the same pay they did in 1925, except for a $300 annual cost-of-living bonus, which has been paid for only 2 years. Under existing law, even this bonus cannot be paid after June 30, 1945.

Nobody outside the armed services has done a better job during this war than these same postal employees. The Postal

Service has moved an ever-increasing volume of mail. They have found time to sell War bonds and stamps. They delivered the ration books, helped register aliens, and a host of other wartime services. The Postal Service is not exempt from the draft and has contributed a great percentage of its members to the fighting forces, now scattered over the many fronts. Their big job has been done by a short-handed staff.

In a voluntary appearance before the House Committee on the Post Office and Post Roads a few weeks ago, I stated very frankly that I think these worthy postal groups should be given increases in pay and other proper recognition. These are long overdue. I have also appeared before the representatives of most of the postal groups in the Pittsburgh area and have pledged them my vote and whatever influence I may have for the passage of H. R. 2071 (reported as H. R. 3035). I now repeat this pledge and will support any reasonable amendments designed to adequately compensate these faithful public servants. This bill does not correct all inequalities but in the main it does provide the basic raise, and the reclassification which has been awaited by anxious employees and their families for many years.

In my maiden speech I pointed out to Congress and to the various Government departments that members of the armed forces feel that it is not too much to ask a Government employee to do a full day's work for a full day's pay. When we do see a group of employees giving that full day's measure of work and more without complaint, and efficiently operating their department of the Government at a profit, we should recognize such full day's work by giving them proper increases to make the full day's pay to which they are rightfully entitled.

Flood Threat and the Answer

EXTENSION OF REMARKS

OF

HON. OVERTON BROOKS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. BROOKS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Kansas City Star of April 18, 1945:

FLOOD THREAT AND THE ANSWER

Again the spring floods are threatening as they threatened last year and for many other springs through the decades of the past. The floods aren't so widespread, now, but this is only April. The big difference this year is the definite hope for the future.

The flood-control bill passed last December included the Army engineers' complete plan for harnessing the Missouri floodwaters. The series of great dams on the Missouri River and its tributaries, the long-awaited flood walls and levees are now in the accepted program of the United States Government. The Army engineers are already at work on the details. Vast basin-wide construction can start as soon as the war emergency ends. It won't help us this spring. There can't be much help by next spring. But it is good to feel that the tinkering years are over. The Federal Government has said complete flood protection is just a question of time to finish the war and then build. It is ready to start.

There is only one "if" in the picture. At the very time of another flood threat, the United States Senate is holding hearings on the Murray bill to repeal the part of the Flood Control Act that applies to the Missouri Basin. It would wipe out the plans the Army engineers have developed through years of study. It would stop all construction for another 2 years. It would set up a board of three men called the Missouri Valley Authority and let those men start over—from scratch. They could completely revise the Army engineer plan or throw it away.

Other issues aside, it strikes us this is a poor time for the sudden urge to an MVA. Through all the years the people of the valley were trying to get real flood control from Congress nothing was heard from the MVA advocates. Six or eight years ago they might have made good their claim for the method to cut through red tape and get action. But these groups, largely outside the Missouri valley, didn't seem to know of the existence of the river.

The people of the valley urged Congress, kicked, needled, and sat in congressional waiting rooms. They received a little here and a little there, but the great vision for the river was held back year after year. Nothing heard from the people who are now screaming for an MVA. Not a word.

Finally a Congress showed interest in action. A river plan big enough to conquer the floods came out of committee and was on its way to passage. The years of struggle approached their reward. Then, suddenly, out of the silence came the Political Action Committee and other groups from outside the valley shouting "Wait, wait! Hold everything. We have dreamed up something better, the one and only MVA. Let's start over."

But Congress did pass the flood-control bill. The United States accepted the challenge of the floods. The Government has a plan that is ready to start as soon as the war ends. A battle of several decades finally has been rewarded. It strikes us the MVA advocates are asking a lot when they suddenly suggest scrapping everything in favor of their vague theories. The way to stop the floods is to build against them.

Memorializing the Congress of the United States To Take Cognizance of the Inherent Right of the People of Poland, as Well as the People of Other Small Nations, To Determine the Form and Kind of Their Own Government

EXTENSION OF REMARKS

OF

HON. CHESTER E. MERROW

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. MERROW. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a copy of a concurrent resolution passed by the New Hampshire Legislature April 24, 1945, memorializing Congress to take whatever action it shall deem necessary in its deliberations to restore unto the people of all small nations all of their just rights and privileges:

Concurrent resolution memorializing the Congress of the United States to take cognizance of the inherent right of the people of Poland, as well as the people of other small nations, to determine the form and kind of their own government

Whereas the circumstances surrounding the disposition and placement of the territorial boundary lines of the Republic of Poland, and of other small European nations, as well as the manner in which the people of these small nations shall be permitted to determine the kind and form of their own government, give rise to serious concern as to whether the inherent rights of these peoples shall be safeguarded; and

Whereas all peoples throughout the entire world are fundamentally entitled to self-determination of the manner in which they shall be governed: Now, therefore, be it

Resolved by the senate and house of representatives in general court convened, That we look with concern upon conditions in Europe which presently are determining the location of the territorial boundary lines of the Republic of Poland, as well as those of other small nations, and, therefore, respectfully urge and petition the Congress of the United States to take official cognizance of the fact that the matter of terriorial boundary lines is of universal concern and a proper subject for determination as a result of conferences between the United Nations as a whole rather than as the result of the decision of a single member thereof and, further, that the matter of the form and kind of government to be enjoyed by any group of people is a matter for self-determination rather than by arbitrary decision of another government; and be it further

Resolved, That we respectfully urge and petition the Congress of the United States to take whatever action it shall deem necessary in its deliberations to restore unto the people of all small nations all of their just rights and privileges; and be it further

Resolved, That copies of these resolutions be sent by the secretary of state to the President of the United States, to the presiding officers of each branch of Congress and to the Members thereof from this State.

Charleston, W. Va., Airport

EXTENSION OF REMARKS

OF

HON. E. H. HEDRICK

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. HEDRICK. Mr. Speaker, there is included in H. R. 2603 an appropriation of $2,750,000 for the completion of an airport belonging to Kanawha County, W. Va., located near the city of Charleston, W. Va. This was inserted in the bill by the Senate Appropriations Committee for the following reasons:

In 1942, Rubber Reserve Corporation let a contract to Carbon Carbide Chemical Corporation for the erection and operation of a rubber plant. Carbon Carbide Chemical Corporation desired to erect the plant adjoining an existing plant of theirs in Charleston, W. Va., by reason of the fact that by so doing they could eliminate the need for a laboratory and could use their own laboratory personnel in the operation of the Federal plant. Mr. Jesse Jones, then Secretary of Commerce and head of the Rubber Reserve Corporation, quite rightly felt the proposal of this com-

pany was correct and would entail a large saving to the Government. The site on which they desired to erect the plant was part of the then Charleston, W. Va., airport and which was then in operation. Mr. Jones told the Charleston Chamber of Commerce and representatives in Congress that if they would let the airport be used for this purpose, he would guarantee the Government would build them another airport. At the time, he made this statement he, as Secretary of Commerce, was in charge of CAA and contemplated using WPA funds coupled with CAA allocations. After the airport had been rendered useless for flying, all funds for airfields were put under the control of the Army. The Army agreed that this was a strategic location but not suitable for a combat field and under their ruling the grading would take longer than the 1 year in which they must complete a field. Therefore, they declined to go ahead with it.

Kanawha County, W. Va., thereupon bonded themselves for $3,000,000; purchased a site which was the only suitable site to be obtained after losing the other one and started the construction of an airport. Under a promise from the Army that when they had it in condition so that 1 year's work would complete it, they would take it over if conditions in Europe had not changed. Thereupon, the county secured a contract at an extremely low figure for the grading, to wit, 47 cents a yard as again $1 a yard estimated by CAA, and started to work. If the funds in this appropriation are made available, it will save both the county and the Federal Government a considerable amount of money due to this extremely favorable contract. It will cause the Government to carry out the promise made by Mr. Jones when Secretary of Commerce and which was the consideration for surrendering of the Charleston airport, and it falls within the general rule of merging funds which is contemplated in the new appropriation for the construction of airports after the war in that Charleston will have been paying more than one-half contemplated in the other bill. In other words, $3 for every $2.75 furnished by the Government, and it will enable the entire southern half of the State to have an air service of which they have been deprived by reason of the using of the only available airport for the erection of a rubber plant.

Comments on Speech by Hon. James A. Farley

EXTENSION OF REMARKS

OF

HON. EDWARD J. HART

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. HART. Mr. Speaker, recently an important speech was delivered before the Junior Chamber of Commerce of Milwaukee, Wis., by Hon. James A. Farley, former Postmaster General and former Chairman of the Democratic National Committee. Like all Mr. Farley's speeches and comments it attracted wide attention.

I append herewith an editorial from the Jersey Observer of Hoboken, N. J., of April 21, 1945, containing interesting comments upon Mr. Farley's speech. The editorial follows:

"BORROWED TOTALITARIAN WAYS" SURE TO GO, DECLARES FARLEY

Former Postmaster General James A. Farley is certain to find widespread agreement to his proposal for "rapid and clean-cut relaxation of Government controls after the war." In a speech before the Milwaukee Junior Chamber of Commerce, he asserted that while we have all given up great measures of freedom to achieve victory, "we should let no one forget for a minute that we want those freedoms back, and that we intend to have them."

Nor was he speaking from the standpoint of one long and prominently connected with politics, but as one now identified with one of the largest business corporations of the Nation. "In borrowing totalitarian ways for the prosecution of the war, it was our aim to rid ourselves of them at the earliest possible moment," he declared, adding that it is his conviction that "once this war is over, Congress will take the lead in the speediest restoration of all the democratic processes."

Having achieved political eminence through his ability to sense popular sentiment, James A. Farley obviously retains this facility notwithstanding the transition from public office to private enterprise.

The Pony Claims

EXTENSION OF REMARKS

OF

HON. FRANCIS CASE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. CASE of South Dakota. Mr. Speaker, the Committee on Indian Affairs has favorably acted upon H. R. 378, a bill to carry out the provisions of the act of May 3, 1928, known to the Sioux Indians as the pony claims. The bill has been reported to the House with certain amendments recommended by the Secretary of the Interior and is No. 85 on the Consent Calendar.

At the time the bill was considered by the committee, the recommendations of the Secretary of the Interior were presented orally by representatives of the Office of Indian Affairs, his formal letter not having completed clearance. Consequently, the formal recommendations were not available to embody in the committee's report.

Subsequently, however, the Secretary's letter recommending enactment of the bill was received by the chairman of the committee, the gentleman from Washington [Mr. JACKSON], and that it may be available for the information of the Members, I place it in the RECORD at this time by permission of the House.

It will be noted that the letter has been cleared by the Bureau of the Budget:

THE SECRETARY OF THE INTERIOR,
Washington, D. C., March 30, 1945.

Hon. HENRY M. JACKSON,
Chairman, Committee on Indian Affairs, House of Representatives.

MY DEAR MR. JACKSON: Reference is made to the request of your committee for a report on H. R. 378, "A bill authorizing an appropriation to carry out the provisions of the act of May 3, 1928 (45 Stat. 484), and for other purposes."

I recommend enactment of the bill if amended as hereinafter suggested.

The act of May 3, 1928 (45 Stat. 484), authorized the Secretary of the Interior to investigate and determine the claims of individual Indians enrolled at the various Sioux agencies for the loss of personal property and failure to receive allotments of land to which they were entitled; to adjust any such claims found to be meritorious if possible under existing law, and in the absence of authority therefor to report such claims to Congress with appropriate recommendations.

All of the claims filed under the act of May 3, 1928, resulting from the failure to receive allotments have been adjudicated and settled heretofore by the allowance of 1,046 such claims aggregating the sum of $160,578.49, and the authorizing and making of appropriations for their payment. (See S. Rept. 347, 74th Cong., 1st sess., and the acts of June 14, 1935, 49 Stat. 340, and June 22, 1936, 49 Stat. 1757, 1764; see also H. Rept. 933, 75th Cong., 1st sess., and the acts of June 29, 1937, 50 Stat. 441, and August 25, 1937, 50 Stat. 755, 763).

The Sioux Indians began asserting claims for personal property losses in the latter part of the nineteenth century, and prior to the passage of the act of May 3, 1928, the Congress appropriated the aggregate sum of $416,260 in settlement of such claims. (See the acts of Mar. 2, 1889, 25 Stat. 833, 899; Jan. 19, 1891, 26 Stat. 720; Mar. 3, 1891, 26 Stat. 989, 1002; Mar. 3, 1903, 32 Stat. 1031, 1074; June 21, 1906, 34 Stat. 325, 374). The acts of March 2, 1889, and January 19, 1891, required the Indians to accept the payments made thereunder in full satisfaction for all personal property losses suffered by them, and in pursuance of this requirement the Indians expressly released all further claims or demands against the United States for such property losses. Despite these appropriations and the releases mentioned, the Indians continued to complain that they had not been fully compensated for property losses. (See S. Rept. No. 449, 62d Cong., 2d sess.) Their complaints led to the passage of the act of May 3, 1928, authorizing a general investigation of the losses.

Early in 1932 the claims for personal-property losses filed under the act of May 3, 1928, were adjudicated. Only an inconsiderable number were allowed, the balance of the claims being disallowed. A report thereon was made to the Congress on December 13, 1932 (S. Doc. No. 152, 72d Cong., 2d sess.), with the recommendation that $19,357 be appropriated to pay the claims allowed. This appropriation was authorized by the act of February 16, 1933 (47 Stat. 818), and made by the act of March 4, 1933 (47 Stat. 1602, 1609).

The attorneys for the claimants promptly filed objections to the disallowance of the claims by this Department and continued to object to the alleged injustice of the adjudication until on March 14, 1939, in a letter to Hon. FRANCIS CASE, House of Representatives, this Department agreed to a reexamination of the claims for personal-property losses. Over a period of almost 5 years a thorough and exhaustive study of all available information and evidence gleaned from all available sources was made in connection with the reexamination of these claims. The reexamination was completed and submitted to me by the Assistant Commissioner of Indian Affairs on September 1, 1944, and the conclusions and findings were approved on November 4, 1944. It was found that an additional sum of $101,630 should be awarded the claimants. As the report of the Assistant Commissioner of Indian Affairs, which is enclosed and made a part of this report, contains a detailed history of the claims, including the reasons for the reexamination thereof and the evidence bearing on the allowance

or disallowance of such claims, a restatement of the findings and recommendations is not needed here.

H. R. 378, which authorizes the appropriation of $101,630 for the payment of the awards referred to in the preceding paragraph, would, in my opinion, serve adequately the purpose intended if amended as hereinafter suggested. In lines 1 and 2 on page 2 the words "eliminate or modify awards where overlappings or duplications exist" should be substituted for the words "eliminate awards or such other modifications as he may deem necessary." Without this substitution the proviso beginning at line 11 on page 1 of the bill would authorize the Secretary to eliminate or modify any award. It is desired only to authorize the elimination or modification of such awards as may be found upon further examination in connection with the identification of claimants, or the determination of the heirs or devisees of deceased claimants, to be claims which previously have been satisfied in whole or in part.

There should be added to section 2 of the bill the following: "For this purpose an additional $10,000 is hereby authorized to be appropriated to remain available until expended." The losses for which awards are to be made occurred some 60 or more years ago. The claimants were adults at that time and the overwhelming majority of them are now deceased. It will be necessary, therefore, that the heirs or devisees of such deceased claimants be determined in order that payment can be made. This will be a task of such magnitude that it will be impossible for the regular staff of employees engaged in probating the estates of deceased Indians to cope with the situation and maintain their existing assignments. If the awards are promptly to reach the persons entitled to payment, it will be necessary to provide for the salary and expenses of an employee or employees whose efforts will be devoted exclusively to this task. It is estimated that $10,000 would be adequate for this purpose.

There should be added to the bill another section as follows:

"SEC. 3. Every claim or demand for payment of the individual awards made pursuant to said act of May 3, 1928, shall be forever barred unless such claim or demand shall be filed with the Office of Indian Affairs within 10 years after the date of the approval of this act. The Secretary of the Interior shall cause diligent investigation and inquiry to be made for the purpose of identifying all persons entitled to share in the distribution of any such award, including the heirs or devisees of deceased claimants. As soon as possible after the termination of the time allowed by this section, the Secretary shall certify to the Department of the Treasury the amounts of the individual awards made pursuant to said act of May 3, 1928, which remain unpaid by reason of no claim or demand having been filed, or by reason of the death of the claimant intestate and without heirs, or by reason of inability to identify any person entitled to receive distribution of the award. All amounts so certified shall revert to the United States and be covered into the surplus fund of the Treasury."

The inclusion in the bill of the foregoing provisions is deemed necessary in order to accord a degree of finality to all claims arising under the act of May 3, 1928. The records of this Department show that at the present time there remain unpaid and unclaimed balances of prior awards made under the act of May 3, 1928, in instances where a claimant or his heirs cannot be determined or identified. The evidence strongly indicates that such balances never will be claimed or paid. In view of the number of claimants to whom awards have been made and the fact that the overwhelming majority of such claimants are now deceased, it seems inconceivable that there will not be a number of instances in which the claimant died intestate without heirs or in which his heirs cannot now be identified. A period of 10 years would be sufficient time to ascertain if all persons or their heirs having an interest in the awards made can be determined or identified and the funds disbursed to them. The suggested amendment would permit the unpaid balance of all awards made under the act of May 3, 1928, which have been or may be found impossible of disbursement, to be returned to the United States Treasury, and would bring about the much-to-be-desired result of making completely final the adjudication and payment of all claims filed under the act of May 3, 1928.

The Bureau of the Budget has advised me that there is no objection to the submission of this report to your committee.

Sincerely yours,

ABE FORTAS,
Acting Secretary of the Interior.

Discussion of the Problem of Monopoly

EXTENSION OF REMARKS

OF

HON. JERRY VOORHIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. VOORHIS of California. Mr. Speaker, under unanimous consent, I include herewith in the RECORD the news release of the Cooperative League of the United States for April 6, 1945, in which is included an account of a forum discussion between Judge Thurman Arnold, Dr. Theodore J. Kreps, and myself before the Co-op Forum of the District of Columbia:

ARNOLD, VOORHIS, AND KREPS URGE CO-OPS TO MOBILIZE FOR ATTACK ON MONOPOLY—CO-OPS ESSENTIAL TO BLOCK MONOPOLIES AND CARTELS, ARNOLD TELLS NEW FORUM

(By John Carson, Washington representative, the Cooperative League)

WASHINGTON, D. C.—Judge Thurman Arnold, Congressman Jerry Voorhis, and Theodore J. Kreps, director of the Temporary National Economic Committee, joined this week in inaugurating the Co-op Forum of the District of Columbia and in challenging cooperative organizations and their member-owners throughout the United States to mobilize for an effective attack on monopoly.

Kreps, now associated with the Antitrust Division of the Department of Justice and generally recognized in Government circles as the ablest authority on monopolies, presented a program to the cooperatives for an attack on monopoly. But he called immediate attention to the patent monopolies and to the Voorhis antimonopoly patent bill, which is now before the House Committee on Judiciary. He described the bill as a "statesmanlike attack on one of the gravest evils in the monopoly system" and urged interest in the measure.

"We have an undeserved reputation in this country, probably because of our antitrust laws, that we are opposed to cartels and monopoly," said Kreps. "On the contrary, we favor cartels and monopoly more than does Great Britain. We should awaken to the realization that we cannot continue to accept monopoly and cartels without accepting the totalitarian state and without going the road that Germany traveled."

Arnold said that constant repetition is necessary to make the American people appreciate the menace to freedom that exists in monopoly. He referred to the downward spirals of the economy we have experienced, of the limitations on production, and of consequent unemployment. He also urged support for Voorhis bill.

"America cannot live without cooperatives," he said. "The cooperative movement is the answer to an age which demands decentralization."

VOORHIS explained that his bill was not a "drastic bill, at all." He said he merely provided that where a patent was used to violate the law, as part of a conspiracy or to aid monopoly, the Government should cancel the right of exclusive ownership of the patent and it would become available to anyone who might want to make use of it.

"I am not even providing that they cannot continue to use the patent," said VOORHIS. "I am just depriving them of their monopoly ownership of the patent. But they are fighting the proposal, nevertheless."

Kreps said that any sound attack on monopoly must provide for "a stable currency"; for a "free flow of capital into the undeveloped areas of the world"; for "reduction of trade barriers of all kinds"; for the placement of a "floor for standards of living." He told of how monopoly extorted $243 a pound for a metal which cost only $9 a pound, how the rubber cartel exploited labor and never "passed on a dollar to the native workers"; how the tin monopolists of Bolivia were not interested in any proposal to assist labor employed in the mines.

"We must develop consumer cooperatives, we must make every possible use of the antitrust laws, and we must develop the direct action method the Government has in the Tennessee Valley Authority," said Kreps. "There is no possibility of compromise on this issue of monopoly and cartels. Our cooperative organizations must become zealously interested in helping our people to understand that where monopoly and cartels exist there can be no freedom."

Arnold described how "obsolete investments" in business were protected through regulations which destroyed consuming power and referred particularly to the rate agreements of railroad companies, and now to the rate agreements of aviation companies. He insisted that those who declare for "free enterprise" and "the competitive system" could not consistently declare for protection of the obsolete investments in railroad properties.

"We are moving toward a free market and nothing can be done to stop it," said Arnold. "The cooperatives are leading the way to the free market. The technological developments are compelling decentralization and the cooperatives are the answer to an age which must compel decentralization."

VOORHIS explained how the United States Supreme Court had ruled recently that the Hartford Empire Co. had used more than 600 patents to create a monopoly over glassware production and how the consumer paid the bill. Despite that the Court agreed the company had violated the law and had used these "patent grants from the public" to injure the public, the Court declared nothing could be done to prevent the company from continuing to use the patents.

"Now and then we are hearing people talk about good cartels," said VOORHIS. "There is no such thing. You might as well talk about a benevolent despotism."

VOORHIS, who has been campaigning for 10 years to compel changes in the monetary system, agreed with Dr. Kreps that a stable currency must be had to prevent exploitation of the people by the money monopolists. He urged support for the Bretton Woods agreement although he opposed the proposal to tie currencies of all kinds to gold instead of to goods.

FEPC Bill Stymied

EXTENSION OF REMARKS
OF
HON. CHARLES M. LaFOLLETTE
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. LAFOLLETTE. Mr. Speaker, under leave to extend my remarks in the RECORD, I want to include an editorial appearing in the Washington Star on Sunday, April 29, 1945. The editorial is not only pertinent with reference to the situation of the present bill for a permanent FEPC, but also calls attention to the antidemocratic, potentially Fascist methods adopted by many so-called liberals in the Congress of the United States, which action makes it so difficult to sell progressive and liberal proposals to people of good will who are resentful of the tactics used by too many people who wear the badge of liberalism on their shirts to cover up the antidemocratic authoritarian philosophy which exists in their breasts.

FEPC BILL STYMIED

In presenting her petition to discharge the Rules Committee from further consideration of the fair-employment-practice bill, Representative NORTON is influenced by a perfectly legitimate desire to bring that controversial measure to a vote in the House.

This is by no means the first time that a congressional committee has sought—often with success—to kill a distasteful bill by the simple process of burying it. And the so-called liberals are just as ready to offend in this respect as the reactionaries. On several occasions, for example, the House has passed bills which were not to the liking of professional labor leaders and their friends in Congress. When these bills reached the Senate, they were sent to the Committee on Education and Labor, and there they died a quiet death in a convenient pigeonhole. This was the work of the liberals, who were afraid to let the bills come to a vote in the Senate. If they were aware of anything sinister and undemocratic in that technique, they were able to refrain from voicing a protect.

But now the shoe is on the other foot. The liberals are among the champions of the FEPC bill, and they are articulately resentful of the tactics which have been employed in the Rules Committee to prevent the measure from reaching the floor. In this they are inconsistent, of course. But, as it happens in this instance, they are also right.

The function of Congress is to face these controversial issues and vote on them. The Members ought not to shirk their responsibility by permitting a strategically placed committee to sidetrack a bill in which there is an extensive and legitimate public interest. The FEPC bill, if passed, would empower a governmental agency to forbid discrimination in employment. Many sincere opponents of economic discrimination have grave doubts as to the wisdom of this approach to the problem, and no such bill should be passed without the fullest consideration of all its implications and potentialities. But the FEPC bill cannot receive this consideration by the Members of Congress if it is to lie in a committee pigeonhole. It ought to be brought to the floor, where it can be opened to amendment, debated, and voted on.

Government Corporations

EXTENSION OF REMARKS
OF
HON. KARL M. LeCOMPTE
OF IOWA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. LECOMPTE. Mr. Speaker, the Creston (Iowa) News Advertiser, one of the best small dailies in the State of Iowa, long has advocated cutting governmental expenditures and being realistic about the financial situation of the country. In a timely editorial it applauds the Comptroller General's recent recommendation that the number of Federal corporations be drastically reduced and placed under the financial control of Congress. Under leave to extend my remarks in the RECORD, I include therein the editorial "Clean them all out," which appeared in the Creston News Advertiser of April 26, 1945:

CLEAN THEM ALL OUT

Lindsay C. Warren, Comptroller General of the United States, recently appeared before the senatorial Committee on Banking and Currency, and he had some things to say about our Federal corporations that will give some of the Washington bureaucrats the cold shivers. As one writer expressed it: What he said was in effect "give 'em the ax." He recommended that a brush ax or a meat cleaver be used to chop off the 101 Government corporations which now exist.

He was testifying in favor of the passage of a bill now before Congress which would bring all Government corporations under the financial control of Congress. He expressed the fear that "unless the present trend of creating Federal corporations is not checked, we will soon have a government by Government corporations." It amounts to asking that all the financial affairs of the Nation shall again be placed under the control of Congress. He would end this right to "spend as you see fit." He would end the authority of all subdivisions of Government to issue and sell bonds, and he would make all of them accountable for every dime they spent. In short, Mr. Warren would have the Nation return to a government by democracy.

Today, there are 101 Government corporations, which are largely independent of the authority of Congress, and can do pretty much as they please without having to render an account to anyone. Many of those corporations are overlapping; most of them handle large sums of money, and the Comptroller believes that "untold millions of dollars could be saved by cutting out most of these organizations." "Undoubtedly there would be," he said, "loud yelps and snarls as office-holders were forced off Uncle Sam's pay rolls, but the resulting saving would be enormous."

All newspaper readers will remember that time and again it has been announced impossible to give the exact amount of the public debt, because so many of these corporations could create debts on their own account and were not required to submit an accounting. The amount of Federal bonds sold to the public has at times been very indefinite because some of these Federal corporations were empowered to issue and sell bonds of their own, and no one who could tell, would announce the amount of business done.

Under Warren's plan of "giving these corporations the ax" and returning all financial authority to Congress—where it belongs—there would never be any uncertainty as to what the Nation had or what it owed. It would put a padlock on the Federal money drawer, and beyond all doubt he is right in saying it would save the taxpayers untold millions of dollars. Further, until this is done and the people again have control of the public money through their Representatives in Congress, we are not operating under a democratic form of government.

Prayer for the San Francisco Conference

EXTENSION OF REMARKS
OF
HON. JOSEPH E. TALBOT
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. TALBOT. Mr. Speaker, under leave to extend my remarks in the RECORD, I desire to include the following prayer for the San Francisco Conference, written by Gregory Lynch, an eighth-grade pupil at St. Francis Xavier School, Waterbury, Conn.:

PRAYER FOR THE SAN FRANCISCO CONFERENCE

I

O Lord, your attention! We beg if You please,
Never have times been as trying as these.
Our world is a turmoil of stress and of strife,
Never so low was the value on life.
Countless the souls that have gone home to Thee,
That You will reward them is our earnest plea.
Comfort their loved ones, teach them to know
In Your blessed home there is freedom from woe.

II

They're meeting, dear Lord, the men at the helm,
They're planning of peace to prevail o'er their realm.
O God, you can guide them as no mortal can,
Your foresight can penetrate far beyond man.
Make them heed Your direction, Your guidance so sure
And plan for a peace that will always endure.

Farm Draft Bill Veto

EXTENSION OF REMARKS
OF
HON. HENRY D. LARCADE, JR.
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. LARCADE. Mr. Speaker, under leave to extend my remarks under the above caption I do not do so for the purpose of defending my position, for I have been one of those who has consistently called to the attention of this Congress the importance and necessity of food production, not only for our armed forces but for the civilian population of our country and for the relief of the starving

peoples of Europe who are looking to America, and I have consequently, time and again, called to your attention the fact that Selective Service was putting pressure on all of the draft boards throughout the country to induct necessary and essential farm and dairy workers, notwithstanding the protest of the Members of Congress and the Senate, but in contravention of and in flagrant violation of the terms of the Tydings amendment enacted by the Congress in the year 1942.

Mr. Speaker, on the contrary, I desire to call to the attention of my colleagues of the minority who voted to sustain the veto of the President on the bill under discussion here today, the inconsistencies of their position, many of which have been covered in the remarks of those who were in favor of overriding the veto, and which it is not necessary for me to reiterate here.

One of the most unconvincing arguments made against the veto was that we were selecting one special group to favor, and it was made to appear by implication that deferments under the Tydings amendment to the Selective Service Act were sought to be extended to only a select group of registrants engaged in necessary and essential occupations connected with agriculture, which also includes dairying. Everyone who understands the law, and anyone who has observed the deferments of registrants under Selective Service, certainly know better.

As a matter of fact, the special committees appointed by this House to investigate the situation has brought to the attention of the House the deferments under Selective Service, and for those who are not informed, the reports of those committees are available, and I call particular attention to the reports of the committee headed by former Representative Costello which deals principally with employees engaged in governmental and Army and naval work.

In addition, the releases, although multifarious and confusing and contradictory, issued by Selective Service should also be available to those not informed. As an example, for the information of those who have charged that the agricultural workers under the Tydings amendment to the Selective Service Act, is in a select group, I include hereunder an article from the Associated Press released today by War Manpower Commissioner McNutt to the effect that 5,500 more key workers have been given draft deferments between the ages of 18 through 29 years of age. The published release is as follows, and is from the Washington Evening Star:

FIVE THOUSAND FIVE HUNDRED MORE KEY WORKERS GIVEN DRAFT DEFERMENTS

War Manpower Commissioner McNutt announced today that certifications have been issued for draft deferment of 5,500 more key workers 18 through 29 years of age.

This brings the total to about 353,000, or approximately 50 percent of the industrial workers in that age span.

The certifications were distributed as follows:

Agricultural Department, 1,000 deferments to take care of small employers engaged in food processing; Petroleum Administration for War, 2,000, and the Office of Defense Transportation, 2,500.

The authorizations were granted by the Government's Inter-Agency Committee, which announced it had rejected ODT's request for a blanket deferment of all transportation workers. Deferment for a high percentage of these workers had been approved previously.

Mr. Speaker, I could go on and on to expose the fallacy of some of the pleas made to gain support not to override this veto, but I respect the opinions of my colleagues on any question, and only take exception to some of the statements that I think are irrelevant to the issue, and reflect on the patriotism of our boys on the farms who are working day and night to produce the food so necessary to the successful prosecution of the war and to feed the citizens and our allies. Mr. Speaker, coming from a predominantly agricultural district, I know that this statement is unfair, for as a matter of fact, most of our young men from the farms have long since enlisted in the armed forces, and the few remaining would rather be on the front lines fighting, than remain on the farms, and it is only through remonstrance and necessity that all of them do not leave the farms unattended.

Mr. Speaker, I also take exception to the pleas of some of those who tried to make the issue Back up the Commander in Chief. This is a slogan of those who do not have any argument to substantiate their appeals, and it was brought out in this discussion that the present Commander in Chief—the President—while a Member of the Senate of the United States had been recorded as voting in favor of this question.

The only reason that I can ascribe to the change of attitude by the President is that he is trying to back up the departments, and I am disappointed to note that the President has likewise thrown his support to another agency, the Office of Price Administration, notwithstanding the flagrant maladministration and befuddling, high-handed, discriminatory and discourteous manner in which the same has been operated.

Mr. Speaker, the people of the United States are holding their elected representatives responsible for the conduct of the Government, and at this time when there is a critical food shortage in this country, it is up to us to use our judgment to do what is necessary to correct many programs which are being administered in a most unsatisfactory manner, and resulting in unnecessary confusion and suffering on the part of our citizens, and I for one, expect to do all in my power to bring about such changes as are necessary to correct the situation.

Mr. Speaker, in conclusion, I wish to say that no exception, in my opinion, should be taken by the President to this majority vote on this veto, for he was in favor of the bill when the same was presented to the Senate when he was a Member.

From the Shoulder

EXTENSION OF REMARKS

OF

HON. WIRT COURTNEY

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. COURTNEY. Mr. Speaker, under leave to extend my remarks, I include the following editorial from a recent issue of the Nashville Banner.

FROM THE SHOULDER

(By James G. Stahlman)

If somebody wants to throw a monkey wrench into the Truman machinery, which has started off so smoothly, the surest way to do that is to revive agitation for the passage of a bill setting up a permanent FEPC.

That would not just slow down the machinery; it would wreck it. Cogs and gears would fly, pistons would bend, cylinders would crack; the whole blooming thing would go plumb to pot so fast that Harry Truman wouldn't know what had happened until they started picking up the pieces.

The present FEPC has already caused enough trouble. A permanent one would be the last blow to national unity. I can't imagine anybody but a troublemaker who would want to disrupt the national spirit now so solidly unified behind the plain man from Missouri.

The President knows what a fight would be precipitated in the Senate alone. He knows the southern bloc isn't going to take another FEPC lying down. He knows the bitterness that would be engendered in another debate on the subject. He knows, as does anybody who cares to think about it, that racial discrimination can't be corrected by Federal statute, Federal snoopers, Federal police, Federal anything. Legislation and governmental browbeating will not cure that vexing problem.

There isn't any doubt but that there has been racial discrimination. Some of it has been malicious, some of it very deliberate, all of it very short-sighted. But no FEPC will rectify a situation that can be corrected only through enlightened opinion. An appreciation of the rights of the other fellow, a willingness to work together, and the desire and determination on the part of peoples of good will, regardless of creed or color, to live together in peace and concord. They are attitudes of the mind and heart that cannot be forced into human make-up by statute or by bayonet. Compulsion from any source propelled into the racial question means trouble and disaster.

The racial problem, so far as the South is concerned, will never be settled by somebody, especially somebody from the outside, trying to cram something down our gullets. We just won't take it that way. The South has its opinions on the question, some admittedly prejudiced, some highly unsound, some definitely un-American. But Federal statute isn't going to change any of that.

A permanent FEPC would irritate and aggravate. God knows, we neither need nor want any more irrigation or aggravation.

The racial problem will be solved when the leaders on both sides sit down and canvass the situation from top to bottom, looking at it as it is, not as zealots on either side think it should and will be. A spade should be a spade, and no tomfoolery about it.

The whole thing must and will be worked out in time, if those on both sides who want the problem solved are willing to bury intol-

erance, forget recklessly claimed privilege impossible of attainment, recognize the legitimate rights of others, and work in a spirit of compromise toward the elimination of those discriminatory irritants that have been and will continue to be detrimental to our national life and unity, until equitably adjusted in accordance with God's laws, not man-made statute.

So far the FEPC has not proved itself an agency of the Almighty. In permanent form it could easily become the agency of the devil. And there'd be hell to pay! No foolin'.

Common Justice Long Delayed

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. BROOKS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Union Postal Clerk:

SALARY ADJUSTMENT JUSTIFIED

More than 100 Members of Congress appeared before the Committee on Post Offices and Post Roads on March 27, 1945, to urge early, favorable action by that committee on legislation to give postal employees a well-earned and much-needed increase in their basic pay schedules. These representatives of the people of every section of the country were voicing the sentiments of their constituents as deduced from personal conversations and correspondence.

Most of those who appeared expressed their personal views, as well as the opinions of the public generally in their respective districts, and paid high tributes to the efficiency and dependability of Postal Service, made possible only by the loyal service of experienced and skilled workers who have been working under extremely difficult and trying conditions. Numerous comparisons were made between the conditions of workers in private industry who have secured increases in basic compensation rates, premium payments for overtime services, and numerous other concessions, through their exercise of organization collective bargaining and those of postal employees whose hope for adjustment of economic conditions to meet ever-changing standards rests with the Congress, through legislation.

Postal employees are grateful for the many public acknowledgments of their efficient and loyal service. They are heartened and encouraged by recognition of the effectiveness of their efforts. Their pride in the service they render and in the important part they play in the public welfare, especially their essential place in maintaining the morale of millions of members of the fighting forces and their families, is greatly increased.

However, postal employees do not enjoy exemption from the vicissitudes that beset other workers, increased costs of everything necessary to the maintenance of health and physical efficiency, increased taxes, additional taxes, and the proper participation in all fund drives for public purposes, including the purchase of War bonds. Words of encomium do not make a satisfactory substitute for equitable adjustment in pay.

No upward adjustment in the basic pay rates of post-office clerks have been made since January 1, 1925. In the meantime, during the depression years of the early 1930's, postal employees were not exempt from the effects and suffered reductions in pay and the loss of other benefits that amounted to as high as 28 percent for post-office clerks.

Since 1935 the cost of living and wages and salaries in private industry have climbed steadily, while postal wages have remained stationary. Official Government agencies have recognized the necessity of increasing wages by 15 percent over the rates in January 1941; rates that had been steadily climbing since 1935. The increase provided by the bill now before the House Post Office Committee (H. R. 2071), therefore, falls far short of the general increases in wages and salaries that have been given approval by official Government sanction.

The Congress authorized a temporary War bonus of $300 per year, effective May 1, 1943, and expiring June 30, 1945. H. R. 2071 provides, therefore, an increase of only $100 per year, for post-office clerks, for the succeeding fiscal year, an exceedingly modest increase in view of the fact that the Post Office Department realized the largest surplus in its history in the current fiscal year and an even larger surplus is estimated for the next fiscal year.

With over 50,000 postal employees now in the armed services, the regular employees have maintained regular and dependable service only through extra efforts and long hours of work, buoyed up by the pride of service and patriotic zeal that is inherent in postal employees. Relief from the hardships of greatly reduced purchasing power is common justice long delayed. It is also a necessity if the service efficiency is to be maintained. Prompt and favorable action by the Congress on H. R. 2071 is a measure of justice that should not be denied.

Gov. Walter E. Edge, of New Jersey, recently signed a memorial of the New Jersey Senate urging Congress to take early favorable action on this legislation. The resolution was introduced by Senator Herbert J. Pascoe, of Elizabeth, N. J. Governor Edge, then a United States Senator, introduced in the Senate a companion bill to the Kelly bill of the House and served as chairman of the joint committee that steered through the Congress the classification law of 1925.

Similar resolutions have been adopted by State legislative bodies in Arkansas, California, Colorado, and Michigan.

Belt-Tightening Is Not the Answer

EXTENSION OF REMARKS
OF
HON. GEORGE W. GILLIE
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. GILLIE. Mr. Speaker, it was with a great deal of interest that I read the report of Samuel I. Rosenman, special adviser and legal counsel to the late President Roosevelt, as it was submitted to President Truman on Monday, April 30. The report dealt with the civilian food supply situation. It stated simply that the people of the United States would have to pull their belts tighter so that the hungry and war-ridden people of liberated areas in northwestern Europe could eat.

Perhaps Mr. Rosenman's report is true. But, I believe, the American people will object to his statements. They do not believe that belt-tightening is the right answer to the problem. They are sympathetic toward the people of the world who face starvation. They want to help feed them. But they disagree with the reasoning that the people of this Nation must be denied food so that the world can be fed. This feeling is particularly true among the farmers in Indiana and the Midwest. They sternly disagree with the philosophy of scarcity. If administration spokesmen would stop talking about making the American people do with less, and provide the farmers and processors with a freer hand in food production, there would be no need of continually harping on the theory that America must go hungry so that the world can be fed.

The farmers in the Indiana district which I have the honor to represent, along with other midwesterners, would welcome a change in administrative policy in this respect. If the statement was made, that we need more food and must have it, and we will see to it that the farmer, dairyman, stockman, and processor gets the stuff to work with without tying his hands in endless red tape and restrictions, the food would be raised. From the standpoint of the producer as well as the consumer, the food and meat situation is in a mess. But if the philosophy of plenty was substituted for crop curtailment there would be no need of shortages. Give the farmer a chance. Get him more tractors and plows. Recalling a speech that Prime Minister Churchill made at the beginning of the war: "Give us the tools and we will finish the job," we can aptly apply it to our farmers here at home. See that the WPB permits sufficient steel to be diverted into farm equipment manufacturing. But, of course, not to the degree that it might impair the war effort. Although now in view of current information from the European war fronts, some broader diversion could be effected without interfering with production of supplies for the Pacific battles.

The farmer has gone along throughout the war years with no new equipment to speak of. He has been short of help. His 8-hour day has been 8 hours in the morning and 8 hours in the afternoon and evening. But he has not complained; he patriotically figured he was doing his bit along with the rest of the Americans. He has sown his grain with tractors and equipment bound together with bailing wire. His crop-harvesting machinery has been in the same broken-down and worn-out condition. Corn has rotted in the fields because last year and this spring there were not enough corn pickers or farm labor to do the job.

The fact that millions of dollars in surplus trucks and mechanical equipment are now being offered for sale through the RFC indicates that the production of some types of heavy machinery can be halted and the material used for it channeled into production to alleviate the farmers' shortages. It is not too late to get some of this machinery ready for this year's crops. But it will require action now. Poultry raisers and livestock producers also need encouragement and the assurance that the feed supply for their chicks and animals will be available.

Last year Congress voted a large appropriation to assure an adequate seed supply for this year's crops. But the farmer is not going to plant seed for harvest unless he feels sure that he can do the job. We all know this.

President Truman on May 2 terminated the duties and Office of Civilian Defense. Why not terminate or change some of the duties of those agencies affecting our food shortages, Mr. President, by the same action? Let's cut out or revise the regulations of the AAA, the OPA, and the WFA that furnish the red tape and overlapping restrictions on production and distribution which only perplex and interfere with the raising of an adequate food supply.

The Republican conference of the House of Representatives in a special session on food called by House Minority Leader JOSEPH W. MARTIN, Jr., of Massachusetts, has drafted and adopted a resolution seeking to correct the evils of the prevailing administration-controlled situation. The resolution is based upon a report of the Republican Congressional Food Study Committee, which for 2 years conducted an independent analysis of the food situation.

The resolution reads as follows:

Resolved by the Republican conference of the House of Representatives, That the President be urgently requested to take immediate and positive steps to relieve the present deplorable food situation, particularly with a view to preventing further and more serious consequences which are fast developing; be it further

Resolved, That in an earnest desire to be of assistance to the President in finding the right solution to this problem, we suggest to him:

First. That as authority and responsibility in the various aspects of food production, processing, allocation and distribution, price and rationing, are now divided among at least six agencies of Government—thereby generating conflicts of authority, confusion in administration, and uncertainty of results—the President immediately vest in one single agency full authority and responsibility for the production, distribution, and export, including price and rationing, of all food available to the United States.

Second. We suggest further that the President classify food production as an essential war industry and immediately instruct those Federal agencies concerned with manpower, transportation, storage, farm machinery, and fertilizer to so direct the activities of their respective agencies as to give special assistance to the production, processing, storage, and distribution of foods."

A bill has already been introduced in this session, similar to that introduced 2 years ago at the suggestion of the Republican Congressional Food Study Committee, which was reported favorably by the House Agriculture Committee of which I am a member, giving the President authority to create such a unified food administration.

Furthermore, the House Special Committee to Investigate Food Shortages has issued its report and recommendations which are as follows:

1. The Committee recommends that immediate steps be taken to give first priority to food production and that all possible measures be taken without delay to increase the production and supplies of those food items now in short supply, and that policies be initiated to provide adequate manpower and machinery for the farm.

2. The Committee respectfully recommends that the President immediately consider the problem of needed coordination of the entire food program. By that the Committee means the coordination of production, distribution, rationing, and pricing of food. Certainly such coordination of effort is the least the American people can ask or expect in the light of the stupendous requirements for food at home and abroad.

There must be action now. The price line is weakening. It must be held. Time is working on the side of scarcity, and if time is wasted and coordination not achieved, black markets will have cracked price control irreparably.

3. Fair and equitable margins should be established in every operation of the production, processing, and distribution of meat with special incentives for feeders of cattle to produce better and heavier beef, due consideration being given to the over-all feed situation.

4. The support prices on hogs should be increased to $13.50 per hundred on drove weight. In view of the fact that hogs have been selling at ceiling prices for many months, this should not cost the public a single dollar but should give needed confidence and encouragement to the hog producer.

5. Special inducements should be given to poultry and egg producers to increase their supplies of poultry and eggs, and to the fishing industry to increase the supply of fish as quick sources of protein food to supplement dwindling meat supplies.

6. In view of a tighter sugar market, special inducements should be given to sugar producers in this country and its Territories materially to increase their acreage immediately.

7. Storage facilities should be increased to keep pace with increased production.

8. Issue separate ration points for meat.

9. Rigid black-market controls must be applied, particularly at the source.

The farmer will raise the food and the processor will get it to the people of the world, if they get the green light. The United States has shown what it can do in supplying the mechanical weapons of war for the world—even under the myriad and confusing governmental regulations. The farmers, poultry raisers, dairymen, and livestock men will do an equally good job on the food supply, if they get the things they need to work with—seed, fertilizer, equipment, and manpower.

We must raise more food in the future if we are to feed the world. It is our biggest safeguard for a lasting peace. But the farmer cannot do the job with his hands tied.

The Treaty-Making Power

EXTENSION OF REMARKS

OF

HON. HOMER A. RAMEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. RAMEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the New York Times of May 3, 1945:

THE TREATY-MAKING POWER

When President Truman visited the House of Representatives on Monday he found it debating the proposed constitutional amendment offered by its Judiciary Committee to vest the power of approving or rejecting treaties in a simple majority of both the Senate and House instead of in a two-thirds majority of the Senate alone. This proposal is so important that it is disturbing to learn that soon after the debate began, there were only about seventy Members on the floor and not more than twenty when it ended.

Perhaps one reason for this apparent indifference is the feeling that regardless of what the House does in the matter the Senate will never consent to share its treaty powers. It is true that under our method of constitutional amendment it will be practically impossible to make the proposed change unless the Senate itself is willing to have it made. But passage of such a proposal by the House would serve definite notice that the House wishes to share in this power; and certainly, many Senators, regardless of their personal wishes or opinions, would not like to stand in the way of submitting the proposal to the people, which is all that an affirmative vote on their part need mean.

The historical reasons for adopting the present constitutional system of treaty approval have long ceased to exist. The present provision for treaty approval is both undemocratic and illogical. It is undemocratic because it permits a minority to block a majority in the making of peace. It is illogical because it permits a simple majority of the House and Senate to make war, while it requires two-thirds of the Senate to make peace. So far as the Senate is concerned, it is harder to make peace than to make war.

The arrangement is illogical also, moreover, in excluding the House from participation in treaty making. The House declares war chiefly for the purpose of achieving eventually a certain sort of peace; yet when the war has been won, the House has no say regarding the kind of peace made as a result of it. The situation is even more illogical than this. A treaty supersedes any existing domestic law that happens to be contrary to it. But this means that the Senate can by its own action repeal a domestic law regardless of the wishes of the House.

Finally, as Representative SUMNERS, chairman of the Judiciary Committee, points out: "This House, which has the initial power of appropriating money, is continually being called upon to exercise that function to implement treaties on which it has had no decision. It seems sound to me that we here, who have to appropriate the money, should have a voice in passing, in the first place, on the soundness or unsoundness of the agreement for which the money is asked." This means that it is not only unfair to exclude the House from participation in treaty approval but also unwise; for the House is likely to be much more willing to carry out a treaty which is has helped to approve than one in which it has had no voice.

The Recognition of Palestine as a Free and Democratic Jewish Commonwealth

EXTENSION OF REMARKS

OF

HON. EDWARD J. HART

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. HART. Mr. Speaker, under leave granted me to extend my remarks, I include herein a resolution adopted at a mass meeting held in Union City, N. J., on Monday, April 23 last.

The object of the meeting was to urge that the doors of Palestine be opened to Jewish refugees in Europe and that Palestine be recognized as a free and democratic Jewish commonwealth.

Many eminent speakers including clergymen of several denominations addressed the large and enthusiastic meeting.

The resolution follows:

Whereas the Conference of the United Nations is to assemble in San Francisco, Calif., April 25, 1945, to lay the foundations for a lasting peace and the reconstruction of civilization in war-ravaged and devastated lands.

We, the people of the several municipalities of North Hudson and Hoboken, N. J., assembled at a mass meeting of nearly 2,500 persons in the presence of notable guests and speakers do hereby resolve and pray:

1. That the Conference of the United Nations be blessed with tranquillity and order amidst good tidings;

2. That the spirit of truth and justice prevail amongst all their deliberations;

3. That amongst the patterns for a just and lasting peace, they embody in the preamble of the new charter of human freedom, an international bill of rights as contained in the American Bill of Rights and the unwritten customs and traditions of the best in every cultured, democratic society;

4. That full civil and political rights in Europe and elsewhere be restored to every individual and people and that all discriminatory laws and practices be abrogated;

5. That all property confiscated by the Germans from the Jews and other peoples be returned to the original owners;

6. That all people be helped as speedily as possible to be resettled and rehabilitated in their homes and lands;

7. That the doors of Palestine be opened at once to the hundreds of thousands of Jewish homeless, stateless and wanderers and that they aided to get there as speedily as possible, and

8. That the mandate for Palestine agreed to by the 52 nations of the world after the last war be reincorporated into a new mandates commission of any new international conference or league expressly and unequivocally, declaring and guaranteeing the immediate reconstitution of Palestine as a free and democratic Jewish commonwealth and facilitating the immediate establishment of a Jewish majority justly and legally with full respect to other minority rights as expressed in the Balfour declaration.

9. That full and complete retribution be according to war criminals and full and complete justice be done to all the victims of nazi-ism and fascism.

A Gentleman and Aristocrat

EXTENSION OF REMARKS

OF

HON. GEORGE F. ROGERS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. ROGERS of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by L. B. Skeffington of the Democrat and Chronicle, Rochester, N. Y., under date of April 14, 1945:

A GENTLEMAN AND ARISTOCRAT

(By L. B. Skeffington)

My closest contact with Franklin D. Roosevelt was some years ago when he seized my arm in a vise-like grip while he got his stance to make a speech. It was while he was Governor of New York and the place was Cayuga Lake State Park. He was making what he called his "annual inspection" in a trip across the State, accompanied by high State officials. The Governor traveled part of the way and made his headquarters on a canal yacht. Most of the other members of his party traveled by motorcar.

I was one of a number of newspaper reporters covering the tour. At the park pavilion the Governor was greeted with cheers. He walked forward slowly with the aid of a cane and leaning on a State trooper. The Governor backed against the edge of a platform, held my arm with his right hand for support while he waved with his left hand. Someone slid a chair forward. He turned it around in front of him and not until he was in a position to lean on its back did he release his powerful grip on me.

The one thing that impressed me most was the tremendous strength of his grip. Later I watched him, cane in left hand, right hand on rail, literally drag himself up a low ramp into the hotel of Seneca Falls. Most of the crowd watched his face and smile. I was fascinated as he dragged first one foot, then the other, and then advanced his hand along the rail. Years later I was to remember this when Mrs. Roosevelt told a small group at Cornell University that sheer willpower had carried the President through. She recalled that when he was stricken with infantile paralysis he would lie on a couch and massage his legs hour after hour. One day he shouted and she hurried in, thinking perhaps he had fallen off the couch.

"I got a wiggle out of one toe," he greeted her.

That night at Seneca Falls the toastmaster asked the Governor to introduce his fellow officials. He did. Then he paused. "Now my friends," he said, "I want to introduce you to my very good friend, the man who takes such good care of your Governor. Sergeant, stand up." A blushing, blond State policeman stood up. Later I asked the trooper if that was an act to win the plaudits of the crowd. "No, I don't think so," he replied. "He always is very kind and thoughtful toward the people who are close to him. Perhaps it is partly because he is dependent upon them, but I think it is because he instinctively is a gentleman and an aristocrat with a sense of noblesse oblige or something of that sort."

On one of his tours the Governor was to stay overnight at a home in the Finger Lakes region. Arriving and being greeted, he inquired about arrangements for housing his two troopers. Being told no arrangements had been made, he sat in his car until their comfort was provided for. Another time party bigwigs gave him a dinner at Geneva. The Governor inquired about his trooper aides and found they were left standing in front of the hotel. He went out into the lobby, called for them and escorted them into the dining room.

As Governor, F. D. R. was close to the farmers. Under the State government set-up then, the department of agriculture and markets, the council picked the State council of agriculture and markets. The council picked the commissioner and the department was outside of the Governor's realm. The council was Republican and there were those who said it had degenerated into a strictly partisan affair. Roosevelt created the Governor's agricultural advisory commission. To membership he invited heads of State farm organizations and others who apparently held more of the confidence of agriculture than the council.

For a number of years the governor's commission was an important body until finally the council was abolished and the commissioner of the department was appointed by and responsible to the governor.

His associates of those days recall that Roosevelt was a "driver." He asked a Cornell official to undertake a certain job and the latter pleaded ill health. The Governor came back: "What's the matter with you; look at me!"

About 30 years ago Farmer Roosevelt joined Chapel Corner's Grange in Dutchess County. Nearly 25 years later he reminded Louis J. Taber, then master of the National Grange, that he was about due for a Grange silver star, the 25-year emblem. There were visions of an elaborate ceremony of presentation at the White House, but F. D. R. chose to receive it at his home Grange hall, among his neighbors and fellow members.

It has been remarked that the President found it hard to say "no" to his friends. Previous to the last election he may have sensed that the sands of time might be running out for him. He must have faced the possibility that the next Vice President might have to take over. At best Henry Wallace was a controversial figure. The President apparently made a deal for the Vice Presidency, but he went all out for Wallace for Secretary of Commerce. Likewise under pressure of wartime needs, he stripped the Secretary of Agriculture of all power, but he did not have the heart to throw Claude Wickard out of the Cabinet.

Our Good Neighbor

EXTENSION OF REMARKS

OF

HON. JERRY VOORHIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. VOORHIS of California. Mr. Speaker, I take great pleasure in inserting in the RECORD with my remarks the following poem written by George Franklin Rinehart, of Glendora, Calif., regarding our late President:

OUR GOOD NEIGHBOR

(By George F. Rinehart)

The Captain of our Ship of State, in dying,
Left all the nations of the world in grief.
And when he passed, the caustic tongues of critics
And lying foes were stilled with guilty shame.
His extraordinary career, his rare accomplishments,
His courage in the face of adversity, his vision,
His indomitable spirit, his mental and moral strength,
His towering eminence, his unlimited resource—
All had won for him the admiration of mankind.

Compared with his superior merit, eulogy is empty,
Encomiums are futile and praise superfluous.
He was the one man who defied tradition and won.
He was one man who shattered precedent because
He had secured the confidence and love of those
That he had made secure in every human right.
His premature removal at this mometous time
Was somber tragedy, a said catastrophe—
One of the overwhelming calamities of war.

No man in all the world ever held more secure
The sublime affection, the loyalty and devotion
Of those he served with such distinction. Born
To a life of luxury and ease, he much preferred
To spend his life in service of the common man.
He chose the activities of the strenuous life,
Enduring the calumnies, indifference to slander,
Fighting gloriously for the rights of all mankind.

The high distinction of world leadership was his,
But with it all he never lost the common touch.
Amid the overwhelming burdens of his career
He dispensed most lavishly to friend and foe
His friendly handclasp, cheerful smile and charm.
He visioned new horizons and gave the homeland
The sheer enjoyment of the democratic life.
The vastness of his influence reached all lands,
Wherein his memory is cherished and revered.

His contribution to world security and peace
Was the grand climax to his unparalleled career—
The high distinction won by his supreme leadership
In the affairs of a turbulent and distracted world.
Wearied by his labors, he lay down to endless sleep—
The rest his splendid life and labor so deserved.
Our much beloved good neighbor left us as a legacy
A record that mankind is proud to laud and emulate.

Two-thirds Rule

EXTENSION OF REMARKS

OF

HON. HOMER A. RAMEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. RAMEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Washington Post of May 3, 1945:

TWO-THIRDS RULE

Hitler rendered one final disservice to the American people when his death was announced on the first day of a great debate in the House of Representatives. It is a pity that excitement over this event and the windup of the war in Europe overshadowed what Members of the House had to say, for they are grappling with a problem that has a direct bearing upon the feasibility of maintaining the peace that our armies are winning. Indeed, they are inaugurating the first essential change in our governmental machinery to make it possible for the United States to carry out its postwar obligations.

The total effect of the debate, both Tuesday and yesterday, was to build up a powerful case against retention of the two-thirds rule in treaty-making. The most effective summary, we think, was made by Representative GOSSETT in these words:

"The two-thirds rule was an historical accident written into the Constitution as a matter of political expediency.

"The two-thirds rule is unworkable, undemocratic, and denies the majority of the American people any real voice in foreign affairs.

"The two-thirds rule shackles this Nation in foreign affairs, and is a menace to world peace."

More sweeping and powerful, however, was the plea of Representative SUMNERS, chairman of the Judiciary Committee, who was speaking in behalf of his own resolution. His first inclination, he said, was to oppose amendment of the constitutional provision on treaty making. Study of the situation brought him to a different view for two reasons: (1) The House of Representatives ought to be participating in the great decisions on international policy that will so vitally affect the future of the American people. (2) The two-thirds rule is now out of harmony with the type of government we are trying to operate.

"We have reached the point," Mr. SUMNERS said, "where the necessity of the world has fixed it * * * that some sort of authoritative government is going to project itself * * * into that realm that lies between the governments of the world." We have no choice in the matter. A terrible new responsibility has come to the United States by reason of the times in which we live. We must meet that responsibility through the treaty-making power, and the decisions thus to be made are "not a thing to be left to one-third of the Senate plus one."

We do not see how the House, or the Senate, for that matter, can escape the logic of this conclusion. Opponents have stressed the great importance of treaty making—a field in which the Government operates virtually without constitutional restraints. But surely that only emphasizes the necessity of giving the House a voice in this sphere of policy making. The greatest danger to the Nation nowadays seems to arise, moreover, not from inept treaties but from a failure to exercise this vast power constructively in the cause of world peace. The inescapable fact is that the United States will not be able to take its rightful place in the organization to keep the peace now being set up at San Francisco unless it can exercise the treaty power free from a minority veto.

"Laws and institutions," said Jefferson, "must go hand in hand with the progress of the human mind." The House will be asked to do nothing more, when it votes today, than to recognize and act upon this simple, common-sense truth for the sake of preventing World War No. 3.

San Francisco and Beyond

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. MUNDT. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following speech delivered by Clarence K. Streit in New York City on April 13, 1945:

A dictatorship can secretly prepare alternative plans in the field of foreign policy, and swiftly swing over from white to black. A democratic government, however, cannot fall back on any alternative plan, however sound, that does not have public opinion behind it. In a democracy, such planning must originate among the citizens themselves. We need to take this responsibility more seriously than ever now, if our democracy is to survive in this hair-trigger age.

We need, too, some basic truth to guide us in our search for peace in the confusions of these days—a compass to tell us whether we are really heading toward peace. Federal Union is here to supply the compass, the alternative, and the basic truth we need.

HOW EVERY NATION HAS MADE A LASTING PEACE

Some say there is no possibility of peace—that with human nature what it is we are bound to have conflict, fighting, war. I agree we are bound to have conflict and fighting; but I don't agree we are bound to have war.

Certainly, if anything is inherent in human nature, conflict is. It breaks out in the best circumstances. Boy meets girl, they fall in love, they marry, but even that does not keep them from fighting. Between friends, between businessmen, between employers and workers, between labor unions, between and within churches, there is any amount of conflict. This city is shot through with conflict and fighting, so is this State and this whole country—and yet we have peace within the United States.

If all the rest of the world were to sink, and only the United States remained, there would then be world peace. But that would also be true if all nations should be obliterated except England, or France, or Russia, or any one nation. Peace is not only possible; it is so possible that every nation on earth has proved capable of establishing enduring peace within a territory where before there was intermittent war.

How did they do it? Always and only by doing one simple thing—by changing the unit of society within that area from sovereign bodies politic, such as tribes, city states, principalities, to individual persons—by reducing the unit of human conflict from a mass-to-mass fight down to the conflict easiest to govern, a man-to-man affair.

For war is not a conflict between two men, it is a fight between sovereign states composed of masses of men. When you melt men together to form this body politic and that body politic, you do not eliminate the danger of conflict inherent in the nature of every individual man in them. You merely make it worse by putting it on a nation-to-nation basis. So long as your world is composed of sovereign states, as its predominant units, there is bound to be war, no matter how peace-loving they are at the start, or how strongly they are leagued together.

EVEN UNITED STATES LEAGUE FAILED

Common sense tells us this, and experience backs it up. Among all the 60 regions of the earth today in which enduring peace has been established, there is none where this was done by joining sovereign states together in a league as we are trying to do on a world scale at San Francisco.

Attempt after attempt has been made to secure peace by organizing sovereign states instead of men as units, and always the result has been failure. This method was tried by the little city republics of ancient Greece more than 2,000 years ago. Their leagues were stronger and more advanced than the one planned at San Francisco. Yet, they failed to secure peace even on that little peninsula.

If this method could work, it surely should have worked among our original States. They tried it under the most advantageous circumstances. The League of Friendship they set up under our Articles of Confederation during the war of independence was more advanced than the League of Nations. It had the improvements that many believe could suffice to make the United Nations league succeed.

In this early American league, each State had its own army, its own currency, its own tariffs, but the 13 States allowed the League of Friendship an international force—the Continental Army. Each State had an equal vote in the league, but the league could act by a majority of 9 States in many things,

and the larger States had no special veto. This league was limited to only 13 States, whose people all spoke the same language, had the same Christian religion, the same economic system. All were democratic republics.

Yet, despite all these advantages, even this league failed. During its brief career there rose 11 territorial disputes among the 13 States, several of which threatened war. There were trade wars, boycotts. The league proved helpless and led to hard times, revolts, and dangers of war from outside. If a league could not work among these 13 peace-loving States, how can any reasonable person expect to gain peace merely by extending the same system to all the divergent nations of the world?

THE ESSENTIAL TRUTH OF FEDERAL UNION

The essential truth is plain: Insofar as the world is organized predominantly with sovereign bodies politic as the unit—whether they are called nations, states, city republics, tribes—the world is organized for war. So long as it is organized on this unit, so long as we seek to establish law in terms of states instead of persons, aggressor states, guilty nations, peace-loving nations, sovereign states—we cannot possibly eliminate either small wars or world wars, any more than we can eliminate theft, murder, or riots by organizing law with the individual person as unit. But where we do thus reduce inevitable human conflict to this individual unit, we do eliminate war. Insofar as we organize the world predominantly with the individual citizen as the unit, we shall get peace. There is the compass that Federal Union gives to guide you in these troubled days, the basic truth for which it stands.

HOW TO APPLY IT

How shall we transform the existing nation-to-nation relationship of war into the man-to-man relationship of peace?

It must be done either by force or by agreement. History tells us that nearly all the eras of peace we have in the world were formed by force—the stronger cave family conquering the others and building the tribe, the strong tribe conquering the others and building the city, state, or pretty kingdom, and so on up to the nations of today. The anarchy of sovereign bodies politic usually has been abolished by a conqueror—just as Hitler tried to abolish it—and we can be certain that if we fail to work this transformation by agreement, we shall soon be facing some new Hitler.

The outlook would be grim if there were no exception to the rule of force. But there are a few, and the most promising of all lies in our own history. When the league system failed the 13 States, they did not wait for war to engulf them. They sent their delegates to meet in convention in 1787. After long and arduous debates, they agreed on a constitution that shifted the basis of their organization from the 13 sovereign States to the sovereign citizens.

UNITED STATES CONSTITUTION POINTS WAY

It provided that the new United States Government should operate directly on the citizen unit, instead of on his State as a whole. It provided that the operations of this new Government should be determined and governed by the representatives of the citizens, chosen roughly on a basis of one citizen, one vote, instead of by the delegates of the State government, acting as a unit on the principle of one State, one vote. It provided, too, that the whole purpose of this new Government should be to secure the freedom and sovereignty and security of the citizens themselves, rather than the freedom and sovereignty of their State governments. You see, the Founding Fathers wrought an all-around transformation from the State to the person as unit.

To do this they had to solve two major problems that had hitherto baffled mankind, and seem to be baffling the nations today. One was the big State—little State problem. The big States feared the little States would dominate them if each State had an equal vote. The little States feared the more populous States would dominate them if representation were apportioned by population. The founding fathers solved it by giving the people of each State, small and large, equal representation in the Senate, and every citizen equal representation in the House.

The other problem rose from twin fears that the State governments might remain so powerful as to continue anarchy, and that the new inter-State government might be so strong as to be tyrannous. The founding fathers solved it by dividing the powers of government between the State governments on the one hand and the United States Government on the other. Where they all agreed the citizen would gain more by having the Union Government handle the job, they transferred that power from the States to it. Where they agreed the State could do the work better, they guaranteed that right to each State. In the end they shifted only 5 major powers from the States to the Union. But in so doing they abolished those 13 separate armies, currencies, and tariffs, set up 1 army, 1 currency, and 1 great free trading area under the Union, and gave the citizen of every State an additional citizenship, the one we all prize the most now, citizenship in the Union.

There in a nutshell is the Federal Union way to transform the relations between the people of sovereign nations from the State-to-State basis of war to the man-to-man basis of peace. Here in the United States we first proved that this difficult transformation could be wrought in peace, and that the Federal Union solution works.

WHAT OF SAN FRANCISCO?

How can we begin this transformation now between nations? It is only too clear that we cannot hope to begin it with all the United Nations at San Francisco. The plan that the great powers have already agreed to support there is based entirely on the state as unit. It does not transform, in the slightest degree, international relations from the nation-to-nation basis of war to the man-to-man basis that peace requires. It provides merely for another league of nations.

It is evident that only another league can come out of San Francisco. The basic problem there is to keep all the United Nations together. The larger the number and the more divergent the nations to be organized, the lower the common denominator must be. But this is no reason to reject this league as useless, or despair. We Federal Unionists hold that no matter how weak a league is organized at San Francisco, it should be supported, for any league is better than a return to isolationist diplomacy. Though it cannot possibly suffice to secure peace, it can help, and it can do much good.

We Federal Unionists have never believed the transformation from State to citizen that peace requires, could possibly begin among nations as divergent as the Big Three, let alone all the United Nations. We have always believed that it could begin only among a few nations, selected on the basis of common principle rather than of great armed power. Clearly the only governments that can be expected to consent freely to base their mutual relations on the citizen as unit are those in which the citizen already has the greatest power, those which not only operate down on the citizen but operate up from the citizen for his greater individual freedom, which aim to give him more power over government, and government less power over him—the nations, in short, that are most democratic in their principles and practice.

Federal Unionists have always recognized that the union of citizens which peace requires must first come up from the citizens themselves in those advanced democracies where they already are free enough to work for this, and in position to change the government's policy by changing the minds of the majority of their fellow citizens.

UNION WITHIN A LEAGUE

Consequently we Federal Unionists favor the common-sense, two-basket, practical policy of combining league and union, organizing a union where we can and a league where we can't, uniting some of the democracies within the league of United Nations in a nuclear union that can grow gradually into a world federal democracy.

We Federal Unionists warmly support the efforts of the United States Government to organize all the United Nations in a new league. We deem it particularly important that this league should include such great countries as Soviet Russia and China, with whom we hope thereby to improve our present friendly relations. We are ready to bow to the practical necessity of weakening the league machinery in order to keep all the United Nations together in it.

But the more the new league is weakened the more we must insist on the need of supplementing and strengthening it, and providing an alternative for the unhappy event that the league should quickly fail.

By uniting the democracies within it in a federal union we do not only definitely begin the change-over from the nation-to-nation basis of war to the man-to-man basis that peace requires, but we vastly improve the possibility of keeping the world at peace during the transition period needed for the nuclear union to grow to universal union.

Experience in the Western Hemisphere has shown that peace can be preserved fairly well even in a weak league if that league includes a colossal federal democracy. And luckily it happens that a few of the democracies can, by union now, make democracy the same colossal power for peace in the world league that it is already in the inter-American league.

WHAT THE CITIZEN CAN AND CANNOT DO

None of us private citizens can hope to get any of the foreign governments at San Francisco to accept the stronger league we want. We must leave that to our delegation there, and remember that the only way it can get all those governments to agree on any league at all is by weakening rather than by strengthening it.

But any citizen can help strengthen that league by working to supplement it with an international union of citizens that does not require the consent of all those governments—that requires only the consent of the majority of citizens in a few of the democracies where the citizen is freest, and first of all the consent of our fellow citizens here in the United States.

To work for peace in this way would seem to be the major duty of the citizen, especially in the present interlude while he waits for the results of San Francisco to reach the Senate.

That is the duty that the citizens who form our association, Federal Union, Inc., are trying to do. For our association aims to educate people in these basic principles of peace, and have an alternative plan prepared that is founded on truth.

We answer your question, "To what does enrollment in Federal Union really commit me?" by saying: "Only to the purpose for which this Federal Union was incorporated as a nonprofit membership association, namely, to promote education in the basic

principles of Federal Union as exemplified in the Constitution of the United States with a view to attaining world order by a Federal union of democratic peoples."

The sky is the limit to what you can do in the association, but by enrolling you are committed at bottom only to registering your name behind those principles and contributing at least $2 in dues to spread knowledge of them.

FEDERAL UNION PIONEERING

We realize that such educational work does not seem exciting to some people. They think it remote; they want something as immediate as the front page. They haven't time to ring their neighbor's doorbell—especially if they live in an apartment house—or send their old friends a book or pamphlet. They want the excitement of the final stages of a fight, the excitement of the band wagon.

But before they can climb aboard the band wagon some other people have got to provide the band wagon. There seems to be only one person in a hundred to whom this foundation work, this creative work, this pioneering work appeals more than does bandwagoneering. But there are such persons, and they are the ones we are seeking tonight, and every day.

Those who serve the truth of Federal Union must be prepared to serve it as did the men and women who got mankind to see every great truth that is common knowledge now. How can one expect to isolate and cure the germ of war except by the process by which the germ theory itself was established?

Surely everyone who knows in his heart a thing is true has the responsibility of helping spread that truth. Every one of us is benefited personally every day of our life by any number of truths that have come to our aid through men who first saw them boldly declaring them, and spreading them and staking even their lives, their fortunes, and their sacred honor—as Jefferson put it—to give these truths to the rest of us. What manner of man is he who will take all this truth from strangers, from men long since dead, and do nothing in his time to spread any truth to others, even to save his living friends and his own children?

There is no special virtue that I see in discovering a great truth by oneself—if that can really be—instead of from one's fellowmen. What good does it do for any man to discover any truth by himself if he cannot spread it to others? His truth lies dormant, until men who can spread knowledge and acceptance of it take it from him. There is as much merit in those who spread the truth, who make it known to the most of men, as in those who first stumble on it.

WHERE THE LIGHTS ARE STILL GOING OUT

In Federal Union you have in its early stage one of those great, world-changing truths whose rise forms the glory of our species. It is greater than the truth that germs invisible to the naked eye can cause disease—greater in this sense, at least: That it cures the worst of diseases, the one that the germ theory fails to reach, the one that makes men themselves the destroyers of men, turns man himself into a virus more hideous than any spirochete. This disease twice in 20 years has seized the whole species in its pestilential grip.

True, the lights are going on again all over Europe, but all over America now, in family after family, in heart after heart, the light is going out. They have already lost what was dearest to them in this war. And millions wait tonight in dread lest this fate be theirs, too. Let us remember that the joyful hour we dream of, when our boys come marching back victorious, will be the saddest of days for our brothers and our sisters whose boys will not return.

They need comfort, and surely the best comfort they can get is reason to hope that out of their sacrifice comes great and lasting good. On us, the living, rest the responsibility, whether the new chance these dead have given us shall be used to create something as great and enduring as the Americans of Jefferson's generation created, or whether our own dead shall have died merely to let us fritter and fumble and fool ourselves into a worse world war.

YOUR PRIVILEGE

You have the privilege of helping conquer this dread disease of war by enrolling behind this truth, the great truth of Federal Union.

Peace cannot possibly be had on a state-to-state basis; it can only be had by changing over to the free man-to-man basis that characterizes the American Federal Union. The sooner we each recognize this ourselves and get the majority to agree to begin this transformation, the sooner we shall have peace.

If you are not sure that this is true, you should study it more, and we have plenty of literature to help you. But there must be some of you who know in your heart that this is the truth. So long as you do not even acknowledge this truth by enrolling behind it, you are yourself holding back the spread of truth, blocking what your own conscience tells you is the road to peace.

If everyone listening to me, here in this hall and in the radio audience, who knows in his heart that this is the truth, would but act upon it now, would but sign his name to what he holds to be self-evident, would but tell the world by telling us, "I believe in the Federal Union principle and I will help spread its truth," how much more rapidly that truth would spread than if you stayed passive.

How easy it would be if only I could speak to you with the clarity of Thomas Jefferson, the logic of Alexander Hamilton, the authority of Abraham Lincoln.

If only I had the imagination of Dante to portray to you the hell toward which humanity is heading; the imagination of Shakespeare to bring before your eyes the unbelievably happy and abundant world we could enjoy through Federal Union. If only I had, just for tonight, the eloquence of the great Hebrew prophets to burn into your hearts this truth:

Beyond San Francisco lies chaos, slavery and war if you fail to work incessantly to supplement its league with Federal Union of the Free. But if you do achieve this there lies beyond San Francisco freedom, abundance, and peace such as man has never known.

If you can accept and act on that simple truth without needing a Jefferson to convince you, or a Hamilton, Lincoln, Dante, Shakespeare or Isaiah, well, then you have in your something better than the stuff that dreams are made on. You have in you the stuff that can turn dreams into reality.

Gap in Our German Policy

EXTENSION OF REMARKS

OF

HON. GEORGE E. OUTLAND

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. OUTLAND. Mr. Speaker, we have all been very much concerned about the problem of properly dealing with those responsible for the hideous atrocities committed by the Nazis. Unfortunately, we seem to have taken a step backward in this connection when Herbert Pell was dismissed from the Government service. In the judgment of many Americans, Mr. Pell was ideally qualified for his position on the War Crimes Commission and the reasons for his dismissal do not seem to be clear. As part of my extension of remarks, I would like to include the following admirable editorial by Marquis Childs in the Washington Post of May 2, 1945:

GAP IN OUR GERMAN POLICY

(By Marquis Childs)

The accusation brought against the State Department by Herbert Claiborne Pell deserves more consideration than it has received.

Part of the blame for the German atrocities that have so shocked the world Pell puts on the State Department. Coming from a former member of the War Crimes Commission, that is no mere shot in the dark.

Pell, a man of position and prestige, has a long European experience, including two important diplomatic posts. He speaks out of sober knowledge and a realization of the dangers inherent in a policy of drift.

As the American member of the War Crimes Commission, Pell worked with representatives of our allies to define war crimes and to fix adequate punishment. The Commission in London did a thorough job. Aware of the awful threat to millions of human beings at the mercy of the Nazis, the group provided penalties ranging from imprisonment up to death for a series of crimes.

The Commission itself, of course, did not have the power to put out this international criminal code in behalf of the nations represented on the Commission. What it could and did do was to recommend that the various foreign offices take over at this point and inform the world that war criminals would be punished in terms of a code agreed upon by the Allies.

But nothing happened. The Foreign Office in London and the State Department in Washington sat on the recommendations.

Pell returned to America in an effort to get action. It was already very late, since clearly the Germans would become more brutal as they became more fearful of their position in Europe. A tottering dictatorship is always more cruel than one that is securely entrenched.

From the late President Roosevelt, Pell received every assurance of support. In the face of this assurance, he was told at the State Department that he was to be dropped from the Commission because Congress would not appropriate $30,000 for its work.

At about the same time the British member of the Commission, Sir Cecil Hurst, resigned. He had no more success than Pell in persuading the Foreign Office to accept the Commission's recommendations.

So nothing was done. Notice was not served on the enemy that the guilty would be punished.

Of course, this would not have prevented the holocaust of brutality that has swept Germany. But Pell says, and with good reason, that many individuals might have been deterred from acts of mass savagery if they had been informed that it meant certain death. As it was, the Nazis knew that the individual governments had failed to act on the recommendations of the War Crimes Commission.

This failure leaves a serious gap in our German policy. There is an embarrassing zone of doubt at the moment when our military commanders should proceed under agreed-upon rules.

It might be necessary to pass sentence on a half million or more men, possibly all of the Gestapo, together with the S. S. But how much better to be able to fix the guilt and assess the punishment: That would make the approach to the jungle of Germany today so much simpler.

Pell points to the contrast with Russia. The Russians, never so naive as to talk about a hard or soft peace, have acted on a clearly defined code which has already brought many German criminals to trial and punishment. Having established the Free German Committee and drawn the line between criminals and noncriminals, they are going ahead on a policy that makes sense.

Naturally that impresses the people of liberated countries. If Soviet retribution is swift and sure while we continue to waver, then, as Pell points out, tortured Europeans will chalk up another score for Russian realism.

Is it any wonder that German soldiers and civilians came flocking to our lines to try to surrender? Quite apart from Goebbels' propaganda against Russia, the Nazis have never heard anything from us about punishment.

Flood Wall at Ceredo and Kenova, W. Va.

EXTENSION OF REMARKS

OF

HON. HUBERT S. ELLIS

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. ELLIS. Mr. Speaker, some weeks ago I made reference to the flood condition in the Ohio Valley and to the protection afforded by the flood wall which protected my home town of Huntington, W. Va., from any damage whatsoever.

Today, I wish to inform the House about two thriving communities just west of Huntington at the confluence of the Ohio and Big Sandy Rivers. Here is located Ceredo and Kenova, W. Va., two progressive communities important in the manufacture of cement, glass, lumber products, and as a railroad center. These communities are served by the great Ohio River, the C. & O. Railway, the Norfolk & Western Railway, and the B. &. O. Railway, and more coal passes this point annually than any other place in the world.

These communities were also safe and dry under the protection of a flood wall constructed through the efforts of an industrious people, and I think you will find that the flood wall at Ceredo and Kenova was constructed at a greater per capita cost than other walls in this section of the country.

During the recent flood crisis no manhours were lost, no property was damaged, and all trains proceeded on regular schedule.

Broadcast of Fulton Lewis, Jr.

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. McCORMACK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following broadcast of Fulton Lewis, Jr., Wednesday, May 2, 1945:

In Congress the Special Investigating Committee of the House of Representatives, headed by Representative CLINTON ANDERSON, of New Mexico, made public its first report on the meat crisis of the Nation, and I have been reading congressional committee reports for upward of 25 years, but this one is without question, I think, the best job I have ever seen done. For simplicity, for the complete and over-all and thoroughly competent grasp that this committee has achieved on this tremendously complicated situation, it is a masterpiece. It goes to the very heart of the whole problem. It analyzes and explains in everyday nontechnical language exactly what has been wrong and why and how the black markets have developed, and then it offers 10 simple suggestions by way of a cure.

If you want a complete and perfect picture of what has happened to the meat supplies of the Nation, and what has been the cause, and how it has happened, and if you want it told in language that a child can understand (it's beautifully written by the way) by all means get this report. It's only 17 pages long. There's no charge for it. Simply write to the office of Representative CLINTON P. ANDERSON, of New Mexico, House Office Building, Washington, D. C., and ask for the report on the meat investigation. It will be sent to you at Government expense.

This report is unanimous. It is signed by all seven members of the investigating committee—Chairman ANDERSON, Representatives STEPHEN PACE of Georgia, EARLE CLEMENTS of Kentucky, MARTIN GORSKI of Illinois, AUGUST ANDRESEN of Minnesota, CHRISTIAN HERTER of Massachusetts, and HAL HOLMES of Washington. The only disagreement of any kind is in one of the recommendations. That recommendation was as follows:

The committee respectfully recommends that the President immediately consider the problem of needed coordination of the entire food program, and by that the committee means the coordination of production, distribution, rationing, and pricing of food. Certainly such coordination of effort is the least the American people can ask or expect, in the light of the stupendous requirements for food at home and abroad.

There must be action now. The price line is weakening. It must be held. Time is working on the side of scarcity, and if time is wasted and coordination not achieved, black markets will have cracked price control irreparably.

The only disagreement was that the three Republican members wanted to add to that the specific recommendation:

"In order to secure such coordination and cooperation, we respectfully suggest that the President place a single authority in charge of all phases of the food program."

The Democrats would not subscribe to that, and perhaps it makes no difference because the results are what are important. This morning at the White House this entire committee consulted at great length with the President, laying their findings before him. Members who were present told me the President was deeply impressed and that he gave the clear indication that he will act according to the recommendations. He indicated, however, that this is one job in which he personally intends to take a hand and do the coordinating, and if that is the case, that's all that's necessary to bring an end to the conflicts and the cross purposes and the lack of cooperation between the various agencies involved in the food picture, which has been one of the greatest contributing factors in the present difficulties.

This report not only tells what has happened to produce the meat crisis and the mistakes that have been made, but it goes into fundamentals and explains that there are two parts of the problem. One is the rationing and price control over the meat we have on hand. The other is producing more meat to come closer to securing the demand. It's the shortage of supply as compared with public demand for the product that produces black markets and the more you can reduce that gap between the two the more you weaken the forces that make the black market. The report says, as you may have heard before, if beef is to be produced in greater quantities for the relief of the present shortage it must be made profitable to fattened cattle in the feed lots because that is where beef is made. In the opinion of the committee, it is not profitable to do so now.

Now, I'm sorry it's impossible to read it to you but as I say you can get a complete copy absolutely free by writing to Representative CLINTON P. ANDERSON, of New Mexico, House Office Building, Washington, D. C. Simply ask for the meat-investigation report. It's very easy and interesting reading. Not long and one of the best jobs any investigation committee of Congress has ever done.

Farm Machinery

REMARKS

OF

HON. JOHN W. FLANNAGAN, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. FLANNAGAN. Mr. Speaker, I am happy to report that we are making real progress in working out a program that will actually get surplus machinery that can be used on the farm back to the farmers.

I want to congratulate Secretary Wallace on the way he has cooperated since entering the picture. I know the interest of the farmers is now in safe hands.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include therein a letter from N. E. Dodd, Chief, Agricultural Adjustment Agency, dated May 1, 1945; copy of Surplus Property Board Regulation No. 3; letter from Mr. Dodd of May 2, 1945; and statement on the operation of the surplus truck disposal program as it would affect the farmers.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The documents referred to follow:

UNITED STATES
DEPARTMENT OF AGRICULTURE,
AGRICULTURAL ADJUSTMENT AGENCY,
Washington, D. C., May 1, 1945.

Hon. JOHN W. FLANNAGAN, Jr.,
Chairman, Committee on Agriculture,
House of Representatives.

DEAR MR. FLANNAGAN: Attached is a copy of Surplus Property Board Regulation 3, Dispositions of Surplus Property in Rural Areas and to Farmers. This regulation has been approved by the Administrator of the Surplus Property Board, the War Food Administrator, and me.

Regulation 3 is broad enough to accomplish the objectives of section 17 of the Surplus Property Act of 1944. There are two points which are not given specific consideration in the regulation, but which this

Agency believes are necessary to the successful operation of any disposal program on surplus trucks. The first point is that of establishing a fixed price on each truck offered for sale by the disposal agency; the second point is that of establishing O. P. A. ceiling prices which will reflect actual services rendered by the dealer, plus a reasonable margin of profit.

With reference to the first point, the Department of Commerce states it does not have sufficient information or personnel at this time to do a satisfactory job on establishing fixed selling prices. Both the Department of Commerce and the Surplus Property Board have stated that as soon as the required information and personnel are available, steps will be taken toward establishment of fixed prices on all trucks to be sold. With reference to the second point, the Surplus Property Board and the Department of Commerce have advised this Agency that they will do everything possible to assist in working out with O. P. A. satisfactory ceiling prices on surplus trucks. This Agency has recommended to O. P. A. that ceiling prices on surplus trucks be determined in a manner similar to that contained in MPR-133 for farm machinery.

I will endeavor to keep you advised from time to time on the operation of the surplus disposal programs directly affecting agriculture.

Sincerely yours,

N. E. DODD, *Chief.*

TITLE 32—NATIONAL DEFENSE

CHAPTER XXIII—SURPLUS PROPERTY BOARD

[S. P. B. Regulation 3]

Part 8303. *Dispositions of surplus property in rural areas and to farmers*

SEC. 8303.1. Definitions: (a) "Board" means the Surplus Property Board.

(b) "Farmer" means an individual, firm, or corporation chiefly engaged in farming or tillage of the soil, in dairy farming, or in the production of poultry, livestock, or poultry or livestock products in their unmanufactured state.

(c) "Farmers' cooperative association" means any association in which farmers act together in processing, preparing for market, handling, or marketing farm products, and any association in which farmers act together in purchasing, testing, grading, processing, distributing, or furnishing farm supplies; provided, however, that any such association is operated for the mutual benefit of the members thereof as such producers or purchasers.

(d) "Surplus property" means any property which has been determined to be surplus to the needs and responsibilities of the owning agency in accordance with the Surplus Property Act of 1944.

(e) "War Food Administrator" means the War Food Administrator or his successor.

SEC. 8303.2. Limitation of application: This regulation shall apply only to disposals of surplus personal property made by disposal agencies within the continental United States, its territories and possessions.

SEC. 8303.3. Diversion of surplus property into rural areas. (a) General duty of disposal agencies: Disposal agencies shall adopt all reasonable measures to cause appropriate quantities of surplus property to be sold or channeled into rural areas so that farmers and farmers' cooperative associations will be accorded opportunity to purchase which is equal to that accorded buyers having no priority under the Surplus Property Act of 1944. In discharging this duty disposal agencies shall consult with the War Food Administrator.

(b) Allocation and disposal of surplus property having general farm use. In carrying out the foregoing policy disposal agencies shall, after satisfying all priorities as provided in the Surplus Property Act of 1944 and regulations of the Board thereunder, sell in rural areas or for distribution in rural areas such quantities of the types of property listed in exhibit A as may under the circumstances appear reasonably necessary or appropriate to assure the utilization of the agricultural resources of such areas. Periodically, but at intervals of not to exceed 60 days, commencing with the effective date of this regulation, each disposal agency shall advise the War Food Administrator of the quantities on hand of the types of property listed in exhibit A, and the States or regions in which such property is located. The War Food Administrator will from time to time advise the disposal agencies of the quantities of such property which he finds should be channeled to rural areas to assure the utilization of the agricultural resources of such areas, and the disposal agencies shall be guided accordingly. If the efforts of the disposal agency demonstrate that the quantities thus assigned for rural areas will not be so absorbed, such quantities may be disposed of in any other manner authorized under the act.

(c) Methods of disposal. The appropriate quantities to be channeled into rural areas under paragraphs (a) and (b) of this section shall be disposed of as follows:

(1) To distributors, dealers, wholesalers, farmers' cooperative associations, or retailers who customarily distribute in rural areas and certify that the surpluses being purchased will be so distributed, or

(2) Through community auctions which are certified by the War Food Administrator as serving rural areas, or

(3) By a combination of the methods stated in subparagraphs (1) and (2) of this paragraph, or

(4) By any other method or methods, reasonably calculated to effectuate disposal in rural areas, as may be agreed upon by the disposal agency and the War Food Administrator and approved by the Board.

Disposal agencies may, notwithstanding the foregoing provisions, distribute new trucks and new farm machinery directly to farmers if they shall find that it is in the public interest to make such disposal.

SEC. 8303.4. Surplus trucks, machinery, and equipment needed to prevent impairment or threatened impairment of farm production. (a) Duty of disposal agencies: Reasonable quantities of surplus trucks, machinery, and equipment shall be made available for disposal in rural areas to farmers and farmers' cooperative associations whenever a shortage of such items impairs or threatens to impair farm production. Such reasonable quantities shall be determined by the Board from time to time as provided in paragraph (b) of this section. Upon such determination the disposal agencies shall promptly take such action as may be necessary or appropriate to make such property immediately available for sale in rural areas to farmers and farmers' cooperative associations.

(b) Allocation orders; certificates of War Food Administrator: If the War Food Administrator shall find that farm production is impaired or is threatened to be impaired in any area by a shortage of trucks, machinery or equipment, he shall submit a certificate to the Board stating that he finds such impairment or threatened impairment of farm production to exist in a specifically named area by a shortage of specifically described types of trucks, machinery, or equipment and setting forth the quantities of each type of such property which constitute a reasonable portion of the existing total surplus supply thereof to be made available in such area to aid in relieving such impairment or threatened impairment of farm production. In order to assist the War Food Administrator in the preparation of such certificates, disposal agencies shall promptly on his request advise him of the total surplus supply of such trucks, machinery, and equipment as he may specify and the States or regions where they are located. Upon receipt of any such certificate of the War Food Administrator the Board will determine the types and quantities of such property to be made available as provided in paragraph (a) of this section, taking into consideration such certificate and any other pertinent evidence, and will publish its determination by an order under this regulation.

(c) Methods of disposal: The types and quantities of property designated in such orders under this regulation shall be disposed of:

(1) To regular retail dealers and farmers' cooperative associations which are dealers, provided that they represent and agree that they will sell the property purchased only to farmers or farmers' cooperative associations located in the areas specified in such orders, and that, in the case of trucks, the property will be sold only to farmers or farmers' cooperative associations located in such areas that hold certificates issued by the Agricultural Adjustment Agency; or

(2) By any other method or methods, reasonably calculated to effectuate disposal in rural areas, as may be agreed upon by the disposal agency and the Agricultural Adjustment Agency and approved by the Board.

Disposal agencies may, notwithstanding the foregoing provisions, distribute new trucks and new farm machinery directly to farmers if they shall find that it is in the public interest to make such disposal.

SEC. 8303.5. Violations by dealers: Any person who shall make a false representation or who shall be found to have defaulted on any undertaking or promise required by this regulation, shall thereupon be disqualified to acquire any surplus property disposed of under this regulation.

SEC. 8303.6. Regulations and reports to be filed with the Board: Copies of all regulations, orders, agreements, and instructions of general applicability issued by any agency in furtherance of this regulation shall be filed by such agency with the Board. Within 60 days after the effective date of this regulation and thereafter at intervals of not more than 60 days, each disposal agency shall file with the Board a report of sales made pursuant to section 8303.3 hereof. Reports of sales made pursuant to section 8303.4 and any order issued thereunder shall be filed with the Board by each disposal agency within 60 days after the promulgation of such order and thereafter at intervals of not more than 30 days until the repeal of such order; final reports shall be filed with the Board within 60 days after such repeal.

SEC. 8303.7. Regulations of other agencies: All disposals under this regulation shall be subject to applicable regulations of the War Production Board, the Office of Price Administration, and the Office of Defense Transportation.

SEC. 8303.8. Amendment or repeal: This regulation and any order under it shall be subject to amendment or repeal by the Board by any regulation or order of the Board duly published in the Federal Register.

This regulation shall become effective June 1, 1945.

SURPLUS PROPERTY BOARD,
A. E. HOWSE, *Administrator.*
April 25, 1945.

Approved and concurred in,

MARVIN JONES,
War Food Administrator.
April 30, 1945.

NORRIS E. DODD,
Chief, Agricultural Adjustment Agency.
April 28, 1945.

EXHIBIT A TO SPB REGULATION NO. 3

TYPES OF PROPERTY TO BE CHANNELED INTO RURAL AREAS

1. Farm construction materials: Lumber and lumber substitutes, shingles and other roofing materials, lath, paint, varnish.

2. Merchant trade products: Barbed and twisted wire, drawn wire, wire bale ties, wire nails and staples, woven and welded wire

fence, pipe (cashing, line, standard, etc.), reinforced mesh and wire netting, formed roofing and siding, fence posts.

3. Hand tools.

A. Farm and garden tools: Forks, hoes, mattocks, picks, post hole diggers, rakes, scrapers, shovels.

B. Mechanic hand-tools: Wrenches (all types), pliers, vises, belt cutters, pipe stocks and dies.

C. Carpenters and edge tools: Axes, adzes, hammers, wrecking bars, saws, chisels.

4. Cordage: Rope, binder twine, tobacco twine, wool twine.

5. Electrical equipment: Motors adaptable for farm use, electric wiring and supplies.

6. Miscellaneous supplies: Harness and harness hardware, chains.

UNITED STATES
DEPARTMENT OF AGRICULTURE,
AGRICULTURAL ADJUSTMENT AGENCY,
Washington, D. C., May 2, 1945.

Hon. JOHN W. FLANNAGAN, Jr.,
Chairman, Committee on Agriculture,
House of Representatives.

DEAR MR. FLANNAGAN: This morning, while in your office, we agreed to furnish you with a statement on the operation of the surplus truck disposal program as it would affect farmers and farmers' cooperatives. We are attaching a copy of such a statement, and have also included in the statement the operational procedure that will be followed in disposing of surplus farm machinery and equipment, and all other farm supplies.

If we can furnish you with any further information, please advise me.

Sincerely yours,

N. E. DODD, *Chief.*

STATEMENT ON OPERATION OF SURPLUS DISPOSAL PROGRAMS UNDER SURPLUS PROPERTY BOARD REGULATION 3

BASIS OF THE REGULATION: SURPLUS PROPERTY ACT OF 1944, SECTION 17

The Surplus Property Board Regulation 3, effective June 1, 1945, and signed by Mr. A. E. Howse, Administrator, Surplus Property Board, and approved and concurred in by Mr. Marvin Jones, War Food Administrator, and Mr. Norris E. Dodd, Chief, Agricultural Adjustment Agency, sets forth provisions under which surplus trucks will be made available to farmers and farmers' cooperative associations.

The War Food Administrator determines the areas where shortages of trucks cause impairment or threatened impairment of farm production. After such a determination is made, it will be reported to the Surplus Property Board, which will determine the portion of available trucks to be sold to farmers and farmers' cooperative associations in the reported areas. The Surplus Property Board will then issue an order requiring the Department of Commerce to make the specified number of trucks immediately available, ahead of all other priority buyers, for sale in rural areas to farmers and farmers' cooperative associations.

Trucks so set aside will be sold to those regular retail dealers who agree that they will sell the trucks purchased only to farmers and farmers' cooperative associations located in areas specified in the order, and that the trucks will be sold only to those farmers and farmers' cooperative associations who hold certificates issued by the Agricultural Adjustment Agency. After a dealer purchases trucks he will notify the proper county A. A. A. committee of the number and description of the trucks he has for sale to holders of A. A. A. certificates. The dealer will then be advised of the farmers and farmers' cooperative associations holding A. A. A. certificates. Reports giving the name and address of each purchaser will be procured from the dealers.

The above procedure also applies to farm machinery and equipment, except that A. A. A. certificates will not be issued to the user. However, as in the case of trucks, dealers purchasing farm machinery and equipment set aside by order of the Surplus Property Board for agricultural use must agree to sell only to farmers and farmers' cooperative associations.

Regulation 3 also contains provisions which will cause appropriate quantities of all surplus properties to be sold or channeled into rural areas, so that farmers and farmers' cooperative associations will be accorded an opportunity to purchase which is equal to that accorded buyers having no priority under the Surplus Property Act of 1944. Disposal agencies are directed to consult with the War Food Administrator in carrying out this part of the regulation.

Farm Production

EXTENSION OF REMARKS
OF

HON. CHARLES R. CLASON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. CLASON. Mr. Speaker, last year I presented to the Members of Congress a summary of the great contribution to the agricultural effort of the United States in wartime by farmers living in Hampden and Hampshire Counties of Massachusetts. I have now had brought to my attention a summary furnished to me by S. R. Parker, administrative officer of the Agricultural Adjustment Agency, to whom I wrote asking for information.

At a time when the food shortage in the United States is becoming critical and when distribution problems have become even more critical, it is interesting to note to what extent the farmers in the various congressional districts of the United States are endeavoring to meet the food problems of the people living in the area where their farms are located. Since the percentage of increase or decrease in the production of livestock, fruits, and vegetables is based upon averages obtained from a large number of representative farmers, the figures do not accurately show the total number of livestock and the total acres of crops in the State or in the respective counties. The importance of the summary is, however, that it shows a substantial increase in the raising of food products in Massachusetts in 1945 as compared with the actual production for 1944. The total harvest will, of course, depend upon weather and other factors over which the farmers have no control. But it is most encouraging to note that they intend to plant more acres, produce more hens and eggs, and otherwise contribute to the relief of the food shortage so prevalent throughout the country at this time. It will be interesting to note how the summary for Massachusetts and the two counties of Hampshire and Hampden compare with the production scheduled in other counties of the United States.

I wish to express my own personal appreciation for the splendid work of our farmers at a period when they are faced with shortages of manpower, machinery, tools, and feed. They certainly are contributing fully to the success of our men on the battle fronts. The summary is as follows:

Summary of the 1945 production intentions taken from the 1945 enrollment blanks prepared between Dec. 1, 1944, and Mar. 15, 1945 [1]

[Number of schedules, 8,604]

	1944	Intended, 1945	Percent 1945 is of 1944	
			State goals	Intended
	Numbers	*Numbers*	*Percent*	*Percent*
Sows to farrow:				
Spring	8,744	8,028	88	92.0
Fall	4,302	4,589	100	107.0
All cattle and calves	151,615	154,125	100	102.0
Dairy cows and heifers of milking age	111,276	115,350	100	104.0
Hens and pullets kept for laying	2,317,169	2,356,026	93	102.0
Turkeys raised	143,520	214,918	110	150.0
	Acres	*Acres*		
Corn	34,025	36,778	100	108.0
Other small grains	9,697	10,263	100	106.0

Clara Barton Day

EXTENSION OF REMARKS

OF

HON. JOE HENDRICKS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. HENDRICKS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution:

House Concurrent Resolution 2

Concurrent resolution officially recognizing the story, life, and achievements of Clara Barton, founder of the American Red Cross; setting aside the second Thursday of October of each year as Clara Barton Day; requesting Congress of the United States to establish a Clara Barton Day

Be it resolved by the House of Representatives of the State of Florida (the Senate concurring), That we hereby officially recognize and do declare: That there is no surviving American of either sex, the story of whose life and achievements is more thrilling and fascinating than that of Clara Barton; that her achievements in the evening of her life, are greater than the conquests of nations or the inventions of genius; that she left to the world a legacy of accomplishment, which with every passing year has matured, and throughout the future, will mature and expand into wider and more fruitful field of beneficence; that she met the opposition and hardship of a pioneer, but her industry and zeal were as unflagging as her sympathies were universal, her labors never ceasing until her idea of organized relief had thrust its roots deep in the soul of America and that great instrument of mercy, the American Red Cross, had been engrafted into the body of this Republic; that as we witness the terrible catastrophies of the nations that now confront us, the memory of the gentle ministrations of her who won the name of "Angel of the Battlefield" cannot but be a mighty stimulant to the hopes of sorrowing and war ridden peoples everywhere; that she went in person upon the battlefields of three wars: the Civil War in the United States; the Franco-Prussian War; and the Spanish-American War, and there, unblinded by smoke and carnage, free from hysteria, with perfect self-control, she showed mankind the way out and proved that civilization was not dead; that the crown of this leadership of humanity was the foundation and beginning of that world-wide movement of relief that not only upon the stricken fields of war, but in the calamities of peace has immeasurably reduced the sum of human misery; that as long as the American Red Cross endures or its name is remembered, the memory of its founder will be cherished; be it further

Resolved, That the Second Thursday of October of each successive year hereafter be, and the same hereby is, set apart and designated as Clara Barton Day throughout the State of Florida; that the Governor at the appropriate time before said day of each year may call attention to said day, and call upon the people of Florida, the schools, churches, and other organizations to observe Clara Barton Day by appropriate activities and exercises that fittingly do homage to her great name; be it further

Resolved, That we recommend to the Congress of the United States that by appropriate action it establish and designate a Clara Barton Day for the entire Nation, to the end that the civilized world may know that the soul of America is alive and responsive to the gratitude it owes to those whose lives and characters embody and symbolize the spirit and heart of this great Democracy; and be it further

Resolved, That when Clara Barton Day has become national, the State of Florida will cease to observe the day herein named and will thereafter observe the national Clara Barton Day; that a copy of this resolution be forwarded to the Members of the Florida delegation in the National Congress, and the officials of the American Red Cross.

Approved by the Governor May 2, 1945.

Rehabilitation of Servicemen

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I wish to include an article which appeared in the Boston (Mass.) Post of April 27, 1945, concerning the employment of wounded servicemen by Collector Denis W. Delaney, Internal Revenue Service, Boston. Collector Delaney was a wounded veteran of World War No. 1, and out of approximately 459 male employees, 116 are veterans.

The article follows:

PROVE WOUNDED VETS COME BACK—NINE MEN, MAIMED OR DISABLED IN WAR, NOW FULLY REHABILITATED IN REVENUE COLLECTOR'S OFFICE

(By Grace Davidson)

Rehabilitation of servicemen is an imposing and long-sounding phrase. To most of us, it has very little reality until we see men who lost legs, arms, and hands at Gafsa, Salerno, Anzio, and in Normandy working at highly skilled jobs along with others who were more fortunate. Yesterday Denis W. Delaney, collector of internal revenue and himself a disabled veteran of World War No. 1, invited a group of disabled veterans of this war, now profitably and usefully employed in his department, to illustrate what rehabilitation is like when it advances beyond the theorizing and talking stages.

For Mr. Delaney's Government department is one of the very first in the country that began giving preference in jobs to disabled veterans returning from the war. Nothing was permitted to be said about the work until wounded men were completely and successfully assimilated in their jobs and the program was proved a definite achievement in public service. * * *

N. Joseph D'Antuona, a Dorchester man, who had his right leg blown off at Gafsa in Tunisia when a land mine exploded, said: "I thought I was done for forever, would never be able to work again and would be a tragedy for my family every time they looked at me. That was how I first felt, but not now." He stood erect, a tall, fine-looking young man dressed in tweeds. He now walks on his artificial leg without the use of a cane.

"One day a man walked into my ward where I lay at the Walter Reed Hospital," said D'Antuona. "He said that I would soon be walking around like him and working at a better job than I ever had. It didn't make sense until he pulled up his trousers and showed me that he had two artificial legs. He was badly wounded in the last war. Then I began to see hundreds like him, who had conquered in the toughest of battles—the wounded man's battle in the hospital."

DETERMINED TO WALK

D'Antuona said he made up his mind that he would walk erect without a cane. After 13 months in the hospital, he walked out under his own power without a crutch or cane. He took a civil-service examination and in May 1944 was appointed deputy collector at 141 Milk Street.

Mr. Delaney interposed, "You see, I was a veteran of the last war and was gassed in the stomach. When I came home I learned that 2 years in France was no asset in getting a job. And I, for one, did what I could to see that it would not happen in my department."

The collector said he regretted that larger plans for returning veterans were not formulated immediately after Pearl Harbor Day. He said he did not like to see men discharged too soon from hospitals, before they were physically and mentally ready for civilian life. And for those men who must remain for long periods in convalescent places, he thought it would be a good idea if civilian hotels were set aside for their use. This thought was prompted when Richard P. Collins, of 42 Millwood Street, Dorchester, remarked that it was unfortunate many of his buddies would not stay long enough in hospitals for complete physical rehabilitation. Collins lost his left hand at Salerno.

DEVELOP HIGHER I. Q.

"I don't think the Government ought to let them out until they are ready. The fellows are too impatient to get out and after they are out a while, they regret that they did not stay longer for treatment," said Collins, who was appointed to a clerical job on his discharge in the collector's office.

Mr. Delaney said at this point that records prove the disabled men, many of them, had developed higher I. Q.'s during their military service. Men who never before in civilian life could have passed the tests are now employed in jobs requiring high mental capacities. Solomon Hammelburg, a discharged disabled veteran, was before the war a taxi driver.

"During the service I got to thinking a lot," said Hammelburg, "and I decided I would like to work with my head when I came out. I didn't want to drive the taxi any longer. I took the civil-service test, passed, and was appointed to a clerical job. And I enjoy every minute of my work. I hope to get promoted one day."

Mr. Delaney assured the group that as fast as they earned promotion, they would be promoted. He said, "If you continue to give to your jobs what you gave to the military service, each one of you will be promoted. The reports on your work are splendid so far." He commented that the disabled serviceman makes an admirable worker. He is anxious to prove he can do as much and more than the man who has not been wounded in battle.

WANT TO CHEER WOUNDED

Several of the men expressed the wish to be invited to visit the wounded men in the hospitals. They said they knew they could help others lying despondently in their ward cots if they could see how they got over the hurdles in spite of their disabilities. The group included Harold J. Hooper, who suffered a broken neck when he was caught in the machinery in the engine room during his naval service; Frank E. Rose, brain concussion and malaria in the New Hebrides; James W. Wallace, wounded in the head, back, left leg and face at Bougainville; Arthur V. Mogan, permanent bone fusion in spine from a shot in magazine of ship; Walter P. Perry, spinal trouble from accident in Air Corps, and Coleman B. Connelly, broken neck from proving ground accident.

Mr. Delaney explained that this group of nine men were picked at random to give their stories of how they were rehabilitated and

found employment. He said that more and more the recent appointments which have been made include disabilities such as loss of legs, arms, hands, with others trussed in steel frames.

Shipshaw Aluminum Deal Proves Need of Light Metals Administration

EXTENSION OF REMARKS

OF

HON. HUGH DE LACY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. DE LACY. Mr. Speaker, in connection with the bill which I introduced today to create a Light Metals Administration, to bring some unified control out of the chaos in light-metals procurement, operation of Government-owned light-metals facilities, and eventual disposal of those facilities, I include the testimony which I gave April 11, 1945, before the Senate Small Business Committee:

Mr. DE LACY. Mr. Chairman, and members of the committee:

I appreciate the opportunity to come before this committee and to comment on the latest contract of the Metals Reserve Company to purchase Canadian aluminum.

This contract will unquestionably injure the post-war disposal of the Government aluminum plants. It is the fittest instrument that could be legally devised to keep new competition out of the aluminum industry.

Consider its terms: The United States must accept a minimum of 100,000,000 pounds of metal. If Metals Reserve wishes to cancel the contract, it must give 65 days notice. In that interval the Canadian company may deliver 90,275,000 pounds of metal. Altogether this country could be required to accept 190,275,000 pounds. None of this metal is to be delivered before July 1st of this year. I understand that considerable cut-backs in aluminum needs are planned by the Army and Navy if the German War is liquidated soon.

NO REAL CANCELATION CLAUSE

I understand that in requesting the Metals Reserve Company to undertake this purchase contract, the War Production Board expected that aluminum requirements would fall off and asked that the contract contain appropriate cancelation opportunities. The contract does no such thing. It actually saddles this country with the obligation to keep on taking Canadian aluminum even if it is no longer needed this year.

Last year, because of the earlier Shipshaw contracts to buy Canadian metal, the Metals Reserve Company had 444,000,000 pounds stock-piled in Canada. Because of this surplus, the War Production Board shut down American aluminum plants and cut back production in even the best plants that will be most attractive to new operators after the war. Those plants include the Pacific Northwest plants at Troutdale, Oreg., and Spokane, Wash.

SQUEEZE ON NORTHWEST AHEAD

Today Troutdale is operating at half capacity although it is supposed to open the remaining half. Spokane will be back to full capacity. But if we permit Canadian aluminum to pile up again in this country later this year, the squeeze will undoubtedly be put on as it was before. This time, the Federal agencies will probably want to shut down the Spokane and Troutdale plants completely. How can this committee and the Surplus Property Board expect new operators to be interested in shut-down aluminum plants?

Testimony already presented before this committee shows that there will be many difficult problems for new producers in obtaining bauxite, alumina, and in building up markets for metal. In addition to these problems, the policy of buying aluminum from the Canadian front of the American Trust can easily mean that new operators would have to take over cold plants, look around for labor, hire and train new supervisory personnel, and spend considerable sums of money in putting the plants into operating condition.

HARD ON FUTURE OPERATORS

An aluminum plant can't be opened by pressing a button. You have to get the men; you must clean out the aluminum cells and reline them with carbon. Why should a new operator be saddled with all these expenses if he is willing to try to help the Government put its aluminum plants to use and is willing to risk his own working capital in competition with Alcoa and Reynolds?

I don't know whether the agent for the Aluminum Co of Canada was aware of the effects upon American aluminum production when it requested the inflexible cancelation terms. I don't know whether the Alcoa officials who also own controlling stock in the Canadian company also were aware of the consequences of those terms. But I don't see how any competent person in the aluminum business could fail to understand what they meant.

OTHER OBJECTIONABLE FEATURES

There are other objectionable features about this contract that others will go into. These include, I am told, the need to use American coal to produce Canadian alumina when this country has Government plants that can produce the alumina with natural gas, saving 200,000 tons of coal.

Also, I understand there is a serious problem of getting ships to carry the bauxite from South America to Canada. Whereas in this country just outside the Government-owned alumina plant there already stands a pile of bauxite more than enough for the aluminum we are to buy from Canada.

Others will comment on these features. But I want to conclude my remarks by pointing to the need for doing something to correct the situation that permits all the Government agencies concerned with aluminum to act in such an uncoordinated, irresponsible way, so detrimental to the national interest.

TOO MANY AGENCIES

Previous witnesses before the committee have mentioned the many agencies that deal with aluminum in such a way that the right hand doesn't know what the left hand is doing, or doesn't seem to care. How else can one explain the first Shipshaw contracts to build a big power project in Canada and build the Canadian aluminum industry, at the expense of American power projects and the investment in American aluminum plants?

The Metals Reserve Company signed the Shipshaw contracts that promise to destroy some of the investment in Government plants owned by the Defense Plants Corporation. Metals Reserve and Defense Plants Corporation were both agencies of the Federal Loan Administration, and the Administrator at the time all these arrangements were made was Jesse Jones. He personally knew about all these contracts. He knew about the initial Shipshaw contract signed May 2, 1941, and a few weeks later he was engaged in planning to finance the investment of nearly $700,000,000 in American aluminum plants that would be hurt by the Shipshaw deal.

And besides Mr. Jones, there was Mr. Batt who had been told in 1940 about power waiting to be used at Grand Coulee and Bonneville Dams in the Pacific Northwest, but who turned in Canada in 1941 to help build a private power project.

NO UNIFICATION TODAY

This latest scandalous contract with Canada's Alcoa is one more evidence that there is no more control over a unified policy in aluminum for the true interests of this country than there was back in 1940 and 1941.

If nothing is done to change the situation in the various Government agencies so as to produce cooperation for the disposal of Government plants according to the Surplus Property Act, the best possible administrators of that act will be helpless to salvage any portions of the millions we have sunk into Defense Plants Corporation aluminum plants in this country.

Here is what will happen unless this committee recommends remedial action. The Army and Navy Munitions Board has recommended a stockpile of metal and bauxite, but that stockpile is not to be built up in any part by purchases from Government plant operators. No other agency today is concerned with this question. That means that the Government-owned plants will close, no matter how low their costs are. Congress must unify policy on stockpile acquisition with plant disposal. Otherwise there will be no outlet for the aluminum produced in the Government plants, and they cannot be kept in operating condition until disposed of.

MAZE OF CONTROL

Again, the War Production Board is only interested in getting aluminum for the needs of the Army and Navy and other war requirements. When war requirements fall off, the War Production Board will tell the Defense Plants Corporation that it can shut down the Government aluminum plants. But Surplus Property Board later is supposed to sell these plants, and the best way to help sell them is to keep them in at least partial operating condition. But there is nothing now to prevent the Defense Plants Corporation from closing down the plants when the War Production Board says so, and then the Surplus Property Board wringing its hands later because nobody will want to buy them.

That is the predicament this country is in because of the lack of unity among the Government agencies interested in aluminum. Only Congress can impose that unity, and I urge that this committee consider this problem. Perhaps the solution may be as one witness already recommended—the establishment of an aluminum commission. Actually, a commission is apt to be divided and weak. I would recommend that an aluminum administrator be authorized by Congress for a temporary period until the Government plants are finally disposed of.

CANCEL SHIPSHAW CONTRACT

And preliminary to everything else, to introduce flexibility into the wartime procurement of aluminum, to safeguard the immense interests the Government has acquired in aluminum plants, and to preserve the basis for the introduction of post-war competition into aluminum production, the committee should recommend the immediate cancelation of the latest Shipshaw contract and begin legislative action now that will result in the speediest possible transfer of existing D. P. C. plants to operating companies that give reasonable grounds for the expectation that they will acquire the facilities and operate them in competition to Alcoa.

This committee has an excellent opportunity to safeguard millions invested in DPC plants, correct a mishandled war supply problem, and insure practical opportunity for free enterprise in a vital field of production that is now monopolized by the Aluminum Co. of America and its sister monopoly in Canada, both owned by the same stockholders and jointly dominated by 11 persons. On behalf of the people of Seattle and the Northwest, I wish to thank Senator MURRAY, Senator MCMAHON, and the members of this able committee for their interest in and work upon this vital problem. Through your efforts our people will gain a great opportunity for future jobs and prosperity.

Florida Will Fight

EXTENSION OF REMARKS

OF

HON. JOE HENDRICKS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. HENDRICKS. Mr. Speaker, I wish to insert an editorial from my hometown newspaper, the De Land Sun-News, which I think is very pertinent. This editorial points out charges made by the State chamber of commerce against Federal bureaus and departments in exposing certain undesirable actions carried on in the State of Florida, which actions received great publicity throughout the Nation. I recall distinctly that there was publicity in every Washington newspaper, and at least one magazine ran a feature article on Miami, Fla., which was very disparaging. I have been in Miami during the war and I saw nothing going on there that was not going on in New York City and Washington. The fact of the matter is that I believe that some of the things that were criticized by this magazine in Miami would pale into insignificance when compared to some of the things going on in other cities in the Nation. If anyone cares to investigate Washington and New York or any other large city they will see for themselves.

It is true that Miami publicized the city as a resort, inviting tourists to come to the city. It is also true that anyone with an ounce of intelligence must realize that during the war people must have some relaxation and they are going to the best place to get it. This may be the subtle reasoning for the publicity against Miami and Florida. There is no better place in the Nation for people to get relaxation of the kind they should have. It is also evident to an intelligent person that there are many people who are wealthy and who are contributing nothing to the war effort who would go to Miami, Washington, New York, Atlantic City, or anywhere else where they can get excitement and enjoyment. If it is a sin for Miami and Florida to advertise their climate and their advantages to those who are seeking relaxation and a vacation, then I have a mistaken impression. I notice that big concerns all over the Nation whose production has been almost entirely taken for the war effort run full-page advertisements in newspapers as though they were still selling goods to the public. To this I have no objection. I think it is perfectly proper for them to advertise their goods to the public so that when the war is over the public will know that these concerns are still in existence. On the other hand, is there any reason why the State of Florida, and Miami, should not continue to publicize their benefits?

As I have said, I have been to Miami during this war, and I have seen the armed forces, those who have enough money, doing the same things that the civilians were doing, and while I do not approve of all that either the armed forces or the civilians were doing, yet it may be well that there is some spot where people can forget the war for a little while. I am proud of the part that my State has played in the war effort. There is no State in the Union that can show a proportionately greater cooperation and contribution than the State of Florida.

The editorial referred to follows:

FLORIDA WILL FIGHT

The Florida State Chamber of Commerce makes rather startling charges against what may be designated "various Federal bureaus in Washington." When summed up, the charges are that these bureaus take keen delight in exposing Florida and give it unfavorable publicity for things that could as well have as a locale, almost any other place in the United States. If Florida is being made the goat, as is implied, it is time that the matter be exposed. Only by a determined fight on unfair publicity of this kind can Florida occupy its rightful position as a really patriotic State that has not only met the demands of the war upon it but has exceeded them.

That there is sufficient ground for suspecting discrimination may be taken for granted from the very fact that former Gov. Spessard Holland has consented to be the chairman of the committee on State relations to battle for Florida with facts and figures. This committee will fight for Florida's good name.

Remember the recent so-called Miami exposé? The Treasury Department decided to clamp down on pleasure seekers who are also tax evaders. The Department's agents invaded Miami, rounded up a few tax evaders, and received reams of publicity.

The Treasury Department charged that Miami was impeding the war effort by encouraging tourists—that she was even advertising her resorts in the northern newspapers and magazines. Matter of fact, so were New York, Los Angeles, Mexico, Cuba, Pennsylvania, Illinois, Virginia, and many other States and cities. These are examples, says the State chamber, of unfavorable publicity of the caliber that Florida has been subjected to which could have originated in virtually any city of any size in any State in the Nation.

Has Florida been backward in war effort? Here are some facts:

Florida has contributed 300,000 men and women to the Nation's armed forces; she has built thousands of ships, airplanes, ordinance, and miscellaneous war items and maintained war contracts at a level of $725,000,000; she produced 5,000,000 tons of food for human and animal consumption during 1943 and 1944; she contributed, tax free, 538 hotels to the armed forces; her citizens purchased $1,161,000,368 worth of War bonds.

In some of these categories, Florida was close to top, proportionate to its population, in war suport. It will be well for the Nation to know that.

Who Really Owns My Business?

EXTENSION OF REMARKS

OF

HON. WILLIAM H. STEVENSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. STEVENSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by E. H. Martindale:

WHO REALLY OWNS MY BUSINESS?

(By E. H. Martindale)

Two gentlemen from the Ordnance Division of the United States War Department were in my office recently in connection with forward pricing which is superseding renegotiation.

During the course of our conversation I remarked that although we had been in business over 30 years, I had never been able to draw out enough from the business to pay the inheritance tax when my share is passed along to my two sons. One of the gentlemen said, "Why should you? They didn't earn it."

This remark bothered me because it sounded logical but it raised the question of why should an inheritance be a liability instead of an asset?

I am a little past the age of 60 and if I should die at the present time my sons, one of whom is with a company of combat engineers with the American First Army on the western front, would have to sell their War bonds, borrow the limit on their life-insurance policies, raise money wherever possible, and still would probably fall far short of raising enough cash to pay the inheritance tax.

As we are a closed corporation with 92 percent of the stock owned by members of two families, no bank will accept the stock as collateral for a loan, and it would be difficult to find an outside buyer to purchase part of the stock at a reasonable price, even if my sons were willing to give up control of the business by disposing of part of their stock.

Then for the next several years my sons would have to skimp and scrape to pay off the debts incurred by the inheritance.

This problem revolved in the back of my head until there came back the answer that my business is not really wealth to me and the question "Who really owns my business?"

It was started back in 1913 by another man and myself as a partnership with a total investment of $260 and, with the addition of a few other stockholders, was incorporated in 1917.

Year after year most of the profits, after taxes, have been plowed back into the business but two periods of unusual expansion required additional cash investments of $17,200 and from these cash investments and plowed-back earnings we are now giving employment to 88 men and women.

Our books disclose that our present factory machinery and equipment cost $89,703.76 with another $10,726.92 for typewriters, desks, and other office equipment, making an investment of $1,141.25 for each of our 88 employees. These are their tools of trade which we have supplied to them and without which they would have no employment.

Then they must have a place in which to work and real estate and buildings represent an investment of another $45,043.27 or $511.85 each.

Next, they must have raw materials from which to manufacture the finished goods and the latter must be held until a buyer is found. These two items take another $196,025.31 or $2,227.50 each.

Our customers, consisting mostly of other industrial plants, are not in the habit of paying cash on delivery and accounts receivable take another $73,816.30 or $838.82 for each employee.

Next, bank balance and petty cash take $32,524.44 or $369.59 each. Other miscellaneous items require $1,859.02 or $21.13 each.

These all total up to a frozen investment of $449,699.02 or $5,110.14 for each employee. It seems safe to say that our employees have never given this any thought and do not realize that without this investment on their behalf, they would not have their present jobs.

This does not represent wealth to me because I cannot exchange it for goods; I cannot spend it for a vacation or for amusement. Our employees look upon me as wealthy because I control this business, but I deprive myself of many luxuries and pleasures in my efforts to accumulate sufficient liquid assets to pay the inheritance tax—wealth that I should feel free to spend if I worked for a salary and owned no stock in the corporation.

I am merely the custodian of the business which seems to really belong to others. First, I am custodian for our employees; they have first claim on our income for their pay in addition to which we pay 1 percent of the amount of their wages or salaries for Social Security to provide them with a pension at some future date, and another 3 percent for possible future unemployment.

Next I am custodian for my city, county, and State. They demand an annual dividend of 2.87 percent of the assessed value of our real estate and buildings, machinery, furniture and fixtures, raw materials, and finished merchandise, even if we make no profit, with a smaller dividend from us on accounts receivable and one from our bank on our bank balance. The State also demands a domestic franchise tax annually of one-tenth of 1 percent of our net worth.

Then comes the Federal Government. To make sure that it gets something, regardless of profits, the Government first assesses the capital stock tax of one-eighth of 1 percent of what we think the business is worth. Then if we make a profit, the Government collects a fat share, and if we pay the profits out in dividends the Government comes back for another large share.

So I submit that I am only the custodian of this business; first, for the benefit of our employees, then for the city of Lakewood (a suburb of Cleveland), the county of Cuyahoga, the State of Ohio, and the Government of the United States of America, and that when I die I shall be passing along mainly this custodianship rather than real wealth to my sons.

Why should my sons be penalized for accepting this custodianship? Should not the inheritance tax laws be revised in some way to permit more liberal treatment when frozen productive wealth that furnishes employment to others, is passed along to the heirs?

Such revision might allow a reasonable exemption based on the average number of employees or average annual pay roll for the preceding 3 to 5 years.

For a firm in the small-business class the present burden frequently makes it necessary to discontinue all expansion, reduce selling and advertising expenses, and otherwise retrench for a period of several years in order to withdraw sufficient cash from the business to pay the inheritance taxes.

This necessary retrenchment may come at such a critical time in the life of a small business that its growth is permanently stunted, or it may even be started on the downward path toward bankruptcy and liquidation.

Senator La Follette's Analysis of Congressional Needs

EXTENSION OF REMARKS

OF

HON. ESTES KEFAUVER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 1, 1945

Mr. KEFAUVER. Mr. Speaker, under leave to extend my remarks, I am pleased to enclose an article written by Senator ROBERT M. LA FOLLETTE, Jr., which appeared in the Progressive magazine April 16, 1945. In the article entitled "What's the Matter With Congress?" Senator LA FOLLETTE, chairman of the Joint Congressional Committee to Modernize Congress, sets forth his well-considered ideas of the things that should be done to strengthen the Federal Legislature.

The article is as follows:

Vital problems affecting the future welfare of every American citizen confront Congress. Never before in its history has Congress been faced with national and international issues of such great magnitude and complexity.

The determination of policies of our Government rests with Congress under the Constitution. The tendency to increase the power of the executive branch of Government manifest before the war has been greatly accelerated during the conduct of a global struggle. After the war this trend must be reversed, and Congress must recover its power to make the policies of government if representative government is to survive the impact of the problems we face in the postwar period.

Reconversion of our economy from war to peace. Full employment for those ready, willing, and able to work. Adequate social security on a broad base. Improved medical and hospital service. Equality of educational opportunity. An increasing standard of living for agriculture and the preservation of the family-type farm. These are a few of the great domestic problems which confront Congress.

COMMITTEES NEED OVERHAULING

In the field of international relations the Congress will be called on to pass on issues as diverse and complex as those involved in Dumbarton Oaks, Bretton Woods, tariff, foreign credits, commodity agreements on oil, rubber, tin, cotton, and wheat and many other like problems.

But Congress today is neither organized nor equipped to understand and approve such policies or to supervise and review their execution. It lacks adequate staff facilities for its committees as well as for the individual members. Its internal structure is antiquated and overlapping. Its contact with the Executive is irregular and spasmodic. Its supervision of executive performance is superficial. Much of its time is consumed by petty local and private matters. These are formidable obstacles to legislative understanding, determination, acceptance, and oversight of postwar policies and programs.

In order to overcome these obstacles, Congress should have its own Research Service to furnish it unbiased information essential to an understanding of complex public problems and programs. The legislative and supervisory committees of Congress should have their own, independent, qualified experts in whom they can have confidence.

I have long believed that Congress must reorganize its committee system by abolishing the inactive committees, consolidating those with overlapping jurisdictions, and providing the remaining committees with adequate and able staffs. Thus the committee systems of both chambers would correspond with each other and be correlated with the major functional divisions of the executive branch.

GUARDIAN OF OUR LIBERTY

We must strive for the greatest possible continuity of post-war policy if a just peace and full employment are to be attained. Continuity of policy and unity of governmental action would be advanced if Congress would create a responsible mechanism for liaison between the Congress and the Executive by setting up a legislative-executive council.

Such a council could be composed of party leaders in Congress and members of the President's Cabinet. It would promote better teamwork between the two branches, achieve legislative scrutiny to assure the administration of post-war measures in harmony with the intent of Congress, and assist in preserving coherence and continuity of high governmental policy.

Congress needs to strengthen and develop methods for implementing its scrutiny of Executive performance. It has been suggested that this might be done by strengthening the staffs of the appropriations committees; giving the General Accounting Office audit power over all Federal agencies, departments, and corporations; creating a Joint Congressional Committee on Public Accounts and a Joint Committee on the Budget; and experimenting with a question period at which executive officials would appear on the floor of Congress and answer questions.

Congress will fail unless it seriously sets to work to put its own house in order, equip itsef with the necessary expert staff, and streamline its committee organization so that a working and clearly defined liaison can be established between Congress and the President on broad phases of national policy.

In foreign as well as in domestic fields it has been demonstrated conclusively that policy is often determined not by the passage of laws, but rather by the day-to-day administration of those laws. In dealing with complex questions of this kind it is impossible to legislate in advance for every conceivable contingency. Discretion must be granted the President and his agents to meet developments as they arise, and the way that discretion is exercised in crucial situations, the slant it is given, frequently goes farther in determining policy through the actual shaping of events than the formal legislative process of framing and passing a bill.

This is a fundamental fact that completely upsets the traditional separation of powers theory, which is based upon the assumption that policy can be determined completely by the passage of laws, that the Chief Executive can clearly be held responsible to such policy since his only function is to execute the law.

The growth of administrative law, the law of executive regulations, orders, and directives, is a profound change in the American system of government.

If, then, Congress is to regain its intended position as the policy-making branch of the Federal Government, it must necessarily equip itself to exercise a high-policy supervisory function over the administration of the laws it passes. It must develop ways and means of working with the Executive

in a cooperative way, continuously, on all major phases of national policy.

It cannot pass a law and then let go of the problem until the Executive comes back for an appropriation or for confirmation of some official to administer it. Those controls are only negative checks on the Executive. They are not the instrumentalities of constructive leadership by Congress.

Finally, it is widely believed that Congress must divest itself of less essential duties like private claims and acting as a common council for the District of Columbia, which divert its attention from national policy-making, and which it ought not to have to consider.

Adoption of these or similar reforms would go far, I believe, toward restoring the effectiveness of Congress as a coordinate branch of our National Government, simplifying its operations and improving its relationships with the Executive, and preventing political frustration of policies involving postwar peace and prosperity.

Representative government is the heart of the democratic faith, and the chief protector of our political liberties. Upon a stronger and more effective Congress may well depend the preservation of democracy in the United States.

Helping Everybody But Ourselves

EXTENSION OF REMARKS

OF

HON. CLARE E. HOFFMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. HOFFMAN. Mr. Speaker, the following is a copy of a letter received this morning. It is typical of the thoughts of some who believe we should continue to aid all other people, all other nations, but who overlook the fact that we have a duty to our own people, to our own country.

The letter and my reply are as follows:

DOWAGIAC, MICH., *April 28, 1945.*

DEAR MR. HOFFMAN: I am writing to you regarding the bill providing for the United States participation in the International Monetary Fund and the International Bank. I understand the bill H. R. 2211 is now in committee.

I have watched closely the progress of public opinion in international affairs in the last few years. We, the people, are beginning to think; we are beginning to use our reasoning powers. That is a very encouraging sign. It means that more people will recognize the issues and problems facing our country and the world. Also important, they will make decisions and judgments by the use of facts and reasoning, rather than by superstitions, ignorance, and fear.

Coming back to the bill, we know that after 2 or more years, tiring years, of negotiations, experts from 44 nations, including our own, have agreed on this fund and bank. We know, if "crippling" amendments are added, the whole agreement must be referred back to the 40 nations, which delay would seriously hinder recovery. We know that the amount of money this fund and bank would need from our country would run a world at war only a few hours; but it opens a way for cooperative planning among nations for prosperity and peace, instead of cutthroat competition of world trade and finance. We know what that leads to. We also realize that, if Congress fails to pass this bill, the United States will again be withdrawing from international responsibility—we know how disastrous to international organization this would be.

As I see it, there are about five stands a Congressman may take:

1. Active stand against, and a "no" vote.
2. No stand and a "no" vote.
3. Lip service and a "no" vote.
4. No stand and a "yes" vote.
5. Active stand and a "yes" vote.

The eyes of your constituents are on you, Congress and individual Congressmen. We expect an active stand and some mighty sound reasons, or a better plan, if your vote is "no."

Sincerely,

(Mrs.) FERN E. NAHIKIAN.

MAY 4, 1945.

Mrs. FERN E. NAHIKIAN,
Dowagiac, Mich.

MY DEAR MRS. NAHIKIAN: Your letter of April 28 came in this morning. In it you ask that I vote for the bill providing for the United States participation in the international monetary fund and the international bank.

Your further statement that the people "will make decisions and judgments by the use of facts and reasoning, rather than by superstitions, ignorance, and fear," carries the implication that they have not in the past followed that course.

It is true that, by the use of propaganda, through Government agencies, over the radio, and through the press, the people have at times been led to believe that by the adoption of certain legislation we could create a utopia, banish work, insure social security, prosperity, happiness for all and an enduring, universal peace—all worth-while objectives.

However, the people of the Fourth Congressional District of Michigan are far too sensible to be overlong swayed by propaganda of that nature and, although I have lived in southwestern Michigan for more than 40 years, I have never known them to base their decisions on either superstition, ignorance, or fear. Perhaps you wrote thoughtlessly or are not well acquainted with an overwhelming majority of the people of the district.

You call attention to the fact that the representatives of some 44 nations have agreed to the establishment of this fund and bank. To it, the United States, although it could not control loans or expenditures, would be required to contribute somewhere near $6,000,000,000 at the outset; to be exact, $3,175,000,000 to the bank, which is more than one-third of the total contributions; $675,000,000 more than the combined contributions of Britain and Russia, and within $250,000,000 of what all the rest of the nations, other than Russia and Great Britain, will contribute. To the fund it would contribtue $2,750,000,000, which is more than one-fourth of the total contributions; $250,000,000 more than the combined contributions of Great Britain and Russia; wthin $800,000,000 of what all other nations, other than Great Britain and Russia, will contribute.

The expenditure of the money would be beyond our control, inasmuch as ours would be but a minor representation on the Board of International Directors, and we would be outvoted.

You then conclude your letter with this statement:

"The eyes of your constituents are on you, Congress and individual Congressmen! We expect an active stand and some mighty sound reasons or a better plan if your vote is 'no'!"

That there may be no misunderstanding, let me write that my vote will be "no" and I have what I consider sound reasons for it. In voting "no" on this proposition, I am but following the course pursued so vigorously by Stalin and Churchill, each of whom, from the day when Hitler invaded Poland, has on every occasion acted for and in what he conceived to be the best interests of his own country.

I know of no reason why, if it is so laudable for Stalin to think and act first for Russia; Churchill to have in mind always the interests of the British Empire; I, an average American, should not think and act for what I conceive to be the best interests of my country. That I propose to do.

The garageman's wrecker is of little use to the motorist whose car has been smashed on the highway, unless it has tires, gasoline, a good motor, and is properly equipped for its task. Nor will the United States be able to render effective aid to anyone unless it conserves its ability.

In this war, to save the British Empire, to give Russia the means of defending herself when she was invaded, the United States of America contributed billions of dollars of national resources and of manufactured munitions of war.

While Churchill told us that, if we would furnish the tools, they would furnish the men, our young men have sustained more than a million casualties; more than 500,000 of them have given their lives. More than 4,500,000 men are on foreign soil on the western front. Do you want more sent? Hundreds of thousands of others have died in the Pacific and, if the international politicians have their way, that war may continue until we have retaken all the lost possessions of the British Empire, of the Netherlands, whose queen, with millions at her command, now enjoys a comfortable home here. How long, and to what extent, do you want us to continue the war in the Pacific? How many islands do you think we should retake, at the expense of the lives of American boys, and then give them to either the British or the Netherlands?

No, Mrs. Nahikian, with all the respect which I have for your judgment and for that of those who agree with you, I do not propose, while this country is so short of so many things which are necessary if we are to help not only others but ourselves, to vote $6,000,000,000 or any other like sum to enable the politicians of other lands to gamble in world trade.

I know that a humanitarian impulse causes you to write me and that many others feel the same way. Not a day passes that I do not receive here in Washington letters from parents, brothers or sisters, wives or children, of those who have either been killed in the war or who are still abroad doing the fighting. Many of those letters disclose want, suffering, pitable situations, dire need. There must be some of those cases in your vicinity.

May I most respectfully suggest that, instead of asking me to increase our national debt, which, after this war, will require an annual interest charge of more than $6,000,000,000, by adding another $6,000,000,000 to that debt, you and those who feel as you do start an organized effort to aid those whose sons, brothers, husbands, or fathers have either volunteered or been drafted into the armed service.

You and yours are living in Dowagiac, a beautiful city. I am sure that you and yours get three good meals a day; that you sleep in comfortable beds; that your home is heated in the wintertime; that it has a good roof over it, and that you yourself are a participant in many pleasant social activities.

Wouldn't it be more to the point if we all, instead of looking so far afield for someone to help, turned to our neighbors? Wouldn't it be better if here, in the land to which so many from other countries have come as a place of refuge; where so many from other lands have found and availed themselves of the opportunity for prosperity, for religious freedom, for educational advantages, we preserved—instead of dissipated—our resources?

I am quite sure that you and your husband think first of the family of Nahikian; then of your city, your county, your State, and your Nation. I have followed that same course and expect to follow it as long as I remain here as the Representative of the district.

If we preserve our own economic structure, our own liberty and freedom, we will, as the centuries roll on, be able to help others. If we wreck ourselves by destroying our constitutional processes, by giving away our natural resources, by sending out of the country millions of those who should be the fathers of coming generations, bringing in German war prisoners and refugees to take their places, we shall be not only unable to help others, but we shall be unable to preserve our own existence.

Thanks again for writing me.

Sincerely yours,

CLARE E. HOFFMAN.

P. S.—If you want the name of a distressed wife or of the mother of some serviceman who is serving abroad and who needs help, will be glad to send on one or two so that you may encourage her, relieve some of her anxiety and suffering, in any way you find convenient. C. E. H.

Poland Must Be Saved

EXTENSION OF REMARKS

OF

HON. D. EMMERT BRUMBAUGH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. BRUMBAUGH. Mr. Speaker, the heroic people of Poland are in our hearts and prayers on the one-hundred-and-fifty-fourth anniversary of the Polish Constitution.

It is a sad commentary on world affairs to realize that as the United Nations look hopefully to the establishment of peace among all nations courageous Poland is forgotten and allowed to be partitioned and its entity as a free republic destroyed.

The gallant Polish Nation was the first to feel the cruel lash of the oppressor as he swept through its land on his diabolical itinerary for world conquest. Larger nations applauded the Poles as they fought the invading forces with relentless fury and a national spirit that will prove an inspiration to freedom-loving nations from generation to generation.

Unable to cope with a modern war machine said to be at that time incapable of defeat, the brave Polish people were crushed under the streamlined methods of warfare unleased by the forces of evil and destruction. But Poland's proud head was "bloody but unbowed," and her courageous people continued their efforts to resist by aiding the Allied Powers in various ways and in an effective manner.

It is said that nearly 1,000,000 Polish soldiers have made the supreme sacrifice since Hitler invaded their nation, and that in occupied Poland nearly 4,000,000 lives have been sacrificed through cruel executions, or as a result of barbarous treatment in concentration camps.

Surely the clarion call "Poland must be saved" cannot be forgotten. It was the battle cry of the United Nations as they joined each other in declaring war on the Hitler government to avenge the ruthless subjugation of peaceful Poland.

It is a coincidence that the San Francisco Conference should be in session on the one hundred and fifty-fourth anniversary of the Polish Constitution and that the memories of Poland's mighty contribution to the restoration of peace are apparent in the fervent appeals that "Poland must be saved." God grant that the world leaders conferring in San Francisco will find inspiration in the heroic struggle of the valiant Polish people and that they will take appropriate action to restore that war-torn nation to its rightful place in the family of nations by restoring it to the stature of a free and independent nation.

National Marine Corps Day

EXTENSION OF REMARKS

OF

HON. WALTER K. GRANGER

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. GRANGER. Mr. Speaker, under leave to extend my remarks, I am inserting in the RECORD a resolution adopted by the Forty-third Street Rifle Club of New York, that proposes the designating of a certain day to annually pay tribute to the marines.

I want to congratulate this organization for this timely suggestion, as I think it has great merit and is worthy of consideration.

None of us would want to say anything, or do anything that would detract from the glory and fighting ability of the other services, but we who have had the opportunity to serve with the United States marines take great pride in having served with that organization. We know the history and tradition of the Corps, and know of its long service to this Nation. From its first expedition in the Bahamas on March 3, 1776, the marines have carried the flag and fought our country's battles on land, sea, and in the air.

It was at Iwo Jima that it reached the height of its glorious fighting history. The marines who fought and died there justified its past traditions and added new luster to its name and its motto "Semper Fidelis."

The resolution follows:

Whereas the American people have long been proud of the United States Marine Corps as a fighting force of unmatched ability and courage; and

Whereas the glorious traditions of the Marine Corps are being magnificently sustained in successive brilliant operations in the Pacific theater of war; and

Whereas the grim determination of the marines to accomplish every assigned task, no matter how difficult or costly, has inspired their countrymen with new zeal to prosecute the war more vigorously; and

Whereas we feel that a day set apart to honor the Marine Corps would crystallize public sentiment and make manifest to the Corps the gratitude and pride in our hearts: Therefore be it

Resolved, That we, the members of the Forty-third Street Rifle Club, respectfully petition the Congress of the United States to designate November 10, the day the corps was founded, as a fitting day on which to pay annual tribute to our marines; and be it further

Resolved, That a copy of these resolutions be sent to each of our Senators and Representatives in Congress and to the National Rifle Association.

Staff Sgt. FRANK J. ECKES,
President.

HERBERT FOX,
Vice President.

HARALD B. CALLAHAN,
JOSEPH DRAIN,
HAROLD LEIDY,
Committee.

APRIL 17, 1945.

Capt. Apollo Soucek

EXTENSION OF REMARKS

OF

HON. ROSS RIZLEY

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. RIZLEY. Mr. Speaker, all of the people of my State were justly filled with pride when it became known that one of Oklahoma's native sons, Capt. Apollo Soucek, had been appointed to command the Nation's latest and greatest aircraft carrier, the *Franklin D. Roosevelt*, launched last Sunday in New York.

The people of my congressional district are particularly pleased with the Navy's selection of the commanding officer for this new carrier, because this energetic son of humble parentage, was born and reared at Medford, Okla., in the Eighth Congressional District.

He graduated from the Medford High School, attended the Naval Academy at Annapolis, Md.; and as a naval flier a decade ago, established numerous world altitude records. Captain Soucek, then with the rank of commander, served as executive officer of the carrier *Hornet*, when Doolittle's raiders took off from the ship in the first bombing of Tokyo. He was awarded a naval citation for outstanding ability during the last hour that the *Hornet* was afloat and in its final sinking, after the ship had been mortally wounded by enemy action in the Battle of Santa Cruz Island, October 26, 1942. He has lately been in command of the naval base at Pensacola, Fla.

As a part of my remarks, I include the following editorial from the Enid (Okla.) Morning News of May 2, an eloquent tribute to Capt. Apollo Soucek:

CAPT. APOLLO SOUCEK

All northwest Oklahoma, but especially Grant County, where he was born and reared, will cheer the appointment of Capt. Apollo Soucek, of Medford, to command the Nation's latest and greatest aircraft carrier * * * the *Franklin D. Roosevelt*, launched Sunday in New York. It will applaud not only the honor which has come to this still young man who not so long ago was "just another kid" around Medford, but also the manner of this boy's rise to fame and leadership in the Navy, a typical American success story.

Apollo Soucek was the son of a pioneer Medford blacksmith, a boy of humble beginnings but with proud, progressive, hard-working, and ambitious parents who gave him a background of energy, thrift, and ambition. Securing an appointment to Annapolis after passing the stiff examination with an extraordinarily high grade, he distinguished himself as a naval student. Upon graduation he had a tour of sea duty, after which he went into the naval aviation service, and, in 1929, astounded the world by flying a naval land-type craft to the then unprecedented altitude of 39,140 feet, only to achieve another record a short time later when he pushed a clumsy naval seaplane to a new world altitude record for such craft of 38,550 feet.

From then on, Captain Soucek's progress was rapid and he contributed much as a fearless test pilot to the building up of the technique of naval aviation. Ultimately, he became the executive officer on the famous American aircraft carrier *Hornet* which carried Doolittle's famous raiders to within bombing distance of the Japs for the raid which only a few months after the opening of the war showed the Nips what might be expected in the way of American retaliation for the treacherous sneak attack on Pearl Harbor.

Hard work, continuous study, personal courage, and strict attention to duty have carried this former Grant County boy to the captain's bridge of the mighty new 45,000-ton carrier, an example of the typical American story of success for those who prove themselves worthy. It is a story which the youngsters of this region with naval, or any other ambitions well might study with benefit; and the News, which for years has followed with recurring news reports the upward climb of this Medford blacksmith's son, joins in congratulating him for a deserved promotion, and predicts new glory for him when his ship is commissioned and joins in the coming all-out assault on our Pacific enemy.

The Canol Project

EXTENSION OF REMARKS

OF

HON. LEON H. GAVIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. GAVIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following news item:

VAST CANOL PROJECT TO BE AUCTIONED?

The Canol project, the Army's $134,000,000 white elephant which the Corps of Engineers proudly has claimed second only to the Panama Canal in magnitude, will go on the auction block if Canada does not want to buy it.

The project, defended by Lt. Gen. Brehon Somervell against all comers is soon to be listed as surplus Army property.

Canada, by virtue of arrangements with the United States, which bore entire cost of the project, will get first crack at the huge outlay of oil wells, refinery, tanks, and pipe line, which was started in 1942 to supply gas for defense of Alaska and the Northwest.

Canol ceased functioning April 30, less than a year after it was finished. Army said it was no longer needed.

Though General Somervell justified the great outlay of money and manpower to build Canol under the most difficult and hazardous conditions in the far northwest as needed when Japs were sinking transports in the Pacific, the Truman investigating committee called the project a "white elephant" and seriously questioned need for its original construction or pursuance of the project after the danger passed.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. HERMAN P. KOPPLEMANN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. KOPPLEMANN. Mr. Speaker, under leave to extend my remarks in the RECORD, I submit an editorial written by the publisher of the Darien Review, Darien, Conn., on April 19, 1945. The Honorable Alfred N. Phillips, Jr., is a former colleague and my good friend. His editorial is an outstanding tribute to our late beloved President. It follows:

FRANKLIN DELANO ROOSEVELT, 1882–1945

It would require more than modest gifts in the field of journalism possessed by anyone connected with this newspaper even to attempt correctly to appraise the many contributions to the life and traditions of the United States of America which were made by Franklin Delano Roosevelt. So great were his talents, so varied were his interests, so warm were his human sympathies and understandings, that, like viewing the many facets on a finely cut diamond, one is forced now to pay tribute to but at most a very few of the many achievements of Mr. Roosevelt as our President. Only time, that great leveler, will presently develop a true perspective of Mr. Roosevelt's life and accomplishments as a whole.

Therefore at this moment, in bidding Mr. Roosevelt—this great American—a last and respectful farewell, we will devote ourselves solely to the consideration of one outstanding contribution which Mr. Roosevelt has made to us, his bereaved countrymen, as well as to all mankind everywhere. In our opinion it is this: He—he alone in the final analysis—saved for the world, ourselves included, a continued opportunity to live in that favored condition of freedom, religion, and democracy which Americans have for so long taken for granted as their natural right. He—he alone in the final analysis—constructed that machinery which has or will soon encompass the final downfall of Nazi-Fascist-Axis dictatorship and barbarism—that horror of violence, terror, torture, and slavery, which, if it persisted, would have set the progress of civilization back for possibly thousands of years.

We state this because we are more than ever convinced of this as we now look back at those vacillating, blindly pacifist, pre-war days, that Hitler's Axis' definite design was to encompass our isolated downfall, after piece-meal destroying the last other possible sources of opposition in our pre-war world, namely Britain and Russia. Thereafter, as we see it, Hitler's plan was an infiltration of South and Central America, followed by military control of them and then invasion of the huge but then militarily unprepared and helpless United States of America, which at that time presented an open road and an easy conquest. Have we, any of us, forgotten the awful, futile sense of unprepared helplessness we all justly felt when France fell—when we realized it "could happen here"?

But Mr. Roosevelt, early sensing and correctly appraising this true world situation, promptly acted with aid to Britain and to Russia, and maintained, too, a steady leadership of the American people along the hard upward road of military and naval preparedness (which, also, he had long been influencing through Congress). He did this initially before most of the American people realized and awakened to the true state of world affairs.

Thus, in bolstering up Britain and in aiding Russia to keep on fighting, and in fostering our military preparedness until we three could effectively smite the satanic Axis, Mr. Roosevelt staved off the evil day of democracy's defeat until this defeat was no longer possible. If at times in our pre-war days he seemed somewhat to soften from his purpose, we think that Mr. Roosevelt never really deviated, but rather remembered Plato's admonition, "Woe be to that leader who leads the people faster than they are able to follow."

This, we feel, is Mr. Roosevelt's greatest contribution to America and to mankind. Nor do we feel that we should ever forget this fact, and because of this, our great debt to him and to his memory. We are free today, our people not miserable slaves in Axis factories or rice paddies, only because of what Mr. Roosevelt perceived and did.

Too, if a postwar permanent structure to preserve world peace is built, we can thank Mr. Roosevelt for this, as having labored mightily as the architect of the plans of such a needed organization of the world's nations. Apart from his other weighty accomplishments, these we believe are the outstanding ones in Mr. Roosevelt's enduring claim to fame and to our never-ending gratitude.

In that spirit we believe we must approach the forthcoming San Francisco Conference. With this spirit actuating us, let us make sure that this conference succeeds in advancing the new world organization for peace, the guiding torch above which Mr. Roosevelt has passed to us from his inspired but tired, failing grasp. Let us carry that torch ahead not only for the welfare of our sons and daughters and their children and children's children yet unborn, but also as the most proper tribute to our departed leader who has thus preserved for us the American way of life. May we thus fittingly remember Franklin Delano Roosevelt—a great man—a great American.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. CHARLES SAVAGE

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. SAVAGE. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following editorial written by the master of the Washington State Grange, which appeared in the April 21, 1945, issue of the Grange News:

TRIBUTE TO MR. ROOSEVELT

In final tribute to our late President Franklin Delano Roosevelt let it be said of him, "I have fought a good fight, I have finished my course, I have kept the faith." We believe no other man of his generation has stimulated so greatly the ideals of democracy, the good-neighbor policy, the brotherhood of man.

Many are the legacies he has left us from the pattern of his life—courage, cheerfulness, a desire to carry on his fight against

poverty and disease, as well as strength and hope to the afflicted that they can rise again. It is hard to evaluate his leadership in this new era of unity, as we are living too close to the time of his life. It can better be appraised by generations to come. Now it is up to us, the living, to carry on his unfinished work, to study the problems of a lasting peace. God grant us wisdom, for we know that Franklin Delano Roosevelt in that brief moment with death found that permanent and lasting peace for which he sought a solution at Teheran and Yalta.

Two-Thirds Amendment

EXTENSION OF REMARKS
OF
HON. JOHN W. GWYNNE
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Friday, May 4, 1945

Mr. GWYNNE of Iowa. Mr. Speaker, under leave granted to extend my remarks, I include the following editorial by Mark Sullivan from the proposed constitutional amendment in the matter of the ratification of treaties:

TWO-THIRDS AMENDMENT
(By Mark Sullivan)
FERVOR HAS DIMINISHED

The House this week debated the proposal to amend the Constitution so that treaties may be ratified by a simple majority vote of the two branches of Congress instead of requiring a two-thirds vote of the Senate alone, as the Constitution now provides. The debate has been able and thorough on both sides. But it is unlikely that the proposal will come to early success in both branches of Congress.

For this, the reason is a change in psychology. While the amendment, if adopted, would of course be binding as to all future treaties, the motive and impetus behind it had to do with one treaty—the expected one to embody the United Nations organization for preventing war, as tentatively written at Dumbarton Oaks, and now under discussion at the San Francisco Conference. Of all the arguments for the proposed change in method of ratification, the one most often stated, whether with complete accuracy or not, runs thus: "The League of Nations 25 years ago was defeated by failure to get a two-thirds majority in the Senate; let us see to it that the United Nations proposal does not suffer the same fate."

What has taken place since the proposed constitutional amendment first emerged, last November, is a change in mental attitude toward the United Nations organization. It is by no means a reversal, the wish to have an international organization for preventing war is as strong as ever. The change is rather one from a spirit of headlongness to a mood of deliberation, a desire to be surefooted.

Last November, fervor for the international organization to prevent war was at high pitch. The tentative plan for it had recently been concluded at Dumbarton Oaks. Without popular familiarity with its details, it commanded strong emotional support as an ideal, an aspiration. It was assumed that the plan would carry out the principles of the Atlantic Charter, as put out by Roosevelt and Churchill 3 years before, including: "No aggrandizement, territorial or otherwise; no territorial changes which do not accord with the freely expressed wishes of the people concerned; the right of peoples to choose the form of government under which they will live."

The fervor for preventing war, by some good plan or any good plan, was the stronger last November because we were enduring a special anxiety from the present war—the Germans had made their last desperate bid for victory by formidable attack upon our forces on the western front.

For the mood of hurry about adopting a constitutional amendment to facilitate ratification of the proposed United Nations organization, there was a special condition. In nearly all the 48 States, sessions of the legislatures would be held during the winter. It was hoped to get the proposed amendment through Congress quickly, so that it could be laid before the State legislatures in time to get final adoption by spring.

The first pause in the mood of hurry came when it was disclosed that the Atlantic Charter had been seriously impaired; that the fate of Poland was to be fixed, at the demand of Russia, in ways that violated several principles of the chapter. The ensuing dismay was increased when President Roosevelt, speaking offhand at a press conference, seemed to condone the departure from the Atlantic Charter. The whole incident, as Senator ARTHUR H. VANDENBERG, of Michigan, put it, "jarred America to its very hearthstones."

Subsequently in February President Roosevelt, at his Yalta Conference with Stalin and Churchill, tried valiantly to restore the sanctity of the Atlantic Charter. In part he succeeded. He got from Stalin an agreement that the new government of Poland would be set up in recognition of the right of peoples to choose the form of government under which they will live. But Roosevelt was obliged to concede Stalin's demand for part of Poland's territory, in violation of the Atlantic Charter.

The present mood of Congress and of the administration is one of sustained determination to have an organization for preventing war, but with watchfulness that each step be sound and planned with care.

Italian Prisoners of War

EXTENSION OF REMARKS
OF
HON. HOWARD H. BUFFETT
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 3, 1945

Mr. BUFFETT. Mr. Speaker, I have today introduced a resolution requesting that the appropriate committee of the House investigate immediately the existing military and political situation between the United States and Italy, with a view to facilitating the prompt return of Italian prisoners of war to their homeland.

With the signing of the unconditional surrender of the German troops fighting in northern Italy, it appears that the last legitimate reason for retaining these prisoners of war in the United States has been removed.

Furthermore, as the hostilities in Europe come close to an end, it is apparent that keeping these prisoners in America for labor purposes will soon be depriving American workmen of job opportunities. In addition to the foregoing reasons for their prompt return, there is the more significant fact that an armistice was signed with the Italian Government, September 3, 1943, over 18 months ago, terminating hostilities. Furthermore, it is apparent that in the near future ships will be going to Italy to bring our boys back. It seems practical that these same ships could be carrying these Italian prisoners to Italy at the time when these transports are going to Italy to get our men.

Prompt and efficient action on this problem would be welcomed by the American people and the world as well.

I trust that this resolution will receive prompt, careful, and appropriate consideration.

The Role of Capital in the National Economy

EXTENSION OF REMARKS
OF
HON. FRED L. CRAWFORD
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 3, 1945

Mr. CRAWFORD. Mr. Speaker, so much is now being said by Government officials about how our acceptance of the Bretton Woods agreement and Dumbarton Oaks proposals will help raise the standard of living of people. It would appear that our Federal Government has never before propagandized so aggressively on any issue as it is now pushing Congress and the people on these two proposals.

Citizens of the United States with vast funds they could now invest in the expansion of presently established and new industries are fearful of future Federal Government policies as to taxes, tariffs, international agreements, and arbitrary controls by WPB, OPA, SEC, and other agencies which will no doubt be created.

If the administration is sincere in ts efforts to encourage private industry and enterprise, let it make clear to our people that Government will establish and maintain a friendly attitude toward the individual investor.

The remarks of Mr. Cassel are constructive and helpful at this time. They follow:

The rise of the workers to a higher standard of life is in general dependent on a more abundant supply of real capital, and it is vital for them that this supply should be constantly maintained at the highest possible level. One might suppose that these facts were so obvious that nobody would contradict them. In reality we find, however, that the relation between capital and labor is commonly represented as something intrinsically hostile. The workers are apt to imagine that progress can be attained only by appropriating a large share of the proceeds, after a successful fight with capital. This idea is, of course, connected with the fact that at each separate agreement the interests of labor and capital come into conflict; but this conflict is merely temporary. If a rational agreement is concluded on each occasion, the conditions of labor will in the long run be improved, in about the same degree that the workers are provided with a more abundant equipment of real capital.

The peoples who have reached the greatest prosperity are precisely those peoples who

have been most abundantly supplied with capital. Prosperity has in fact risen at those times when the supply of capital was abundant. This is a truth which is applicable also in a comparison between the most advanced civilized nations. The high level of the American national income can only be explained by the relatively abundant supply of capital in the United States. Immediately before the present war the American worker was approximately twice as amply provided with means of production as the British workman and had therefore risen to a standard of living approximately twice as high. In Germany the supply of capital was, no doubt, considerably better than in England, but England had the advantage in her large income from foreign countries and in her importation of cheap foodstuffs. The standard of life was much the same in the two countries.

The Economist, in the autumn of 1944, has taken up this whole problem for close consideration in a series of articles—A Policy for Wealth—and has arrived at results which are very remarkable. The most noteworthy of these results is the very scanty supply of capital which British industry had to content itself with during the pre-war decades. Out of a national income of £4,604,000,000 sterling in 1938, only about £20,000,000 went to the equipment of private industries with plant and machinery. The Economist itself designates this sum as quite shockingly small. Very considerable sums were, of course, invested in public works and especially in housing, but on the whole, the supply of capital for productive investment was utterly insufficient for normal progress.

Why has Britain's supply of capital lagged so sadly behind? The obvious answer is that savings have been inadequate—in fact, savings have been merely a fraction of the amount required for normal progress. The Economist contends that savings would have been quite sufficient if only they had been effectively utilized for productive purposes. So far as concerns the total volume of savings, this view is quite wrong. But it is a fact that industrial production has by no means found use for the relatively small savings which have been available.

There must be some explanation of this. There must be factors which have deterred British industries from equipping themselves with as much capital as would have been required in order to keep pace with development in more progressive countries.

Chief among these factors we note the heavy incidence of taxation. The Economist asserts that a high rate of income tax cannot in itself have a deterrent effect on investors. This is a mistake. If investment involves some risk of loss as well as prospects of large profits, it will be economically impossible under a greatly progressive system of taxation, even if it might be very remunerative at an invariable rate of income tax. In Sweden it has often been alleged that, as shown by England's example, investors need not be discouraged by a high rate of taxation. The utter futility of this contention has now emerged into clear relief. The Economist, however, believes that much could be gained by a particularly lenient taxation of such income as is used for investment in industrial enterprises.

Another factor which has conduced to discourage investments of capital is monopolism which in England is very widespread. When a branch of industry is dominated by cartels and trusts, which oppose new enterprises or the expansion of existing enterprises at the cost of others, the supply of fresh real capital to that branch of industry will, of course, be greatly restricted. Similar results will ensue from a monopoly of labor, as manifested in a restrictive trade-union policy with tendencies to oppose any increase in the productivity of labor that might conduce to weaken the position of labor in competition.

In the past decade, economic thinking in the world has been largely dominated by a critical attitude toward saving. According to this view, saving, generally speaking, is larger than is necessary for providing production with capital. Some part of the savings therefore remains unused, with the consequence that the total spending power is reduced, so that it does not suffice even for buying all that is produced. Under such conditions, economic depression must naturally become a normal phenomenon in industrial life. It is not a coincidence that this theory has its origin in England. Since savings in that country have been far smaller than necessary and as those savings have not even been fully utilized for industrial enterprise, it is evident that the exponents of the said theory have been unduly impressed by British conditions. Under this theory, progress is not conceived as a normal aspect of the future national economy. It is implied that technical development is finished.

In contrast with the views prevailing before the war, people are now demanding rapid progress. Interest in raising the standard of life is being extended beyond the individual country; it is being demanded that backward countries should be provided with modern equipment of real capital in order to increase their productive power.

The extraordinary progress of Russia under her new policy, with its distinct capitalistic tendency, has contributed to this general change of attitude and has greatly impressed the rest of the world. Never before has a people imposed upon themselves such severe restrictions in order to accumulate savings to be converted into real capital. It has not been clearly realized that this immense display of power is based on an abundant supply of capital created by an abnormal reduction in current consumption. Everywhere, however, people are demanding an economic policy which will lead to a progress similar to that of Russia.

If we begin to consider what these demands involve, saving will undoubtedly be brought into credit again. Elementary economic theory must again be based on a clear view of uniform progress. It is precisely such progress that must be aimed at in times when full employment, without crises, is a leading item in the social program. It will then become evident that saving and the accumulation of capital must increase at the same pace as progress in general.

In order that this shall be possible without dictatorship it is, however, necessary firstly that thrift shall be encouraged by such favorable conditions as to result in savings which will suffice for normal economic progress, and secondly, that enterprise shall not be deterred, by unfavorable treatment, from investments which will completely utilize these savings. These demands must not be set up as being in the particular interest of certain classes. They represent the necessary conditions for a national economy in which the immense possibilities of progress in the future will be tolerably well utilized.

Representation of Veterans at Peace Conferences

EXTENSION OF REMARKS

OF

HON. SHERMAN ADAMS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. ADAMS. Mr. Speaker, under leave to extend my remarks, I include the following concurrent resolution adopted by the New Hampshire Legislature, asking that the Congress provide for representation of the veterans of this war at all future world peace conferences:

Concurrent resolution relating to the participation by representatives of members of the armed forces at meetings of the government of the United Nations

Whereas it is of the utmost importance that peace of the United Nations be a just and lasting peace; and

Whereas the casualties of this global war have thus far exceeded those of any war in which our Nation has ever been involved, and our fighting forces have won the admiration of our country for their courage and valor; and

Whereas in every war it is the youth who give their blood and lives and make the greatest sacrifices; and

Whereas the men who have gone through the horrors of battle should have a voice in making the peace: Therefore be it

Resolved by the house of representatives (the senate concurring), That we ask our Congressmen and Senators in Washington to do all in their power to see that representatives of the veterans of this war including officers and enlisted men who have had combat service and some of whom were less than 30 years of age when chosen as delegates, be at all future conferences for world peace; and be it further

Resolved, That a copy of this resolution be sent to each of our Congressmen and Senators in Washington and to the President of the United States.

APRIL 24, 1945.

Indoctrination

EXTENSION OF REMARKS

OF

HON. HUBERT S. ELLIS

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. ELLIS. Mr. Speaker, the War Department document entitled "Three Ways To Spot United States Fascists," which was supplied to discussion leaders in Army camps, is now attracting attention not only in the Congress but throughout the land. The wisdom of such propaganda on the part of the Army is being questioned.

Today I submit to you an editorial from the Point Pleasant Daily Register, published in Point Pleasant, W. Va., which you will find timely and interesting:

INDOCTRINATION

The War Department has provided discussion leaders in Army camps with Three Ways To Spot United States Fascists. It says that a person who does any of these things is in "a mental state that lends itself to the acceptance of Fascist aims":

1. Believes in a master race; is antagonistic toward any particular race or religion, toward labor or the foreign born.

2. Is intolerant of the brotherhood of man; opposes international cooperation; spreads propaganda against the British, Soviet, French, or United Nations.

3. Indiscriminately applies the label "red" to persons and ideas he dislikes.

Any person given to such practices is, of course, ignorant, vicious, antisocial, antidemocratic, a menace to the national and international communities. But is he a Fascist, actual or potential?

A Fascist is an adherent to the philosophy of the Fascisti, a gang of thugs organized by one Benito Mussolini (remember him?) for the ostensible purpose of rescuing Italy from communism but for the actual purpose of serving the ambitions of Mussolini and his associates.

So far as we remember the Fascisti never argued the theory of a master race, or raised a religious issue, or persecuted Jews or Negroes as such. Far from being antilabor as we use that term in the United States their program contained a liberal dash of syndicalism, which aims, by strikes and violence, at giving workers' organizations control over production.

It was Hitler and his Nazis who expounded the master race thesis, and blamed Jewry for all the world's ills and persecuted Jews with a sadism that has horrified every civilized person.

We hate communism. We hate fascism. We hate nazism. We hate Japanism—and all totalitarianism. Nevertheless, we claim the right of any man, woman, or child who disagrees with us to accept and propagandize his fallacies to his heart's content, so long as he does it peaceably and out of conviction, and not at the behest or for the benefit of any alien government.

The Army betrays ignorance of what fascism is. But even if it had correctly spotlighted Fascism it would still be wrong. It is the duty of the Army to defeat our enemies—which it is doing to perfection—and not to use its vast authority to hint that certain beliefs, detestable as they are, come within the purview of our armed forces.

TVA Chairmanship

EXTENSION OF REMARKS

OF

HON. JOHN W. FLANNAGAN, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. FLANNAGAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Washington Post for May 4, 1945:

TVA CHAIRMANSHIP

The harnessing of the Tennessee River to the uses of those who live within its valley has been one of the great and heartening stories of our time. It is a story in which David E. Lilienthal, as Chairman of the Tennessee Valley Authority, has played a major role. He conceived of the river and the soil surrounding it and the people who lived upon it, to use his own phrase, "as a unity." He understood the desirability of making balance a concomitant of growth—of promoting power development, navigation, soil conservation, and flood control synchronously in accordance with a rounded, integrated plan. He saw that to carry out this plan, the TVA had to operate free from political spoilsmanship.

Mr. Lilienthal's insistence on keeping politics out of TVA has earned him some formidable opposition in the Senate—where his name must go for confirmation now that President Truman has nominated him for reappointment. The President of the Senate, Mr. MCKELLAR, of Tennessee, in particular, has avowed bitter enmity toward him and has manifested it on many an occasion in efforts to shackle the TVA and subject it to political control. It would be most unfortunate if Senator MCKELLAR's bitterness were to prevail. A reprisal upon Mr. Lilienthal would be more than an injury to an able public servant. It would be at once an injury to the agency he serves and to the whole merit system in public life. It would be a triumph for the spoils philosophy. We congratulate President Truman on his renomination of Mr. Lilienthal and trust that he will back it up with his full support in any contest that may be waged over confirmation.

Postal Pay Raise

EXTENSION OF REMARKS

OF

HON. E. C. GATHINGS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. GATHINGS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Memphis Commercial Appeal of April 23, 1945:

POSTAL PAY RAISE

When life runs along in a smooth, uninterrupted manner and our daily routines seem almost as natural as the course of the time itself, we are prone to take a good many things for granted, little realizing that some of the most commonplace, familiar services are the products of active brains and sure hands.

There was a short story in the Commercial Appeal last Saturday relating how a former Memphian, now on a battle front, won a $100 bet by demonstrating to his buddies that postal employees in his home town would deliver a letter even if it were addressed phonetically. To prove his point, he mailed a message to D. Canale & Co., but addressed it to Deacon Alley.

Promptly the letter went to the wholesale grocery company, was acknowledged, the soldier collected his wager, and the scoffers were silenced. The mail had gone through again.

But back of that little story is the amazing efficiency of the men who handle the United States mails, your letters and mine. It would have been quite easy for some clerk to mark "Unknown here" on the envelope and return it to the sender, but postal people are proud of their tradition of getting the mail to its proper destination, in the shortest possible time.

Many other examples, more serious ones, of the sort could be cited. Men and women who handle the mail get it through, even when addresses are obscure or difficult to decipher. They even trace addressees to the four corners, many times beyond the strictest call of duty. They're proud that they can.

To your mail carrier, and to the clerks and sorters who work behind the scenes, you are indebted for the promptness and accuracy that bring to you so much that is vital to your way of life. Tidings of birth and death, the ebb and flow of mail that keeps the Nation's business moving, the tender billets doux of sweet young romance, even those heartbreaking letters in official envelopes these sad days, letters commencing "The Secretary of War regrets to inform you * * *."

And yet, for 20 long years, postal employees have had no wage adjustment, no raise, to compensate for rising living costs, to acknowledge the vastly increased work they have had to perform, even during the harrowing war years.

True, they received the temporary war bonus in 1943, a miserly $300 a year, and this in the face of a $47,000,000 surplus turned into the Treasury by the Post Office Department.

These men and women have done, and are doing today, a magnificent job. They have been, and are, victims of our attitude of taking mail service for granted. Pending now in the Congress is the Mead-O'Brien proposal to grant to postal employees wage increases compatible with the ever-expanding services they render, increases more nearly adequate to provide reasonable living standards for these men and their families.

Here is one activity vitally affecting every American. Congress should grant wage increases to postal employees now. There is more than ample reason why every citizen should tell Congress to do the just and decent thing. To deprive, for another day, these faithful public servants of what they have earned the hard way is dishonest. The American way demands an immediate adjustment, upward, of postal employees' salaries.

Franklin D. Roosevelt

EXTENSION OF REMARKS

OF

HON. ROBERT RAMSPECK

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. RAMSPECK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following tribute to the late Franklin D. Roosevelt, prepared by Charles J. Farrington, Jr., a 16-year-old student in the junior class at Fishburn Military School:

REMEMBERING PRESIDENT FRANKLIN D. ROOSEVELT

The late afternoon hours of Thursday, April 12, 1945, passed quietly in America, but took with them the life of a man who was the strength of that Nation; for it was then that Franklin Delano Roosevelt, thirty-second President of the United States and greatest of twentieth century Americans, died in the service of the Nation whose survival in the war and progress in the peace was uppermost in his heart.

For 12 years Franklin Roosevelt guided America through grim days of depression, jubilant days of prosperity, and trying days of toilsome, bloody war. It was he who, because his country needed him, broke all precedents in accepting a third, and then a fourth term to that highest of Government offices for which his fellow countrymen considered him so capable. It was he who, more than any other man, knew how to deal in international affairs with the leaders of the other great nations of the world. It was he who, because of democracy, was given a chance to be active and progressive in spite of his physical affliction. From the experiences of his own life, Franklin Roosevelt knew the great truth and meaning of those immortal words of the Declaration of Independence "That all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty, and the pursuit of happiness." It was out of his deep appreciation for all the advantages granted him under the American system of government and a sincere reverence for Almighty God, that he willingly gave his time, his finest efforts, and, finally, his life, to the cause which he considered most worthy of the attentions of mankind, the cause of peace and freedom for all.

In the pensive hours which followed Franklin Roosevelt's departure from our midst to eternal life, there was not an American alive who was not shocked and grieved at the realization of the great tragedy which had come to our Nation. The death of the President at such a decisive hour as this seems unfair, but perhaps it was in the wise planning of God to take away this champion of

democracy in order that fresher hands might have their chance to lead America to the inevitable victory over its totalitarian enemies, and, with the united cooperation of all its people, to bind up its battle wounds and to establish a just and lasting peace with all nations. These are the goals we must all labor to achieve. These are the things for which Franklin Delano Roosevelt lived and died. Our finest tribute to him, who was the defender of our democratic institutions in war and in peace, shall be a complete victory and the reaffirmation of the loyalty of Americans all over the world to the ideals of unconquerable peace and endless prosperity for all.

To the White House, a crowded convention hall, Warm Springs, Yalta, the Chamber of the House of Representatives, Teheran, Hyde Park—Franklin D. Roosevelt will go no more, but everywhere he will be remembered as a symbol of the dedication of a free nation to the cause of creating a world united for peace and progress. We Americans have lost a great and loyal friend; however, we find a consoling message in his last prepared speech. In his farewell message he made a final request when he said:

"I ask you to keep up your faith. I measure the sound, solid achievement that can be made at this time by the straightedge of your own confidence and resolve. To all Americans who dedicate themselves to the making of an abiding peace, I say:

" 'The only limit to our realization of tomorrow will be our doubts of today. Let us move forward with strong and active faith.' "

May God reward the great work of Franklin D. Roosevelt for the safety of the United States of America, by bringing about a speedy climax to the war on all fronts, and by giving us, the living, his indomitable courage to go forward in peace and freedom once more.

CHARLES J. FARRINGTON, Jr.

Retirement Plan for Congressmen

EXTENSION OF REMARKS

OF

HON. HERMAN P. KOPPLEMANN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. KOPPLEMANN. Mr. Speaker, Under leave to extend my remarks in the RECORD, I wish to insert an editorial appearing recently in the Thompsonville Press of Thompsonville, Conn. Mr. Philip Sullivan, the editor, believes in a retirement plan for Congressmen.

The editorial follows:

SIMPLE JUSTICE

The death of Senator Francis T. Maloney, stricken at the height of his powers, and near the peak of his usefulness, was a sad event to all of us in Connecticut. The Senator's death has proved one thing. Namely, that the Federal legislators have not been just to themselves, and have not had the courage to be just to themselves. It is only a matter, we believe, of some 2 years or so ago that it was proposed that Senators and Members of the House of Representatives of the Federal Government have created for them a pension system. Now this was simple elementary justice, because many of these men gave big hunks of their lives in their services as legislators.

However, a hue and a cry went up, and the Congress was accused of political self-pocketing, and of a sort of personal nepotism. This was unfair and unjust, but as a result of the turmoil which occurred, the Congress dropped the project. We claim to know whereof we speak when we assert that serious legislators, whether in the State or Federal Government, works hard, indeed. The work of leading legislators is just as arduous and difficult as the work of a judge of the superior court or the United States district court.

In Connecticut, superior court judges and common pleas judges receive retirement pay upon the conclusion of their careers. For our State employees, we have a State retirement plan. But, for the Congress of the United States, there is no provision of any consequence for these men when they retire by political accident or event, and such retirement is the fate of most of them as time goes on.

Having in mind the sudden and tragic death of Senator Maloney, as he worked for his country, we seriously urge Connecticut legislators in the National Congress to think over the justice of such a retirement plan. We have the fancy that a legislative move in this direction in the future, or near future, could be made better understood to the country, when all the facts are told.

Letter of Dr. Edward A. McDowell to the President of the United States

EXTENSION OF REMARKS

OF

HON. JOSEPH R. BRYSON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. BRYSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include copy of a letter which appeared in the Baptist Courier, May 3, addressed to President Truman by Dr. Edward A. McDowell. Dr. McDowell was a schoolmate of mine at Furman University, Greenville, S. C. He is now a distinguished professor at the Southern Baptist Theological Seminary, Louisville, Ky. It seems to me Dr. McDowell's letter is most appropriate and I take pleasure in presenting it, as follows:

The PRESIDENT,

The White House, Washington, D. C.

MY DEAR MR. PRESIDENT: Your simple request, "Pray for me," has aroused in God-fearing Americans everywhere a confidence in you that nothing else you might have said could have aroused in this trying hour in our Nation's history. It gives us confidence to know that you are a man of simple faith in God, unashamed to make such a request.

In one of my classes I learned from one of the students from Missouri that you are a member of a little Baptist church in your home State. We who are Baptists will pray that you will discover in your early spiritual experience and in your Baptist heritage sources of power and inspiration for the epochal and trying days that lie ahead of you. Ours is a great heritage, Mr. President—a heritage of simple faith in God and in His Son, Jesus Christ; a heritage of love of freedom, of the dignity of the individual, of human rights, of spiritual and political democracy. It is our prayer that this heritage may be real and vital to you as you face the stupendous responsibilities of the future. If you rest upon this heritage, you need have no fear—you will become a great President and a worthy successor to Jefferson, Lincoln, Wilson, and Franklin D. Roosevelt.

You may be assured, Mr. President, that you have the prayers of the faculty and students of the Southern Baptist Theological Seminary, and that the more than 5,000,000 Southern Baptists, to whom you belong, will respond with pride to every evidence of your success and of your fidelity to our heritage.

Very respectfully yours,

EDWARD A. MCDOWELL.

Polish Constitution Day

EXTENSION OF REMARKS

OF

HON. PHILIP A. TRAYNOR

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. TRAYNOR. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following resolution of the Council of the Polish Societies and Clubs in the State of Delaware:

We, Americans of Polish descent, assembled at the Modjeska Hall, at Wilmington, Del., on Sunday afternoon, April 29, 1945, to commemorate the adoption of the Polish Constitution on May 3, 1791, one of the world's great documents of freedom, like our Declaration of Independence, and to pay homage to creators of liberty and equality for the Polish nation 154 years ago.

Further, we, as Americans of Polish descent, adhering to the principles set forth by our founding fathers who, in the Declaration of Independence, proclaimed that all men are created equal, and that they are endowed by their Creator with certain inalienable rights, such as life, liberty, and the pursuit of happiness, and that governments derive their power from the consent of the governed, which principles have never been violated by our Nation—strongly disapprove of the decision reached at Yalta which refers to the so-called small nations, Poland and Baltic states included, for they deprive these peoples of their God-given right of self-determination substituting it with external coercion, in violation of the principles of the Atlantic Charter, the Bill of Rights, and any other concept of democratic ways of life and thinking.

Whereas the only legitimate government of Poland, now in London, has been excluded from any and all participation in the selection of even a temporary administration of their martyred land, and that the great masses of the Polish people, who have survived the terrible and long Nazi occupation, could not and have not been consulted in any way.

Whereas the tragedy of the Yalta Conference lies in the fact that a green light was given to the forces of oppression, as exemplified in the puppet regime, created first in Lublin and then moved to the ruins of heroic Warsaw. For at this time, from both sides of the Atlantic, from the lips of the British Foreign Secretary in London, as well as from those of a United States Senator in Washington—has come confirmation of arrests, mass executions, deportations, and other acts of violence now being committed by the Soviet-sponsored Lublin regime officiating in Warsaw.

Whereas it is to be deplored that our gallant allies, the Poles, who spilled so much blood on the battlegrounds of Poland, Norway, Africa, France, Italy, Belgium, and Holland, in defense of our common war aims, were denied the elementary right of representation at the San Francisco Conference, where the fate of Poland will also be discussed. At San Francisco, as at Yalta, the aggressor will again sit in judgment upon its own acts of aggression, while the victim, Poland, who opposed the Germans even when

the Russians collaborated with them in the first 22 months of the war—will not be accorded the formality of a hearing granted even to the worst criminals in all courts of justice. This is repugnant to our American sense of honesty, decency, and fair play.

We therefore appeal to the conscience of every free thinking man and woman in our country, to our fellow citizens of these United States of ours, to all Members of both Houses of the Congress of the United States to petition and prevail on our representatives at the San Francisco Conference from which Poland and the Baltic States have been excluded and will have no voice, to join us in support of our great Christian, democratic, and civilized movement for the preservation of decency in international relations, of right over might, of justice over injustice and violence—in the defense of Poland, the Baltic States, and all other downtrodden and helpless peoples.

Furthermore, we here assembled declare that by supporting Stalin's dictatorial decisions is the perfect way of inviting disaster for the world. That this war and sacrifices of four boys on the world battle fronts, and our sacrifices here at home shall have been in vain, thus bringing distrust and condemnation from all people loving freedom, liberty, and independence as the aggressive plans in Poland by Soviet Russia has constituted a dangerous situation toward the security of the world and also of our United States of America, making the San Francisco Conference and all other post-war conferences a mockery for any future lasting peace or stoppage of future wars.

CHARLES L. PARUSZENSKI,
Chairman.
VINCENT J. TOWALENSKI,
Secretary.

Hitlerism Is Dead, Even if Hitler Is Not

EXTENSION OF REMARKS
OF
HON. JOSEPH R. BRYSON
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. BRYSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include therein a timely editorial from the Spartanburg Herald of May 3, 1945:

HITLERISM DEAD, EVEN IF HITLER ISN'T

Nazi reports of Hitler's death have been received with some skepticism throughout the world.

The British Foreign Office believes the reports of his death are true while doubting the accuracy of the German claim that he died in battle.

In Russia the Hitler death reports were described as a Nazi trick, and Moscow will not accept them as true until independent supporting evidence is available. With their armies now smashing at the last remnants of German resistance in Berlin, the Russians probably will soon be in a position to confirm or refute the German report.

In the United States the news seemed too good to be true, and the people are taking it with a grain of salt. Official Washington has adopted a "wait and see" policy until more substantial evidence than the Hamburg radio announcement is at hand.

Whether the physical body of Adolf Hitler is dead or alive is something we all would like to know.

That does not matter so much, however, as does the question of whether or not the evil influence he has held in world affairs is dead.

From all the evidence, we can be reasonably sure that Hitler has come to the end of his career as head of the German Reich and as the guiding spirit of a political philosophy that all but wrecked the world. Whether the end came by death or in cowardly flight doesn't matter much.

As he threatened months ago, Hitler has pulled down Germany, and much of Europe in ruin with him, as he fell.

With her cities smashed into shambles and rubble and the wehrmacht hopelessly split up, Germany is at the end of her rope. The Hitler death report, the surrender of the German armies in Italy and the disappearance of the more important Nazis from places of power in the Government all point to the conclusion that powerful forces for making peace are at work inside Germany.

Regardless of what fate has fallen Hitler, it is safe to say that Hitlerism is in its dying agony. It is up to us to see that no monster like it will be allowed to arise in the future to scourge the world.

The Poll Tax

EXTENSION OF REMARKS
OF
HON. ANDREW J. BIEMILLER
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. BIEMILLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an enrolled copy of Assembly Joint Resolution 27, adopted by the 1945 session of the Wisconsin Legislature memorializing Congress to abolish the poll tax:

Assembly Joint Resolution 27

A joint resolution memorializing Congress to abolish the poll tax

Whereas 10,000,000 citizens of the United States are presently deprived of their gift of free suffrage by poll-tax laws in eight States which impose upon the exercise of the elective franchise limitations neither contemplated nor condoned by the Constitution of the United States; and

Whereas, taking advantage of the inability of these 10,000,000 citizens, both Negro and white, to express themselves politically by participating in the choice of their representatives in government, both State and Federal, a few have been able to perpetuate themselves in office and, heedless of the needs and wishes of the people in their districts, have refused to recognize the grave perils that endanger our country and seek to disrupt the unity of our country and the mobilization of all our forces for the successful prosecution of the war; and

Whereas at a time when the morale and strength of the people of this Nation are needed increasingly if it is to survive, it is a dangerous inconsistency to continue to deprive any section of them of their democratic rights, to preserve which this war is being fought; but rather it is necessary to draw all men and women, no matter what their race, creed, color, or economic position, into full participation in the struggle for victory; and

Whereas the continuation of the poll tax in free America furnishes propaganda for the Axis to the great mass of colonial people who are fighting with us in this war for their freedom; and

Whereas the abolition of the poll tax will enable these 10,000,000 citizens to enter fully into their rights and duties as American citizens, and will, at the same time, weaken those forces who place petty self-interest and personal power above the need for complete mobilization for victory and will strengthen national unity and morale: Therefore, be it

Resolved by the assembly (the senate concurring), That this legislature respectfully petitions the Congress of the United States to speedily enact legislation which effectively abolishes the payment of a poll tax as a qualification for voting for candidates for office in the Federal Government; be it further

Resolved, That a duly attested copy of this resolution be immediately transmitted to the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States, and to each Member of the Congress from this State.

DONALD C. MCDOWELL,
Speaker of the Assembly.
ARTHUR L. MAY,
Chief Clerk of the Assembly.
OSCAR RENNEBOHM,
President of the Senate.
LAWRENCE R. LARSEN,
Chief Clerk of the Senate.

Statement of J. P. Morgan & Co.

EXTENSION OF REMARKS
OF
HON. JAMES C. AUCHINCLOSS
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. AUCHINCLOSS. Mr. Speaker, in the RECORD dated May 1, 1945, the gentlewoman from California, Mrs.. HELEN GAHAGAN DOUGLAS, received unanimous consent to insert three articles by the columnist, Drew Pearson, all of which she described as "three important articles on the San Francisco Conference which should be read widely." One of these articles dated Friday, April 27, 1945, quoted from what was purported to be a statement made by the Nazi administrator in occupied France, who in turn claimed to quote a French partner of the firm of J. P. Morgan & Co.

The gentlewoman from California further stated that this article was suppressed at the insistence of J. P. Morgan & Co. I quote from the statement issued by J. P. Morgan & Co., given to the Bell Syndicate, which handles articles written by this notorious columnist, as follows:

The column of Drew Pearson released for April 27 contains references to Morgan and Cie Paris, to a French partner of that firm, and to J. P. Morgan & Co., that are cruel, wholly false, and libelous. Certain of them purport to have been made by the Nazi administrator in occupied France—a strange source for the emanation of reliable information. The fact is that Morgan and Cie refused to do business with the Germans during the war. The French partner is a loyal Frenchman and now serving in the French army. The position of J. P. Morgan & Co. during this war and the last is too well known to need defense from these charges.

The gentlewoman, in the extension of her remarks, expresses the opinion that the freedom of the press and the freedom of speech are guaranteed under the Constitution and should not be abridged. We can all agree with this philosophy,

but freedom of the press does not mean license to spread falsehoods and malicious rumors. I think Members of Congress should be extremely careful in verifying any statements that are placed in the CONGRESSIONAL RECORD, and not lend themselves as unconscious agents of the spreading of false and libelous statements.

John R. Flynn and the Dashnags

EXTENSION OF REMARKS

OF

HON. FRANK E. HOOK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. HOOK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article:

JOHN T. FLYNN AND THE DASHNAGS

Frantically trying to sabotage the sedition trial and smear witnesses, the McCormick-Patterson press axis has now resorted to the use of lies lifted direct from Fascist files. Writing in the Washington Times-Herald, John T. Flynn, ex-America Firster, has attacked John Roy Carlson, Armenian-born author of Under Cover, and prospective Government witness in the sedition trial. Flynn seems to have based his article almost exclusively on the time-worn web of lies concocted by the Armenian Revolutionary Federation, also known as Dashnag, with headquarters in Boston. This revolutionary gang with a long record of terrorist-fascist activity, is negligible in number but well organized. It is thoroughly discredited in the eyes of Americans of Armenian origin, the overwhelming majority of whom are loyal and law-abiding citizens grateful to the United States of America.

Flynn's masterpiece of distortion is proving popular with native Fascists. It is being circulated widely in Chicago at meetings of We, the Mothers Mobilize and other defeatist groups identified with the Bund, Silver Shirt, and Coughlinite mentality. Flynn's smearpiece has been picked up by Gerald L. K. Smith, boosted in the Chicago Tribune and the Brooklyn Tablet in a futile attempt to offset the searing effects of Under Cover. And the bulk of Flynn's "facts"—flimsy, picayune, irrelevant half-truths, distortions, and outright lies—have been inspired by Armenian Fascist circles in Boston.

In accepting the usual trash from the Dashnag kitchens of journalistic rot, Flynn has insulted all American Armenians (except the criminally minded Dashnag) and committed the sacrilege of terming their martyred Prelate a "Communist agent." Flynn has whitewashed the sordid Dashnag record and called it "patriotic." Dashnags' Nazi sympathies are clearly shown in this sample quotation from the September 17, 1936, issue of their Armenian-language organ, Hairenik, edited daily by propaganda chief, Reuben Darbinian:

"Italy has not only become regenerated by fascism, but has become an empire nation, and today is reckoned as a military power in international politics. Germany has not only become regenerated by Hitlerism, but has turned her face to the east, and displays her fist to Moscow. * * * Hitlerism and fascism, which are the stepsons of bolshevism, and begotten by it, are its gift to mankind, know where they are going. Germany has found her element, Russia has lost it (translation)."

In order to understand the role of the Armenian Revolutionary Federation (ARF), it is necessary briefly to review Armenian history, for ARF misdeeds in America are rooted in the ideologies it fostered in the stormy, feud-infested underworld of the Near East.

DASHNAGS AS REVOLUTIONISTS

The Dashnags are a secret political society of self-styled socialist-revolutionists, founded in 1890 in the Caucasus in order to liberate Armenians from Turkish oppression. Its form was (and is) oligarchic and its members subject to strict militaristic discipline. Instead of resorting to the ballot or constitutional methods, the ARF determined to "achieve political and economic freedom by means of rebellion," and "terrorize Government officials, betrayers, and all sorts of oppressors." According to official Dashnag publications (from which these excerpts have faithfully been made, it proceeded to "form fighting bands" and "use every means to arm the people." Droshag, official ARF organ, reporting on a party congress at Geneva, summed it up as follows:

"Expressions of revolutionary tactics—general rebellion, armed resistance to the forces of government, wide political terrorism, projects of revolutionary demonstrations, armed popular self-defense, political and economic strikes, peasant and labor movements—all of these, cultivated and unified in their minutest details, shall constitute the totality of the system of a modus operandi by which the party is to achieve its program in life (translation)."

DASHNAGS AS POLITICAL TERRORISTS

"Should we continue terrorism or not?" party leaders asked in an official booklet, and answered the query: "After a few successful operations, thanks to the terroristic disposition of the leading elements, the party eventually completely adopted terrorism." Terror and intimidation were used in instruments indispensable to political warfare precisely as later used by Nazi brownshirts. Terrorism was directed mainly against Armenians, and few who opposed the ARF were spared, whether laymen or holy priests. Dashnags—as did Russian nihilists of the time—lived in a world of total hate and revenge.

I. Jamharian was a wealthy Armenian who refused to contribute. He "fell under the blows of a dagger * * * in broad daylight in the courtyard of the Armenian church, in the presence of a great throng," wrote M. Varandyan, Dashnag historian. Death sentences were decreed by the central committee and were detailed to the "terroristic body of the ARF experts in political murder regionally located. A dagger (Dashnag, which is the abbreviation for the Armenian word federation, itself means dagger) was the most frequent instrument used. Droshag widely publicized acts of terrorism and triumphantly ended its reports with "The terrorists are at large." In one instance a killer was caught and executed; Droshag lamented the death of "that noble soul." In September 16, 1933, Hairenik, Dashnag mouthpiece of Boston, reaffirmed the traditional policy of terror:

"Another effected practice was the intimidation of prominent men in order to obtain financial support. Those who refused were 'put on the spot.' In fact, it was very similar to the underground methods of modern racketeering, except that its goal was noble."

By a curious twist of diplomacy the ARF became rulers for about 2 years (1918–20) of the territory now comprising Soviet Armenia. Being used to revolutionary methods, however, they failed as administrators. They engaged in a series of expansionist wars which ended disastrously. Torn by dissension, famished, decimated, and also threatened by Turkey, the populace welcomed Bolshevist rule, which promised bread and peace. After purloining the national treasury Dashnag leaders were ousted from power.

TERRORISM IN AMERICA

Armenians in America, while not gratified with Soviet rule, are content to see age-long massacres ended and Turkey, the dread Mohammedan enemy, held at bay. A degree of religious tolerance has been granted to the Holy See of the Armenian Church in St. Etchmiadzin in the shadow of Mt. Ararat, enabling it to hold elections, appoint bishops and keep alive the flame of Christianity "in the hope," as expressed by Bishop Mazloumian of Greece, "that tomorrow may have something better in store for us."

Since their ousting, exiled Dashnag leaders have entered into a web of intrigue with any power which promised to place them in the saddle again. In 1933 Hitler lavishly promised everything to everybody, and looked with particular favor on any disgruntled clique which could pave the way for his drang nach osten policy of reaching the Caucasian oil fields. Early in 1933 Dashnags suddenly revived their cult of the tricolor—its red, orange, and blue party flag. In mass revivalist meetings, marked with wild religious frenzy, they worshipped the defunct flag of a defunct regime.

On July 1, 1933, Archbishop Leon Tourian, Primate of the Armenian Church in North and South America, refused to speak at Armenian Day at the Chicago Fair unless the Dashnag tricolor was removed. He demanded that only the American flag appear; the audience voted overwhelmingly in his favor. From then on the infuriated ARF press denounced the archbishop as a traitor and a Soviet agent.

At an outing in August 1933, he was attacked by seven Dashnag hoodlums while blessing parishioners of the Worcester Church of Our Saviour. Hairenik began to print letters threatening his life. Four samples follow. "Archbishop Tourian will be punished sooner or later. The day of reckoning will come." * * * "He is going to be sorry for it, and very sorry." * * * "He will get his share, I am sure." * * * "Until Tourian is punished ruthlessly, the bones of our marytrs will not rest in their places." Hairenik stepped up its tempo by printing a letter which offered a reward: "I will gladly give $100 if something is done to teach Tourian a lesson." When the Archbishop asked for police protection Hairenik denounced him for seeking the protection of "alien (American) police."

In December 1933 while celebrating Christmass mass in the Holy Cross Church in New York, the Archbishop was murdered by a gang of Dashnag assassins in the favorite Dashnag manner; a butcher knife plunged deep into his groin. Two ARF officials were convicted of first-degree murder, seven other Dashnags were convicted of first-degree manslaughter. The convictions were sustained in successive courts while the ARF press (under Darbinian's complete charge) spoke of "ignorant jurymen," "false witnesses" and slurred the American judiciary. It referred to its nine cutthroats as "our blameless comrades." On March 26, 1935, the Honorable Thomas E. Dewey, now Governor of New York, who had been engaged by Armenian democratic forces in the United States to help prepare the case against the Dashnag, wrote to the Honorable Herbert Lehman, then Governor:

"For many years a very small group of fanatic zealots among the American people have perpetrated murders and assaults upon the duly constituted authorities, in a campaign of terrorism * * * for the purpose of imposing the will of the few, upon the many. I believe it is correct to say that this group, the Dashnags, does not constitute more than 5 percent of the Armenian population. Nine murders of those in high authority are attributed to this group within

the past 10 years and the murder of Archbishop Leon Tourian * * * is the most shocking of these crimes and the first conspicuous invasion by this group into the field of terroristic murder in the United States."

WHO WAS ARCHBISHOP TOURIAN?

He was descendant of a distinguished family of clerics, scholars, and statesmen. The former patriarch of Jerusalem was his cousin. He was a linguist, author of four books, including a translation of the beautiful Armenian liturgy into English. He served as bishop of Bulgaria, primate of Smyrna, vice patriarch of Constantinople and Armenian archbishop of England. He was a friend of Right Rev. William J. Manning Episcopal Bishop of New York, who participated in the burial services in the Cathedral of St. John the Divine and recited a special prayer for the martyred prelate. A tall, stately figure, the prelate gave hope to and glorified the democratic aspirations of Americans of Armenian origin. By obeying the dictum of the Holy See to keep partisan and political strife out of the church, he gained the undying enmity of the Dashnag gang.

Preceding the trial, the ARF had called the archbishop a "Soviet agent." Then they changed their tune and called his murder a "Bolshevik plot." Dashnag attorneys failed completely to produce a shred of evidence to support these Nazi inspired charges.

DASHNAGS AS PRO-NAZIS

Following the murder, the Dashnag press showed marked Nazi leanings. Here are sample excerpts from the September 17, 1936, issue:

"The former Germany, defeated in the Great War, lacking popular unity, conducted an uncertain, confused, day-by-day policy which got her nowhere * * * And came Adolf Hitler, after Herculean struggles. He spoke to the racial heart string of the German, opened the fountain of his national genius, struck down the spirit of defeatism.

"Now, there is a Germany, strong, united, aggressive, proud, and self-reliant. She has torn and given to the winds the principal restrictions of the Versailles Treaty, and is now a national power, equal to, if not higher, than the great at the green tables of Europe and the world. Internally organized, externally impressive, the German people have come to occupy the place which was theirs before the war. * * *

"At no period since the World War had Berlin conducted so realistic, well-organized, and planned policy as now, since Hitler's assumption of power. At no time the German thought had been so explicit, clear, and rich as now. * * * And whatever outsiders may think concerning Hitlerism and fascism, as a system of government, it is proved that they have revitalized and regenerated the two states, Germany and Italy."

DASHNAGS AND ANTISEMITES

Flynn's "patriots" have published some notorious anti-Jewish lines. A series of three lengthy front-page articles written by a Dashnag just returned from Germany, were published in the August 19, 20, 21, 1936, issues of Hairenik, extolling the Nazi regime, the myth of Aryan culture, and whitewashing Nazi persecution:

"Jews of all people being the most fanatical nationalists and race worshippers, wherever they go they are compelled to create an atmosphere and the rites and customs of internationalism and world citizenship in order to preserve their race exalation pure. * * * As the British use battleships to occupy lands and to protect their fatherland, in this same way the Jew uses internationalism or communism as a weapon. * * *

"Sometimes it is difficult to eradicate these poisonous elements when they have already struck deep root like a chronic disease. And when it becomes necessary for a people to eradicate them in an uncommon method, these attempts and methods are regarded revolutionary. During a surgical operation the flow of blood is a natural thing. * * * Under such conditions dictatorship seems to have the role of a savior" (translation).

Hairenik Weekly is the English language organ of the Dashnag, edited in Boston by James Mandalian. The Weekly voiced the political sentiments of the mother publication but exercised greater restraint. The August 9, 1935, issue started off with a reference to the Jewish controlled film industry, then ascribed Armenian massacres to the Turkish Jews of Salonika because of the Jewish love of gain. The May 10, 1935, issue quoted the vice mayor of Bucharest as saying: "The Armenians [meaning Dashnags only] have helped us Rumanians not to become slaves of the Jewish elements." An article in the September 25, 1936, issue of the Weekly denounced Zionist aims, and adopting a strong Arab nationalist view concluded with:

"And the type of Jew who is imported to Palestine is not anything to be proud about. Their loose morals, and other vices which were unknown to the Arabs prior to the Balfour Declaration, on top of all communistic activities, were the cause of most of the Arab criticism."

DASHNAGS AS ANTI-CHRISTIAN

Flynn's patriots also have a record of anti-Christian utterance. The archbishop's heinous murder had its roots in Dashnag disrespect for church and clergy. It was common practice for ARF chiefs to burst into a church, fling open the doors and using the altar and chancel as platform hold political meetings. In at least two instances Armenians who tried to protect the Church of Smyrna from being desecrated were shot on the spot by Flynn's patriots. Dashnag leaders have always tried to seize political control of the church and reduce it to an instrument of Dashnag ideology.

They carried their cancerous feud even to America, but thanks to the devotion of a flock loyal to a historic church founded in 301 A. D., the ARF plan has failed. Hairenik Weekly evidently tried to poison the American-born Dashnag generation with a dose of anti-Christian hate and published two astonishing letters (March 29, 1935), headlined "Better off without Christianity." Excerpts follow:

"I. By accepting Christianity as our national religion we lost more than we gained as a people. There is nothing we as a people should thank Christianity for * * * and plenty we should regret on account of it.

"II. The Armenian cause suffered by the adoption of Christianity. The new venture was not particularly beneficial nor reassuring. * * * We lost much of our virility as a militant race. Before Christianity Armenia was a powerful state capable of more than holding her own. * * * We possessed national unity, solidarity, and virility."

DASHNAGS AS RACE WORSHIPPERS

Just as the myth of an Aryan superrace was conceived by the Nazis to rekindle hope among the defeatist and frustrated German masses, Flynn's friends added race worship to the cult of flag worship. A few months before the murder, Hairenik (September 27, 1933) published an article on racial religionism explaining the need for "racial convulsions" in order to achieve "racial awakening":

"The racial-religious believes in his racial blood as a deity. Race above everything and before everything. Race comes first. Everything for the race. * * * We hear the racial religious orders have their own general creed, their leadership, and political emblem. They are also going to have their own uniforms, their own hymn, their rites, their holidays (translation)."

The organizer of the Racial Religious Orders was military hack named Gen. K. Nejdeh. "Today Germany and Italy are strong," he croaked, "because as a nation they live and breathe in the terms of race" (Weekly, April 10, 1936). Adapting the slogan "Youth, heart, and iron," Nejdeh generally modeled Dashnag youth upon the Hitler youth pattern. At first called racial patriots, later they become known as Tzeghagrons—composed of two words: tzegh (race) and gron (religion): race worshippers.

From this point on the dope of decadent race worship, dead-hero worship and defunct-flag worship was injected into young Tzeghagron minds. Whipped into strict discipline, urged never to marry non-Armenians lest it "pollute" the "purity of the Armenian race," Dashnag leaders pursued the nationalist credo that Armenianism and Armenian race-nationalism be retained at all costs. Otherwise, they cried out in alarm, its youth would "disintegrate into the melting pot and be lost to Armenia." It urged political activity as a means of keeping the new generation anchored to its race. Listen to the drivel drilled into American-born Tzeghagrons (Hairenik Weekly, January 11, 1935) by Mandalian, Darbinian, Nejdeh & Co.:

"I am preaching to you the Tzeghagron creed, worship of the race. * * * To me the highest act of individualism and of freedom is to follow the voice of my race. I am a Tzeghagron. That means: I know my race. I believe in my race. I worship my race. I know that my race is great; that my race has given more to humanity than it has received from it. I am a believer in my race and, behold, I worship another deity, the blood of my race, in whose unspotted purity lies the future of our people. * * * The deification of the will of the race—that is what the Tzeghagron is fighting for."

DASHNAGS AND NAZI GERMANY

The question arises: were Flynn's friends subsidized by the Nazis or, as in the case of countless American Fascists, did Dashnags themselves bear all carrying charges? This issue of Propaganda Battlefront presents only the documented evidence and will draw no conclusions. But it is significant that in its editorial of November 1, 1936, Hairenik observed:

"Who can guarantee that Germany and Italy with their Polish and Hungarian and other allies, or independent of them, would not try to infiltrate beyond Transcaucasia as the Germans did in 1918. Therefore, instead of binding our fate to the 'undefeatable' army of the Soviet Union, isn't it wiser for the Armenian to think also of the day when that army is crushed, deserts our motherland, and leaves defenseless our people of the homeland (translation)."

Equally significant is an item in News Week of November 12, 1941, entitled "Armenian Puppet State:"

"As the Near East crisis develops, look for evidence of Nazi fifth-column activity by Armenians in Turkey and Syria. The Nazis have picked out the Armenian Revolutionary Federation or 'Dashnag' party to do the fifth-column work. This intensely nationalist organization has recently moved its headquarters from Switzerland to Paris in Berlin. * * * The Nazis have promised the Dashnags an autonomous state similar to Croatia in return for their cooperation."

Pages of Hairenik Weekly contained references to intercourse with Nazi Germany. The November 29, 1935, issue recorded that Frau H. Winkler was shipping to Tzeghagrons 200 copies of her book entitled "In the World of the Dragons." Formation of a Tzeghagron chapter in Berlin received repeated mention. The May 3, 1935, issue carried a letter from Hellmut Lange, a Nazi at Chemnitz, Germany, answering the query of a Tzeghagron on the Reich's attitude toward ARF aims:

"We Germans stand for the principles of self-determination not only for our German countrymen living under foreign oppression but also in favor of any other nation suffering in the same way. * * * National socialism is the mainstay of the national idea and the determined opponent of thraldom.

* * * We Germans cannot but recognize your claims as thorcughly legitimate. * * * Your aim is and must be Armenian rebirth to Armenian liberty in the Armenian spirit. We Germans want to have our countrymen free from foreign yoke. You as an Armenian patriot want to have Armenia free again. Can we both have a finer aim than this?

DASHNAGS AS COMMUNISTS

With the turning of the Nazi tide and the triumph of Soviet Armies, Dashnag policy in the past 6 months has completely reversed itself. The Dashnags have now seemingly turned Communist. The Mandalian-Darbinian enterprises regularly reprint from Lraper, Armenian organ they once denounced as Communist, from Sovetakan Hayastan, official organ of Soviet Armenia, and the Weekly (Mar. 29, 1944) published a panegyric on Soviet Armenia and the Patriotic War issued by the Soviet Embassy in Washington. Dashnags have already made subtle overtures to leftist Armenian elements. On May 19, 1944, a Weekly editorial (translated from the Hairenik) ignored its defamation of the Soviet regime and adulation of Nazi theory, and begged anti-ARF factions to forget the past and effect a merger, explaining:

"The attitude of the Federation toward the Soviet Government in relation to the practical Armenian national policy is no different from theirs. Like them the Federation too looks to the Soviet Government * * * and is willing to make all possible sacrifices for the realization of that national aim. The Federation, too, like them, admits that Soviet Ar-Armenia is the rightful political trustee of the Armenian cause."

DASHNAGS AS POLITICAL CHAMELEONS

Flynn's pals began as Socialists and Socialist-Revolutionists, turned into Nazi sympathizers and are now seeking favor with Soviet interests, while also courting Brother Flynn's brand of America First politicians. The fact is that a corrupt, self-seeking Dashnag leadership has always followed an opportunistic policy, becoming all things to all men—whatever was most lucrative for the moment.

But it's had business now to write pro-Nazi columns, and it's bad business to peddle anti-Jew hate. Hence Simon Vratzian, member of the Dashnag central committee in Boston, shed crocodile tears (Weekly, September 22, 1943) in an article entitled "The Jewish Tragedy." In hypocritical contrast to previous ARF sentiments, Vratzian bemoaned the "terrible fate" of Jewry and called Jews the "allies of civilization." Reversing its former anti-Zionist and pro-Arab nationalist views, the Weekly (March 22, 1944) devoted an editorial to the jubilee birthday of Rabbi Stephen Wise, chief exponent of Zionism, referred to him as one of Jewry's "noblest sons" and wished him the attainment of Zionist aims. But although the Dashnags have professed internationalist views on world collaboration, they are currently serving as informants for the ultra-isolationist, nationalistic McCormick-Patterson interests.

Dashnag leaders have tried to be everything to anybody—whether Communist, Nazi, Social-Democrat, Socialist, isolationist, or native Fascist. In order to survive they must be nourished by outside sources for they are shunned by those who know the truth about them.

But John T. Flynn insists on calling them "patriots." Dashnags have hoodwinked many with their wily chameleon politics, perverted patriotism, hypocritical professions of faith, employment of defrocked priests, glib flattery and bribery of the gullible and naive. But the prize catch in the ARF suckers' net has been John T. Flynn who, in the absence of any evidence against the author of Under Cover, has swallowed as truth the sewer-spawned lies of a disreputable Armenian terrorist-fascist gang completely unrepresentative of Americans of Armenian origin and ostracized by them.

As to John T. Flynn, what are his qualifications for posing as an expert in the machinations of wily Old World politicians now plying their trade in America? What are Flynn's motives in becoming involved in the nationalist-isolationist politicos of the Washington Times-Herald and the Chicago Tribune? Has Mr. Flynn always been a member of their camp and only now bared his apparent affiliation?

Source Material Which Shows FEPC To Be a Concentration Camp

EXTENSION OF REMARKS

OF

HON. JOE W. ERVIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. ERVIN. Mr. Speaker, it is my opinion that a permanent FEPC, which is proposed in certain legislation now pending in Congress, would create a concentration camp for all Americans. It is my purpose to discuss that question in the House today.

In order that everyone may read the source material upon which I am to base my argument on that question, I am including in this extension of remarks three documents, as follows:

Exhibit 1: A copy of H. R. 2232, which is the bill referred to;

Exhibit 2: A copy of portions of a little booklet entitled "FEPC—How It Operates"; and

Exhibit 3: A copy of the proceedings before the temporary FEPC in Case No. 65 against the United States Cartridge Co., of St. Louis, Mo.

These exhibits are as follows:

EXHIBIT 1

H. R. 2232

A bill to prohibit discrimination in employment because of race, creed, color, national origin, or ancestry

Be it enacted, etc., That this act may be cited as the Fair Employment Practice Act.

FINDINGS AND DECLARATION OF POLICY

SEC. 2. (a) The Congress hereby finds—

(1) that the practice of discriminating in the matter of employment, and in matters relating thereto, against properly qualified persons because of their race, creed, color, national origin, or ancestry leads to domestic and industrial strife and unrest and forces large segments of the population permanently into substandard conditions of living, thereby creating a drain upon the resources of the Nation and a constant threat to the maintenance of industrial peace and of the standard of living necessary to the health, efficiency, and well-being of workers; and

(2) that the existence of such practices in industries engaged in commerce or in the production of goods for commerce causes the means and instrumentalities of commerce to be used to spread and perpetuate such conditions throughout the several States and causes diminution of employment and wages in such volume as substantially to impair and disrupt the market for goods in commerce, and burdens, hinders, and obstructs commerce.

(b) Individuals shall have the right to work without discrimination against them because of their race, creed, color, national origin, or ancestry.

(c) It is hereby declared to be the policy of the Congress to protect such right and to eliminate all such discriminations to the fullest extent permitted by the Constitution. This act shall be construed to effectuate such policy.

DEFINITIONS

SEC. 3. As used in this act—

(a) The term "person" means an individual, partnership, association, corporation, legal representative, trustee, trustee in bankruptcy, receiver, or any organized group of persons, and includes any agency or instrumentality of the United States or of any Territory or possession thereof.

(b) The term "employer" means a person having in his employ six or more individuals, or any other person acting in the interest of such an employer, directly or indirectly.

(c) The term "labor union" means any organization, having six or more members, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, or terms or conditions of employment.

(d) The term "commerce" means trade, traffic, commerce, transportation, or communication among the several States; or between any State or Territory, or the District of Columbia, and any place outside thereof; or within the District of Columbia or any Territory; or between points in the same State but through any point outside thereof.

(e) The term "affecting commerce" means in commerce, or burdening or obstructing commerce or the free flow of commerce, or having led or tending to lead to a labor dispute burdening or obstructing commerce or the free flow of commerce.

(f) The term "Commission" means the Fair Employment Practice Commission created by section 6.

RIGHT TO FREEDOM FROM DISCRIMINATION IN EMPLOYMENT

SEC. 4. The right to work and to seek work without discrimination because of race, creed, color, national origin, or ancestry is declared to be an immunity of all citizens of the United States, which shall not be abridged by any State or by an instrumentality or creature of the United States or of any State.

UNFAIR EMPLOYMENT PRACTICES DEFINED

SEC. 5. (a) It shall be an unfair employment practice for the purposes of this act for any employer—

(1) to refuse to hire any individual because of such individual's race, creed, color, national origin, or ancestry;

(2) to discharge any individual from employment because of such individual's race, creed, color, national origin, or ancestry;

(3) to discriminate against any individual in the matter of compensation with respect to, or in other terms or conditions of, employment because of such individual's race, creed, color, national origin, or ancestry; or

(4) to confine or limit recruitment or hiring of individuals for employment to any employment agency, placement service, training school or center, labor union or organization, or any other source that discriminates against individuals because of their race, color, creed, national origin, or ancestry.

(b) It shall be an unfair employment practice for the purposes of this act for any labor union—

(1) to deny full membership rights and privileges to any individual because of such individual's race, creed, color, national origin, or ancestry;

(2) to expel from membership any individual because of such individual's race, creed, color, national origin, or ancestry; or

(3) to discriminate against any member, employer, employee, or individual seeking

employment because of his race, creed, color, national origin, or ancestry.

(c) It shall be unfair employment practice for the purposes of this act for any employer or labor union to discharge, expel, or otherwise discriminate against any person because such person has opposed any practice which constitutes an unfair employment practice under this act or has filed a charge, testified, or assisted in any proceeding under this act.

FAIR EMPLOYMENT PRACTICE COMMISSION

SEC. 6. (a) For the purpose of securing enforcement of the foregoing rights and preventing unfair employment practices, there is hereby created a commission to be known as the Fair Employment Practice Commission, which shall be composed of five members who shall be appointed by the President, by and with the advice and consent of the Senate. One of the original members shall be appointed for a term of 1 year, one for a term of 2 years, one for a term of 3 years, one for a term of 4 years, and one for a term of 5 years, but their successors shall be appointed for terms of 5 years each, except that any individual chosen to fill a vacancy shall be appointed only for the unexpired term of the member whom he shall succeed. The President shall designate one member to serve as chairman of the Commission. Any member of the Commission may be removed by the President upon notice and hearing for neglect of duty or malfeasance in office, but for no other cause.

(b) A vacancy in the Commission shall not impair the right of the remaining members to exercise all the powers of the Commission and three members of the Commission shall at all times constitute a quorum.

(c) The Commission shall have an official seal which shall be judicially noticed.

(d) The Commission shall at the close of each fiscal year report to the Congress and to the President concerning the cases it has heard, the decisions it has rendered, the names, salaries, and duties of all employees and officers in its employ or under its supervision, and an account of all moneys it has disbursed, and shall make such further reports on the cause of, and means of alleviating discrimination, and such recommendations for further legislation as may appear desirable.

(e) Each member of the Commission shall receive a salary at the rate of $10,000 a year, and shall not engage in any other business, vocation, or employment.

(f) When three members of the Commission have qualified and taken office, the Committee on Fair Employment Practice established by Executive Order No. 9346 of May 21, 1943, shall cease to exist. All employees of the said Committee shall then be transferred to and become employees of the Commission, and all records, papers, and property of the Committee shall then pass into the possession of the Commission.

(g) The principal office of the Commission shall be in the District of Columbia, but it may meet and exercise any or all of its powers at any other place and may establish such regional offices as it deems necessary. The Commission may, by one or more of its members or by such agents or agencies as it may designate, conduct any investigation, proceeding, or hearing necessary to its functions in any part of the United States.

(h) The Commission shall have power—

(1) to appoint such officers and employees as it deems necessary to assist it in the performance of its functions;

(2) to cooperate with or utilize regional, State, local, and other agencies and to utilize voluntary and uncompensated services;

(3) to pay to witnesses whose depositions are taken or who are summoned before the Commission or any of its agents or agencies the same witness and mileage fees as are paid to witnesses in the courts of the United States;

(4) to furnish to persons subject to this act such technical assistance as they may request to further their compliance with this act or any order issued thereunder; and

(5) to make such technical studies as are appropriate to effectuate the purposes and policies of this act and to make the results of such studies available to interested Government and nongovernmental agencies.

PREVENTION OF UNFAIR EMPLOYMENT PRACTICES

SEC. 7. (a) The Commission is empowered, as provided in this section—

(1) to prevent unfair employment practices by employers affecting commerce;

(2) to prevent unfair employment practices by employers who are parties to contracts with the United States or any Territory or possession thereof, or with any agency or instrumentality of any of the foregoing, and by employers performing, pursuant to subcontract or otherwise, any work required for the performance of any such contract;

(3) to prevent unfair employment practices by agencies and instrumentalities of the United States, and of the Territories and possessions thereof; and

(4) to prevent unfair employment practices by labor unions affecting commerce.

(b) Whenever it is alleged that any person has engaged in any such unfair employment practice, the Commission, or any referee, agent, or agency designated by the Commission for such purposes, shall have power to issue and cause to be served upon such person a complaint stating the charges in that respect and containing a notice of hearing before the Commission or a member thereof, or before a designated referee, agent, or agency at a place therein fixed not less than 10 days after the serving of said complaint.

(c) The person so complained of shall have the right to file an answer to such complaint and to appear in person or otherwise, with or without counsel, and give testimony at the place and time fixed in the complaint.

(d) If upon the record, including all the testimony taken, the Commission shall find that any person named in the complaint has engaged in any such unfair employment practice, the Commission shall state its findings of fact and shall issue and cause to be served on such person an order requiring such person to cease and desist from such unfair employment practice and to take such affirmative action, including reinstatement or hiring of employees with or without back pay, as will effectuate the policies of this act. If upon the record, including all the testimony taken, the Commission shall find that no person named in the complaint has engaged in any such unfair employment practice, the Commission shall state in its findings of fact and shall issue an order dismissing the said complaint.

JUDICIAL REVIEW

SEC. 8. Except as provided in section 12 (relating to the enforcement of orders directed to Government agencies), orders of the Commission shall be subject to judicial enforcement and judicial review in the same manner, to the same extent, and subject to the same provisions of law, as in the case of orders of the National Labor Relations Board.

INVESTIGATORY POWERS

SEC. 9. (a) For the purpose of all investigations, proceedings, or hearings which the Commission deems necessary or proper for the exercise of the powers vested in it by this act, the Commission, or its authorized agents or agencies, shall at all reasonable times have the right to examine or copy any evidence of any person being investigated or proceeded against relating to any such investigation, proceeding, or hearing.

(b) Any member of the Commission shall have power to issue subpenas requiring the attendance and testimony of witnesses and the production of any evidence relating to any investigation, proceeding, or hearing before the Commission, its member, agent, or agency conducting such investigation, proceeding, or hearing.

(c) Any member of the Commission, or any agent or agency designated by the Commission for such purposes, may administer oaths, examine witnesses, and receive evidence.

(d) Such attendance of witnesses and the production of such evidence may be required, from any place in the United States or any Territory or possession thereof, at any designated place of hearing.

(e) In case of contumacy or refusal to obey a subpena issued to any person under this act, any district court of the United States or the United States courts of any Territory or possession, or the District Court of the United States for the District of Columbia, within the jurisdiction of which the investigation, proceeding, or hearing is carried on or within the jurisdiction of which said person guilty of contumacy or refusal to obey is found or resides or transacts business, upon application by the Commission shall have jurisdiction to issue to such person an order requiring such person to appear before the Commission, its member, agent, or agency, there to produce evidence if so ordered, or there to give testimony relating to the investigation, proceeding, or hearing; any failure to obey such order of the court may be punished by it as a contempt thereof.

(f) No person shall be excused from attending and testifying or from producing documentary or other evidence in obedience to the subpena of the Commission, on the ground that the testimony or evidence required of him may tend to incriminate him or subject him to a penalty or forfeiture; but no individual shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled, after having claimed his privilege against self-incrimination, to testify or produce evidence, except that such individual so testifying shall not be exempt from prosecution and punishment for perjury committed in so testifying.

RULES AND REGULATIONS

SEC. 10. The Commission shall have authority from time to time to issue such regulations as it deems necessary to carry out the provisions of this act, and to amend or rescind, from time to time, any such regulation whenever it deems such amendment or rescission necessary to carry out the provisions of this act. If, within sixty days after the issuance of any such regulation or of an amendment to any such regulation, there is passed a concurrent resolution of the two Houses of the Congress stating in substance that Congress disapproves such regulation or amendment, as the case may be, such regulation or amendment, as the case may be, shall not be effective after the date of the passage of such concurrent resolution; and after the date of the passage of such concurrent resolution, no regulation or amendment having the same effect as that concerning which the concurrent resolution was passed shall be issued by the Commission.

Regulations issued under this section shall include the procedure for service and amendment of complaints, for intervention in proceedings before the Commission, for the taking of testimony and its reduction to writing, for the modification of the findings or orders prior to the filing of records in court, for the service and return of process, the qualification and disqualification of members and employees and any other matters appropriate in the execution of the provisions of this act.

INCLUSION OF ANTIDISCRIMINATION CLAUSE IN GOVERNMENT CONTRACTS

SEC. 11. (a) Every contract to which the United States, or any Territory or possession thereof, or any agency or instrumentality of any of the foregoing, is a party (except such classes of contracts as the Commission may by regulation issued under section 10 exempt

from the scope of this section) shall contain a provision under which—

(1) the contractor agrees that during the period required for the performance of the contract he will not engage in any unfair employment practices; and

(2) the contractor agrees that he will include a provision in each subcontract made by him for the performance of any work required for the performance of his contract a provision under which the subcontractor agrees—

(A) that during the period required for the performance of the subcontract, the subcontractor will not engage in any unfair employment practices; and

(B) that the subcontractor will include in each subcontract made by him provisions corresponding to those required in subparagraph (A) and this subparagraph.

(b) Unless the Commission shall otherwise direct, no contract shall be made by the United States, or any Territory or possession thereof, or any agency or instrumentality of any of the foregoing, with any person found pursuant to this act to have engaged in any unfair employment practice, or with any corporation, partnership, association, or other organization, in which such person owns a controlling interest, for a period (to be fixed by the Commission) not to exceed one year from the date on which such practice was so found to have been engaged in. The Commission may, by subsequent order, for good cause shown reduce any period so fixed. The Comptroller General of the United States shall distribute to all agencies and instrumentalities of the United States, and to the appropriate officials in the Territories and possessions of the United States, lists containing the names of such persons, corporations, partnerships, associations, and organizations.

ENFORCEMENT OF ORDERS DIRECTED TO GOVERNMENT AGENCIES

SEC. 12. The provisions of section 8 (providing for judicial enforcement and judicial review of orders of the Commission) shall not apply with respect to an order of the Commission under section 7 directed to any agency or instrumentality of the United States, or of any Territory or possession thereof. In the case of any such order, the Commission may request the President to take such action as he deems appropriate to secure compliance with such order which may include the summary discharge of any officer or employee of any such agency or instrumentality who, in the opinion of the President or such person as the President may designate, has willfully failed to comply with such order.

WILLFUL INTERFERENCE WITH COMMISSION AGENTS

SEC. 13. Any person who shall willfully resist, prevent, impede, or interfere with any member of the Commission or any of its referees, agents, or agencies, in the performance of duties pursuant to this act, shall be punished by a fine of not more than $5,000 or by imprisonment for not more than one year, or both.

SEPARABILITY CLAUSE

SEC. 14. If any provision of this act or the application of such provision to any person or circumstance shall be held invalid, the remainder of such act or the application of such provision to persons or circumstances other than those as to which it is held invalid shall not be affected thereby.

EXHIBIT II

COMMITTEE ON FAIR EMPLOYMENT PRACTICE—HOW IT OPERATES

BEGINNING AND GROWTH

Early in the defense program it became evident that full mobilization of American manpower was going to be a major problem. It was also obvious that since minority groups number some 30,000,000 persons in the United States, an important aspect of the over-all manpower picture concerned their integration into the war effort. In July 1940 there began a series of measures to prevent discrimination in essential industry.

* * * * *

DUTIES AND JURISDICTION

Responsibility for fair employment practice rests, actually, with the individual employer, union, or Government agency. In interpreting and administering Executive Order 9346 the Committee, which is an administrative agency, first must determine how, when, and by whom discrimination is practiced, and second, must take appropriate steps to eliminate such discrimination.

Definition of complaints and complainants

FEPC has jurisdiction over complaints of discrimination because of race, creed, color, or national origin or ancestry. The category of noncitizens was not included in Executive Order 8802, nor in the more recent order. A statement by the President in January 1942 brought aliens within the scope of the Committee's jurisdiction, but the Committee is now seeking clarification of its responsibilities in regard to this group.

Whether because of race, creed, color, national origin, or ancestry, discrimination may take many different forms. It may be direct by the employer against an employee, as in the case of refusal to hire. A member of a minority group may be employed and later subjected to inferior working conditions. Failure to utilize minority workers at their highest skill level, early and unwarranted dismissal and unequal pay for equal work are additional types of direct discrimination.

Less direct discrimination in employment may be practiced by unions, training institutions, and employment agencies. Most of the complaints against unions charge refusal to accept for membership, to issue work permits or to handle grievances, including disputes over seniority and upgrading. There also may be segregation into local auxiliaries in which the Negro worker is denied the right to vote, to bargain collectively, or to participate equally in business negotiations. Complete denial of training and, in addition, unequal facilities where segregated schools exist and where an equal supply of Negro labor is available for training are the chief charges against training institutions. Discriminatory want ads and job specifications sent to employment agencies frequently prevent nonwhite, Jewish, and alien complainants from obtaining war jobs.

Basis of the Committee's authority

The functions performed by the Committee are carried out for and in the name of the President. The authority delegated to the Committee stems from two Presidential powers: First, the constitutional authority of the President, as administrative head of the executive branch of the Government, to direct the operation and administration of all Federal agencies in this branch of the Government; and second, his power as Commander in Chief to take all administrative action necessary to assure adequate supplies for the armed forces of the United States. Pursuant to his authority under the former, the President has empowered the Committee to investigate discrimination on the part of Government agencies, Government-sponsored training programs, and private industries involved in the performance of Government contracts. The President's power as Commander in Chief underlies his delegation of authority to the Committee to investigate discrimination in all essential war industries.

Agencies within the jurisdiction of the Committee

Thus the jurisdiction of the Committee under Executive Order 9346 extends to three categories of complaints alleging discriminatory employment practices:

1. Complaints against all agencies of the Federal Government;

2. Complaints against all employers, and the unions of their employees, having contractual relations with the Federal Government which expressly or by implication contain a nondiscrimination clause regardless of whether such contracts pertain to the war effort; and

3. Complaints against all employers, and the unions of their employees, engaged in industries essential to the war effort, whether or not they have contractual relations with the Government.

The Committee's jurisdiction over complaints against Federal agencies has never been challenged. But questions have been raised regarding the kinds of Government contracts contemplated by the order and whether or not the inclusion of the order's nondiscrimination clause in such contracts is mandatory. The latter question has been answered in the affirmative by the President. In defining the kinds of Government contracts contemplated by the order, the Committee has ruled that the nondiscrimination clause must be included in all contracts made, amended, or modified which call for the employment of persons. Such inclusion does not depend upon the amount of money involved and is required even though the contract does not concern war activity.

Jurisdiction over war industries where no contract is involved has been challenged in several cases. The Committee has issued no comprehensive definition of what it regards as war industries. It accepts as a general guide the War Manpower Commission's list of essential war industries, but it reserves to itself the right to determine in each case whether the party charged is an essential war industry within the meaning of the order. It has been ruled that steamship lines, railroads, telephone and telegraph companies, and local street-railway systems in vital industrial areas are essential war industries.

The Committee also has ruled that its jurisdiction extends to all war-training programs financed with Federal funds, even though operated by private educational institutions.

Agencies not within the jurisdiction of the Committee

Contrary to popular belief, the Committee does not have jurisdiction in a case merely because the party charged is engaged in interstate activities. FEPC has no power to deal with privately owned and operated plants which do not hold Government contracts or subcontracts and which are not engaged in activities essential to the war effort, even though they may be engaged in interstate or foreign commerce. Also excluded from the Committee's jurisdiction are retail stores and local enterprises such as beauty parlors, law offices, specialty shops, etc., which do not hold Government contracts and which are not engaged in services essential to the war effort.

The Committee has no jurisdiction over the armed forces.

PROCEDURE

A case requiring investigation by the Committee on Fair Employment Practice is—

(a) a signed complaint

(b) against a named employer, union, or Government agency

(c) alleging discrimination

(d) relating to employment, placement, or training

(e) because of race, creed, color, or national origin.

When it comes to his attention, a staff member may act upon information pertaining to discriminatory advertisements, placement orders, or application forms. In addition, evidence of violation of Executive Order 9346 referred to the Committee by another Government agency may constitute a case.

Method of investigation: Customary steps

All cases are filed in the regional office of the area in which the alleged discrimination has occurred. Investigation begins as soon as it is decided that the complaint comes within the Committee's jurisdiction. The first steps are to obtain from the complainant whatever additional information may be necessary and to check with other sources for material in regard to the union, employer, or Government agency charged. After this, if the fair practice examiner is satisfied that the case has some merit, contact is made with the party charged. If an employer or union official thus reminded of his responsibilities under Executive Order 9346 complies with the recommendations of the examiner and the regional director, the case is closed. In many of these cases negotiations between regional representatives and employers, union officials, or Government officials are required. Most of the cases satisfactorily adjusted in the 11-month period from July 1, 1943, to May 31, 1944, represent disposition at the regional level.

If a case cannot be adjusted by the usual steps taken at the regional level, the regional office can refer it to the Director of Field Operations in Washington. At both the regional and national levels there is frequent negotiation with the War Manpower Commission or with the contracting agencies of the Government. In some troublesome situations a fair practice examiner is sent from the Washington office to effect a satisfactory disposition of the case. The Committee holds but few public hearings each year, and only in exceptional cases is there referral to the full committee and the scheduling of a public hearing. This occurs only after all other methods of settlement have been employed unsuccessfully.

Hearings

The decision to hold a hearing is not automatic. It is made only after the members of the Committee have agreed upon such action. The purpose of public hearings is to determine the existence of discrimination, the duties of employers, and the rights of employees under Executive Order 9346.

Hearings conducted by the Committee on Fair Employment Practice are informal, fact-finding proceedings. They are not limited by the legal rules of evidence and procedure. The full Committee, sitting as an impartial body, may hear the case or may authorize its Chairman to appoint a hearing commissioner for the purpose of conducting the hearing. In other instances a panel of Committee members may be designated. In the case of full Committee hearings a number of concerns from the same industry or local area may be investigated at one set of hearings. This practice is followed in part for reasons of economy. Moreover, where several firms in the same industry and/or local area show discrimination in their employment policies, it would be unjust to hold public hearings on some one company.

Ample notice of the hearing and of the specific charges is given to the party charged. Parties may appear in person or be represented by counsel and may examine and cross-examine the witnesses. The Committee may request the party charged to present material, but it has no power to subpena witnesses or records.

The full Committee reviews the stenographic record of the proceedings before rendering its final decision and entering its findings. At this time it takes corrective measures, which may include recommendations and directives to the parties charged and recommendations to Federal agencies and to the President of the United States to eliminate whatever discriminatory practices have been revealed.

The elimination of discrimination

In most instances FEPC staff members are able to bring about the adjustment of specific complaints without formal reference to the Committee. Frequently the employer or the union has no idea of how to go about the elimination of discrimination. In these cases FEPC staff members can offer expert advice and counsel on techniques for overcoming employee resistance. Satisfactory disposition is achieved when the party charged complies with the requests of FEPC representatives that it take certain positive steps to correct present discriminatory practices or to guard against their future occurrence. Beyond the settlement of the immediate grievance, such implementation usually consists of written notices and instructions to personnel officers, placement agencies, training institutions, and labor unions that the party charged will employ and utilize persons solely on the basis of their qualifications and without regard to their race, creed, color, or national origin.

The Committee's directives usually advise the parties charged to issue formal instructions to their own personnel officers and employment agencies that the recruitment, training, and placement of workers will be carried on without discrimination.

In addition, the Committee has at times directed companies to hire persons who have been discriminated against or to reinstate workers who have been dismissed for discriminatory reasons. One such instance occurred in December 1942, following a hearing which involved charges brought by seven members of Jehovah's Witnesses. The Committee directed that "the company take immediate steps to offer reinstatement to the seven complainants and to offer them reemployment with full seniority rights they would have enjoyed had they been continuously employed."

The Committee consistently has expressed its conclusions regarding methods of carrying out the purposes of the Executive orders by means of the well-known administrative procedure of issuing directives. Power to issue directives is implied in Executive Orders 8802 and 9346. Under Executive Order 8802 the Committee "shall take appropriate steps to redress grievances." The corresponding clause in Executive Order 9346 authorizes it to "take appropriate steps to obtain elimination of * * * discrimination." The Committee's authority to issue directives springs from these phrases.

Should the Committee's directives be defied, such violation can be referred to the proper contracting agency, including the War Department, the Navy Department, or the Maritime Commission. Ultimately noncompliance is certified to the President of the United States.

The Committee can also bring such cases of noncompliance to the attention of the Chairman of the War Manpower Commission. A formal agreement executed by the two agencies in August 1943, defines the respective responsibilities of FEPC and WMC in enforcing the Government's nondiscrimination policies concerning the training, placement, and utilization of manpower.

The War Manpower Commission in carrying out its employment stabilization program may penalize violators of the program's clause prohibiting discriminatory hiring and referral practices. War Manpower Commission through the United States Employment Service may refuse to service noncomplying employers or may issue certificates of availability to workers against whom discriminatory policies have been practiced. It may refuse the employer clearance for the recruitment of workers outside of his labor market if he imposes discriminatory hiring specifications. It may issue certificates of availability to the workers of a noncomplying employer. Also, in accordance with WMC policy, employees who quit in protest over the employment of minority workers may be denied certificates of availability to other employment. The above steps may be taken at either the regional or national level.

Ultimately the President may act under his authority as administrative head of the executive branch of the Government or as Commander in Chief of the armed forces to enforce Committee directives.

SCOPE OF ACTIVITIES

Complaints received and investigated

As of July 1, 1943, FEPC had pending 1,016 cases. During the 11 months' period between that date and May 31, 1944, 3,806 new cases were docketed. During the same period 2,648 cases were closed, leaving the Committee's June 1 case load at 2,188. Nearly 39 percent of the cases closed represented satisfactory adjustments. Dismissal because of lack of jurisdiction over the complaint or because of insufficient evidence accounted for approximately 20 percent of the closings. In addition, 28 percent of the cases were closed on merits, nearly 10 percent were withdrawn by the complainant, and not quite 4 percent were dismissed for other reasons. The 1,642 cases in these last 4 categories represent allegations of discrimination which would have remained as continuing disputes had they not been subjected to a careful examination by a third party.

As of June 1, 1944, FEPC public hearings numbered only 11. Six of these were held under the auspices of the old Committee, before the issuance of Executive Order 9346. A number of companies and unions were involved, and compliance has been largely good. Certain companies have been especially cooperative. The new Committee has conducted 5 public hearings; 2 were based upon charges of discrimination because of creed and involved the Dow Chemical Co. in Midland, Mich., and the Northwest Mining & Exchange Co. in Du Boise, Pa. The railroad hearings in Washington, D. C., the boilermaker hearings in Portland, Oreg., and Los Angeles, Calif., and the case of the Philadelphia Transportation Co., in Philadelphia, Pa., involved charges of racial discrimination.

Distribution of complaints by race, creed, color, national origin, alienage

Race and color.—Discrimination on account of race comprised 81 percent of the complaints docketed from July 1, 1943 to May 31, 1944. Practically all of these involved Negroes. For the most part Negro labor in the United States has been disproportionately concentrated in unskilled, domestic, and agricultural occupations. According to the 1940 census Negro men comprised 60.2 percent of all males in domestic service and Negro women constituted 46.6 percent of all women employed in this field. Colored men formed 21 percent of the males employed as laborers; colored women composed 26.9 percent of such female workers. (Farms and mines are not included.) Negro men were 21 percent of all farm laborers and foremen. It can be seen how disproportionately the Negro was concentrated in the lower work brackets in 1940 when it is considered that Negro males constituted 10.3 percent of the total male working population, and that colored women formed 18.9 percent of the total female working population.

During World War No. 1 and for a decade thereafter Negroes made significant occupational gains in such industries as iron, steel, meat packing, shipbuilding, and automobile manufacturing. The depression seriously hampered these gains, and in 1940 Negroes constituted a small, proportion of the workers in mining, manufacturing, transportation, and communication than they had in 1910. A survey by the Bureau of Employment security of the Social Security Board, issued in September 1941, revealed that Negroes would not be considered by industry for 51 percent of 282,245 job openings expected to occur by February 1942.

The Tolan committee, in 1941, found that nine AFL unions still had constitutional provisions barring Negroes from membership, along with seven unaffiliated organizations. In addition, numerous unions continued to discriminate against Negro workers, excluding them by tacit consent and constitutional ritual and by segregating them into auxiliaries.

Since 1941 the Negro has made considerable advances in the field of industrial employment. In January 1944, according to the War Manpower Commission, nonwhite workers constituted 7.2 percent of the total 15,000,000 war workers in firms reporting to the United States Employment Service. This shows a good trend. In the beginning of 1942 it was estimated that nonwhite workers constituted only 3 percent of the employees in war industries. By September 1942 the figure was 5.7 percent; in January 1943, 6.4 percent, and in March 1943, 6.7 percent. Negroes have secured significant employment opportunities in shipbuilding, aircraft, blast furnaces, steel works, rolling mills, tanks, communication equipment, explosives, and ammunition.

No reliable data is available on the utilization of nonwhite workers in skilled and semiskilled occupations. Most observers agree that Negroes are being both placed and upgraded to skilled and semiskilled operations in many plants at a startling rate. The WMC has revealed that for the last quarter of 1943, 14.8 percent of nonwhite placements were in other than unskilled occupations. The number of Negroes in operations other than unskilled in industry is perhaps much higher than this figure would indicate since the usual tendency is to upgrade Negroes from unskilled jobs, rather than to take newcomers from the outside at the high levels of employment.

Negroes have also made considerable gains in the Federal Civil Service. A 1938 report by L. J. W. Hayes showed that Negroes composed 8.4 percent of Federal employees in Washington, and that 90 percent were in custodial jobs. In contrast, a study by the Division of Review and Analysis of FEPC, involving a sample which covered 1,957,858 Government employees, showed that as of July 31, 1943, 12.5 percent of these workers were colored. According to this study Negroes composed 18 percent of the total personnel in the departmental service. A large number, 50 percent or more in some agencies, were employed in the clerical, administrative, and fiscal category, although in the field service most Negroes were still in custodial classifications.

In general, however, good utilization of Negro labor is spotty and is concentrated in certain industries, in certain areas, and even, in some cases, is limited to specific corporations. There are many industries where the full utilization of nonwhite workers is of critical importance to the war production effort. Among these are the local transit industry, the air frame industry, the cotton textile industry in the South, the jute-spinning industry, the rayon fiber and rayon textile industry, the antifriction bearing industry, and the shipbuilding industry where colored workers are already highly utilized.

The practices of organized labor have not kept pace with the increased employment of the Negro. Today 13 national or international unions exclude Negroes by constitutional provision, 4 exclude by tacit consent, 9 afford only segregated auxiliary status to Negroes, and 1 excludes by ritual. A number of the large industrial locals of the latter interpret the ritual reference to white persons to mean white of character and thereby admit Negroes. With regard to most situations involving the highest-grade mechanics, the ritual is still effective in achieving exclusion.

Creed: Charges of discrimination because of creed comprised about 9 percent of the complaints received by the Committee during the July 1943–June 1944 period. Most of them came from Jews. Members of this group frequently have been barred from employment through discriminatory want ads or specifications to employment agencies. Application forms on which religion must be designated further such discrimination. In many cases training schools have refused to admit Jews because of past difficulties in placing these graduates.

Discrimination against Jews has been widespread in several fields of employment. Prior to the war it was difficult for persons of Jewish origin to obtain white-collar positions through employment agencies, for a large proportion of these did not refer Jewish applicants to Christian employers, even when the latter placed no discriminatory specifications. Signs with legends such as "No Jewish applicants until further notice" were mentioned in a report by the American Jewish Congress, and even the application forms of some State employment agencies required persons seeking jobs to state their religion. Employment by public utilities, banks, chain stores, and industrial concerns was also denied to large number of Jews, although in certain industries they were well represented.

Complaints filed with the Committee from Jews are concentrated in the northeast section of the country. There are few cases involving discrimination on the part of unions or Government agencies. Most Jewish complaints involve refusal to hire, discriminatory application blanks, and discriminatory advertisements. Those charging discriminatory working conditions usually involve attitudes on the part of fellow workers rather than more direct discrimination on the job.

Orthodox Jews, Seventh-day Adventists, and others who regard Saturday as their Sabbath constitute a problem because of the working schedules to which most industries geared to the demands of war production now adhere. Absenteeism related to such practices often has led to dismissal, although many plants and agencies have managed to work out satisfactory arrangements for Sabbatarians. John W. Martyn, administrative assistant to the Secretary of War; the late Secretary of the Navy, Frank Knox; and Harry B. Mitchell, president of the Civil Service Commission, in separate statements, have expressed the willingness of their departments to attempt to provide systems whereby their employees can observe religious holidays. These statements have been implemented by departmental instructions.

National origin and alienage: Discrimination because of national origin alone accounted for slightly more than 6 percent of the complaints docketed by the Committee between July 1, 1943, and May 31, 1944. Some foreign-born citizens are denied employment simply because an employer doubts their loyalty. On the other hand, certain groups, largely Spanish-American in origin, have to contend with discrimination of the same type which faces American Negroes. This is especially true in sections of the far West and Southwest.

The problem of placing noncitizens in war jobs is a troublesome one. During the 11 months' period mentioned above, discriminatory acts against aliens constituted approximately 5 percent of FEPC's docketed cases. Most discrimination of this kind arises from delay on the part of employers engaged in war production to process the necessary clearance. Sections in two acts of Congress, passed in 1923 and 1940, forbade the employment of aliens in the performance of aeronautical, secret, restricted, or confidential contracts without the written consent of the secretary of the department concerned. Although the latter act has expired and the 1926 act covers only aeronautical contracts, the War and Navy Departments and the Maritime Commission continue to require written consent for the employment of aliens on such classified contracts.

The number of complaints received by the former Committee from aliens proved the existence of confusion among employers and applicants alike. In March 1943, discrimination against aliens still comprised FEPC's second largest group of complaints. A series of steps has served to alleviate the situation. On July 11, 1942, President Roosevelt issued a clarifying statement, setting forth the official position on the employment of noncitizens and outlining procedures to be followed in hiring them. This was reaffirmed on June 7, 1943, in a joint statement by the Secretary of War, the Secretary of the Navy, the Attorney General, and the Chairman of the Maritime Commission.

According to section 205 of the Independent Offices Appropriations Act, approved June 26, 1943, aliens who are nationals of any of the United Nations may now be employed by the Government agencies whose appropriations are provided by this act.

In recent months the paper work and the time needed for clearance of applications have served as the chief obstacles to the employment of aliens. At this time the Provost Marshal General has brought about decentralization of the investigation and clearance of alien applications. This process should reduce considerably the time required for clearance.

As a war agency the Committee on Fair Employment Practice is concerned with bringing about the fullest utilization of all available manpower for the fight against the Axis. Its functions are the direct expression of Government policy and are aimed at eliminating discriminatory practices, which in the present emergency tend seriously to impair workers' morale and national unity. The current need for labor does not allow for the continuance of habits which bar qualified workers from employment and prolong the day of victory.

EXHIBIT III

CASE NO. 65—IN THE MATTER OF UNITED STATES CARTRIDGE CO., RESPONDENT

Before the President's Committee on Fair Employment Practice: Malcolm Ross, chairman; John Brophy, Charles H. Houston, Boris Shishkin, Sara Southall, Milton P. Webster, members.

Appearances: Ernest G. Trimble, for the Committee; R. H. Sullivan, assistant general manager, United States Cartridge Co., for the respondent; Emanuel H. Bloch, of counsel to the Committee.

DECISION—STATEMENT OF THE CASE

Upon complaints duly filed, and after preliminary investigation thereof, the President's Committee on Fair Employment Practice (herein called the committee) issued its statement of charges, dated July 18, 1944, against the United States Cartridge Co., of St. Louis, Mo. (herein called the respondent), alleging that the respondent had engaged in and is engaging in discriminatory employment practices in violation of Executive Order 8802, as amended by Executive Order 9346, promulgated by the President of the United States on June 25, 1941, and May 27, 1943, respectively.

With respect to the discriminatory employment practices, the statement of charges alleged in substance that the respondent at its St. Louis plant (1) discharged Negro employees while retaining in its employ white employees of less seniority and denied reinstatement to Negro employees while reinstating white employees of less seniority, because of the race or color of such Negro employees; (2) refused employment to the complainants Irene Johnson and Beatrice Marshall on September 13, 1943, because they were Negroes; (3) discharged complainant Bertha Brown on December 11, 1943, Margie Foster on December 7 1943, John W. Joiner, Jr., on December 4, 1943, and Ollie M. Haynes and Emilie T. Lee on December 6, 1943, because they were Negroes.

Pursuant to notice, a hearing was held at St. Louis, Mo., on August 2, 1944, before the

Committee. The Committee was represented by counsel and the respondent by a lay representative; all participated in the hearing. Full opportunity to be heard, to examine and cross examine witnesses and to introduce evidence bearing upon the issues was afforded all parties.

During the hearing, on the motion of counsel for the Committee, the complaints of Ollie M. Haynes and Emilie T. Lee were withdrawn.

Upon the entire record in the case, the Committee makes the following:

FINDINGS OF FACT

1. The respondent

The U. S. Cartridge Co., a corporation, respondent herein, manufactures ammunition and other essential war material for sale to and use by the United States War Department and Department of the Navy under contract with said Departments. It maintains and operates eight buildings in St. Louis, Mo., which are owned by the United States of America. Its contracts with the War and Navy Departments contain nondiscrimination clauses, required by Executive Order 9346, which forbid discrimination against employees or applicants for employment because of their race, creed, color, or national origin.

We find that the respondent is a war industry within the meaning of Executive Order 9346 and that its employment policies and practices are subject to the jurisdiction of the Committee.

2. The respondent's racial employment policy

We find that in seven of the eight buildings operated by the respondent, production work is performed exclusively by white employees, and in the eighth building, known as Building 202, only Negroes are employed. Separation of the white and Negro workers is maintained strictly, although white and Negro workers perform similar duties and are listed under identical occupational code classifications.

In defense of the respondent's policy, Mr. Sullivan, respondent's assistant general manager, testified that when its war production began there was very little skilled labor available in St. Louis, thereby necessitating the training of new employees. The respondent then determined, he explained, to follow the population ratio and to employ 90 percent white operators and 10 percent Negro. Before this was accomplished, the respondent explored the problem with Negro and civic organizations of St. Louis.

Mr. Sullivan testified further that the same type of training was afforded Negro and white employees and that Negroes in Building 202 have advanced to high supervisory positions. Finally, he admitted that had Negroes been fully integrated on a nonsegregated basis by the respondent at the time its operations commenced in St. Louis, it would have been easier to solve the problem of cut-backs, but "The customs community-wide are influential on what we have to do in industry."

The respondent's defense, in essence, therefore, is a contention that its quota system of hiring Negroes, being based on the existing Negro-white ratio in St. Louis, is fair and not in violation of the Executive order.

But, we find, that the actual operation of this system demonstrates that a person's chances of being hired will not be based solely upon his occupational qualifications, but on the irrelevant factor of his race or color. As we stated in *Matter of McQuay-Norris Manufacturing Company*, Case No. 64, decided December 16, 1944:

"Validation of a race 'quota' system of employment would be inconsistent with the individual protection against discrimination 'by reason of race, creed, color, or national origin' to 'any person in war industries and Government' afforded by Executive Order 9346. It is apparent that qualified 'available and needed' workers can be denied employment under the operation of a quota system when the share allotted to their race or group has been filled.

"Consequently, such a system works to the disadvantage of individuals in both minority and majority groups by providing that consideration of race rather than qualifications and availability shall operate as the criterion for hiring an employee. We cannot permit the rationale of the Executive order to be so subverted."

We concede respondent's argument that building 202 was not intended as a device to discriminate against Negroes but to broaden the opportunities for their training and to serve as a demonstration unit of Negro technical capacity. But we find that this laudable purpose could have been accomplished without denying Negroes the opportunity of working on other buildings of the plant, when the respondent needed workers in such buildings.

While the respondent is entitled to commendation for its efforts to take the first steps to eliminate descrimination against Negro workers by employing Negroes in large numbers and a variety of skills, we find that the result of its racial quota system has been to thwart fulfillment of its original praiseworthy purpose.

3. Discriminatory lay-offs

We find that the United Electrical and Machine Workers of America, CIO, Local 825 (herein called the union), is the recognized and contractual bargaining representative of the employees of the St. Louis plant of the respondent. On September 22, 1943, the respondent and the union entered into a written contract. Article IV of said contract, entitled "Seniority," provides:

"SEC. 1. Seniority shall be a determining factor in matters affecting lay-off and reemployment, transfers, demotions, and promotions, only if factors of ability and aptitude are equal. Seniority shall be applied on an occupational group basis."

Article V thereof, entitled "Discrimination," provides:

"No employee or person seeking employment shall be discriminated against because of race, color, creed, or sex."

We find that during the month of December 1943 a mass lay-off of respondent's employees was effected. In selecting employees for lay-off the respondent admittedly used two seniority systems, one of which was applied to building 202, and the other applied to the seven other buildings. In other words, seniority was either "Negro seniority" or "white seniority."

From figures furnished by the respondent it appears, and we find, that 412 Negroes were laid off in December 1943 who would not have been terminated had the same seniority standards been followed in selecting Negro workers for lay-off as were used in selecting white workers.

We find that in March 1944 and in June 1944, further mass lay-offs took place. The respondent offered testimony to show, and we find, that during these lay-offs Negro workers benefited from the operation of its dual seniority system so that 26 Negroes were retained in March 1944 and 517 in June 1944, who would have been terminated had the same basis of calculating seniority been applied to white and Negro workers.

In January 1944, some of the employees previously laid off were rehired. Again, the "Negro" and "white" seniority system was used by the respondent in determining who should be rehired. Mr. Sullivan admitted that "some people may have been reinstated with less seniority than some that were laid off." We find that some white workers were reinstated, while Negro workers with greater seniority and in the same occupational code classifications were not rehired.

Theodore E. Brown, the St. Louis field examiner of the committee, testified that following the December 1943 lay-offs, he conferred with the respondent's executives to determine why Negro workers had been laid off contrary to the seniority clause in respondent's contract with the union. He testified, and we find, that respondent's executives told him that the respondent had determined to maintain a ratio between white and Negro workers based upon "the ratio of the Negro population to the total population in the city of St. Louis," which ratio, concerning to testimony of Mr. Sullivan, was 10 percent.

We find, according to the respondent's figures, that in November 1943, before the first mass lay-off, Negroes constituted 12.5 percent of the respondent's employees at its St. Louis plant; and that after the third mass lay-off in June 1944, they constituted only 10.5 percent.

William Sentner, general vice president of the United Electrical Radio and Machine Workers of America, CIO, testified, and we find, that following the December, 1943 lay-off the union protested the violation of the seniority clause in its contract insofar as it affected Negro workers in building 202, and demanded, pursuant to formal resolution of the union, that the respondent give effect to said seniority clause and cease discriminating against Negro workers. The union also announced that if the respondent failed to do so, it desired to submit the issue to arbitration, as provided in its contract. A similar protest was made following the January 1944 lay-off.

Mr. Senter also testified, and we find, that when the respondent began to reemploy move men in the seven white buildings, Negro move men were not rehired, although the white list of move men was exhausted. Finally, he stated that it was impossible to apply the principle of seniority when there were segregated units within a plant.[1]

We find that a racial quota system is equally as mischievous when used to select employees for lay-off as when applied with regard to their hire. Executive Order 9346 does not provide that Negroes or other minority groups shall be hired or retained in employment in accordance with population ratios. The order, on the contrary, forbids the use of extraneous considerations of race, creed, color, or national origin in hiring or in laying-off employees. It is no defense to argue, as the respondent has done, that its quota system on certain occasions operated to the advantage of Negro employees and to the prejudice of white workers. The Executive order forbids discrimination against white as well as against colored employees.

As a result of the racial quota system, Negroes suffered in the December 1943 lay-offs. As a result of the same system, Negroes enjoyed a preference in the March and June 1944 lay-offs. How they will fare in subsequent lay-offs, no one can predict. The

[1] Mr. Senter testified that in July 1942 the St. Louis Chamber of Commerce distributed a report to war production plant operators in that city in which it suggested complete segregation of Negroes in special buildings or floors in order to overcome the resistance of white employees. He contended that from 1933 until the issuance of the report there had been no segregation of Negro workers in St. Louis plants except in one establishment, although factory employment of Negroes was confined to material handling, porter work, and common labor. Herbert R. Ramel, a member of the St. Louis Chamber of Commerce and former chairman of the Labor Supply and Labor Training Committee, pursuant to permission granted by the committee, filed a statement after the close of the hearing which is hereby made part of the record. Mr. Ramel denied that the 1942 report of the chamber was responsible for the development of an employment pattern in St. Louis or that the statement in such report represented the policy of the chamber. The committee finds it unnecessary to resolve this conflict in testimony.

rights of employees under the Executive order cannot thus be made a matter of chance, nor can an employer's duties under the order be avoided by an exhibition of factors such as segregation, which make their discharge inconvenient or difficult.

This case demonstrates the difficulty, if not impossibility, of affording equal job opportunity to all workers while confining one minority group to jobs exclusively in one portion of a plant.

4. The individual complaints of discrimination

Beatrice Marshall, a Negro, testified, and we find that on September 12, 1943, a help-wanted advertisement was published in the St. Louis Post-Dispatch over the respondent's name, reading: "Two thousand needed. Wanted to help make cartridges for our fighting men. No experience needed in training period. Immediate employment." She testified, and we find, that in response to that advertisement she visited the respondent's plant and applied for employment. She was told that Negroes worked only in building 202 and that the respondent was not then hiring any persons for work in that building.

Irene Johnson did not testify, and we find there is insufficient evidence to sustain her complaint.

We find that Bertha Brown, a Negro employee, was laid off because of a "reduction in forces" during the mass lay-off of December 1943 and that she had been working for the respondent for 6 months.

Margie Foster, a Negro, testified, and we find, that she had worked as an inspector in building 202 and had been laid off on December 7, during the December mass lay-off.

John W. Joiner, Jr., a Negro, testified, and we find, that he had been employed as a welder in building 202 and was laid off on December 1 or 2, 1943. He testified that he had more seniority than white welders who were not laid off during that month.

Mr. Sullivan, respondent's assistant general manager, testified, and we find, that Bertha Brown and Margie Foster would have been retained had the respondent not had "Negro" and "white" seniority systems, but that John W. Joiner, Jr., would have been laid off even if plant-wide seniority had been applied.

Upon the basis of the above findings of fact and upon the entire record in the case, the committee makes the following:

CONCLUSIONS

1. United States Cartridge Co., is a war industry within the meaning of Executive Order 9346, and its employment policies and practices are subject to the jurisdiction of the President's Committee on Fair Employment Practice.

2. By refusing to hire Negro workers solely because quotas or ratios imposed by respondent for hire of such workers had been filled, the respondent has engaged in employment practices forbidden by Executive Order 9346.

3. By laying off Negro employees on a seniority basis predicated upon their race or color in an effort to maintain a Negro quota or ratio, the respondent has engaged in employment practices forbidden by Executive Order 9346.

4. By refusing to hire Beatrice Marshall and by discharging Bertha Brown and Margie Foster because of their race or color, respondent has engaged in employment practices forbidden by Executive Order 9346.

5. The respondent has not engaged in any practices forbidden by Executive Order 9346 with respect to John W. Joiner, Jr., Ollie M. Haynes, Emilie T. Lee, and Irene Johnson.

DIRECTIVES

Upon the basis of the above findings of fact and conclusions, and pursuant to the provisions of Executive Order 9346 to take appropriate steps to obtain elimination of discrimination forbidden by such order, the President's Committee on Fair Employment Practice directs that the respondent, United States Cartridge Co., its officers, agents, successors, and assigns shall:

1. Cease and desist from—

(a) Refusing employment to Negroes because of their race or color, for available positions for which they are qualified;

(b) Laying off or discharging Negroes through the operation of any seniority system which is not equally applicable to Negro and white workers;

(c) Maintaining any racial quota or other system, such as segregation, by which the race or color of an employee or applicant for employment becomes a factor in any decision with respect to his hire, tenure, terms, or conditions of employment; and

(d) In any other manner discriminating against employees or applicants for employment with respect to their hire, tenure, terms, or conditions of employment because of their race, creed, color, or national origin.

2. Take the following affirmative action which the committee finds will effectuate the policies of Executive Order 9346:

(a) Offer immediate employment to Beatrice Marshall in any position for which she is qualified and if employment for her is not immediately available, place her upon a preferential hiring list and offer employment to her as a vacancy develops in any position for which she is qualified;

(b) Offer to Bertha Brown and Margie Foster immediate and full reinstatement to their former or substantially equivalent positions without prejudice to their seniority or other rights and privileges;

(c) Issue written instructions to all of its officers or employeers having authority to recruit, hire, place, transfer, promote, lay off, or discharge employees to perform their duties without discrimination because of race, creed, color, or national origin;

(d) Issue written notices to all employment or recruitment agencies, public or private, including the United States Employment Service, through which the respondent recruits employees or trainees that it will accept and hire employees or trainees, without regard to their race, creed, color, or national origin;

(e) Issue written notices to all labor unions with which it has contracts that it will comply fully with the provisions of Executive Order 9346, and with these directives, and that it will not discriminate against any employees or applicants for employment with respect to their hire, tenure, terms, or conditions of employment, because of their race, creed, color, or national origin;

(f) Submit to the President's Committee on Fair Employment Practice copies of each of the above instructions and notices;

(g) Report in writing to the committee within 30 days of the receipt of this decision what steps it has taken to comply therewith.

3. And it is further directed that the complaints of Irene Johnson, John W. Joiner, Jr., Ollie M. Haynes, and Emilie T. Lee be, and the same are, hereby dismissed.

Issued at Washington, D. C., on December 23, 1944, by order of the President's Committee on Fair Employment Practice.

MALCOLM ROSS,
Chairman.

Service Ribbons for Veterans

EXTENSION OF REMARKS
OF
HON. CLYDE DOYLE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. DOYLE. Mr. Speaker, under leave to extend my remarks, I am pleased to introduce in the CONGRESSIONAL RECORD the following resolution:

Whereas the Japanese armed forces waged provoked and undeclared war on the peaceful people of China beginning with the incident at the Marco Polo Bridge in 1937; and

Whereas the United States of America maintained land and sea forces in the eastern Asia war zone during this period for the protection of American lives and property; and

Whereas the China Service Ribbon was awarded to the members of the United States Navy who served in this war zone in 1937 and 1938: Be it therefore

Resolved, That realizing the desirability of giving equal recognition to all our armed forces who endured the dangers of this conflict, San Francisco Post No. 15, Regular Veterans Association, unanimously favors extending the privileges of similar recognition to the members of the United States Army. This twenty-fourth day of January, 1945.

ALFRED BARRATH,
San Francisco Post 15, California.

Repeal Unfair Use Tax on Automobiles and Boats

EXTENSION OF REMARKS
OF
HON. DWIGHT L. ROGERS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. ROGERS of Florida. Mr. Speaker, it is my opinion that this use tax of $5 on automobiles and boats has served its purpose. Such a measure violates the principle that a tax should be proportionate to the wealth or income of the payer and his ability to pay, and being more or less of a nuisance tax should be repealed.

The Atlanta Journal of Atlanta, Ga., in an editorial of April 11, 1945, refers to this tax as follows:

The most indefensible tax levied on the American people since the evening of the Boston Tea Party.

Such a tax places a burden on car owners irrespective of the value of the car and whether the car or boat may be used little or those who use them everyday. Certainly the earmarks of a nuisance tax.

I include in my remarks the following editorial from the Palm Beach Post of West Palm Beach, Fla., under date of May 2, 1945, one of the leading, outstanding, and most influential newspapers of the State of Florida:

ROGERS KEEPS A PROMISE

Representative DWIGHT L. ROGERS has fulfilled one of his campaign promises by introducing a bill to repeal the annual $5 Federal use tax on motor vehicles and boats.

Mr. ROGERS correctly described this impost as a nuisance tax. It is also an unfair tax because so many automobile and boat owners avoid paying it.

Collecting the tax from those who do not voluntarily go to the post office and buy stamps imposes a heavy burden upon the internal revenue department and one that is growing more onerous each year.

The Florida Legislature has gone on record in favor of its repeal, the general public wants it repealed, and the Federal Treasury would scarcely miss the revenue received from it.

Congress will make no mistake by passing the Rogers bill.

Address of Paul A. Strachan

EXTENSION OF REMARKS

OF

HON. HARRY R. SHEPPARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. SHEPPARD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address of Paul A. Strachan, president, American Federation of the Physically Handicapped, and also my address, both delivered before Lodge No. 2, AFPH, Washington, D. C., April 18, 1945:

Mr. Chairman, this, I know, is a solemn occasion for all of us, as, since we last met, our President and friend—the most eminent physically handicapped in all the world—has died.

Franklin Delano Roosevelt is dead, but his spirit goes marching on. His words, and his works, will live forever and be an inspiration to not only those now living, but, to generations as yet unborn.

I have here a resolution adopted this past Saturday night by our Lodge 1. It says, "We believe that the immortal words of Franklin Delano Roosevelt, at his first inaugural, 'The only thing we have to fear is fear, itself!' is applicable to, and should be adopted as the motto of every physically handicapped person."

That is unquestionably true. The only thing we have to fear is fear itself. Now let us see how that applies to every handicapped. We all know when the dread realization of our disability first shocked and stunned us that our first reaction was, fear. We feared that we could not carry on, because of our lacking some physical facility. We feared that our friends would pity us. We feared to pit our wits and remaining faculties against the economic scheme, because, in the vernacular, we knew "we didn't have all our marbles," and we were, therefore, operating under a double handicap. These and other fears, prevented or deterred the vast majority of us from calmly acknowledging and evaluating our physical handicap, and then developing other talents, as an offset. Therefore, we know that, in order to again pick up the threads of life the first thing we had to conquer was, that fear.

I shall call upon every AFPH Lodge to adopt the resolution sponsored by Lodge 1, and make it the motto of our federation.

While we are holding this brief memorial service to our departed President, I believe it fitting that we read, again, his inspirational message, sent to our last convention in August 1944, which is as follows:

WASHINGTON, D. C., *August 21, 1944.*

PAUL A. STRACHAN,

President, American Federation of the Physically Handicapped, Inc., Washington, D. C.:

The value of the undertaking which you and your organization have started on behalf of the physically handicapped of our Nation can be very great. In this period of crisis in the world's history, when men have been forced to apply their intellects to the tragic science of human destruction, it is heartening to find a group like yours facing the future with determination to repair the ravages of that destruction.

In addition to the war injured and to the greatly increased number of workers injured in industry because of the vast war production effort, there are undoubtedly countless others in this critical period.

It is well that thoughtful people dedicate themselves to the purpose of transforming those handicaps as far as possible into means of returning the handicapped to useful and creative employment. I wish the federation the success which its noble purpose merits.

FRANKLIN DELANO ROOSEVELT.

But, while we feel an irreparable sense of loss in the passing of humanity's friend, I believe we have a duty, also, as well as high privilege, to not only support President Harry S. Truman, but to wish for him a continuance of the program which made this administration the most humanitarian administration that this country has ever seen.

I know that I have studied the history of the laws for handicapped very carefully. I know that, as people, we weren't recognized until some twenty-odd years ago, but I reflect the greatest movement ever known to have been made in this Nation, to recognize and deal with the problems and needs of handicapped people, unquestionably has been during the past 12 years, and yet we have only started on that program.

We believe and we hope that the President today will carry on, and I am going to ask that all of us stand for just a moment and give him a silent pledge that we shall do our part to unite behind him and make his administration the great success it deserves to be. I ask you to rise for one moment. [A pause.]

Thank you.

As we resume the business of this evening I want to say that I am very proud, in many ways, that we have made friends in high places. Not so much because the individuals themselves were in high places, but because in them I found, first, human beings who were sensitive to our needs and who wanted to help us. I have found as a rule that the higher you go the more accessible you find the individual. That may sound paradoxical, but it applies to many of the most eminent Members of Congress and officials with whom we have to deal. I have also found that the greater the man the greater his simplicity. They do not lose the common touch; they remain close to the source from which they derive their real power—the people; they do not become "up-stage" but remain real human beings. I am always happy to become acquainted with these people.

About 8 years ago a gentleman came out of the far West, arrived in Washington, and took his seat in Congress.

I became acquainted with him. I found that he had many varied experiences in life. He had seen both the seamy side and also had been a member of the so-called upper crust. He had fought and worked his way to success and had established a splendid business which operated successfully for many years, but which he disposed of upon being elected to Congress.

But with all the hallmarks of success, underneath he still remained a "roughneck." I say that with the intent to fill the word with the very finest implications, because I have maintained and shall always maintain that "roughnecks" are the salt of the earth, and I'm going to stand on that. They never forget their experiences with the under dogs, and that gives them an asset which many people lack—human understanding.

I found that he was a "definite type." I also found that he is far more prolific in use of the word "No", than "Yes", but, you can depend upon it, he means what he says, in using either of them.

I know that he has made a fine name for himself in Congress. He worked. He was on the job. A few years ago, they named him chairman of the Subcommittee on Naval Appropriations, whereupon he immediately began waving his Merlin's magic wand. It is a matter of record that, under his leadership, the House passed a bill which, up to that hour, was the largest appropriations bill for Navy ever passed in all the history of the world—25-plus billion dollars, I may be off, a billion or so, but, such a sum is beyond my conception.

I wanted to borrow his magic wand, but, he won't loan it to me, so, I have to continue, as one of the Sons of Martha, to work for whatever I may get out of Congress.

I know he is going still higher, unless I am a very poor judge of politics and policies, and I would be happy to see him a United States Senator, because, even if he is "tough", he has a very, very soft spot in his heart for the afflicted, and for the old folks, and for those two things, alone, I would forgive him his sins.

I hope that this is just the beginning of a fine friendship for you, with him, because, when he goes back home to that beautiful California, I have got him committed to make an address before our Los Angeles lodge, and I believe what he says then may well be heard around the entire country.

We owe him, in fact, a great deal, because he was the first man in Congress to actually do something about the handicapped program. He published the first digest of that program which, subsequently, became the fundamentals of the AFPH program, and he has backed that up, ever since.

It is with pleasure I introduce our real friend, the Honorable HARRY R. SHEPPARD, of California. Mr. SHEPPARD.

ADDRESS OF HON. HARRY R. SHEPPARD OF CALIFORNIA

Mr. President and friends, knowing my friend, Paul Stracham, for quite some period of time, and having an extremely high regard for his tenacity and his ability to be pugnacious, I am not particularly surprised at the manner of his introduction. But, I believe that kind of language deserves to be replied to, in kind, so, despite the fact that I had a prepared speech ready tonight, I am going to lay that aside and talk to you as I would any other group of friends.

Your federation is engaged in a campaign which, in my opinion, is one of the most important activities being carried on by any organization. "Restoration of our physically handicapped citizens is an economic necessity," and I speak, not as a visionary, but as a practical businessman who has had hundreds of employees and who had to "meet a pay roll."

It is decidedly bad business to permit continuance of an existing condition wherein many, in need of assistance in rehabilitation, are denied this benefit, despite the fact that many improvements in laws and methods dealing with this subject have been made since the present war started. But those of us who have gone into the situation know full well that in the past, and even at the present time, the door has been closed against many applicants, for one reason or another. In my judgment, our people are entitled to the assistance which Congress intended for them to have, when the present rehabilitation laws and agencies were established. No person should be denied the means to enable him, or her, to be restored to such condition, physically or otherwise, as may be needed to afford an opportunity to earn a living.

We see today on world-wide battle fronts men striving in death agonies, to preserve the right to freedom from human bondage Of what avail will their efforts be if we on the home front fail to protect and conserve our own resources. And there is no greater resource than that of our own men, women, and children.

Even the least of these, those sorely afflicted by physical ailments or disabilities, are entitled to their chance in life, and we must see to it that a means is afforded to provide that for them.

There are those who, apparently, prefer to look upon the gloomy side of life. They croak an endless dirge of hard times; of worse days yet to come, and they bemoan the fact that, from their point of view, our people are "wastrels" because, instead of

being content with poverty and its concomitant miseries, they demand the best in life.

I do not share their pessimism. It is my conviction that this Nation, the greatest nation on earth, is fully capable of developing an economy that will provide jobs for all citizens who want to work. Indeed, I fully agree with a recent assertion made in London by one of our greatest elder statesmen, Bernard Baruch, when he said: "The years following this war will see the greatest boom this country has ever known."

Why not? We have the natural resources; the productive capacity; the tools, and best of all, we have the men and women who are forward-looking, and who will absorb our agricultural and industrial products, right up to the hilt, and then, ask for more.

Thank God, the American people are not pikers. We are willing to pay the price of winning this war in blood, grief, and sacrifice. But we are doing it in the belief that there is a better world for us all, beyond the present days of trial and tribulation, when the roar and thunder of death and destruction ceases. We shall then insist upon full exercise of our rights—the rights so eloquently expounded by Tom Paine, Jefferson, Samuel Adams, Ben Franklin, and other architects of our present governmental structure, and we shall fully exemplify "Life, Liberty, and the Pursuit of Happiness."

Surely, our millions of handicapped people are also entitled to their dreams of life, liberty, and the pursuit of happiness. They should not be—they must not be—condemned to continue to live in the half world, the world of pain, lack of even common necessities, and, worse than all, idleness. Once, a disabled man said to me, "Harry, the saddest thing in any man's life is to know that he is not wanted." I have come to understand that, more and more, as I grow older.

The happiest people, I have found, are those who are workers, who throw themselves, body and soul, into whatever pursuit they may be following. I have noted that many handicapped people are superior to nonhandicapped as workers, because they have developed their faculties to such extent as to have enabled them to more than make up for any lack, physically or otherwise. I have noted, too, that handicapped at work at suitable employment are uniformly cheerful and pay close attention to their tasks. Indeed, in many respects they are among our very best workers.

Now the question arises, "What is needed so that we may restore to usefulness millions of men and women who, through no fault of their own, have become disabled by injury or disease?" We have seen for many years the pronouncements of our able Surgeon-General of the United States Public Health Service, Dr. Thomas Parran, who for several years prior to this war warned us that we must adopt both preventive and rehabilitative measures to conserve our human resources, and he made many fine presentations to Congress looking to development of national planning for better health of all our people.

Sad to relate, we paid very little attention to his pleas, or to those of others who had likewise given study to the problems and saw the great danger imminent in piling up a human scrap heap every year of men and women born physically defected or having become so in later life through illness or injury.

When your national president, Paul A. Strachan, came to me, in 1941, and presented the results of his own long studies in this field, it amazed me to note that for several years preceding that time there had been an average of 800,000 persons permanently disabled in some degree, each year, and of those, only 30,000 had been rehabilitated. What an appalling waste of manpower! And, we paid a terrific price for our negligence when, at the beginning of this war, Selective Service turned down approximately 1 out of 4 of all men examined because of physical unfitness.

We must not continue this saturnalia of human waste. We must erect an edifice of rehabilitation, adequate to the needs of today and tomorrow, and based upon sound principles of good public policy. In this instance, I am convinced that it must be the position of the Federal Government to lead the way in this field.

Until our House Labor Subcommittee to Investigate Aid to the Physically Handicapped, of which my friend and colleague, the able gentleman from Pennsylvania, Hon. AUGUSTINE B. KELLEY, is chairman, has completed its work, I am not prepared to lay down specific recommendations in this matter but, I can say, now, that from results of investigations already made by that committee it is clear that there must be better coordination of existing agencies, both Federal and State, and far greater facilities and personnel provided, to deal with this enormous problem.

It stands to reason that, with some 34 Federal agencies each having a part of this work, many of which activities are in wholly unrelated establishments, there is a splendid opportunity for Congress to bring order out of the present chaotic condition, by demanding a complete overhaul and, very likely, bring about a combine of some of these agencies, in order to afford better and quicker service to the public. I am confident, when the Kelley committee makes its recommendations, they will be the basis of a thoroughly comprehensive and adequate program for all physically handicapped.

Four years ago I pledged my support to development of such a program, and in all ways open to me I have kept that pledge, and will continue to do so.

Again, I wish to commend your federation for the splendid job it has done in pioneering in this field, awakening the Congress, industry, and the public, to the necessity of dealing adequately with the problems of the handicapped, and I congratulate you upon the several victories you have already won, beneficial to your people.

I warn you, however, that your work has just begun. You have been told, on many occasions, that it is your function and duty to carry on this fight. You cannot expect to gain adherents to your cause unless you sell them the idea. You cannot expect the Congress, busy as it is with matters of great moment, to hunt you up, and ask for your opinions. To the contrary, you must see to it that the Members of Congress are informed, and thoroughly informed, by you.

Moreover, you must carry your battle into the field. You must educate the public, and the handicapped, on the need and value of such a program as that you are sponsoring, and arouse their enthusiastic support. I must confess, as a Member of Congress, that I consider the views of my own constituents of paramount importance and, so it is, with every other Member. For example, I know, out in my State of California, your lodges are building up good will, understanding, and public interest, on behalf of the handicapped, and your officers, Messrs. Perry E. Seely, Preston Barr, Toivo Lindholm, and Joseph Morehouse, and the Mmes. Alice T. Terry and Edythe Kennedy, are sincerely devoted to advancing the great cause for which you are laboring. I am pleased to learn that the Messrs. Allan Selznick and Charles McMillan are organizing a lodge, now, in San Bernardino, which is the principal city in my own district. But, you must see to it that similar campaigning is done, in every State in the Union.

I am glad, Mr. President, to have had this opportunity of meeting with my friends, and I assure you it will be a pleasure to cooperate with your federation in every way possible, to develop to the fullest extent a means of regeneration and restoring to usefulness, our physically handicapped people.

I thank you.

Basic Postal Pay Increase

EXTENSION OF REMARKS

OF

HON. GEORGE D. O'BRIEN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. O'BRIEN of Michigan. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Detroit News, May 2, 1945, on the subject of basic pay increase for officers and employees of the Post Office Department:

PAY THE POSTMAN MORE

At this late date the case for an upward adjustment of postal salaries, as provided in a bill before each House of Congress, needs hardly to be argued. It has only to be stated.

Postal employees have been more than 20 years without a raise in base pay, which remains between $32 and $40 weekly—a reproach to the Government and by reflection to ourselves for perpetuating an injustice to as loyal and conscientious a body as any in the public hire.

Action at this point by Congress is particularly urgent because in another 60 days the legislative grant of a war bonus of $6 a week will have expired. If Congress neglects to take favorable action, the postal employee's check will be $6 less after June 30. If it acts favorably, he will receive $1.90 a week over what he now receives.

It is little enough for the caliber of personnel the Department attracts—we are inclined to think too little.

The security the Service offers in depressed times hardly compensates for the struggle to make ends meet on such money in times like these, times in which incidentally the postal employee works harder than ever before.

Congress cannot in good conscience do less than act without delay to correct a long-standing imposition on faithful servants. A similar bill in the final stages of passage died with the last Congress. Only procrastination keeps it from being the law.

St. Lawrence Waterway

EXTENSION OF REMARKS

OF

HON. ANDREW J. BIEMILLER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. BIEMILLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an editorial which appeared in the Milwaukee Journal on May 1, 1945, entitled "Only a Few Oppose Waterway":

ONLY A FEW OPPOSE WATERWAY

Senator AIKEN (Republican, Vermont), has charged that "not more than 1,000 people in the whole country" are blocking the St. Lawrence waterway. If so, that opposition ought

to be swept aside. The war has shown that the waterway is vital in wartime as a protected area for the building of ships, to say nothing of the peacetime needs of commerce.

The Great Lakes obviously are among the greatest of the world's sheltered, inland water bearing facilities. To a measurable degree they can be protected in wartime. And to a great degree they can bring the world's water borne commerce almost into the heart of a Nation in peacetime. It is within the power of the Congress to smother the opposition to this improvement by power interests, some inland shipping interests, and a few others.

The St. Lawrence seaway ought to be among the first of the big postwar projects undertaken by the Nation.

Suckers

EXTENSION OF REMARKS

OF

HON. HENRY D. LARCADE, JR.

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. LARCADE. Mr. Speaker, under unanimous consent for the extension of my remarks and inclusion of a newspaper article, I submit the following:

ARGENTINA TO GET TIRES UNDER UNITED STATES AGREEMENT

BUENOS AIRES, May 3.—Argentina will receive a sufficient supply of automobile tires, tubes, and synthetic rubber to satisfy the country's essential economic needs during the war period under terms of an agreement with the United States and Brazil, the Foreign Office announced today.

The agreement, designed to promote Argentina's war effort, to the mutual advantage of all the United Nations, requires that Argentina limit the use of rubber and rubber products to essential needs and prevent sales at excessive prices.

Argentina agreed to halt all contraband in rubber between this and other American republics.

Kansas Farm Bureau Resolution

EXTENSION OF REMARKS

OF

HON. EDWARD H. REES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. REES of Kansas. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a resolution adopted by the board of directors of the Kansas Farm Bureau on April 19, 1945.

The resolution reads as follows:

While recognizing the need of price controls to avoid inflation, it is our belief that such controls should be rescinded as soon after the termination of the war as possible; and in no event should Congress extend such controls for a period of more than 1 year at a time. Also a continuation of the provision that OPA regulations shall not be used to limit profits.

Jewish Rights

EXTENSION OF REMARKS

OF

HON. ROBERT F. WAGNER

OF NEW YORK

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. WAGNER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address which I delivered on April 29, 1945, at a mass rally for Jewish Rights, held under the Joint Auspices of the American Jewish Conference and the American Zionist Emergency Council, at the Lewisohn Stadium, New York City.

There being no objection, the address was ordered to be printed in the RECORD as follows:

My friends, we meet in an hour of great decisions. On the battlefields of the world, we are winning liberty by the sword. In the assemblies of San Francisco, we are working toward security by international organization.

The unconditional surrender of the Nazi enemy, yesterday reported by rumor will very soon in God's appointed hour be reported as fact. The moment is about to arrive—the moment for which endless tears have been shed and unnumbered prayers have been uttered. The long, dark night is about over.

For the victory which is now in sight mankind has paid a stupendous price—in the lives of countless heroes, and the tortured bodies of Hitler's victims.

Our own Franklin D. Roosevelt gave his life so that out of the victory so dearly won may grow universal tranquillity and international justice—justice for all the peoples of the globe, the mighty and the weak, of every color and race and creed.

Justice for the monsters who started this war means retribution, stern and swift. Justice for the innocent sufferers of this war means restitution to the limit of human possibility.

In all the four corners of the world, men and women are urgently looking for a sign—a sign which will indicate whether this great hope of justice will be realized—a sign to make certain that never again shall we experience bitter disillusionment, cynicism, selfishness, and ghastly war.

Because Palestine is so small among the nations, because it has no power except the appeal to conscience, little Palestine is the sign and symbol of that hope, the touchstone of the world's integrity.

Twenty-five years ago, almost to the day, the Palestine mandate was allotted to Great Britain. In 1920, when that historic event happened, we expected that we would assemble in 1945 to celebrate a grand international achievement. Instead, we meet today to protest its nonfulfillment.

What I shall say today is well known to everyone here. My real purpose is to address an audience beyond the sea—the brave people of Britain who are fighting this war against slavery and brutality, shoulder to shoulder with our own boys. I want to speak to the people of England because I have faith in their honor, in their sense of fair play. And I shall speak as one speaks to a friend: bluntly.

In this spirit, I say to our British friends and allies: "You have not fulfilled your obligation in Palestine. You are in default. The American people believe it is high time that you redeem your pledge."

Great Britain made at least three promises.

It promised to use its best endeavors to facilitate the establishment in Palestine of a national home for the Jewish people.

It promised to facilitate Jewish immigration into Palestine.

It promised to encourage close settlement by Jews on the land in Palestine.

It made these promises in writing, solemnly, in the name of His Brittanic Majesty. In return for these promises, Britain received much. From the Allied Powers and the United States, it received the mandate to govern Palestine. From the Jews, it received a vast sacrifice of sweat and treasure which have converted that neglected wasteland into a paradise. From the Jews, also, Britain received on a per capita basis an unexcelled outpouring of blood in this war, as Palestine became the eastern bastion for the defense of Britain's life line.

But Britain has taken without giving in return. It has not facilitated Jewish immigration into Palestine. On the contrary, it has restricted and prevented immigration, even by the hunted refugees from the terror of Hitlerism. It has not encouraged Jewish settlement on the land. On the contrary, it has stripped Palestine of half its territory; and in the remainder has placed every conceivable obstacle in the way of land purchased by Jews. It has not used its best efforts to establish a national home for the Jewish people. On the contrary, it has frustrated that holy aspiration of the Jews.

I do not need to pronounce judgment on this record. Mr. Churchill called it a breach of faith.

There is no defense to this indictment. Great Britain has at all times kept, and still keeps, the benefits she received from the Palestine Mandate. These benefits have multiplied. She has had previously the power to perform her promise. She never had that power more adequately than today.

The officials who today keep the doors of Palestine locked are British officials. The laws which obstruct Jewish land purchases are British laws. The power which is preventing the development of a Jewish Commonwealth in Palestine is British power.

We do not believe that England lacks the strength to perform its obligations. We do believe that its Palestinian policies are a tragic revival of the disease of appeasement.

Appeasement starts with little things, just as an avalanche starts with a faint, crackling noise. But those who do not hear that faint, forewarning, those whose conscience is not quick to act at the first sign, are heedless of history since 1933. No one expects big aggressions shortly after this war. The world is too exhausted for that But it is the world's reaction to smaller aggressions, upon the rights and liberties of small minorities, which will determine whether we can avoid permanently big aggressions when the world recuperates.

That is why I say that the Palestine question is transcendently important—an importance overlooked by short-sighted persons who count the number of Jews with faces turned toward Palestine, as against the total population of the world. The people of the Sudetan also did not count for much—in numbers.

If I am critical of our allies across the Atlantic, let me remind them and others that I have never hesitated to protest against injustice here in my own country. If I did not feel that my record at home was clear, I would not point a finger at others. Let me make it equally clear that, while the primary responsibility for the treatment of Palestine is a British responsibility, I have never forgotten that America has a responsibility as well. The whole concept of world organization is founded upon the proposition

that no great nation can resign totally from responsibility for fundamental questions of justice and right anywhere in the world.

I have always insisted that America should make known to the world its position on the Palestine question, in unmistakable terms. In Congress I have fought for a resolution expressing the sense of the American people that Jewish entry into Palestine should be unrestricted, and that Palestine should be brought into the association of free democratic nations. If the decision had been mine Palestine would now be represented at San Francisco. My influence will ever be exerted in the direction of my beliefs. If I held higher office I would exercise the influence of that higher office in the same direction.

As an American who holds these views I believe in my right and my solemn duty to say to our allies in arms and our prospective treaty partners: The time is ripe to do justice to the Jews. No group of people has suffered longer, or more intensely, from the bestial brutality which Hitler has let loose upon civilization. Most of the Jews of Europe have been annihilated. Only a remnant remains—a brand saved from the flames.

Are the Jews alone to find no solace in the destruction of Hitlerism? Are they alone to be denied a haven where they can rekindle their will to live and contribute to the progress of mankind?

The time is short.

The hour is urgent.

Let all the nations now put their hand to their neglected task of constituting a Jewish commonwealth in Palestine. When intelligence of that great deed is broadcast, then the lowliest and humblest of men everywhere will know that at last justice and liberty have been proclaimed throughout the world.

Pay the Postmen More Money

EXTENSION OF REMARKS

OF

HON. PAUL W. SHAFER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. SHAFER. Mr. Speaker, under permission to extend my remarks, I include the following timely editorial from the Detroit News:

PAY THE POSTMEN MORE

At this late date the case for an upward adjustment of postal salaries, as provided in a bill before each House of Congress, needs hardly to be argued. It has only to be stated.

Postal employees have been more than 20 years without a raise in base pay, which remains between $32 and $40 weekly—a reproach to the Government and by reflection to ourselves for perpetuating an injustice to as loyal and conscientious a body as any in the public hire.

Action at this point by Congress is particularly urgent because in another 60 days the legislative grant of a war bonus of $6 a week will have expired. If Congress neglects to take favorable action, the postal employee's check will be $6 less after June 30. If it acts favorably, he will receive $1.90 a week over what he now receives.

It is little enough for the caliber of personnel the Department attracts—we are inclined to think too little.

The security the service offers in depressed times hardly compensates for the struggle to make ends meet on such money in times like these, times in which incidentally the postal employee works harder than ever before.

Congress cannot in good conscience do less than act without delay to correct a long-standing imposition on faithful servants. A similar bill in the final stages of passage died with the last Congress. Only procrastination keeps it from being the law.

This Changing World

EXTENSION OF REMARKS

OF

HON. THAD F. WASIELEWSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. WASIELEWSKI. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following article from the Washington Evening Star of May 4, 1945:

THIS CHANGING WORLD

(By Constantine Brown)

Some American high officials say it is regrettable that neither the late President Roosevelt nor Prime Minister Churchill insisted sufficiently that the flags of the three major nations should be flown side by side in all the conquered and liberated capitals of Europe. This would have given the peoples of Europe a more tangible visual proof of the cooperation and good understanding among the Big Three than the many officially spoken words which were heard all over the western democracies but reached them only casually.

The matter is said to have been lightly touched on at some of the private meetings of the heads of the American, British, and Russian Governments but was not pressed when it was apparent that the suggestion failed to strike a responsive chord with Premier Stalin.

Today, the Red flag flies over the remaining official buildings in Berlin, Vienna, Budapest, Warsaw, and Bucharest and soon will be hoisted over the imperial palace in Prague.

Neither the Stars and Stripes nor the Union Jack is flown alongside the Red flag with the hammer and the sickle.

The British flag has been hoisted over the large Hanseatic ports of Bremen and Hamburg and will be shown in the near future at Luebeck, while the American flag has been confined to more modest corners in southern Germany. Today, it flies over the ancient town hall of Munich and the Bierkeller, where the Nazi Party was born.

The partition of Germany into three military zones was decided at Teheran in 1943. The actual details as to how far each zone should extend were worked out and settled at Yalta. In order to avoid frictions resulting from a junction of the armies of the western nations and those of Russia, it was agreed that the zone taken over by the Red armies must be well separated from the British and American lines.

The junction of the victorious armies was announced with the usual fanfare. The occasion was made a festive affair which lasted several hours when specially designated detachments fraternized with each other. But as soon as this was over they went back to their positions and there was nothing but a token and official intercourse between them. American officers and men are not expected to leave the tightly drawn lines. Neither are the Russians allowed to cross into the American zones.

There are a few Russian observers with the Eisenhower forces and one official military correspondent at his headquarters. But there are no American observers or newspaper correspondents along the Russian battle front.

There is a reluctance on the part of the Soviet high command to allow "snoopers"—even if they represent the Allies—to wander around Russian lines. And there is a similar reluctance to permit more than a temporary fraternization as a "token celebration" between the GI Joes and the Ivans.

But the question of hoisting together the flags of those nations which have brought the Nazis to their knees is an entirely different matter with a real political significance.

The American and British Governments are striving to show to the people of the conquered and liberated countries that they owe their fate to the common effort of the Allies. There are no American and British forces in any of these countries, with the exception of Greece and Italy. Hence the mass of Slavs, Magyars, Poles, Austrians, and Germans east of the Rhine see only Russian liberating troops and the Russian national emblem. They have no idea that the United States and Great Britain, while too far away to help them with armed forces, have also contributed vastly to their freedom—or defeat, as in the case of the Germans.

From the military point of view alone, this is of little consequence, but from a political point of view it is of the highest importance.

America and Britain originated the designation "United Nations." It is in the interest of the peace of the world to inform the people of Europe, and particularly those east of the Elbe River, that this denomination means what it says and is not a mere sophistry. Since it is not possible for British and American forces to be physically represented in those territories, the flags of Russia's allies flying side by side with the Red flag, would be a visual proof to the liberated and defeated people that victory was achieved by the efforts of the three major powers and that in the same manner they must look to these powerful nations in the future for a lasting peace.

Ratification of Treaties

EXTENSION OF REMARKS

OF

HON. J. PERCY PRIEST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. PRIEST. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Chattanooga Times of May 5, 1945:

BY A MAJORITY

A brilliant debate was held in the House of Representatives this week on a proposed constitutional amendment to have a majority of both branches of Congress ratify treaties, instead of a two-thirds majority of the Senate. Representatives PRIEST and KEFAUVER, of Tennessee made compelling arguments in favor of the resolution.

Mr. PRIEST argued that the situation on treaty ratification has changed since the Constitution was adopted.

Under the original document, Senators were to be chosen by the State legislatures and hence were to be regarded more or less as delegates to the central Government from the sovereign States. Now Senators, like Representatives, are chosen by the people.

When the Constitution was adopted, the least populous State, Delaware, had 8 percent as many inhabitants as the most populous, Virginia (Census of 1790). Now the least populous State, Nevada, has only ⅘ of one percent as many inhabitants as the most populous, New York (Census of 1940).

Representative MERROW, Republican of New Hampshire, pointed out in the House on Tuesday that under the system of ratification by two-thirds of the Senate the two Senators from Nevada, representing 110,000 persons, have as much power over treaties as the four Senators from New York and Pennsylvania, representing 23,379,000 persons. A treaty could be defeated by Senators from the 17 smallest States, containing only 7½ percent of the entire population.

A strong argument for ratification by a majority of both Houses is that this present destructive war probably would have been averted if that rule had been in effect after World War No. 1. The League Covenant would certainly have been adopted by a majority of both Houses of Congress.

Oregon: State's Future Linked With Forests

EXTENSION OF REMARKS

OF

HON. HOMER D. ANGELL

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. ANGELL. Mr. Speaker, the greatest stand of virgin timber in the United States lies within the States of Oregon and Washington. The forestry industry is one of the major industries of the Northwest and entitled to most careful consideration in plans for the postwar development. Much of the wastes of the forests which are not being utilized could be salvaged under advanced, scientific methods. A most interesting discussion of the future of this great industry is contained in the article by Dean Johnson, president of the West Coast Lumbermen's Association, which appeared in the Sunday Oregonian on April 29, 1945.

The article is as follows:

STATE'S FUTURE LINKED WITH FORESTS—"LOG 'EM AND LEAVE 'EM" NO LONGER THEME SONG OF WOODSMEN OF WEST

(By Dean Johnson, president, West Coast Lumbermen's Association)

Paul Bunyan and his blue ox are gone forever from the woods of Oregon and other parts of the Pacific Northwest. They epitomize the pioneer courage, vision, and strength of the lumber industry as an enterprise that turned the big timber of the virgin forests into wood products for the markets of all the world.

For the most part, those were "lumberyard forests," with the trees at their prime or past it and so simply standing on the land as timber in storage—timber that would die and decay if left unused by man.

In the west coast region today vast areas of the remaining virgin forest harbor decadent trees. Other vast areas have been cut over by the ribe of Paul Bunyan, whose main business in life was to get old-growth timber off the land and manufacture it into lumber, shingles, plywood, and pulp.

Production in the age of Paul Bunyan meant only the production of logs and log products.

Now, in the new day of the west coast forest, industrial production also means the production of trees from the land.

Those two short paragraphs represent what in fact is a definite turn-about of the west-coast lumber industry from the things of the past and a forward march into a forest future of giant hope and glittering promise.

PRODUCTS DEVELOPED IN WAR OPEN NEW MARKETS

The hope and the promise are substantial. On the one hand they are rooted in the forest soil itself. Lumberman have learned that it pays to grow trees—to produce trees as well as to produce logs and lumber. And so lumbermen who are responsible for the majority of west-coast production are committed to "the continous growing of timber crops" within the west coast tree farms program.

On the other hand, the hope and promise of the west-coast forest future are rooted in research and in the new wonders of wood that have proved their value in recent years, particularly in the war. They greatly broaden the market for forest products, they offer increasing utilization of forest material now unmarketable, and they make greater use of the small second-growth log.

Forest defeatism is folly. Close-downs of ancient saw mills mean nothing but progress—the giving way of the old for the new. The greatest days of trees and men together in this region are ahead of us. Let us look a few facts in the face.

West of the Cascades—from Canadian border to California line—are 29,000,000 acres of forest land, covering 82.6 percent of all of our land area. Federal forest surveys show that 25.9 million acres of this land is in valuable commercial forests.

Today this area supplies our Nation with 30 percent of all lumber used, 90 percent of the wood shingles, and 23 percent of the pulpwood. Last year, 1944, we cut a little less than 8,000,000,000 feet of lumber. Federal surveys show that in the Douglas fir belt alone we have 451,000,000,000 feet of unreserved saw timber—old-growth timber. This saw timber comprises several species, all valuable commercially—Douglas fir, Sitka spruce, west coast helmlock, western red cedar, Balsam firs, and some hardwoods.

On the basis of these figures, which are unquestioned, assuming that we would continue to cut old-growth timber at the rate of 8,000,000,000 feet annually from the region west of the Cascades, the old growth timber in Oregon and Washington would disappear after another half a century. The worst pessimists expect it to last another 30 years.

But back of this stand of old-growth timber is a tremendous reserve of young timber, young growing trees, capable of making from 500 to 1,500 board feet per acre per year of wood. More than 8,000,000 acres is in second growth of less than saw timber size and another 1.5 million acres are in recent cut-overs, while 2.2 million acres are less than 10 percent restocked.

Oregon State Forester Nelson S. Rogers, who has spent a lifetime working in and studying forestry, logging, timber management, and forest land management, estimates that Oregon alone can produce on her 24.5 million acres of forest lands (this figure includes eastern Oregon pine) something in excess of 7,000,000,000 board feet of lumber perpetually—measuring each year only trees of sawlog sizes, 60 or more years old. Think of it—7,000,000,000 board feet of sawlogs produced each year—more than we are cutting today at the peak of our harvest of old-growth crops. The forestry survey says that today in the Douglas fir region—the west coast of Oregon and Washington—we are growing only 2.4 billion feet, but that our potential in this region is 8.2 billion, once the old stuff is taken off the land and it can be turned to the production of trees.

The main reason we are not producing to the full capacity of our forest lands today is because so much of our land serves only as a storehouse for stagnant timber. Another reason is that we have too many acres of forest land that are not in forest crops, which has either been poorly cropped so that trees had no chance to reproduce to renew themselves or because the land was burned clean of seed sources. Then, too, we have millions of acres of forest land in old growth (dead timber), now being harvested. These lands are not putting on growth, in most cases, actually are showing a loss of board feet measure per acre every year, due to disease, decay, wind damage, fire and old-age deterioration.

If we are to get maximum production of forest products from our vast areas of forest lands, then sound forestry must be practiced everywhere so that lands now being harvested will reseed naturally. Even now both public and private timber land owners are planting some of the burned or nonstocked lands. This will require costly hand planting, but under fair conditions it can prove to be good business. In any event, the public welfare requires it.

What is the new lumber industry doing to provide perpetual crops of forest products? In western Oregon and Washington more than 2,000,000 acres of privately owned timberland have been certified as tree farms. This means that owners of 51 separate tracts from small holdings to half-million acre estates have agreed to practice intensive forestry so that these lands will produce the maximum of forest products.

LEADERS RECOGNIZE NEED OF NEW ATTITUDE

Many more owners of timberland have installed expensive fire-protection systems; are leaving seed sources so that newly logged areas will reseed naturally; are practicing better logging so that small trees, not yet mature, are left; are carrying on extensive research to find ways and means of using more of the tree now left in the forests, because it now costs too much to cut and haul out as conventional sawlogs; and are planting at heavy expense several million seedling trees grown at the industry's own nursery at Nisqually, Wash., every year.

Granted, we have a long way to go yet before all of the industry can proudly hold up its head and say, "We are doing the best job of forestry possible to do." The important thing is that industry leaders recognize there is a real job to do; that the industry in a large way has considerable responsibility to the people who live in the forest-supported communities of the West; that only by adopting sound principles of sustained production—sustained yield—harvesting only as much as we can grow on our lands, can we hope to perpetuate an industry which will forever be the backlog of our economy, the source of over half our region's jobs, over three-fourths of our freight, a large share of the tax load.

There is going to be some economic adjustment necessary in this region as we shift from a mining to a cropping policy in our timber, from a harvesting of wilderness forests to managed forestry. This adjustment is already going on. It may often be an economic dislocation instead of an adjustment. In some areas a slow-down in amount of timber that can be cut must be undertaken. It will require from 25 to 50 years before we can apply the sound program of sustained yield to all of our lands, before we can work out the very difficult problems of allotment of public-owned timber to operators in various regions.

There will be bad news for some areas when sawmills close during the period between cutting of last old growth and maturity of the new crops. Fortunately, in many regions,

an intelligent approach to the problem of sustained-yield management is being undertaken early enough so that little or no lag will be felt in most of our well-established communities, depending upon forest-products industries.

If we grant that acceptance by industry of sound principles of forest-land management is good news for the West, which will serve to perpetuate jobs and pay-roll industries far into the future, then we will say, I am certain, that another achievement of industry, aimed at producing even more jobs, is front-page banner-head news.

I refer to results of research into the field of utilizing waste from sawmills and forests. Today we are forced by the strict law of economics to leave much of the wood in the forests, finding it profitable to take out only good grade sawlogs or pulp logs. At the mill other wastes occur in many of our plants as we dispose of sawdust and slabs in uneconomic, nonproducing fires, using only a small percentage of our total sawmill wastes for fuel for nearby communities or power to turn our saws and machines.

Tomorrow we know that most of this waste will be channeled into profitable products for the use of humanity. The forest industries shall do their part to create many thousands of new jobs, permanent jobs, in the making of products which will utilize our woods and sawmill wastes.

Plastics, ethyl alcohol, ships stores, oils, lignins, feeding yeasts, high-protein fertilizers, charcoal, dry ice are just a few of the thousands of products which can be profitably made from our cellulose and lignins—the two principal components of trees.

WASTE CAN BE REDUCED BY NEW PROCESS

At Springfield, Oreg., a $2,500,000 plant is being erected for the Willamette Valley Wood Chemical Co., which will manufacture ethyl alcohol (potable 190 proof) from wood waste—mostly sawdust and log fuel from nearby sawmills—which has been going up in smoke in burners. There are innumerable other byproducts possible from this plant, including feeding yeast for cattle, a good fertilizer for worn-out Willamette Valley farm lands, even dry ice from one of the by-products gases after ethyl alcohol is made.

In Portland experiments have been sucessfully carried on for over a year now in manufacture of charcoal (used in large quantities by our Northwest chemical industry) from log-fuel waste, and now produced in commercial quantities. Laboratories at Oregon State College, Longview, Portland, Bend, and Seattle are tirelessly at work on other projects in research, all aimed at creating new products from wood waste.

Some Oregon and Washington sawmills have developed the treating of lumber to a point where it can be offered to the public as proofed against wear and fire. Termite protection has been afforded for some time. The trend within the industry is toward a more refined product from our sawmills—not just rough, green boards.

More jobs will be created in our industry in the future not only from new byproduct industries, but from our further processing of lumber. Better grading, trimming, packaging will suit the customer. So will certain types of prefabricating, which has been developed by several of our firms to a high state during the war, and which will see complete bridges, houses, small buildings, trusses, beams, boats completely framed and manufactured at the mill or in specialty plants in this region.

Developments in new products have been so numerous during the war that even those of us inside the industry do not yet know all the story. Hemlock bark tannin, cork from Douglas fir bark, compreg wood (resinous injected and heat pressurized wood as strong as steel), plastics from bark, impreg wood, new glues which will not deteriorate under heat, frost, water, or weather are just a few of the new magics in use of wood which come to my mind.

We are truly living in the new age of wood. If some of the great scientific developments in wood use are hidden to our eyes for national security reasons, our boys in the Army and Navy know about them. They know the job wood has done since it was first inducted and called upon to house 12,000,000 men and women. They know how it alone was obtainable in sufficient quantities to help build fleets of airplanes, flotillas of ships, pontoon bridges and P. T. boats, huts, hospitals, hangars, docks, shipyards, how it has safely carried million of tons of food, ammunition, and medicines to every fighting front. These jobs wood did—and proudly.

When the war is over, wood will take its place here in the Pacific Northwest, here in the greatest timber-growing area in the world, west of the Cascades, as the raw material from which prosperity will be fashioned. The economy of this region will be a forest economy, for most of the land is good for little but timber growing. For the growing of timber, considering climate and tree species, our land is the Nation's best.

German Atrocities

REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. McCORMACK. Mr. Speaker, I shall insert in the RECORD, so that it will be a part of the permanent RECORD a statement that came out of Paris of the American editors who are over there now investigating the German brutalities. This is evidence for future consideration. The statement is important evidence in connection with the prosecution of Nazi war criminals.

Not only must those responsible and those who participated actively or passively in these mass murders be prosecuted, but the spirit that animated such atrocities, the influence that brought it about, the origin of such inhuman brutality must be destroyed for all time. The "Prussian spirit" and what it stands for cannot be permitted to exist after this war is over, even in an underground manner.

After the war in Europe is completely won and when Japan is defeated in the Pacific, the war criminals of that country should be vigorously prosecuted and severely punished. After the terrific pain and suffering of this period, with millions of persons killed, with millions injured, with the untold destruction of property, with the set-back to the normal, healthy progress of mankind which the vicious enemies of decent civilization have brought about, we cannot permit those responsible as war criminals to go unpunished.

There is one thing we must do for the benefit of mankind in the future, and that is to see that the war criminals of Nazi Germany and of vicious, destructive Japan are promptly prosecuted and severely punished.

The report heretofore referred to follows:

EDITORS' REPORT SAYS BRUTAL MASTER PLAN GOVERNED NAZI CAMPS

This statement is issued by the editors who came to the European theater of operations through the personal invitation of General Eisenhower to see for themselves conditions in the German prison camps overrun by the Allies.

This delegation of newspaper and magazine editors was brought to Europe at the suggestion of General Eisenhower to investigate reports of German atrocities.

TWO CAMPS INSPECTED

We have visited and spent considerable time investigating the prison camps at Buchenwald and Dachau. We have interviewed recently freed political prisoners, slave laborers, and civilians of many nationalities. We have studied a great mass of documents covering the German occupation of France which contained photographic evidence and testimony taken in many places and painstakingly authenticated with the sworn statements of witnesses and victims.

The conclusion is inescapable that the Nazis had a master plan for their political prison camps. That plan was based upon a policy of calculated and organized brutality. The evidence we have seen is not a mere assembling of local or unassociated incidents. It is convincing proof that brutality was the basic Nazi system and method.

This brutality took different froms in different places and with different groups. The basic pattern varied little.

MURDER COMMONPLACE

Actual Nazi methods ran the gamut from deliberate starvation and routine beatings to sadistict tortures too horrible and too perverted to be publicly described. Murder was a commonplace.

Prisoners whose only crime was that they disagreed or were suspected of disagreeing with the Nazi philosophy were treated with uniform cruelty. When death came, as to multiplied thousands of them it did, it must have been a relief from worse than death.

By these tortures most of the Jews in prison camps had already been destroyed. After the Jews, the most cruelly treated victims were the Russians and the Poles.

To the basic policy of brutality toward political prisoners there were, however, no significant exceptions.

This, we believe, is the inexorable consequence of the whole Nazi-Germany philosophy. By this philosophy and the cunning and persistence with which it was propagated the German mind became contaminated and diseased.

PEOPLE TO BLAME

For these crimes the German people cannot be allowed to escape their share of the responsibility. Just punishment must be meted out to the outstanding party leaders, and the German general staff, to party office holders, to all members of the Gestapo, all members of the S. S. Simple justice, and the future peace of the world require that all these, by virtue of their position, be indicted as war criminals.

In punishing these crimes the historic principle of individual and personal responsibility must be preserved and all those responsible for these atrocities must be punished in accord with the accepted laws of civilized nations.

We strongly urge that United Nations policy in regard to war criminals be speedily agreed to and the War Crimes Commission speedily empowered to put those policies into action.

As we witness the collapse of the Nazis' experiment in ruthlessness and totalitarianism, we are more than ever convinced that there can be no peace on earth until the right of the earth's peoples to life, liberty,

and the pursuit of happiness is recognized and protected under law.

Missouri Valley Authority

EXTENSION OF REMARKS

OF

HON. ALBERT M. COLE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. COLE of Kansas. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution adopted by the board of commissioners of the city of Topeka, Kans., concerning the proposed Missouri Valley Authority:

Whereas there are proposals before Congress for the establishment of a Missouri Valley Authority; and

Whereas the Army with the cooperation of the city has a flood protection project nearing completion for the city of Topeka; and

Whereas the Topeka project is under the direction of competent Army engineers and without political consideration; and

Whereas the city prefers to maintain and operate locally these flood protection works: Be it

Resolved by the board of city commissioners, That the board of city commissioners hereby protest the formation of a Missouri Valley Authority and that copies of this resolution be sent to the Kansas Senators and Congressmen in Washington.

Adopted by the board of commissioners, May 1, 1945.

Approved May 1, 1945.

W. A. LAWSON,
President of Commission.

Attest:

LOUISE HANLIN,
Deputy City Clerk.

Reciprocal Trade Agreements

EXTENSION OF REMARKS

OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. REED of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement of Matthew Woll, president, American Wage Earners' Protective Conference—tariff group of the American Federation of Labor—also president, Union Label Trades Department of the American Federation of Labor:

Mr. Chairman and members of the committee, my appearance and presentation at this time is in opposition to the extension of the trade-treaty program submitted to your committee for its consideration and to urge that a limitation be imposed providing that competitive imports of workers in foreign countries be denied entry in American markets at total landed costs, tariff duties paid, which are less than American costs of production and wholesale ceiling price of products of American workers when such competitive products of American workers are commercially available.

In contemplating the extension of the trade-treaty program at this time two principal considerations should guide us. One is that war conditions have disrupted completely all normal trade between nations. We should therefore keep in mind the abnormality of current conditions. The other is that we should keep before use the oncoming days of peace and the reestablishment of a peacetime economy.

While still operating under restrictions and artificial conditions of war, we must not lose sight of the situation which the cessation of hostilities will bring nor of the economic forces which will become operative when peace is established.

So long as the war continues, the necessities of war will, of course, continue to shape our foreign trade no less than our domestic production. Import duties under such conditions are of minor importance. Wartime needs and the availability of essential products and of shipping determine the course of imports and exports. The primary concern in considering the extension of the trade-treaty authorization is therefore with post-war-trade policies.

Undoubtedly many changes will have occurred before the war ends, setting off the postwar from the prewar world. For several years abnormal conditions will prevail. There will be a shift in the countries in the order of their importance in our trade, and this will represent a change in the international competitive conditions.

The experience of the war and of the prewar years naturally suggests a reexamination of our position as well as of the principles which we have followed in the past. It is important that we avoid errors that can only lead to disastrous consequences. We should examine very closely certain ideas and doctrines that have gained currency during the war. We must take care that in seeking to build for peace we do not permit our eagerness and our natural desires to help the rest of the world to lead us into false actions which, however idealistic and seemingly conducive to peace, will end not only by not helping others but by injuring ourselves immeasurably.

TRADE NO GUARANTY OF PEACE

It is obvious that we have a trade treaty program on the one hand and a world at war in a number of sectors on the other. Let us overlook or disregard the contention that the trade-treaty program arrived on the scene too late to prevent the outbreak of hostilities or to draw us into the present world conflict, based on economic struggles of long standing, even though the program had been in effect long enough to produce the alleged gains in trade claimed for it. Since the later claim is erroneous, we may agree that nothing occurred which would have produced any appreciable effect upon the economic difficulties which presumably underlay the war.

It is said international trade leads to intradependence. This, according to the theory, would lead to international pacification. Yet at the same time it appears that international rivalry grows, to some extent, at least, out of competition for control of raw materials.

Now, too, international interdependence based on trade produces international vulnerability to economic distribution. Should the war come to an end tomorrow, we cannot escape the depressing consequences of a general demoralization, military and industrial, and the ensuing unemployment. Now, this is not set forth as a counsel of isolationism, as some would have you believe. but to deflate the fallacy that international intradependence is a guarantee of peace.

We need look back only a few years to the days when trade treaties were proposed as instrumentalities of world peace. We have embarked on the one hand upon a course which is calculated to increase the standard of living in this country by establishing minimum wages and shorter hours. We undertook on the other to lower our tariff rates, thereby exposing our relatively higher wage structure to the competition of low-wage products of workers in other countries.

This action would not have been inconsistent if we had restricted our tariff-rate reduction to those considerations which did not come into either direct or indirect competition with the products of our own factories, farms, and mines. Although the negotiators of the trade treaties profess to have taken care that only those tariff rates on products that did not compete too seriously with the domestic output should be reduced, this avowed care was quite ineffective because, among other things, of our adherence to the unconditional most-favored-nations clause.

TRADE TREATIES ILLEGAL

In considering the proposal of further extending both the time as well as discretionary authority enhanced in the trade-treaty program, it is well that we first consider the question of legality. In our judgment, these trade treaties are contrary to the Constitution of the United States. They are contrary to the express policy of every Democratic Party controlled Congress from 1882 to 1932. They are contrary to, and virtually set aside and nullify, the protection of jobs and standards of living which American workers receive through the Asiatic exclusion law, restrictive immigration law, and the fair labor standards law.

Former Secretary of State Hull, in serving as Congressman and Senator, bitterly opposed the granting of taxing and treaty-making power to any appointed officers of our Government.

Every leader of the Democratic Party, prior to 1933, has publicly opposed this type of legislation.

Then, too, we hold that the taxing power of our Federal Government, under our Constitution, is vested solely and exclusively in the Congress of the United States, and that Congress is without authority to delegate this taxing power to the executive branch of the Government.

Under our Constitution all revenue measures must originate in the House of Representatives. This power to originate revenue measures cannot be delegated to any other agency of Government. Indeed, the Senate cannot act on measures affecting revenue without the House of Representatives having first considered such measures. The House of Representatives have sole and exclusive authority of dealing originally with any and all measures pertaining to or involving revenue.

That the trade-treaty program is a revenue measure is well evidenced by the fact that the present proposal finds its origin in the House of Representatives. Had the Senate attempted to set aside or disregard this constitutional provision, we are confident the House of Representatives would have clearly and unmistakably revolted against such a new procedure.

Then, again, we find further evidence in support of this contention in the well-known and historical policy of the Democratic Party that tariff rates can only be justified and be used solely for revenue-producing purposes. It is, therefore, our contention that the attempt to continue and to enlarge the discretionary authority of the State Department to decrease the revenue at will is wholly without constitutional sanction and is unwarrantably delegating authority from one branch of Government to that of another.

Aside from the legal and constitutional questions involved, there is to be considered the danger of depriving the citizens of our land of the opportunity of petitioning their Government through its legislature in matters which vitally affect their property, persons, and their livelihood, whether as proprietors of industry or of labor. Then, too, there is involved in this proposal, the development of a bureaucracy, a development wholly at variance with our American concept of a free and democratic people, and our republican form of government.

Then, too, if we are ultimately to forsake our original moorings and venture in permanent international arrangements through covenants instead of treaties, we must, at least, insist that such covenants be openly arrived at and not be negotiated in secrecy, and that all parties affected either in their properties and persons shall be given the opportunity of presenting their point of view honorably and fairly for consideration, not by listening posts, but by those who are actually entrusted with and do the negotiating of such trade treaties.

AMERICAN PLANTS IN FOREIGN COUNTRIES

In the development of an extension or enhancement of international trade there enters the question of methods of production, costs of materials, wage structure, and terms and conditions of employment prevailing in the countries at interest.

It is a well-known fact that the wage levels of the various foreign countries differ widely, the lowest levels, in general, being found in the Far East countries.

The 10-year annual real income per worker from 1925 to 1934, inclusive, in various countries has been estimated as follows:

China	$110
Italy	343
Japan	353
Germany	646
France	685
Great Britain	1,069
United States	1,381

This mean that when we import goods to the value equal to those that we export, we actually import more man-hours of work than we export. Therefore, the exports by which we balance imports do not represent the amount of employment that is lost through importation of competitive goods that could be produced in America, and, which would provide some of the 60,000,000 jobs which will be needed for America's workers after the close of the present World War.

It is true that in quite a number of instances we have had the benefit of modern automatic machinery, mass production, with volume sales and mass distribution, resulting in a greater productivity per worker and at lesser unit cost. It is equally true that the postwar years will witness the installation and use of modern automatic machinery—both of American and European production—as well as mass production in many of the industrial plants in competitive foreign countries. Indeed, among our principal trade-treaty advocates, we find those who are interested not only in furnishing the prostrate countries of Europe with our modern production machinery, but, likewise those who would invest American earnings and savings in capital investment abroad in the hope, in later years, of closing down American factories and supplying the American market with products produced in their foreign plants.

By these processes what may seem an immediate advantage, will become gradually of lesser value here, and will ultimately place the competitive products of American wage earners and of our smaller consumer-goods manufacturers at an ever-increasing disadvantage. As evidence of the validity of the foregoing, we would point out that industrialization of Latin-American countries, and, of the Far East has proceeded at a remarkable pace. India has become an industrial nation of secondary rank, as well as a creditor nation. East Europe has been made a second Ruhr industrial district by the Nazis, and, we understand that a substantial part of industrial capacity has been transferred to what is now southeast Poland, Upper Silesia, Czechoslovakia, Austria, and Hungary. Coal production in Upper Silesia, with developed coal fields slightly greater than those of the Ruhr, now compare with the former Ruhr production.

Turkey, the Belgian Congo, South Africa, Argentina, and Brazil, as well as other countries formerly buyers of America's industrial machinery and other products, have increased their industrial productivity. Brazil once a buyer of American cotton, now supplies those who formerly purchased our cotton, as well as most of the manufactured cottons sold in Latin-American countries. Incidentally, England today, and in the future, purchases our cotton only to fill out the void left by the present inability of India and Brazil to fill her needs for cotton.

England, with the consent of important factions of English organized labor, has also arranged to install pilot plants, equipped with modern automatic machinery and the elimination of restrictions on the number of machines which one person may man, which restrictions have existed for years, in order to permit of a substantial increase in the export of competitive products. All these are merely indications of trends and developments in the making, and which cannot and must not be overlooked if we are to conserve American interests, maintain our American standards of life and work, and enable us as a people and as a Nation to render the much needed help required by the depressed nations of Europe and Asia. Incidentally, at this time we direct your specific attention to a situation in the present tariff act which should be corrected. Under the provisions of section 526, an American manufacturer with plants located in foreign countries with lower production costs protected by American patent and trade-mark registration, has the sole authority to market in American markets such products of foreign workers, subject only to his paying the inadequate tariff rates which are now in force.

PROGRESS PENALIZED

It is well known that in recent years the industrialization of a number of countries that previously shipped principally raw materials or the product of home or household industries, has proceeded rapidly. The specialization in given lines of goods that was characteristic of the past has given way to a wider line of industrial products. It has, therefore, become difficult to single out a few products of particular countries for tariff rate reductions without bringing in the same products from other countries, and thus exposing American producers to competition of the lower labor costs products of workers in other countries.

The theory was that certain undisclosed specific industries could be sacrificed for the supposed greater general benefit that would be enjoyed all around, but, no one has ever shown how this can be done. Another theory was that domestic manufacturers were enjoying excessive profits and that lowering this profit was a good deed in itself, quite regardless of other consequences. What was either not understood, or, if understood, not acted upon, was that in a world of unequal standards of living, the inevitable result of an unimpeded flow of trade would be the reduction of all standards of living to the same level in all parts of the world. The standard of living in the United States, being the highest in the world, would be reduced more than any other. This represents a strange way of fostering progress. It is difficult to understand what class of justice requires that progressive people should be penalized for being progressive. To reward industrial and mechanical progress by depriving it of its fruits is not in keeping with common sense.

We have within the United States itself an incompletely exploited market. An increase in wages, in the lower wage areas, would expand a potentially rich sales territory without exposing ourselves to unfair competition of competitive products of much lower paid labor. On the contrary, unfair competition in the domestic field would be eliminated.

The same principle holds in our economic relationship with other countries. If they wish to sell more to us, they should make it possible for us to sell more to them. As long as their population cannot purchase more extensively because of the low wages paid, the market for our goods in these countries remains relatively small. It is not intelligent to place the burden of expanding international trade upon us. Too long and too often we have been reproached for retarding and discouraging international trade. Actually, when our imports equal our exports in dollar values we import the product of more man-hours of labor than we export.

It has not been the United States that has hampered international trade. The most that can be said is that we have refused to jeopardize the job opportunities of millions of America's industrial workers and the price level of our farmers to the competition of the lower wage and lower cost products of workers and farmers in other countries. Those who say that we should do that advocate a lower standard of living for the workers in our factories and our mines and those on our farms, and, therefore, a shrunken economy.

It is actually the low-wage countries that retard foreign trade, for it is against low-cost, and, therefore, low-wage competition that tariff duties are generally aimed, not only in the United States, but in other countries. It is the differentials in wage levels and costs of production that constitute the stumbling block in international trade. No sane nation is willing to see its own industries driven out or closed down by the competition of the products of low-wage-paid workers of other countries.

TRADE TREATIES HAVE FAILED

It is said that in order to export more we must import more. That is to say, that if we wish to dispose of our farm surpluses abroad and wish to add to our factory employment, we must reduce tariff rates in order that foreign-produced goods may come in to our markets in greater volume. To which is now added the plea that if our Nation ever hopes for a repayment of loans made or to be made in foreign countries, we must open wide our doors to imports. It is quite obvious that increased factory employment attributable to increased exports represents a net loss in employment compared with what employment might be obtainable if we manufactured at home the competitive articles which we import.

Failure of foreign countries to increase their purchasing of American products or commodities may not be attributable to any failure of the United States to increase its imports. Indeed, we face ultimate danger in planning for surplus product economy. It is all very well to say we must gear up American industry at this time far beyond our own abilities to consume in order to provide employment for our workers and look to foreign markets to dispose of our surpluses. How-

ever, we must not overlook ultimate reckoning. Within a few years foreign industries will have been rehabilitated with modern automatic machinery and American methods of production and distribution. We will then find we have founded our national economy on a false and insecure basis. Indeed, we have had a surplus production in cotton, in manufactured tobacco, in wheat, and in lard. What do the trade treaties show as to the benefits we have conferred on those who depend on such products for their means of a livelihood?

In order to market cotton and tobacco we are now paying an export subsidy. Assistant Secretary of State Clayton has told this committee that the paying of an export subsidy was economic warfare. Secretary Wallace told your committee, or, in previous addresses has stated, that export subsidies constituted international price cutting and unfair competition.

We are now emerging from a disastrous world war. We are told that this was due, in part, to economic conditions. We are told by some of the proponents that the continuation of the trade-treaty program, and further reductions of 50 percent in our tariff rates is necessary to purchase, although they did not use such plain language, the good will of those countries which we have saved from the domination of the aggressors.

With increased productivity and dependence on foreign countries, we will find that even during the present world war, 1939–44, countries dependent on importations of foods and industrial products turned to domestic production of these articles and commodities.

FAULTY PROPAGANDA

One of the innumerable pieces of propaganda which has literally flooded the homes of America's workers, advocating the further reduction of tariff rates, through our entry into trade treaties, is a graph issued by the Graphic Associates of Public Affairs Committee. This graph is allegedly based on figures contained in the statistical abstract of the United States. This graph lists the average weekly wages paid in the United States, 1939, for "protected" domestic and export industries, citing certain industries as illustrative.

The text which accompanies these graphs conveys the impression that workers in export industries receive higher wages because "trade is a two-way street" and due to the fact that we import certain raw materials.

The average wages cited are:

Protected industries:	
Cotton goods	$14.26
Silk and rayon	15.78
Pottery	22.75
Carpets and rugs	23.25
Export industries:	
Agricultural implements	29.61
Automobiles	32.90
Rubber tires	33.36
Machine tools	34.25

For from being an argument against protecting the job opportunities of America's workers in these protected industries, these tables show that the wages that can be paid in American industries are limited in their wage ceilings by competition in American markets with competitive law-wage products of workers of foreign countries. American industries that compete with low wage, and thus low-priced products of wokers of foreign countries, have their wage ceilings limited by the entry into American markets of such products of foreign workers. These American industries may not have the margin available for payment of wages that indutries of an export basis have. The disparity may, therefore, be well attributed not to tariff protection, but to the inadequacy of tariff rates now in force.

No reference is made in these graphs or in this propaganda to the fact that these so-called export industries are those which are highly mechanized and which have a labor cost which represents a small portion of the cost of production.

In addition it is worth while noting that all of these so-called export industries are dependent for some 90 percent or more of their sales in the great American market.

The low labor cost of these export industries is due primarily to the great volume of sales available to them in the American market due to the higher-living standards made possible by the much greater purchasing power and capacity of America's workers, miners and farmers.

Those who advocate a higher living standard for all Americans, and, who are willing to help promote higher living standards in other nations seemingly overlook the fact that our present tariff system places an unfair handicap on the products of those countries which have higher living standards prevailing, and, which countries are our best customers. Higher living standards mean higher wages, and, in most cases, higher labor costs. Our present tariff system, with ad valorem rates based on foreign valuation, makes it possible for the competitive products of the lower wage and lower living standard countries to enter into American markets at a lower tax than is paid for comparable products of the higher living standard countries.

The time has arrived when the right of high living standard countries to protect themselves should be recognized. It should no longer be necessary for a country that maintains a relatively high wage level to apologize to the low living standard countries. Indeed, the apology should come from the reverse direction. Why should we be ashamed of our higher standards of living? If the products of the low-wage-standard countries compete with our own in our own American markets because of the lower prices resulting from the lower wages paid in those countries, we are certainly under no moral or economic obligation to import such products. The moral and economic obligation, if any, rests on the low-wage countries not to disrupt our wage standards.

FORCED LABOR IMPORTS?

In this regard it is well we consider the sort of competition we may anticipate from some of the countries abroad. We hear much of the effort being made by some of the Allied Nations in having German labor indentured, conscripted, or forced to labor in other countries as a means of reparations in kind. This raises the serious question of whether section 307 of the Tariff Act of 1930 is to be enforced.

Section 307 of the Tariff Act of 1930, in substance, prohibits the importation into American markets of the products of forced or indentured labor. Naturally, indentured slave or forced labor, through the use of which certain of our allies hope to rebuild their country and their industries, comes within the scope of such prohibition.

Will this law on our statute books, designed to protect American labor against the products of involuntary labor, be properly enforced by our Treasury Department or will it be virtually set aside with the Treasury Department refusing to enforce the law as in the case of imports of Sumatra tobacco and Russian wood pulp, products of forced or indentured labor?

This raises the question, are we a government of laws and shall our laws be enforced impartially and not be set aside for the benefit of anyone—Government or otherwise?

ANALYSIS OF TRADE TREATIES' EFFECTS

The Fair Labor Standards Act was enacted by Congress in order to prevent, within our own country, exactly such unfair competition as will confront American labor unless protected by Congress against the competition of low-labor-cost products of foreign production. There is no difference in the injurious effects produced by unfair competition from low-wage areas merely because these areas lie beyond our national boundaries.

Actually, the trade-treaty program was ineffective in the accomplishment of the hopes claimed for it. This is a story in itself.

Five years of operation did little or nothing to provide jobs for the millions then unable to find jobs or, later, as promised, to prevent the outbreak of the most terrible war in history, although it was claimed, by its proponents, that it would provide jobs and would pacify the world.

The export statstics for 1934 through 1938 (the last normal prewar year) show conclusively that the trade treaties also did not promote exports, as it was boldly claimed and proclaimed that they would. This can be and has been shown conclusive.

For example, the exports from the United States to Norway and to Sweden during the 4-year period of 1935 to 1938 ran a very close parallel in upward trends, year by year, These are adjacent countries. We had a trade treaty with one and not with the other. Yet, from an examination of our exports to them it would be impossible to say which was which. In the case of Argentina and Brazil, our exports to Argentina grew more rapidly than our exports to Brazil in 1937 and 1938. Yet, we had a trade treaty with Brazil and none with Argentina. These, also, are adjoining countries.

In the case of Colombia and Venezuela, two more adjacent countries, the result was the same. Our exports to Venezuela, a non-trade-treaty country, rose much more sharply than our exports to Colombia, with which country we did have a trade treaty.

We find also that our exports to Denmark increased sharply in 1938 while those to Holland increased only slightly in the same year. Our exports to France and Germany, adjacent countries, as in the case of Norway and Sweden, ran a very close parallel in trends from 1935 through 1938, year by year. Yet we had a trade treaty with France and none with Germany. A similar result was obtained in our exports to Finland, a trade-treaty country, on the one hand, and Estonia, Latvia, and Lithuania, non-trade-treaty and adjacent countries, on the other.

Imports, on their part, also failed to respond to trade treaties. Of seven countries with which we entered into trade treaties the trade, which could be compared with similar non-trade-treaty countries, only two countries increased their sales to the United States in a higher ratio than the non-trade-treaty countries, or are producers of similar products. Comparison was made as follows:

Sweden with Norway.
Brazil with Argentina.
Holland with Denmark.
France with Germany.
Canada with Mexico.
Colombia with Venezuela.
Cuba with the Philippine Islands. (Imports from these two trade-treaty countries increased more sharply than imports from Venezuela and the Philippines, respectively. In all of the other cases imports from the non-trade-treaty countries increased more than from the trade-treaty countries during the years the trade treaties were in effct, through 1938.)

Further light is thrown on the ineffectiveness of the trade-treaty program by an analysis of the trend in the exports from 1932 to 1935, and from 1935 through 1937.

By 1935, the first year in which any appreciable effects of the trade treaties could be expected to be felt, exports from the United States had already increased 41.6 percent in value, compared with 1932, the low point of our trade since the First World War.

Our exports during this period increased 53.8 percent. This latter increase took place when our average tariff on dutiable goods (ad valorem equivalent) amounted to 57.8

percent. A very interesting fact moreover, came to the fore. Imports of dutiable goods increased 89.5 percent while imports of goods on the free list increased only 36.1 percent, the average total increase of the combined being 57.8 percent as stated above.

HIGHER RATES—FREE LIST INCREASED IMPORTS

In 1936 10 trade treaties went into effect and 2 more became effective in 1937. Imports of dutiable goods should therefore, according to the theory, have responded more favorably. Total imports did increase by $586,000,000, but 65 percent of the increase came in goods on the free list.

In other words, after duties had been reduced, the increase in imports came principally in goods on the free list, whereas before the reductions had been made the increase in imports had come predominantly in dutiable goods.

By 1937 the average tariff on dutiable goods had dropped to 37.4 percent compared with 57.8 percent in 1932 (in part due to rising price levels). Clearly, the trend during these two periods was the exact reverse of what the theory of free trade would lead us to expect. In other words, while the duty burden was the highest, imports of goods on the free list should have shown the greatest increase, whereas, when the duty burden declined, imports of dutiable goods should have increased more than those on the free list. The opposite took place, as just shown.

The fact of the matter is that we regularly import (in normal years) an important list of products that are on the free list. Most important of these items are: Newsprint, pulpwood and wood pulp, coffee, rubber, bananas, fertilizer, jute, copper ore, tin, tea, raw silk, coco beans, palm oil, copra, tapioca, tung oil, and carpet wool. Free-list imports increased from $886,000,000 in 1932 to $1,765,000,000 in 1937, or almost exactly 100 percent. This was in keeping with our increased domestic business activity. The upshot is that a prosperous United States automatically becomes a better market for foreign exporters. It is, therefore, in the interest of other countries, so far as their trade with us is concerned, that this country maintain a strong purchasing power. It is our industries that are the heavy buyers of foreign products and our workers offer the principal market for the products of our industries. Depress our workers' wage income and the foreign exporters to this country destroy their own market.

Obviously, the trade-treaty program failed utterly on all important counts. It is time that those who advocate the extension of this unconstitutional authority whereby administrative agencies of the Government are enabled to enter into trade treaties involving the question of taxation eliminate potential assumptions and estimates and look at what has really happened.

Why the Congress and the American people should be asked to pump life into an undertaking so thoroughly discredited by a fair study of the real facts is hard to understand. For years an effort has been made to place a halo around the trade-treaty program so that anyone questioning their sanctity was somehow suspected of being unclean. Nothing but this sanctification can explain the tenacity with which they have clung to a program that by all valid tests is so complete a failure. Against this apparent impregnable dogma, facts seem to mean nothing.

We go before the world hanging our heads in shame for having built a prosperous country; for having achieved a standard of living attained in no other country; and for raising a partial protective barrier against the products of those with a lower standard of living prevailing in other countries. This is a strange attitude, indeed, not duplicated elsewhere in the world.

LABOR SEEKS EQUALITY OF OPPORTUNITY

American labor, the products of which compete in American markets with products of workers in other countries, seek equality of opportunity for the sale of the products of their labor in American markets. Does such a request call for high tariffs?

The proposal is now made to empower our negotiators to enter into trade treaties and to reduce our present tariff rates an additional 50 percent. Nothing is said about comparable costs of production at home and abroad. The principle that differences in cost of production should be equalized so that equal competitive conditions should prevail, is cast aside. The fact that we need an unusually high level of production and an equally high level of income to cope with the tremendous public debt, is lost sight of. The deflationary effect of ruinous foreign competition, arising from a tariff level of rates not high enough to compensate for the differences in costs of production, is definitely overlooked. The fact that by far the highest tax burden in history cannot be met unless a high rate of employment and wages are sustained and unless industry and agriculture are assured a market in the United States, is brushed aside. We are asked to continue our inconsistent program of adhering to minimum wages, social security, unemployment compensation, and similar props to our living standards and income levels on the one hand and, at the same time, open the door to their destruction. We are asked further to nullify the beneficial effects of our Fair Labor Standards Act, or Asiatic exclusion and our restrictive immigration policies.

This inconsistency comes from a misconceived idealism that proceeds on the assumption that our assets are inexhaustible and that our power to help others is unlimited and capable of standing endless economic contradiction. In part, it also comes from those who would be delighted to see our present economic system collapse beyond repair.

The alternative is not a destruction of our foreign trade. The history of our trade during the last 25 years bears out no such conclusion. A brief review will show quite the opposite.

During the last war the Underwood tariff of 1913 was in effect. This was superseded by the Emergency Tariff Act of 1921 and the Fordney-McCumber Tariff Act of 1922. These last two legislative enactments were adopted in an effort to pull our country out of the depression of 1921 and 1922. The average duty collected in 1921 was 29.5 percent (ad-valorem equivalent). The Fordney-McCumber Tariff Act increased the tariff rates to 38.1 percent (ad valorem equivalent).

HIGH TARIFF RATES—DUTIABLE IMPORTS INCREASED

Did our foreign trade decline, as it should have, according to certain economic theorists? No. Instead exports rose to 36.8 percent in the succeeding 6 or 7 years, while imports rose yet more, or 41.2 percent. These increases were not reflections of increased price levels, for it is well known that during that whole period the general price level was remarkably stable. The increase in imports took place even though in 1929 the average duty paid had risen to 40.1 percent. Why? We have already given the answer. Industry in the United States was prosperous and bought heavily in foreign markets. Wages were comparatively good and purchasing power was relatively high. The United States offered a good market for products from other countries. Tariff rates were, however, not so low that products of workers in foreign countries could drive the products of American workers out of our own markets.

In 1930 the Hawley-Smoot Tariff Act was enacted and by 1931 the average duty on dutiable goods had risen to 50.8 percent. In part due to the low level of prices and the increased ad valorem rates on those goods which are taxed on the basis of a specific duty.) In 1932, as a result of the still further drop in price levels the average duty rose to 57.8 percent.

Nevertheless, our trade began to increase after 1932 and by 1935 (at which time only a few trade treaties had been negotiated with countries which furnished only 8 percent of our imports) our exports had increased 41.6 percent in value and our imports 53.8 percent in value.

We have already seen that during the next few years, after 1935, the increase in imports shifted predominantly to items on the free list, precisely after we began reducing our tariff rates under the trade treaty program.

From a high average duty of 57.8 percent, in 1932, the average duty declined to an average of 37.4 percent in 1937. But, whereas trade increased, as already noted, after 1932, it declined sharply in 1938. Imports shrank a good one-third from the 1937 high. Exports also fell off. This was in keeping with the reduced business activity in this country in 1938, referred to, at the time, as the "recession."

Thus, the record of the last 25 years completely shatters the theory on which the theory of the trade treaties are based. We should not, however, reach the conclusion that tariff rates are of no importance. As soon as they become insufficient to cover the difference in costs of production between the domestic and foreign-made articles or commodities they begin to affect adversely the employment opportunities of America's workers. The gravity of the threat, therefore, depends on the margin of advantage offered to the foreign producers and the extent of his competitive potentials. It is for this reason that a yet further reduction in our tariff rates, a reduction in the rates already lowered, is a dangerous venture.

The sense of all the foregoing does not point to self-sufficiency as a national policy, although self-sufficiency, could it be had for the asking, by all nations, would exert a profound pacifying influence upon the world. As the natural resources of the various nations differ widely, some with actual output and reserves far beyond their needs, and, others with deficiencies in the same resources but with surpluses in others—with such a condition prevailing and likely to continue for many years, a natural and beneficial basis for trading will remain. However, we should rid ourselves of the view that competitive trade is a pacifying element in international relations. Actually it is the opposite.

There are those among the advocates of trade treaties who recognize the force and soundness of what has been said above. They recognize the complete absurdity of enacting and enforcing minimum wage legislation and restrictive immigration legislation on the one hand, and, then on the other, to the opening of our industries and our jobs to the competiton of low-wage produced products of foreign countries.

SUBSIDIES MEANS SUBSERVIENCY

As a means of overcoming the disastrous consequences that they foresee, they advocate a subsidy to the industries, injured or jeopardized by the entry of the competitive products of workers in foreign countries at delivered costs which are less than our costs of production. However, it will be noted that they have prepared no legislation to provide such a subsidy nor have they shown how the subsidy could be determined and distributed. They have also failed to point out that the grant of subsidies would bring

with it, as a necessary instrument of administration, a measure of Government control. Our experience with the O. P. A., as a necessary war measure, has not whetter the appetite of the American people for governmental controls over the details of foreign trade and domestic production. We conclude that the subsidy proposed is not advanced seriously, but, rather as a sleeping pill to lull the opposition to the pending legislation.

It is true, as legislative history will show, that a 100-percent subsidy, tariff protection in reality, has been found necessary to sustain an essential American industry, namely, the American commercial shipbuilding industry. The Maritime Commission, in order to build up a merchant marine, allows a construction differential of 50 percent of the American cost of building merchant ships. In other words, it is the official finding of the Maritime Commission, that there is a difference of 100 percent in the cost of building such ships. Thus, we have a precedent set that a duty of 100 percent—100 percent of the foreign costs of building ships—are necessary to permit of our continuation of a merchant-marine industry, to equalize the difference in costs of production, American shipyards as compared with foreign yards.

This is only one industry. For the economic welfare of our country, in peacetime, there are numerous essential industries. A subsidy of this level is much greater than the present ad valorem equivalent of those rates levied on dutiable imports. Moreover, the subsidy would not be paid out as wages. It would go to the employers, who, because of the foreign goods admitted into competition in the American market, could not guarantee the maintenance of employment at necessary levels.

We feel that the tariff is the simplest method of protecting the job opportunities of our workers, and, therefore, the high level of employment that is conceded to be indispensable if we are to meet our tax burden and our public debt.

We have consistently opposed the delegation of the taxing power of the Congress to administrative agencies as an unconstitutional shift of responsibility. Such a shift of responsibility may well be the forerunner of the making of our general tax laws by the administrative agencies of government.

We are particularly opposed to the further extension of this legislation, and, especially the authorization of further reductions in tariff rates. We find nothing in the American standard of living to apologize for to the rest of the world. On the contrary, we recommend that other countries follow our lead in establishing higher wages and shorter hours for their workers. We also point out that it is to the interest of foreign countries and not to their detriment that the prosperity of the United States be sustained rather than torn down.

A prosperous United States, with tariff rates which will equalize the difference in costs of production affords a better market for foreign goods than a depressed United States with tariff rates which permit the entry of competitive goods at less than our costs of production.

Ship Construction

EXTENSION OF REMARKS

OF

HON. SCHUYLER OTIS BLAND

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. BLAND. Mr. Speaker, under leave to extend my remarks in the Appendix of the CONGRESSIONAL RECORD, I include therein a letter on the subject of ship construction from Admiral Vickery, and a summary from the Maritime Commission showing tonnage deliveries under the Maritime Commission's program up to May 1, 1945:

UNITED STATES MARITIME COMMISSION,
Washington, D. C. May 4, 1945.

The Honorable S. O. BLAND,
Chairman, Committee on the Merchant Marine and Fisheries,
House of Representatives.

DEAR JUDGE BLAND: There is enclosed a tabulation which I believe will be of interest to you, showing monthly tonnage deliveries under the Maritime Commission's program up to May 1, 1945.

During the month of April, United States merchant shipyards delivered 103 ships of 1,004,073 tons deadweight. The ships delivered into service between Pearl Harbor and the end of last month totaled 4,802, with an aggregate tonnage of approximately 48,600,000, not counting harbor tugs, wooden vessels and other miscellaneous craft.

As you know, several months ago the Commission awarded contracts for a program of some 226 ships, including 60 tankers, to meet anticipated military requirements as determined by the Joint Chiefs of Staff and the Director of War Mobilization and Reconversion. Pursuant to the subsequent direction of the latter, the Commission on April 20, 1945, canceled 30 of the 60 tankers. Five of the tankers canceled, however, probably would not have been completed until 1946, with the result that the over-all 1945 merchant shipbuilding program of some 12,000,000 tons has been reduced about 3½ percent.

With kindest regards, I am,

Sincerely yours,

H. L. VICKERY,
Commissioner.

Only Way to Insure Peace

EXTENSION OF REMARKS

OF

HON. ED GOSSETT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. GOSSETT. Mr. Speaker, the News and Observer, Raleigh, N. C., on last Saturday, May 5, carried an excellent editorial strongly supporting the Sumners resolution for the abolition of the two-thirds rule. In my opinion this House could not take a more important step toward world peace than to initiate this most badly needed reform in our Constitution.

I commend the following editorial to the careful attention of all Members:

ONLY WAY TO INSURE PEACE

On next Tuesday the House of Representatives will resume consideration of the proposal to put an end to the provision in the Constitution by which the vote of two-thirds of the Senate is required to ratify a treaty. It is proposed in a resolution approved by the Judiciary Committee that in the future treaties should be ratified by the majority vote of both Houses of Congress. Long hearings were held last fall and the testimony was overwhelmingly in favor of the change.

As it takes the vote of both Houses to declare war, a like procedure should be utilized to garner the peace. The power of one-third of the Senators was the dagger that denied peace after World War No. 1 and is in part responsible for the death and destruction in World War No. 2. If the United States had taken its seat at Geneva, the League would have functioned to undergird the world peace which the men in arms won in 1917–18, and if there had been no veto power in one-third of the Senate, the United States could and would have led in such measures and adjustments as would have prevented the present holocaust, now happily coming to an end, which has cost so much in blood and treasure.

North Carolina is proud to have been first in guaranteeing the incorporation of the Bill of Rights in the Federal Constitution and in other democratic advances. This was the first State to declare for the change from minority rule to majority rule in preserving good foreign relations by calling for an end of the undemocratic and archaic two-thirds requirement of the Senate for the ratification of treaties. At the State Democratic convention held in May 1944 the following declaration was unanimously adopted and made an integral part of the platform:

"The provision in the Federal Constitution requiring a two-thirds majority of the Senators present for the ratification of treaties has enabled a minority of the Senators to thwart the will of a great majority of their colleagues, to disregard the considered opinion of the American people, and to defeat the best interests of the United States.

"We strongly approve and urge an amendment to the Federal Constitution that will make the process of ratification more democratic in its nature."

At the recent session of the general assembly that body passed the following resolution:

"Whereas the Constitution of the United States provides that the President shall have power, by and with the advice of the Senate, to make treaties, provided two-thirds of the Senators present concur; and

"Whereas this constitutional provision disqualifies the more representative House of Representatives from any participation in treaty making and has led in the past to obstruction by determined minorities in the Senate; and

"Whereas it is of the utmost importance that the National Government shall be able to effectuate any international agreement

upon which the President and a majority of the Senators and a majority of the Representatives agree: Now, therefore, be it

"Resolved by the senate (the house of representatives concurring):

"SECTION 1. That the General Assembly of North Carolina respectfully requests the Congress of the United States to propose, either to the legislatures of the several States or to conventions in the several States, an amendment to the Constitution of the United States reading substantially as follows:

"'The President shall have the power, by and with the advice and consent of Congress, to make treaties, provided a majority of the Members of the Senate and the House of Representatives shall consent thereto.'

"SEC. 2. That a duly certified copy of this resolution be sent by the secretary of state to the President of the United States, to the President of the United States Senate, to the Speaker of the House of Representatives, and one copy of the same sent to each of the North Carolina Senators and Members of the House of Representatives.

"SEC. 3. That this resolution shall be in full force and effect from and after its ratification."

It was introduced by Senator Brandon P. Hodges, of Buncombe, representing the same county formerly represented by Representative ZEBULON VANCE WEAVER, long a leader in the National House of Representatives. In Washington Mr. WEAVER'S high position on the Judiciary Committee gives him influence and the respect of his fellow Members, and he presided over some of the hearings on the abolition of the two-thirds rule. There seems the eternal fitness of things that Buncombe County, the home of the illustrious Vance, should take the lead in this long-needed reform. The resolution in the Democratic State convention was drawn by the chairman of the resolutions committe, D. Hiden Ramsey, of Asheville, editor of the Asheville Citizen, who presented it to the Democratic State Convention. The resolution in favor of the amendment to the Constitution was introduced and advocated in the general assembly by Senator Brandon Hodges, of Buncombe, and one of its ablest champions in Congress is Representative ZEBULON VANCE WEAVER, of Buncombe County.

North Carolina, true to its devotion to majority rule, is committed to this change which is the only way to guarantee peace and wise foreign relations, and it is gratifying that it was the first State to instruct its Senators and Representatives in Congress to lead in carrying out the mandate of the people.

International Office for Education

EXTENSION OF REMARKS

OF

HON. JAMES W. WADSWORTH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. WADSWORTH. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement by Mr. Owen D. Young, published in the bulletin of the International Office for Education:

Now that modern communications and transport have compressed the world into one neighborhood, it becomes important in connection with the peace to establish an International Office for Education. At the root of international concord is clear understanding between the peoples of the different nations. Nothing will contribute more to that than knowledge of the way in which the different peoples are educated.

I, therefore, endorse heartily the proposal for an International Office for Education not only because it will provide a clearing house for the interchange of educational procedures and techniques, but because it will be an expression of confidence in the constructive spirit of the postwar world.

Woodrow Wilson's Spirit

EXTENSION OF REMARKS

OF

HON. THAD F. WASIELEWSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. WASIELEWSKI. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following editorial from the New York Times of May 6, 1945:

WOODROW WILSON'S SPIRIT

There has been little public allusion to Woodrow Wilson in the first sessions of the United Nations Conference at San Francisco. Our first of World-War Presidents was not formally mentioned until, on April 29, Jan Massaryk, foreign minister of Czechoslovakia, paid tribute to him. Later, Prime Minister Smuts, who helped Wilson frame the Covenant of the League of Nations, reminded the delegates of the debt which they and the free world owe to the memory of that greatest of peace pioneers of a quarter century ago.

But doubt not that the spirit of that man who died for his dream of a warless world was present at the Conference, and will be till the end, speaking to the minds and the hearts of all there assembled, counseling each in his own language, voicing the yearning of all mankind in all lands for a world set free from an ancient and dreadful curse.

Woodrow Wilson, the man, is gone from the scene. But not the vision that sent him across the sea to Versailles and led him afterward on a futile crusade among his own people. That vision lives on. It inspired another of our war Presidents to take up the cause from the fallen leader's hand and advance it farther, till he, in his turn, fell. And it inspired the Conference at the Golden Gate today. Wilson, and Roosevelt beside him, are profound realities at that meeting.

And a great host of Woodrow Wilson's Americans are there in their thoughts and hopes. They followed him gladly in his time. They saw his dream shattered, his plan rejected by his countrymen, yet they believed. They are not a minority now, for world events have shown, far more vividly than 25 years ago, the ghastly danger ahead for civilization. These Americans are there in spirit, a cloud of witnesses. They gather not to exult in the possible triumph, long delayed, of a world-saving idea, but to pray that this time, before it is too late, the idea may take form and become the foundation of a decent and orderly world—a world where never again the human right to liberty and happiness may be challenged.

They are not alone, these Americans. In their prayer they are joined by millions of people of every kindred, every tribe on this troubled planet.

Polish Constitution Day

EXTENSION OF REMARKS

OF

HON. THOMAS D'ALESANDRO, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. D'ALESANDRO. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address of Jan Ciechanowski, Polish Ambassador to the United States, at the commemoration of the One hundred and fifty-fourth anniversary of the adoption of the Polish Constitution, under the auspices of the United American and Polish Societies in Baltimore, Md., Sunday, May 6, 1945:

No American commemoration of an event in Polish history has a symbolic meaning as deep as that of Poland's Constitution Day. By commemorating the founding of the liberal Polish Constitution, unanimously introduced by the Polish Nation on May 3, 1791, the great-hearted American people show their deep understanding of the real fundamental closeness existing between our two nations. In the latter part of the eighteenth century the civilized nations of both hemispheres founded their constitutions upon what was then considered the novel trend of liberalism and what later led to the modern conception of democracy.

This has forged a special link between them.

The yearly manifestations of the American people all over this great United States on Poland's Constitution Day, the numerous speeches in the United States Congress, the press comments and, last but not least, such splendid celebrations as the one we are privileged to attend today are the living proofs of the intensity, the sincerity, and the depth of American-Polish friendship, founded upon a community of ideals and aims.

This year's anniversary of the Polish Constitution takes on an exceptional meaning, for, after many years of bitter fighting and of the greatest sacrifices, the victory of the United Nations over the forces of German totalitarian imperialism has been finally achieved. The defeat of Hitler's Japanese ally can be regarded as not-too-distant foregone conclusion.

Hence, the time has come for all freedom-loving nations in both hemispheres to start readjusting their thoughts, so tensely concentrated on war problems and war requirements, to the great task of winning a peace which will open a new era of freedom, justice, and democracy, a peace worthy of the sacrifices of the millions of lives of our best men and women, worthy of the toil and suffering of innocent peoples and, above all, worthy of our Christian civilization; a peace which will unite the world by inspiring all human beings with mutual confidence, with faith in principles of morality, justice, and decency, and will reassure them that henceforth laws and treaties will be respected and security will become a reality.

In this unprecedented total war Poland was the first actively to resist German invasion. Though defeated in the initial campaign by Hitler's overwhelming forces, supported by a Soviet invasion of Poland in September 1939, the Polish Nation remained unconquered. Poland never ceased actively to fight throughout this war by means of her underground home army in Poland and the Polish Army, Navy, and Air Force abroad. These forces have fought valiantly, shoulder to shoulder with Poland's allies. They fought in France, in Norway, in the Battle of Britain,

in north Africa, in Italy, in Normandy, in Belgium, in Holland, inside Germany as well as on sea and in the air.

When Hitler attacked Soviet Russia in June 1941, the Polish underground, acting on orders of the Polish Government in London, gave its fullest active support to the Russian forces by means of increased guerilla warfare, sabotage of German communications and transports, and later, when the Russian offensive through Poland started in 1944, the regular underground army of Poland came out into the open and greatly helped the Russian forces in their advance on the entire territory of Poland.

Throughout this war, Poland, alone among the European countries overrun by Germany, never produced a Quisling.

Poland's war record is clear and blameless.

I am not enumerating these facts in order to blow Poland's trumpet. In acting as she did, Poland fulfilled her duty to her own people and to the common cause of freedom which she had always defended in the past. I mention these facts because, unfortunately, it appears to be necessary to restate them in view of the spread of a propaganda campaign hostile to Poland which attempts to vilify the Polish Nation and its legal Government by so grossly misrepresenting facts and issues, that the true picture of prewar Poland, of her war effort, and of her conduct in this war is being deliberately distorted and falsified.

The Polish Nation is too sincerely attached to its traditions to allow such misrepresentation of its character and aims to go unchallenged. The Polish Government and people have been exceptionally patient and long suffering, being sincerely desirious of preserving allied unity, so essential in war time. However, at this crucial moment, when allied unity should be reaffirmed in relation to the constructive principles of justice, which alone can become the sound basis of collaboration in a world-security organization, it is urgent to rectify misconceptions endangering the establishment of a just and durable peace.

Contrary to allegations of hostile propaganda, Poland is not a feudal oligarchy where opulent and arrogant aristocrats subjected and exploited the poor. Nor is she a country of great landed estates and of miserably small peasant holdings. This is proved by official comparative international statistics on agricultural holdings in various countries.

In Poland 76.3 percent of the total area of farm land was broken up into farms of less than 100 acres. Only 23.7 percent constituted farming estates of 100 acres and upward, while in England large farming estates over 100 acres represent 50.9 percent of the total farm land, in Czechoslovakia 43.4 percent, and in France 29.2 percent.

Social legislation in Poland, the care of working women and child welfare were considerably more advanced than in France or England. They comprised compulsory social insurance, paid vacations, medical assistance, and old-age pensions. This labor legislation and educational facilities extended not only to industrial labor, but to farm labor and domestic servants as well, and was efficiently applied.

It is therefore a gross injustice to attempt to misrepresent Poland as a socially backward country.

Since the restoration of Poland's independence after the First World War, Polish Governments have never been composed of large landowners and aristocrats. The land reform was quite effectively carried out and was increasing the number of small holdings at the cost of the larger estates. Nor were the so-called wealthy classes really rich in the American sense of the word. Our country, unfortunately situated in a most precarious geographical position between two mighty empires which had thrice partitioned it, was forced to maintain a considerable military establishment for its defense. This cost the nation 43 percent of its budget and weighed heavily on the Polish taxpayer.

And yet, after regaining our independence, in the short 20 years during which it lasted, Poland had become a semiprosperous country, hard working and almost self-supporting, increasing its industrialization, the number of its schools, developing its road and railway systems, its air transport, and gradually reoccupying its place among the civilized nations of Europe, after having been partitioned under foreign domination for one and a quarter century.

All the hard work of rehabilitation accomplished after the First World War in that short time of independence has now been ruthlessly destroyed by German invasion, war, looting, and wanton destruction. No nation has suffered such oppression, humiliation, persecution, and methodical extermination. Our population of 35,000,000 people has lost in this war about eight and one-half million people—in fact, nearly one-fourth of its total. And yet the spirit of the nation remains undaunted, its national consciousness and patriotism have survived. It has never sought to alleviate its sufferings by any compromise with German totalitarianism which for over 5 years has done its utmost to enslave and destroy it.

And now, after what that nation has gone through, after all its sacrifices in its effort to do its part for the common cause of humanity and to preserve its soul, the restoration of Poland's independence appears once again to be placed in doubt. And because it would be impossible, after this unprecedented war fought by the United Nations against totalitarian oppression and enslavement, to justify the denial of freedom and independence to the Poles—a campaign of villification has been launched in an attempt to prove what can never be proved, namely, that the Polish people, who so relentlessly fought fascism, are themselves Fascists; that Poland, who never ceased to fight the Germans, is pro-German, undemocratic, and disloyal, although her outstanding Allied loyalty is unquestionable.

One of the methods of this propaganda campaign consists in spreading the impression that there is no Polish-Soviet problem, but that internal differences and political strife between rival Polish factions stand in the way of an understanding. This is untrue, intentionally misleading, and obviously calculated to turn the attention of public opinion from the complex problems now existing between Soviet Russia and Poland. These Soviet-Polish issues call for direct contact and frank discussions between the Polish and the Soviet Governments in an atmosphere of peace and mutual good will. Hitherto the Polish Government has met with no encouragement on the part of Poland's eastern neighbor in its endeavors to discuss these matters directly.

Poland's constitutional Government is accused of being unfriendly to Russia. That is entirely untrue. Although Russia stabbed Poland in the back on that fateful 17th of September 1939, when Poland was fighting the German aggressor on her territory, and partitioned Poland with Germany for the fourth time in history—as soon as Hitler had double-crossed Russia and attacked her in June 1941, the Polish Government resumed diplomatic relations with her eastern neighbor and pledged itself actively to support the Russian war effort against the common enemy.

It is noteworthy that in 1941, when it took Germany only a few days to drive Russia out of eastern Poland, the Soviets did not accuse the Polish Government, with whom they concluded an agreement on July 30, 1941, of being unrepresentative of Poland or unfriendly to the Soviet Union. On December 4, 1941, the Polish-Soviet agreement was further strengthened during the Moscow visit paid by the Polish Prime Minister, General Sikorski, to Marshal Stalin, which resulted in a declaration of friendship and mutual assistance between the two countries signed by General Sikorski and Marshal Stalin in person. During this visit details for the formation of a Polish Army to be recruited from Poles deported to Russia during the Soviet invasion of Poland, were agreed upon between the two statesmen. Later the Soviet Government accused Poland of having withdrawn this army when Russia needed it most. The truth is that Marshal Stalin decreed that this army was to leave Russia, saying that he could neither feed nor equip it. This army was later trained and equipped in the Middle East with the aid of Poland's ally Britain and, under General Anders, it has proved most useful in the Allied campaign in Italy.

Nor is it true that the Polish Government became unfriendly to Russia after the death of General Sikorski. His successor, the prominent Polish Peasant Party leader, Premier Mikolajczyk, made every effort and undertook two journeys to Moscow to work out an understanding and to conclude a treaty with Soviet Russia. His efforts failed because he was asked to sign away 43 percent of Poland's territory before any agreement could be discussed, and other conditions incompatible with Poland's independence and sovereignty were placed regarding the composition of a Polish Government.

Nor is the present Polish Government presided by his successor, Mr. Arciszewski, the venerable leader of the Polish Socialist Party, unfriendly to Russia. Mr. Arciszewski did not spend his time in this war outside Poland. For 5 years he was one of the most active leaders of the Polish underground state inside Poland and one of the party chiefs in the Polish underground parliament. He risked his life daily alongside of the other underground fighters and was finally brought out of German-occupied Poland at the special request of the President of the Polish Republic to take part in the Polish Government. During his work in the underground he was one of those leaders who carried out the determination of the Polish people to fight the Germans and to help Russia. Even now, regardless of rebuffs and villification, of being called a Fascist and reactionary, this venerable Socialist Party leader has repeatedly issued statements on behalf of the Polish Government expressing his readiness to open direct negotiations with the Soviet Government and has declared that the Polish Government will accept any one of the methods foreseen by international law for the just and fair solution of the controversy with the participation of both parties concerned.

How then should one interpret the term "friendly government": A Soviet-sponsored committee formed in Moscow, without consultation with the people of Poland and in which former Comintern agents, some of whom were until recently Soviet citizens, occupy the key positions, has been imposed upon the Polish Nation and recognized by Soviet Russia as the provisional Polish Government. Are we to conclude that a friendly government of an independent Poland must be constituted in Moscow and mainly composed of Communists? In what way is such a government representative of the Polish people, as deeply attached to their constitutional rights of choosing their own governments as any other democracy? How can such a government be representative of a people, among whom communism constitutes at most 1½ to 2 percent of the population? How is this method of creating governments compatible with the repeatedly declared formula of Marshal Stalin that he is determined that Poland shall be strong and independent?

As regards the accusation that the legal Polish Government in London is unrepresentative of the Polish people—the following irrefutable facts suffice to disprove this accusation.

From the very outset and up to this day the Polish nation has never questioned the constitutional legality or the authority of that government. No rival government has been formed in Poland by the Polish people. On the contrary, the Polish underground state organized in the closest understanding with the Polish Government, has always followed all its directives. The Polish Army, Navy, and air force abroad, as well as the Polish home army of underground Poland, have fought under its direct command.

Most recently 12 representatives of the Polish political parties in Poland and 4 ministers of the legal Polish Government, resident there, in understanding with the Polish Government undertook to enter into direct negotiations with the Soviet authorities. These 16 Polish leaders who throughout this war have headed Poland's underground state in its active resistance to the German aggressor, established contact with the Soviet high command in the latter part of March. They were promised their personal safety by the Soviet authorities and facilities for going to London in order to consult with their government prior to further negotiations in view of concluding an agreement. Notwithstanding these promises, the intrepid leaders of Polish democracy disappeared and the Soviet government refused to give any explanation regarding their fate.

The press has just carried the news that the Soviet government has now informed the British and American Governments that these delegates have been arrested by the Soviet authorities under the ludicrous accusation that they were responsible for a plot which allegedly resulted in the death of "more than a 100 Red Army officer and enlisted men."

I must leave it to the sound good sense of American public opinion to form its own judgment regarding this violation of international law and procedure in the case of a delegation of leading officials and political representatives who have in good faith sought to open negotiations on behalf of Poland in the sincere hope of reaching an understanding with Soviet Russia.

Reliable information from Poland conclusively proves that a rapid process of political, economic, and social communization is being carried out in Poland against the will of the people. Contrary to democratic practice, legal chaos and irresponsible economic experiments are being arbitrarily introduced. The heroic fighters of the Polish Home Army, the same who did their utmost at the cost of untold sacrifices to help the Russian forces in their fight against the common German enemy, are being arrested, deported, and executed. They are accused of being traitors and, most ironically, of being German collaborationists and fascists.

These are the grim facts of Poland's "liberation" from Nazi tyranny. There is no enmity in Poland against the Russian nation. But the Polish people are determined to regain their freedom and to remain free. They are determined to regain real independence, which they consider to be their birthright as it is that of other less precariously situated nations.

Throughout its history the Polish people have always fought for freedom. They will never give up that fight.

The Allied countries liberated by the British and American forces are being turned over to their legal governments as soon as this is feasible. Most of these governments have by now been reinstalled and reconstructed. A different pattern is followed in the countries now liberated from German occupation by Soviet Russia. In the case of Poland, not only is the legal government prevented from returning to that country and placing itself at the disposal of the Polish people, who alone have the right to decide what government they want to have, but Poland has been entirely barred from any free contact with the outside world, and neither Britain nor the United States have as yet been able to send any military missions or observers of any kind to Poland.

The Polish Nation is deprived of the means of free expression. Freedom of speech, freedom of the press have been abolished. For 8 months now the United Nations Relief and Rehabilitation Administration has been unsuccessful in obtaining the necessary visas from Soviet Russia for its mission to proceed on its samaritan work to Poland.

In these circumstances, it is permissible to have serious apprehensions regarding the situation inside Poland under Soviet occupation.

Painful as it is to have to state these facts at this time when our common victory over Nazi tyranny and the rule of right over might has finally been achieved—it is necessary to do so, not with any intention of disrupting Allied unity or of endangering the all-important task of establishing security and peace. On the contrary, it is necessary to realize the existence of such situations and to face them boldly while there may still be a chance of using persuasion to rectify them with a view of creating an atmosphere of harmony necessary for the successful work of establishing a secure peace.

Victory has been achieved by united force. In war, power is the dominant factor. However, power alone cannot be the foundation of peace. Without justice, no peace can endure. And a just peace is what the world is yearning for and has a right to expect.

In a civilized world, all nations must be equal before the law and juridically equal amongst themselves, regardless of size, importance, or power.

The inequality which exists between the big and small powers should not be measured in terms of power supremacy, but only in terms of power responsibility. The big powers cannot escape responsibility for the maintenance and the defense of a just peace settlement, even by force, if the necessity should arise.

However, to be just and durable, a security system should be operated on the firm basis of the collaboration of all nations concerned, the big and the small, as their joint responsibility, in direct proportion to their respective possibilities.

Wartime thinking tends temporarily to relegate to secondary importance fundamental principles, moral and cultural forces, and spiritual ideals, so indispensable to the establishment of a just and durable peace.

In erecting the structure of a peace settlement on a world scale it is indispensable boldly to turn our minds to the principles and human ideals without which mankind, profoundly disturbed by war, cannot be restored to normal ways of thinking and democratic living. How can one establish unity in a world if one hemisphere is to enjoy the rule of justice and individual freedom, while the other is to be partly free and partly oppressed and enslaved?

Much is being said at present about realism as opposed to idealism. We are frequently told not to attempt to strive after perfectionism. Recently we have even been told that one cannot sacrifice agreement to ideals.

The gallant soldiers who fought and fell for these ideals which alone are considered by true democrats as worthy of a fighting total war in the twentieth century of our enlightened civilization, would not accept such cynical slogans. Have these heroic fighters sacrificed their lives in the cause of freedom and the ideals of justice to allow the world they have saved, once more to revert to the tyrannical power-political concepts of the Congress of Vienna, or rather to help establish in the post-war world the noble principles of the Atlantic Charter, which inspired them to fight?

It is time that the statesmen who were wise enough and bold enough to lead the freedom-loving nations to victory, should realize that no just and honorable system of security can be established by the United Nations on any compromise with democratic principles. It is time to admit that peace can never be based on appeasement and that one can never appease justice. In a modern world there can be no realism which does not take the human element and its rights into account. Hence, there can be no settlement which disregards the self-determination of peoples. There cannot be durable peace based on injustice. There can be no justice if nations are not treated as equal before the law. There can never be real peace if power-political concepts, allowing some powers to extend their domination over others are permitted.

To establish an indivisible peace in a united and indivisible world it is both indispensable and logical to apply the same civilized norms of justice to international relations in both hemispheres.

All freedom-loving nations yearn for American leadership in establishing a just world peace. This mighty democracy has preserved and maintained the principles of true democratic ways of living. It is both powerful and disinterested. It has learned by experience gained in two World Wars that in modern times its own security in indissolubly bound to that of all other nations. It has grown to a unique position as a world peace. Its responsibility has grown in direct proportion.

The greatest opportunity in human history is now given by Providence to the American people: The unique chance of using their powerful influence to restore security, just peace and happiness to suffering humanity.

God bless America and help her in this her greatest mission.

Oregon Participates in the International Conference

EXTENSION OF REMARKS

OF

HON. HOMER D. ANGELL

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. ANGELL. Mr. Speaker, we are all deeply interested in the work of the San Francisco Conference now in session. Now that Germany has surrendered and V-day is actually with us on the European front, we are all deeply concerned and praying that an international organization may be effected at the San Francisco Conference in which the nations of the world will join together in an organization that will make another world catastrophe of global war impossible and will insure a just and lasting peace so far as it is humanly possible.

Many of us from Oregon are glad to note that a number of citizens from our State are taking an active part in the conference at San Francisco. I include as a part of these remarks a recent news release giving the names and the duties of these Oregon citizens:

SAN FRANCISCO, CALIF., May 1.—Seven natives of Oregon are participating in the historic San Francisco Conference for International Organization, which got under way in this city last week.

These Oregonians are attached both to the International Secretariat, which manages the entire Conference, and to the delegation that is representing the United States.

C. Easton Rothwell, of Portland, former professor at Reed College, is executive secretary of the International Secretariat, and one of the assistants to Alger Hiss, secretary general of the Conference.

John Halderman, of Astoria, is one of the legal advisers to the American delegation.

Carlton Savage, of Salem, is special assistant to Edward R. Stettinius, Jr., chairman of the American delegation and United States Secretary of State. Savage, who works closely with the congressional members of the delegation, is a cousin of the late Senator Charles L. McNary.

Harley Notter, of Eugene, is an adviser to the American delegation.

George Verne Blue, of Ashland, is correspondence officer of the American delegation.

Mrs. Virginia Hartley, the former Virginia Fox, of Portland, is executive secretary of the American delegation and in charge of the delegation's operating arrangements.

Capt. Richard L. Neuberger, of Portland, who formerly served with the Army engineers in Alaska, is an aide on the staff of Secretary of State Stettinius, chairman of the American delegation.

The bulk of the Oregon people assigned to the Conference are regular members of the State Department staff. They arrived in San Francisco last week and are expected to be here for the duration of the Conference.

Wage Increases for Postal and Federal Government Employees

EXTENSION OF REMARKS

OF

HON. WILLIAM A. PITTENGER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. PITTENGER. Mr. Speaker, we have had a great many interesting developments which directly affect people who are in the employment of the United States Government. One of these situation is called the increased cost of living. Of course, prices should have been frozen when wages were frozen, but the politicians in charge of these matters did not do that and we do have an increased cost in living.

Then the tax increases came along and Federal employees who have not had an increase in pay have been confronted with the withholding tax which, of course, reduces the cash income.

These conditions, together with other factors, have been well known to the different administration leaders, and they are the ones who shape our legislative programs. They have been too busy, however, to do anything about the situation.

Of course, there are some lopsided individuals who have a partial paralysis over their thinking apparatus but still have a tremendous amount of energy left. They devote all of their time "doing good for others." They are what is known as do-gooders. They just simply want to do good all the time, provided the money can be spent in foreign countries. They overlook all domestic problems, the wholly inadequate small relief payments made to aged and destitute citizens, and numberless other domestic problems. Yet, they are the ones who are consulted when money is to be spent and they always see to it that it is spent in foreign countries.

WAGE INCREASES FOR POSTAL WORKERS

These good folks have entirely overlooked the employees in the United States Post Office Department. Some of these employees have not had an increase in basic pay rates in more than 19 years. They have always been loyal, have done their work in a competent manner, and no other group of people have more friends among the American people. In the Seventy-eighth Congress we joined with others in efforts to increase the amount of their pay, and you all know the legislation was defeated by parliamentary subterfuge. It is time that the administration quit fooling these folks. I have just received a letter which expresses in a fine way the fairness of the request of our postal workers, and I quote from a portion of the letter:

I wish to petition your continued active support for the bill to reclassify the salaries of postal employees.

To know that these men have been working overtime at a lower rate of pay than that which they receive for regular time was hard for me to believe, especially when private industry is ordered to do so by the same powers that be. To me that is as preposterous as some of the other things we have had to put up with.

You certainly will help to right a great wrong and injustice to these men if you actively support and vote for this legislation.

I expect to continue my support for legislation which will be of benefit to employees of the Post Office Department. It is, I believe, the only Government agency that brings in an enormous revenue to the Government. The efficiency and high standards of service of the Post Office Department are a real tribute to the loyal employees in this branch of service, and they deserve support for this legislation.

WAGE INCREASE FOR FEDERAL GOVERNMENT EMPLOYEES

Legislation is also pending for the benefit of Federal Government employees. This will take into account the fact that there has been an increased cost in living and that there has been a large increase in the amount of taxes which people have to pay. These other Federal Government employees are entitled to the pay-increase proposals contained in pending legislation. This group of employees is sometimes referred to as white-collar workers. Large numbers of them entered Federal service when the Government appealed for workers in connection with various Government bureaus and departments having to do with our war effort. Everything I have said about problems of the postal workers apply to the difficulties faced by these Federal Government employees.

I have talked to a large number of these people, and I am familiar with the way they are situated. They ought to have relief.

The following is a quotation from a letter which I received sometime ago and is directly in point:

DEAR MR. PITTENGER: The following figures are an example of a Federal employee's income in the lower salary bracket during 1944.

This girl receives base pay of $1,440 per year with overtime of $302, total $1,742. From this amount there is deducted $72 for retirement, $245 for taxes, and 10 percent for War bonds, $174. The total deductions, $491, reduces her cash income to roughly $105 per month. Since the dollar of today is valued at but 65 cents in comparison to the dollar earned in 1940, we find that this girl has actually less than $70 per month as of 1940.

In a situation of this kind she has but one recourse, and after office hours we find her in restaurants, drug stores, and shops trying to earn enough that she may live decently. She is the girl that is expected to report at her Government job well dressed, well groomed, and well rested.

It is more than 20 years since there has been an increase in the base pay of such employees. Congress should immediately legislate to fairly compensate an employee of the Government, and the foundation of salary increase should be in base pay.

Yours very truly,

_____.

I am calling attention at this time to these problems because this legislation is long past due. It should have been enacted a long time ago. If administration leaders will give us an opportunity to act on this legislation, I shall support it and work for its enactment.

"No Special Favors"—Truman

EXTENSION OF REMARKS

OF

HON. THAD F. WASIELEWSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. WASIELEWSKI. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following editorial from the Milwaukee Journal of May 4, 1945:

"NO SPECIAL FAVORS"—TRUMAN

President Truman did a national service in vetoing the bill to give outright exemption to farm workers. And it is reassuring that there were enough Congressmen who understood this service to sustain him.

In the interests of a nation still at war, the President said what needed to be said. He reminded Congress of its own declared policy that no groups should be placed in a favored position by the selective-service law; that deferments should be on the basis of the merits of each individual case. He referred pointedly to draft deferment scandals of the last war, "particularly in the shipyards." There have been abuses in this war, too.

It couldn't be denied that there also have been some gross inequities in the administration of the draft law. At one time it appeared that the patriotic willingness with which farm boys were enlisting, and the eagerness with which they were transferring to higher paid war jobs in the city, might spell disastrous reduction in food supplies. That was the basis for the Tydings amendment and there was some reason for action then. But what was done was abused.

There may still be some need for the protection of farm workers but Congress, by no means overlooking the opportunity to appear

in the role of champion of the farmers, prescribed a cure that was worse than the disease. This special draft exemption for agricultural employment would have, in the words of the President, singled out farm work as "more important than industrial occupation or military service. It would have been an injustice to millions already inducted * * * and those yet to be inducted."

It would certainly have put every farmer or farm worker of draft age under a cloud of suspicion that he was dodging military service under this rigid exemption.

Farmers and farm workers engaged in vitally important food production deserve every possible consideration. But the Nation should know, and the individual should know, that he is being deferred, as any other American is deferred, because his draft board is convinced that he is contributing more in his present occupation than he could in the armed services. There is the means now to defer him if he is essential.

President Truman laid down a great principle when he said that no American should be placed "in a favored position." Special favors—that has been the curse of this country.

Repeal of Land-Grant Transportation Rates

EXTENSION OF REMARKS

OF

HON. JOHN J. COCHRAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. COCHRAN. Mr. Speaker, if the bill the House passed last week discontinuing the land-grant rates for transportation of Government traffic, which means freight as well as personnel, becomes a law the taxpayers of this country will be required to pay the land-grant railroads of the United States something around $400,000,000 a year. This at a time when the railroads are making more money than at any period in their history and at a time the Government is increasing the national debt daily. Several years ago I assisted in defeating such a bill. In the last Congress, while we failed to defeat a similar bill, fortunately it died in the Senate.

At the present time, due to a decision of the courts, supplemented by an act of Congress, Government traffic is subject to a 50 percent rate over land-grant roads. Starting in 1850, the Government granted land for the construction of railroads. In all, over 125,000,000 acres were donated to those railroads. The land was not only sufficient for a right-of-way but extended on both sides of the road bed; there were no strings tied to the grant. The railroads in time disposed of a great deal of this acreage and, statistics show, received in return nearly a billion dollars.

Pressure groups have been at work, members have been contacted by constituents directly and indirectly interested in the railroads. Some businessmen have been sold the idea the repeal of this law means a reduction in freight rates. Such will not be the case. Those favoring the bill refused to agree to a provision making the repeal effective several years after the termination of the war.

Mr. Speaker, had illness not prevented me from being present I would have opposed the passage of this bill by voice and vote.

It is opposed by the War and Navy Departments, the Maritime Commission, Interior Department, as well as those handling lend lease.

President's Veto Does Not Change Law

EXTENSION OF REMARKS

OF

HON. CLARE E. HOFFMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, May 4, 1945

Mr. HOFFMAN. Mr. Speaker, President Truman's surprise veto of Congress' latest attempt to make clear the right of individual agricultural workers to exemption from military service, when necessary to and regularly engaged in an agricultural occupation or endeavor essential to the war effort so long as he could not be replaced, may lead many local and appeal boards and State selective service officials into the same error they made when they followed General Hershey's January 3, 1945, State Director Advice No. 288, and inducted agricultural workers who were entitled to deferment.

After local and appeal boards, relying upon General Hershey's directive, began to disregard the Tydings amendment and to induct agricultural workers who were entitled to deferment, the Congress took action to correct the error by passing, on April 23, the so-called Flannagan resolution, which amplified and explained and gave directions for the interpretation and application of the Tydings amendment.

Then President Truman, on May 3, sent to Congress a message vetoing the Flannagan resolution. The House, by a vote of 195 to 168, refused to sustain the veto by burying it in a committee. Then, when the issue came squarely before the House, 185 voted to override the veto, while 177 voted to sustain it. Thus, the veto, which required a two-third vote to override, was sustained by a minority vote.

TYDINGS AMENDMENT STILL THE LAW

This action of the President does not change the law. It tends to again confuse local and appeal boards, for the Tydings amendment is still the law of the land and an agricultural worker who comes within its terms is entitled, as a matter of law, to deferment from military service.

The President's statement that "I do not believe that it was the real intent of Congress that agricultural workers should be given blanket deferment as a group," is quite true, but it was the intent of Congress that individuals regularly engaged in essential agricultural occupations, who could not be replaced, should be deferred.

That, as shown by the debate, was the sole purpose of the Tydings amendment, which had Hershey's approval and was adopted in the Senate with but six dissenting votes. The House adopted it; President Roosevelt affixed his signature. It is today the law of the land and, from the time when it became law until the 3d day of January 1945, it was interpreted and administered in accordance with the intent of Congress.

Then General Hershey, apparently due to the "Belgian bulge" and some other undisclosed reasons, changed his mind, and instructions went out to draft agricultural workers. They were drafted, notwithstanding the exemption given by the Tydings amendment.

Now it is said that agricultural workers are favored above all others. That just is not true. All men are not subject to draft. There are many exemptions. The Selective Service Act of September 1940 is just what its name implies—an authorization to select certain men out of the whole. It exempts State and Federal officials, ministers, theological and certain other students, conscientious objectors.

Everyone knows that hundreds of thousands of industrial workers, thousands of whom have at times gone on strike and hindered the war effort, have been deferred from military service. As a matter of fact, some few farmers, seeking exemption from service, went into industrial plants and obtained deferment.

Then when, in 1942, Congress learned that the effectiveness of our war effort was being impaired by the drafting of too many men who were engaged in the production of food, it lifted right out of the Selective Service Act all those individuals who met the Tydings classification, and no Presidential order or directive can put them back in as long as the right of Congress to make the laws is recognized. President Truman's veto did not repeal the Tydings amendment.

Local boards, appeal boards, every officer charged with the interpretation and administration of the selective-service law, should remember that today, notwithstanding the veto, the Tydings amendment is still the law of the land; all should obey it and agricultural workers entitled to deferment under it should be deferred.

Retail and Small Business in California in Post-war

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. DOYLE. Mr. Speaker, I wish to say a few words about the important subject of conditions and elements entering into retail trade and small business in my native State of California, as peace returns. Strange as it may seem, several people from the east coast have

come to my congressional office and asked about opportunities and conditions in California, with reference to going into small business when peace returns. Also, I receive written inquiries and communications on the same subject. I specifically have in mind that my study of this problem may be beneficial to other Congressmen in my own State, and possibly other States, and likewise beneficial to some G. I. boys or their families in their planning.

First, the need of making an adequate living and making it honorably and promptly, always exists. Where will the jobs be in California? Shall I go into retail sales? Shall I engage in small business in California when peace comes? These questions indicate some of the lines of the discussion that will briefly follow.

Fundamentally, if there is no reasonable opportunity for small business or retail business to succeed, then I doubt if free enterprise as such can succeed. Also, the retail trade is the outlet for wholesalers, distributors, and manufacturers. If there is no demand for goods through retail and small business, there is no need for the manufacturers turning out products for home consumption. In using the term "retail trade" or "small business" I refer to that business engaged in selling direct to the consumer those items of personal property which men, women, and children want and must have to keep happy, healthy, well-fed, and contented citizens. This simple definition applies to retail trade wherever found; it does not apply exclusively to California.

It is estimated that about 500,000 people will be engaged in retail trades in California by the end of the first year after demobilization of the armed forces. Naturally some of these will enter business as proprietors and some will necessarily go on pay rolls of other employers in retail trade and small business. It is estimated that approximately 50,000 retail outlets which did not exist at Christmastime 1944 in California will come into being by demobilization day. Retailers will be busy selling to Californians most of the things denied Californians and all Americans during this period of global war. Retail stores in California and all over the Nation are still jammed with customers, even though many items of necessity are not obtainable.

Population movements have made a difference in California cities, towns, industries, retail merchandising, and rural and agricultural districts. This probably means a difference of outlook for retail business as peace comes. People from inland towns took jobs in metropolitan areas and purchases of War bonds and stamps used up millions of dollars of consumers' money which would have otherwise gone into retail purchasing. California towns and communities grew up almost overnight; thousands of new retail purchasers moved in. They had plenty of money in their purses; some spent for only the actual necessities of life, and some spent lavishly because they either did not know the value of the dollar or because it was the first time they had had any money to spend.

In the collision of events, demands, and purposes thousands of retail businesses vanished entirely. There were about 200,000 retail trade outlets when the war broke; about one-sixteenth of them have closed, so that it is reported that in midsummer of 1943, California had fewer retail outlets than anytime in the 10 years previous. Nevertheless the total sales of the remaining retail businesses jumped up almost 20 percent. In other words, from $4,087,000,000 in 1941 to $4,812,000,000 in 1943; the total sales jump from 1940 to 1943 was even greater, to wit: 43 percent. The above jump in retail sales, in spite of the sharp decrease in the number of retail outlets, is significant if you take it in the light of the great increase in population and income in California during the same period. This population increase jumped up over 20 percent between 1940 and 1944. It is also significant that the average current income a Californian had in 1943, as compared with 1940, was more by over 80 percent. Yet, retail outlets in California sold only about 30 percent more of the retail trade in 1943 than in 1940. During the same period prices in California rose about 25 percent.

Of course, retail sales to nonresidents or temporary residents of my great native State were always and are always a substantial factor in terms of income or sales by retail merchants.

I am including in my remarks some brief tables of findings of fact, with reference to retail sales in California and to retail outlets in California. These tables show that the greatest per capita increases were in restaurants, bars, and to sellers of nonessentials, to wit: luxuries. Californians expended about twice as much on food and liquor and all sorts of jewelry during 1943 as was spent in 1941. During the same time the loss in per capita sales hit the automobile agencies, farmers, dairy supplies, plumbing, heating, and similar retail merchants.

The figures in these tables, which tables are quoted from California State Reconstruction and Reemployment Commission, Pamphlet No. 7, seem to clearly indicate that over a period of the last 15 years, the average income for residents of California was about 40 percent more than the average national income. But this does not mean that there can safely be an immediate rush or influx of people into my native State of California, with assurance of either making a living in small business or at retail sales, or, to promptly obtain employment. Nor does it mean that California must necessarily be concluded to be a State in which it is absolutely safe to invest capital. I include "character" capital as well as "cash" capital. I respectfully suggest that California having been a good place for the retailers of the necessities of life, for many years, it should correspondingly be a good place for jobs. But the other day when some easterner came to my congressional office and asked me about jobs and told me they had no reserve capital to go on, I advised that they better think twice about leaving the jobs they already had. Any person from any other State who expects to land in California and find it a haven of rest and a guaranty of success in financial investment, or, guarantees a job, even though it may have the most wonderful climate in the world and the most wonderful oranges, citrus fruits, grapes, prunes, vegetables and dairy products and all other things—excuse my boasting, please—this does not mean that immediately upon peace coming to this world, that it will be safe or sound reasoning for folks to flock to my native State if they have no financial reserve behind them. Nor will it be safe for Californians to flock to any other State without financial reserves behind them.

It does look as though retail stores and small businesses, such as grocers, restaurants, automobile sales agencies, garages, and service stations, and so forth, all selling the necessities of life—yes, and the luxuries of life—should be mighty busy. Consumer goods, as such, will increasingly be in demand all over the Nation.

Before closing, I want to briefly urge to your attention information which is applicable to my native State of California, as well as every other State. The Department of Commerce lists that almost 85 percent of small businesses are in the retail trade, and that about 90 percent of retail businesses and over 95 percent of all service businesses have a gross annual take of less than $50,000; with about 60 percent of these having an annual gross receipt of less than $10,000. Mark you, these figures are gross, not net profit. All expenses have to come out of the gross receipts before there is a net profit. A Dun & Bradstreet booklet relates more than 13,000 retailers in the United States in 1939 only averaged 2½ cents net profit out of each dollar gross take. These figures indicate that a retail store must be located where there are plenty of people to permanently do well; and that there should not be too many retail stores trying to sell the same thing to the same people. Someone must take a loss, and that means small business insolvency. It appears undeniable that, at least, 30 percent of small business proves a failure by the end of the first year, and about 15 percent dies a natural death by the end of the second year. Dun & Bradstreet also related that during 1939, out of a check-up of about 13,000 average retailers of small businesses, the analysis showed that the owners of these retail outlets received less than $200 per month; that about one-third of them actually made no net profit. I am informed these figures are taken from the entire Nation survey.

In reading Trends recently, it was noted that the morale division of the Army Service Forces reports that about 480,000 GI boys anticipated going into business for themselves in pursuits not pertaining to agriculture. They, of course, plan to do this in connection with the GI bill of rights. I am happy to see this expression of determination of independence on the part of these fine lads. The above number does not include Navy, Marines, or Coast Guard boys. California can expect to have a larger percentage of these boys than

most any other State by virtue of past experience.

I think it significant that many inquiries come as to whether or not an individual has a reasonable chance of success as peace comes in a "small business." I am frequently asked whether or not an ambitious, observing, trustworthy veteran can make an investment of $1,000 or $2,000 in groceries or service station and expect to succeed. Space does not permit me to elaborate on this question, but such questions quicken my thinking as to whether or not there is now and will be a reasonable economic freedom for such individuals in competition; in other words will the mighty important human incentive of competition have reasonable opportunity in our postwar economy, or will there be reasonable industrial, agricultural, and small business freedom for an ambitious, observing veteran and others to make, manufacture, grow, and dispose of their merchandise and goods through an uncontrolled small business or retail outlet or market? I do not pretend to now know the answer to this question. But it seems fundamental to me that if we are to perpetuate the American way of life so far as free enterprise is concerned, then it must more and more be the fact that American men, women, and children must have reasonable opportunity to put up their abilities, earnings, and chances as against the same assets of other Americans—to win or lose, based on the merit of their merchandise and marketing methods. I think California is no exception to the statement that a small businessman there has his increasing problems to survive. For many years I have read that the economy of opportunity is the dominant ideal of American industry, trade, and manufacture. However, if that ideal is to perpetuate our American way of life as peace comes, then there cannot safely be increasing concentration of power over all business in the hands and control of a relative few. There must be free enterprise for the small businessman, for the retail merchant, for the small wholesale merchant, for the small distributor, if there is to be free enterprise anywhere in our economic system. Therefore, neither the GI boys nor their families should rush to California, thinking that economic conditions there are such as will guarantee that either cash or other assets are sure to make a net profit. California is not off by itself in these important particulars than in any other manner.

California, naturally, will help these boys to get favorably located. They simply must not be taken advantage of in any way either by haste or dishonesty by any person who deals with them. The fact that increasingly banks have felt the necessity of being more and more strict with reference to character loans makes it difficult for small businessmen to get capital loans. It is too bad that character seems less and less a capital asset, so far as private loans are concerned. Yet deposit records show that bank vaults are bursting with money. Likewise the pockets of private parties are bulging with savings which ought to be in the investment field, instead of being held in private vaults, jars, and hiding places.

What is the way to enable the G. I. boys and other young men wanting to go into small business to get "character" loans? Is there any way? Yet, it is essential to the security of our bigger business that there be small business. Free enterprise cannot endure unless there is opportunity to freely compete. California is no place for anyone to go, anymore than any other State is, as peace comes, for the person who there expects to borrow money without collateral. I am afraid that our present economic set-up and system is not conducive to small business or the retail stores starting on the basis of free enterprise or individual initiative or ambition as the major elements. Cash or bank credit must be had or on hand more than ever.

At luncheon, May 7, in the congressional restaurant, I sat with a distinguished Congressman from another State. In speaking of the problem of civilians taking advantage of the returning veterans, he related he was shocked already with the reports of some civilians in a certain district in his State taking advantage in business and trade transactions, rent charges, and so forth. This conversation with him emphasized my determination to say in these remarks that the spirit and mind of all civilians in every State in this great Nation must be that no returning veteran shall be imposed upon or taken advantage of by scheming, designing, dishonest, or snide dealing persons. I urge the people of my native State of California to raise their levels of dealing with all GI's and veterans to the highest possible level of ethical dealings and transactions and trade. Let no veteran or man either in uniform or otherwise have just cause to criticize or condemn any civilian in these matters.

A perusal of the following figures will, no doubt, be helpful in giving an understanding of retail and small business sales, and purchases, averaged in my native State of California:

Taxable retail sales in California, 1941–43

Commodity classification	Per capita taxable sales, showing the percentage of change	Average taxable sales per outlet, showing the percentage of change
Food and drink:		
Confectionery and soft drinks	+42.7	+62.1
Grocery stores	31.2	+66.8
Other food stores	+21.0	+61.7
Restaurants and bars	+74.2	+134.0
Packaged liquor stores	+82.2	+105.8

Significance of VE–Day

EXTENSION OF REMARKS

OF

HON. ANTON J. JOHNSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. JOHNSON of Illinois. Mr. Speaker, historic November 11, 1918, brought forth a wild, spontaneous and victorious celebration throughout our Nation. Every town and hamlet, every home, ceased its labors to join in impromptu revelry. We won a victory? No; only a temporary military victory, when we thought it was the victory that was going to prevent all future wars.

VE–day—Victory in Europe Day—should inspire us all to renewed efforts to bring about VP–day—Victory in the Pacific. Let us build and work unceasingly for that glorious, victorious day. When that day comes, it is my prayer that all nations of the world will unite in a determined effort to live in Christian

brotherhood, and to the end that no more will the youth of the world be driven to slaughter.

Unless we create a permanent world peace, the next war will destroy all civilization. Again we have crossed the terrible abyss of war and we have lost multitudes of the flower of youth in its deep unfathomed chasm of despair.

I have every hope and faith that we can, we must, unite to prevent another recurrence of this unspeakable slaughter and suffering. The nations of the world can and, I pray, will, bridge the chasm of war.

I close with a poem that seems to me very fitting at this very particular hour of our national history, by Will Allen Dromgoole:

THE BRIDGE BUILDER

An old man going on a lone highway
Came at the evening, cold and gray,
To a chasm vast and wide and steep,
With waters rolling cold and deep.
The old man crossed in the twilight dim,
The sullen stream had no fears for him;
But he turned when safe on the other side,
And built a bridge to span the tide.

"Old man," said a fellow pilgrim near,
"You are wasting your strength with building here.
Your journey will end with the ending day,
You never again will pass this way.
You've crossed the chasm, deep and wide,
Why build you this bridge at eventide?"

The builder lifted his old gray head,
"Good friend, in the path I have come," he said,
"There followeth after me today
A youth whose feet must pass this way.
The chasm that was as nought to me
To that fair-haired youth may a pitfall be;
He, too, must cross in the twilight dim—
Good friend, I am building this bridge for him."

Reciprocal Trade Agreements

EXTENSION OF REMARKS

OF

HON. HUBERT S. ELLIS

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. ELLIS. Mr. Speaker, as the time approaches for the consideration of the Reciprocal Trade Agreements Act—with further tariff reduction proposals—we are deeply impressed by the growing alarm expressed by labor and industry throughout the Nation.

Today I bring to your attention the protest of the glass and pottery industry of West Virginia, supported by sound argument.

West Virginia, perhaps, produces more pottery and glass than any other State in the Nation, and we have some of the Nation's largest plants. Our first duty is to our own labor and industry.

This statement is signed by the following factories which employ 1,300 men and women with an annual pay roll of $2,000,000: The Viking Glass Co., New Martinsville, W. Va.; the Paden City Glass Manufacturing Co. and the Paden City Pottery Co., both of Paden City, W. Va.:

A DUTY FOR EVERY CITIZEN OF WEST VIRGINIA INTERESTED IN THE POTTERY, CHINA, AND GLASS INDUSTRY

Fanciful dreams of the Utopia-like post-war world may turn into a fitful nightmare, for many Tyler and Wetzel County citizens unless we do our part to stop the vague planning of many theorists who are advancing plans to be incorporated into legislation, well-meaning though those plans may be.

While it may be the duty of the United States to aid the down-trodden nations to regain their position in the world economy, it is certainly not our duty to do so at the expense of our own workers who have for generations put their effort into the building of this Nation.

One of the dreams of the post-war planners is to lower, and in some cases, abolish, tariff barriers so that merchandise may be imported duty free in some instances and at greatly reduced rates on others.

For practical reasons best known to those who are directly concerned, this will have an adverse economic effect which will make itself felt in the life of every citizen of Tyler and Wetzel Counties, W. Va.

The danger to Tyler and Wetzel Counties from this angle is very real and concrete and should stir every citizen in this community to action before it is too late. This danger must be recognized now, and dealt with before it gets beyond the influence of the people most greatly concerned.

ROBERT L. DOUGHTON, Democrat, of North Carolina, on March 16, introduced a bill known as H. R. 2652, which would extend the Reciprocal Trade Agreements Act for a period of 3 years from June 12, 1945. This bill authorizes tariff reductions of 50 percent below the January 1, 1945, level on duties already lowered by 50 percent under the Trade Agreements Act. A 50 percent reduction would mean a 75 percent cut from the rates established in the Tariff Act of 1930.

This is a serious threat to American industry, especially manufacturers of glass tableware, china, pottery, and earthenware.

West Virginia is the center of the American pottery and glass industry and it perhaps produces more pottery and glass than any other State in the Union. Here in West Virginia are located some of the largest pottery and glass plants in this country.

The radical tariff reductions proposed by the bill introduced by Congressman DOUGHTON mean fewer employment opportunities for the American potter and glass worker and smaller pay checks. When we import low-wage goods, we export jobs. American pottery and glass manufacturers can not compete with the low wages paid in Czechoslovakia, Poland, Hungary, Yugoslavia, Belgium, England and Portugal. The threat of foreign competition is greater today than it has ever been. Innumerable potters and glass workers from Czechoslovakia, Poland, and Germany have infiltrated into South America and Mexico. Many new plants have been started. The labor rates paid in South America and in Mexico are so low that even the existing tariffs do not provide adequate protection for the American manufacturer.

The disastrous effect of tariff reductions upon the American pottery and glass industry can readily be discerned through the effects of the Czechoslovakian trade agreements, the effective date of which was April 16, 1938.

Every citizen of West Virginia should oppose the extension of the Reciprocal Trade Agreements Act:

Many of the employees of the pottery and glass industry own their own homes, have established their roots here and intend to remain here. But, if their means of livelihood is taken from them because tariff barriers are removed, they will be forced to market their skills elsewhere, or enter the labor market at a lower figure. This will not be good for our counties.

It is inconceivable that any citizen of West Virginia would want to see this situation come to pass, and that they would fail to exert the small amount of effort required to do their part in protecting this industry and themselves.

Dedication and Opening of the New Woodrow Wilson House

EXTENSION OF REMARKS

OF

HON. LISTER HILL

OF ALABAMA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. HILL. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD the address delivered by Hon. Josephus Daniels on the occasion of the opening and dedication of the new Woodrow Wilson House, 45 East Sixty-fifth Street, New York City, on April 17, 1945, and also a statement by Mr. Arthur Sweetser, president of the Woodrow Wilson Foundation, on the same occasion.

There being no objection, the address and statement were ordered to be printed in the RECORD, as follows:

STATEMENT BY MR. ARTHUR SWEETSER, PRESIDENT OF THE WOODROW WILSON FOUNDATION

Today, as we meet for what was to have been the simple and informal opening of the new Woodrow Wilson House, we stand in the shadow of an immense tragedy.

A second great President of the United States has just given his life that the governments and peoples of the world may live in peace and order.

As history takes on perspective, Woodrow Wilson and Franklin Delano Roosevelt seem destined to be ever more closely linked. Both were elected to the highest office in the gift of the American people. Both led their Nation to victory in a world war. Both became mankind's leading proponent of a world association for peace and justice. Both sacrificed their lives that war may pass from civilized society.

It seems strangely symbolic that this permanent Woodrow Wilson House should have been scheduled for dedication just at the moment of Franklin Roosevelt's passing.

It also seems profoundly appropriate.

Woodrow Wilson was the first man in history to convert the world's yearning for peace from mere aspiration and hope to an actual, juridical association embracing at its zenith 59 of the nations of the world.

It was not his responsibility, nor the responsibility of the mechanism he helped construct, that a second world war came upon mankind. He had laid the broad lines well and truly, he had provided the ways and means; but the governments and peoples of the world were not yet sufficiently alert to give them the necessary vitality. It is essential to the future to understand this basic fact.

President Roosevelt took up the heritage amidst a second world war. He built strongly and wisely on the experience of his former leader and on his own instinctive judgment. The foundation he put in place at Dumbarton Oaks seems certain to be embodied in international acceptance at San Francisco.

The lives and the ideals of these two great leaders seem curiously interlocked and intertwined. President Wilson made Mr. Roosevelt his Assistant Secretary of the Navy and gave him the opportunity for the experience which served him so well in his own Presidency. When President Wilson was exhausted by his efforts at Paris and at home to secure acceptance of the League of Nations, Mr. Roosevelt became a candidate for Vice President on a platform centering on the League, and later largely organized and became first president of the foundation bearing his former chief's name. The first representative of the United States to be accredited to the League of Nations reached Geneva on the very day of Woodrow Wilson's death, just as this permanent Woodrow Wilson House is being dedicated amidst the emotion of President Roosevelt's death and on the same day that the first special train is leaving Washington for San Francisco to complete, along the lines laid down by President Roosevelt, the conception of world organization proposed by President Wilson. And it is symbolic, too, that as the Presidency passed from President Roosevelt's hands, the new President should have taken the oath of office immediately under a portrait of Woodrow Wilson.

Woodrow Wilson and Franklin Roosevelt have left us a great heritage and a great challenge. To our country has fallen the supreme honor of having produced the two statesmen who, at the end of two world wars, led the world's battle for peace. We faltered last time and slipped helplessly into a second world war. It is our heavy responsibility this time to complete what they have so well designed and to give the world some reasonable hope for peace.

Victory is possible on one stern condition. The pigmies will come out of hiding again when the war danger is past, as they did before, and attempt to disintegrate these high ideals through prejudice, partisanship, distrust of our allies, and small-mindedness, appealing to our fatigue, our impatience, and any other corroding emotion they can discover. The fight may be rough.

Let us this time be forewarned and vigilant. Criticism and constructive suggestions are desirable, have indeed been urged by the Government. Let us, however, keep our perspective and ruthlessly resist anything which will make us fritter away the fruits of our victory in this war as we did those of the last war.

God has given us a second chance, even those of us who were crushed last time. We owe it to the joint memory of Woodrow Wilson and Franklin Delano Roosevelt to take the solemn obligation never to relax till we fulfill the chance. Day in and day out, almost every hour of the day, we can each of us add our bit to complete the work to which these two greatest of our countrymen gave their lives.

This would, I am sure, be their deepest hope, and for us of the Foundation, it is a command. I hold in my hand a letter from President Roosevelt which says:

"I am delighted to learn of the splendid progress the Woodrow Wilson Foundation is making. This is just the time to renew its activities."

Let that, indeed, be our legacy from the late President of the United States and the first president of the foundation spontaneously created by over 200,000 American citizens in honor of a previous President of the United States, Woodrow Wilson.

And now I have both the honor and the pleasure to introduce to you the men who more nearly than anyone in the world is a link between these two great men—the only surviving member of President Wilson's original Cabinet, who served him as Secretary of the Navy for 8 years, and who was in turn served by Franklin Delano Roosevelt as Assistant Secretary of the Navy and later appointed by President Roosevelt as his Ambassador to Mexico—the Honorable Josephus Daniels.

ADDRESS OF THE HONORABLE JOSEPHUS DANIELS

Man proposes. God disposes. This occasion was planned as a joyous celebration of the formal opening of the Woodrow Wilson Shrine dedicated to advancing universal peace. In the providence of God, it has also been converted into a solemn memorial to the noblest champion of the outlawry of war whose vision and courage and masterly strategy have highly advanced the nations toward a permanent pact of peace.

At the passing of Franklin Delano Roosevelt, it is but truth to say that all the peoples of the earth who loved liberty are today "like Niobe, all tears." Wherever there are men and women, particularly those who have not enjoyed a fair share of their toil and been blessed with full equality, the feeling is universal in the voiced expression coming up from hill and plain: "We have lost our best friend." In their hearts, they echo Walt Whitman's immortal lines:

"O Captain, my Captain, our fearful trip is done,
The ship has weathered every rack, the prize we sought is won,
The port is near, the bells I hear, the peoples all exalting,
While follow eyes the steady keel, the vessel grim and daring,
But O heart, heart, heart! O the bleeding drops of red
Where on the deck my Captain lies, fallen cold and dead.
O Captain, my Captain! rise up and hear the bells!
Rise up. For you the flag is flung, for you the bugle trills."

In devotion to bringing about a warless world, Woodrow Wilson and Franklin Roosevelt are linked for all time as the Elijah and Elisha of this century. In the fullness of time, after years of disillusionment, if the younger man had been asked his heart's desire, Franklin Roosevelt would have said to his chieftain of World War I: "I pray thee, let a double portion of thy spirit be upon me." In the months when Roosevelt was drawing up the blueprints of the first fruits of victory, the peace-hungry men and women of the universe have said of him, as sons of the prophets aforetime said: "The spirit of Elijah doth rest on Elisha."

In this hour of universal mourning, coupled with consecration to the cause they incarnated, the similarity of their objective of international brotherhood in the lives and aspirations of Woodrow Wilson and Franklin Roosevelt is well nigh perfect. Unlike in background and in their approach to their high duties and the methods of attainment, their master passion for peace was identical.

Both loved peace and hated war and warmongers. It is history that until the Kaiser's laying off the lanes of the sea, denying our fundamental devotion to freedom of the seas, and murdering Americans traveling on lawful missions, Wilson left no stone unturned to keep his country out of war. In like manner until the day of infamy at Pearl Harbor, Roosevelt exhausted every effort to prevent the spread of the flames. He pointed out to Hitler and Mussolini the fate of men who sought by force to destroy the sovereignty of other nations and despoil their people. He never desisted in seeking to avoid the holocaust that came to curse the world until Americans were dastardly murdered without any declaration of war and the Axis Powers set out on a policy of world domination. And then in 1941, as in 1917, this peace-loving country could do no otherwise than join with all free peoples to repel the enemies of democracy.

In the years of disillusionment that followed the rejection of the League of Nations, Franklin Roosevelt as president of the Woodrow Wilson Foundation, was mindful of Wilson's spirit of prophecy as he said in 1919:

"I can predict with absolute certainty that within another generation there will be another world war if the nations do not concert the methods by which to prevent it.

"I do not hesitate to say that the war we have just been through, though it was shot through with terrors of every kind, is not to be compared with the war we would have to face the next time. What the Germans used were toys compared with what would be used in the next war."

We did not concert to prevent the next war, and it fell to Franklin Roosevelt as Commander in Chief to direct the greater war successfullly against the incomparably greater terror than that of 1917–1919.

On the day of infamy, which brought the United States in this war, Roosevelt must have recalled and been influenced by what Wilson said in 1919:

"If Germany should ever attempt that (world conquest) again, whether we are in the League of Nations or not, we will join to prevent it. We do not propose to stand off and see murder done. We do not propose to be champions of liberty and then consent to see liberty destroyed. We are not the friends of free government and then willing to stand by and see free government die before our eyes."

Animated by a like high resolve, Roosevelt summoned America to arms as the champion of liberty and by masterly strategy made certain that liberty could not be destroyed.

The parallel between Wilson and Roosevelt and their faith continued until the end. Not long before the close of his life, broken in body but not in spirit, seeking to remove doubts of an old friend, Wilson said:

"Do not trouble about the things we fought for. They are sure to prevail. They are only delayed."

And with that quaintness which gave charm to all his sayings, he added:

"And I will make this concession to Providence. It may come in a better way than we proposed."

There breathed the same confidence and wisdom (was it divine illumination?) in Roosevelt's last written speech which, alas, he did not live to deliver. He wrote:

"Let me assure you that my hand is the steadier for the work that is to be done, that I move more firmly into the task, knowing that you—millions and millions of you—are joined with me in the resolve to make this work endure.

"The work, my friends, is peace, more than an end of this war—an end to the beginnings of all wars; yes, an end, forever, to this impractical, unrealistic settlement of the difference between governments by the mass killing of peoples.

"Today as we move against the terrible scourge of war, as we go forward toward the greatest contribution that any generation of human beings can make in this world, the contribution of lasting peace, I ask you to keep up your faith. I measure the sound, solid achievement that can be made at this time by the straightedge of your own confidence and your resolve. And to you, and to all Americans who dedicate themselves with us to the making of an abiding peace, I say:

"The only limit to our realization of tomorrow will be our doubts of today. Let us move forward with strong and active faith."

These were the last words touching the master passion of his life. He hoped with his steadier hand he could direct the immortal document that would make an end to the terrible scourge of war. It was not to be. The strain of responsibility heavier than ever weighed on a world leader had taken its toll. The brain that had been overtaxed was worn out. His steadier hand will not sign the covenant of peace. But his spirit will direct the counsels and guide the text as others complete the unfinished task. It is for

us, the living, to consecrate ourselves to the achievement of the goal to which he gave the last full measure of devotion.

There are other parallels that will make Wilson and Roosevelt go down the ages as the foremost apostles of peace. As Wilson entered World War No. 1, he declared: "There is no hate in our heart for the German people." Two days after Pearl Harbor, Roosevelt said: "We are in the midst of a war not for vengeance."

No hate cankered the soul of these greatest leaders even in the conflict of the wars they directed.

It was my privilege to be comrade and shipmate with and to work with and under these two apostles of liberty and peace. Their names are inseparably enshrined as the prophets of a world when all battle flags will be furled. It is my profound conviction that no two men have lived and been called to world leadership with such confident faith that war is an anachronism and could be avoided. May their holy faith light the world to the realization of the goal of the Prince of Peace.

THE KEY PRESENTED

Presenting the key to the Woodrow Wilson house to Mrs. Wilson, Mr. Daniels said:

"As a disciple of your distinguished husband, I am honored in the name of the foundation to present you the key to the house where the ideals of Woodrow Wilson are enshrined.

"I bring you the assurance that all Wilsonians hold you in affection and admiration because they know you shared the faith of your beloved husband, because you were his full partner in all things and keep alive in your heart and in your devotion the light that we all believe will soon illumine the whole world. He knew, and you know, and we know, that 'God's fruit of justice ripens slow' and that 'we must wait.'

"If it be given to those who have gone before to know what transpires on this sphere, we know his spirit hovers over us, gladdened by the near approach of the full realization of his great dream."

River Basin Authorities and the New Community

EXTENSION OF REMARKS

OF

HON. JAMES E. MURRAY

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. MURRAY. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a very able address entitled "River Basin Authorities and the New Community," delivered by Hon. Leland Olds, Vice Chairman of the Federal Power Commission, before the Washington Academy of Sciences, at Washington, D. C., on April 19, 1945.

I have obtained from the Public Printer an estimate on the cost of printing this address. The estimated cost is $182.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Tonight I am going to talk about our river basins and how their planned development can contribute to the growth of a well-balanced rural-industrial civilization, a mosaic of regional cultures which will enrich the entire national being and prove the enormous material and spiritual potentialities of democracy.

And I would like very humbly to dedicate what I have to say to one of the great leaders of all times who has just passed from our midst, Franklin Delano Roosevelt. His spirit will always live in the modern cooperative river-basin communities which will increasingly give form to the common life of the people, not only in this country but in many lands. From the day when he first took the oath of office as Governor of New York State, such river-basin programs as that which he saw come to fruition in the Tennessee Valley were an important element in his conception of the new world which he was building.

In order to approach the question with the right perspective, I want to combine the thought of a congressional leader who has played an important part in river-basin legislation with that of an Irish poet whose book, The National Being, expresses more fully than any that I know the basic philosophy which must guide these programs.

On May 8, 1944, Representative WILL WHITTINGTON, of Mississippi, chairman of the House Flood-Control Committee, reported that year's flood-control bill to the House. His speech reviewed the long vistas of history in which great civilizations of the past in China, Egypt, Mesopotamia, and elsewhere have controlled floods and harnessed rivers to make them among the most important servants of man. He said:

"Rivers are among nature's best contributions to the progress of man. But man must supplement nature. Impediments to navigation must be removed. Canals must be constructed, channels must be deepened, harbors must be kept open, and barriers must be removed. Transportation by water is the cheapest form of transportation, and the denser the population the greater the need for cheap transportation.

"Rivers have always contributed to the advancement of mankind. The lack of navigable rivers has hindered the development of many countries. Cities in ancient and modern times located along great rivers have grown and prospered.

"Rivers have served man in the past. They have molded peoples, and they have contributed to progress. In the future, as in the past, rivers will make nations great.

"Rivers interest me. They fascinate me. They have always influenced the course of civilization. They have a character of their own. They flow through the years and through the lands, they flow across civilization. They make history. They bring life, and they bring destruction. They are friends or they may be enemies of man. Man himself makes the final choice."

The Irish poet, George Russell, whose pen name was Æ, conceived of each people as engaged in the great task of building a civilization. He understood that a great civilization must rest on a spiritual base, on national ideals, and that democracy requires that all the people join in the discussion and creation of those ideals.

Æ saw that the building of a great civilization must be related to the divine order of the universe, and that this involves two things: freedom of the individual and cooperation with one's fellow men—the developing of a sense of identity of interest, of common purposes, of interdependence and solidarity. These combined, he saw as constituting real democracy.

Looking over the great reaches of history, he saw that absorption of life in great cities is the danger that threatens the modern state, that a civilization not rooted in healthy rural life, dies. And then, looking ahead to the building of a civilization as a task like the slow rearing of a medieval cathedral, he said:

"The creation of a rural civilization is the greatest need of our time. It may not come in our day, but we can lay the foundations of it, preparing the way for the true prophet when he will come. The fight now is not to bring the people back to the land, but to keep those who are on the land contented, happy, and prosperous. And we must begin by organizing them to defend what is left to them; to take back, industry by industry, what was stolen from them."

Æ saw in cooperation a vast turning heavenward in which men would become habituated to the thought of common action for the common good. He saw it as the cure for the conflict of interests which destroys the unity of nations, as creating that sense of identity of interest which is the basis of citizenship. He goes on:

"Our great nation-states have grown so large, so myriad are their populations, so complicated are their interests, that most of them really feel no sense of brotherhood with each other. We have yet to create within our great nation-states social and economic organizations which will make this identity of interest real and evident and not seem merely a metaphor, as it does to most people today."

The challenge of the river basin authority movement today comes to us in this setting and in these terms. It offers the generations now alive their counterpart of the work of the generations of pioneers who built the foundations of our America and passed on. For the building of such a civilization as can be achieved through this new instrumentality of democracy is not only the noblest but also the most adventurous of undertakings. And let me add that it was the warp and woof of the vision of President Franklin D. Roosevelt.

For it is the valley authority idea that is important. It is the comprehensive development of the resources of a river basin—control of floods, storage of water, irrigation of land, conservation of soil, improvement of navigation, generation of power, etc.—under the leadership of a single agency which stimulates the people of the valley to cooperate in the use of those resources to promot the general good. It is the flowering of that idea which holds promise for the future. And I am convinced that the quality of our culture and civilization will depend in great measure upon our attitude toward the resources of our valleys—upon whether our approach is one of cooperatoin or exploitation.

Let us look for a moment at the Tennessee Valley Authority as the prototype of the river basin authorities of the future. Let us look at it as a new instrument of democracy which may enable us to solve some of the pressing economic and social problems of our modern technological age, problems which, if they go unsolved, will wreck our civilization.

The Tennessee Valley Authority is essentially a regional, not a national agency. Its management is located in and has identified itself with the region which it serves. It is vested with appropriate powers and the flexible corporate type of organization necessary to enable it to assist the people of the region in marshalling their resources. In the language of its 1941 report:

"On the watershed the Authority is enabling the people to reclaim and revitalize many thousands of acres of their forest and agricultural lands. In the laboratory, intensive research is uncovering new opportunities for taking advantage of native resources in the everyday business of earning a living. Working with the people and through their institutions, the T. V. A. is perfecting new cooperative techniques for solving region-wide problems that overrun established political boundaries."

In short, although the Nation provided the capital for starting the T. V. A., and incidentally has already been well repaid in the tremendous contribution which it has made

to the war effort, the enterprise belongs essentially to the people of the region. It is their agency for coordinated planning of the use of their resources. It is enabling them to lift their economic life to new levels which will assure higher standards of living for farmers and wage earners, sustained prosperity for local business institutions, and an ever-widening opportunity for the oncoming youth of the valley.

And here I want to amplify somewhat the essential characteristics of such a regional authority as a new instrument of democracy. For we must distinguish it carefully, on the one hand, from mere coordination of the water resource development functions of several great Federal agencies and, on the other hand, from the administrator type of organization representing a single great Federal department.

When Congress creates an authority on the T. V. A. model, it actually sets up a regional development corporation with a wholly public purpose, which goes to work subject only to the annual check-up of its owners, the American people, through their Representatives in Congress. The directors of the corporation, men in the field, are given the power of decision, and provision is made for the active participation of the people of the region through their local institutions. Thus the public corporation is a device for regional management in terms of broad national conservation policies. It reflects the unity of nature in a great river basin. It has roots in the valley and its success depends upon stimulating the activity and sense of responsibility of the people of the valley for their own economic and social well-being. In short, the unified development of the resources of the valley becomes a common purpose in which men cooperate. Thus it strengthens rather than weakens democracy.

To reiterate, such a river-basin authority is located wholly in the valley which it serves; it is autonomous; it has full responsibility for the valley program; it is free from entanglement with Government activities extraneous to the valley; it combines the necessary powers of Government with the effectiveness of a self-financing corporation; it works, not through enlargement of its own organization, but through the cooperation of Federal, State, and local agencies, farm organizations, agricultural colleges, experiment stations, labor organizations, chambers of commerce, private business and cooperatives, and it is concerned with fuller and better-balanced development of the resources of the region in order to promote the economic and social well-being of the people who inhabit it.

Thus the whole tendency of this approach to river-basin development is in the direction of economic and social as well as political decentralization. In other words, it offers a way to preserve our traditional democracy by reversing the powerful trend of the past generation toward centralized control of the country's economic life by an all powerful corporate bureaucracy. This trend has been steadily substituting great monopolies for the thousands of small community business units which were truly characteristic of American free enterprise. And here I would like to quote briefly from the report, dated January 18, 1943, of the Special Committee to Study and Survey Problems of American Small Business, of which Senator JAMES E. MURRAY of Montana is chairman. According to this report:

"The resolution establishing this committee was passed before war struck America. It was born of the realization that for several decades we had been facing a national trend toward centralization of American business and industry. Business and industrial institutions engaging in Nation-wide operations had vastly increased, and the smaller concerns with home-town control and management were disappearing through consolidation or inability to meet the monopolistic pressure and financial power of these larger institutions.

"Prior to the present war this trend caused serious alarm, and studies and efforts had been under way to stop the trend and encourage decentralization of business. It has become generally recognized in this country that small business is fundamental to our system of free competitive enterprise and that the trend we had been following would eventually lead our country to a complete abandonment of free enterprise and the building in its place of a totalitarian system like that in Germany."

It may be noted in passing that a solution of the problem which the committee is facing is of primary importance to the very life of the civilization which we are building. For the development of huge monopolistic corporations, under centralized financial control, has reversed the natural order which should govern the conduct of business enterprise—that men produce to meet their needs as consumers. The country's business is no longer seeking a just return for serving the consumer needs of the people, but is seeking maximum profits through exploitation of those needs.

This reversal of the natural balance between production and consumption has introduced the economic instability which is the greatest threat to our way of life. If our civilization is to survive, we must find a way to restore that balance, so that our young men and women, as they come out of school, can look forward to continuity of employment in the useful work of transforming the country's wealth of resources into a full life for all. And I am convinced that restoration of the balance, of the natural order of business, must begin on a local and regional basis.

We must progress from a balanced community to a balanced regional economy, and from a balanced regional economy to a balanced national economy. So, finally, we may progress to a balanced world economy in which all peoples can really cooperate to maintain peace.

This means that we must reverse the trend toward economic colonialism which has characterized the period in which our great corporations have concentrated the economic power of the country in their hands. For the small business enterprises which people are seeking to preserve are not small corporations competing in a national market but regional and local business, producing for and distributing to their neighbors, employing their neighbors and the children of their neighbors, taking their places among the country's premier small businesses, the individually operated farms, as a part of an integrated regional economy.

The economic problems which I am discussing are perhaps best set forth in a comprehensive report of the T. V. A. on regional freight rates. Although this report is concerned primarily with freight rate differentials and their effects, it reveals the nature of the economic colonialism which the river basin authority program may well bring to an end.

The report shows that, as a result of retardation of the growth of manufacturing, the South and West are far above the country-wide average in percentage of workers employed in extractive industries and corresponding below in manufacturing and trade. Needless to say, the Northeast is well above the average in manufacturing, trade, and services. In our industrial era this spells over centralization in the country's economic life.

The report shows further that the average value per ton of freight originated in the northeast was more than a fourth again as high as that of freight originated in the South and West due (1) to the fact that manufactured goods, the specialty of the northeast, are more valuable generically than nonmanufactured goods and (2) to the fact that, among the goods classified as manufactured, those originated in the northeast have an average value of $109 per ton as against $71 a ton for those originated in the South and West. The report points out that goods gain in value with each step in the progress from raw material to finished product and that manufacturing activity generates a further large fraction of the national income by creating service opportunities of many kinds—advertising, selling, financing, and insuring, as well as supplying the needs of the industrial employees.

Each step in the development of value which takes place within an area adds to the ability of the area to support population, directly through industrial employment, indirectly through the trade involved in supplying the industrial employees. Thus, where economic centralization gets started, it tends to breed more centralization which, in turn, reaches out to exploit the areas thereby relegated to the task of supplying raw materials and semimanufactured products. The T. V. A. report sees development of indigenous industry in the South and West as the solution. It says:

"For reasons to be brought out in the subsequent discussion, this solution is best designed to preserve local and regional initiative. * * * This solution will minimize disruption, promote more economical use of resources and distribution of national population; provide economic stability and occupational diversity; and, perhaps above all else, will most greatly promote the conservation of priceless resources."

Insofar as the South and West are concerned, the only alternative to the development of indigenous manufacture, with the concomitant trade and services, appears to be migration of surplus population. Such migration, the report says, cannot be accepted "unless it is proposed, without openly saying it, that the South and West be used primarily as feeders of manpower and materials to far-away industries and in their colonial function be kept much poorer than the imperial region."

To put the matter another way, dependence on raw-material production on an area or regional basis is typically associated with low per-capita income and vice versa. Thus a chart showing the 48 States, located by coordinates, representing per capita income and percentage of population engaged in the production of raw material, i. e., in agriculture, forestry, and mining reveals the colonial structure of our economy. Broadly speaking, this chart shows a concentration of manufacturing and high per capita income in the Northwestern States, with California and Washington also in the group. On the other hand, almost without exception, the States of the Southeast and of the great region extending from the Mississippi River to and including the Rocky Mountains, show an above-average dependence on agriculture, forestry, and mining, coupled with low per capita income. As Chairman David E. Lilienthal, of the Tennessee Valley Authority, said in his address before the Business Conference on Transportation at the University of Texas in 1941:

"No one in these days can longer doubt that the community or the region that depends predominantly on the production of raw materials is a community or region of a lower standard of economic prosperity than is the community or region that is more extensively engaged in the processing and manufacturing into finished goods of these raw materials that grow in the fields or forest or are mined from within the earth. This close relation between low income and raw-material production, between high income and manufacturing, is a fact of fundamental importance that we of these disadvantaged regions must understand thoroughly, a fact upon the basis of which we must weigh our plans and fight our battles."

For rectifying of this situation, for reversing the trend toward economic centraliza-

tion and colonialism, for promoting the creation throughout all parts of our land of a well-balanced rural-industrial civilization, the development of our river basins through the instrumentality of authorities can provide a tremendous impetus. In the States where average rainfall is low, the storage of waters for irrigation will be a very important element in these programs. But, as a means of more general distribution of the benefits of modern technology, low-cost electricity as a contribution of river-basin development may well provide the key.

Such a program begins by controlling floods and conserving stream flow through reforestation and construction of dams. It raises the standards of agriculture through scientific farming with its contour plowing, use of fertilizer, cover crops, diversification, and rural electrification. It goes on to promote local and regional storage as well as processing of farm products in order to keep more of the economic value at home. It improves navigation, to create slack-water transportation of bulk commodities in and out at low rates, and assists in the development of river port facilities to serve the several areas. It promotes the development of new devices, adapted to the valley's use, and attracts private enterprise to produce these products. It offers abundance of low-cost electricity to other industries which can utilize valley resources to manufacture for the larger market. It helps to develop model communities, not only in connection with its construction activities, but also through accepting the responsibility for relocating families and reestablishing communities displaced by the construction of reservoirs.

In fact, it carries out President Roosevelt's philosophy of government which he said could be found in a quotation from another great American—Abraham Lincoln. Said Lincoln:

"The legitimate object of government is to do for the community of people whatever they need to have done but cannot do at all, or cannot do so well, for themselves in their separate and individual capacities."

The harnessing of the waters of a great river basin, the application of a unifying principle to the utilization of its resources, leadership in cooperative use of those resources to promote the highest economic and social well-being of its inhabitants are today beyond the ability of the community of people to do for themselves in their separate and individual capacities. So they become the object of government acting through an agency designed to meet the need with the greatest possible dependence on the separate and individual capacities. So they become the object of government acting through an agency designed to meet the need with the greatest possible dependence on the separate and individual capacities of the people of the valley.

Let me call your attention to two or three quotations from recent Tennessee Valley Authority reports. They reflect a cooperative method involving all economic interests in the valley, which I believe must be carried much further and untimately extended to other valleys, throughout the country. Thus, I read that:

"In order to carry out a valley-wide program in private as well as public land, the T. V. A. has enlisted the cooperation of thousands of individual farmers together with that of the State institutions serving their varied needs. The farmers, selected by their neighbors, test T. V. A. fertilizers under actual farming conditions, under the technical guidance of their agricultural extension services. The tests involved making adjustments toward sustained productivity in crops, livestock, and other farm enterprises."

And again:

"In many communities neighboring test-demonstrations farm operators combine their farms into area demonstrations. In this way farmers on small watershed act together in planning readjustments otherwise not practical in respect to land use and cropping systems, livestock, and other factors."

And again:

"To encourage farm practices that will contribute directly to better living and higher income, farm implements particularly suited to this region are being devised; improved methods of processing and preserving fruits, vegetables, meats, and other marketable farm products have been developed. Through demonstrations, trade journals, and other appropriate channels, the results of these investigations are passed on to private enterprise under conditions that insure wide distribution of new wealth and new opportunity."

And finally:

"It is believed to be apparent that the problems and opportunities confronting the Authority cannot be dealt with separately by the individual efforts of the Authority or any other public or private agency. They can be dealt with successfully only if the efforts of Federal, State, and local agencies on the one hand, and those of private citizens and land owners, on the other, can be joined through a single administrative and cooperative technique. The Authority a flexible corporate body, is in a position to provide the element of unity and leadership through which separate and often times ineffectual efforts are brought together, strengthened, and employed to the best advantage of the region as a whole."

If time permitted, I could call the role of this country's rivers and suggest for each river what the multipurpose approach might be expected to offer the people of the region through which it flows to the sea. Scanning the country from the top of the Washington Monument, our swing around the compass would take in the Potomac, the Rappahannock and the Roanoke, the Yadkin-Peedee, the Santee-Congaree, the Savannah, the Altamaha, the Chattahoochee, the Alabama-Coosa, and the Tombigbee-Warrior, all serving our great Southeast; the Missouri, the White, the Arkansas, the Red, and Ouachita in the region between the Mississippi and the mountains; the Colorado and its tributaries; the rivers of the great central valley of California; the Columbia of the Northwest; the Niagara and the St. Lawrence draining the Great Lakes; the rivers of New England and the Susquehanna; the Ohio tributaries, including the Cumberland, all offer tremendous possibilities that are still untapped.

Conservation of soil, erosion control, reforestation, flood control and conservation storage, navigation, swamp drainage, irrigation, pollution control, recreation, all these values can be developed; and, in connection with them, hydroelectric power to the extent of seventy-five to one hundred million kilowatts of capacity, capable of generating from four hundred to five hundred billion kilowatt-hours of electrical energy a year.

Furthermore, our greatest concentration of potential hydroelectric power is in the northwest where other energy resources like coal, oil, and natural gas are almost nonexistent. In other regions the hydro is well adapted to meeting peak-load requirements in integrated systems in which steam plant burning coal, oil, or natural gas will carry the base loads. In fact, regions in which natural gas abounds today may well find that this fuel is too valuable a chemical resource to be used even under power boilers, rendering their available hydroelectric power even more welcome.

Reduced to round figures, our river basin programs are dealing with an estimated annual loss of 3,000,000,000 tons of invaluable soil, representing nearly half a billion dollars of annual agricultural productivity; with flood damage, which in 1936 totaled half a billion dollars; with over 20,000,000 acres of fertile land that could produce crops if irrigated; with thousands of miles of waterways that could be improved for modern river transportation; and with potential hydroelectric energy equivalent to nearly twice the total electric energy today used for every purpose throughout the land. And all of these values can be realized by reversing the cycle of destruction which has resulted from approaching our river basin resources on the principle of exploitation in the interest of quick profits, the cycle which has been characterized by the slashing of forests without provision for their reproduction, by the mining of soil leading to erosion, by increasingly disastrous floods and the concomitant waste of water, by the centralization of population in great urban centers, by a rootless population wandering over the land in search of jobs which periodically vanish.

I sometimes think of the programs of control and use of our great rivers as symbolic of what we must do to restore stability to our whole economic life. For the flow of our ecnomic life swings between torrential activity of flood proportions and periods of economic drought when the grinding of wheels of industry run slow. Why? Because, just as our exploitation of forest and soil has removed many of the controls which constitute Nature's balance, so has the reversal of the natural order of business, in which enterprise serves the consumers' needs, removed the controls which stabilize our economic life.

This natural economic balance was a function of communities in which men worked together to meet their needs as consumers. It was destroyed by the exploitation of modern technology to serve the ends of those concerned only with commercial profits. The old communities were disrupted and destroyed; they ceased to have any sound economic function and so ceased also to have any social or spiritual significance. As a result, people have theorized about the possibility of new communities of national, continental, or world dimensions. But this new community of world dimensions will remain but a technological dream, without substance, unless it is composed of smaller communities in which men cooperate as neighbors.

That is where the river-basin authorities will play their part. For, by bringing technology back to a closer relationship with the soil, so that raw materials can be locally processed for local use, regionally processed for regional use, and ultimately those for which regions show unique adaptability exchanged on a national or world basis, they will restore communities. In the process of working with people of the regions to control and utilize the resources of their rivers to stabilize regional economic life at high levels, they will be restoring the natural controls which assure the harmonious working of national and regional economies.

And I might conclude with the keynote of the report of the Mississippi Valley Committee, the first great study of our river basins. On October 1, 1934, under the inspired leadership of Morris L. Cooke, the committee said:

"Planning for the use and control of water is planning for most of the basic functions of the life of the Nation. We cannot plan for water unless we also consider the relevant problems of land. We cannot plan for water and land unless we plan for the whole people. It is of little use to control rivers unless we also master conditions which make for the security and freedom of human life. * * * The need for planning arises out of the needs and desires of the people. Under the proven system of democracy no plan can be imposed upon the people. Government may inform, educate, and guide. It may mobilize resources for a common task. It cannot dictate. What must be sought is effective means of carrying out the common purpose, not only in the interest of the living generation but for the protection and enhancement of the lives of all the generations to

come. * * * We are tenants and transients on the earth. Let us hand down our heritage not only unimpaired but enriched to those who come after us."

Tonight I have tried to give you, not a technical discussion of the engineering and economic activities of river-basin authorities, but a glimpse of the possibilities of this new institution in a world of changing institutions. And, in truth, it is not altogether new, but rather a natural outgrowth or offspring of our traditional institutions, able to help us adapt our entire life to the requirements of modern technology and so to pass on, to succeeding generations in a new world, a great civilization. Such a civilization will grow ever richer in the spiritual values without which a civilization is doomed to the decay which finally destroyed every culture that ignored the harmonies of nature and so lost the vitality which comes only from the sense of oneness in the knowledge of God.

And so I want to come back to Will Whittington's concept of the river as one of the greatest factors in human life, as a great unifier, drawing men together for common use, symbolizing man's journey through this world and through eternity. I have always been impressed by the inspired words of a great Greek poet who wrote: "Full of Zeus is the city; full of Zeus is the harbor; full of Zeus are all the ways of men." If he had not been more familiar with Aegean ports than with life-giving rivers, I am sure he would have added: "Full of Zeus are the river basins." For the great cycle of replenishment, through which water falls in rain and snow on the hillsides, seeps down through the soil, forms little rivulets which join into creeks, and so into rivers, bearing fertility, carrying commerce, providing everlasting energy, finally to be lifted up to the heaven by the sun, to fall again as rain, is certainly one of the great manifestations of creative mind, of spirit.

So I urge that we adopt institutions through which we, and our children, and our children's children, may become a part of our river basins, adapting our civilization and our culture to their natural rhythms, working with them in the harmony and balance of nature itself. If we do, I feel we will rediscover freedom, the freedom which can come only through cooperative effort in accordance with the moral law.

Perhaps if more people, if all of the people, could know their rivers as personal factors in their lives, as friends; could move on their surfaces mirroring the blue sky of day or the star-spangled heavens of night; could feel the rhythms of their curves, of their flanking meadows and hills and bluffs, of their villages and cities, of their forests and fields, we would find the solution of the problems which burden the world today.

The Education of Dentists in Wartime

EXTENSION OF REMARKS

OF

HON ALLEN J. ELLENDER

OF LOUISIANA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. ELLENDER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "The Education of Dentists in Wartime," published in the last issue of the Journal of the American Dental Association.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE EDUCATION OF DENTISTS IN WARTIME

The handling of dental education by the armed forces during this war has not been a happier experiment than it was in the last. The awkward blunders of the administration of the Students' Army Training Corps in World War No. 1 have been repeated in large part during World War No. 2. This possibility was foreseen as early as May 1943 by the Journal, which then pointed out the dangers.

"It seems unbelievable, but it is the sober fact, that Army and Navy officials would lay out plans for taking over dental education, reorganize and greatly modify the predental requirements and set the stage for regimentation of the dental schools without even recognizing the existence of the two agencies principally responsible for the present conduct and status of dental education.

"After all this military machinery does its work, it will transpire, we predict, that there was really no occasion or necessity for doing anything. What more do the Army and Navy want than a steady flow of well-trained dentists to meet their replacement needs? * * * Allowed to carry on their work undisturbed, the schools would have continued to enroll new classes on the present basis of admission and number with completely accelerated schedules and, with the assurance that the reasonable and tremendously important needs of the civilian population and the literal demands of the Army and the Navy would be met. All the Government needed to do was to establish a sensible working scheme for the deferment of enough bona fide high school and liberal arts college students to sustain the present enrollment in dental schools."

Government evaded this simple solution, however, to work out the more complex plan represented by the Army specialized training program and the V–12 program of the Navy. The former displayed little durability and was precipitously abandoned by its sponsors, who permitted the discharge into civilian life of approximately 250 young dentists who had been trained and maintained at Government expense. Althought a majority of these men ultimately found their way into uniform, this spectacle did not amuse the thousands of older dentists who had left established homes, families, and practices to serve their country in a time of need. The cry of the time was for younger men of combat age; yet this arbitrary program of Army officials worked directly to frustrate that need.

The Navy V–12 program, which takes in a lesser number of students, has fared better and has displayed less of the characteristic military tendency to improvise in situations that are better served by intelligent, long-range planning.

Today there are still many dental students who have had some of their training subsidized by Government and who wish to enter the armed forces. They are prevented from doing so in many instances by Army and Navy regulations governing the number of officers in the Dental Corps. It is exceedingly difficult to understand why these younger men should not be permitted to enter the armed services to replace older men on a basis of (1) length of service, (2) health, (3) age, and (4) dependents. Such simple justice can be the part of any military program even in time of war.

With all of this fancy tightrope walking through the wartime problems of dental education, there is still no program for keeping a sufficient number of young men in the dental schools of the country to provide for future needs. Under the present program, for which Selective Service must bear its share of responsibility, there will be a critical shortage of dentists after 1948, simply because the existing capacity of the country's dental schools cannot be used.

Senator ELLENDER has recognized this potential crisis and has introduced into the Senate a bill (S. 637) to defer or release from active service not more than 3,500 predental students and not more than 1,750 dental students for each year of the training course. The objectives of this bill were endorsed as early as 1943 by the American Association of Dental Schools and by the Council on Dental Education and the ad interim committee of the board of trustees of the American Dental Association.

The Ellender bill also has similar provisions for premedical and medical students. It is to be hoped that with the support of both professions, the basic provisions of this bill will soon be enacted into legislation. Dental societies and dental schools should do everything in their power to urge its passage, in order to prevent a critical shortage of health profession personnel in the years immediately to follow.

Obligation of a Home-Front Soldier

EXTENSION OF REMARKS

OF

HON. ARTHUR CAPPER

OF KANSAS

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. CAPPER. Mr. President, I have received from Benjamin E. Neal, president of the "I Am an American" Foundation, a statement in which he calls my attention to the program, "My Obligation as a Home-Front Soldier," supported by all members of that organization. I ask unanimous consent to have the obligation printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

"TILL THE LAST SHOT IS FIRED!"—MY OBLIGATION AS A HOME-FRONT SOLDIER

I am in the army of home-front soldiers: a grand army of 100,000,000, engaged in supplying the sinews for victory—on farms, in workshops, offices, stores, schools, churches and homes of America.

My first enlistment (in the war effort) will expire only when the last remnant of military opposition has been wiped from the face of the earth; my second enlistment (in the struggle for prosperity and permanent peace) is for life-time service.

I realize that absolute victory, to be won at the earliest possible moment, depends on me as well as upon our loved ones who are still sacrificing their lives for God and country.

I want to live each day so that in future years I may look back at my service record and find that I did my best to help prevent the needless loss of a single American life, right up to the very hour of unconditional surrender on the last battle front.

I hear America calling; calling me to duty until the last short is fired; calling me to join with men and women of good will wherever they may be found, in the never-ceasing struggle to banish war, increase prosperity and enshrine the Golden Rule.

I will answer the call: I will carry my full share of the load in the Nation-wide crusade

to speed the coming of the day of enduring peace on earth.

My heart is in America and America is in my heart! I am an American home-front soldier!

Bread, Not Stone

EXTENSION OF REMARKS

OF

HON. HARLEY M. KILGORE

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. KILGORE. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial entitled "Bread, Not Stone" published in the Stars and Stripes of April 11, 1945.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BREAD, NOT STONE

We hear about a few GI's sitting at the peace conference as advisers. Instead of such window dressing why not give something real, namely, the vote, to all GI's and all Americans between 18 and 21?

If a man's old enough to fight, he's old enough to vote. If we're serious about a lasting peace, let's let those whose lives are at stake help elect the people to write it.

Some 7,000,000 young Americans between 18 and 21 are now voteless. They are old enough to drive a car, an airplane, or a tank. They are old enough to go into business or farming or a war plant. They are old enough to marry and raise a family. They have had the benefits of the best education the best nation in the world can provide. Surely they are old enough to vote.

Let each State, therefore, and the United States—do as Georgia has already done—reduce the voting age to 18. Let's give our youth the ballot, not bunting. Bread, not a stone.

CAPT. HENRY H. COLLINS, JR.,
French Truck Group.

They Shall Not March Alone

EXTENSION OF REMARKS

OF

HON. THEODORE G. BILBO

OF MISSISSIPPI

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. BILBO. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an article entitled "They Shall Not March Alone: The Spirit of the American Chaplain," written by Rev. Grover C. Schwartz, grand historian of the Societé des Quarante Hommes et Huit Chevaux, Grand Voiture of Mississippi, published in the Mississippi Veteran of March 1945. Reverend Schwartz, by the way, was a chaplain in World War No. 1.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THEY SHALL NOT MARCH ALONE—THE SPIRIT OF THE AMERICAN CHAPLAIN

(By Chaplain Schwartz)

When this vast global war broke like a dangerous and devastating tropical storm upon the American people and our Government began to mobilize its millions of fighting men to meet this grave crisis, the churches of America began to mobilize their young men also and during the present war our American churches have sent the cream of their clergy to minister to the men in national service.

The clergymen enrolled have been young men, strong men, men of attractive personality, men who were ready to serve or to die, men who thoroughly knew their trade and who could bring the maximum of comfort, consolation, and courage to those in any area of service. The cry of the church was—"They shall not march alone," and you will realize that the church has kept its word when I tell you that there are now 10,243 chaplains in the Army and Navy and this does not include hundreds of other clergymen who have already served and have been discharged because of bodily ailments or service-acquired disabilities.

Our brave chaplains, who have served and are now serving, possessed in abundance that qualification which is the mark of the good soldier in every land and age, and that is, they were not afraid or unwilling to die for their country and their cause, and among the thousands of brave young men, who have died during the present war, have been several score of clergymen, who wore the khaki and esteemed it an honor to lay down their young lives that out of their sacrifice might come a glorious daybreak for those who dwelt in darkness.

Out of the many high moments of heroism and devotion of the present war this incident comes to bless and inspire. In February 1943, the S. S. *Dorchester* was torpedoed off Greenland and it carried a large number of American personnel and troops. When the vessel was struck and those on board knew that they must go over the side there was momentary panic on the ship, but the four Army chaplains present went among the men—comforting and encouraging them and calming their fears. The last duty that these brave clergymen performed was to give out lifebelts to the troops. When all the lifebelts had been distributed and still men were unprovided with these safety devices—these four chaplains took off their own life belts and gave them to men not prepared to meet death. And when the boat went down the survivors caught a vision of the four standing with linked arms as they went into the presence of their God.

Strangely enough these four chaplains represented the three great religious bodies in America—Chaplain Clark V. Poling, of New York State, and Chaplain George L. Fox, of Massachusetts, were Protestants; Chaplain John P. Washington, of New Jersey, was a Catholic; while Chaplain Alexander D. Goode, of Washington, D. C., was Jewish. When the waters closed over their heads I can imagine Father Neptune and his royal court standing at salute as they received these heroic men as honored guests into that mystic kingdom.

Yes, American chaplains are dying for our country on many fronts, others are receiving painful wounds at their post of duty, some are missing in action, while others languish in the prison camps of our enemies. To those who have fallen we give a farewell salute of honor—to those who survive we offer the consolation of our prayers to God for their recovery and deliverance.

The table which I now insert contains the latest, official information from our War and Navy Departments regarding the service, the sacrifices, and the honors which like priceless jewels adorn their service record:

Our Army, Navy, and Marine Corps chaplains

	Army	Navy	Total
Chaplains in service	7,800	2,443	10,243
Died in service	88	16	104
Wounded in action	105	22	127
In hands of the enemy	38	5	43
Missing in action	1	1	2
Decorations, Army: 384 chaplains have received these decorations	459		459
Decorations, Navy:			
Chaplains decorated		43	43
Chaplains who have received eloquent letters of praise and commendation from their superior officers		8	8

Surely this is another instance where figures speak more eloquently than words.

On July 29 of last year the United States Army celebrated the one hundred and sixty-ninth anniversary of the founding of the chaplaincy in our armed forces, for it was on July 29, 1775, that Congress made the first formal recognition of a legal status for chaplains in the armed forces. For over 169 years men of loyalty and devotion have poured out their lives in service to our troops at home and in the field. The church in every generation has kept its pledged word—they shall not march alone. When it was necessary for a body of men to march through the valley of death the church has sent its holy men to march with them. When men have writhed in their wounds and pain, some chaplain has blessed them by his ministrations. The chaplain's gentle voice has committed their soul to God and their body to the earth. Often the chaplain has shared their captivity among their enemies and when peace came the chaplain has accompanied them home and by his example and precept has inspired them to build a new civilization upon the ruins of the one that has fallen.

All honor to the American chaplain; we uncover before him and our hearts beat out a symphony of homage in his name.

Control and Treatment of Infantile Paralysis

EXTENSION OF REMARKS

OF

HON. WILLIAM LANGER

OF NORTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD an address on the control and treatment of infantile paralysis delivered by Sister Kenny before the Illinois State Legislature.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

At the onset I would like to convey to you my grateful thanks for the honor conferred upon me by this invitation to address you this 1st day of May 1945.

In order to dispel the idea that I emerged from the Australian bushland with some unknown and untried idea about a disease that

had baffled medical science from the time of the Pharaohs down to the present day, I will give a brief outline of the incentive of my visit to the United States. In a July, 1939, number of the Journal of the American Medical Association there appeared a statement presented by Dr. Kristian Hansson, Hospital for Ruptured and Crippled, New York, reading: "Nowhere in the world is there any known treatment for the disease infantile paralysis in the acute stage of the disease." Dr. Louis Schwartz, of Paris, sent me this information to the city of Brisbane, Queensland, Australia, drawing my attention to the fact that I had treated his own daughter, Betty, in the acute stage with outstanding satisfactory results in the year 1938. At this time I was granted the privilege of treating cases of infantile paralysis in the acute stage of the disease in the Brisbane General Hospital. In November 1939, the medical observers who were called in to pass judgment made the following statement:

"Sister Kenny has evolved a satisfactory and commendable treatment for the disease infantile paralysis which holds out more hope for recovery than any other method known anywhere.

"Signed: Dr. Alan Fletcher, M. D., M. S., F. R. C. S. (Eng.), Sydney, New South Wales; Dr. Norman Little, M. D., F. R. C. S. (Eng.), Consultant Orthopedic Surgeon, Prince Alfred Hospital, Sydney, New South Wales; Dr. Allan Fletcher Roberts, M. S., F. R. C. S., Orthopedic Surgeon, Newcastle, New South Wales; and supported by Prof. H. J. Wilkinson, Professor of Anatomy and Physiology, University of Queensland, Brisbane, Queensland, Australia."

It was at this stage I was advised to come to the United States, owing to the fact that the disease is more prevalent in this country than any other. A group of medical men wrote to Dr. Melvin Henderson concerning this visit and, also, interviewed the Government and myself, and being aware of the international reputation of the Mayo Clinic, Rochester, sought the good offices of the above-mentioned member (Dr. Henderson) of the Institute to introduce me to the medical world of the United States. It was also thought wise that my visit should be an official one; consequently, arrangements were made, and the premier of my State, the Honorable W. Forgan Smith, M. L. A., upon the advice of the United States Consul wrote to Mr. Basil O'Connor, bringing before his notice the following items: First, explaining that I did not seek personal gain, and that in Australia I had given my services entirely voluntarily and, I quote, "has neither sought nor accepted any monetary reward from the Government or from patients." It was then further explained to Mr. O'Connor, I quote: "New cases which have occurred since she has had access to patients in public hospitals have been treated in the acute stage by her system with outstanding results. She has also had outstanding results in her treatment of cases in the convalescent stage, of which a large number have been treated by her system. Her results have been particularly outstanding in early convalescent cases." In further quoting, the last two paragraphs of this letter read:

"Miss Kenny's mission to the United States of America is to obtain scientific assistance to complete her research and in the compilation of a book, which she has been urged to publish, setting out by description and illustration the Kenny system of treating the disease in the acuate stage. She does not seek personal gain. Her mission is being undertaken on the advice of a group of medical men. The Government has associated itself with her mission by providing transport for her and an attendant to America and for their subsequent return to Australia.

"My Government has been much impressed with the results of the Kenny system, particularly with the success of the system in the treatment of the disease in the acute stage. This success opens up the prospect that much greater improvement can be made in treating the disease than has previously been accomplished. Miss Kenny has, in the opinion of the Queensland Government and that of many medical men, made a notable contribution to the cause of humanity. Accordingly, I commend Miss Kenny to the good offices of the National Foundation of Infantile Paralysis."

I would consider that this official introduction to your country from the Premier of my State and the statements contained therein should be sufficient evidence to let you know that any previous evidence submitted by any doctor or group of doctors was submitted in ignorance of the fact that there was in deed and truth a treatment in the acute stage which was worthy and satisfactory. However, for some unexplainable reason, Mr. O'Connor advised me that no one was anxious to investigate and that I had better return to Australia.

I was en route to Australia when Dr. Henderson, Mayo Clinic, introduced me to Drs. Wallace Cole and George Williamson, of St. Paul, and in the course of time I met Drs. Miland Knapp and John Pohl, Minneapolis. All of these gentlemen asked advice about patients whom they informed me had had the best treatment the United States could offer and were, as they expressed it, "getting no better fast." This was several months from the onset. Deformities were corrected and function restored in certain muscle groups. Thus it was through this last chance being given before I boarded the boat for my return to Australia and the honest purpose of four medical men that the United States was saved from a national disaster in the years 1943–44.

I have given you a brief outline of my arrival in the United States and of my reception. It is now necessary to see what happens in the years that followed on. For 30 years I had seen the words I have spoken, twisted and misconstrued. I have seen my life's work again and again broken. I have gathered the threads together and fanned the dying flame. As already explained, I have taken what was supposed irremediable deformities and lifeless muscles and straightened the one and strengthened the other and have seen the light of happiness replace the look of despair in the eyes of the youth and maiden of the United States. I have seen parents weep for joy. I have felt and known the prayers of the people.

These questions may be asked—What was this gift? Was it a new type of therapy? A treatment? Or something deeper still unknown to science? These questions may best be answered by the reports of unbiased medical men and the findings of science. The one you will find in the many presentations where an opportunity was given for demonstration before the dread disease had done its damage. The other you may find in the book, entitled "The Importance of Research." The first American report was presented by Dr. Wallace Cole, professor of orthopedic surgery, University of Minnesota; and Dr. Miland Knapp, professor of physical therapy, University of Minnesota. This report states, amongst other things, that pain was overcome in a few days and the patient was much more comfortable than ever before. However, the most important of all the statements was the statement that treatment was given for symptoms and conditions previously unrecognized which were just the opposite to those generally accepted throughout the world. As a matter of fact, that part of the human anatomy previously thought normal was the part to receive special attention and banish pain. In this presentation I will omit the series of reports sent in by medical men whose associations were either negligible or nonexistent.

The next important report came from the city of Winnipeg, Canada, and states, amongst other things, that this revolutionary treatment demanded that the disease be given reassessment, and stated further that the Kenny method had proven good, indeed, better than good, the best of which they had ever experienced, and added: "We (doctors) and our patients owe Miss Kenny a great debt. We gladly acknowledge it." It was also admitted that deformities had been combated in every case by the newer method for the newer concept.

The White Memorial Hospital, Los Angeles, Calif., presents its experience, which is coincident with Winnipeg.

The Los Angeles Children's Hospital asks the following question: "Do you know that before the adoption by hospitals of the Sister Kenny treatment for infantile paralysis, 85 percent of the victims of this dread disease never recovered? Under the Sister Kenny treatment, only 15 percent of the cases are incurable. Do you realize the 70 percent who were previously doomed to the life of a cripple can now look forward to normal life?"

The president of the hospital in Seattle, amongst other things, states: "Through the use of the Kenny treatment all 87 infantile paralysis patients treated in the year 1944 walked out of the hospital. The length of hospital treatment here now averages less than 3 months, whereas previously it was a year or more."

We shall now take the reports on this disease prior to my arrival and up to date. It was acknowledged by Dr. Philip Wilson, medical superintendent, Hospital for Ruptured and Crippled, in the year 1940, that one-third of the crippling of childhood was caused through the disease infantile paralysis (New York Times, May 1940). This referred to all seven types of crippling, including accident. It was acknowledged in the Journal of Bone and Joint Surgery that a higher percentage of cases suffering from the after-effects of this disease presented themselves at the Shriners' Hospital, St. Louis, October 1941, for treatment than that of any other malady.

Dr. Frank R. Ober, former president of the American Orthopedic Association, assistant dean in charge of courses for graduates, Harvard Medical School, stated in lecture No. 6 given at Vanderbilt University in 1941 under the auspices of the National Foundation for Infantile Paralysis and published in the book entitled Infantile Paralysis, 1941, printed by the Waverly Press, Baltimore, Md: "Poliomyelitis, more popularly known as infantile paralysis, leaves more handicapped individuals than all other acute diseases combined." Dr. Ober also stated in the foreword of the book, entitled "The Kenny Concept of Infantile Paralysis and Its Treatment," that I have put great emphasis on the condition of muscles in this disease, and adds that this is not found in textbooks but admits that there is no doubt it is present and is a great factor in the production of early deformities. It is agreed by all that deformities prevent normal function and produce paralysis. In this statement Dr. Ober agrees with the scientific findings quoted later.

It was also acknowledged in the Journal of Bone and Joint Surgery that with the different types of orthodox treatment the highest percentage of recoveries was 15 percent and deformities developed during treatment. It was also acknowledged that without any form of physical therapy the recoveries were 19 percent. It is acknowledged in the same journal that pain lasts up to four months. This is supported in the Public Health Bulletin, No. 242.

We shall next consider the question, What does scientific investigation have to say? In

reply we will consider the book published by the National Foundation for Infantile Paralysis and entitled "The Importance of Research." If you turn to pages 22 and 23, you will see the following statement:

"Physicians had always been taught that infantile paralysis was really paralysis. Kenny claimed that infantile paralysis was rarely paralysis, but was really spasm of muscles. This was an exactly opposite concept. Physicians used a method of treatment which consisted of immobilization by casts or splints. Kenny contended that these were all wrong for they merely increased the spasm and led to contractures and permanent deformities."

Scientific research was instituted by the National Foundation for Infantile Paralysis, and it is stated in this book that this research proved I was treating a condition which actually did exist; and, furthermore, when this condition was treated the Kenny way, it recovered. When they were left untreated, which was the orthodox way, they were still sick, useless muscles after long weeks. It also proved that all previous treatment had been for conditions that did not exist. This is the answer why 70 percent more patients are restored to normal than previously experienced. It was further stated in this book, "This was the first real proof that Kenny was treating a condition that did in truth exist."

You will also see in a statement made by Mr. O'Connor and published on pages 9 and 10 of the book, entitled, "The Kenny Concept of Infantile Paralysis and Its Treatment": "Those who work in the laboratories with problems on histopathology, anatomy, and physiology claim that the major concept is reasonable and rational," and admits further, "This forward step is not a new treatment for the disease as previously conceived, but presents an entirely new concept and a satisfactory treatment for this concept," and expresses his thanks that much that once was accepted as necessary deformity can be overcome and handicapping physical defects be eliminated. Despite this admission on the part of Mr. O'Connor, the book (containing description of how to overcome these handicapping defects) sent to the medical director of the National Foundation for Infantile Paralysis was returned to the publisher; and the book that allowed these defects occur was translated into other languages and generally distributed.

The next question to be asked is, What use has the medical world made of this forward step and discovery? Alas, it is my painful duty to state that this knowledge has been suppressed and hidden away. For instance, when seven medical men whom Dr. Fishbein refers to in the Chicago Daily News as "top notch" men in the medical world, teachers in medical schools, admitted that they were ignorant of any such conditions and symptoms, both the National Foundation for Infantile Paralysis and Dr. Fishbein were cruelly silent. They were also silent when these gentlemen accused me of introducing a work to the United States which could be damaging to children in the acute stage. We shall now inquire into this matter.

If you examine the report of one of their number which appeared in the Journal of Bone and Joint Surgery, you will see that 160 acute cases were treated according to orthodox procedures before my arrival. They were treated by immobilization until pain subsided which was a period of 3 or 4 months. They were then given the best physiotherapy obtainable in the United States, and it is admitted that the results were very disappointing, and deformities developed in 50 percent of the cases with trunk involvement during treatment. How different the story you will see in the documentary film where pain lasted 3 or 4 days with Kenny treatment—this is supported by all reports up to date—and 80 percent of the cases had recovered and gone home inside the 4 months' space. It is also interesting to note that the disagreeable complications which Mr. O'Connor states previously were thought inevitable are entirely banished by this newer science for the newer concept.

We shall now inquire, What are these disagreeable complications and deformities? In reply it is necessary to state that immobilization has produced kidney stone, inflammation of the kidney, inflammation of the bladder, bleeding heels, and suppurating pressure sores. Also, the attendant deformities through nontreatment of the symptoms discovered by me are hideous spinal deformities, leg deformities, arm deformities, foot deformities, and hand deformities—all of which you will see on the film and all of which have been banished by the introduction of my work—along with dwarfed and stunted limbs. Seventy more cases out of every hundred are restored to normal, and up to date all adults have been restored to useful citizenship, and no child has had to attend the crippled children's school. Before the introduction of my work in Minneapolis the average enrollment at the local crippled children's school was approximately 100, and maintained this number by a yearly enrollment between 20 and 30 cases. Since the introduction of my work in 1940 the enrollment has been nil.

However, for some unknown reason there seems to be an organized boycott on the part of the officers of the National Foundation for Infantile Paralysis and Dr. Fishbein. Of my charity I would say that they may be ignorant of the true picture. This is partly true, for they have denied the facilities for research into the further presentation I have to make of which they are entirely ignorant. However, this does not excuse their cruel silence when teachers in medicine acknowledge their ignorance of the result of scientific research, already proved, nor does it excuse them from their cruel attempts of preventing the work from being introduced into other countries, nor their callous behavior in the distribution of a book written by Miss Jessie Stevenson describing a treatment which Mr. O'Connor admits allowing damaging conditions occur which were thought inevitable.

What shall be the feelings of the mothers of other countries when they know their children suffered unnecessary, excruciating pain, and see their bodies warped, twisted, and deformed, and know, as they will know in the years to come, that the United States had this great gift and held back—and, if I may use the simile, when they asked for bread, gave them a stone? The National Foundation for Infantile Paralysis put forth every effort to prevent the work from being sent out in its entirety. Students were sent for 9 weeks to unlearn one idea and absorb the opposite; and when I protested, I was called cantankerous and difficult to get along with. I wish to give a gift worthy of a great people and give it in its entirety, and I wish every child on earth to be relieved of suffering and deformity. I would consider any person that stands in silence and allows these things to happen when they can be prevented is guilty of a crime as great as that committed in any concentration camp—to condemn a child to 4 months' pain when it could be reduced to 4 days.

Dr. Fishbein states that the advisory board of the National Foundation for Infantile Paralysis, of which he is a member, was within their rights to deny the institute the funds for research, stating that the building was not suitable for either clinical or scientific research. Does Dr. Fishbein know what sort of a building yielded the evidence that revolutionized the concept of this disease and eventually gave to the United States a gift which Mr. O'Connor admits saved the country from a national disaster? I will tell him. It was a small log hut with a bark roof and a dirt floor and wooden shutters for windows. What was discovered in this humble dwelling puts 85 percent of the American children back instead of 15 percent and leaves the remaining 15 percent in a much better shape than ever before. With strange incongruity, Dr. Fishbein complains, "Sister Kenny states she has a method of early diagnosis. If she has, why does she not come out with it? Why does she hide it away?" And yet admits facilities were denied to do what he complains about me holding back. For 2 years I have been pleading with Dr. Fishbein and the National Foundation for Infantile Paralysis to come and see and institute research. Dr. Fishbein's own statement that they were justifiable in refusing is the answer. Neither financial or scientific help was forthcoming. I am trying to do it alone.

For 3 years I have been requested by medical members of the armed forces of the United States to record by documentary film my findings and procedures. I had notified all concerned of this request and no notice was taken. However, through the generosity of Miss Rosalind Russell, I was able to present part of my work by sound film—that is, the concept, early diagnosis, and how to prevent deformities. The members of the armed forces who have seen it have not hesitated to state that they think it of great educational value. As a matter of fact, I have had an appeal from Fort McClellan to see if they could rent a copy. This camp is now in quarantine for this disease. At my own personal expense I sent a copy of the film, for which I have no desire to receive rent. Neither the National Foundation for Infantile Paralysis nor the American Medical Association take any interest in this film. However, the public-health officers are interested, and I had another copy made and shown to the public-health officers of New York. I have their statement that they consider it the best presentation of my work that either I or anyone else has given in writing and is, in their opinion, of great educational value.

Furthermore, I would consider a gift of healing to other lands would go a long way to bind the wounds of a war-weary world and kindle the flame of friendship. We will now consider what help has been granted in this objective. In the year 1941, Dr. Chown was advised not to come to Minneapolis from Canada by the National Foundation for Infantile Paralysis. However, this was forgivable for the true worth of my work was not then known. However, the same thing happened in 1943, when Mr. O'Connor knew that I had an important appointment with the medical association and the Minister of Health in the State of Ontario, and I was in New York. He informed me that he desired to see me in Dr. Diehl's office in Minneapolis on the same date. He refused to see me in New York.

A South American neighbor appealed for help the same year. The appeal was at first refused. However, when it was known that I desired to give the help and would send my ward with another technician, the National Foundation for Infantile Paralysis came forward with a proposition. My ward and an American technician was sent along on contract. An appeal was made at the expiration of this contract to the foundation from Argentina to extend the term. No notice was taken of this appeal, and the appeal was then sent to me by the Ambassador and the authorities in Buenos Aires which was supported by the technicians themselves. With this appeal I received the following wire from the National Foundation for Infantile Paralysis:

"For your information have just wired Mary Kenny 'After most careful consideration of the request that you and Miss Gardner be permitted to remain an additional 2 months in Buenos Aires and after conferring with those in whose judgment as to such matters we have reason to have confidence we are convinced that the interests of those

in Argentina afflicted with infantile paralysis will be best served by your returning immediately to this country pursuant to the plans under which you were sent to Argentina by the National Foundation. The Foundation, however, has no right and no desire to dictate to you in any sense what you as individuals should or should not do. If, however, you elect to remain in Argentina we are certain that you would be the first to wish to relieve the National Foundation of any responsibility in connection with your continued sojourn or your safe return to the United States and in such case the National Foundation would consider itself so relieved.'

"DON W. GUDAKUNST, M. D.,
"Medical Director."

Simultaneously with this wire I was informed by Dr. Diehl that he had been instructed by both Mr. O'Connor and Dr. Gudakunst not to issue any checks in favor of Mary Stewart Kenny. I may here state that the foundation had not honored its financial obligation to Mary Stewart Kenny entered into by contract. However, the Republic of Argentina supplied the necessary funds and presented Mary Stewart Kenny with an honorarium and a gold medal and saw that she returned safely to the United States. The financial status of the American technician was not molested. She received her fees according to contract. However, both my ward and I were well aware of the fact that these procedures would not have the approval of the good American people whom we wished to serve. Nor would the activities of Dr. Fishbein have the approval of the 400 good American doctors who wrote, I quote: "You have presented to us a new concept of this disease and led us along a new pathway of treatment. We hope you will live to see the day of its adoption throughout the world."

Dr. Fishbein states in the lay press that I object to any improvements being introduced into the treatment. This is altogether incorrect. I would gladly welcome any improvement, but quite understand that before improvement can be introduced it is necessary to understand the symptoms of the disease. Dr. Fishbein refers to the committee of seven orthopedists as the "top notch" men in their profession. It is from these gentlemen that improvement could come. They admitted that they were ignorant of the condition that I had observed clinically and which scientific research had proved correct in which the National Foundation for Infantile Paralysis and Dr. Fishbein had maintained silence. With this attitude and lack of knowledge of the results of scientific research, it is logical to understand the impossibility to present any improvement.

Also Dr. Fishbein in the lay press refers to Prof. Stanley Cobb and states that this gentleman had referred to my presentation as "physiological nonsense," and added that all neuromuscular professors were of the same opinion. This statement appeared in January 1944 in the Journal of the American Medical Association. However, in the May number of the same year it is announced that my presentation is a "scientific fact." Of this latter statement Dr. Fishbein and the National Foundation for Infantile Paralysis were again cruelly silent. Also Dr. Fishbein had an opportunity to distribute and publish the findings of research, proving Dr. Cobb and his colleagues wrong in this article, and again failed.

In October 1944 number of the Foundation News, a paper is presented by Miss Worthingham, technical director. A statement appeared in this paper to the effect that a Kenny technician could not give the necessary after-care to a patient suffering from the disease infantile paralysis. It is evident from this statement that the National Foundation for Infantile Paralysis has lost sight of the fact that I had taken cases upon my arrival in Minneapolis that had failed to respond to the best physical therapy for months, and deformities had developed. Function was restored and deformities corrected with the application of the newer sciences of dermo-neuro-muscular therapy applied by me. It is admitted in the Journal of Bone and Joint Surgery that the results of physical therapy was most disappointing. This is supported by the Canadian reports Canada also states, "We were astounded to see Miss Kenny restore to normal muscles we had accepted as flaccoid or paralyzed." The National Foundation for Infantile Paralysis intends to donate over one million dollars to the teaching of the useless method and refuses any assistance to the teaching of the newer science. Dr. Fishbein states that it is their endeavor to save the American people from exploitation. The documentary film prevents the failure of the best physical therapy to produce satisfactory results for months and the success of the Kenny method by the newer science in the same patient. This is indisputable evidence to the lay person. May I ask who is doing the exploiting?

Furthermore, I take keen exception to the published statement that I was annoyed because I was denied funds from the Foundation. I, personally, have never made any request for funds. The medical committee and the Board of Directors of the Elizabeth Kenny Institute had requested funds and were refused. I have stated that owing to this refusal it will be necessary for me to present my further findings to research in some other country. This does not mean I disassociate myself from the work at the Elizabeth Kenny Institute at Minneapolis. It is in order to place all my findings on a full scientific basis that would impel me to take this step. The medical men to whom I have presented these findings have unhesitatingly stated that they demand scientific investigation.

The fully trained staff of the institute is familiar with the presentation and the satisfactory treatment for the conditions. However, all other centers are not so fortunately situated, and I am most anxious that they should be in order that the results at other institutions may compare favorably with those obtained at the institute. It is acknowledged by all visiting medical practitioners that the results at the institute excel those obtained elsewhere. I have been frequently asked the reason why. The seven professors whom Dr. Fishbein refers to as top notch men made the following remark in the presence of witnesses, "Your results are excellent. No one could deny that." Major Stone and Major Erickson of the United States Army asked me in the presence of Dr. Todd of Washington in rather an accusing manner to please explain why the results were so much better at the institute than anywhere else in the United States. My reply is that the staff is more fully trained and understands the concept.

The foundation has refused any further assistance. That is quite immaterial to me. It also refused to take part upon my arrival, and both Mr. O'Connor and Dr. Gudakunst advised me to return to Australia. However, St. Paul and Minneapolis responded to the request of my government and a group of medical men, and I presented part of my clinical findings the first year and informed all concerned that it would take 2 years to present the full 30 years' clinical investigation. It is admitted by the foundation that scientific investigation had proved these findings correct and the newer type of treatment evolved for these findings had saved the United States from a national disaster. In this admission, it is acknowledged by the foundation that if I had taken their advice in 1940, the good people of the United States would have experienced this disaster. It may be that when some other country investigates my further clinical findings, the full conquest of the disease may be centuries nearer. However, it is necessary for the world to know what has already been accomplished.

It is most evident in the presentation of this evidence that those who have undertaken the supervision of the work and its expansion have failed the people. I am sure the gentlemen referred to as "top notch" members of the honorable profession of medicine would never have made the statements they did if they had known that scientific research had proved that in all of the years that had passed, the part of the human anatomy they had accepted as nonaffected by the disease and normal was the part severely affected and requiring all possible skill to prevent the development of all the gross and humiliating conditions which it was admitted was impossible to correct. Science has proven my presentation, which was the opposite to all previous concepts known to the medical world, to be correct.

The evidence produced here, which is not my own but evidence produced by scientific research, proves the economic and humane side of my work. The economic value can be measured by millions of dollars, but the humane value cannot be measured. Because of this gift, many young Americans can walk again, can play again, and the heart of motherhood made glad throughout the land. As explained by my country, I ask no personal gain, but I humbly ask the assistance of the people of the United States of America to give this message of healing to other lands and see that the wives and children of the men who gave their lives for my country and saved my people from slavery shall receive this gift in its entirety; and thus I shall feel I have in some way recompensed them for their gift of freedom to Australia.

Finally, it may have been noticed I have made no reference to a report presenting the activities of the Elizabeth Kenny Institute other than certain statements made in the presence of witnesses. Personally, I think the manager of this institute, Frank E. Harrington, M. D., should request the medical supervisor to furnish this report to be published in the medical journals. The medical supervisor, John F. Pohl, M. D., has had wide experience in this disease, before and since my arrival, and with his associations with the Harvard Crippled Children's Commission of the United States of America, and Harry Pratt, M. D., Manchester, England, and supervisor of the local crippled-children's school and various other activities. Furthermore, there has been a certain amount of publicity given to the dismissal of spastic patients from the institute by order of medical authorities. I wish it to be known I was not experimenting with these children. The reports of my work with this very sad disease are, to a degree, most encouraging. For instance, a report is contained in the book, entitled, "Report on the Elizabeth Kenny Clinic, Townsland, Queensland," compiled by the Queensland Government and contains the following statement, presented by Dr. James Vivian Guinane, M. D., F. R. C. S. (England). This gentleman was detailed to inquire into the end results of treatment in England and the continent, then becoming associated with the work in the clinic for 4 months, watching procedures, gathering evidence, and comparing results. In this report you will see, quote:

"SPASTIC CASES

"The results in this type of cases have been excellent. No other method I know of can approach it."

I have a written statement from the president of the American Congress of Physical Therapy, Miland Knapp, M. D., quote:

"To Whom It May Concern:

"This is to confirm my verbal statement that I would appreciate being shown a method of treatment that is effective in cerebral spastic paralysis.

* * * * *

"MILAND E. KNAPP, M. D."

This evidence states that physical therapy has nothing to offer. However, dermo-neuro-physical therapy has something.

Therefore, it is imperative that legislation should recognize this newer science and protect the technicians by law and the people from exploitation. If this protection were given, it would induce young medical men to become interested in physical therapy of the more advanced type and explain to young orthopedic surgeons how to deal with the bodily mechanics to avoid operations and keep the body straight.

I am sure that neither the National Foundation for Infantile Paralysis nor Dr. Fishbein was aware of the enormity of the action of placing a stumbling block in the way of the propagation of this newer science. Both had individual interests very near their own hearts. Mr. O'Connor, president of National Foundation for Infantile Paralysis, did not hesitate to tell me to always remember that he was president and treasurer of the institution known as Georgia Warm Springs, and Irvine McQuarrie, M. D., professor of pediatrics at the University of Minnesota, informed me that if I had the letters "M. D." after my name, all would be well.

Therefore, I would say that both the National Foundation for Infantile Paralysis and Dr. Fishbein were defending individual rights and not the common cause. If I neglected to present this to you, I would be breaking faith with the good people of the United States of America, and more especially with the men who died for my country.

Congressional Income

EXTENSION OF REMARKS

OF

HON. EMMET O'NEAL

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. O'NEAL. Mr. Speaker, the Evening Star of Washington, D. C., has commented on an expense allowance for Congressmen. I believe the viewpoint of the Evening Star is in line with the thinking and wishes of many fair-minded people throughout the country.

I ask unanimous consent to revise and extend my remarks, and include therein an editorial from the Evening Star, dated Saturday, May 5, 1945:

CONGRESSIONAL INCOME

Members of Congress will do well to vote themselves the $2,500 tax-free expense allowance recommended by a subcommittee of the House Appropriations Committee. In view of wartime wage controls, such a move might be criticized in uninformed quarters, but it would be nonetheless justified, and no fair-minded American would challenge it.

As matters stand today, Congressmen, unlike executives in the Federal agencies, must pay out of their own pocket for many facilities and services needed to conduct their official business. More than that, they are burdened with legitimate political and social expenses that cannot be avoided if they are to do their job well. Far more than any other group in the Government, they find that performance of duty imposes a heavy drain on personal finances—so much so that they stand a good chance of going into the red unless they have an independent income over and above their present $10,000-a-year salary.

The proposed expense account would offer a substantial measure of much-needed relief. Tax-free, because it would cover outlays directly incidental to office, it would have the effect of ridding many Congressmen of the sense of economic insecurity they feel now. It should be voted into being, and after that is done Congress should give serious consideration to an outright salary increase. The present $10,000 figure was fixed in 1924. Since then, particularly in these war years, living costs have risen so drastically (not to mention the expanded volume of work in the Senate and House) that fairness obviously demands some upward adjustment.

But it is not only for reasons of fairness that congressional compensation should be increased. For the good of the Nation as a whole, the legislative branch of our Government needs to be made more efficient, and men of outstanding ability ought to find it worth while, financially, to seek membership in it. To this end, impartial organizations like the National Planning Association recommended a salary of $25,000 a year. Perhaps this would be on the excessive side—particularly if a special expense allowance is made available—but no one aware of the facts will doubt that the present $10,000 is grossly inadequate. It is high time that Congress acted upon the matter.

Salary Increase for Members of Congress

EXTENSION OF REMARKS

OF

HON. JAMES M. TUNNELL

OF DELAWARE

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. TUNNELL. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a communication which I have received from John B. Glenn, president of the New York Board of Trade, recommending an increase in the salaries of Members of Congress. Since I have received so few communications of this sort, I should like to have it in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NEW YORK BOARD OF TRADE, INC.,
New York, N. Y., April 25, 1945.

Hon. JAMES N. TUNNELL,
United States Senate, Washington, D. C.

DEAR SENATOR TUNNELL: The directors of the New York Board of Trade unanimously favor an increase in the salaries of Members of Congress. The following resolution is an excerpt from the minutes of the meeting of the directors which was held on April 3, 1945.

"*Be it resolved*, That the New York Board of Trade supports in principle bills currently before the Congress designed to increase the salaries of Senators and Members of the House of Representatives; and be it further

"*Resolved*, That this opinion be presented to the President of the United States, and the Members of the Congress."

Very truly yours,

JOHN B. GLENN,
President.

A Scheme to Scuttle the American Merchant Marine

EXTENSION OF REMARKS

OF

HON. SCHUYLER OTIS BLAND

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. BLAND. Mr. Speaker, under unanimous consent to extend my remarks in the Appendix of the CONGRESSIONAL RECORD, I include therein an article prepared by Arthur M. Tode, honorary president, Propeller Club of the United States, appearing in the Marine Journal, April 1945, and discussing an article by Lewis W. Douglas, which appeared in the April 1945 issue of the Atlantic Monthly:

A SCHEME TO SCUTTLE THE AMERICAN MERCHANT MARINE—LEWIS W. DOUGLAS, FORMER DEPUTY ADMINISTRATOR OF THE WAR SHIPPING ADMINISTRATION, PROPOSES TO REDUCE OUR POST-WAR MERCHANT FLEET TO TEN MILLION TONS, LEASE THE REST OF OUR TONNAGE TO OUR MARITIME ALLIES AS A GESTURE OF ABNEGATION TO AID WORLD PEACE

(By Arthur M. Tode, honorary president, Propeller Club of the United States)

In the April issue of the Atlantic Monthly there was published an article by Lewis W. Douglas, formerly deputy administrator of the War Shipping Administration, entitled: "What Shall We Do With the Ships?" In this extraordinary defeatist argument against American sea power, it is seriously proposed that the American Merchant Marine, now the greatest in the world, which has cost the taxpayers more than $17,000,000,000, and which aggregates approximately 50,000,000 tons, be reduced in size to 10,000,000 tons; the balance, without distinction as to quality in speed or design, to be distributed on easy time payments or "irrevocable" leases, to our maritime allies that have suffered tonnage losses due to the war.

Specifically mentioned as beneficiaries of this scheme to give the merchant marine away are: "Great Britain, Norway, Holland, and other friendly countries that have been the traditional transporters of the products of the world."

Having thus disposed of more than four-fifths of our national tonnage on easy terms or by outright gift, Mr. Douglas seems to feel that we should also destroy our future capacity to ever rebuild our sea power, for he suggests that we might select one or two of our shipbuilding concerns "not for the purpose of building a large tonnage, but merely to determine how designs can be improved, operations reduced in cost, and construction itself accelerated," this scientific information, presumably, to be made available for the benefit of the foreign nations that will henceforth monopolize the ocean transport of the world while we will retire from maritime competition for which Mr. Douglas does not believe we are fitted, and devote ourselves to producing products which the ships we have given away can carry at a profit in American transport dollars to keep our allies satisfied and happy and prevent them from becoming angry with us as they might be if they thought we harbored any large-scale maritime aspirations.

This fantastic scheme to scuttle the American merchant marine is put forward by Mr. Douglas in all seriousness as a plan to assure future world peace "by reestablishing the market places of the world and a stable

medium of international exchange * * * which to endure, must have an international environment in which it can nourish itself, grow, and become the accepted order of mankind."

The very thought of this country having any nationalistic thoughts of maintaining the basis of vast sea power such as the ocean-going tonnage we now have would assure, is anathema to Mr. Douglas who declares that "The monopolistic practices that have been established under the administration of the Merchant Marine Act of 1936 and enjoyed by certain overseas operators should be eliminated."

Who is this Mr. Douglas? What background has he that would justify him to arrive at such extraordinary conclusions as to the disposal of American sea power in this period of world crisis? Let us see.

He served four terms in Congress as a Representative from the State of Arizona. He was Director of the Budget in the early days of the Roosevelt administration. He served two years as deputy Administrator of the War Shipping Administration. He was Chancellor of McGill University in Canada. All that one finds in this record is 2 years of governmental executive activity connected with shipping. Yet, Mr. Douglas suddenly appears upon the international scene as a shipping expert * * * a pundit descending with graven tablets of maritime wisdom from a Trojan horse * * * the same horse from which anti-American shipping propaganda has been distributed throughout the United States for the past several decades when it became apparent to foreign shipping interests that we intended to reestablish ourselves as a maritime power in the world.

All of these fantastic ideas about giving away the sea power of this country are not intended for some future date but right now. Mr. Douglas wants the United States off the seas at once. Just as poor Mr. Chamberlain took his umbrella and went to Munich to appease Hitler when a world war seemed imminent, so does Mr. Douglas demand that we here in America give away our ships to keep the maritime peace with the shipping nations abroad because, as he puts it: "Shipping touches the Allied maritime nations on their most sensitive spots, for it is the nerve center of their national life."

He says in this article in the Atlantic Monthly that we cannot hope to compete with the traditional maritime nations abroad because they can operate ships more cheaply that we can, and that we must make up the differential by subsidies which are a heavy drain on the public purse. But the figures he concocts to bolster his argument against subsidies are as misleading and fantastic as the rest of his article and quite in the manner of Alice in Wonderland.

In order that his subsidy calculations be as impressive as possible, Mr. Douglas magnanimously increases the total tonnage he actually wants us to have from 10,000,000 to 20,000,000 tons. In this connection, he says: "If, for example, there is to be an American merchant fleet of 20,000,000 tons * * * the cost to the country in operating subsidies alone will range between $200,000,000 and $300,000,000 each year, depending on the way the subsidy is calculated and the form it takes."

Recognized experts in the shipping industry are unable to follow the devious and serpentine calculations used by Mr. Douglas in arriving at these subsidy costs.

Mr. Stanley Ferguson, writing in the Journal of Commerce of April 9, puts it this way:

"During the 5-year period between the middle of 1937, when temporary subsidies began, and the middle of 1942, when they were suspended, total operating differential payments amounted to approximately $51,000,000, of which some $30,000,000 will be recaptured by the Government. The ultimate total cost for this period will thus be around $21,000,000 for 5 years, or a little more than $4,000,000 annually. Even if the shipping lines had not earned enough to justify any recapture, the cost would not have greatly exceeded $10,000,000 annually."

There is no intention nor has there ever been a desire on the part of this country to monopolize the sea carrying trade of the world. The Merchant Marine Act of 1936 modestly proposes that we carry in our own ships a substantial proportion of the trade originating in the United States or imported here from foreign countries serviced by American flag ships.

The ship-sales bill, upon which hearings were recently held in Washington, leans heavily in the direction of placing as few obstacles as possible in the way of acquisition by our maritime allies of such tonnage as they may require to make up the losses sustained through the war effort. The terms of sale to our allies are liberal in the extreme and our surplus tonnage can be acquired by them on generous terms. What more does Mr. Douglas want?

It is quite apparent from his article that he wants this country to eliminate itself entirely from the overseas trade and to leave this source of potential national revenue to our allies, who can in this way secure foreign exchange with which to buy our American products.

But how does this suggestion of Mr. Douglas square with the assurances from official governmental quarters that we must maintain an expanded national economy after the war to provide employment and avoid deflation? What will the maritime unions think of his demand that we whittle our American fleet to a paltry 10,000,000 tons?

In a brochure just published by the C. I. O. Maritime Committee the post-war program of the following marine labor organizations is briefly and effectively presented: National Maritime Union of America, International Longshoremen's and Warehousemen's Union, Marine Cooks and Stewards Association, Inland Boatmen's Union of the Pacific, National Marine Engineers Beneficial Association, International Fishermen and Allied Workers of America, American Communications Association.

These maritime unions represent many thousands of workers who derive their livelihood directly or indirectly from the successful operation of an American merchant marine. If Mr. Douglas has his way, most of them will be permanently on the beach. What do these men want from the maritime industry? They want adequate wages to keep themselves and their families living decently. They want an annual guaranteed income. Unemployment insurance. Medical care and education for merchant-marine veterans. Opportunities for advancement. Labor-management cooperation. A voice for labor. And these same unions concede that to gain these advantages American shipowners must make money out of the operation of ships. Shipowners want profits just as the maritime workers expect decent wages. Therefore, according to these maritime unions, "What the American people want * * * is a strong merchant marine. A fleet of merchant ships sufficiently large to carry a large part of our water-borne domestic and foreign commerce in peacetime, and to serve as an auxiliary to our Navy in wartime. * * * They want a sound program that will keep the merchant marine on a thriving basis all the time in peace as well as in war." Obviously, these maritime unions, and doubtless all other labor organizations connected with the sea not listed above, have endorsed the Merchant Marine Act of 1936.

What will these maritime workers think of Mr. Douglas and his scheme to give away the American merchant marine? If he has his way, there will be no work * * * no wages * * * no opportunities, and no voice for labor. It will be interesting to hear what officials of these maritime unions have to say about the defeatist observations of Mr. Lewis W. Douglas.

Mr. Douglas has done a disservice to the sea power of the United States in signing his name to this Atlantic Monthly article. There are no "special interests and superpatriots" involved in opposition to his defeatist views, as the once powerful advocate of American shipping * * * the New York Herald-Tribune * * * recently stated in an editorial. The only interests dangerously affected are those of the United States, the maritime industry which has built a great fleet of ships to save the Allied cause and has operated them efficiently with loyal union seamen thousands of whom paid the supreme sacrifice to keep the ships sailing through hostile waters.

But Mr. Douglas has not one word of praise for this modern miracle of maritime achievement. In the name of peace he would destroy the maritime industry that saved the Allied cause from certain defeat. In the name of peace he would repay the valiant seamen who went through hell to deliver supplies to the battle fronts by destroying their means of making a living. In the name of peace he would have this country give up its rightful place as a great maritime nation and return to a condition of impotency, leaving the sea carrying trade to those who are our Allies today during the war emergency but who may conceivably become our rivals and perhaps even our enemies tomorrow.

Address by Hon. Oscar R. Ewing at National Rally of the United Americans for United Nations

EXTENSION OF REMARKS

OF

HON. HARLEY M. KILGORE

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. KILGORE. Mr. President, I ask to have printed in the RECORD an address delivered by Hon. Oscar R. Ewing, vice chairman of the Democratic National Committee, at the National Rally of the United Americans for United Nations, at New York City on April 25, 1945.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

One week ago last Saturday I stood in the East Room of the White House. There before me was the flag-draped bier of one of the immortals. Franklin Roosevelt belonged to the ages.

Representatives of every nation—except two—had come to pay their last respects. A delegation from Congress, the Supreme Court, military and naval leaders, high Government officials, were all there. In addition, the hearts of millions of Americans and of other people throughout the civilized world were with us in that room that day. But nothing could adequately express what all of us felt.

Those of us who knew Mr. Roosevelt in life, realized how deeply we would miss this gay warrior. Those of us who want to see government used to bring the most happiness to the most people, knew we had lost a gallant leader. He had been the champion of the down-trodden, the defender of the

weak. He had used all the powers of government to prevent the exploitation of labor, of farmers and low-income groups. He had tried to improve the lot of each. He passionately hated racial and religious intolerance. He believed in the dignity of every individual, whatever his race, creed, or color. He was the champion of the exploited, the unfortunates, the victims of discrimination. He was their friend—and they knew it.

Mr. Roosevelt had qualities of heart and mind that few men have possessed. Combined with these, he had another quality that made him one of the great men of all time—the quality of political leadership which enabled him to translate into practical governmental action the sympathy and understanding that he had of the yearnings of his fellow men.

Socrates described politics as the greatest of all sciences. It is the art of government. Through it the ideals in which we believe are translated into accomplished facts. Politics in the proper sense calls for talents of the highest order. A political leader must attract a following that can win elections. The motives of the various members of that following will include every human impulse, from the basest selfishness and greed to the noblest qualities of idealism and service. The leader cannot change the nature of these men but he can direct their action to the achievement of his ends.

Being a Democrat, Mr. Roosevelt used the Democratic Party as the instrumentality for the accomplishment of his ideals. He recognized that party machinery could be used as a great constructive force for the causes in which he believed—and the Democratic Party organization responded to his thrilling leadership to an amazing extent. In addition, Mr. Roosevelt was able to gather together many of the scattered political forces of our Nation, to reconcile their essential contradictions and, out of the sorry confusion, to create a political army that, notwithstanding the loss of an occasional skirmish—went from victory to victory in the struggle for a better social and economic order. This same political following gave enthusiastic support to Mr. Roosevelt's every effort to achieve military victory and a lasting peace. Seldom, if ever, has nature so combined heart and mind with political genius.

Mr. Roosevelt died at the height of his career. The social gains for which he fought had been advanced to new horizons. The military victory to which he contributed so much was definitely in sight. The fundamental structure of the peace organization that was to prevent future wars was clearly envisioned. He went back to lie on the bosom of his beloved Dutchess County with an unparalleled record of achievement. It is for us to finish his work.

At the funeral in the White House that afternoon there sat the man on whom Mr. Roosevelt's mantle had fallen. Harry Truman had not sought the nomination for Vice President. He had gone to the Chicago Convention last summer with a prepared speech nominating someone else. As the movement to nominate him gained momentum, he implored some of us who were urging his selection to desist. When, however, the convention spoke, he answered the call.

The new President assumed his duties with deep humility. To the newspaper correspondents he said: "Boys, if you ever pray, pray for me now." In his first speech to the Congress and the world, he closed with the words: "I ask only to be a good and faithful servant of my Lord and my people."

Yet there was no hesitation or indecision. Within an hour he announced that the San Francisco Conference would be held as scheduled. This was followed by a succession of decisive acts. There was no interruption of the public business. There was a specific pledge to continue President Roosevelt's policies.

Naturally, people wonder what manner of man our new President it. This is particularly true of millions who have a deep sense of insecurity in our modern civilization and who feel forlorn and hopeless without Mr. Roosevelt. To all of these, I can say: Be of good cheer.

President Truman has a record that speaks eloquently. In 1940, he said: "I believe in the brotherhood of man; not merely the brotherhood of white men, but the brotherhood of all men before the law. * * * I believe that in giving Negroes the rights that are theirs, we are acting in accord with our ideals of a true democracy." When the bill to abolish the poll-tax was before the Senate and its opponents were talking it to death, Senator Truman joined in an effort to shut off debate so that a vote might be taken. He voted against every effort to hamper the Tennessee Valley Authority and he tried to prevent the destruction of the National Youth Administration. The enlightened Murray-Kilgore bill to provide machinery for post-war employment has had Mr. Truman's wholehearted support and he opposed the removal of three employees from the Federal pay roll that the Dies committee had branded as Communists. Perhaps more important, is the fact that Senator Truman was primarily responsible for the Burton-Ball-Hatch-Hill resolution, a resolution intended to commit the Senate to a world organization for peace. Senator Truman arranged the dinner of the dozen Senators who planned the resolution and he picked the four who signed it. One of the first pronouncements of the new President showed his deep concern for the returning veteran. This is a record that no liberal, no victim of exploitation or discrimination, need fear. It holds every promise of a forward-looking future.

Never, in all our history, has a President needed the united support of this Nation as does President Truman. The crucial days for making the peace and creating a world organization to keep the peace are just ahead of us. Up to now, the United Nations have been held together by the danger of a common enemy. The defeat of Germany and Japan will remove this cohesive force. If, instead of making for a world peace organization, the selfish interests of each nation should become controlling, then World War No. 3 is as certain as the rising of tomorrow's sun. The most important contribution that the American people can make toward an enduring peace is to unite solidly behind their new President. If we do this, President Truman can accomplish the utmost possible in his dealings with foreign nations. If we fail him, if the feeling gets abroad that America is divided, then we have weakened our country's influence at the conference table. For our own sakes, for the sake of our children and our children's children let us uphold President Truman in his determination to carry out Mr. Roosevelt's ideas for a world peace organization. Let us help the President build a monument to Mr. Roosevelt more lasting than bronze or marble—one that can endure for generations to come.

A Square Deal for Postal Workers

EXTENSION OF REMARKS

OF

HON. WILLIAM LANGER

OF NORTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial entitled "A Square Deal for Postal Workers," together with a letter from William C. Doherty, president of the National Association of Letter Carriers, published in the Boston Daily Record of April 21, 1945.

There being no objection, the editorial and letter were ordered to be printed in the RECORD, as follows:

A SQUARE DEAL FOR POSTAL WORKERS

Many weeks have passed since the Post Office Committee of the House of Representatives concluded public hearings on a measure giving postal workers their first actual increase in pay in 20 years.

But, as Mr. W. C. Doherty, president of the National Association of Letter Carriers, points out in a letter printed elsewhere on this page, there is still no assurance that the measure will be approved.

It has not even been reported out of committee as yet, although there was no effective opposition to the measure in the public hearings and indeed an almost complete lack of any opposition.

Until the committee reports, the measure cannot be acted upon by the House of Representatives and the necessary approval of the Senate cannot be obtained.

Consequently, this important measure is as securely blocked as if the prevailing opinion in Congress opposed it—whereas, nearly the entire membership of Congress has expressed vigorous and seemingly sincere approval of it.

Apparently something is needed to stir Congress out of its apathetic mind about this matter.

If this session of Congress fails to act upon the matter of raising the salary standards of postal workers, as so many sessions have done before it, there is more involved than an injustice—although that should be sufficiently persuasive.

The stark reality confronting the postal workers of the Nation, if this measure fails again, is that they are not only going to be denied an increase in pay, but are actually going to suffer a drastic reduction.

They have been working during the past year under the temporary benefit of a "sop" tossed to them by Congress in the form of a $300 bonus.

This will expire at the end of June.

Then the postal workers will be compelled to exist on the basic wage scales established 20 years ago—the annual salary of $2,100, from which the withholding tax and retirement contributions are deducted, leaving a scant $1,500 as cash in hand.

As Mr. Doherty bluntly warns, the postal workers cannot exist decently on this inadequate wage and they are not going to try it much longer.

They are weary of 20 years of promises by Congress.

They are fed up with public expressions of sympathy.

In short, if this last appeal for justice is futile, many of them are going to seek the chance to live decently in other fields.

And if they do that, as Mr. Doherty emphasizes, the whole vital structure of postal service—already impaired by the war—is going to suffer.

This is inevitable.

The issue is no longer the simple one of whether or not justice is to be done for the postal workers.

It is whether or not the United States mails are going to be moved expeditiously according to the high traditions of the Postal Service, or even be moved at all—of whether or not there is going to be any postal service adequate for the needs of the country.

If Congress is not to be persuaded by considerations of justice to the postal workers in this matter, at least it can be persuaded by prospect of a disastrous failure of the postal system itself.

It is up to the American people to perform the duties of persuasion in this latter respect.

Though they have tried honorably and conscientiously, the postal workers have apparently failed in their efforts to be persuasive in the former respect.

Every American citizen conscious and resentful of the protracted injustice against the postal workers—and if not of that, of the imminent collapse of the whole postal system—should write his Congressman, and demand that the people performing such vital service to the Nation be allowed to live and support their families according to American standards—and no longer according to the condition of near-serfdom they have so long endured.

POST OFFICE PAY BILL

WASHINGTON, D. C., *April 3, 1945.*

Hon. WILLIAM RANDOLPH HEARST,
San Simeon, Calif.

DEAR MR. HEARST: On behalf of 63,000 members of this association, and an additional 15,000 letter carriers in the armed services of our country, I desire to express my deep appreciation for your personal interest in their welfare. The numerous feature articles and special editorials appearing in the Hearst newspapers have had a wholesome effect in focusing public attention to the plight of the Nation's postal workers.

The House Post Office Committee concluded public hearing on H. R. 2071, the postal reclassification bill, on March 27. On that date many Congressmen appeared before the committee pledging support of the measure when it reaches the floor of the House. Each and every Representative expressed words of high praise for the excellent work being performed by letter carriers and other postal employees throughout the war emergency. Encomiums liken to a litany permeated the atmosphere in the committee hearing room.

Prior to the present series of 3-day recesses, there was no indication to when the Post Office Committee would report H. R. 2071. Nor was there any way to foretell when the House of Representatives would vote on the measure, which will authorize a $400 permanent salary increase, true time and one-half overtime, and other benefits long overdue.

Slightly less than 3 months remain before the present $300 temporary increase law expires. Unless the seventy-ninth session of Congress moves to bring about speedy enactment of the reclassification measure, the so-called temporary bonus will be taken away from letter carriers and other postal workers. They will be compelled to exist on the basic pay scales established 20 years ago. If that comes to pass their $2,100 annual salary will actually amount to exactly $1,575 after 20 percent withholding tax and 5 percent retirement contributions have been deducted.

Manpower shortages within the postal service are already acute. Management is finding it practically impossible to recruit needed personnel on the present outmoded pay schedules. Existing critical conditions are no longer a matter affecting letter carriers and postal employees alone. It is definitely in the public interest that H. R. 2071 be enacted into law without further delay.

The expeditious handling of the United States mails is essential in either peace or war times. V-mail, business letters, and other mailings simply must go through. The people of this great country can decide the issue through the process of making known their desires to the Members of Congress. Let it be said that the very future of the postal service and the fate of its personnel now rest with the Seventy-ninth Congress.

You are to be highly commended for your personal interest in the welfare of the postal worker and the service he renders to the American public. The crusade conducted by your newspapers stand out like a beacon light. Every citizen should be grateful for the magnificent manner in which you have sounded the warning. There still exists a grave danger—the development of an inferior postal system.

Again expressing profound thanks and with every good wish for your continued success, I remain,

Very truly yours,

WILLIAM C. DOHERTY,
President, National Association of Letter Carriers.

Light Metals Industry in the West

EXTENSION OF REMARKS
OF

HON. HOMER D. ANGELL

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. ANGELL. Mr. Speaker, hydroelectric power developed in the Columbia River in the Pacific Northwest has made a great contribution to the winning of the war. Over one-third of the aluminum needed in this great struggle was produced in this area alone. Gov. Earl Snell, of Oregon, before the Governors' Conference at Reno recently, made a most interesting address on the light metals industry, setting forth many of the basic factors and problems involved in this most important industry. The address is worthy of consideration by all of us concerned with these problems and postwar development, and is as follows:

THE LIGHT METALS INDUSTRY IN THE WEST

These are very busy days in the office of Governor in any State. The presence at this conference of nearly all of the Governors of the 11 Western States is indicative of their appraisal of the importance of this gathering and of their interest in the questions and problems to be considered.

One of these questions is the future light metals industry in the West. I was assigned that topic. It seemed that the extra time necessary to prepare even this brief discussion simply was not available. Yet, I realized that the great importance of this industry to the future development of the West suggested the burning of a little more midnight oil on the part of all of us. It has a particular application to my own State of Oregon.

A unanimity in thought and action is necessary on the part of the Western Governors in connection with some of these problems if we are to obtain the results desired. Hence, the primary purpose of this conference.

And so, for the purpose of our discussion, I submit these few thoughts for consideration and subsequent action.

It seems to me that in any discussion of industrial development there are certain fundamental questions that must receive early consideration. Indeed, the retention and further development of the light metals industry in the West is no exception.

Three of the more important questions which come to mind and which I would list for early exploration and analysis are these: Raw materials, cost of manufacture, markets.

Magnesium

In discussing the light metals industry, aluminum properly occupies the spotlight position, but the impotrance and utility of magnesium is not to be minimized. Even though lighter than aluminum, the tensile strength of its alloys is practically the same as that of the best steels. Apparently its most practical use and is greatest commercial value are derived from being alloyed with other metals, principally aluminum.

The ore or raw material for magnesium is found in each and all of the 11 Western States. However, there was no production whatever of light metals here prior to the war. Now, several large plants are operating in a number of our Western States producing a major portion of the Nation's magnesium capacity. The use of magnesium may be expanded considerably in the postwar period.

Beryllium

Beryllium is another light metal, but its total use is very small.

Aluminum

In the manufacture of aluminum during this war emergency period, the West has established records which are the envy of the entire Nation. Our case has been proved. However, the retention and continued operation of these plants is a question not quite that simple in its solution.

In my approach to the question I shall follow the steps previously outlined; namely, raw materials, cost of manufacture, and markets.

Raw materials

Bauxite is the accepted raw material for aluminum manufacture. From bauxite comes alumina. Alumina is then processed with electric power into aluminum.

The known supply of high-grade bauxite ore in this country is very limited. The greatest reserve of bauxite, known and potential, lies in the State of Arkansas. There are scattered deposits in some of the other Southern States, but the supply is either very small or the quality deficient. Large quantities of bauxite ore have been imported from Dutch Guiana.

The question of costs will be discussed a bit later, but I think it is timely at this point to mention that the manager of one of the Northwest aluminum plants recently made the statement that the costs of manufacture of aluminum at this particular western plant were so low that the raw material could be shipped to the West from Arkansas, processed here, and the finished product shipped across the continent again to the East, all at a cost less than the like aluminum product could be processed in the East. However, the need for a bauxite or alumina plant in the West is obvious. According to Admiral Emory S. Land, Chairman of the War Shipping Administration, transportation savings from such an installation would total about $13 per ton of aluminum.

Materials other than bauxite from which alumina may be extracted offer promise here in the West.

Alunite is found in some of our Western States and large deposits of alumina-clay have been discovered in Oregon, Washington, and Idaho.

An alunite reduction plant is located in Utah, and through the facilities of the Defense Plant Corporation, the Columbia Metals Corporation, and the Chemical Construction Corporation are constructing and will operate in Salem, Oreg., a four and one-half million dollar alumina-from-clay reduction plant. The economic success of this process has not yet been determined, but if successful, it should open the door to a great development. An experimental plant also has been located at Laramie, Wyo., where large anorthosite deposits appear.

Recently extensive deposits of iron-bauxite have been discovered in Oregon. Some of the tests show the alumina content to be nearly 50 percent. It is estimated to average about 35 percent and the iron content 25 percent. Eastern officials are now making additional tests. This discovery is cause for much optimism and encouragement.

Cost of manufacture

Electric power represents a big item and major classification of cost in the operation of a light metals industry. The West has the biggest block of cheap electric power to be found any place in the Nation.

The 11 Western States possess 66.7 percent of the potential water power of the United States. Washington, Oregon, and California alone have over 50 percent.

The ultimate rated capacities of the bigger hydro installations are as follows:

	Kilowatts
Grand Coulee Dam (Washington)	1,620,000
Boulder Dam (Arizona and Nevada)	1,322,000
Umatilla Dam (authorized) (Oregon and Washington)	690,000
Bonneville Dam (Oregon and Washington)	518,000
Shasta Dam (California)	375,000
A grand total of	4,525,000

To be added to these figures are the capacity ratings of the plants of the private utilities, both hydro and steam as well as many smaller hydro installations under public ownership. And, there yet remains in the West a tremendous amount of undeveloped water power, a great never-ending source of cheap electrical energy.

Likewise is the West rich in the expendable items which are used for power development, for fuel and for industrial production—coal, wood, gas, and oil. Coal is found in all of the 11 Western States, the chief producers being Colorado, Wyoming, Utah, Montana, and New Mexico. Gas and oil are found in California, Colorado, Montana, New Mexico, Utah, Washington, and Wyoming. Substantial drilling operations are now under way in Oregon and I understand in some of the other States as well.

Twenty-three million tons of coal annually are produced in the West, as well as 25 percent of the crude petroleum supply of the Nation.

Three-fifths of all wood produced in the United States comes from the Pacific Coast and Rocky Mountain States.

Labor

Another item to be considered under the general heading of "Costs of manufacture" is labor. The availability of a stable and dependable labor supply is important to the success of any industry. In the West we have just that. The western spirit prevails. On the whole, labor relations in the West have been very satisfactory. The men—and women, too—have been cooperative and understanding. They are definitely interested in the development of new industries in the West and can be counted on to cooperate and assist to the fullest extent.

I take pride in pointing to the fact that during this emergency, labor relations in Oregon have been outstanding in the Nation.

At this point it should be mentioned that the most favorable and desirable climatic conditions prevail in the Western States. Such is an asset of great advantage when measured in terms of costs.

Taxes

The next subhead I would include is that of "Taxes." The Western States have adopted the usual and accepted forms and methods of levying and collecting taxes.

Partly because of our limited population, no doubt, we find that the average per capita tax in the 11 Western States is $48.57, as against a national average of $42.58. The per capita tax runs from a low of $34.95 in Wyoming to a high of $75.74 in the State of Washington. The per capita income, however, of residents of the 11 Western States totals $1,069, as against a national average of $1,031.

Several of the Western States are now undertaking thorough studies of their tax structures with a view to improving the systems and providing greater incentive to prospective industrial development.

One item of great importance and one that gives rise to considerable concern is the large block of federally owned lands in the 11 Western States. The Federal Government now owns nearly 50 percent of the total area of lands in these Western States—47 percent to be exact.

Such Federal ownership runs from a low figure of 26 percent in Washington to a high of 78 percent in Nevada. Obviously those lands are not on the tax rolls.

There is a bill now pending in Congress which is designed to remedy this situation as far as the question of taxation is involved. The proposed law would provide that the States be reimbursed by the Federal Government in amounts equal or nearly equal to the loss in taxes sustained by the States on account of such Federal ownership. Such a law would be very beneficial in further distribution of the tax load in these Western States and would, in effect, broaden the tax base to a considerable degree.

Recent reports indicate that passage of this proposed law this year is quite likely. We western governors should give unanimous support to the measure.

Transportation

The Western States have access to all modern forms of transportation—rail, water, highway, and air. Barges, ships, and tugs operate on the inland waters and streams while oceangoing vessels ply from the ports of the coastal States. Transcontinental railroads and truck operations serve practically all of the main cities of the 11 Western States. Thus is assured dependable transportation at low cost. The States likewise are served by transcontinental air lines, which service is to be extended and improved in the postwar period.

Markets

The subject of markets and foreign trade undoubtedly will be discussed extensively at another period during this conference. However, I wish at this time to call attention to a few items which I deem pertinent and which have particular application to this subject of light metals.

Looking out over the broad Pacific toward the Orient—China—Russia, we can visualize a postwar potential market in the light metals field of tremendous proportion. Then, too, we can anticipate a vast amount of business from the Americas alone—21 nations with a population of 250,000,000 people.

Let us for a moment, however, give consideration to the possibilities of our own western division and to the Nation as a whole. In our 11 Western States we have a population of 15,000,000 people. Inclusion of the western territories and possessions adds another seventeen million for a grand total of over thirty million and, in my opinion, the West is on the eve of a great growth and development. However, with our very low cost of manufacture in the light-metals field, together with the advantage of excellent transportation facilities, we are placed in a favorable competitive position in the markets of the East.

The low production costs of aluminum here in the West give rise to the likelihood of greatly expanded use of this light metal. Consideration is now being given to its use in the building of trains, trucks, busses, boats, various building materials, irrigation pipe, and an endless number of appliances, utensils, and gadgets. Here lies opportunity for the development of untold numbers of small business concerns. Include also the necessary numbers of small plants, shops, and foundries turning out castings, forgings, and the like.

With proper development there is real opportunity in this western light-metals field to provide for the economic rehabilitation of large numbers of our returning veterans.

Aside from a considerable use of aluminum by the aircraft industry, a big potential field for expanded use of the product rests with the automotive industry. It has been predicted that if and when the cost of aluminum is lowered and there ceases to be virtually a monopoly of the product, there then would develop a wide-scale use of this light metal in automotive equipment. Lighter-weight equipment obviously means longer life for our highways.

Last month the circuit court of New York handed down its Alcoa antitrust decision, which may have far-reaching effect in the disposal of the Government aluminum plants and the future of the industry in the West. In discussing the question of plant disposition, the court said that the disposal agency "may well believe that it cannot do so without some plan or design for the industry as a whole, some comprehensive model which shall, so far as practicable, reestablish free, independent, private enterprise, discourage monopoly, strengthen small competitors, foster independents, and not foster monopoly or restraint of trade."

The Western States have an unusual interest in the program of disposition that will be adopted by the Surplus Property Board.

Another policy of Government of vital interest and concern to the future of the industry in the West, and to the industry as a whole, for that matter, is the one having to do with the American subsidized Shipshaw aluminum plant in Canada.

In 1941 the United States Government loaned without interest to the Canadian Aluminum Co. $68,500,000. This money was used in the construction of the power dam at Shipshaw and the adjacent aluminum ingot plant. Not only was the money loaned without interest, but the obligation was to be repaid by the sale of aluminum to the United States Government. Furthermore, the price at which it was sold is higher than the price paid for aluminum to firms in the United States.

The amount of aluminum involved in the Canadian deal totals 1,370,000,000 pounds, with 245,000,000 pounds to be delivered in 1945.

There is just cause for all of us who are interested in the postwar development of the light metals industry in the West to view this entire transaction with considerable alarm and much concern.

Conclusion

In developing this discussion I have attempted to point out the great possibilities for future development of the light-metals industry in the Western States and yet at the same time to focus attention on the obstacles to be met and those things that need action now and in the future.

Briefly, then, may I summarize with the following statements and suggestions:

1. The 11 Western States should become actively interested in the development of a plan for the disposition of aluminum plants by the Surplus Property Board that gives promise of a long-range, systematized program of development of the light-metals industry in the West.

2. The future success of the industry strongly suggests a suspension or settlement of the Shipshaw Canadian aluminum contract.

3. A bauxite or alumina plant, properly located, should be constructed in the West.

4. The Government should render assistance in making available to the West low-cost raw materials, particularly from foreign countries at least until local sources and methods have been proved.

5. It seems highly desirable for the Government to create emergency stock piles of aluminum as well as exercise care in the disposal of surpluses, if any, following the war.

6. The Western States should conduct surveys for future markets both here and abroad, as well as surveys looking to the location of light-metal plants, shops, and factories.

2. Through the medium of advertising and through the facilities of appropriate agencies, both public and private, we should "tell the Nation" of the great manufacturing advantages of the West.

8. Some of our educational institutions should establish courses in the light metal fields and promote research in new uses and processes.

9. The Western States should review and analyze their tax structures with a view of offering every possible inducement to future growth and development. Immediate support should be given to the bill providing for payments in lieu of taxes on federally owned lands.

10. This conference, by resolution, should provide for the creation of a select and qualified committee, appointed by the Governors of these 11 Western States, to pursue actively all phases of this question so important to the future welfare and development of the West. In unity there is strength. The time for action is now.

Justice for the Postman

EXTENSION OF REMARKS

OF

HON. WILLIAM LANGER

OF NORTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial entitled "Justice for the Postman," published in the New York Daily Mirror of Saturday, April 28, 1945.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

(From the New York Daily Mirror of April 28, 1945)

JUSTICE FOR THE POSTMAN

This should be the year the postman gets a break. If it is, it will be the first year in the last 20.

Your postman hasn't had a raise since 1925. His wages were substandard long before anyone ever heard of the Little Steel formula.

He has held his family together, and maintained his dignity as one of our best citizens and highest types of public servant, only by dint of the most stringent personal economy.

Now the Burch bill, sponsored by Representative THOMAS G. BURCH, of Virginia, has been reported out with the unanimous approval of the House Post Offices and Post Roads Committee.

The Burch bill would immediately raise postal base pay from $2,100 to $2,500, grant time and one-half overtime based on a 40-hour week, and give an opportunity for workers in large cities to be upgraded to $3,000 a year—$2,700 in smaller cities—over a long period of years.

These benefits, adding up to nothing more than plain and simple justice, would cost the Government annually only about one-third of the present year's $100,000,000 postal profits.

If the bill does not pass by June 30, the date when the present annual emergency bonus of $300 expires, the average postman will have exactly $1,575 left to live on after taxes and retirement fees.

No more good men would go into the service; thousands would leave it; the general public would suffer. This must not happen. Congress and President Truman should quickly approve the Burch bill, against which no voice can be raised.

Bretton Woods Proposals Essential to United States Trade

EXTENSION OF REMARKS

OF

HON. HUGH DE LACY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. DE LACY. Mr. Speaker, under leave to extend my remarks, I include the following series of five articles on the Bretton Woods monetary agreements for economic security, soon to be presented to this body for ratification, which I wrote for the Seattle Star and which were published serially on April 24, 25, 26, 27, and 28, 1945, in that fine Pacific Northwest newspaper:

[From the Seattle Star of April 24, 1945]

"ADOPTION OF BRETTON WOODS PLAN WILL MEAN PROSPERITY FOR SEATTLE"—HUGH DE LACY

(By HUGH DE LACY, Congressman, First District)

WASHINGTON.—As representatives of the United Nations gather today in San Francisco to forge the political bonds of world peace, many of them will be casting anxious eyes toward the Nation's Capitol.

For here in Washington, Congress will be making the same choice as that confronting the delegates 3,000 miles away, but in another field.

Here, in hearings before the House Banking and Currency Committee and later on the floor of Congress, we will decide between international collaboration in the economic field and the age-old system of economic isolation in which each Nation, weak or strong, is plunged into ruthless competition with every other nation in a dog-eat-dog fight for international markets.

That is the question posed by Bretton Woods—Once only the name of a little resort in the New Hampshire hills, but now designating agreements reached by 44 United Nations for economic cooperation toward world peace and prosperity.

The main issue before Congress, of course, is peace or war, international cooperation, or economic isolation.

But to us in Seattle it means that and much more. It means the difference between prosperity and depression, between the opening of a Pacific era of trade and development and the closing of our gateways to the Far East and the Soviet Union—the difference between 100,000 jobs and 100,000 unemployed.

Why?

Because Seattle's postwar prosperity is largely dependent upon trade across the Pacific, and because the Bretton Woods proposals are the means of bringing that trade to our shores more quickly. The point about the Bretton Woods proposed international monetary fund and the international bank is that they will speed up the time interval between the ending of the war and our reaching the ten billion foreign trade level we need.

Some idea of the importance of foreign trade to our Nation's prosperity can be gained from the fact that last year alone we sent over fourteen billions in lend-lease goods across the seas. Last year Government purchases for the war, including lend-lease, amounted to ninety billions, or half the national income.

That means that if we are to keep employment at last year's high level, we need a domestic market for seventy-six billions of goods beyond what was consumed here at home in 1944, and foreign trade of at least fourteen billions.

Because of the vast pent-up need for consumers' goods after the war, economists look for an eight billion home market after final V-day. That means we must have—and can have—a $10,000,000,000 foreign market. Such a market, the United States Treasury Department says, means 3,000,000 industrial jobs and 1,000,000 farm jobs.

In the Puget Sound area, where we had 466,488 jobs as of last June, and where we have a 500,000 share of the 60,000,000 job program, nearly every fifth job depends directly upon foreign trade. That means 100,000 jobs.

That is our stake in foreign trade, and in the passage by Congress of the Bretton Woods agreements.

[From the Seattle Star of April 25, 1945]

BILLION DOLLAR TRADE WITH CHINA IS SEEN IF BRETTON WOODS PROPOSALS ADOPTED

(By HUGH DE LACY, Congressman, First District)

WASHINGTON—More than $1,000,000,000 a year in foreign trade with China alone is within the grasp of the Pacific coast after final V-day. And, according to the United States Treasury, you can figure $1,000,000,000 in trade as equal to nearly a half million jobs.

China's postwar plans, realization of which mean ever-increasing millions in trade to us, are great. Here are but a few: A 100,000 miles of railroads, calling for 20,000,000 tons of steel; a 1,000,000 miles of highway; power plants capable of producing 20,000,000 kilowatts; 80,000,000 telephones; 1,000,000 new homes a year; 32,000 cotton looms; 16,000 woolen looms; 94,000 silk looms; thousands of river and canal boats, and eventually 10,000,000 of oceangoing shipping.

And Seattle's share in it is great—not alone in shipping.

Our new light metals industry, for which the Washington congressional delegation has been fighting, can provide thousands of miles of aluminum wire. Our shipyards can easily produce the thousands of river boats China needs. And we can share in her needed 10,000,000 tons of oceangoing vessels. Our prefabricated homes can be built and shipped to China cheaper than from anywhere else in the world.

Assistant Secretary of Treasury Harry D. White, who went over the Pacific picture with me, told the woeful story of prewar trade with China.

In 1928, he said, Chinese imports amounted to $859,000,000. But by 1937, they had dropped to $167,000,000. The devastating effect on our Northwest lumber industry, he summed up:

"In 1929 imports of lumber alone amounted to $13,000,000, while paper and paper products accounted for $23,000,000. In 1938 lumber exports had been reduced to $6,000,000, and paper to $13,000,000."

Approximately 40 percent of all China's lumber came from the United States and this drop came because:

"The principal difficulty," White said, "is that, prior to the war, China was not able to obtain the foreign exchange needed to purchase more supplies in the United States."

Thus, our billion-dollar trade picture, has an "if." I'm precluding some other "ifs"—winning the war, establishing a solid security organization for world peace, and stabilizing the internal political situation in China. Those preconditions for stable trade must be realized, too, but on these, at least, a good beginning has been made.

The answer to the biggest "if"—obtaining of foreign exchange—is contained in the Bretton Woods agreements, signed by 44 United Nations, and now before Congress here for ratification.

That's the job of the proposed international monetary fund, the first half of the Bretton Woods agreements. That fund's particular value to any community as de-

pendent on foreign trade as Seattle is that it will require member nations—all 44 of them—to fix their currency at a definite and single value in relation to the United States dollar.

Try to think of yourself selling lumber or ships or aluminum or prefabricated houses to China if you discovered that the Chinese dollar was worth 10 cents less one day than it was another. You'd say, "Now, look here, friend, I want to be paid in United States dollars." And if China had no dollars, you'd lose the business and China would lose the goods.

The idea of the fund is simply that any nation which becomes a member, under the safeguards and conditions laid down for membership, may put its own money into the international pot—called the fund—and take out dollars or pounds or rubles or francs or kronen to pay the business of whatever country it is doing business with.

Now, if China had sold some antimony to the United States, it would have some unused dollar credits. Then, of course, there would be no need of going to the fund. But, the day when she was caught short without dollar credits, the fund would be there. China's obligation—and that of all nations—would be to hold her money at the agreed-upon rate of exchange and to keep in the fund her original quota deposit.

It is so simple you wonder why the world went on for years, with each country rigging its currency, depreciating it, and international bankers playing all kinds of tricks with exchange rates, and each nation out to beat every other nation in what became an economic struggle for survival and ended in shot and shell and dive bombers and death.

But, of course, that was back when we were isolationists in everything. Down in San Francisco today and back here in Washington, we hope to write finis to that chapter of world history.

[From the Seattle Star of April 26, 1945]

"ADOPTION OF BRETTON WOODS PLAN WOULD OPEN UP TRADE WITH RUSSIA," DE LACY SAYS

(By HUGH DE LACY, Congressman, First District)

WASHINGTON.—Across the Pacific—2,000 miles closer to Seattle than any other large United States port—the Soviet Union today is seeking to buy $10,000,000,000 in United States goods when the war ends.

Marshal Stalin told Eric Johnston, president of the United States Chamber of Commerce, that his nation could use $10,000,000,000 in American credit to rebuild and develop the Soviet economy. Johnston said he thought all the United States could loan Russia was $2,500,000,000.

But the desire for $10,000,000,000 in business is there. That means unprecedented trade through the port of Seattle, tremendous orders which can be filled in the Pacific Northwest, and thousands of jobs for workers and new profits for new industry.

Seattle is the natural port through which much of the ten billion will flow. From San Francisco to Hawaii to Midway to Wake to Tokyo is 6,920 miles. From Seattle via Dutch Harbor the distance is only 4,800 miles. All distances to China, Japan, for eastern Russia and even to European Russia shrink when you follow this great circle route across the top of the world.

Much of the $10,000,000,000 will be put into the Russian Far East—our closest Pacific neighbor. When Secretary of Commerce Henry Wallace discussed our Pacific future in relation to Bretton Woods with me, he pointed to his speech in Seattle last July after his return from the Soviet Union and China. He said then:

"Soviet Asia during the past 15 years has more than doubled its population. Russia, as a result of her experience with this war, will certainly shift much of her industry east of the Urals. Most of the people who moved to Siberia with their factories will stay there."

Into this developing section will go much Northwest goods. Assistant Secretary of Treasury Harry M. White told me he expects tremendous orders from Russia for our aircraft. Northwest aluminum, produced with low-cost public power more cheaply than anywhere in the United States, will be in demand. Steel, too, including high grade stainless steel, which can be made in Seattle's electric furnaces. Machine tools from our prospective tool industry. And an entire fleet of fishing vessels, which could come from our shipyards.

But Stalin asked for credits—long-term loans. For, with the tremendous reconstruction and industrialization job ahead of the Soviets, they simply haven't the cash to buy what they need.

That is the exact function of the international bank, the second half of the Bretton Woods agreements and counterpart of the international fund which I discussed yesterday.

The purpose of the bank is to safeguard and encourage "international investment for the development of the productive resources of members, thereby assisting in raising productivity, the standards of living, and conditions of labor in their territories."

This is done simply.

If Russia needs money to buy a million pounds of Pacific Northwest aluminum, its representatives go to a private banker. They both go to the international bank. The bank investigates. If the proposal is sound for the entire Siberian development, the bank says to the private lender, "Go ahead, we'll guarantee the loan."

Many a Seattle homeowner knows how that works. For it was the Government which guaranteed to private banks the F. H. A. loan on his home.

The bank also can lend money of its own—up to 20 percent of its capital. This is largely reserved for loans too big for private investors, or loans which the private bankers don't want even under the guaranty.

Without the bank not only Russia but every Pacific country—torn by war, needing reconstruction and developments, urgently requiring American goods, American industry, and American know-how—would find it harder to get credit and dollars to buy what they need and what we need to sell.

The bank helps erect a bridge of international cooperation into what can be a great, prosperous Pacific era.

[From the Seattle Star of April 27, 1945]

HARD PEACE TERMS BASED ON BRETTON WOODS PACT WOULD AID SEATTLE, NORTHWEST INDUSTRY

(By HUGH DE LACY, Congressman, First District)

WASHINGTON.—Revelations of cruelties and barbarism carried out by Japan and Germany have brought the realization in Congress that these nations must be deprived of the power to war. The tools of warfare must be stripped from their grasp. Production of electric-toughened steel for tanks and armor plate and tank-piercing shells and of light metals for air warfare must be taken from them. Without these metals no nation can wage modern warfare.

Under a system of import quotas to guard against stock piling of these vital metals for another war, Japan and Germany could obtain stainless steel, aluminum, and magnesium for her peacetime economy from the United States, turning the great wartime arsenal which we have built for the United Nations into a guaranty that the peace will be kept.

In the Pacific Northwest we have invested more than seventy million in aluminum plants alone. In Seattle we have two electric-furnace steel plants. New magnesium plants are also war created.

From these plants should flow much of the alloy steel and light metals which the defeated Axis Powers must not be permitted to make—at least until they have demonstrated an abiding will to peace and freedom.

Its prospects increased by a tough peace and its path cleared by adoption of the Bretton Woods agreements, Seattle's foreign trade can be like a great snowball, rolling ever larger. For as China and India and the Soviet Far East expand their internal economy and become more and more industrialized, this industrialization itself creates even greater markets.

You can't build even a $500 house for a Chinese whose income will not total that in his lifetime. You can't provide him a telephone or electric light. You can't sell him an American stove or a pair of pants.

But raise the living standard of China and India—of the millions who can't buy—and you have founded a new market.

As Donald M. Nelson, who as personal representative of the late President Roosevelt went to both China and the Soviet Union to help with plans for industrialization, told me:

"A sound international plan which contributes to China's financial stability would be an excellent thing for us, as well as China. As China develops, our trade with her is bound to benefit, just as our trade with Canada and Mexico has grown with the progress of these countries."

Nelson spoke knowingly of Canada. For as Canada's industry grew from 1900 to 1929 our exports to her also grew. During these years her national income increased 4.5 times and her manufacturing facilities 8.1 times. Her imports jumped 7.8 times.

Charting national income and imports of every nation shows that imports jump as national income jumps and falls when income falls.

Bretton Woods provides the means for our Pacific neighbors to buy from us now the equipment and tools and machines they need to expand their economy. That means immediate trade, and as their economies do expand, the snowball grows.

The framework of commercial interchange and investment provided by the Bretton Woods agreements can mean billions in trade for Seattle, growing trade, new industry, shipping, jobs, and greater prosperity.

[From the Seattle Star of April 28, 1945]

SEATTLE'S BANKING LEADERS HAVE URGED BRETTON WOODS RATIFICATION, DE LACY SAYS

(By HUGH DE LACY, Congressman, First District)

WASHINGTON.—Many Seattle business and banking leaders join dozens of civic organizations, clubs, and most Seattle labor organizations in urging Congress to ratify the Bretton Woods agreements for international cooperation in the economic field.

When I first began a study of Bretton Woods, nearly 2 months ago, I sought the advice of bankers and businessmen. I found opposition, of course. But the opinion of the American Bankers' Association, representing largely the view of large international bankers in the East who have long controlled foreign trade and foreign exchange, is not shared by many local financial and business figures.

The Seattle Star, through its columnist, Samuel Grafton, and its own editorials, has added greatly to the clarity of Pacific Northwest thinking on Bretton Woods.

Three main reasons are offered in support of the agreements reached by 44 United Nations which Congress is now asked to approve:

1. Even if the agreements are not all we would like, they represent the effort of 43

other nations and the United States, and if we believe in international cooperation, we must demonstrate it now.

2. To amend Bretton Woods in Congress, is to destroy it, since it means calling together again all 44 nations and saying: "We will take nothing but this." Such is the pathway of "reservations" which wrecked the last peace.

3. Expanded international trade, promised more quickly under Bretton Woods, means more jobs and greater Northwest industry.

On the last point, W. B. Greeley, secretary-manager of the West Coast Lumbermen's Association, said:

"Here in the Pacific Northwest, we are all anxious to resume trade with China as soon as possible, both to restore old outlets for west-coast lumber, pulp, and other products, and to build up future economic relations that should be of benefit to both countries.

"But it is impossible almost to start in this direction until some commercial stability is placed over Chinese exchange. Even if it remains terribly depreciated, there must be at least some bottom ratio between Chinese and American dollars on which trade can be conducted before trade will get on any but a wildly speculative basis."

It is this function of the Bretton Woods international monetary fund which Greeley approves, although he points to its imperfections, adding: "I assume imperfections will appear in any plan for financial stabilization of the world that is now offered; that amendments and revisions will be necessary from time to time; that the nations will have to work out ways and means by trial and error * * *. But certainly we should make a start; we should not fail to try."

Recalling ancient oppositions to other important steps in banking, Jay G. Larson, vice president of the Seattle First National Bank, joined many other officers of that bank in approval of Bretton Woods.

"I am mindful of the fact that much of the progressive legislation affecting banks, domestic and international finance, has met opposition from bankers and certain economists; the Federal Reserve Bank, the R. F. C., the F. D. I. C., etc., yet they have all worked, in my opinion, beneficially," he said.

"Certainly we are a part of the world," he added. "We shall be engaged in world commerce and trade. Without it our position would be extremely precarious. If we can contribute to the stabilization of currencies, it certainly will facilitate such trade and minimize the risks involved * * *. Certainly we have spent much more than this for the purpose of stabilizing the world politically and socially, and have sacrificed the lives of many men for this purpose. The cost in dollars is small compared to that."

E. I. Wallberg, assistant manager of the Bank of California in Seattle, speaking personally, summed up many local banking views:

"1. The fund, as proposed, was devised by technicians of 30 different countries, and has been approved by representatives of 44. The present plan, therefore, is already a compromise plan.

"2. It is a constructive step forward, but if a plan so overwhelmingly approved by the Conference is further modified or rejected, international distrust will arise, and the well-intentioned results of world collaboration will be irretrievably lost.

"3. Without the fund, the postwar world will return to the chaos of depreciated and manipulated currencies, thus setting the stage for renewed social, political, and trade dislocations on an international scale."

Ira W. Bedle, vice president of the National Bank of Commerce, said he was inclined to agree with Edward E. Brown, chairman of the First National Bank of Chicago, when Mr. Brown said: "The plans are not perfect * * * but represent * * * years of study by different national interests to bring about the result which all the united and allied nations desire."

Such views are not universal but a majority of Seattle business and banking leaders seem to agree. And agreeing with them are the vast number of men and women of labor. Two examples sum up labor's views:

Hope Lodge, 79, International Association of Machinists: "The Bretton Woods proposals, organized into an institution for universal accord, can win the peace and keep it."

Painters' district council No. 5: "The Bretton Woods proposals are necessary to world economic stabilization and postwar reconstruction."

Most of us in the Puget Sound area look to the better days ahead under Bretton Woods.

Universal Military Training

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. CELLER. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following address delivered by me over station WEAF of the National Broadcasting Co. Saturday afternoon, May 5, 1945:

Is universal military service feasible in the United States? Is it needed? Is it democratic? My answer is an emphatic, unequivocal no to these questions.

I view with apprehension—with justified apprehension—the proposals to introduce into the United States a system of universal military training in peacetime. I admit I am shocked by the loose thinking that has characterized the proposals to date. We are told that it will be a blessing, an enrichment in education and in health. Let us examine these statements more closely. A year's military training is not education in the accepted sense of the term. Quite frankly, it is sheer, unabashed indoctrination for military purposes. No broad cultural base in education is provided, as I understand it; only knowledge that will have a direct bearing on the brutal business of fighting is to be included in the curriculum. I can't be confused on that point because the War Department in a recently distributed circular states, "There will be no place in a sound universal military training program for activities that are nonessential to the task of preparing our young men for combat." Beyond peradventure of a doubt, it will be education for military purposes.

Military training is uniquely remote from education in its cultural and humanistic implications. As proposed by the War Department, it is not even vocational education or training. The type of mechanical proficiency required to repair a howitzer does not necessarily qualify a man to repair an automobile. Assembling and dissembling a Garand rifle will not enhance one's knowledge of the intricacies of a radio set. Knowledge as to the operation of a 150-millimeter gun—its artillery range, its fire control, its damage potentiality—is useless except in defensive or offensive action in a war.

It is further stated that when this year of military training has been completed the training is ended. Maj. George Fielding Eliot, a recognized military authority, told the House Military Affairs Committee recently that 2 years of service would be absolutely the minimum in order to train the modern soldier. No one of equal or higher authority has arisen to contradict him; at least, not to my knowledge. Major Eliot's statement is completely understandable in the light of the high degree of specialization required in our Army today. Judging by the rapidity with which destructive mechanical devices are being planned and perfected, such a brief and limited period of training could not be effective. I would be mandatory to retain men to use the new weapons.

As the educators of our country know well, a year's interruption in the normal progress of study—assuming only a year will be required—must result in a marked decrease in future attendance at higher institutions of learning. Take a lad away from his school for 1 year at the age suggested and mark then his reluctance to return. He is confronted with a sudden and drastic change in his living habits and aside from that, a diversion is created which may color his mental attitudes for years to come. What will he learn under this suggested program that a vocational or professional school could not teach him more quickly and more thoroughly—other than the dubious usages attendant upon war? We have seen evidence a plenty of the military system in the depravity of the Hitler youths of tender age. Their insensitivity to their brutal occupation casts a chill over one's heart and one hopes and prays that it "won't happen here." It is stated that "Graduate trainees would then be free to continue their further education." And, I say, "yes," they might be free, but would they continue their education? It is the answer to this question that should engage the very serious attention of every thoughful citizen.

The talk about the increased health of our youth is just as hollow. Let's remember that only the physically fit will be selected for training. It has been ascertained that only 830,000 out of 1,250,000 who reach the age of 18 are mentally and physically fit for service. The unfit are not acceptable in the Army and therefore do not receive the innoculations and the cures nor are they the beneficiaries of the elaborate health programs inaugurated for those who do make the grade. Moreover, it is a pretty sad commentary on the state of this Nation when we appear to choose the Army as an instrument to cure our social ills. Let's admit frankly that our public health services need mending badly—many children of 5 as well as adults of 50 should receive remedial care. Why only lads of 17 and 18?

It is that angle of it which disturbs me—this tendency to shy away from essentials and giving us instead so much eyewash about health and education.

It is stated that the military security of the Nation must be placed first and not last, and that all conjectural fears should not be permitted to obscure the issue. I object to the phrase, "conjectural fears." If we as the most powerful country in the world desire to start a race among the nations of the world for bigger and better armies, for feverish expansion in the instruments of war, then by all means let's have universal military peacetime training. But let us also keep in mind the possible outcome if we embark upon such a course. Undoubtedly we will cultivate an atmosphere of distrust among our militarily weaker neighbors to the south of us and inspire them to rivalries and jealousies among themselves. The axiom developed in the past 25 years is that modern technical warfare has made stronger nations stronger and weaker nations weaker. If this is what we want, then by all means let's have peacetime militarism. And if we desire to make absolutely certain that all proposals for the establishment of an international organization for peace will fail, then let's pass the military training bill now. Let's not wait until the deliberations at San Francisco are concluded. Let's not wait until "Johnny

comes marching home" with millions of his buddies.

The structure of a durable peace can only stand firm, and this is neither naïveté nor wishful thinking—when the people—all people everywhere—believe and trust and hope and pray it will stand firm. Encourage a tentative approach—vacillation in any of its forms—an indolent view of practicable international harmony—then, upon the slightest disagreement—poof! down it comes, smashed into irretrievable atoms. You cannot build a huge machinery of war—involving men and machines—and then not search, consciously or unconsciously—for some way in which to use it. As the military monster is swollen and perfected, the temptation likewise becomes more enticing. "Preparedness" is a paradox. We prepare for combat—in order to keep the peace—which ultimately develops into war.

You may cultivate the constructive attitude that a durable, reasonable, sane peace is possible, that an organization for peace is something that can be mad to work—or you may cultivate the dubious attitude, loaded with distrust and suspicion. Then the game begins again—all over the world. "Oh, you don't trust me, eh?" "Well, I don't trust you." The well-worn chip is adjusted on the shoulder and some other nation, anxious to throw its weight around in a contest, will somehow manage to find a way to knock it off. We can always find an enemy, if we concentrate.

I should like to ask the proponents of this legislation this question. Against whom are we arming? Peacetime conscription brings with it the full panoply of war, including now, I assume, the robot projectiles. Will these implements of complete devastation be aimed at our present allies? Does it mean that we will shake hands with them but have a bodyguard hovering in the background? We have decisively defeated Germany, and when we defeat Japan will we start out after them again? The Big Three agreed at Yalta that the Reich must be disarmed, demilitarized, and dismembered, and that the United States, Russia, England, and France would occupy Germany indefinitely. Is the Crimea agreement a mere scrap of paper so soon? If so, why are we going through the motions required to set up international machinery for an organization to keep the peace? If such a reversal of policy is possible at this stage of the proceedings, then let the delegates return to their homes. We are dedicated to the proposition of abolishing war in our time. War must not be accepted as inevitable, as the cynics say. Dr. Margaret Mead, a noted anthropologist, stated: "So long as we believe that war is a part of human behavior, we only tackle it sentimentally. We didn't get rid of the buggy until we had the automobile. War is an invention. We must substitute another."

If we are going to embrace the incredible and inhuman concept that war is inevitable and we must, therefore, bow to the inevitable, I can't see the effectiveness of universal peacetime training. When will this third war for which we will be training our youth break out? In 5 years, in 10, 15, or 20? Assuming any period of time to be a logical one, in view of the swiftly changing techniques of war you won't be able to use the boys whose training took place 5 years ago, 10 years ago, 15 years ago, 20 years ago. Those who have been trained will be too old, in many instances, and if their age is not held against them they will have to be retrained. Immediate use could only be made of the men then in training when the newer holocaust breaks out and they will be in the 17- and 18-year-old brackets, hardly sufficient in number for a fighting army. For manpower, we will have to use the identical process of our present Selective Service System—and retrain.

We are warned that the safety of the United States should never again be imperiled by defenses extemporized in the shadow of imminent danger. I presume the imminent danger is that which culminates in the so-called sneak or sudden attack. Of all the misnomers in military history, the sudden attack stands supreme. The technique of modern war requires years of preparation, the conversion of peacetime manufacture, and the diversion of raw materials for war purposes; it all takes time.

Our American resources were so great the conversion was comparatively rapid, and we had a foot hold as a result of the lend-lease program. Both Germany and Japan gave the powers that be ample notice of their intent. Hitler did not sneak up on France, Britain, and Russia. He gave full warning, as evidenced by the set-up of the Reich factories. The whole world knew about his attempts to establish ersatz rubber for military purposes, and it was no secret that Messerschmitts and Dorniers were rolling off the assembly lines. We heard about the conversion of automobile factories to the manufacture of tanks and the change-over from fertilizers to explosives.

Intelligent appraisals of the exports and imports of a suspect nation and of its manufactured products will reveal any inimical plans. A war can be stopped in the making—before the deaths on the battlefields—if we have the international peace structure dedicated to that purpose, alert and aware, that in this era, war does not come overnight. War is one coming event that casts its shadow before. This one lesson we have dearly bought.

If we must keep our youth in everlasting training, why not our farmers, our manufacturers, and our shipbuilders, etc. In order to fight successfully, our men will need the weapons of war. Must they stand around and wait while the industries are activated to a war emergency? If we have universal military training, the inescapable conclusion is that forever and a day, our economy must be geared to war.

Proponents of this legislation dismiss as the lightest straw in the bundle of arguments presented against the proposal the suggestion that there is a danger of the establishment of a military dynasty, or a professional hierarchy. Have they forgotten, even before this horrible war ends, the Junkers of Germany and their satellite military cliques or the military caste that holds the Japanese people enthralled? I am opposed to compulsory military training because it is duck soup for the hereditary military caste. It makes the professional soldier top dog, career colonels, who demand blind obedience—not thoughtful acquiescence. I prefer volunteers first, with suitable inducements of pay, living quarters, and rank, supplemented by scholarships, and, if necessary bonuses. If the proposals at San Francisco prevail, we will need our Regular Army and as well, an international army for police purposes, to which we would have to make our contribution of manpower. If volunteer methods fail to fill our quota, then we will have to conscript. We would have no choice. It will be the price we will have to pay for domestic and international security. But, for goodness sake, let us not glamorize any idea of military conscription.

Military conscription is hardly a new idea. It has been utilized by a number of countries after Machiavelli first proposed it in his famous work, The Prince. It was used by French revolutionists to preserve the benefits of the revolution but Napoleon seized upon it to advance his imperial dreams. Said he, "I can afford to expend 30,000 men a month." Such utter disregard for the sanctity of human life is the very antithesis of democracy. Avoidance of onerous military service was one of the primary causes motivating millions of immigrants who streamed to the United States from Europe. Prussia under Bismarck, Germany under the Kaiser and under Hitler, used conscription for the entrenchment of militarism and to achieve the so-called Lebensraum. The czars used it in Russia despotically. Hirohito and Franco find it a useful tool. The dead, degraded Mussolini ruled Italy with this device. The Argentinians, under Farrell and Peron, feel the impact of its heel. England and the United States, without conscription, were the victors in World War No. 1 and are clearly destined for victory in World War No. 2.

The Negroes fear the democracy of compulsory military service. They know it will spread Jim Crowism. Visit any camp or replacement center and notice how the Negroes are segregated and socially ostracized. It has been charged that even in the European theater of combat operations and in certain points in the Pacific, Negro soldiers are segregated. We believe we are fighting the theory inculcated by Hitler that he and his ilk are the Herrenvolk, the master race, and that we are resisting his efforts to overcome the Sklavenvolk, his version of the inferior races. Let us remember that Jim Crowism is nazism—just another twist to the Hitler depravity.

And remember this. Peacetime conscription must lead to the surrender of much of the liberty for which we have fought and sacrificed. Our democracy is founded on the principle that the State serves the people and this fundamental must not be perverted to any concept that the people serve the State. Military peacetime training is a distortion of this basic principle of our government. It will insist upon the dedication of 1 year or more of the lives of our youths for no useful purpose, as far as I can see. A constant stream of malleable minds will be placed under the tutelage and discipline of professional officers who necessarily bear the military cast of mind. With them, it is a business. The habit of wearing a uniform. Physically, easily develops the habit of wearing one, mentally.

To my mind, the question before the American people today is this:

Does universal military training involve perpetual conscription?

Taking all of the factors into consideration, the logical answer seems to be in the affirmative. I strongly doubt that the American people desire to endorse a potential menace and such an obvious delusion. We would gain mighty little and lose much—too much.

Principles of the Turners

EXTENSION OF REMARKS

OF

HON. SAMUEL A. WEISS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. WEISS. Mr. Speaker, the tragedy of Pearl Harbor forced America to suddenly call its youth to arms only to find that millions were physically unfit for military service. This disclosure of the physical unfitness of our youth was shocking to the American public. As a step of correction and in protection of the future youth of America, I introduced H. R. 2044 for the promotion of physical fitness.

The American Turnerbund seeks this same goal, and as part of my remarks I am happy to include the Principles of the Turners:

PRINCIPLES OF THE TURNERS

The American Turnerbund is a federation of Turner societies in the United States of

America, organized to promote physical education and disseminate rational ideas, in order to advance the health, happiness, prosperity, and progress of mankind.

It is the principal duty of our societies to provide courses in physical training for youth and adults, and also to promote their intellectual growth and moral character through special schools, instructive lectures, and stimulating debates.

Believing in the United States as a democracy in a republic, established upon the principles of freedom and equality, dedicated to justice and humanity, we recognize in the harmonious education of body and mind the most important factor to preserve and perfect such a democracy. Therefore, we seek to train the citizen for the efficient discharge of all his duties toward the community, also showing him how to live his own life in a wholesome and rational way, with happiness as its proper goal.

Man's highest function is to think, and his noblest service to proclaim the truth as he sees the truth. Conduct should be based on reason and knowledge, and these can be attained only through liberty, the first of all human rights, not to be denied by bigots nor abridged by censors. We hold, therefore, that the state has the paramount duty of protecting the individual in the exercise of those fundamental rights guaranteed by every liberal constitution—the right of free speech, free press, and free assembly. Conversely, we hold that the state has no right, either by constitutions or laws, by multiplied prohibitions and magnified police powers, to impair any human right that does not diminish or destroy any rights of other human beings.

In matters of religion and conscience, especially, striving for the dissemination of a philosophy based on the ever-growing knowledge of natural forces, we demand freedom and tolerance in the broadest sense. Believing in the well-established American principle that state and church should be kept separate, we oppose any interference by sectarian bodies in political affairs. Attempts to debar the people from national amusement and recreation on Sundays, the employment of religious functionaries paid out of public moneys, the exemption of church property from taxation, and all similar tendencies to impose upon the state the support or recognition of any creed or denomination, we protest against with solemn and sincere concern.

As we oppose coercion in religious matters, so also we demand for every human being the right to use whatever language he prefers. All languages should be free to all people, and to make any language obligatory or to interdict any language is an invasion of human rights as would be the compulsion to accept or adjure any special religion. We recognize particulrly in the German language a social heritage of priceless value, worth cultivating and preserving.

Matters like these are implicit in the guaranty of mental liberty underlying the entire fabric of our civilization. Such liberty is the lubricant and dynamic of our material prosperity, to guard which is the primordial sphere of government. The state, with all its institutions and laws, defining rights and duties, is but a phase in the continuous evolution of society.

When economic conditions are such as to produce, by privilege and monopoly granted to special groups, extremes like the millionaire and the pauper, the centralization of political power in certain classes becomes inevitable. For these reasons we approve all measures to keep open the avenues to economic equality. Opportunity must be afforded every human being to secure, by his mental and physical labor, a decent and comfortable livelihood in accordance with the prevailing standards of civilization, and likewise to share in the opulent heritage of past centuries.

We favor social institutions and legal enactments that will secure to every worker the fruits of his toil and safeguard his life. Such legislation, putting human rights above private profit, is merely the practical modern application of the ancient commandments, "Thou shalt not steal" and "Thou shalt not kill."

In the full application of this principle we recognize a new extension of the doctrine of eminent domain, subordinating individual and corporate privilege to the general good. We hold that all natural resources, such as coal, oil, gas, ores, forest reserves, and water power, are primarily the property of all the people, and cannot be monopolized without injury to all the people. Wherever such monopolies through their exploitations, become unbearable, the Government should adopt measures of regulation and taxation to restore such property to its original and rightful owners, to all the people. We hold further that all public utilities—such as railways, interstate or municipal, steam or electric, and telegraphs, telephone, and radio—being in their ultimate development essentially monopolies like the mail service, ought to be and are subject to the same power of regulation and taxation, so that, whenever the exactions of such monopolies become intolerable, such property may be gradually escheated to its ultimate and rightful owners, to all the people.

To this end we favor direct participation by the people in affairs of government, through the establishment of the most far-reaching democratic agencies for political control.

The greater and more extensive the people's rights, and the more use they make of those rights, the greater will be the importance of clearly understanding cause and effect in relation to social and economic needs. We hold, therefore, that the State, representing the whole people, has the duty of furthering the intellectual enlightment of all by perfecting our school system, supporting scientific research, and vindicating the freedom of teaching against all gag laws.

As history reveals the gradual ascendancy of right over might among individuals, so it should prevail among nations and races. For this reason we favor the removal of all barriers to trade and travel between one country and another, as well as the abrogation of all inhuman immigration laws. And we favor the settlement of international disputes by judicial procedure. We hold that every war, except defense against invasion, is a crime against the law of nations, and should be outlawed by every nation; that overgrown military and naval establishments are a menace to our own liberties and the peace of the world; and that the power of conscription is a dangerous device of tyranny. Therefore we favor progressive disarmament, international arbitration treaties, and tribunals, the abandonment of all selfish discriminations and historic hatreds, leading to the ultimate fraternal federation of the world.

These Turner principles, briefly summarized, are as follows: Liberty, against all oppression; tolerance against all fanaticism; reason, against all superstition; justice, against all exploitation. Free speech, free press, free assembly for the discussion of all questions, so that men and women may think unfettered and order their lives by the dictates of conscience—such is our ideal, which we strive to attain through a sound mind in a sound body.

We are not a political party, obligating its members to any definite demands, but we urge upon them the supreme duty of independent thought and action—always to live as men and always to vote as citizens in harmony with the philosophy whose fundamental principles are here set forth.

Plans of War Department for Redeployment of Troops

EXTENSION OF REMARKS

OF

HON. WALTER G. ANDREWS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. ANDREWS of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement of the War Department, published in the New York Times yesterday:

PLANS OF WAR DEPARTMENT FOR REDEPLOYMENT OF TROOPS

(The text of the War Department's announcement on its troop redeployment plan was as follows:)

As the end of the war in Europe approaches, public interest is turning to the problems involved in defeating Japan and the size of the army required to accomplish this job. Yesterday members of the War Department General Staff appeared before the House Military Affairs Committee to discuss our plans in executive session fully and frankly.

The information presented has appeared in the press in partial and garbled form, therefore as it is of the most intense interest to every soldier and to our citizens generally, the following statement is released. The War Department desired to delay making any public statement in this matter until after several basic factors had been cleared with overseas commanders and the plan presented to the entire Congress by Admiral King and General Marshall.

The Joint Chiefs of Staff, after consultation with General MacArthur and Admiral Nimitz, have made a preliminary estimate of the troops and equipment needed to crush Japan in the shortest possible time and with the smallest cost in American lives. Similar calculations were made for the forces provided General Eisenhower.

Their estimate of the needs in Europe and Africa was quite accurate, the last division to arrive in Europe having gone into action on April 1.

ASK REDUCTION TO 6,968,000 MEN

Our Army is now 8,300,000 strong. Under the approved plan we are now engaged in working toward an Army strength of 6,968,000 a year from now. That will give us all the strength we believe we can deploy effectively against Japan and will also enable us to meet our occupation responsibilities in Europe and to maintain the necessary training and supply force in the United States.

Although we were able to hold to the plan we made for the war against Germany, developments in war are a matter which cannot be mathematically predicted with accuracy. Our best judgment is that we can defeat Japan quickly and completely with an army which a year from now will be 6,968,000. This figure is given to the American people with the assurance that they will be told later on of any changes that the progress of the war makes possible or necessary.

The Japanese have a military force of more than 4,000,000 men and many millions more men that can be utilized for service forces or for combat, if need be. The numbers we can deploy in the Pacific, with the limitation of shipping and base facilities, would not appear on the face of it sufficient to insure that preponderance which brings victory swiftly and with low casualties.

But the Japanese forces are divided. Some are in the home islands; some in China;

some in Manchuria. They have remnants of garrisons in many parts of the Pacific and the East Indies. Our control of the sea and the air makes it possible for us to keep these forces apart and to choose the time and place of our attacks. We have opportunity to strike with overwhelming power as soon as we get our bases established and our armies deployed.

SAYS MEN IN EUROPE MUST AID

It is our aim, together with our allies, to give the men under General MacArthur and Admiral Nimitz all the help we can give them just as rapidly as we can move it into the Pacific.

We can meet only part of the needs of this Pacific war from men still in this country. Many of the troops now in Europe must also go to the Pacific to take their places beside those who have driven the Japanese back from the threshold of Australia to the inner zone of their own defenses.

Every physically fit soldier in the United States who has not yet served overseas will be assigned to foreign duty when he completes his training or, if he is performing an essential administrative or service function, as soon as he can be replaced by a returning veteran. The War Department has been making a systematic and successful effort since the start of the war to get all qualified men overseas. There have for several months been no combat divisions left in this country and few smaller tactical units of any character.

Moving our forces from Europe to the Pacific involves the greatest transportation problem that has ever been undertaken in war. The distances are tremendous. From Europe to Manila by way of Panama is 14,000 miles. From San Francisco to Manila is 6,771 miles. And speed is essential, for it is vitally important that we do not give the enemy time either to rest or reorganize his defenses.

Consequently many troops will go straight from Europe to the war against Japan. As many as can be taken through the United States without reducing our pressure on the enemy will be brought through this country and given furloughs en route. Some must be given retraining after their furloughs, for fighting the Japanese is different from fighting Germans.

HALF THROUGH UNITED STATES

The need is particularly great for service troops to build the communications, harbors, bases, and airfields essential to sharply expanded combat operations. Many of the service troops will have to go direct to the Pacific to prepare the way for the full application of our ground and air strength.

More than half of the men to go to the Pacific will go by way of the United States. The proportion will be substantially lower than this among service units attached to air and ground operations, and higher among combat units. The great bulk of the combat units will be staged through the United States.

Still others of the troops now in Europe will have to remain there for occupation duty to make certain that the menace of Nazi aggression is permanently eradicated and that the seeds of a new war do not take root before this one is ended. The number assigned to this duty and the length of time they will be needed will depend on the situation in Europe and the nature of our international commitments. For a considerable period of time the actual number of our soldiers in Europe will exceed the requirements, due to limitations in shipping.

We are mindful of the desire in the heart of every soldier and every citizen to have as many of our soldiers as can be spared without diminishing the force of our blows against Japan to return to civilian life as soon as possible. The War Department fully shares this desire. The Department strongly urged the Congress to provide in the War Mobilization and Reconversion Act of 1944 that no one should be retained in the armed forces after he was no longer needed for the prosecution of the war. This requirement is now the law of the land, and the War Department will live up to it in every respect.

DRAFT CALLS AFTER VE-DAY

The reduction in the size of the Army from 8,300,000 to 6,968,000 represents a drop of a little over 1,300,000 in total strength. This will not be sufficient to permit the early discharge of all the men we consider should be returned to civil life as a result of their extended oversea and combat service.

Consequently, it is planned to hold Selective Service calls after VE-day at a level above that necessary to replace men lost through battle and normal attrition and thus make it possible to release more men with a record of long and arduous service. This procedure of releasing the maximum of veterans and their return to civil life will permit the call into service of those men who have heretofore been deferred for one reason or another.

We will at the same time continue to release men because of sickness, wounds, age, and such other factors which prevent their effective use in the service. During the last 12 months discharges from all these causes totaled about 450,000. It is expected that discharges of this kind, in addition to those made of men with long oversea and combat service, will result in the release from the Army during the next year of about 2,000,000 men.

With the exception of the men to be released for specific disabilities, those who will leave the Army in the next year will be selected from all parts of the world, the Pacific as well as in Europe, on the basis of impartial standards recommended by the enlisted men themselves.

The whole aim of the system that has been developed is to insure that those men who have been oversea longest and have fought hardest and those who have children, get first consideration in demobilization. That is the way our soldiers believe it should be and that is the way it will be, subject only to the continuing necessity of keeping in service until adequate replacements can be found those men needed to defeat Japan.

SHIPPING DECLARED A FACTOR

A preliminary survey made by the War Department on the basis of a one-sixth demobilization of the Army indicates that all but 2 percent of the men to be released will be men who have served overseas and that these 2 percent will be fathers who have been in the Army a long time.

About half of the 1,300,000 men who will be eligible for release from the Army due to extended and arduous service are now in Europe and about one-third are in the Pacific. Most of the others are now in this country, having been returned under rotation after serving full tours of duty overseas.

How soon the men to be demobilized can be brought home will depend on the availability of shipping and air transport after the requirements of the war against Japan are met. The transportation of those eligible for discharge must be considered in connection with the whole transportation problem. In the last war it took a year to bring back the 2,000,000 men in the A. E. F., with no problem to meet in the Pacific save for a small force in Siberia. Today we have the problem of moving out of Europe almost double that force, a large number of whom must be transported over 14,000 miles of ocean to the far reaches of the Pacific.

We must transport to the Pacific vast stores of equipment and supplies both from the continental United States and from Europe so that our forthcoming operations may be carried out in accordance with our standard practice of using ammunition, air power, and material to the utmost to save lives. The soldiers who fight Japan will have all the superiority in fire power and equipment we can provide, but it will impose a heavy strain on shipping to give it to them. The supply lines to the Orient are so long that it takes three cargo ships to do the work one was able to do in supplying our troops in Europe.

SEVENTY DIVISIONS IN EUROPE

We have about 70 combat divisions in Europe at the present time, exclusive of hundreds of thousands of combat troops assigned to corps and armies and a huge force of supply and service troops. It takes 15 Liberty ships to move the equipment of a single armored division. It takes 75 trains to move it to the port. That gives you some idea of the transportation problem we are up against.

First priority must be given to the troops and equipment going to the Pacific if we are to win that war in the shortest time and with the smallest cost in casualties. Otherwise, we must slow down the pace of our offensives and run the risk that the enemy will have an opportunity to reorganize for renewed resistance. We will not ask any American soldier to lay down his life in order that another American soldier may return home a few days sooner.

However, it is not the intention of the War Department to push demobilization to one side during the many months it will take to transfer our main strength from Europe to the Pacific. Demobilization will proceed at the same time as redeployment, although it will be necessarily secondary in terms of urgency. We will do everything that can be done consistent with the effective prosecution of the Japanese war to see that men eligible for discharge do get back home in the shortest possible time.

Every ship that can be pressed into service from any quarter will be used. Arrangements have already been completed for returning soldiers with long European service in converted cargo and grain ships. It is estimated that nearly half a million men can be brought home in such ships by the end of the year. Regular passenger ships and troop transports, including the famed British *Queen Elizabeth*, *Queen Mary*, and the *Aquitania*, will also be operating on a gigantic shuttle system.

There will be 800 transport planes assigned to this task. Fifty thousand men a month will be brought back to this country by air. To the maximum possible extent, these planes will bring men from combat troops in the very heart of Germany—men with the longest periods of combat service and most remote from the ports. This process will begin promptly after Germany is defeated.

It is our expectation that, by ship and plane, we shall be able to bring home from Europe all men to be discharged in about a year's time.

BUILD SURPLUS IN PACIFIC

Equal attention is being given to the problem of bringing veteran troops back from the Pacific at the same time that the mass movement of additional forces into that theater is under way. The War Department is now shipping to the Pacific every replacement for whom shipping space can be found. By this means a surplus of replacements is being built up there so that men of long service can be sent home. Naval ships are being used wherever possible to assist in the return of men from this theater. Unfortunately, while the fighting goes on, the rate of return of men from the Japanese war will be governed by the extent to which we can bring in troops above actual battle replacement needs. No man can be released until another man is available to take his place.

The main facts of the redeployment as far as it concerns manpower are that:

We believe that a program which gives us an Army of 6,968,000 in 12 months from now will provide an adequate force to defeat Japan.

About 2,000,000 men will be returned to civilian life during the next 12 months.

About two-thirds of the combat units will come through the United States and have furloughs.

The larger proportion of service troops urgently needed in the Pacific will go there directly.

Transportation shortages, even with the 800 transport planes being used, will not get the last of the men who are to be discharged back to the United States before 12 months.

The problems involved in transferring our strength to the Pacific and bringing home those men who are no longer needed are more complicated than any we have experienced before. We cannot expect every phase of our plans to work to perfection. We count heavily upon the American people to continue to meet with courage and understanding the tests that lie ahead, as they have worked, prayed and suffered for the great victories in Europe.

For some the end of the war in Europe will mean joycus reunion, but for many more it will mean a new period of sacrifice and anxiety. None of us can afford to relax our efforts until that anxiety is terminated for every American at home and abroad.

Our great mission today is to mass against our enemy in the Pacific the largest force that can be effectively employed with every resource and power we can put at its disposal. That process has already begun. It will not stop until we rid the world permanently of this menace.

Franklin D. Roosevelt

EXTENSION OF REMARKS

OF

HON. DANIEL K. HOCH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. HOCH. Mr. Speaker, I represent a district that has been outstanding in its support of Franklin D. Roosevelt.

The Democratic organization of this district—Berks County, Pa.—attended services in St. Matthew's Lutheran Church, Reading, Pa., when the pastor, the Reverend Dr. W. R. Siegart, delivered a very appropriate sermon, which I desire to include in my remarks:

On April 12, close to the anniversary of the tragic death of another American President, Abraham Lincoln, the entire world was shocked and bowed with grief at the death of President Franklin Delano Roosevelt. While many knew the state of his health and did not expect him to live through his fourth term as President, none realized that the end of his earthly labors was so nigh. With victory in Europe so near he was not permitted to see that goal achieved while he remained on earth.

Now a story can be told. It is more or less established that President Roosevelt did not want to run for a third term. Several people visited him and tried to talk him into being a candidate for that high office for the third term. He is said to have told them that he did not believe he would live through a third term, and that he would like to retire to his home in Hyde Park. One of the group, I believe from Pennsylvania, said, "Mr. President, others are called upon to sacrifice their lives for our country." After that remark silence fell upon the group. In a little while the President left without another word being spoken, but he was in deep thought. The next day he announced that he would be a candidate. Nor did he want to run for a fourth term, and had he considered himself alone he would not have done so. Truly, it may be said that he laid down his life for our country; but in a larger sense it may be said that he laid down his life for the world, for peace, amity, and good neighborliness among all the children of God everywhere.

* * * * *

The very principle enunciated in the Declaration of Independence upon which all our democracy, liberty, and freedom is based, "that all men are created equal," gets its start and power from the fact that there is one God who is the Father of all men, and that all men are children of God. So in keeping with our divine heritage, and in the spirit of our fathers through whose faith and sacrifice we are the heirs of such liberty and freedom, we meet for worship in the house of God, that from this worship we may thank and praise God, offer our prayers to Him, and receive strength, power, and courage to face the responsibilities which are ours, and faithfully to discharge them.

* * * * *

Born in the lap of luxury, he scorned the ease which such luxury would bring. All his life he never sought the easy way. Early he became a crusader and a fighter for the equal right and opportunity of all men. It is well said that he was a great humanitarian. He was more interested in people than in things. Is this not a basic teaching of our religion? Are we not taught that God is a Spirit, and that man is created in the image of God? Are we not taught the value of the soul? Are we not taught that man is of great value in the sight of God? Is it not true that things in themselves have no value except as they minister to the good of people? Thus this teaching seemed to animate his desire for men to the end that man, even the humblest citizen, might enjoy happiness in life as God intended.

From this belief which so permeated his being came the urge to have enacted social legislation of several types and kinds. I know from my own experience in mills and factories how necessary much of this legislation had become. When greed gains the ascendancy over sympathy and understanding, cruelty reigns. Much legislation is necessary to protect man from himself. When evil spirits gain the upper hand in a man's life results in agreement therewith follow. True it is that we argue the point concerning state and governmental oversight, but true it is also that we see that the state is the servant of the people, and not the master. For our Government is, as Lincoln so well put it, one "of the people, by the people, and for the people." Roosevelt's interest was in people, in men and women and little children, and the social legislation he advocated was the fruitage of his faith in man.

In looking at the life of Franklin Roosevelt we see that it was filled with drama. The play and interplay of forces, experiences, suffering, and joy make drama. But in peace and in war he was a man of action and a fighter.

One of the great crises of his life came when he was stricken with infantile paralysis. Truly here was an affliction to bow the strongest soul. But the spirit of action and the will to fight went a long way toward keeping him from becoming a permanent invalid. So well did he overcome this affliction, and so well did he enter normal life, that few thought of him as a victim of infantile paralysis. His interest in others who were suffering and afflicted was enhanced by his own experience. While we tell stories of others who have overcome handicaps of many kinds, let us not forget the struggle of a man of faith who rose to the highest office in our land from the depths of physical affliction. His fight against infantile paralysis explains much concerning his courage and willingness to face handicaps and opposition. There was a moral responsibility, a spiritual faith, and an intellectual vigor which would not permit him to remain idle and at ease, but which seemed to urge him on to greater endeavor.

True it is that after his overwhelming defeat as the Vice Presidential candidate, to which was added the physical affliction, Mr. Roosevelt rose to his greatest heights. It was after these crushing blows, either of which would have been enough to end the active career of any man, that he did his finest, noblest, and greatest work. Crisis after crisis seemed to mark his life, and he came to the office of President in a time of crisis; all through the years in that office one crisis seemed to follow another.

Immediately facing him as the Nation's Chief Executive was the economic crisis which had brought fear into the hearts of men. And when fear runs wild chaos rules. Then the Nation saw the man who had come from the depths of fear and suffering and who had risen to face life anew and to tackle the tasks with confidence, faith, hope, and action. From those days came that now famous statement of his, "We have nothing to fear but fear." The Nation rallied around him with new confidence, faith, and hope.

It is not our purpose, place, or function to analyze and evaluate all the legislative and executive acts of his career. Time and history will do that. Recovery, relief, reform, war, and peace all had their place upon the stage as the drama of his last 12 years was unfolded. But through it all democracy appeared in all its beauty, strength, and power.

Time will not permit us to go into all the outstanding characteristics of his life, but there are two more things about his life to which we should give time and attention. One of these is his desire for world peace, and the other is his faith in God; but must be considered together, for they cannot be separated.

Let me introduce the first by reading some of President Roosevelt's own words. On the 13th, the day after he died, he was to have delivered an address on the radio to the Jefferson celebration. That address, though written, was never delivered. Let me read to you about two-thirds of that address, the latter two-thirds:

"Today we have learned in the agony of war that great power involves great responsibility. Today we can no more escape the consequence of German and Japanese aggression than could we avoid the consequences of attacks by the Barbary corsairs a century and a half before.

"We as Americans do not choose to deny our responsibility.

"Nor do we intend to abandon our determination that, within the lives of our children and our children's children, there will not be a third world war.

"We seek peace—enduring peace. More than an end to war, we want an end to the beginnings of all wars—yes, an end to this brutal, inhuman, and thoroughly impractical method of settling the differences between governments.

"The once powerful malignant Nazi state is crumbling; the Japanese war lords are receiving, in their own homeland, the retribution for which they asked when they attacked Pearl Harbor.

"But the mere conquest of our enemies is not enough.

"We must go on to do all in our power to conquer the doubts and the fears, the ignorance, and the greed, which made this horror possible.

"Thomas Jefferson, himself a distinguished scientist, once spoke of the 'brotherly spirit of science, which unites into one family all its votaries of whatever grade, and however widely dispersed throughout the different quarters of the globe.'

"Today science has brought all the different quarters of the globe so close together that it is impossible to isolate them one from another.

"Today we are face with the preeminent fact that, if civilization is to survive, we must cultivate the science of human relationships, the ability of all peoples of all kinds to live together and work together in the same world at peace.

"Let me assure you that my hand is the steadier for the work that is to be done, that I move firmly into the task, knowing that you—millions and millions of you—are joined with me in the resolve to make this work endure.

"The work, my friends, is peace; more than an end of this war—an end to the beginnings of all wars; yes, an end, forever, to this impractical, unrealistic settlement of the differences between governments by the mass killing of peoples. Today, as we move against the terrible scourge of war, as we go forward toward the greatest contribution that any generation of human beings can make in this world—the contribution of lasting peace—I ask you to keep your faith. I measure the sound, solid achievement that can be made at this time by the straight edge of your own confidence and your resolve. And to you, and to all Americans who dedicate themselves with us to the making of an abiding peace, I say:

"The only limit to our realization of tomorrow will be our doubts of today. Let us move forward with strong and active faith."

"The work, my friends, is peace." That may well be said to be the President's last words to us. Certainly if we fail this time to do everything within our power to make and keep peace upon the earth, we can expect chaos. Here is one part of his great desire which should grip every American to the very fiber of his being and the depths of his soul, to strive mightily for peace on earth.

To this end we ought, every one of us, to pray God to lead, guide, and direct the Conference now being held in the city of San Francisco, to empower the representatives with His spirit, and to bring from that conference the blessings of world peace.

From a purely selfish purpose it becomes necessary for us to work for peace on earth. Here, for example, are the comparative costs of killing a soldier from the time of Julius Caesar until now:

In Julius Caesar's time	$.85
Napoleonic Wars	3,750.00
American Civil War	6,250.00
World War No. 1	26,250.00
World War No. 2	62,500.00

When we take the cost of the present war and see what could be done with it we are so startled that we wonder at the ways of men. For each of the 400,000 groups of 5,000 people throughout the world—and that means all the world without exception—the cost of the present war could build a school for $275,000, a church for $150,000, a hospital for $100,000, a home for the destitute for $50,000, a library for $50,000 and a park for $25,000. If the money then left over were put into an endownment fund the annual interest would perpetually pay the salaries for each of these groups of 20 teachers, 10 nurses, 2 physicians, 2 clergymen, 2 librarians, and 2 superintendents for the park and home.

The cost of the First World War would have bought the entire United States, lock, stock, and barrel, in 1885; and at the present time this cost would purchase all the United States west of the Mississippi River.

There are moral considerations involved also and these weighed heavily upon Mr. Roosevelt. Was he not a champion of good neighborliness? Was he not a champion of the rights of man? Listen again to those words which were almost his last:

"Today we are faced with the preeminent fact that, if civilization is to survive, we must cultivate the science of human relationships—the ability of all peoples of all kinds to live together and work together in the same world at peace."

Yes; among other things he was called a dreamer and a visionary. But sustaining and upholding him was a faith in God which was real. Listen again to the last words of his last address: "The only limit to our realization of tomorrow will be our doubts of today. Let us move forward with strong and active faith."

Not the faith of mere intellectual assent, but the faith that moves souls and governs life. Faith beset by doubt dies aborning. Faith by which men live and move and have their being, and which keeps God within the soul as an ever-present help, is real and true faith.

Do you believe in God? Do you believe in God's will and way? Then we recall our Lord's words, "Wherefore dost thou doubt?" We recall the words of God spoken to Moses, "Speak to the children of Israel that they go forward." The promised land of world peace lies before us. Are we able to go in and to possess it?

We cannot move forward along the ways of peace, justice, and righteousness without a living, moving, and ever-present faith in God. Our United States needs a solemn rededication to the God and Father of us all. It is not less religion we need, but more. Indifference kills. Recall the words of Holy Scripture: "Because thou art neither hot nor cold I will spew thee out of my mouth." We all need a high and holy rededication to our religion and our God. "Let us move forward with a strong and active faith." That means a responsibility which is laid upon each one of us to put faith into action and to live and labor as empowered by that faith.

We cannot have world peace without world consecration to God and the power and strength of the spiritual. This responsibility rests upon each of us. The strength of democracy is the strength of the people within a democracy. It recalls to our minds the words of another great President, Abraham Lincoln, "That from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion. * * * And that we here highly resolve that these dead shall not have died in vain. * * * It is for us, the living, rather to be here dedicated to the great task remaining before us."

Franklin Delano Roosevelt now rests with his fathers, and his soul has returned to God who gave it. The causes to which he gave his life have not all seen the blossom develop into fruit. Responsibility has been passed to us. It is for us the goal for which men have sought, about which prophets dreamed, for which men have laid down their lives, and the desire of the God and Father of us all—that men should live on earth as brethren, at peace one with another. We cannot reach the goal alone. We must journey onward in full faith, hope, and confidence, with the presence, strength, and power of God, to accomplish His holy will on earth.

The unfinished task is ours; may God grant that we be faithful to Him in the discharge of the responsibility He has placed upon us.

Give the People a Chance in Ratifying Treaties

EXTENSION OF REMARKS

OF

HON. ESTES KEFAUVER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. KEFAUVER. Mr. Speaker, under leave to extend my remarks, I include a thoughtful editorial of the Nashville Tennesseean of May 5, 1945. This editorial is typical of several other editorials of the Tennesseean setting forth in persuasive terms the reasons the House of Representatives should have a part in treaty ratification. The editorial under the title "Assert for the People," follows:

ASSERT FOR THE PEOPLE

If there ever was good reason to amend the Constitution to authorize ratification of treaties by a majority of both Houses of Congress—and we believe that history and common sense argue eloquently for such an amendment—nothing has happened or is about to happen which can lessen the wisdom and the urgency of such a step.

On next Tuesday the House will once again vote on the proposed amendment and should and probably will give it a decisive vote of approval. Because the measure has been intimately associated with the names of two Tennessee Congressmen—first with the name of Representative PERCY PRIEST, who pioneered it in the House, and now with that of Representative ESTES KEFAUVER, who has given unstinted effort toward making it law—the people of this State have an added interest in its fate.

Despite the treaty provisions of the Constitution, the House is bearing a larger and larger responsibility in our foreign policy. Bretton Woods must come before both Houses. The decision on our membership in the United Nations food and agriculture organization has already won the House endorsement (295–25). Reciprocity agreements, which are in effect economic treaties, depend on House legislation. So do lend-lease, U. N. N. R. A. agreements, and every appropriation for foreign activities.

Members of the House served on the American delegation to the Chapultepec Conference and others are now at San Francisco. If it is the course of wisdom to have these popular Representatives at conferences out of which treaties grow, then it is equally wise that they should have a voice in ratifying the treaties.

Since the days of James Madison, who himself pointed out the inconsistency in our organic law which gave the House a share in declaring war but no voice in ending it, writers have insisted that the cause of democracy would be served better if the almost unworkable Senate ratification provision were altered. On more than one occasion House action has been required when the ratification machinery broke down. Texas was brought into the Union by a House sponsored joint resolution. When the Senate refused to make peace with Germany in 1919, the war had to be called off 2 years later through the same device.

In the beginning of our Union, Senators were chosen by the legislators and were in a sense official delegates of their once independent States to the central governments. Hence it was considered logical that the 26 officials should sit as a sort of advisory council to assist the President in forming treaties that would be agreeable both to the Union and to their own States. The arrangement never worked as intended, and it has remained illogical, cumbersome, and largely unworkable since the day George Washington retired rebuffed and angry from the Senate Chamber.

Objectors point out that House approval would be useless now since the Senate Judiciary Committee has announced that it will not approve any amendment to the Constitution during the war. Others insist that ratification could not be effected in time for action on forthcoming peace treaties. The ratification can be obtained in time to give the House a share in treaty making. The people are white hot for such a step. Their gravest fears attach to the possible action of the Senate minority when the treaties come

up for approval. A number of State legislatures are already in session. The others can be called without loss of time.

As to the Senate blocking the amendment, there would be an accounting day for the obstructionists. It was once argued that direct election of Senators could never be achieved because the Senate was obdurate against the measure. In the end they bowed to the will of the people—as bow they will some day on the matter of 33 men, one-sixteenth of Congress, being able to throw a roadblock in front of the hopes and dreams and welfare of the mightiest nation on earth.

Not in some distant future when the welfare of the people does not turn on the ratification of an instrument of peace, but now when the matter is uppermost in the minds of the citizens the issue should be pressed. The Tennessean urges that the House do its duty as justice and reason dictate and let the chips fall where they may.

Profits and the Pacific War

EXTENSION OF REMARKS

OF

HON. LEON H. GAVIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. GAVIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Washington Times-Herald:

PROFITS AND THE PACIFIC WAR

It is using language rather loosely—and we've been guilty of it along with others—to talk about American fighting men retaking Malaya, Indochina, the Dutch East Indies, Borneo, Hong Kong, and Shanghai from the Japs and then giving them back to the British, Dutch, and French Governments.

True, political control of those places will go back to those Governments if such a plan is carried through. So will control of those places' defensive installations and various other things of a non-profit-making character—post offices, roads, schools, and so on.

But how about the tropical products of most of those places, the things out of which money can be made? There is a varied lot of this stuff over there—or was when the Japs came in, and they can hardly have carted it all away to Japan.

PRODUCTS AND THEIR OWNERS

In normal years before the war, the Dutch East Indies, Borneo, and southeastern Asia produced about 90 percent of the world's supply of rubber, 85 percent of its pepper, 65 percent of its tin, 30 percent of its copra (dried coconut kernels), and 17 percent of its petroleum.

The British, French, and Dutch Governments didn't own these profitable products or the farms, plantations, mines and wells from which they came. They were owned by private capital.

Royal Dutch Shell, for example, a British-Dutch oil company, was the chief peacetime oil operator in the South Pacific. Standard Oil of New Jersey also had big interests down there.

Tin ores from the Dutch East Indies were smelted for the most part at a big plant at Arnhem, Holland—a town much in the war news a couple of months ago. Private enterprise ran that smelter.

Far East rubber was controlled mainly by British and Dutch rubber monopolies—private enterprise again—which kept output low enough to keep Americans, their principal customers, paying plenty for rubber.

So if our boys take those places back from the Japs and restore them to their former owners, they will be doing the job chiefly for the benefit of the stockholders of the numerous private businesses that flourished in those richly productive areas before the Japs took them.

It may be all right and the best thing all around for our boys to do just that. We're not trying to pass judgment on the morality of it.

HELPING OUR COMPETITORS

The countries concerned—the United States, Great Britain, Holland, France—are all capitalistic countries up to this writing, though France appears to be moving rapidly leftward and Britain somewhat less rapidly in the same direction. In capitalistic countries, the government owns little or no profit-making property, and private business exploits such property to make profits for its stockholders and to help lift general living standards.

But if it is planned for our boys to do this big and bloody job primarily for the benefit of Royal Dutch Shell and others, we should all know explicitly that that is the plan. The former administration was highly secretive on the subject. It is to be hoped that there will be less secrecy about it from now on. It is a subject which needs to be thoroughly aired and widely discussed.

Another aspect of it which calls for discussion is the fact that by reviving British, Dutch, and French businesses in those Far East areas our boys would be bringing back to life some husky competition for some of our own industries.

We have built a big synthetic rubber industry under stress of war necessity—about $750,000,000 worth of same. Far East natural rubber in British-Dutch hands will be a competitior for our synthetic—unless, as seriously suggested by no less an economic thinker than Secretary of Commerce Henry A. Wallace, we should cut down our synthetic rubber industry to pilot plant size and take to paying through the nose again for Far East rubber.

The American people should be frankly informed on our ultimate aims in the Pacific war. The American people are paying by far the biggest part of the bill for that war; paying with their boys as well as with their money.

As for the strategic islands, with little or no economic value, which our boys have been taking at such cost in blocd, there should be no postwar cloud on the ownership of them. Iwo Jima, Saipan, Tinian, Peleliu, and any other of such places that we need to base our future far-Pacific defenses on—we should keep them as absolute owners, without any monkey business about international trusteeship. They are an economic burden to whoever owns them; but strategically they are indispensable to our future defense against aggression from the Orient.

A Just and Lasting Peace—Bretton Woods

EXTENSION OF REMARKS

OF

HON. JOHN H. FOLGER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. FOLGER. Mr. Speaker, the Atlantic Charter, the "four freedoms," the congressional resolution for a just and lasting peace, Bretton Woods and Dumbarton Oaks, all signify, we trust and believe, a fervent hope and a sincere purpose to have the nations of the world cooperate in bringing about such an understanding among the people of all nations as will make unlikely, if not impossible, another such war as what we call World War No. 2. Instead of conflicts we would have helpful cooperation; instead of differences, mutual helpfulness; instead of divisions, accord; instead of war, peace.

In blood, sweat, and tears, this war has been dreadful. We are really staggered at contemplation of its results. Loss, destruction and death, with anguish and pain and tears, have followed in its wake. The tears and pain and anguish cannot be repaired. The suffering can be ameliorated only by our feeling, when we shall have done our best, that such a tragedy, through our wise and righteous planning, will not occur again.

One of the plans offered us for acceptance and adoption is a method for economic stability and peace, with a means provided for reconstruction and development. This is Bretton Woods. This is the establishing of an International Monetary Fund, and an International Bank for Reconstruction and Development. These are to make and keep peace in economic affairs and give every nation a chance for reconstruction and development, so that peace may prevail. It is true that man cannot live by bread alone, but in that very statement it is recognized that bread is essential to life. We cannot expect hungry people to continue to be peaceful. With bread there must go freedom of speech, freedom of religion, freedom from fear.

I am, at the time, addressing myself to Bretton Woods or the International Monetary Fund and International Bank for Reconstruction and Development, for that I conceive this to be one of the cornerstones necessary in the building of a structure of a just and lasting peace. Let us remember that economic warfare will inevitably lead to political warfare, resulting in actual war. I cannot imagine that Dumbarton Oaks can survive without Bretton Woods. It has been said that "Necessity is the mother of invention"; and that "Experience is a dear school, but fools will learn in no other." The latter I would change by suggesting that experience is a dear school, but few learn in any other. In my opinion, the Bretton Woods agreements prove the soundness of both statements. Our sad experience has caused us to learn that economic warfare among nations, instead of accord and cooperation, leads to one end—loss to all and final disaster.

The necessity we found resulted in the plans we now have for adoption, not the least important of which is provision for reconstruction and development and international economic cooperation. The declared purposes of these are—as to the fund: First, to promote international monetary cooperation with machinery for consultation and collaboration on international monetary problems; second, to facilitate the expansion and balance growth of international trade and thereby to contribute to higher levels of employment and real income for all members of the fund; third, to promote exchange stability and to avoid competitive exchange depreciation; fourth, to as-

sist in the establishment of a multilateral system of payments, eliminating foreign exchange restrictions, which hamper the growth of world trade; fifth, to give confidence to members by making the fund's resources available to them, under adequate safeguards, eliminating resort to measures destructive of national or international prosperity; sixth, in accordance with the above, to shorten the duration and lessen the degree of disequilibrium in international balances of payments of members. The fund shall be guided in all its decisions by the purposes set forth.

There is no involvement, uncertainty, or unreasonable undertaking in these purposes. I know of no one who does not approve the purposes or objectives of the fund. Surely exchange stability and orderly exchange arrangements, avoiding competitive exchange depreciation, are to be desired. Indeed, the purposes, being for order, collaboration, and accord, provide a business way of doing business, instead of resorting to destructive methods, calculated to produce economic and political discord, with promise of no more than temporary advantage to one people, maybe, but inviting retaliation from others, resulting in disaster to all.

There seems, after all and in reality, no objection to the fund, except that some would insist that the fund be merged in the bank. With great respect, I must say that I am convinced that the two arrangements, as contemplated by the Bretton Woods agreement, are sounder and more to be desired than a single institution. The International Bank is for reconstruction and development, as the name definitely implies. The purposes of the bank are:

First. To assist in the reconstruction and development of territories of members, by facilitating the investment of capital for productive purposes, including the restoration of economies destroyed or disrupted by war, and to aid countries of low productive capacity.

Second. To promote private foreign investment by means of guaranties or participation in loans made by private investors. In the bank, as in the fund, the several nations subscribe to the capital required. Everyone, in both, is interested in successful operation of the fund and of the bank. One is one thing; the other is another.

Third. The third objective of the bank is to promote balanced growth of international trade, encouraging international investment for the development of the productive resources of members, thereby assisting in raising productivity, the standard of living and conditions of labor in their territories. This is international cooperation and collaboration, participated in by all member countries. We may be assured that we cannot long enjoy what to so many are the luxuries of life, while other nations sleep on beds of straw, go half fed and illy clothed, with little hope for the future. It certainly must be understood and appreciated that the higher the living standards of other countries—their people—the more they shall require of our own goods, and the greater degree of prosperity we, ourselves, shall enjoy.

Fourth. The fourth objective is one of practical consideration: To arrange the loans made or guaranteed by the bank in relation to loans through other channels, so that the more urgent and useful project may be dealt with first.

Fifth. The fifth stated objective is that the bank shall conduct its operations with due regard to the effect of international investment on business conditions in the territories of members and, in immediate postwar years, to assist in bringing about a smooth transition from wartime to a peacetime economy. This is the recognition of the need for regard to the effect of international investment on business conditions and the requirements of orderly transition from wartime to peacetime economy.

Membership in the fund is wisely provided for those who were represented at the United Nations Monetary and Financial Conference, whose governments accept membership; and membership shall be open to the governments of other countries at such times and with such terms as may be prescribed by the fund.

In schedule A is set forth the subscriptions and quotas of the several nations; and these are the exemplification of the good faith and cooperation of all these nations, 43 or 44 in number, with their several quotas set forth.

Members of high standing in the American Bankers Association testified, without exception, that they and the association approve the purposes and objectives of the fund as set forth in article I of the agreement. The framework, with the provisions and stipulations of the fund, are marvelous, when one considers with what care the objectives of the fund are set forth and protected.

In article III, section 2, it is required that the fund shall, at intervals of 5 years, review and, if it deems it appropriate, propose an adjustment of the quotas of the members. It may also, if it thinks fit, consider at any other time the adjustment of any particular quota, at the request of the member concerned. The need of adjustment may well appear as time goes on. It is well that the fund shall have the authority and be chargeable with the duty to review the quotas of the members. The section concludes with the statement that a four-fifths majority of the total voting power shall be required for any change in quotas and no quota shall be changed without consent of the member concerned.

Safeguards are at every point. Some people are very fearful. Some are moved by doubts and suspicions at every turn. I have heard the suggestion made that the United States may be required to become a Santa Claus and increase its quota to the fund, and possibly this related to the bank. It cannot be done. If we must give place to conjured fears and imaginative suspicions we shall hardly get anywhere in providing peace and security in the world. There is quite a difference between justified caution and trumped-up fears. The framers of our Constitution had a hard time on account of the fearful and doubting. There were objections here and objections there, and success was finally despaired of, and so completely that Benjamin Franklin said: "Let us stop right here. We seem incapable of the task. Let us seek divine guidance. Let us pray." Then we had a Constitution one of which I think every American is proud. It is true that later there were amendments, but there was first a Constitution. There are ample means for amendments in operation of the fund and the bank, as experience and review may justify. The truth is, the constitution of the fund and the bank is a marvelous accomplishment.

The par value of a country's currency may be changed, but only to correct a disequilibrium, and with the fund's approval. The signers agree to this.

TRANSACTIONS WITH THE FUND

These are provided for with all reasonable safeguards. Full and ample provision is made for protection of the fund. All signers are concerned for the successs of both the fund and the bank, just as a stockholder in a bank is concerned for that bank's success. There are 20 articles in the instrument creating the fund, and all of these relate themselves faithfully to article I, which declares the purposes of the fund. Consider, for instance, article XII of the fund agreement, organization, and management. The fund shall have a board of governors, executive directors, a managing director, and a staff. All power shall be vested in the board of governors, but the board may delegate to the executive directors any of its powers, except the following:

Admit new members, approve a revision of quotas, approve a uniform change in the par value of the quotas of all members, arrange for cooperation with other international organizations, determine the distribution of the net income of the fund, require a member to withdraw, decide to liquidate the fund, decide appeals from directors. These enumerated exceptions are for the personal action of the board of governors; and ought to be.

Each member of the board of govern shall have 250 votes plus 1 additional vote for each part of its quota equivalent to 100,000 United States dollars.

These provisions are adverted to to point out what care and caution are used in the management of the fund. In the agreement for the fund and for the bank there is stipulation for not rivalry, not competitive attitude, but collaboration and cooperation. The fund is for one function, the bank another, but each complements the other.

The fund is primarily designed to stabilize and to prevent disastrous and unmoral economic competitions, themselves disrupting in their influence on trade and capable of bringing on economic warfare, with its inevitable results—political warfare and final resort to arms to take by force what could not be gotten by tricks in trade.

The fund agreement does not involve a member country in an absolute guaranty of financial resources. The quota allotted a member country is not a checking account. The fund and the bank retain always the right and power to inquire and ascertain the purposes for

which borrowings or purchases are sought. Reliance by members on their own resources is impressed in the fund proposal.

The two new international financial institutions have functions of different purpose and different service. They may and will be helpful one to another, but the merger of the two is to take away a measure of efficiency from both. They are companion institutions, but each within itself important, both definitely recognizing and preparing a place for private enterprise in the plans set forth.

The two proposals are of vital importance. They lay the foundation for confidence, for world trade, for orderly procedure, for stability in financial transactions, for reconversion and development, and economic peace. Isolationism is nine-tenths of the opposition to these structures for world peace. The other tenth is made up of selfishness and ignorance.

There is no way to amend the Bretton Woods agreement, except amendments by the institutions themselves, after trial and review may suggest amendments. That authority is provided in the agreement, and to suggest amendments by Congress is a left-handed attempt to scuttle the plan and sink the ship.

This is the final step, so far as Congress is concerned, in an attempt actually to provide against another world war. If this agreement for the International Monetary Fund and the International Bank for Reconstruction and Development, so reasonably and sensibly arrived at, is not ratified by the Congress, such failure will have the effect of making nugatory any understands arrived at at Dumbarton Oaks, Yalta, or San Francisco. This is not to say that financial considerations are above moral questions—they are not—but it is to realize that if we have not the faith and the willingness to take the steps, designated, designed, and well calculated to furnish one of the cornerstones in the structure of a just and lasting peace, we cannot hope for anything or expect anything except to fight it out on fields of battle, to which service, deplorably, we who are at fault do not have to devote ourselves, but call upon the young men of America to suffer and die in the name of freedom and love of country for our lack of faith, our suspicion and fear and silly spirit of isolationism and personal and national selfishness.

This is our hour of responsibility. We must act. On us may well depend the question of maintaining a just and lasting peace.

May we have faith in our cause, faith in our fellows, and dispel the doubts and suspicious which can have no end except disruptions, failures, and other wars. The Bretton Woods agreement is an intelligent effort to hereafter avoid the suffering, the tears, the horrors we have so recently endured and which, indeed, we continue in; but with the hope that through faith and confidence we may escape them hereafter. For my part, I shall not be chargeable with doubts, fear, lack of faith resulting in other such experiences.

World Power Concepts

EXTENSION OF REMARKS

OF

HON. WILLIAM LANGER

OF NORTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an article entitled "World Power Concepts Unfolding at Parley," written by David Lawrence.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WORLD POWER CONCEPTS UNFOLDING AT PARLEY—GAP BETWEEN RUSSIA AND UNITED STATES MUST BE CLOSED, SAYS WRITER

(By David Lawrence)

SAN FRANCISCO, April 30.—This is the story of what is going on behind the scenes of the United Nations Conference. It is not a story of the phrases of a charter yet to be written nor a story about tedious meetings or conflicting procedure. It is a story nevertheless realistic and in some respects sensational. For it is the story of the conclusions being earnestly reached by men of major importance in the various governments represented here.

It is, in brief, a warning that if the prevention of World War No. 3 is the greatest task that confronts mankind, then a means must be found whereby Russia and the United States shall learn to trust each other, to understand one another, to know one another.

There's no use mincing words. All the nations gathered here, large and small, are lining up, consciously or unconsciously, behind either the United States or Russia. Whether it be Great Britain or France or Brazil or China which look more than ever now to the United States as their mighty protector or whether it be Czechoslovakia, Yugoslavia, and a new array of smaller nations which have decided they must cast their lot with Russia, the fact remains that two different concepts of world power are unfolding. They ought never to be permitted to clash—they ought to be required by world opinion to adjust themselves to each other.

AGREEMENTS UNFILLED

There's no use camouflaging the truth or suppressing facts. The Yalta Conference brought forth a communique of hopeful phrases, but Russia has not fulfilled the agreements made at Tehran in 1943. The British, the Americans, the European governments directly concerned are all baffled, puzzled, confused.

Why has Russia found it difficult to cooperate with Britain and America in establishing a new government in Poland as called for in the Yalta agreement? What are Russia's problems, her handicaps, her internal pressures? Nobody on our side knows; Russia keeps these things from us. She allows, for instance, a Russian ambassador to open an embassy in Czechoslovakia but refuses permission to Britain and the United States to send in their ambassadors. Yet the Yalta agreement specifically called for inter-Allied action and no unilateral steps in the liberated areas. Numerous instances of barriers to officials of Britain and United States could be cited as existing in other areas also under the Russian military command.

What then can be done? The American Government and the British Government are frank and outspoken now about these matters. There is no need, of course, for swashbuckling talk or displays of temper but there is a great need for candor, for temperate criticism and for open discussion in the press.

The first thing to be done is to be practical on the economic side. American economic aid should not be frittered away as if it had nothing to do with other issues or the fulfillment of other agreements. There is no reason for arbitrary decisions or prejudgment of Russian motives or proposals. Her method of bargaining is hard, often inept from our point of view and even irritating, but it must be learned, and she must endeavor to learn our ways of thinking and the importance of what we term "ideals." We may not be able to gain acceptance immediately for our ideals but this is no reason to disparage or abandon them as our goal.

ON PIECEMEAL BASIS

A charter will be written here that Russia will accept. What is more important is the fulfilment of such a charter's provisions and the execution of agreements yet to be made with reference to Germany and Japan. For there is to be no peace conference or peace treaty in the 1919 sense. Special problems will be handled in special conferences over a period of years. Peacemaking is to be on a piecemeal basis until each problem is satisfactorily adjusted.

Meanwhile thoughtful Americans have a solemn duty. The tragedy of differing languages has been revealed here. Mr. Molotov does not speak English. None of the principles on our side speaks Russian. How can we ever begin to appeal to each other's minds and consciences? American universities and colleges should start at once courses in the study of the Russian language. The next American Ambassador to Russia should know the language of Russia. Our State Department should establish a division of Russian affairs with capable men and women on its staff.

The pride of Mr. Molotov in being able to preside over the plenary session and speak Russian from the platform was mentioned by him. Russia is having a rebirth of patriotism. She is feeling a new sense of power and this must inevitably bring a new sense of responsibility. But if ultimate war between Russia and the western world is to be prevented, no time must be lost in beginning the interchange of missions of officials, of businessmen, of labor leaders, or newspapermen, and of the best exponents of the spiritual and cultural life of the two countries.

The gap that already separates Russia and the United States must be closed at the earliest possible moment or there inevitably will be chaos in Europe and ultimately another war of devastating proportions.

Only Way To Insure Peace

EXTENSION OF REMARKS

OF

HON. JOHN H. FOLGER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. FOLGER. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following article from the Raleigh (N. C.) News-Observer of Saturday, May 5, 1945:

ONLY WAY TO INSURE PEACE

On next Tuesday the House of Representatives will resume consideration of the pro-

posal to put an end to the provision in the Constitution by which the vote of two-thirds of the Senate is required to ratify a treaty. It is proposed in a resolution approved by the Judiciary Committee that in the future treaties should be ratified by the majority vote of both Houses of Congress. Long hearings were held last fall and the testimony was overwhelmingly in favor of the change.

As it takes the vote of both Houses to declare war, a like procedure should be utilized to garner the peace. The power of one-third of the Senators was the dagger that denied peace after World War No. 1 and is in part responsible for the death and destruction in World War No. 2. If the United States had taken its seat at Geneva, the League would have functioned to undergird the world peace which the men in arms won in 1917–18, and if there had been no veto power in one-third of the Senate, the United States could and would have led in such measures and adjustments as would have prevented the present holocaust, now happily coming to an end, which has cost so much in blood and treasure.

North Carolina is proud to have been first in guaranteeing the incorporation of the Bill of Rights in the Federal Constitution and in other democratic advances. This was the first State to declare for the change from minority rule to majority rule in preserving good foreign relations by calling for an end of the undemocratic and archaic two-thirds requirement of the Senate for the ratification of treaties. At the State democratic convention held in May 1944 the following declaration was unanimously adopted and made an integral part of the platform:

"The provision in the Federal Constitution requiring a two-thirds majority of the Senators present for the ratification of treaties has enabled a minority of the Senators to thwart the will of a great majority of their colleagues, to disregard the considered opinion of the American people, and to defeat the best interests of the United States.

"We strongly approve and urge an amendment to the Federal Constitution that will make the process of ratification more democratic in its nature."

At the recent session of the general assembly that body passed the following resolution:

"Whereas the Constitution of the United States provides that the President shall have power, by and with the advice of the Senate, to make treaties, provided two-thirds of the Senators present concur; and

"Whereas this constitutional provision disqualifies the more representative House of Representatives from any participation in treaty making and has led in the past to obstruction by determined minorities in the Senate; and

"Whereas it is of the utmost importance that the National Government shall be able to effectuate any international agreement upon which the President and a majority of the Senators and a majority of the Representatives agree: Now, therefore, be it

"Resolved by the senate (the house of representatives concurring):

"SECTION 1. That the General Assembly of North Carolina respectfully requests the Congress of the United States to propose either to the legislatures of the several States, or to conventions in the several States, an amendment to the Constitution of the United States reading substantially as follows:

" 'The President shall have the power, by and with the advice and consent of Congress, to make treaties, provided a majority of the Members of the Senate and the House of Representatives shall consent thereto.' "

"SEC. 2. That a duly certified copy of this resolution be sent by the Secretary of State to the President of the United States, to the President of the United States Senate, to the Speaker of the House of Representatives, and one copy of the same sent to each of the North Carolina Senators and Members of the House of Representatives.

"SEC. 3. That this resolution shall be in full force and effect from and after its ratification."

It was introduced by Senator Brandon P. Hodges, of Buncombe, representing the same county formerly represented by Representative ZEBULON VANCE WEAVER, long a leader in the National House of Representatives. In Washington Mr. WEAVER's high position on the Judiciary Committee gives him influence and the respect of his fellow Members, and he presided over some of the hearings on the abolition of the two-thirds rule. There seems the eternal fitness of things that Buncombe County, the home of the illustrious VANCE, should take the lead in this long-needed reform. The resolution in the Democratic State Convention was drawn by the chairman of the resolutions committee, D. Hiden Ramsey, of Asheville, editor of the Asheville Citizen, who presented it to the Democratic State Convention. The resolution in favor of the amendment to the constitution was introduced and advocated in the general assembly by Senator Brandon Hodges, of Buncombe, and one of its ablest champions in Congress is Representative ZEBULON VANCE WEAVER, of Buncombs County.

North Carolinians, true to its devotion to majority rule, is committed to this change, which is the only way to guarantee peace and wise foreign relations, and it is gratifying that it was the first State to instruct its Senators and Representatives in Congress to lead in carrying out the mandate of the people.

New Postal Pay Bill Introduced

EXTENSION OF REMARKS

OF

HON. WILLIAM H. STEVENSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. STEVENSON. Mr. Speaker, H. R. 3035—formerly known as H. R. 2071—was introduced in the House on April 25 by my colleague, Hon. THOMAS G. BURCH, chairman of the House Post Offices and Post Roads Committee.

This bill is the result of hearings and study on H. R. 2071, and bears the new number rather than H. R. 2071 because it was thought advisable to introduce a new bill containing all of the changes, rather than to have H. R. 2071 continue through the legislative process.

Note that this is not an appropriation measure to offset wartime increases of living costs. Postal employees have not received a salary increase since 1925 and they receive less pay for overtime than they do for regular time.

There is at present a $300 bonus, but this expires on June 30. And even with due consideration of this bonus, 20 years is entirely too long a time to wait for adjustment of salaries to meet the advances in living costs which have come in those 2 decades.

H. R. 3035 proposes to give rural, city, and village carriers a graduated increase in pay based upon the number of years in the Postal Service. There is also provision for an 8-hour day, compensatory time for work on Saturdays, Sundays, or holidays; overtime pay in emergencies requiring more than an 8-hour workday; a 10-percent differential for night work; and a 15-day vacation with pay.

Political Policy in the Pacific Needed

EXTENSION OF REMARKS

OF

HON. WALTER C. PLOESER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 3, 1945

Mr. PLOESER. Mr. Speaker, last December I had the privilege of making a naval bases inspection tour in the Pacific with certain members of the House Naval Affairs Committee.

The information gained during the course of this trip was the source of various opinions expressed in an interview published in the St. Louis Globe-Democrat on April 22, 1945.

It is my firm belief that the United States of America should immediately develop and announce a definite and strong political policy in the Pacific.

In the hope that Members of this House will take the time to read these opinions, I am asking unanimous consent to extend this article in the RECORD:

LACK OF UNITED STATES POLITICAL POLICY IN PACIFIC PERILS FRISCO PARLEY, PLOESER SAYS

(An interview with Congressman WALTER C. PLOESER—member of the Naval Appropriations Subcommittee)

The absence of an American political policy in the Pacific is not only an active threat to military morale, but seriously jeopardizes the success of the San Francisco Conference, Congressman WALTER C. PLOESER, member of the House Naval Appropriations Subcommittee who recently returned from a 25,000-mile inspection trip of Pacific bases, told the Globe-Democrat yesterday.

"No matter where we went in the Pacific, there was one dominant question asked by everybody from GI's to admirals—'What is the political policy of the United States in the Pacific?' " PLOESER said in an interview. "We had no answer to that question because, so far as we and the Nation know, our Government has no political policy for the Pacific.

"Regardless of what anyone in Washington says, it is important for the fighting man on Iwo Jima and the Philippines to know his Nation's objectives to know his Nation's objectives over and above just defeating the enemy," PLOESER asserted. "They want to know why we're taking those islands at such a terrible cost in blood and money, and they have a right to know what plans our Government has for the future of this vast area they are conquering at such a great sacrifice."

FACTOR IN MORALE

Only the break-down of the rotation system because of inadequate shipping facilities occupies an equal status as a morale factor in the Pacific, he declared.

"Even the term 'unconditional surrender' has never been properly defined in this battle zone," the Congressman, who interviewed ranking military and naval commanders as well as enlisted men in the Southwest Pacific, asserted:

"It can mean many things in the Pacific that it doesn't mean in Europe, because this is a different kind of war. If it means merely seizure of lost possessions of our own and our

Allied Nations, that is one thing. If it means capture of the enemy's homeland and possessions, that is another. If it means complete domination of the enemy by ending all resistance, that is still another because that involves virtual extermination of the enitre Japanese population."

American delegates to the United Nations Conference at San Francisco this week will find themselves badly handicapped by the absence of a Pacific policy, with the resultant lack of plans for future Navy maintenance, PLOESER predicted. Other nations already have long-range plans and objectives well defined and outlined for both theaters of war, but the United States, which has been the most important factor in winning the Pacific battle, will have no policy to guide her delegation, he declared.

ALL-AMERICAN SHOW

"Our men in the Pacific are wondering if we have saved the Pacific empires of the French, the British, and the Dutch, only to withdraw against to our own shores without making secure our future safety from aggression in the East," the Missouri Representative reported. "Remember, this Pacific affair is about 99 percent an all-American show, even most of the supplies of our allies in that theater have come through us.

"I feel, and our fighting men there feel that we should develop a political policy of our own for the Far East and not depend on other nations to do that for us. The main reason for this is that the United States is the only nation with sufficient naval power to enforce peace in the Pacific, plus the fact that we, unlike the purely European powers, have a coastline to defend on the Pacific."

PLOESER praised highly the naval government officials responsible for regulating the reconquered islands. He pointed out that American Samoa and Guam, where self-government among the natives is fostered by a naval governor, are outstanding examples of colonial administration in the entire Pacific Ocean area. Progress under this system in education, in living conditions, and in general economic betterment for residents of these islands is unapproached by any other power in control of islands in the Pacific, he pointed out.

TYPES OF ISLANDS

There are three different types of islands which American forces are occupying, the Congresman asserted. The first are those former American possessions which are being recaptured, such as Guam and the Philippines. The second are islands which were either possessions or mandates of our allies, such as New Caledonia and the Admiralty Islands. The third, and most difficult, are Nipponese possessions or Japanese-mandated islands, such as Iwo Jima and Saipan.

The complexities arising from the military conquest of these vastly dissimilar territories give added emphasis to the need for an American political plan for the Pacific, PLOESER averred.

"The fighting up to now, costly and terrible as it has been, was just a preliminary to the real battle which is ahead when we seek to occupy the Japanese mainland and drive the Japanese out of China," PLOESER declared. "We are battling a crazed foe, whose women and children will kill themselves rather than be captured by Americans. The knowledge that there is a concerted, long-range plan in the Pacific will add immeasurably to the confidence and assurance of our fighting men who are daily performing miracles of military achievement and supply."

The nations of the Orient long have been distrustful of the United States because of its lack of a consistent foreign policy in the Far East, he pointed out. This distrust will continue to grow and may even turn into fear or enmity if our armed forces conquer the Pacific while our Government remains silent on its plans there, according to PLOESER.

CHAIN OF BASES

Reporting his conclusions for the first time since returning from the Southwest Pacific last December, the Congressman affirmed that a chain of American bastions extending from Pearl Harbor and American Samoa all the way to the Aleutians and Alaska are indispensable for the preservation of peace in the Pacific.

"We cannot risk the possibility of another Pearl Harbor attack which would cut our communication and supply lines to the Philippines and bases in the South Pacific," he said. "We must take definite steps now to assure for all time security in this immense region as a contribution to the safety of this Nation and the future peace of the world."

Specifically, the Congressman advocated establishment of United States bases in the Admiralty Islands, Palau, or some other strategic island in the western Caroline group, Guam, Saipan, and Tinian, on Iwo Jima or similar important ones of the Bonin Islands, New Caledonia, and American Samoa, as well as in the Philippines. Roughly describing a great arc from east of Australia, swinging west to the doorstep of the Japanese home islands, and north to anchor on the Aleutians and Alaska, the series of American outposts would command the entire Pacific including all the major water routes to the United States coast.

SYSTEM OF DEFENSE

Supplementing this chain of fortified bases, PLOESER recommended holding certain other smaller islands necessary for the smooth logistic operation in order to provide alternate routes to the major bases. He asserted that the main points of the system of defense already are in American hands and that semipermanent harbors, airfields, and highways are either constructed or nearing completion.

Other Japanese islands could be placed under United Nations mandate with specific restriction as to their use in order to prevent unauthorized fortification of strategic areas, he said.

"The development of such an interrelated plan is essential to the future wellbeing of our Navy, which today is entirely in the dark as to what will happen to it when the war ends," PLOESER asserted. "I am not in favor of scrapping a single United States fighting vessel, but propose instead a process of conservation of ships which would keep us at all times in a state of preparedness."

SHIPS IN RESERVE

PLOESER'S proposal would inactivate most of the Navy's 15,000 fighting ships of the line after the war in such a manner as to keep the machinery and hulls in proper working condition. "This would not increase the expense of Navy maintenance appreciably, yet would prevent the need for a gigantic naval rebuilding program in some possible future emergency," he asserted, "as it is always cheaper to recondition and modernize ships than to build new ones."

"The first thing that a bomber group does before a mission is to brief its crews with all the information contained in the plan of attack," he declared. "Then, when the planes are over the target and in the thick of the raid, each man knows not only his role in the fighting, but also his importance in relation to the entire mission. Today our fighting forces in the Pacific are over the target, in the bloody midst of the attack, and our Government has not yet briefed them as to the total objectives of the fight. This must be done immediately, and any further delay in announcing a Pacific political policy may threaten the whole future of the peace for which our war is waged."

Buchenwald

EXTENSION OF REMARKS

OF

HON. MARION T. BENNETT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. BENNETT of Missouri. Mr. Speaker, I was one of the first 10 American Congressmen and civilians to view the Nazi horror camps in Germany. I did so at the request of Gen. Dwight D. Eisenhower, supreme Allied commander. On my trip to Europe in April I also spent considerable time making an independent study of the English system of veterans' benefits and hospitalization. A report on these findings is now being prepared for the War Veterans' Legislation Committee of the House of Representatives, of which I am a member. My trip took me to Canada, Newfoundland, Labrador, Iceland, Scotland, Ireland, England, France, Luxembourg, and Germany. In these places I made a serious effort to talk to as many people as possible to find out the problems in which we have a mutual interest and to find out what our men and women overseas are doing now and thinking and planning for the future. The trip was most educational, and, I feel, will greatly increase my usefulness to the people I have the honor to represent in Congress, and to my country generally. I wish all Members of Congress could have similar experiences. To talk to the people of other nations; to fly twice across the Atlantic Ocean, to meet the officials of the British Government, to see them in action on the floor of the House of Commons, to hear them plead for "union now," to witness the destruction caused by the blitz, the V-1 buzz-bomb and the V-2 rocket, to see men die from treatment by enemies of our Nation, to see our own GI's in the battle areas, to see the utter devastation of many cities—the starving, the displaced people, the homeless, the sick, the wreckage of war and its horror, to live on cold army field rations, to see Communists winning elections in France; all of these and many other things help to clarify the thinking and increase the concern of any man who has been selected to help lead our Nation through the difficulties of war and the backwash of it.

At a future time I may have opportunity to comment in more detail upon these things. Now, because of the fall of Germany, I want to confine my remarks to a situation I saw in that nation which points up a great problem we must solve if we are to avoid another war. I refer to the most unpleasant and gruesome experience of my life—my visit to the German concentration camp at Buchenwald, near Weimar, Germany. Flown in an Army plane to this spot, deep in the heart of Germany, close to Berlin and right at the front lines, I saw scenes no Christian can imagine or fully

understand. With a German camera which I "liberated" with the help of Capt. Paul Morton, of Springfield, Mo., a medic doing a grand service at the front, I secured pictures to document scenes which will be forever in my mind. Time does not make it possible here to record all of these things in detail. Some of them have already been reported. Others will be reported by the dozen Congressmen who visited the camps after I did and by the able editors and newspaper reporters with them. It was my privilege to see the situation before it was cleaned up. Pictures and the printed word will not do justice to it. You have to smell a human slaughter pen to get its full impact. The English language does not contain adequate adjectives to describe what I saw. I will simply recount some of these things for your own prayerful consideration.

Weimar, Germany, is the birthplace of the German republic which Hitler destroyed after he had been elected to office by the people. Weimar was the home of such great men as Schiller, Liszt, Bachs, and Goethe who contributed much to civilization and human happiness. Martin Luther preached there. But all that was before one-party government, one-man personal government and military domination wrecked the German nation and destroyed its soul. Weimar now is a city of the dead. Three thousand Germans were killed there by just one of our numerous air raids. Fifty-one thousand people died of starvation and torture at Buchenwald on the outskirts of the city. This notorious camp was for political prisoners from the area where the Nazis held sway. There were Germans in the camp. There were also Poles, Russians, Dutch, Belgians, Frenchmen, and so forth. All were paying the penalty imposed by the Nazis upon those who would not accept the new order and who criticized those in power. These unfortunate people were used as slave labor in nearby war industries. They were given insufficient food. Every 24 hours prisoners received a small piece of heavy brown bread, a little margarine and one scant portion of stew. That is all. As soon as they became too weak to work they either were killed, were permitted to commit suicide or fell victims to the filth, disease, and brutality rampant in the camp which at one time contained 120,000 souls and had 21,000 there when General Patton's forces overran it. Over the entrance to the camp is the inscription, "Recht oder unrecht—mein Vaterland." My country right or wrong. The camp is surrounded by a high barbed-wire fence—electrified. The camp is typical of a dozen others.

I personally saw scores of bodies piled 8 and 10 layers deep, like cordwood. I saw some of their burned remains in 6 great ovens built solely for cremation of the dead. I saw a great pile of human bones and ashes taken from this place to be used as fertilizer. I saw lampshades and cigarette cases with human-skin covers. I saw bodies of men and women beaten to death, lying in pools of blood where they fell. I saw the bunks where 6 men had to sleep so close together they could not turn over. I saw the lack of sanitary facilities. I saw men frozen to death because of lack of clothing in the camp. I saw little buildings formerly used as stables and which were turned into charnel houses each containing 2,300 men. I saw the brothel where slave women were kept. I saw the jars containing specimens of human organs taken by German doctors who killed patients at various stages of disease and removed their organs for study. I saw 850 children, ages 6 to 13, but with faces and shrunken bodies of old men. They are children who remember nothing but life in a concentration camp to which they were taken because their parents did not like Hitler. I saw and talked with men whose legs were no bigger around than my arm and who were too weak from malnutrition to raise their heads. They were educated men who spoke good English and who were covered with the sores of old beatings and the festering bites of vermin. These men are still dying at the rate of 35 per day because they are so far gone adequate medical care and food can do them no good now. They are the living dead. A few of them may recover—to be harassed the rest of their short lives by tuberculosis and other diseases. I saw the walls of a laboratory in the camp decorated with death masks of the "more interesting" prisoners, many with features of remarkable nobility and refinement. I saw sterilized prisoners, usually Jews. I saw men and women with their prison numbers tatooed in blue on their left forearms. I saw the beautiful barracks in which the brutal young S. S. guards lived who operated the camp. I brought back to America with me some of their whips and instruments of torture that I might show them to my friends. I saw tens of thousands of displaced persons, many of them Germans as well as former prisoners in concentration camps, all fleeing through the American lines away from the Nazis and away from the Russians. I saw these and many other things. I was driven through this area in a jeep operated by Pvt. (1st cl.) Lee R. Davis, of Montevallo, in Vernon County, Mo., in my Sixth Congressional District. I was in this area several days and had plenty of time to see and study the things mentioned here.

What do the German people think about it? The German civilians deny any knowledge of what has happened to political prisoners in these camps. They know now. They are digging graves in which to bury them. They have been forced to go through the nearby camps and see for themselves what has been done. I saw some of the older German men and women weeping at these sights. I saw one faint. I read in Stars and Stripes the next day that one man and wife went home and committed suicide rather than to live in Germany which had been responsible for these crimes. I saw some of the younger Germans with cold and stony expressions as they looked at the piles of bodies. I saw some of the younger girls smirking. In the historic city of Jena, which was still on fire from the effects of our bombardment and with the odor of burning flesh still in the air, I saw German civilians wandering about the streets attending to their business as if nothing had happened, showing and speaking neither remorse nor regret. They did not seem hostile toward me as an American. They have the attitude of a beaten bully who wants, very much wants, to be nice. I saw them looking eagerly at a box of K rations protruding from my coat pocket. They are fat and well dressed now with the loot of Europe. But, they fear that starvation and cold will be their own lot before long. I saw them lined up to receive rations under the orders of our efficient military government forces. I saw their beautiful countryside, their sturdy houses with tile and slate roofs, their rich fields. In the bright April sunlight, past the cool green forests, past the geometric fields arranged on gentle slopes, past corpses of men, of horses, of tanks, past the great and never ending throng of displaced people lining the green landscaped verges of the superhighway, the autobahn, a four-lane concrete military road Hitler built, past these things and around bomb craters I went and I marveled at the natural resources of the country and of its beauty which war could not completely destroy. I wondered at all of these conflicting things and asked myself, What can we do about this awful mess?

Many men are giving serious thought to that question. Some of them are now at San Francisco, specially commissioned to study such questions. I hope that they will evolve an answer—if one can be found. In my work in the Congress I will be guided by certain ideas which are a result of my own experience. Germany must never again be allowed any heavy industry. Germany must be made self-supporting as possible but without the means of making the machines of war. She must have no army, no air force, no navy. We must have big ones. Her generation of Nazis must make reparations in kind and must repair the damage done to other lands as nearly as possible. Germany's own cities must be left heaps of rubble as monuments to her folly and reminders that crime does not pay. My first reaction after seeing the horrors of Buchenwald and other places was that we just ought to kill off all the Germans. It was more than bad leadership which had done this thing to Germany and the world. The ignorance, apathy, and greed of the German people supported it. But you cannot kill a nation of over 70,000,000 people—and even if you could, you should not. This kind of swelling anger we must guard against. It is a treacherous thing. It is not the method of civilization to license killers. The method of civilization is the method of law, and that must be ours. This means that the guilty must be convicted of specific crimes, on satisfactory evidence, and with due opportunity for presenting their defense, if any. The Nazis have been fighting not only Poles, Russians, Americans, Englishmen, Frenchmen, and others, but they have been fighting civilization, too. In punishing

them for their crimes, according to law, we are defending civilization. And we must still beware the most evil of the Nazi secret weapons, which is to tempt us down to their level. It is good to be an American. It is good to have representative government. It is good to be able to criticize an administration and change it when we do not like it, because we have a choice between two great political parties. It is good to live in a country with a tradition of justice and political liberty, where there is a free press and habeas corpus. We take these things for granted. But in an age of trans-Atlantic flights, rocket bombs, revolution, ideologies which parade under different banners but mean the same as nazism to the common man—in such an age we would do well to keep alive the memory of Buchenwald and to remember that eternal vigilance is still the price of liberty.

The Press Appraises Franco Fascist Spain

EXTENSION OF REMARKS

OF

HON. JOHN M. COFFEE

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. COFFEE. Mr. Speaker, I have been an aggressive critic of Franco Fascist Spain from the inception of its totalitarian government.

Most Americans were apathetic to the ominous dangers inherent in the continued existence of that set-up. For the long time, I have advocated that the United States sever diplomatic relations with the outstanding example of fascism now existing in the world among so-called neutral countries.

There is overwhelming support among the American people for this proposal. Our efforts are not helped, however, by the diplomatic recognition recently accorded the Argentine Republic by the United States, after a considerable period during which the diplomatic relations had been severed; nor are the plain peoples of the world encouraged by the sorry spectacle of the San Francisco Conference inviting the Argentine Government to participate officially in the Conference's deliberations.

The Argentine is a shadowy camp follower of Franco, who is an abject sycophant of Hitler and the late Mussolini. Newspaper editorials are growing increasingly indignant at the disgusting display of so-called neutrals, who have been following the party line of fascism, and are now suddenly drawing their skirts aside in factitious horror at further close association with their erstwhile bed partners. They are now declaring war on their former fascist pals or breaking diplomatic relations. These are phony gestures, indulged in for no other purpose than to beguile and hoodwink the gullible diplomats of credulous nations.

The following editorials are representative of the overwhelming majority of American press with respect to Franco Fascist Spain:

[From Pawtucket, (R. I.) Times of April 17, 1945.]

FRANCO CHANGES FRONT

Perhaps you have had some doubts regarding the early ending of the war in Europe. Perhaps you have thought it may yet be long drawn out—that is, for months to come, despite the long succession of victories in the East and West. But no such doubt should persist now, after the news from Madrid, Spain has broken relations with Japan.

It can, of course, mean only one thing: That Francisco Franco, the Spanish dictator, sees the defeat of Germany as imminent and does not care to be a sponsor of Germany's partner in the days to come. It really makes no difference what attitude Franco shows toward Germany now but when he lashes out at Hitler's partner he indicates clearly enough that he wants no further truck with the leader of nazism.

Friendship with Hitler has ceased to pay; he and his gang have become liabilities to be quickly disposed of by people engaged in the business of running a government. The supreme repudiation, of course, would be Japan's desertion of Berlin, and Japan certainly would do that if it promised to do any good. It would not; Japan is also a beaten nation in a war provoked by her mad statesmen, and it would not help her in the slightest to turn against Hitler today.

Franco, however, sees the advantage of getting from under the disaster that is about to fall on Nazi Germany. He does it by delivering an oblique blow, by repudiating Germany's partner, who is far enough away to be unable to hit back at this critical time in world history.

And the cause as given? Well, it is solely a diplomatic fiction. The Japs in the Philippines are charged by Franco with murdering Spaniards, and no doubt the charge is true. They murdered Americans, why not Spainards? But Franco has only now found out that it was a crime. So he becomes indignant and breaks off relations with the Japanese.

If the Japs murdered Spaniards in the Philippines—and we do not doubt it—the murders probably began early in December, 1941, when the legions of the Mikado invaded the islands. That was when the Japs were winning, when our Army on Luzon was being wiped out by the invader. That was the time, if Franco really meant it, for Spain to get mad at Japan, but Spain didn't.

Franco waited until Japan was in trouble, until Germany was staggering toward defeat, punch-drunk and out on her feet. Then Franco delivered his defiance to Tokyo, Germany's partner.

It is not a very gallant performance.

[From St. Louis Globe-Democrat of April 20, 1945]

FRANCO'S NEW COOPERATION

Spain continues shamelessly to climb ever higher on the Allied victory bandwagon by progressively shedding ties with the Axis. Now that the Luftwaffe has been driven out of the air, Franco forbids all German planes to land in Spanish territory. And last week Spain severed diplomatic relations with Japan.

Actually, however, all this is not entirely a band-wagon performance; it is partly internal pressure forcing Franco to move with the will of the people, even though possibly from selfish motives. For Spaniards have long recognized that if the nation's reconstruction coincides, as it should, with that of France and Italy, a nonrevolutionary government must go in. The World War began in Spain, and it may end in Spain unless she can convince the allies by her present conduct that they should take a benevolent hand in helping set her political house in order. Should the World War cease suddenly with internal factionalism still at white heat, another civil war could well follow which would finish Spain.

Although the vast majority wants a peaceful transition, it seems clear that Francoism by that name must fall, whether by democratic processes or force. The question is whether it will reappear as the same dog with another collar—a government based on the military clique which supported Franco. A military government would appear to be foredoomed to the usual corruption and ultimate anarchy. The only alternatives are a return to monarchy—a system which likewise would require backing of the generals—and another republic.

The latter doubtless will be the people's choice, but they will insist on a different sort of republic than the fumbling republic of 1931, one which will bring together all factions into a new national spirit for reconstruction. And it is to satisfy that demand in the hope of retaining an under-cover semblace of his dictatorship that Franco apparently is donning a new garb of antitotalitarianism and temporarily following by political necessity a course popular with most Spaniards.

[From the Trenton (N. J.) Times of April 18, 1945]

SPAIN'S BREAK WITH JAPAN

Gertrude Stein, whose utterances often defy analysis, once let fall an observation which expresses the reaction of all of us to the news that Generalissimo Franco's Spain has severed diplomatic relations with its Axis associate, Japan. "It is remarkable," she said, "how uninterested I am." This comment is a departure from the Stein tradition in the respect that it is easy to understand.

We view the obvious efforts of the Franco regime to escape from a sinking ship with cold indifference. Spain is and has been an enemy nation, one whose position is all the more reprehensible because it has been clothed in the pretense of neutrality. Spain has applauded every Hitler aggression, every victory. It has sent Spanish soldiers to fight on the eastern front, maintained a constant flow of vital supplies to the Reich. Its ships have been sunk while trying to run the blockade of French ports still held by the Nazis.

Americans cannot soon forget the effusion of the official Falangist paper, Arriba, after Pearl Harbor and the fall of Manila. "The ancient and renowned culture of the magnificent oriental empire, and its exceptional human qualities," it said, "are shown in the important victories of the first days—victories that have won for Japan the admiration of the world."

But Spain's support of Japan in the Philippines was not limited to words. Falangist agents had been planted in the islands long before the attack. They helped to sabotage civilian defense organizations, provided the invaders with lists of "dangerous Americans" who, according to charges made in the House by Representative COFFEE, of Washington, were put to death. In return, these emissaries of Franco were decorated by the Japanese Government.

Spain's cupidity and treachery must not be forgotten when the day of settlement comes. Spain is an enemy nation and must be treated as such.

[From the Tennesseean, Nashville, Tenn., of April 22, 1945]

FRANTIC ANTICS OF FRANCO

The "conversion" of El Caudillo proceeds apace. The latest news from Madrid is that Francisco (El Butcher) Franco is to abolish the Falange salute and change the Falange flag.

The Falange salute was borrowed in toto from Mussolini's cohorts during the Nazi-

Italian-Moorish conquest of republican Spain and is given by raising the arm with palm outward.

Maybe that will fix things with the United Nations, for who could think of breaking relations with El Butcher now that he has frowned fiercely on the Japs and announced the elimination of the Fascist salute? But if some hard-hearted Americans and English still insist that it should be done, perhaps Franco will oblige with some more proofs of "conversion." He could change the name of the Falange itself after all (an assassin organization can be just as effective under another name) or even ship the now useless German Ambassador out.

The frantic antics of Franco would be humorous if one could forget only for an instant his bloody record or if one could only be sure that no official responsible for foreign policies in western Europe would be stupid enough to accept Franco's crude window dressing for a change of heart. Some in our own State Department have worn kid gloves in dealing with this open and avowed collaborator with Hitler. It is past time to deal with this enemy of democracy as he deserves.

Universal Military Training

EXTENSION OF REMARKS

OF

HON. JAMES W. WADSWORTH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. WADSWORTH. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by Archibald G. Thacher National Co-Chairman, Citizens Committee for Universal Military Training of Young Men:

The citizens committee urges the present adoption of a Federal system of Nation-wide military training for one continuous year, of all young men found physically fit. Such training should begin in early manhood, preferably in the 18th year and upon completion of grade school, high school, or preparatory school, and before about 12 to 15 percent of such youths go on to higher education or the others enter employment.

Such training should be military only not C. C. C. camps, and should not include any plan for national youth education.

The controlling reason for the establishment of such a system is to assure the future security of the United States, as so positively stated by Secretary of War Stimson, Secretary of the Navy Forrestal, and Chief of Staff Marshall.

There will be other valuable byproducts such as health examinations and benefits, improvement of coordination (mental and physical), development of qualities of leadership, learning mechanical skills useful for trades and other employment. Such training will bring together young men from different parts of the country, of every race, creed, and color, united in one objective—democratic military training for the safety of the country that gives them life, liberty, and the pursuit of happiness.

Without national security these great privileges cannot exist. Nor can a liberal system of education flourish where a condition of safety does not prevail. Young men who have had such training will be better and more law-abiding citizens; will learn to respect each other's points of view and rights and ways of life, because they have worked together.

They will gain in self-reliance and will learn qualities of leadership. These lessons will point toward the main objective—the security of the United States.

The only alternative, as General Marshall has pointed out, is a large standing army, maintainable only at much greater expense and obtainable only by real peacetime conscription. Our history shows that, even in time of war, sufficient numbers of men do not volunteer for armed service.

Nation-wide military training for 1 continuous year, required by the law of the land, is not "peacetime conscription for service" no matter how many times that untrue assertion may be made, ignorantly or from conscious prejudice.

Conscription, whether in peace or war, means the compulsory recruitment of men for the Regular Army or Navy, for a definite period of active military service in the national forces.

Young trainees, under the system advocated by the Citizens Committee, would not be in the Army or Navy. They could not be used for garrison duty or active service either at home or overseas.

Upon termination of their 1 continuous year of training, trainees would be entirely free to enter employment, carry on their civilian education or, voluntarily, continue military instruction either in the Army, Navy, National Guard, or Naval Militia.

They could not be called back for further training periods, except in war or in a national emergency declared by Congress, and then only if they, at that time, came within age limits and other requirements prescribed by Congress. Many such trainees would quickly qualify as junior commissioned officers, noncommissioned officers, or warrant officers in the National Guard, Naval Militia, or R. O. T. C., if they volunteered for such training.

The United States would then have, for the first time in its history, the substance of Washington's plan for a peace establishment, consisting of a large citizen reservoir of trained manpower and a valuable citizen corps of officer personnel, drawn from the people and not a military caste. This would permit timely reduction in the Regular Army, would avoid conscription for service on the European model, and would greatly reduce the cost of regular establishments.

All young men headed for the military schools, including West Point and Annapolis, must first take their 1 continuous year of training with all other young Americans.

The Citizens Committee, largely composed of men who by experience as trainees, citizen instructors in military training camps and in combat service overseas in World Wars I and II, is qualified to express useful opinions, not as theorists but as practitioners of what they preach.

Some organized the Plattsburg Training Camps of 1915 and 1916, under Maj. Gen. Leonard Wood; worked for Nation-wide military training in 1916 and 1920 and cooperated in suggesting to the Government in May 1940 (18 months before Pearl Harbor) and obtaining the adoption of Selective Service, without which we would have been completely unprepared.

The considered judgment of the Citizens Committee is against granting to prospective trainees any of the following options:

1. To permit such year of training to be broken up into two or three periods over several years. This would interfere seriously with the sequence of progressive training, planned by experienced officers of the Army and Navy during the 52 weeks required for proper training. Under pressure of war-necessity, men may be sent into the ranks after 4 to 5 months of intensive training, but such partly trained are slaughtered in battle. Peacetime training should be thorough, in order to be valuable.

2. To permit an age range of years (say, 17½ to 21) within which young men might select their 1 year to train, would unwisely widen the ages for training. Young men of approximately the same age (preferably 18) should be trained together.

Moerover, such right to choose could be misused to create a "block" or objection (when the chosen training time arrived) against interruption of education or employment. It is far better for all concerned that 1 continuous year of training shall have been finished before 19 years of age.

3. To permit anyone (son of high government official or son of humble worker) to escape such training would be a grave mistake. Therefore, any suggestion that a young man going to an institution of learning where a Reserve Officers' training course is given, might, if he agreed to take and complete such course, escape one continuous year of training with other young Americans before he went to college, would be a most undemocratic silk-stocking exception, and should be firmly refused.

4. To permit any more exemptions than are absolutely necessary would be unwise and undemocratic. It will be most beneficial that all young men, intending to become teachers and educators, should train for 1 continuous year. It may be quite proper for teachers and educators of military age to be exempted from war service, but these young men will be better teachers and wiser eductors if required to give, with all others, their 1 year of military training. Nor would it be wise or right to exeempt from such training, young men aiming to be chemists, physicists, engineers, scientists, etc. Later, if war comes, let wise and necessary exemptions be granted, but, in early youth, all young men should be required to take such training. There are now too many exemptions in war—do not let us make a similar mistake in peacetime military training. If the claims of all pressure groups were granted there would soon be more exemptees than trainees, a most undemocratic result.

We are arming against no nations, but we shall give adequate military training to our young men for the security of the United States and against our reckless tendency to sleep and luxuriate in a false sense of security. It is time we awoke to the grave dangers so narrowly averted. If we are again caught defenseless, we shall not deserve to survive.

The Late President Roosevelt Loved the Pacific Northwest

EXTENSION OF REMARKS

OF

HON. JOHN M. COFFEE

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. COFFEE. Mr. Speaker, Capt. Richard L. Neuberger is one of the brilliant and rising young man of the Pacific coast. He has distinguished himself in the field of journalism, in politics, as a member of the Oregon State Legislature, as a writer of books and magazine articles, and more recently in his military service with the United States Army. He has recently written an article for the Oregonian, one of the leading daily newspapers of the United States, in which he discussed our late beloved President, Franklin Delano Roosevelt, in direct relationship to the Pacific Northwest. We, of that area, had more than a political devotion to F. D. R. We had a pronounced personal affection for him which his death has not canceled. We sensed

that Roosevelt loved the wide open spaces and the rugged majesty of Nature's wonderland. We knew he responded to the appeal of the alfresco grandeur of God's country.

The article I am inserting hereinbelow is an appraisal of Roosevelt's love for and understanding of the incomparable Pacific Northwest region, from the Daily Oregonian, Portland, Oreg., April 22, 1945:

F. D. R. AND THE FAR WEST

(By Richard L. Neuberger)

"Our President, Please Go Slow" read the sign held up by a little girl in the dusty town on the Oregon frontier. F. D. R. went slow. He did better than that. He stopped his car. Someone lifted up the little girl. She and the President talked for a moment. Cowpunchers, Indians, ranchers, and lumber jacks clustered about the tonneau. They gossiped with Mr. Roosevelt for 4 or 5 minutes. Then the cavalcade moved on. It was the first time any of these people ever had seen a President of their country.

No President in American history figured more in the development of the far West than Franklin Delano Roosevelt. He visited lonely places in the backwoods. He loved the soil of America, its trees and mountains and streams. One afternoon in the lava gorge of the Columbia River, as the shadow of the world's greatest dam advanced in the waning sunlight, the President declared, "Seventy-five or eighty years ago an editor in New York said: 'Go West, young man, go West.' Horace Greeley is supposed to be out of date today, but Americans shall still have the opportunity of going West."

Mr. Roosevelt did more than any other President to make this possible. The dam at Grand Coulee is now completed. It will reclaim 40,000 farms from the upland desert. Returning soldiers will have the first chance to settle these 1,500,000 acres. This project is Mr. Roosevelt's monument as surely as if it were named for him and cast in his image.

As early as 1915 men and women in the West began urging the construction of Grand Coulee. They got scant hearing in high places. Then in 1920 there rode down the Columbia a young New York politician running for Vice President. At the little Washington town of Pasca he said:

"Coming through today on the train has made me think pretty deeply. When you cross the Mountain States and that portion of the Coast States that lies well back from the Ocean, you are impressed by those great stretches of physical territory now practically unused but destined some day to contain the homes of thousands and hundreds of thousands of citizens like us; a territory to be developed by the Nation and for the Nation. As we were coming down the river today, I could not help thinking, as everyone does of all that water running down unchecked to the sea."

When these words had been uttered, the West knew it had found a champion. For more than a decade people along the sundown side of the continent followed the career of Franklin D. Roosevelt, waiting for a chance to help send him to the White House. He never failed the West, and the West never failed him. In four consecutive national elections, he carried the 11 States which stretch westward from the Continental Divide 41 out of a possible 44 times. No record in American political history ever compared with this.

California, Idaho, and Oregon, traditionally Republican States, became overwhelmingly Democratic in their Presidential sympathies upon the appearance of Franklin D. Roosevelt. California and Oregon turned down beloved favorite sons to endorse him. Nevada, Utah, and Arizona gave him majorities which compared with those in the solid South. The late Senator Borah, an opponent of the New Deal on many issues, told his people in Boise that Mr. Roosevelt was our great President.

Franklin D. Roosevelt was the far West's favorite President. Even while he lived, Westerners ranked him with Jefferson, who sent Lewis and Clark to the Pacific. The West is notoriously fickle. It is a maverick region. It flirts with new political trends and movements. Yet it never wavered from F. D. R. To him it gave allegiance never accorded to any other figure in American political history.

Why was this? The President loved the American outdoors. Unable to walk himself, he nevertheless felt a kinship with the men who felled trees, tilled the soil, cruised the forests, and patroled the frontier. At Bonneville Dam he munched a ham sandwich and talked concrete mix with a greasy crane operator. On the wooded heights of the Mt. Hood National Forest, he chatted about seedlings, sustained yield, and Ponderosa pines with a glen-clad forest ranger.

Mr. Roosevelt knew the West, and the people of the West knew that he knew it. There was nothing phoney or synthetic about his interest in firs, hemlocks, granite crags, and mountain rivers. He could talk about dams with Col. Hugh Cooper, who built Dnieperstroy and advocated Grand Coulee. He could argue the worth of different grasses with a group of Wyoming ranchers. He could tell Lyle Watts, Chief of the Forest Service, where to plant a pine grove. At Mt. Hood some newspapermen were not sure of the elevation of the glittering white summit. F. D. R. turned around. "Eleven thousand, two hundred and twenty-five feet," said he. That was right—exactly.

Mr. Roosevelt is dead now. To the little girl with the sign and to Senator Borah he was our President. That is the way he always will be remembered out West. Our President he was, and our President he will remain. I camped one night with my friend, Forest Ranger Grady Miller, at Memaloose Ranger Station in the Wallowa National Forest. F. D. R. has always been Grady's hero. The ranger looked across the black chasm of the Snake River, deepest canyon on the continent, to a lofty pinnacle on the Idaho wall. "That mountain's nameless," he said. "Know who I'd like to see it named for?"

Grady's oldest son has since died at Guadalcanal, but he still feels the same way. He wants the big peak named for Franklin D. Roosevelt.

American Forum of the Air—Theodore Granik

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. CELLER. Mr. Speaker, I would like to read a letter written by our distinguished President on February 26, then Vice President of the United States:

OFFICE OF THE VICE PRESIDENT,
Washington, February 26, 1945.

We know that we speak the sentiments of most of our colleagues in congratulating Theodore Granik on the seventeenth anniversary of his radio program, the American Forum of the Air. Mr. Granik's program, the oldest forum on the air, has been outstanding in its field; week in and week out it has presented to the American people discussions of vital concern to them in the finest American tradition of freedom of speech.

For his splendid public service in conducting these programs without compensation for 17 years, the American people and the many Members of Congress who have participated on the forum owe Mr. Granik a debt of gratitude. The radio industry can be proud of this pioneer in the field of public service programs.

HARRY S. TRUMAN,
Vice President of the United States.

Mr. Speaker, we in the United States have been taking freedom of speech too much for granted. So many of us make use of that freedom every day of the year that we sometimes forget the comparatively few people who work so hard year in and year out that that freedom shall continue to exist.

I cannot emphasize too strongly that it does take work to keep freedom—any freedom—alive. Not only work—but, for the past 3½ years, those freedoms of which freedom of speech is the keystone, has cost blood and sacrifice to maintain.

I believe the recent release of American citizens from the prison camps of our barbarous enemies of Japan and Germany has brought home to us the shocking contrast between the freedoms we here take for granted and the dark misery and ignorance of those unfortunate prisoners. Because it is the policy of our infamous foes to keep their own people, as well as war prisoners, from learning the truth, those Americans knew nothing of events during the past 3 years or more. As far as knowledge of the outside world is concerned, those people were "blacked out."

Their homecoming, therefore, has been a mental jolt to us, a jolt which should remind us that we have been taking our blessings of freedom too much for granted.

America was founded on freedom of speech. We all know the early settlers of this country met together in open forums to thrash out their problems. We all know how, as settlements grew into towns and cities, this country gradually adopted the representative form of government, nothing more than the people's representatives meeting to decide what steps to take for the betterment of the larger community.

But do we know how the development of the forum discussion has kept pace with representative government?

We who are elected to represent our people try and try truly to carry out their wishes, but except for those who call or write to us or come to sit in the galleries, the great majority often do not know what we are thinking and saying. Newspaper accounts, by the time they get back home, are often abbreviated in the pressure of events. Taking into account all the great services performed by the newspapers and periodicals of America, they still do not bring home to the people how the members of this great American forum, the United States Senate, or our sister forum, the House, really talk and sound in discussion of the people's best interests.

But there is one medium which conveys the true atmosphere of the deliberations of this body to the American people.

Mr. Speaker, I refer to the American Forum of the Air, founded and presided over by Theodore Granik, and heard every Tuesday evening from coast to coast over the Mutual Broadcasting System.

I believe Mr. Granik is a disciple of free speech in America, and I am proud to count him as my friend. I have known him since his boyhood, watched him go through law school, and I believe no one in America has worked as hard at keeping the torch of liberty of expression alive—all without compensation to himself.

I said I was proud to count Mr. Granik as my friend. I am also proud of the fact that his forum is in its eighteenth year on the air, and that I appeared on Mr. Granik's first forum more than 17 years ago.

In that time Mr. Granik has become an authority on radio forum discussion. As director and moderator of the American Forum of the Air, he brings to the American people every Tuesday night one of the most vital issues of the week. To discuss these issues he brings before the microphone the prominent authorities of the Senate and of the House, distinguished persons from every walk of life, business, education, law and labor, and high-ranking Government officials, including members of the Cabinet.

No work is spared to obtain the best living authority on the issues to be discussed and every precaution is taken to present all the points of view involved.

Thus, Mr. Granik has developed radio forum discussion to the point where once again the deliberations of this body can be brought home to the American people just like the forum discussions of the early settlers. He brings to millions of listeners throughout the Nation the true attitudes, the true thinking of the people's representatives. He brings to these millions the very voices and thoughts of their duly elected representatives. Yes, and further, he provides the one impartial method—far above and beyond any partisan criticism—of informing our servicemen overseas with the course of events at home. I am told that these programs are recorded and rebroadcast extensively by the War Department and that they attract the keen attention of our news-hungry sailors, soldiers, and marines on the fighting fronts all over the world.

About Theodore Granik, the man, I need say very little. It has been said here before by our distinguished colleague from Kansas, Senator CAPPER—speech by Hon. ARTHUR CAPPER, of Kansas, March 27, 1941—how he has given freely of his time, talents, and energy to become one of the foremost exponents of free speech and the winner of the coveted Peabody award is all in the RECORD.

That he has received recognition as a distinguished member of the bar is known to many of us. We may take note of the citation awarded to Mr. Granik by St. John's University School of Law on the occasion of conferring upon him the honorary degree of doctor of laws. The citation awarded to him recited that Mr. Granik had been an "outstanding student at St. John's University School of Law from 1926 to 1929"; while still a student, organized the forum served from 1934 to 1937 as assistant district attorney of New York; counsel for the United States Housing Authority from 1937 to 1941; helped write the law creating the much-needed Smaller War Plants Corporation; the first alumnus of the school of law to win a place in the current edition of Who's Who in America. "The board of trustees of St. John's University," the citation concluded, "taking cognizance of the remarkable achievements of a loyal son, devoted father, and distinguished public servant, is happy to confer the honorary degree of doctor of laws."

The services he performs as moderator of the American Forum of the Air are worthy of note, however. The forum has become such an established feature of American life and has attained such stature as a sounding board for public opinion that Mr. Granik has been called in as an unbiased adviser on legislative and policy problems during these difficult years by various war agencies and committees of the Senate and the House.

As a result of discussion on the forum, for example, Mr. Granik was appointed special counsel to the Subcommittee on Banking and Currency to devise legislation to convert small-business enterprises to war production. The result was the establishment of the Smaller War Plants Corporation.

He served as special adviser to Mr. Donald Nelson of the War Production Board.

He served as civilian aide to Gen. Lewis B. Hershey, Director of Selective Service. As a result of many letters addressed to Mr. Granik as moderator of the forum, General Hershey adopted a new method of announcing draft quotas and induction regulations at a time when lack of adequate channels of public information had caused considerable hardship and anxiety to American homes. When the Senate War Investigating Committee began deliberations on the problem of manpower Mr. Granik placed the committee right on the air with expert witnesses on both sides so that the public would grasp the problem.

These services are typical of the many Mr. Granik has been able to perform and are a great tribute to his personal ability and integrity.

The significant point of this account is, however, that the American Forum of the Air is established as a definite link between the legislators and executives of Government and the people back home. Grown up before us over a period of 17 years is a national institution as free to the Members of this body as it is to the American people to provide a place to talk things out, to hew out the answers to the problems of the day in close touch with the people themselves.

The American Forum of the Air is a living monument to the man who founded it and the living, dynamic spirit of the principles of free government which has carried this Nation on to its present greatness.

Following is a list of titles and speakers of American Forum of the Air programs for the past year; they are typical of the far-reaching subjects discussed each week:

AMERICAN FORUM OF THE AIR—SUBJECT AND PARTICIPANTS

1944

April 4: The 1944 campaign. Representative Warren Magnuson, Washington; Representative Hamilton Fish, Jr., New York; Dr. Frank Kingdon, radio commentator and author; Representative Joseph P. O'Hara, Minnesota.

April 11: The wage policy. William H. Davis, Chairman, National War Labor Board; George K. Batt, industry member of the National War Labor Board; Lee Pressman, general counsel, Congress of Industrial Organizations; Dr. Alvin H. Hansen, professor of political science, Harvard University; Robert J. Watt, international representative, American Federation of Labor.

April 18: The political periscope. Ernest K. Lindley, syndicated columnist and chief, Washington bureau, Newsweek; Roscoe Drummond, chief, Washington bureau, Christian Science Monitor; Phelps H. Adams, chief, Washington bureau, New York Sun; Marquis Childs, United Features Syndicate columnist; Ray Tucker, McClure Syndicate columnist; Charles Van Devander, chief, Washington bureau, New York Post.

April 25: Our foreign policy. Representative Albert Gore, Democrat, of Tennessee; Representative Hugh D. Scott, Jr., Republican, of Pennsylvania; Representative Herman P. Eberharter, Democrat, of Pennsylvania; Representative Karl E. Mundt, Republican, of South Dakota.

May 2: The poll-tax issue. Senator Samuel D. Jackson, Indiana; Senator James O. Eastland, Mississippi; Representative George H. Bender, Ohio; Representative John S. Gibson, Georgia.

May 9: Inter-American development. Nelson Rockefeller, Coordinator of Inter-American Affairs; Eric Johnston, president, United States Chamber of Commerce; Eduardo Villasenor, Mexican banker; Valentim Boucas, Brazilian industrialist; Gen. Henry H. Arnold, United States Army Air Forces.

May 16: Government seizure of business. Representative Charles S. Dewey, Republican, of Illinois; Representative Emanuel Celler, Democrat, of New York; Representative Forest A. Harness, Republican, of Indiana; Representative James A. Wright, Democrat, of Pennsylvania.

May 23: The fourth term. Senator Harley M. Kilgore, Democrat, of West Virginia; Senator Kenneth S. Wherry, Republican, of Nebraska; Representative George E. Outland, Democrat, of California; Senator Styles Bridges, Republican, of New Hampshire.

May 30: Should the House have a voice in treaty making? Representative J. Percy Priest, of Tennessee; Senator Guy M. Gillette, of Iowa; Representative Ed Gossett, of Texas; Senator Hugh A. Butler, of Nebraska.

June 6: Canceled—D-day.

June 13: Financing postwar public improvements. Gov. John W. Bricker, of Ohio; Gov. Matthew M. Neely, of West Virginia; Senator Robert A. Taft, of Ohio; Senator Harley M. Kilgore, of West Virginia.

June 20: Army-Navy merger. Representative Melvin J. Maas, of Minnesota; Representative James W. Mott, of Oregon; Capt. Lowell Limpus, syndicated military analyst and author of How Army Fights; Glen Perry, military writer, New York Sun.

June 27: Republican convention. No program.

July 4: What kind of world organization does youth want? Elisabeth Stadulis, graduate of the High School of Music and Art, New York; Steve Benedict, sophomore, St. John's College, Annapolis, Md.; Eugene Gendlin, freshman, Drexel Institute, Philadelphia, Pa.; Tom Hughes, sophomore, Carleton College, Northfield, Minn.; guest chairman, Capt.

Arnaud C. Marts, United States Coast Guard Reserve and president of Bucknell University, Lewisburg, Pa.

July 11: How much regulation of business after the war? Robert E. Freer, Chairman of the Federal Trade Commission; Col. Willard F. Rockwell, chairman of the board of directors of the Timken-Detroit Axle Co.; Robert R. Nathan, former chairman of planning for the War Production Board and author of Mobilizing for Abundance; John Airey, president of the King-Seeley Corporation and director of the National Association of Manufacturers, vice chairman of its committee on war control terminations.

July 18: The campaign issues. Fulton Lewis, Jr., Mutual Network's Washington reporter; Leon Henderson, former Chief of the O. P. A., now a Blue Network commentator; Ray Tucker, syndicated columnist of the McClure Syndicate; Ernest K. Lindley, chief of the Washington bureau of Newsweek magazine, syndicated columnist, and Blue Network commentator; Leo Cherne, executive secretary, the Research Institute of America, and Mutual Network analyst; Walter Trohan, White House correspondent of the Chicago Tribune; Robert E. Hannegan—Greetings—Chairman, Democratic National Committee.

July 25: Jobs for disabled veterans. Brig. Gen. Frank T. Hines, Administrator of Veterans' Affairs and of retraining and reemployment; Senator Robert F. Wagner, of New York; Robert M. Gaylord, president, National Association of Manufacturers; James B. Carey, secretary-treasurer, C. I. O.; Millard W. Rice, national service director, Disabled American Veterans; Ray Murphy, general counsel, Association of Casualty and Surety Executives.

August 1: What should be done now about reconversion? Dr. William Y. Elliott, vice chairman for civilian requirements, War Production Board; Judge Charles M. Hay, Executive Director, War Manpower Commission; Frank M. Fenton, director of organization, American Federation of Labor; A. M. Wibel, vice president, Nash-Kelvinator Corporation.

August 8: What do the people back home think? Senator Homer Ferguson, Republican, of Michigan; Representative Robert Ramspeck, Democrat, of Georgia; Representative Leonard W. Hall, Republican, of New York; Representative John W. Murphy, Democrat, of Pennsylvania.

August 15: Political periscope No. 2. Ernest K. Lindley, chief, Washington bureau, Newsweek; James A. Wechsler, chief, Washington bureau, PM; Walter Trohan, White House correspondent, Chicago Tribune; Charles Van Devander, chief, Washington bureau, New York Post; Ray Tucker, McClure Syndicate columnist.

August 22: The meaning of Bretton Woods. Henry Morgenthau, Jr., Secretary of the Treasury; Harry D. White, Assistant to the Secretary of the Treasury; Dean Acheson, Assistant Secretary of State; Senator Charles W. Tobey, New Hampshire, ranking Republican member, Senate Banking and Currency Committee; E. E. Brown, president, First National Bank of Chicago, and president of the Advisory Council of the Federal Reserve System.

August 29: Labor in politics. Representative Clarence J. Brown, Republican, of Ohio; Representative Warren G. Magnuson, Democrat, of Washington; Robert J. Watt, international representative, American Federation of Labor; James B. Carey, secretary-treasurer, Congress of Industrial Organizations.

September 5: What are the major issues of the campaign. Representative James A. Wright, Democrat, of Pennsylvania; Representative Charles A. Halleck, Republican, of Indiana; Representative J. Percy Priest, Democrat, of Tennessee; Representative Walter C. Ploeser, Republican, of Missouri.

September 12: Should we have universal military training in peacetime? Representative James W. Wadsworth, New York; Warren H. Atherton, national commander, the American Legion; Norman Thomas, Socialist candidate for President; Dr. Broadus Mitchell, chairman, Committee Against Postwar Conscription of the Postwar World, acting chairman Postwar World Council.

September 19: What should be done with Germany? Miss Sigrid Schultz, author of Germany Will Try Again and former Berlin correspondent of the Mutual Network and the Chicago Tribune; Dr. Paul Hagen, member of the Council for a Democratic Germany and author of Germany After Hitler; Dr. L. M. Birkhead, national director of the Friends of Democracy, Inc.; J. King Gordon, managing editor of the Nation.

September 26: Business and the election. Senator Joseph C. O'Mahoney, Democrat, of Wyoming; J. Louis Reynolds, vice president of the Reynolds Metals Co. and chairman of the advisory council of Businessman for Roosevelt, Inc.; Senator Owen Brewster, Republican, of Maine; Malcolm Muir, president and publisher of Newsweek magazine.

October 3: Woman's stake in the election. Miss Fannie Hurst, novelist; Miss Marian E. Martin, assistant chairman of the Republican National Committee; Mrs. Emma Guffee Miller, Democratic National Committeewoman from Pennsylvania; Dr. Ruth Alexander, economist, lecturer, and editorial columnist on the New York Mirror.

October 10: The World Security Organization drafted at Dumbarton Oaks. Senator Joseph H. Ball, of Minnesota; Representative Hamilton Fish, of New York.

October 17: The P. A. C. and its effect on the election. Dr. Frank Kingdon, educator, author, and commentator; Senator James M. Tunnell, Democrat, of Delaware; Mr. Louis Bromfield, author and farmer; Representative Fred A. Hartley, Jr., Republican, of New Jersey.

October 24: What to do with Germany. Dr. John Haynes Holmes, minister, Community Church of New York, and chairman of the Civil Liberties Union; Henry J. Taylor, news commentator and correspondent, who was the last American in and out of Germany before Pearl Harbor, and author of Man in Motion; Dr. George N. Shuster, president of Hunter College, New York, and author of the recently published Germany—A Short History; Louis Nizer, attorney and author of the best seller What To Do With Germany; guest chairman Sydney Moseley.

October 31: Political periscope No. 3. Ernest K. Lindley, chief, Washington bureau, Newsweek; Gladstone Williams, Washington correspondent of the Atlanta Constitution and of the McClatchy newspapers of California; Emil Hurja, publisher of Pathfinder; Ned Brooks, Washington correspondent of the Scripps-Howard Newspaper Alliance; Milton Murray, Washington bureau of PM.

November 7: Election day—no program.

November 14: What should be our tax program after the war. Beardsley Ruml, treasurer of R. H. Macy Co.; chairman of the Federal Reserve Bank of New York; John L. Connolly, secretary and general counsel of the Minnesota Mining & Manufacturing Co., and member of the advisory committee for the development of the Twin Cities tax plan; William Benton, vice president of the University of Chicago and vice chairman of the committee for economic development; Harold Ruttenberg, research director, United Steelworkers of America.

November 21: What's holding back India's freedom? Sir Frederick Puckle, adviser on Indian affairs to the British Embassy; Norman Thomas, Socialist leader; S. M. Ahmed, economist and India trade consultant; Congressman Emanuel Celler, New York.

November 28: Should we have compulsory military training in peacetime? Senator Edwin C. Johnson, of Colorado; Representative James W. Wadsworth, of New York; Capt. Lowell Limpus, military analyst of the New York Daily News; Alonzo F. Myers, professor of New York University and chairman of the N. E. A. Committee for Defense of Democracy Through Education.

December 5: Should we freeze the social security tax? Representative Harold Knutson, Minnesota; Representative Walter Lynch, New York; Representative Charles Dewey, Illinois; Representative Herman Eberharter, Pennsylvania.

December 12: Is world-wide freedom of news essential to future world peace? William Ziff, editor and publisher; Henry J. Taylor, news commentator and correspondent; Eugene Lyons, editor, Pageant; Richard Eaton, publisher, News Digest magazine.

December 19: Should the House of Representatives have a voice in making treaties? Representative Francis Walter, Pennsylvania, chairman, Subcommittee of the House Judiciary Committee; Representative Edward Gossett, Texas; Senator Raymond Willis, Indiana; Prof. Herbert Wright, professor of international law, Catholic University.

December 26: No program.

1945

January 2: How adequate is the GI bill of rights? Senator Ernest W. McFarland, Arizona; one of the coauthors and cosponsors of the GI bill of rights; Willard Waller, author of the best seller, the Veteran Comes Back; Dr. Lawrence S. Kubie, leading psychiatrist and member of the National Committee for Mental Hygiene; Lee Garling, World War No. 2 veteran who has benefited from the GI bill; Maj. Gen. Lewis B. Hershey, Director, Selective Service System, guest chairman.

January 9: Do present methods of education fill the needs of returning veterans? Stringfellow Barr, president, St. John's College; Dixon Ryan Fox, president, Union College; Oliver C. Carmichael, president, Vanderbilt University; Kenneth I. Brown, president, Dennison University; Francis P. Gaines, president, Washington and Lee University, guest chairman.

January 16: What is America's present manpower problem? Brig. Gen. William C. Rose, Chief of Executive Services, War Manpower Commission; J. D. Small, Executive Officer, War Production Board; Senator Owen Brewster, Maine; A. F. Hinrichs, Acting Commissioner of Labor Statistics, Department of Labor; Representative Frank Hook, Michigan; Senator James M. Mead, New York, guest chairman.

January 23: How can we dispose of war surplus materials? Senator Harley Kilgore, of West Virginia; Senator Homer Ferguson, of Michigan; Gov. Robert Hurley, member, Surplus War Property Board; Mason Britton, Administrator, Surplus War Property Board; Albert H. Hall, Director, National Institute of Governmental Purchases; Walter Morrow, president, American Retail Federation; David L. Podell, General Counsel, Smaller War Plants Corporation.

January 30: Do we need work-or-fight legislation? Representative Andrew J. May, of Kentucky; Representative Dewey Short, of Missouri; Representative John J. Sparkman, of Alabama; Representative Chet Holifield, of California.

February 6: How large a merchant-marine fleet should we maintain after the war? Almon E. Roth, president, National Federation of American Shipping, Inc.; John F. Geham, president, the Propeller Club of America, vice president, American Export Lines; Dr. John Lee Coulter, consulting economist, American Tariff League; Harvey Klemmer, executive secretary, postwar planning committee, United States Maritime Commission.

February 13: Should we have more freedome or control in our international trade?

Wendell Berge, Assistant Attorney General; Senator Joseph C. O'Mahoney, Wyoming; Anton deHaas, professor of international relationships, Harvard University; Redvers Opie, Esq., economic adviser to the British Embassy.

February 20: Should the legal voting age be reduced to 18 years? Representative Augustus W. Bennet, New York; David Fund, senior, Wooster (Ohio) High School; Betsy Ancker, senior, Shortridge High School, Indianapolis, Ind.; Dr. Walter Crosby Eells, executive secretary, American Association of Junior Colleges; Robert E. Mertz, freshman, Lehigh University; Janie Peipel, senior, Adamson High School, Dallas, Tex.

February 27: Will adoption of the Dumbarton Oaks program give us permanent peace? Senator Claude Pepper, Florida; Senator Elbert D. Thomas; Senator William Langer, North Dakota; Mr. William B. Ziff, Editor and Publisher.

March 6: Will the Polish agreement best serve peace? Congresswoman Helen Gahagan Douglas, California; Congressman George E. Outland, California; Congresswoman Jessie Sumner, Illinois; Congressman Alvin C. O'Konski, Wisconsin.

March 13: What should be America's international commercial air policy? Senator Owen Brewster, Maine; Senator Pat McCarran, Nevada; Representative Harry R. Sheppard, California; Senator Warren G. Magnuson, Washington.

March 20: Should we adopt the Bretton Woods plan? Senator Charles W. Tobey, New Hampshire; W. L. Gregory, president, Independent Bankers Association; Senator Robert A. Taft, Ohio; U. V. Wilcox, Washington representative, American Banker.

March 27: Was the cause of lasting peace advanced at Yalta? Senator Joseph H. Ball, Minnesota; Senator Owen Brewster, Maine; Senator Glen H. Taylor, Idaho; Representative Bertrand W. Gearhart, California.

April 3: What shall we do with territory taken from the Japanese—trusteeship or annexation? Dr. A. N. Holcombe, professor of government, Harvard University, on leave; Chairman, Appeals Board, War Production Board; Representative Christian A. Herter, Massachusetts, former chairman, Boston Foreign Policy Association; Representative F. Edward Hébert, Louisiana; Representative Lansdale G. Sasscer, Maryland.

April 10: What is the food situation? Senator W. Lee O'Daniel, Texas; Representative A. L. Miller, Nebraska; Lt. Col. Ralph W. Olmstead, Director of Supply, Commodity Credit Corporation, Deputy Director, War Food Administration; Representative John Murphy, Pennsylvania.

April 17: Should we renew reciprocal trade agreements? Representative Frank Carlson, Kansas; Representative Richard M. Simpson, Pennsylvania; Representative Walter A. Lynch, New York; Representative A. Willis Robertson, Virginia.

Men Without Medals

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. McCORMACK. Mr. Speaker, under consent granted me to extend my remarks, I include herein a splendid article written by Edward T. Leech entitled "Men Without Medals" appearing in the magazine section of the Washington Star of May 6, 1945, a deserved tribute to the members of the 6,500 local draft boards, and their related agents and agencies. It follows:

MEN WITHOUT MEDALS

(By Edward T. Leech)

They're the members of the local draft boards, who've shown how democracy works.

They've never seen action, and never will, yet the war couldn't be won without these 10 American divisions.

They have served for four and a half years, without furlough or relief. And it has been hard service, trying, tiresome, and frequently sorrowful—performed without pay, without acclaim, without decorations, with almost no public recognition.

These 10 divisions consist of about 150,000 men who comprise the nation's 6,500 draft boards and their related agents and agencies—appeals boards, appeals agents, legal advisers to registrants, examining physicians, medical advisers, and reemployment committeemen.

They are the human element of Selective Service—the machinery that put the major part of 12,000,000 men into uniform without disrupting the home front.

They've been on the job since late in 1940, when America's first peacetime draft began functioning with the drawing of blue capsules from a gigantic bowl in Washington. Remember when No. 158 came out first? They were working then.

Today, as victory approaches, they are still feeding men into the war; but increasingly, their work now is with men returning from war to seek jobs back home. For Selective Service has the double duty of putting men into uniform and getting them back into jobs when those uniforms are put aside.

The men who make up Selective Service are your neighbors. For the basis of Selective Service is local control. Washington fixes general policies; State headquarters administer them; but the local draft board applies them and determines who shall go and who shall stay. And the local board is a neighborhood group, living with those whom it must judge.

On your board you will find men who are the backbone of your community. Not only the judge, the banker, the merchant, and the teacher, but the man around the corner, that civic-minded citizen who has given up the time in which he used to putter around the house, play with his kids, and who has volunteered, instead, for this important war job at home.

The draft board has more power than any group of unpaid volunteers in our history. Yet for all its troubles, for all the conflicts and complexities of the manpower question, it has worked with efficiency and freedom from major scandal, accusation, or politics.

There have been faults of course; but no such scandals as marked Civil War drafting and some World War No. 1 instances.

It was inevitable that in creating a mass citizen army for all-out war there would be confusion of regulations, frequent shifting of policies, border-line interpretations, and all the other uncertainties of constantly changing situations both at the front and at home. Plagued by those conditions and by all the questions they created among registrants and their families, the local draft boards had to carry on the most delicate of assignments.

Working usually in small and uninviting quarters in a schoolhouse or fire station or borough or township hall or some available public room, with a modest assortment of old furniture and makeshift equipment, these groups of neighbors have decided the fate of their home town and home street young men.

Draft headquarters is seldom much to look at. Some patriotic posters, mimeographed notices and newspaper clippings on the wall; a few desks and uncomfortable chairs; groups of boys and their fathers and mothers and employers waiting outside. This is where some little group of men has given many hours daily and several nights a week for over 4 years to unpaid public service. Only the clerical help receives pay.

Often the work has been agonizing. It has involved the lives of the sons of neighbors and friends, the disruption of homes, all the deep domestic dislocations and griefs of war. The draft board members must rule—and then continue to live with the neighbors so vitally affected.

They've been able to go on living among their neighbors because they've done a hard job honestly. They must tell others to fight; they deal in lists, files, and folders—the cold stuff of paper and steel cabinets. Yet they also work with flesh and blood, out of which has come an armed force battling without reprieve to finish the war and gain the goal of peace.

After victory, when our aim once again will be happy living, these men—whose only badge is "local board member, Selective Service"—can feel real satisfaction.. They've shown the world that democracy can act—quickly and effectively.

Postal Workers' Pay

EXTENSION OF REMARKS

OF

HON. WILLIAM H. STEVENSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. STEVENSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Greenville (S. C.) News:

POSTAL WORKERS' PAY

There can be little question but that the American people generally look with favor upon the present move in Congress to place the employees of the United States Postal Service upon a more satisfactory basis of compensation.

The men who handle our mails have earned only moderate salaries, and they have had no pay increase since 1925, except for a temporary cost-of-living-increase bonus of $300 a year, which expires under existing law on next June 30.

The time is ripe, we think it will be generally agreed, for more definite and more comprehensive action by Congress to establish a more nearly adequate plan of compensation.

Out of the many bills to this end, one of which was passed by the House at the last session, a comprehensive measure has been worked out in a conference of the Post Office Department, representatives of the employees and members of the House Post Office Committee. Offered by Representative BURCH, chairman of the House committee, it is generally known as the Burch bill, and would upgrade all classifications of postal workers, and in addition make more systematic and more satisfactory provisions with respect to overtime payment and longevity increases. The New York Journal describes this bill as one that would not only give postal workers better pay from the lowest to the highest brackets, but would also substitute an orderly general law for what has become a mass of piecemeal measures because of frequent amendments to the 1925 law. It regards this bill as the best legislation proposed in behalf of the postal workers since 1925.

The Nation's postal employees, it is safe to say, have the sympathetic approval of the people of the country in their effort to secure the enactment of such a measure now.

Radio Address at Portland, Maine

EXTENSION OF REMARKS

OF

HON. ROBERT HALE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. HALE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following radio address delivered by me on May 5, 1945:

Good evening ladies and gentlemen, the 2 weeks since I last broadcast have seen some of the most eventful days that have ever occurred on our planet. The victory has come in Europe. There may be more shooting. Some of our boys may still perish at German hands. But there is no longer a German army or a German state. The whole loathsome apparatus has fallen to pieces. The last few days have shown us how loathsome it was. All the stories that seemed incredible were true. The newspapers have revealed some of the horrors to the world. The movies will show them unmistakably to people the world over, above all to the German people. Look at these pictures and reflect that but for the grace of God your body might be hanging on a nail in a Nazi dungeon or shoved into a Nazi oven.

Those are the moral standards of nazidom that we rejected. Is there anybody who still thinks that we could have temporized with them or conciliated or appeased them?

This has been the last act of the great tragedy. The wheel has come full circle. The famous jaw that jutted out over the Piazza Venezia in Rome was laid in the dust of the Piazza Loretta in Milan. Benito Mussolini crying, "No, no," to the firing squad is the symbol of a man who has denied all the values of the human spirit. Hitler is dead, also, says the Hamburg radio. If it is not true today, it should be tomorrow. Sic semper tyrannis. So let it be with all bloodthirsty guttersnipes; whatever shirts they wear, whatever tongues they speak, whatever lands are darkened by their shadows.

This is a glorious hour, but a solemn hour. It is no time for cheap rejoicing. Too many brave men are dead. Too many must still die in the struggles to come in the Pacific. All Americans will wish simply to give thanks for their blessings and go on to the consummation of their European victory by triumph over Japan and triumph at San Francisco over the forces that cause wars.

San Francisco, bear in mind, is not a peace conference. It is a constitutional convention to form the framework of a new world society. I shall not comment upon it at any length tonight. It is too early to speak either of its successes, or if its failures. Our ideal is a world society with at least some rudimentary fabric of law and ethics to which we can commit the future. An alliance of powerful states is not a free world society but it can help a true world society come into existence. If it does not, it will go hard with us. The Russians have some uncomfortable ideas. They have not our conception of civil rights and they have played a lone hand in eastern Europe. No doubt many Russians distrust the genuineness of Anglo-American friendship. On that point they should receive every reassurance. I hope they in turn can reassure us that they want genuine collective security and not selfish spheres of influence. Real collective security will have military force at its disposal and it will be able to exercise control over the fabrication of munitions and armaments.

Two weeks ago I made some remarks about the war in the Pacific. I want to make some more tonight. At Cairo on December 1, 1943, we announced our aims in the war against Japan. We said, "The three great allies are fighting this war to restrain and punish the aggression of Japan. They covet no gain for themselves and have no thought of territorial expansion. It is their purpose that Japan shall be stripped of all the islands in the Pacific which she has seized or occupied since the beginning of the First World War in 1914, and that all the territories Japan has stolen from the Chinese, such as Manchuria, Formosa, and the Pescadores, shall be restored to the Republic of China. Japan will also be expelled from all other territories which she has taken by violence and greed. The aforesaid three great powers, mindful of the enslavement of the people of Korea, are determined that in due course Korea shall become free and independent."

Just lately a new Japanese Cabinet has been formed. There are only two generals in it and one of the old war lords. Its most striking feature is the predominance of admirals and specialists in Soviet affairs. The admirals are of the pre-Tojo group. Some of them are said to come as near to being friendly to us as it is possible to find in Japan. Undoubtedly the new Japanese Government wants to keep Russia out of the war and induce us to accept a negotiated peace. Admiral Baron Suzuki has begun his career as Premier by eating dirt in public, which is never easy for a political leader and is particularly hard for a Japanese political leader. Suzuki has expressed—I quote him—"deepest humiliation and regret at the development of a situation which has allowed the enemy to take possession of an integral portion of our empire. The very basis of the empire will be threatened if the situation is allowed to go along as it has been going." This is not the old swagger of Admiral Tojo. It is the voice of a very worried man.

And he has good cause for worry. The Jap Navy is done as a fighting force. It is capable of a demonstration, of sinking some of our ships, but it is no longer a formidable fighting force. Neither is the Japanese air force. The Japanese leaders know they have no friends in the world. They know that the corpse of Mussolini is spat upon by the populace of Milan. They know that the mighty of Germany are fallen and that Hitler, if he still lives, is hiding either in the rubble of his former capital or in the recesses of the Alps.

There may be some Japanese who don't know what our superfortresses flying now in comparatively short hops, our bombs and our incendiaries can do to their cities, and their people. But they will realize more clearly with each succeeding day.

It seems to me that we should stop talking about unconditional surrender and repeat what we said at Cairo, our war aims in the struggle against Japan. I think it possible that Japan might now accept our terms. In no sense do I advocate a negotiated peace. We could take this course with no sacrifice of principle or weakening of our moral or military position. I very seriously urge that this possibility be explored before we commit other thousands of Americans to die on beaches in China or on Formosa or the main islands of Japan.

In the last fortnight the House of Representatives has worked principally on routine appropriation bills. The most important exception has been the resolution to amend the Constitution by doing away with the provision that requires a treaty to be ratified by two-thirds of the Senate and providing in lieu thereof that treaties must be ratified by a simple majority of the Senate and the House. I approve of such a constitutional amendment and spoke for it on the floor of the House. The present constitutional right of one-third of those present in the Senate to block the ratification of a treaty is an obstacle and almost an insuperable obstacle to the whole conduct of our foreign affairs. In 1844 the Senate refused to ratify a treaty which admitted Texas to the Union. In 1897 they refused to act at all on a treaty for the admission of Hawaii. In 1919 they denied ratification to the Treaty of Versailles and this set in motion the great deteriorative forces that have led us along the bloody trails that the world has traveled in the last 6 years. There is no reason why the House as the more popular branch of the Federal Legislature should not share in the treaty-making power and there is no reason for not following here as elsewhere in our democratic Government the principle of majority rule. I see no reason for saying that the requirement of a two-thirds majority on treaties affords any necessary protection to the minority. In the debate on the resolution proposing the amendment no opponent of the amendment was able to show a single instance in which an undesirable treaty was defeated by the vote of less than a majority but more than a third.

John Hay, probably as able a man as ever headed our State Department, once exclaimed in exasperation: "A treaty in our Senate has no more chance than a bull in the arena."

The debate on the proposed amendment was conducted on a high plane. At the time of preparing this broadcast the vote has not been taken. A two-thirds vote in both branches is necessary to adopt the resolution.

Everyone is standing by now for good news in Europe. In my next broadcast there are certain to be many new developments to discuss. But for now, good night.

What Is the American Way of Life?

EXTENSION OF REMARKS

OF

HON. HAROLD H. BURTON

OF OHIO

IN THE SENATE OF THE UNITED STATES

Monday, May 7 (legislative day of Monday, April 16), 1945

Mr. BURTON. Mr. President, in the June issue of Reader's Scope there appears a symposium, consisting of three articles, on the subject, What is the American Way of Life? The first article is by the Senator from Massachusetts [Mr. SALTONSTALL]; the second by Gov. Ellis Arnall, of Georgia; and the third by the Senator from Wisconsin [Mr. WILEY]. I ask unanimous consent that the articles be printed in the Appendix of the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

WHAT IS THE AMERICAN WAY OF LIFE?

(A symposium)

LEVERETT SALTONSTALL, SENATOR FROM MASSACHUSETTS

The American way of life is the fulfillment of the ideals set forth by our forefathers; a life enjoyed by men created equal and endowed by their Creator with certain unalienable rights, among them life, liberty, and the pursuit of happiness. It is a way actually experienced by our people with freedom and justice for all. That all have not yet shared altogether alike only serves to inspire greater effort to reach the goal which has been in the hearts and souls of Americans from our earliest days.

As dear to us as the air we breathe is our conception of a land where the individual has No. 1 priority; where government is the servant, not the master of its citizens. Above all, we are determined that the United States

shall be a good place in which to live; where every man can earn his daily bread and have a good home. We are not satisfied unless our average citizen has a chance to get ahead and to raise his children so that they can have opportunity to be just a little better off than their parents.

For the deepest emotion which moves us all—faith based upon the worship of our Lord—comes our conviction that our homes are the very center of the American way of life. Only in a good home can be developed personal virtues on which the strength of our Nation depends: courage, initiative, self-reliance, willingness to assume risks and responsibility, eagerness to share in the work of making our country a better and better land.

Good government begins at home. It is from the home that the spirit of team-play and understanding spreads to the community, to the State, and to the Nation. Our people themselves are, indeed, our way of life, one big family, composed of many races and faiths, but united in brotherly love and determined that right shall ever be master over might.

ELLIS ARNALL, GOVERNOR OF GEORGIA

The American way of life can be summarized in a single word: Freedom. There are not 4 freedoms, nor 10 freedoms, but only 1 freedom: The right of the individual to lead his own life in his own way, free of the threat of interference so long as he interferes with no other man's freedom. Freedom of the individual has many aspects. Political freedom includes both the right to participate in government through democratic processes and those civil liberties guaranteed by our Bill of Rights. Economic freedom implies the right to earn a livelihood and the opportunity to do so. But these aspects of freedom are not the whole of man's unalienable heritage. He has the right to the pursuit of an ever-fugitive happiness, which may elude him or may disappoint him, but which remains for every man the true measure of his liberty.

Freedom is not to be found where men are deprived of opportunity through exploitation, nor where they are deprived of individuality in a dull monotony of regimentation. It is to be found only where the free man's freedom is limited only by his inescapable obligation as an individual to maintain, as dearly as his own, the right of other men to be free.

Material prosperity has been an incidental of the American way of life, which brought men across uncharted seas to forest wildernesses that they might build a New World in which freedom, which had been rejected in the Old World, should be the cornerstone.

ALEXANDER WILEY, SENATOR FROM WISCONSIN

The American way of life is the trail which was blazed by our pioneers and which grew into a high road of happiness for the great mass of our people for these 160 years. This high road is lined with the living trees of liberty, the Declaration of Independence, the Constitution of the United States, and the other historic documents and words of our great statesmen and humble citizens. And these trees of liberty, in turn, have borne the sweet fruit, the abundant fruit, which have made the American way the abundant way of life.

This life abounds in blessings, spiritual and material. It is a life as overflowing with opportunities as an American harvestland, as filled with inspiring challenges as a big city skyline, as neighborly as a country fair or a barn dance, or a community sing, and as peaceful as Main Street on Sunday morning when the town is at prayer meeting. It is a life with the time-saving efficiency of a Detroit assembly line, and the time enjoying leisureliness of puttering in the family garden.

It is a life where there is competitive sportsmanship in business like an intercepted forward pass on the football field, but a life in which the selfsame business by mass production and brilliant promotion puts a radio in four out of every five American homes. It is a good life made constantly better by better working hours, better working conditions, wages, nutrition, health, recreation, schooling, and home-making. It is a meaningful life of abundant progress and abundant evolution, individual and national. It is a robust life in which every man, regardless of his race, creed, color, national origin, or station of origin, may rise to his fullest dignity, realize his fullest potentiality, reap his fullest reward by the sweat of his brow and the toil of his brain. It is an independent life where a man has the privacy of his own home, the choice of his own ballot marking, the selection of his own church, his own trade, his own risks. It is a life in which the citizen is informed and active in the affairs of his community, his Nation, and his world. It is a life in which the personal virtues of thrift, integrity, ingenuity, diligence, and cooperation are the intended virtues of the Nation. It is a life in which Government is a wise and helpful servant, in which the individual enjoys a Bill of Rights and at the same time recognizes his "bill of obligations" for the common welfare.

The Gentleman From Idaho

EXTENSION OF REMARKS

OF

HON. MIKE MANSFIELD

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. MANSFIELD of Montana. Mr. Speaker, under unanimous consent, I am inserting in the RECORD a personality sketch of the junior Senator from Idaho, the Honorable GLEN H. TAYLOR, which appeared in the May 7 issue of the Progressive. This article, written by Capt. Richard L. Neuberger, one of the outstanding authorities on the Northwest, Canada, and Alaska, gives a close-up view of the new and friendly Senator from Idaho.

Senator TAYLOR will, I know, make his mark in the Senate of the United States because, on the basis of what he has done to date, he has shown an ability to express himself clearly and to handle matters affecting his State and his country in a very efficient and capable manner.

It is a real pleasure for me to bring this article to the attention of the House because the membership here will come to know and admire Senator TAYLOR the longer he is with us. His kindness, friendliness, and courtesy typifies the real spirit of the West and we may rest assured that the magnificent start he has already made is only an indication of the great things which we may expect of him in the future.

The article follows:

FROM "SINGING COWBOY" TO UNITED STATES SENATOR

(By Capt. Richard L. Neuberger)

When GLEN H. TAYLOR, junior Senator from the State of Idaho, arrived in the National Capital, he and his wife and their two children, like a lot of other new arrivals, couldn't find a place to live. The Senator sat on the steps of the majestic Capitol Building and strummed a ditty on his banjo:

"O, give me a home near the Capitol dome,
With a yard where the children can play.
Just one room or two, any old thing will do,
Oh, we can't find a place to stay."

This confirmed most advance opinions of Idaho's new Senator. "Just another singing cowboy," everyone said. People knew that TAYLOR had sung Clementine, Oh Susanna, Home on the Range, and Wagon Wheels during his campaign. They braced themselves for buffoonery and court-jesting. They have been sadly fooled.

GLEN TAYLOR has proved one of the outstanding liberals to arrive in Washington in recent years. John Chamberlain, covering the Senate for Life, was told that "MORSE, of Oregon, and TAYLOR, of Idaho, were two newcomers to watch closely." And Senator ALBEN BARKLEY, the majority leader, informed a newspaper reporter that TAYLOR was sure to make his mark in the Senate.

Two of the most effective speeches for the confirmation of Henry Wallace and Aubrey Williams were delivered by TAYLOR. In addition, the Senators gave a careful hearing to his description of his own work in a war plant when he rose to oppose the manpower conscription bill. And at a Young Democratic Convention in New York recently, TAYLOR delivered a fighting address that was a high light of the occasion.

TAYLOR'S POLITICAL PHILOSOPHY

Many newspapermen on Capitol Hill have been told that TAYLOR may eventually be considered one of the foremost progressives in Congress. "Watch TAYLOR" is a common comment. This doesn't add up to the presession picture of a wild-eyed singing cowpuncher with chaps, lariat, and 10-gallon hat. Just what sort of fellow is GLEN H. TAYLOR, 41-year-old junior Senator from Idaho, who was elected last autumn in one of the big upsets of the 1944 campaign?

He is a slight, wiry fellow with many enthusiasms. He first became interested in politics a few years ago, when he decided he could do as well as many of the men in public life. Thus far in the Senate TAYLOR has been definitely on the liberal side of most issues. He fought for the confirmation of Henry Wallace and Aubrey Williams. He opposed passage of the manpower bill. One of his greatest enthusiasms was the late President of the United States. TAYLOR ran for Senator as a Roosevelt Democrat. He said that there had been two notable Presidents in history who paid particular attention to the far West—Thomas Jefferson and Franklin D. Roosevelt.

TAYLOR'S philosophy is best epitomized by a statement which he recently made to Young Democrats meeting in New York City:

"Jefferson was an advocate of private enterprise, but he also believed in public intervention, if necessary, to secure protection from dangerous concentrations of economic power. The long-established practice of passing on estates to the eldest son was a cherished institution, and when it became evident that its opponents were to win the battle, a compromise was offered suggesting that at least the eldest son should be allowed a double portion. Jefferson responded that he would favor that only when the eldest son could eat twice as much as each of his brothers.

SHOW BUSINESS AND DEPRESSION

"I think we must keep this thought in mind in our postwar world. Everyone should have equal opportunity and equal rights. We must give more attention to the individual. We have been so engulfed with our rapidly expanding industrial system that sometimes

we have lost sight of the individual. Frankly, the one solution I see is to bolster wage standards and guarantee the people sufficient purchasing power to buy everything that can be produced in the way of services and goods.

"It was our failure to face the truth that brought economic collapse before. It was that collapse which left people hungry while resources and machines stood idle. It was that collapse which prepared the soil for Hitler, Mussolini, and Franco. It led us directly into World War No. 2. Unless we face these economic problems in a realistic manner, everything that may be done by the diplomats at San Francisco will be of little avail and the peoples of the world will continue their violent quest in search of economic security."

This progressive outlook on world affairs stems from a unique background in the Far West. GLEN TAYLOR was born in Portland, Oreg., in April of 1904. His father, Pleasant John Taylor, a nomadic preacher was holding a prayer meeting there. Pleasant John preached in camps and outposts all over Idaho, Oregon, Colorado, and Utah. The frontiersmen would not pay for their religion, however, so the Taylor family put on concerts to finance the trips.

The whole family was musical. This propensity still continues. Several of Glen's brothers now manage a chain of theaters extending from the Idaho uplands to the eastern edge of Montana. Another brother, Ferris Taylor, is in the movies. As a boy, Glen acted in his father's shows. "I usually was killed in the third act," he recalls, "but we were short of actors, so I came back as the sheriff in the fourth act to arrest the man who had killed me!"

After Glen was married he and his wife started their own company. They called it the Glendora Players, combining both their first names. They had made a good beginning when the depression came along. They suffered with the rest of the Nation, traveling from town to town, often broke and hungry. "The want and misery I saw during those years," the Senator now recollects, "made me do some serious thinking. I saw people hungry and ill-clothed and out of work, when I realized that our factories could still produce if the people just had enough money to buy the products. I started reading economics and political science and decided I could do better than the lawmakers and leaders who had let things get into such a terrible mess."

In 1937 GLEN and Dora TAYLOR moved to the Idaho town of Pocatello. She played the piano, he played the banjo, and they broadcast cowboy and ranch tunes over the radio. In 1938 he ran for Congress, using a hill-billy band in the campaign, and finished fourth in a field of 9. In 1940 Glen was nominated for the United States Senate on the Democratic ticket, but was defeated in the general election by 14,000 votes. His conqueror was JOHN THOMAS, 71-year-old present senior Senator from Idaho.

TAYLOR ran for the Senate again in 1942, losing by only 4,000 votes. He rode a horse in the campaign, and his wife and their 7-year-old son helped entertain the voters with music. TAYLOR moved to California to work in a war plant. As a prominent political figure, he could have had an executive job but worked at a bench for 2 years as a sheet-metal mechanic. He went back to Idaho for the 1944 campaign and edged out Senator D. Worth Clark by a slender margin in the Democratic primaries. The final election was between TAYLOR and Gov. C. A. Bottolfson, a conservative Republican. Betting was on Bottolfson, but TAYLOR talked about Roosevelt. Bottolfson talked about Dewey. Idaho went for F. D. R.—and GLEN TAYLOR. His most cherished message of congratulations was a letter from the war plant where he had been an employee, signed by all his fellow workers.

Franklin D. Roosevelt changed the trend of politics in Idaho. A Republican State for years, this mountain commonwealth voted four times consecutively for F. D. R. Now he is gone. GLEN TAYLOR, a 41-year-old singing cowboy and war-plant worker, inherits the New Deal mantle in the State. TAYLOR is liberal and progressive. His memory bears the scars of the depression, when he and his wife played to meager audiences and had to count their pennies. He remembers when they could not pay the grocery bill. His liberalism is practical rather than theoretical. He is sure to be a political figure for many years to come. He is young and aggressive. His Senate term runs until 1950 at least. Idaho's senior Senator is past 70. The Nation will probably hear more of the young man who a year ago was hammering out sheet-metal strips in a machine shop.

Universal Training

EXTENSION OF REMARKS

OF

HON. WALTER G. ANDREWS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. ANDREWS of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by Ernest M. Hopkins, president of Dartmouth College:

UNIVERSAL TRAINING—PREPAREDNESS TO DISCOURAGE ALL FUTURE WARS IS URGED

To the EDITOR OF THE NEW YORK TIMES:

In consideration of the debate about the desirability for universal military training too little attention, it seems to me, is given to the essential fairness of the proposal. Whatever the temporary inconvenience or minor sacrifice in the individual case or the necessity for readjustments upon us collectively, it is far more just that some responsibility for the maintenance of free institutions should be laid successively upon each generation for a brief time than that periodically every few decades the tragedy of war should be imposed for half decades or more upon generations contemporaneous with the respective emergencies.

I do not assume that permanent immunity from war can be made completely certain whatever we do. On the basis, however, of some continuing contacts with sentiment abroad through the years since World War No. 1. I am fully persuaded that a well-devised and intelligently established system of universal military training would be in very large degree insurance against the frequency of war and might be more. I cannot think of any proposition that I should not consider imperative that decreased in the slightest degree the hazard of war or even increased the span of time between one war and another.

WARS LESS LIKELY

I want a system of universal military training established in the United States because I believe it would make wars less likely. For the second time in little over two decades I watch day by day the mounting list of Dartmouth's dead. Other colleges and universities have like lists. And beyond these are the thousands upon thousands of attractive lads of other associations and other backgrounds who all together were to constitute the warp and the woof of the pattern of our citizenship in years to come, pattern that now can never be what it might have been.

It is not an experience that can be borne except in grief to receive the daily items announcing the deaths of boys over whom one has watched with affection and with keen anticipation of what they might have become, or to realize the sorrow imposed upon their suffering families. It does not make for poise and calm and philosophical rationalization about the minutiae of daily living. Rather it makes for anguished query whether as a people we must always be subjected to the cost of our lack of realism.

RESISTANCE AT RIGHT TIME

It has been estimated by military authorities that nazi-ism could have been stopped at the time of the invasion of the Rhineland at a cost of a few hundred casualties at the most, and at the boundaries of Austria at a cost of a few thousand, had organization and will existed among peace-loving nations to have undertaken resistance then. I once asked a distinguished American in the Government whether any resistance on those occasions had been considered. "With what?" he replied. "Neither the United States nor England had trained men, matériel or convictions in those years."

It isn't reassuring to reflect what would be our situation at the present time if any one of numberless things hadn't occurred, particularly England's dogged and exhausting defense while we slowly came to understanding of what the war was all about; or Russia's entry into the war and her valor in it while we slowly got under way. If we in opulence, inertia, and self-righteousness withhold from preparedness for a possible World War No. 3, we will invite it.

MEASURE OF DEFENSE

But someone says, "Possibly so, but what does that prove about universal military training?" "Everything," in my belief. The circumstances of modern life demand elimination of any time lag as a factor in preparedness. The measure of our defense will be the extent not only of our provision for war but also of our readiness for it for long time to come, except for agreement more binding than anything now in sight.

Public sentiment in Europe as I saw it in the two decades following World War No. 1 offering many warnings of onrushing tragedy. Increasingly year by year subsequent to our refusal to enter the League of Nations the insistent belief cumulatively developed among the peoples of the Continent that the United States not only would not take any responsibility to support the peace-loving nations of the world, but that on the contrary we were so confident of our immunity from attack that we believed we could safely accept the hazard of doing nothing to defend ourselves against possible aggression.

German university men, students and graduates, stated frankly that the Reich was about ready to take over supremacy in Europe, and Italian Fascist officers boasted of what they were going to do in making the Mediterranean Sea their own exclusive lake. Again and again I asked whether there was no concern at all among them about public sentiment in England and America. With no single exception that I can remember was the question answered with anything except amused tolerance among those most friendly or derisive comments among others as to the lack of public spirit and of virility in the soft and effete democracies.

The most revealing experience of all to me as to what our attitude was doing to jeopardize our own safety eventually as well as to invite disaster to the rest of the world came in France early in 1935. In conversation with the spokesman of a brilliant group of young physicians, himself a distinguished veteran of World War No. 1, and neither rightist nor leftist in sympathies but inclined to lean toward the Popular Front, he

said nevertheless that the common sentiment held that France had been deserted and betrayed since Versailles by both England and America, that she was defenseless against Germany, and that many believed there was no hope for her except in an alliance with Russia or Germany. Personally he was inclined to think Germany the safer choice. He read me letters to the same effect. Many of the letters bespoke not only distrust of but antagonism toward the United States and England. "The United States," he said, "if in the League could with England have assured peace in Europe and given France safety. We were led to rely on that. As it is, our only hope of security is not to offend Germany." Then sadly came the conclusion of the whole affair as far as he and his friends were concerned. "Public sentiment being what it is, if some one on a white horse were to ride through the gates of Paris tomorrow, the world would be astonished at the following that would turn out to accept leadership from him." He begged me to make these facts clear to my friends at home.

WORDS NOT ENOUGH

Again I seem to hear the comment, "But what does all this have to do with universal military training?" Again I answer, "Everything." Any disposition in America toward preparedness would have given Germany and Italy pause and France reassurance. I would at this point, listening to the arguments of those who oppose universal military training, freely grant, as I have stated before, that wars may still be a possibility after a post-war organization for the maintenance of peace is set up. Words will not necessarily preclude war. An organization in which the great powers sit together in continuous session to smooth out differences and to try to maintain peace will be a long step toward eliminating some of the hazards that lead to war. As such it is imperative, but it can never in itself be a complete barrier. This is the answer to be made, it seems to me, to those who argue that because San Francisco is designed to lead the mind of the world toward peace, we should forego any organization internally that would make force available to us to protect ourselves.

IDEALISM INEFFECTIVE

Regarding the arguments of those who say that universal military training will jeopardize the efforts toward setting up a peace organization, let us not ignore the fact that the idealists have had their day—that the League of Nations, the Disarmament Conference and other such movements were all patterned on the premise that the world had reached a sufficient stage of civilization so that in the future wars would be outlawed. Subsequent events have proved how false that assumption was. Therefore, until such time as the whole world has been educated to the belief and is ready to accept the ideal of enduring peace, it is going to be the responsibility of the peace-loving nations to maintain the peace by at least the threat of force, if not by actual force.

People ask me as a college officer if universal training would not disorganize college procedures. The answer of course is, yes. However, the problems of reorganizing life in the college, the home or the community do not interest me in the slightest degree beside the possibility that a system of universal military training might save our youth from suffering and dying in war a quarter of a century from now.

ARMY ONLY ALTERNATIVE

The proposal for universal military training is a proposition purely and simply to enhance the military security of our people. Its alternative is a huge standing army for years to come. Protection in one way or another must be given against the necessity of becoming involved in wars engendered by those who may in the future believe, as has been believed twice in our time, that our unpreparedness made it safe to violate every principle in which we believe. Moreover, the proposal to my mind is valueless except as it envisages military training exclusively. Valuable byproducts doubtless would accrue to the individual and to society from establishment of the proposition, but military security for the American people in the enhanced possibility of escaping future wars must be the one all-inclusive purpose of such a project.

Finally, for those who fear the effect of the proposal upon the spirit of democracy, the plan seems to me to embody the very essence of democracy in imposing alike upon all equal responsibility for the maintenance of the democratic state and the freedoms they derive from this. Moreover, there unquestionably would be some inconvenience and some disappointments involved in the readjustments of such a plan. I grant it. But my eye turns to the pages of fine print in the Times by my chair—the headings are "Dead," "Wounded," "Missing." After this I am not interested in the inconveniences to be met by institutions or individuals. I do not care how great the problems of readjustments may be in the fields of learning, labor, or management. I am not even concerned over possible changes in our form of Government if freedom be safeguarded, or whether our taxes be greater or less. The only thing that seems to me of the slightest consequence in the world is that boys like these shall not again have to walk this Gethsemane, that these pages of fine print shall never again have to be published. A Nation-wide prepardeness to such extent as universal military training would provide might make such possibilities into probabilities. I pray it may be tried.

ERNEST M. HOPKINS.

HANOVER, N. H., May 1, 1945.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. CECIL R. KING

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. KING. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the memorial sermon in memory of President Franklin D. Roosevelt delivered at the Gardena Baptist Church by Rev. W. Floyd Alexander, Sunday, April 15, 1945:

When news came concerning the death of the President, we were all momentarily stunned. Then sorrow encompassed us. Our hearts felt heavy. We felt as though a close member of our household had been taken. We ask why? We are reminded that great statesmen, even Presidents, have died before. They have shocked us with their death, but we never felt a personal loss such as we felt when we received news of the death of President Roosevelt.

Yesterday our mayor called together clergymen of this community to plan a memorial service for our beloved President. Mayor Rush, clergymen, and other leaders of the community planned to have this service next Sunday at the high school. Plans could not be carried through for a proper community-wide memorial service immediately. Almost all churches are going to have as the main feature of their service a reference to the President. But for our own church we planned this memorial service. I personally felt we could not do otherwise. No one in our congregation was interested in anything else. In our plans the choir met last night, Saturday night, and practiced favorite hymns of the President, and we have sung almost all of them this morning.

I feel as you do this morning—an irreparable loss. There are reasons why we feel this. First, the President for years has been a member of our respective families. It is true that he was never present physically in our homes, but he was very real to us all through his voice which for years has been a guiding voice in our households. We depended upon him for political guidance. We did not feel the weight of political responsibility because we knew he was taking care of our Nation internally, and in international relations. Our entire life has been for some 12 years remolded, modified, and patterned after an economy developed by the President.

We trusted his judgment in international affairs. Many criticized him for his policies. He listened to criticism, as every God-fearing man must do, then he proceeded to do that which he knew was right, even at the risk of losing powerful political support. He put duty and service to God and man above political favor and popularity. He felt within him a spirit that dominated his life and compelled him to press forward. The apostle Paul felt the same spirit when he wrote to the Corinthians: "Woe is unto me, if I preach not the gospel." No one will ever know, for instance, the number of lives of innocent people that were actually saved by the policy of lend-lease. When this was inaugurated it was not popular. Insight, forethought, and an abundance of common sense enable the President to have a total picture of the world situation.

Further evidence of his closeness to our homes was the reaction his death caused upon the children. No death has so universally affected the lives of so many children and young people. A young man, one of our soloists, was prepared to sing The Lord's Prayer as a part of this memorial service. He found that it was impossible to sing because his sense of personal loss was so great that he would be forced to weep during the singing. This is only one index of how deeply children and young people felt the tragic loss. Other Presidents have died, but children and young people of past generations did not feel a deep sense of personal loss as they felt when the President passed on. This was due to many things. His fireside chats, his speeches, were delivered in such a manner that children and young people could understand them and enjoy them. Other great personages have spoken, and do speak, but their manner makes it hard for children and young people to understand them. As far back as most children and young people can remember, the voice of the President has been coming into their homes. He was the interpreter in political matters at home for both children and adults.

He was great, too, because he was used as a servant through whom many innovations were to come. He knew that he could not bring into existence a Utopia. He knew the difficulties and problems arising out of an attempt to establish a lasting peace. What he wanted to do, and did do, was to lay the foundation for a lasting peace. What he wanted to do in our social life was to make changes that would lighten the load of the common man and give him an opportunity to lift himself higher in the social scale. Great changes came through his proposals. We associate him with these changes.

Then, too, he was the champion of the weak, helpless, crippled, and the maimed. His resolve and fight to overcome his handicap

gave an example and courage to every handicapped person in this country and throughout the world. His example helped them to take an objective view and press forward with greater courage and hope.

Last November he offered a humble prayer that was an expression of a great Christian spirit. He said:

"Almighty God, of whose righteous will all things are and were created, Thou hast gathered our people out of many lands and races into a great Nation. We commend to Thy overruling Providence the men and women of our forces by sea, by land, and in the air; beseeching Thee to take into Thine own hands both them and the cause they serve. Be Thou their strength when they are set in the midst of so many and great dangers. And grant that, whether by life or by death, they may win for the whole world the fruits of their sacrifice and a just peace. Guide, we beseech Thee, the nations of the world, into Thy way of justice and truth, and establish among them that peace which is the reward of righteousness. Make the whole people of this land equal to our high trust, reverent in the use of freedom, just in the exercise of power, generous in the protection of weakness. Enable us to guard for the least among us the freedom we covet for ourselves; make us ill content with the inequalities of opportunity which still prevail among us. Preserve our Union against all our divisions of race and class which threaten it. And now may the blessing of God Almighty rest upon this whole land; may He give us light to guide us, courage to support us, charity to unite us, now and forever more. Amen."

We remember how he appealed for a revival of religion in our country. We have sung some of the best hymns of the Christian church this morning: God of Our Fathers, Goin' Home, Faith of Our Fathers, Crossing the Bar, Our God, Our Help, Abide With Me, and Nearer My God to Thee. I have heard that some of these were his favorites. I imagine he was like some of us. They all were his favorites, and it was hard to choose which one was his real favorite. I am also reminded that Eternal Father, Strong to Save, was his special favorite. Certainly it does embody some of the Christian philosophy of this great man:

"Eternal Father, strong to save,
Whose arm hath bound the restless wave,
Who bidd'st the mighty ocean deep
Its own appointed limits keep:
O hear us when we cry to Thee
For those in peril on the sea.

"O Christ, whose voice the waters heard,
And hushed their raging at Thy word,
Who walkedst on the foaming deep,
And calm amid the storm didst sleep:
O hear us when we cry to Thee
For those in peril on the sea.

"O Holy Spirit, who didst brood
Upon the waters dark and rude,
And bid their angry tumult cease,
And give, for wild confusion, peace;
O hear us when we cry to Thee
For those in peril on the sea.

"O Trinity of love and power,
Our brethren shield in danger's hour;
From rock and tempest, fire and foe,
Protect them wheresoe'er they go:
Thus evermore shall rise to Thee
Glad hymns of praise from land and sea.
Amen."

You have come here this morning somewhat frustrated, as to what will happen to our Ship of State. We can be well assured that it has been left in good hands. In all probability our President had a premonition that he could not carry his ever-increasing responsibilities for another term. He realized that if he should be called from this earthly life someone should assume the responsibilities of state who could carry forth where he left off. He chose out of his knowledge of many personalities Senator Harry Truman for Vice President, and his successor in the event that he could not carry on. Senator Truman is going to assume his obligations and fill the vacancy left by the President in such a manner that we are all going to be greatly surprised in his ability. Senator Truman will do a good job and do it well. The affairs of state have not been left in a mass of confusion. They are in good hands.

There is no parallel in history to compare to our President. No life analogous to his either in secular or religious history. If I should point out to you the state of confusion in which the early disciples found themselves after the death of Jesus, I will necessarily have to modify the parallel in many respects. We find ourselves in many ways in the same attitude of mind that they were in. The early disciples felt hopeless and downcast when Jesus was taken away. They felt that nothing was ahead but a lost cause. But on second thought they realized that the only alternative was to go forward. They rose to meet the occasion. God helped them to meet the future that was before them. We, too, may fully trust in His omnipotent hand. We can say as did the psalmist:

"God is our refuge and strength, a well-proved help in trouble. Therefore we will not fear though the earth totter and the mountains topple into the heart of the sea. The heathen raged, the kingdoms were moved: He uttered His voice, the earth melted. The Lord of hosts is with us; the God of Jacob is our refuge. Come, behold the works of the Lord, what desolations He hath made in the earth. He maketh wars to cease unto the end of the earth; He breaketh the bow, and cutteth the spear in sunder; He burneth the chariot in the fire. Be still, and know that I am God; I will be exalted among the heathen, I will be exalted in the earth. The Lord of hosts is with us; the God of Jacob is our refuge." (From the American translation by Smith and Goodspeed, Psalm 46.)

The question comes to many minds today wondering why our beloved President was not spared to see the fruits of his labor literally come to pass. Why didn't he live to see the promised land of peace and plenty. He worked, lived, and died to see this come to pass. In an address before Congress a few months ago he pronounced his doctrine of the "four freedoms." He said in part:

"We look forward for a world founded upon four essential human freedoms. The first is freedom of speech and expression everywhere in the world. The second is freedom of every person to worship God in his own way—everywhere in the world. The third is freedom from want, and the fourth is freedom from fear."

We cannot answer in full the question of why he was not spared to see the machinery actually set up to help establish these basic concepts of life. We can only repeat in verse, in song such penetrating words as these:

"Not now, but in the coming years,
It may be in the better land,
We'll read the meaning of our tears,
And there sometime, we'll understand.

"We'll know why clouds instead of sun
Were over many a cherished plan,
Why song has ceased when scarce begun;
'Tis there some time, we'll understand.

"Then trust in God through all the days;
Fear not, for He doth hold thy hand;
Though dark the way, still sing and praise;
Some time, some time, we'll understand."

—*Oswald Smith.*

Or as the Apostle Paul has reminded us concerning our limited human understanding "For now we see in a mirror, darkly; but then face to face: now I know in part; but then shall I know fully even as also I was fully known."

We might ask why so many great heroes and champions for the common man did not live to see the full fruition of their labor Why did Moses die before he reached the promised land? His youth was spent in Egypt, preparing to bring the children of Israel out. For 40 years they followed him through the wilderness. He fights enemies without, and puts down dissension within his ranks. He gives to his people unity, law, morality, faith in God, and great hopes for the future. He is their deliverer, prophet, and lawgiver. He makes a nation out of a mob of discouraged and despondent people. But death takes him just before he was ready to enter the promised land with them. Suddenly there came the news:

"My servant Moses is dead; proceed, then, to cross the Jordan here, you and all this people, into the land which I am giving them. Every place on which the sole of your foot treads I have given you, as I promised Moses. * * * No one shall be able to hold his own against you as long as you live, in that I will be with you, as I was with Moses, never failing you nor forsaking you. Be strong and brave; for you shall put this people in possession of the land which I swore to their fathers to give them. Only be very strong and resolute to be careful to do just as my servant Moses commanded you, swerving therefrom neither to the right nor to the left, so that you may succeed in everything that you undertake. Do not be frightened nor dismayed; for the Lord your God is with you in whatever you undertake" (Joshua 1: 2-9).

Moses is not alone. Many of the great leaders of the children of God never saw the actual fruition of their labors. We have a record recited in the Book of Hebrews of how so many could only reach or see their promised land by faith:

"Faith led Noah, when he was warned by God of things no one then saw, in obedience to the warning to build an ark in which to save his family, and by such faith he condemned the world, and came to possess that uprightness which faith produces. Faith enabled Abraham to obey when God summoned him to leave his home for a region which he was to have for his own, and to leave home without knowing where he was going. Faith led him to make a temporary home as a stranger in the land he had been promised, and to live there in his tents, with Isaac and Jacob, who shared the promise with him. For he was looking forward to that city with the sure foundations, designed and built by God.

"All these people lived all their lives in faith, and died without receiving what had been promised; they only saw it far ahead and welcomed the light of it, recognizing that they themselves were only foreigners and strangers here on earth.

"Time fails me to tell of Gideon, Barak, Samson, Jephthah, David, Samuel, and the prophets. They all gained approval by their faith, but none of them received what he had been promised, for God had resolved upon something still better for us, that they might not reach the fulfillment of their hopes except with us" (Hebrews 11).

The key or secret to this passage is that they reach their fulfillment through us. "For herein is the saying true, one soweth and another reapeth. I sent you to reap that whereon ye have not labored; others have labored, and ye are entered into their labor" (John 4: 37-38). The hopes, objectives, and plans of the President will be realized and brought to pass through us.

Our beloved President has met and through the spirit of our Living God has conquered the last enemy—death.

"In all of these things we are more than conquerors through him that loved us. For I am persuaded that neither death, nor life,

nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord" (Romans 8:37-39).

He has fought a good fight, he has finished his course, he has kept the faith, and there is laid up for him a crown of righteousness which the Lord the righteous Judge shall give him. He has heard:

"Well done, good and faithful servant; thou hast been faithful over a few things, I will make thee ruler over many things, enter thou into the joy of the Lord" (Matthew 25: 21).

Unity After VE-Day

EXTENSION OF REMARKS

OF

HON. HUGH DE LACY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. DE LACY. Mr. Speaker, everywhere the peoples who love liberty and fought for it are rejoicing today. Europe is freed from the German slave master. The gates of his starvation pens and his murder camps are forced open. Those he made sick are cared for. Those he kept hungry are fed. Those he made homeless are returned to their homes, and the dead and the living dead are raised up to judge over him.

We turn now to our enemy in the Pacific. We turn now the whole power of our Nation and its allies to breaking the arrogant Japanese Empire and freeing the boundless waters of the Pacific and the vast stretches of Asia.

We turn now to our part in rebuilding shattered lands and shattered peoples, to administering justice in the lands and over the population of our late enemy.

Mr. Speaker, I have received an eloquent letter from my friend, Chief Warrant Officer Ben Paskoff, who writes of his observations of the people of Germany and of the fear that is in the mind of some of our fighting men that we at home will not gather the full fruits of this costly victory. He writes:

My experiences in Germany, what I have seen and done there so far, have aroused mixed feelings in me. The people here disgust me. They lack the basic dignity of a democratic people in trouble. Most of them fall into two major categories from the point of view of the impression they leave with the American soldier. Most of them are servile, subservient, toothy smiling, anxious to please, and you know all the time that you can't trust them to the extent of turning your back on them. The others, distinctly a minority, are arrogant and sullen. But even the veneer of their arrogance cracks when they see our apparently endless convoys of troops and matériel roaring through the narrow streets of their quaint, travel-folder towns, shaking the walls, raising the dust, and cracking the pavements; or when they gape open-mouthed at the powerful fleets of planes filling the skies.

I don't think there's very much of the destructive element in my make-up. Nothing used to delight me so much as to see shapeless and detached pieces of wood grow into carpenterial entities under Hugh's skilled hands, but a certain thrill passes through me when I see the destruction that has been brought to the sacred soil of the Reich. There's a powerful element of justice in the fact that the war has been brought back to its source, to its home grounds, that at last the people's will is being done. I can't help feeling a great deal of satisfaction that Guernica, Amsterdam, Stalingrad, Coventry, and the countless French towns and villages I saw razed to the ground, are being avenged. And to see the destruction and rooting out of the obvious signs of Nazi domination is in a sense the culmination of what I have thought and taught for a good many years. Do I sound smug? I don't feel smug. I have a feeling there hasn't been enough of such destruction in Germany yet.

I don't know where we used to get the information that there was great scarcity and near famine in Germany, but what parts of the country I've seen certainly belie that impression. Of course, my excursions have been confined to the southern parts but there, at least, no one seemed to have been suffering from a lack of food or clothes. Our common practice, when we enter a town and plan to stay for a night or more, is to inform the occupants of the houses we will need that they have a specified amount of time in which to gather together some basic necessities and get out. As a result, in the process of making our usual check through the house, including attic and cellar, for booby traps, time bombs, and s"chlike contraptions, we have been able to get a pretty well undoctored picture of the status of the family. Clothes closets have been full of clothes in good shape, and a great deal of it certainly not ersatz. And frequently hidden beneath plentiful potato, coal, or wood piles we have found bounteous stores of canned foods, preserved fruits, and vegetables, flour, etc. Also wine—much of it of excellent quality. There is no doubt that much of it came as plunder from the conquered countries—cheeses with the mark of Holland, French wines, etc.—but whatever the source, these b———s have the stuff.

If I sound bitter, it's because I am. You have to have seen the results of their work, spoken to Russian, French, Polish, Greek slave laborers—"displaced persons" the Army calls them—4 and 5 years in brutal bondage to these barbarians, or to some of our own boys who were German prisoners for varying periods of time, to begin to realize the measure of punishment that these people rate. And what worries me and a lot of other soldiers I've spoken to, is that some of the people back home are going to be so relieved and happy that the war in Europe is over that they're going to be willing to see the spirit of justice tempered by an utterly undeserved mercy.

The Army's policy with regard to German civilians is one of strict nonfraternization. And to the credit of the American soldier, be it said that so far it seems to have been one of the best obeyed military orders ever issued. The order will undoubtedly be more difficult to enforce when certain bodies of troops are settled down as occupation troops, but right now there appears to be a pretty complete understanding among the men of the reasons for the order. I, as well as the others, miss the social contact with a friendly civilian population that we found so pleasant in France, but the thought of friendly contact with these swine is revolting to me.

Mr. Paskoff was a college teacher of history before entering the service. He is a trained observer and a qualified interpreter. I hope that his remarks will help guide us as we face the serious problems of maintaining a unity of purpose among the United Nations, to win serious war yet ahead against Japan and to win and keep the peace.

Military Training—If

EXTENSION OF REMARKS

OF

HON. BERTRAND W. GEARHART

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. GEARHART. Mr. Speaker, because it contains one of the most thrilling stories of heroic sacrifice which only the spirit of do or die in our country's cause could inspire, a thrilling portrayal of a World War No. 1 incident which contains a hard-learned lesson which might well guide us in the shaping of our national defense policies of the immediate future, under unanimous consent, I spread upon the pages of the CONGRESSIONAL RECORD an article from the able pen of Col. G. W. Stuart, United States Army, retired, which first appeared in the Carmel (Calif.) Pinecone-Cymbal of Friday, April 6, 1945, under the significant title of "Military Training—If."

The article, Mr. Speaker, to which I have just referred is the following:

MILITARY TRAINING—IF

(By Col. G. W. Stuart, U. S. Army, retired)

Military training. What a mauling that expression has taken at the hand of controversialists! The words have been twisted and torn, colored and odorized to serve the purposes of argument, without respect for real meaning. Years ago it was the same with,—"Preparedness for war."

Well, perhaps it is one of the inalienable freedoms of democracy to indulge in unending and fruitless debate. This debate has been going on for many years without any beneficial result.

Suppose instead of asking, "shall we have military training?" we put the same question in another way, thus, "If we are going to continue sending our selected boys out to fight our wars for us, do you want them to have to go into battle, without knowing anything about it?" Only a demented person would answer, "Yes, that's what I want." The alternative is obvious and yet we have never done anything about it.

One of America's otherwise great men propagated the oratorical euphemism that in case we were attacked a million men would spring to arms overnight, implying that we needed no other preparation for national defense. Honest and informed people knew that the patriotism of our men was unchallengeable, but they also knew there were no arms for them to spring to overnight. The art of waging war requires more than a willingness to spring.

Perhaps a little tale of an actual event will speak more convincingly.

It was my first battle. My 3,000 soldiers were out in the trenches, in the dense darkness of the night, drenched by the drizzling rain. They could not even light a cigarette; absolute silence reigned; they were quiet, waiting, waiting for my order that would certainly send some of them to their death. Can you imagine the abhorrence of such a thought and such a duty for a commander? I loved my soldiers.

They had done well every job given them. Our present job was to make the enemy stop fighting. Our Government wanted a decent peace and was learning the age-old lesson all over again—that we had to pay the price—there was no other way. Only in fairy stories are desires fulfilled by wishing. Victory in this battle would be another step forward.

A great prayer welled up from my soul for wisdom to drive a sharp bargain with death for victory at the lowest possible price.

In a small flimsy, abandoned, first-aid shelter in the front-line trench, by the flickering light of a well-shaded candle, I was studying last minute orders and my map for the hundredth time. A heavy barrage from our own artillery and massed machine guns was hurtling overhead with deafening racket. Enemy guns replied and flashes of signal rockets illuminated the ghostly tangle of old wire in front of our trench.

A young boy crowded into our already packed shelter. "Who are you and what are you doing here?" he was asked. "Oh, I am the bugler of E Company. I just came in to get out of the rain." "Well get out and get back to your company. You can't get any wetter," he was told. As he slowly moved out, we could hear his trembling voice, reproaching us in the tone of an abused child. "That's no way to treat me when I'm just about to go over the top." He was just a scared little boy, afraid in the dark, and yearning for companionship, but there was no hesitation or doubt about his going over the top. We were both sorry for and proud of him. We were all scared, each in his own way. Much good it did legs to tremble and hearts to beat faster in that gang of the bugler boy of Company E.

Zero hour struck. All up and down the line leaders shouted above the din and roar, "Let's go." The battle was on. We climbed over and through the barbed wire, tearing the skirts of raincoats to shreds. The early light of dawn disclosed what the map had told me. There was a hill before us with woods to right and left. We advanced up the hill (Bean Hill—possibly named by Roman armies centuries before). Going up the hill the woods, filled with a dense undergrowth, difficult to traverse, converged but did not join. A gateway gap led a field road over the crest of the hill. I followed the road and there in the gap I found him. A fine specimen of American manhood—just right for tackle on an All-American team. There he was, lying on the ground in one of those attitudes that only death knows how to assume—Our first partial payment for the victory. Doubtless there would be others today—how many?

And then the idea came to me—I will study the terrain and reconstruct the circumstances leading up to the tragic end in each case, with a view of learning how to drive a better bargain next time.

As we moved up the hill, I had noted that my soldiers were doing just as, most likely, you would have done. They were not moving straight forward through the woods but were drifting out and massing in the more easily traversed open. I sent an order for them to scatter but probably some did not get it while others, untrained to unquestioning obedience most likely said, "Oh, the 'Old Man' don't know what he is talking about," and proceeded on their easier way with the crowd. Any trained soldier would have known that an enemy just recently pushed back from that terrain would have set up a pair of machine guns to pour a stream of cross fire on anyone following them through the gap. They anticipated that "those cocky undisciplined Americans will gang up and come over the hill in a massed group and we will get a pot shot at a covey." Something like that had happened, except that the itchy fingers of the enemy fired too soon at the first and smallest group. The rest scattered, obeying the command of enemy bullets much better than my orders to scatter. They were learning the art of war the hard way. We were fortunate in losing only one man. This was our first victim on the altar of ignorance, ignorance of how the tragic game of war is played.

The next victim I found out in a beautiful meadow. Standing by him I could reconstruct the picture of what had taken place only a few minutes earlier. He had been advancing on an irregular line with his buddies to right and left. A copse of woods a few hundred yards ahead had concealed the enemy. A burst of fire had forced him to lie down. Bullets and shrapnel were passing overhead or striking the ground around him. He was "pinned to the ground" and there was no place to go. To his right and left his buddies were rushing forward in short bounds and dropping down to fire at the enemy. But he was falling behind—that must not happen—had not the sergeant, back there in his 2 weeks training camp in the States, always been yelling at him to "keep up on line"? And so he plunged forward to his death—an unnecessary death—instead of waiting until his buddies, who were not pinned to the ground, could clear the way for him with their fire.

And so I visited every spot where a soldier of mine has been killed and made note of the circumstances.

By noon of the first day my blessed soldiers had swept back the enemy and advanced to a line on the ground which higher headquarters had marked as "Second Day's Objective." They had captured about fifty officers, hundreds of enemy soldiers, about one hundred pieces of artillery of all categories, several warehouses filled with valuable military supplies, a small railroad with engines and cars and, more important, had struck a mortal blow to the vaunted superiority of the boastful enemy.

What price had we paid? Apprehensively I checked up all the reports. We had 20 men killed out of our 3,000. Some war reporters might have called that "insignificant losses." They were not insignificant to me. Every individual loss was filled with significance. Could it have been avoided? I studied each case. Most of them had been with insufficient training. (In fact, there appears to be some foundation to the military legend that "Old soldiers never die.")

We could not expect to win such a victory without any losses. In fact you could hardly expect 3,000 men to go to a county fair without some casualties. We were ready to pay any reasonable price, but revolted at the idea of paying any excess, avoidable cost.

A careful study revealed that 30 percent of our 20 killed was due to ignorance—they did not know what to do in the situation. Applied to all our losses in that war, 30 percent of the number killed amounts to 20,000. That means we left buried in foreign soil 20,000 who should have returned to their homes, families, friends. (30 percent at Tarawa is 1,300—30 percent at Iwo is another 1,300 and so on.)

Out of the mass of suffering accumulating in the present global war, there is arising an irresistible demand for correction of one of our worst national sins—neglect. The parents of sons and the sons themselves are demanding that before we send them out in fight battles our Government shall be compelled to teach them enough about the game so that they will have every possible chance to accomplish mission and return alive.

If, then, we are to have some kind of military training, shall we first indulge in one of our peacetime pastimes and talk it to death? Shall we devitalize any law proposed, with the bane of all laws—"provisos"? Shall we be deaf to the demands of all those thousands whose death in battle could have been avoided? Shall we continue to deny the moral obligation we owe our living sons? Shall we engage in petty contentions, inspired by self-interest, as to the curriculum and who shall be charged with the job of teaching and end up with ineffective half-measure compromises?

As to a proper curriculum, this is no place for a gratuitous detailed prescription unsupported by authority but it is perfectly proper to express the opinion that, to be satisfactory, any plan adopted should be designed to produce in our boys and girls—(1) a correction of physical defects and weaknesses, (2) a sternly disciplined soul well harmonized with their God-given sense of fun and sparkling humor; (3) skill in manipulating the simplest tools of a soldier; (4) practice in the unchanging basic principles of the art of war. Training in the more technical implements rapidly becomes obsolete with new inventions.

As to the proper agency to conduct military training, I express no preference but am definitely opposed to unloading such a responsibility upon the already overloaded and underpaid teachers of our school system.

Some confuse "education" and "training," or consider the terms synonymous. I believe that a marked distinction should be made between education and military training. To my mind education should teach us how to live a full life and survive the battles of peacetime, while military training should teach us how to win victories in war at the lowest cost. John Milton combined both these purposes in his definition, "I call therefore a complete and generous education, that which fits a man to perform justly, skilfully, and magnanimously, all the offices, both private and public of peace and war." This may seem a pretty big job for one centralized group of teachers, but Milton's definition of a "complete and generous education" for citizenship in our democratic society cannot be successfully challenged.

Military training is above all a most practical subject. The successful teacher must have much more than an understanding of textbooks. Failure of any pupil to pass the final test in battle means a death that might have been avoided.

I would not be so wholly sold on peacetime military training if I were not firmly convinced that the best soldier makes the best citizen and the best citizen makes the best soldier.

Request for Removal of Certain Obstructions to Navigation From Calumet River

---

EXTENSION OF REMARKS

OF

HON. WILLIAM A. ROWAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. ROWAN. Mr. Speaker, under leave to extend my remarks, I include the following resolution adopted by the City Council of Chicago on April 23, 1945, entitled "Request for Removal of Certain Obstructions to Navigation From Calumet River":

Whereas tug operators complain of the hazards to navigation in the Calumet River between Lake Michigan and Lake Calumet caused by the obstruction to free passage created by the Calumet Western and Nickel Plate Railroad bridges; and

Whereas these obstructions prevent the use of the river by larger lake vessels and are a detriment to the development of the city's proposed barge-to-rail-to-lake interchange terminal in Lake Calumet because no experienced terminal operator will consider the Lake Calumet operation unless these obstructions to navigation are removed; and

Whereas the city and the Federal Government stand to lose much of the investment already made in Lake Calumet, and the great potential possibilities of this vast inland water-front industrial area: Therefore be it

Resolved by the City Council of the City of Chicago, That the Chief of Engineers of the

United States Army and the Congress of the United States be and they are hereby petitioned to take such steps as may be necessary to cause the removal of the said hazards and obstructions to the full and free navigation of the Calumet River between Lake Michigan and Lake Calumet; and be it further

Resolved, That copies of this resolution be forwarded promptly to the Chief of Engineers of the United States Army, and to the Members of Congress representing the Chicago area.

STATE OF ILLINOIS,
County of Cook, ss:

I, Ludwig D. Schreiber, city clerk of the city of Chicago, do hereby certify that the above and foregoing is a true and correct copy of the certain resolution adopted by the City Council of the City of Chicago at a regular meeting held on the 23d day of April A. D. 1945.

Witness my hand and the corporate seal of the said city of Chicago this 3d day of May A. D. 1945.

LUDWIG D. SCHREIBER,
City Clerk.

Philo Norton McGiffin, Sailor of Fortune

EXTENSION OF REMARKS
OF

HON. BERTRAND W. GEARHART

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. GEARHART. Mr. Speaker, few Americans are aware of the warm international friendship which has characterized Chinese-American relationships down through the years, and fewer still have a clear understanding of the long series of events upon which this friendship is founded.

No doubt the historically informed would point to the open-door policy, the refusal of the United States to accept its share of the indemnities which a weak and defenseless China had been coerced into agreeing to pay, the American philanthropies which are reflected in the splendid medical colleges, finishing schools, and universities as the basis of the kindly feeling that has so long existed between the peoples of these two great continental nations.

Important though these considerations are, proper emphasis has never been placed upon the heroic sacrifices of American nationals while in the service of the Chinese people, the amazing exploits of such American soldiers of fortune as Lt. Gen. Homer Lee and the thrilling adventures of such valorous sailors of fortune as Capt. Philo Norton McGiffin, an Annapolis graduate, the designer and builder of the first Chinese Navy, successful commander of a Chinese Fleet in the first naval engagement in which modern dreadnoughts were engaged. As a compelling factor, personalities such as these cannot be ignored.

It is not surprising, Mr. Speaker, that the story of Capt. Philo Norton McGiffin, packed, as it is, with thrilling incidents of gripping interest, should have inspired a fellow townsman, one of great literary ability, to take up his pen to write again of this most remarkable fighting man's exploits of more than a half century ago.

Mr. Earle R. Forrest, of Washington, Pa., has done just that in a most appropriate style and manner. So well does he tell this story of Chinese-American cooperation that I am constrained to ask unanimous consent that that which he has written so entertainingly may be spread upon the pages of the CONGRESSIONAL RECORD as a part of my instant remarks.

The retelling of this story during these days when China is again "at grips" with her ancient enemy, the Japanese, will inspire the people of our two great Republics to a closer cooperation in the accomplishment of our joint task of driving all forms of tyranny from the face of the earth. Ours in indeed a great undertaking.

Mr. Speaker, the article to which I have referred is the following:

PHILO NORTON M'GIFFIN FOUGHT JAPANESE IN BATTLES OF 1894—WASHINGTON COUNTIAN WAS FATHER OF NAVY OF CHINA

(By Earle R. Forrest)

Since the war between the United States and Japan opened at Pearl Harbor, the name of Philo Norton McGiffin, undoubtedly the first man from Washington County to fight against the Japanese, is coming more and more to the front. Not only was he the first from this section of Pennsylvania, but he was one of the first Americans to fight against the Japs. This was in the war between China and Japan in 1894. There were not many Americans fighting for China in that war because we did not give a hoot which side won—but that was in 1894.

Norton McGiffin, as he was known here, has been mentioned frequently in the Reporter during th last few years, just to bring to the minds of the generations of Washingtonians who have come along since he died 46 years ago, that he was a man whose name was known over the whole world in the middle of the 1890's, and a Washington man who made world history.

His name is brought to mind in the present case by a story that appeared in the column of Wally Boren in a Washington, D. C., newspaper of recent date. Endorsement is given Mr. Boren's suggestion that after we capture Japan we rename the biggest Jap town "McGiffinville."

Here is the story from the Washington, D. C., newspaper:

"Did you ever hear of Philo Norton McGiffin? Well, neither did I until a few nights ago. He was a real guy—I didn't just go make him up in my mind.

"There's a Chinese restaurant down the street and the proprietor, Mr. Wing Teh, likes my brand of chili, an' I like his chop suey. So every once in a while we trade a little patronage.

"The other night I enjoyed a dish of his barbecued duck—which goes by the name of 'Sin Ap'—when Wing brings me out a magazine dated 1894.

"'Americans long time fight Japan,' he says. 'Give look see what I find in ol' paper.'

"Well, it's a piece about Philo Norton McGiffin. He was a soldier of fortune—except for being a sailor instead. Ol' Philo was, by 1894, second in command of a Chinese battleship that outsmarted the Japs in the battle of the Yalu River, way back 49 years ago.

"Seems ol' Philo had to take over when the ship's captain got the jitters. They was short of ammunition, the ship got hit and set afire eight different times. Philo was wounded an' burned practically crisp, but somehow he came out alive an' not only saved his own ship, but also another Chinese battleship.

"Well, Wing knew, even if I didn't, that the Chinese lost that war of 1894 to the Japs because they didn't have enough stuff to fight with.

"Now, I ain't one to go makin' suggestions to the military authorities, but me and Wing think it would be quite fittin' if, the first time we capture a real part of Japan, on account of having enough men an' ammunition this time, we should rename the biggest Jap town 'McGiffinville.'"

Here is another thing about Philo Norton McGiffin that Mr. Boren does not know. He was the father of the Chinese Navy, and he was the first American or European to command a modern war vessel in battle, for the Battle of the Yalu River was the first combat between modern warships.

Neither was Norton second in command. He was commander of the *Chen Yuen* from the beginning, and when the Admiral was killed in the battle he became commander of the entire Chinese Fleet. And had not McGiffin been so terribly wounded when that big Jap gun went off, there might have been a far different story to tell of the Battle of Yalu River.

Mr. Boren is right when he calls Philo Norton McGiffin a soldier of fortune. He loved adventure; he loved the sea, and he loved to roam over the world. He came by that disposition honestly.

His great-grandfather, Nathaniel McGiffin, a Scotchman, came to America by way of Ireland. As far as we know today, his reason for coming to this land was to fight for liberty. At any rate he enlisted in the Continental Army at the outbreak of the Revolution. He fought with Washington at Brandywine and Trenton and spent the winter at Valley Forge.

Later he served under Lafayette when the young French patriot was the youngest major general the United States Army has ever known. At the end of the war young McGiffin received an honorable discharge. He came to Washington County and settled on Ten Mile Creek, in Amwell Township, where he was engaged in fighting Indians until peace finally came to the western border.

When the Mexican War broke out in 1846, Norton McGiffin, grandson of the Revolutionary War veteran and Indian fighter, enlisted in the old DuQuesne, of Pittsburgh, which was mustered into the service as Company K, First Pennsylvania Volunteers.

He marched with General Scott (Old Fuss and Feathers) from Vera Cruz to Mexico City. He was at the siege and capture of Puebla, October 12, 1847, where a comrade, James Phillips, Washington County, was killed. He fought at Churubusco, where Lt. Joseph F. Irons, also of Washington, was mortally wounded, August 20, 1847, dying in Mexico City August 26. He marched into Mexico City with the American Army and was at the storming of the Castle Chapultepec.

And when he returned to Washington County he brought a Mexican boy, Antonio Morales, with him. Antonio fought in the Civil War and spent the remainder of his life in Washington, a respected citizen.

When the Civil War broke out Norton McGiffin marched away as captain of Company E, Twelfth Pennsylvania Volunteers, on April 20, 1861. This was the first company to leave Washington, and it was in answer to President Lincoln's call for 75,000 volunteers to put down the rebellion.

When its term of service, 3 months, was over, Norton McGiffin returned as lieutenant colonel of the regiment. But the old war horse would not stay at home. He had smelled powder in Mexico, and he wanted to smell more. During the 3 months' service his regiment had been used to guard a railroad, and he had not heard the sound of a gun.

After the 3 months' service was over he enlisted immediately in the Eighty-fifth Pennsylvania Volunteers and was commissioned lieutenant colonel of that regiment.

It was disease that got this old warrior. During the Peninsular Campaign, under General McClellan, Colonel McGiffin was stricken with a malady which forced him to resign, a mere skeleton of his former self and made almost an invalid for the remainder of his life. In fact, many another man of less determination would have gone to bed and remained there. He lived to see his son become internationally famous and then die at the early age of 36. The old veteran of two wars died in Washington July 20, 1905.

With such a family background and such a father, it is little wonder that young Philo Norton McGiffin became a world wanderer and soldier of fortune.

He was born in Washington December 13, 1860 (some accounts say in 1863, but this is not correct), and at the age of 18 he entered the United States Naval Academy, graduating in 1882.

One of his little known, early adventures is a story told by some of the old-timers. During the great railroad strike in Pittsburgh in 1877, according to this old tale, young McGiffin was with the troops surrounded by the strikers in the roundhouse. They needed help and needed it badly, but the commanding officer of the troops was not aware of their predicament. How to get that help was a problem.

"If someone will show me how to start and stop an engine I'll get out of here and send help back," young McGiffin told the captain. There was an engineer among those militiamen, and he quickly showed the volunteer how to start and stop. Getting up a full head of steam, McGiffin climbed on board.

The roundhouse doors suddenly swung open and before the astonished strikers could recover from their surprise a big engine seemed fairly to leap at them from the open door, and they scattered away from its deadly path like a flock of frightened sheep before a pack of wolves. McGiffin got through and sent help back.

After cruising some in the Atlantic and South American waters, during which he contracted typhoid fever, young McGiffin, after his graduation was assigned to duty on the China Station. The people of that country appealed to him and he became so interested in them that when France declared war against China in 1883 as a result of the Chinese operations in Tonkin, the 23-year-old American, who had only been in the naval service 1 year, asked for and received his country's release from service and its consent to enter the service of China.

This was the beginning of the Chinese Navy and it was probably the real beginning of friendly relations between the United States and China. These relations were undoubtedly greatly enhanced by McGiffin during the years he spent in the service of the Chinese. And the Chinese, on their part, have long memories; they do not forget with the passing of years and the name of Philo Norton McGiffin is held sacred by them to this day.

During the war with France young McGiffin quickly showed his naval ability by capturing the only gunboat lost by the French in the Battle of the Yungtse River. After hostilities ceased by an equitable treaty in 1885, McGiffin was sent by the Imperial Government of China to England to superintend the construction of several gunboats for China—and he was just 25.

These were modern battleships, possibly not modern when compared with the fighters of 1843, but they were the beginning of modern battleships nevertheless.

One of these ships was the *Chen Yuen*, which was to become famous in world history 9 years later as the flagship of the Chinese Fleet in the Chinese-Japanese War of 1894–95.

The years passed and Captain McGiffin continued to build the Chinese Navy as best he could with the material allowed him. If he had had his way and received the full financial support of the Emperor there would undoubtedly have been a different ending to that war. At least Japan would not have felt that the "sons of heaven" were not invincible and the world in general would have had a different opinion of the China of 50 years ago.

In that war Captain McGiffin became world famous as the commander of the battleship *Chen Yuen* in the Battle of the Yalu River on September 11, 1894. He was in full command of the vessel from the start, not second in command as Mr. EOREN states. And it was the admiral of the fleet who was killed, after which McGiffin took command of the fleet; but by that time McGiffin himself was suffering from terrible wounds.

As a matter of world history, this Battle of the Yalu River was the first combat between modern warships, and Philo Norton McGiffin was the first American or European to command a modern war vessel in battle.

The defeat of the Chinese Fleet was undoubtedly due to the terrible wounds sustained by Commander McGiffin early in the battle. In trying to work the *Chen Yuen* to a point of vantage he was severly wounded. The story of what happened later is one of the most thrilling of that of any officer in all the history of naval warfare.

Just as he recovered consciousness while lying on the deck of the *Chen Yuen* he looked up to see a great Japanese gun directly above him swinging into position to fire. He knew that he would be blasted out of existence by the discharge, and, making a desparate effort, he managed to roll over and fall to a lower deck, but not in time to escape part of the blast.

His body was literally filled with splinters of iron and steel, all the hair was singed from his body, his clothing was blown off and both ear drums were broken by the concussion. Prior to that he had been shot in the back of the head and thigh, and his eyesight was so badly affected that he could never see clearly again.

If ever there was a man of iron it was McGiffin, for, in spite of his many wounds, he kept on, vainly trying to direct his ship It is estimated that the *Chen Yuen* was hit 400 times, 120 times by large shot and shell. Every part of the vessel was struck.

The courage of the Chinese was clearly demonstrated in this battle, for they resolutely stuck to their posts. Their wounded commander encouraged them to fight on, and he alone of all the Chinese commanders kept his ship in its proper position, thus protecting the flagship and saving the fleet from total destruction.

In was the custom at that time for Chinese commanders to commit suicide when defeated, but Captain McGiffin refused and fell somewhat in disfavor with the Imperial Government. He could not secure the medical attention necessary for his wounds, and returned to the United States.

On his way back he met the late James S. Stocking, Washington, in Europe, and to him he related his terrible experiences. Even after reaching this country he could obtain little relief from the pieces of steel scattered through his body. A friend of his told how he had seen McGiffin rub his abdomen until he located a steel splinter and then deliberately cut it out with a sharp knife. He never recovered and while in a New York City hospital lost his mind from his sufferings and killed himself February 11, 1897, at the age of 36.

He is buried in Washington Cemetery, and today we may see his grave in the old section. The inscription on the granite monument tells the tragic story of one of our most noted sons:

"Philo Norton McGiffin. December 13, 1860–February 11, 1897. Commander of the Chinese battleship *Chen Yuen* at the Battle of the Yalu, September 17, 1894.

"'A broken and a contrite heart,
"'Oh, God, Thou wilt not despise.'

"This tablet is erected in tender memory of a brave man, who loved his own, but gave his life for an alien flag."

Such is the tragic and brilliant story of Philo Norton McGiffin.

In the collection of the Washington County Historical Society on the third floor of the courthouse is a large painting of this native son whose life story reads like the wildest romance of fiiction. The portrait is of a man of kindly face, very attractive, with winning, likable eyes.

In the historical society room are a number of relics that he brought back from the Far East.

Miss Ida V. Steen, 143 South College Street, who was well acquainted with McGiffin and other members of his family, is also in possession of a number of beautiful and interesting relics brought back by him from China and presented to her by members of his family after his death.

The Pacific Bases

EXTENSION OF REMARKS

OF

HON. WALTER C. PLOESER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. PLOESER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement:

LET'S KEEP OUR BLOOD-BOUGHT PACIFIC BASES

Because this question is so vital to the protection of the United States and to the prevention of World War No. 3, you are urged to give immediate and vigorous support to the action proposed in the following resolution.

WM. S. GRANT,
President, Long Beach Chamber of Commerce, Long Beach, Calif.

"Whereas at the close of World War No. 1 all islands in the Pacific Ocean lying north of the equator and owned by Germany were mandated to Japan under the Versailles Peace Treaty; and

"Whereas many of said islands were further colonized with people of Japanese nationality and converted into bases for the use of the Japanese Nation; and

"Whereas many of those islands have been taken possession of by the United States after loss of many American boys and the expenditure of many hundreds of millions of dollars; and

"Whereas it has been frequently stated since the beginning of World War No. 2 by many of our Government leaders in control of foreign policy that the United States did not seek in this war and would not accept a single foot of territory belonging to any other nation; and

"Whereas so far as is known by the American public, the leaders of the Allied Nations have not been informed of any policy to the contrary by those officials in charge of the foreign policy of the United States; and

"Whereas it is most important to the prevention of a third world war that many of these islands in the Pacific that have been taken from the Japanese and others that will be hereafter taken before the end of World War No. 2 must be held by the United

States and maintained as military bases in the Pacific; and

"Whereas Fleet Admiral Ernest J. King in a recent speech made in the city of New York stated: 'Failure to maintain these bases essential for our defense raises the fundamental question: How long can the United States afford to continue a cycle of fighting and building and winning and giving away—only to fight and build and win and give again? Rich as we are, we do not have the human or physical resources to dissipate our patrimony, generation after generation, in this manner'; and

"Whereas a conference of the Allied Nations of the world is to be held in the city of San Francisco, Calif., beginning April 25, 1945; and

"Whereas it is important that the Allied Nations of the world be informed before the end of World War No. 2 that the United States intends to hold and maintain those bases in the Pacific that this Nation considers necessary for its future defense; and

"Whereas there has recently been introduced in the Congress of the United States by the Honorable GEORGE H. MAHON, Representative from the State of Texas, a resolution for the purpose of having the Congress express at this time a policy advising the other nations of the world that after World War No. 2 is won by the United Nations, the United States will continue to hold permanently any and all islands in the Pacific formerly owned by or mandated to Japan considered by the Chiefs of Staff of the United States as necessary for the maintenance of world peace, and that the United States will also hold those islands in the Pacific liberated by it which belonged to friendly nations until the original owners thereof can reoccupy them or until their mutual occupation can be arranged by the United Nations: Now, therefore, it is hereby

"Resolved by the Board of Directors of the Chamber of Commerce of Long Beach, Calif.:

"That all islands in the Pacific Ocean formerly owned by Japan or mandated to Japan at the close of World War No. 1 and designated by the Chiefs of Staff of the United States as necessary for the maintenance of world peace, be permanently held by the United States; and

"That all islands in the Pacific Ocean that formerly belonged prior to World War No. 2 to friendly nations, be held by the United States until they can be reoccupied and maintained by the original owners thereof, or until their mutual occupation can be arranged by the United Nations; and it is further

"Resolved, That this policy be made known to the United Nations of the world in their Conference at San Francisco, Calif., beginning on April 25, 1945, so that when the peace terms are agreed upon at the close of World War No. 2, there will be absolutely no question about consenting to the United States holding and maintaining bases in the Pacific Ocean on islands held by Japan prior to December 7, 1941; and it is further

"Resolved, That a copy of this resolution be forwarded immediately to the President of the United States; Senator CONNALLY, of Texas; Senator VANDENBERG, of Michigan; Representative BLOOM, of New York; Representative EATON, of New Jersey; Secretary of State Stettinius; Senator JOHNSON, of California; Senator DOWNEY, of California; Representative DOYLE, of California; and Representative MAHON, of Texas; accompanied by a letter from this chamber of commerce signed by the president thereof, urging prompt and favorable consideration of this resolution, followed by immediate action pursuant to the provisions thereof."

Unanimously adopted by the directors of the Long Beach Chamber of Commerce, April 12, 1945.

American Relief for India

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. CELLER. Mr. Speaker, while our eyes are turned to the victory of Allied arms in Europe and to the suffering among the liberated peoples there, we should not forget the war-caused suffering of the Far East.

In India the war has caused the death by starvation of more than 1,000,000 civilians—more than the total casualties of our armed forces to date. The famine has passed in India, but its aftermath of destitution, epidemics, and malnutrition is still very serious. Millions of her people are in need of medical supplies that are readily available in the United States. Yet India is not now receiving help from the American Red Cross and no aid has yet been forthcoming from U. N. R. R. A.

Fortunately, some American help has been and is being sent through the American Friends Service Committee. Vitamins, sulfa drugs, atabrine, and dietary supplements are being shipped. They are distributed by all competent agencies in Bengal, Orissa, Bikar, and south India. Moslems, Hindus, Christians, and British Government bureaus cooperate in getting the supplies to the people in need.

This work started last year under the auspices of the National War Fund which has withdrawn its support in order to concentrate on liberated areas.

A group of American citizens under the leadership of such men as Henry Grady of California, Ambassador William Phillips, J. Edgar Rhoads, of Delaware, Guy Emerson, Henry Luce, John Haynes Holmes, and George Medalie of New York, Frank Aydelotte of New Jersey, and Sumner Welles of Maryland has set out to raise funds to maintain this work of mercy. They have organized under the name of American Relief for India, Inc.

As one of its sponsors, I want to call it to the attention of the House, and to introduce into the RECORD a challenging statement by Mr. William Phillips on this subject. It is a statement which he made in New York on the occasion of the first public announcement of American Relief for India, Inc.

I am pleased to add the following speech by Hon. William Phillips of the State Department at a luncheon of the board of directors of American Relief for India, Inc., April 17, 1945:

Americans in the past have thought of India as a land of violent contrasts, of lofty capped mountains, and endless arid plains, of dazzling wealth and abject poverty, of great culture and pitiful ignorance, and yet so remote that to many it seemed to be principally a land of mystery and of fairy tales.

What changes of thought and contact has this war produced.

Never before have cities and towns in India been so disturbed as they are now by the roar of American trucks and armored vehicles or by the confusion of hustling American soldiers. And never before in this country has there been such an interest in India due to the presence there of thousands of young Americans. For India has been for nearly 3 years a base for our operations against the Japanese in Burma and in China.

Our forces have been obliged, owing to military necessity, to make themselves at home in this foreign land and often, I fear, without fully appreciating and respecting the habits and customs of the people. And Indians, on their part, have undoubtedly felt concern as the numbers of our forces increased, since to them the Japanese enemy seems remote in faraway Burma and China and therefore of no immediate danger to their own country.

But the recent terrible famine in many parts of the country and the pestilences which have followed in its wake are to a considerable extent attributable to this distant warfare. And then, too, the very presence of increased Allied forces, including our own, has contributed in raising the prices of India's food supply and has added to its scarcity.

In these circumstances it is natural that the people of India should look to this country for sympathy and help, and the governor of Bengal, in whose province is to be found the most acute suffering, has joined the appeal for American aid.

Friendship between nations, as between individuals, is won by sympathy and understanding in times of need. India is in need now.

American relief for India does not presume to be an answer to India's suffering millions but it can be the channel through which America may extend a sympathetic and helping hand to an allied people whose tragic condition and suffering springs in large measure from the effects of the war.

India looks to America. Shall we respond or shall we turn a deaf ear? Of course we shall respond, and gladly, for we have an obligation to the Indian people as a result of this war, and we count upon India's friendship in the years to come.

I submit four important letters concerning American relief for India:

THE VICEROY'S HOUSE,
New Delhi, February 19, 1945.

Since 1942, the Friends' Ambulance Unit has been doing very valuable work in relieving distress in India. Its main activities have been in Bengal, but supplies have been sent also to Bihar, Orissa, the Malabar District of Madras, and the states of Travancore and Cochin. The unit has received generous aid from America, and I should like all those in America who have helped with money or goods to know how much their practical sympathy has been appreciated. I am glad to say that the food situation in India is better than it was in 1943, but there is great scope still for the unit's work, and I hope it will continue to receive the same generous support.

WAVELL,
Viceroy and Governor General.

GOVERNMENT HOUSE,
Calcutta, December 22, 1944.

The splendid services rendered by the American Friends in Bengal during the past 12 months have earned the gratitude of all sections of the public in this province. In distributing large quantities of milk, vitamins, and medical supplies they have taken the utmost trouble to insure that they reach those who need them most, and in this way a

great deal of genuine suffering and distress has been alleviated.

Bengal is making every possible effort to help herself, but at the same time she is most grateful for the help that has been forthcoming from friends outside India, all of which has been and will continue to be of the greatest value.

I wish the American Friends all success in their great humanitarian task.

R. H. CASEY,
Governor of Bengal.

GOVERNMENT OF BENGAL,
Calcutta, December 22, 1944.

F. W. JOHNSON, Esq.,
American Friends Service Committee,
Calcutta.

DEAR MR. JOHNSON: I understand that you are shortly returning to America to work in the head office of the American Friends Service Committee.

I should like, if I may, to take this opportunity of asking you to convey to your committee the sincere thanks and appreciation of the Bengal Government for the magnificent work which has been done by the American Friends during and after the famine. There is hardly an affected part of the Province where your drugs, vitamins, and milk have not penetrated and your noble motives become known.

At the same time, I hope it will be possible for the A. F. S. C. not only to continue but to expand its efforts. Many of the poor cultivators and artisans of Bengal are always on the border line of starvation, and the floods and other natural disasters to which the province is prone may at any time push them over the edge. In wartime, however, earnest the efforts of government, the strain on transport and on food supplies makes relief doubly difficult. The work of the A. F. S. C. and F. A. U. transcending the barriers of community, race, and politics, is a vital complement to the work of government; and as long as war conditions prevail in India, I hope that those efforts will continue.

Yours very sincerely,
TARAKNATH MUKERJEE,
Minister in Charge of Relief.

RAMAKRISHNA MISSION,
Belur Math, Howrah, December 23, 1944.

ERIC W. JOHNSON, Esq.,
American Friends Service
Committee, Calcutta.

DEAR MR. JOHNSON: The other day you inquired of us about the conditions in Bengal and the need of continuing relief in the Province. So far as foodstuffs are concerned, the condition has somewhat improved as compared with last year at this time. But from reports received from our relief centers we find that the situation is again getting worse. The price of rice, which came down to Rs. 12/- and Rs. 10/-, has again gone up to Rs. 18/- in some places.

Even if the need of foodstuffs be not so acute, the need for medical relief is very pressing. Though foodstuffs are not so rare as in the last year, yet in consequence of last year's famine, which left the whole Province famished and physically weak, we are having epidemics like malaria, smallpox, cholera, dropsy, pneumonia, and general debility. These epidemics are taking a heavy toll of life. There is no possibility of their being brought under control in 1945, because the general health of the people has to be improved first. Meanwhile medical help has to be continued, and suitable diet given to the sick.

The need for antimalarial drugs is most acute. In spite of Government arrangements for the supply of antimalarial and other drugs, it is not quite adequate, and so many nonofficial bodies are also working in the field supplementing Government aid or cooperating with them in fighting these epidemics. Your organization has done much to meet this demand, and your antimalarial drugs, as also the vitamins and sulfa drugs, have been of the greatest help. So also has been the supply of powdered and condensed milk for the sick, nursing mothers, and children.

We, therefore, request you to continue your help to India throughout 1945.

Please convey to your countrymen India's gratefulness for the timely help and sympathy they have meted out to a sister nation in distress.

Thanking you for all your kind help and cooperation, and wishing you a bon voyage,

Yours sincerely,
SWAMI MANHANANDA,
Secretary.

Schools—Bulwark of Democracy

EXTENSION OF REMARKS
OF
HON. SAMUEL A. WEISS
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 8, 1945

Mr. WEISS. Mr. Speaker, the schools of America are the bulwark of democracy. Through education we can encourage correct thinking and formulate public opinion that will forever kindle the light of freedom, justice, and brotherhood, without which democracy cannot survive.

Most of us may not have realized the heavy toll this war has taken in our educational institutions. Registrations in colleges have decreased as much as 60 percent. Important as our educational system is to the future success of this Nation, it is almost unbelievable that we have permitted the school teachers to become the forgotten men and women of America. Unless we produce incentive so that more young high-school students will be persuaded to adopt teaching as a career, in too short a time we will find our school rooms intolerably crowded. The armed forces, of course, were a heavy drain on our supply of instructors. Yet we must admit that the inducement of better pay, shorter hours, better social conditions in other fields of endeavor were a factor in withdrawing so many teachers from the profession in the past 4 years that the National Education Association estimates at least 10,000 vacancies for which teachers were being sought last fall. Alarming indeed. Already classrooms that customarily held 25 children must accommodate 45, a situation which makes proper teaching almost impossible.

The various States are bestirring themselves to find remedies. Some are raising salaries, thus tackling the most serious phase of the problem. I sincerely regret to state that a Republican senate majority in my own State of Pennsylvania was responsible for the failure to pass an adequate pay proposal advocated by Democratic legislators in Pennsylvania. In a profession as important as any other to today's world—with democratic ideals on trial—it is shocking to learn that 3 out of every 100 teachers are paid less than $600 a year. According to a survey made by Allegheny County, Pa., educators it was discovered that 45 out of 58 county school districts pay the average elementary school teacher less than the average school janitor. Single salary schedules are coming into favor, however, a plan which will pay equally for equal talents regardless of sex or of the grade taught.

I urge this Congress to grant adequate Federal aid to every State unable to pay its teachers decent salary standards. This can be accomplished through the passage of H. R. 1296. Liberal pay increments will be an inducement to the many who have left the teaching profession to return and will also induce students to pursue a teaching career.

Let us hope that present aid and reforms will prove neither too little nor too later. The times force an acknowledgement of the importance of the teaching profession to the welfare of the world. Young people should be encouraged to become educators if they have aptitude in that direction.

The objective of the present Conference at San Francisco fully justifies us in appropriating an adequate sum to strengthen the foundation of democracy—the schools of America.

The Strawberry in Arkansas

EXTENSION OF REMARKS
OF
HON. WILBUR D. MILLS
OF ARKANSAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 8, 1945

Mr. MILLS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Arkansas Gazette of May 6, 1945:

THE STRAWBERRY IN ARKANSAS

The Greater Little Rock Chamber of Commerce could not have served a fruit more appropriate than strawberries at its luncheon honoring White County, for the large annual crops of strawberries distinguish this part of Arkansas.

When the South was struggling to reestablish its economy after the Civil War progressive leaders began to consider seriously the growing of fruits for the commercial market. In De Bow's Review of October 1866, Dr. J. A. Dibrell of Crawford County; C. Langtree of Little Rock, who had made a map of Arkansas, and Liberty Bartlett, judge of the fifth Arkansas judicial circuit, discussed the State's resources, and they listed strawberries among the fruits which thrived here. In 1872 James P. Henry, in his "Resources of the State of Arkansas," stressed the cultivating of fruits, including strawberries. He predicted a great fruit business would be created, with the railroads giving access to many markets. By 1900 farmers were planting strawberries for the commercial market, but the industry had its greatest expansion after World War No. 1. The cultivation of the strawberry has become one of the major crops in northern and central Arkansas counties. For the 1933–42 period the State averaged 16,200 acres of strawberries harvested, a total production of 841,000 crates, and a yield of 52 crates per acre. Arkansas's 1942 crop of 1,785,000 crates gave the State first place in strawberry production.

Arkansas has gained prominence not only in yield but in the type of plants cultivated here. Strawberry growers in Florida obtain the Missionary variety of plants from eastern

Maryland and an area near Judsonia, Ark. We are told that comparative tests made by the Florida Experiment Station showed that the Arkansas plants produced more fruit.

The cultivation of strawberries has been an important factor in developing White and other counties. It has stimulated the crate and other industries. Strawberries are the State's most widely marketed fruit.

German Atrocities

EXTENSION OF REMARKS

OF

HON. OVERTON BROOKS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. BROOKS. Mr. Speaker, on May 1, 1945, during the course of the usual evening hour broadcast given over to America's brillian and popular commentator, Richard Eaton, radio station WOL, Washington, I delivered a short speech on German atrocities and the necessity of having a permanent commission to record and preserve the record. Under leave to revise and extend my remarks, I include therein this talk:

Since Pearl Harbor nothing has shocked the American people as much as the recent stories of the atrocities perpetrated by the Germans against those who are their prisoners. From time to time we have been told of the inhuman treatment being given prisoners in German camps, but as a people we have been somewhat loath to believe that anyone could be so barbaric as to be guilty of such shocking outrages. Now the German battle lines have been broken at many points under the weight of our attacks and those of our allies. We have freed large portions of Axis countries, and with this we have freed many Nazi prison camps. The true story of treatment of our prisoners comes forth in all of its sordid and ghastly light.

Never in all history have acts of such barbarity been visited upon captive peoples. At some camps thousands upon thousands of civilians along with our own troops have been literally starved to death. At other camps we are informed that our men were given a daily ration, three times each day, of only carrot soup, or turnip soup. They were slowly starved to death. They have been killed in cold blood by infuriated Nazi leaders and their bodies have been permitted to fill the compounds and the enclosures by the thousands alongside of those who yet lived. A total absence of medical treatment at times has prevailed, and unspeakable indignities have been visited upon these poor, defenseless peoples.

It is therefore small wonder that Gen. George S. Patton ordered, as a punishment, that hundreds of local German civilians in the captured areas be forced to view these scenes of horror in one of the camps. They turned their heads and shielded their eyes in horror as they looked upon these ghastly sights. We are not surprised when we learn that the British Parliament last week visited some of these horror camps so as to make a formal report on them to the British Empire. And now our Congress has appointed a special committee of Senators and Congressmen to visit these atrocities. And further, so that there be no uncertainty in the minds of anyone, a group of 12 editors have been chosen to make the same visit to the German camps, and to then report directly to our people as to exactly what they saw.

These reports, for the moment will be sufficient to convince any doubting Thomas, if such there be, of the truthfulness of the vicious cruelty and utter disregard of the laws of humanity by the Nazis. If the experiences of the First World War are repeated, the moral saboteurs will not be heard from further until the war is over, and then we may expect to hear some say, "Oh, that's just a lot of 'baloney.' It is just propaganda."

Because of this, many of us down on Capitol Hill feel that a permanent commission should be set up to record and tabulate these countless acts of bestial inhumanity. We think they should be put in permanent form; and should constitute an all-time black record of atrocities. This record should cover not only the Germans but should cover the Japs also. While it is the German acts which now shock us I am sorry to say that the Japs have been guilty of acts of savagery already which will be a constant shame to many peoples of the Orient for a thousand years to come.

These records, properly compiled and catalogued, should be permanently bound. They should be available this year and next year. They should be available 10,000 years hence as a naked plea of Axis guilt through all ages to come. They should be available to the War Crimes Commission which meets in London and will have charge of the prosecutions of the leaders after the war. The records should be available after the war to those who rewrite the articles of the Geneva Convention and work to place penalties in it to prevent a reoccurrence of these acts of utter vandalism and cruelty.

I think the work of making a permanent record of these things is very important and I am making an effort that we create a permanent War Atrocities Commission.

Franklin D. Roosevelt Day

EXTENSION OF REMARKS

OF

HON. AIME J. FORAND

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. FORAND. Mr. Speaker, the memory of our late President Franklin D. Roosevelt should be perpetuated.

His accomplishments and his record as a leader and a great humanitarian is evidenced in every section of our country, but it would be well for us to have one day in each year set aside as Franklin D. Roosevelt Day to remind us forcefully once each year of this great man who has been called to his reward.

I heartily subscribe to the suggestion advanced by division 618 of the Amalgamated Association of Street and Electric Railway Employees of America, in my State, and I offer for the RECORD the resolution, which follows:

Resolution to declare by law a national holiday, January 30, birthday of Franklin D. Roosevelt

Whereas our Heavenly Father in His infinite wisdom has seen fit to call from this earthly pilgrimage our beloved leader the President of the United States, Franklin Delano Roosevelt; and

Whereas our grief is great, beyond the ability of mere words to express, because he by work and act prior to and during his 12 years and 4 months as the Chief Executive of the Nation proved himself to be the greatest friend that the working men and women of America ever had. He struck the shackles of industrial impediment and servitude from their physical and mental desire for opportunity to elevate their standards of living and provide security against the day when they are no longer physically able to produce. He was the man who led the Nation and brought it through the greatest crisis in our history since the Civil War. He was a master planner of war strategy, and the architect of world's peace, the symbol of hope that peace-loving people the world over have had, for a lasting world security from the sweat, blood, and tears of war. History will record him the greatest of them all as President and humanitarian of this or any other era: Therefore be it

Resolved, That we the members of Division 618 Street Carmen and Bus Operators Union Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America in special meeting assembled in the Eagles Hall, April 16, 1945. We do hereby petition our Representatives in Congress, Washington, D. C., individually and collectively to move and work for the enactment of legislation making January 30 of each year, the birthday of Franklin D. Roosevelt, thirty-first President of the United States, a national holiday in order to perpetuate his memory for all time; and be it further

Resolved, That a copy of this resolution be forwarded to the Honorable Senators THEODORE FRANCIS GREEN and PETER G. GERRY and the Honorable Representatives JOHN E. FOGARTY and AIME J. FORAND, and be entered as part of the minutes of Division 618.

The Communists Are at It in Slovakia, Also

EXTENSION OF REMARKS

OF

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. O'KONSKI. Mr. Speaker, the Dreyfus case of the nations; the political football of the mighty; the victim of Magyar chauvinism; the battlefield of foreign wars; the victim of Czechoslovakia; the victim of Nazi aggression; the country liberated by the Red armies; just another country taken over by the Communists.

That in short is the story of Slovakia. It is a story of the sacrifices, tribulations, and thraldom of a nation that has never been the aggressor. It is the history of a nation that has shed its blood many times over in the cause of justice and freedom of other nations, but the fruits of which it was never fortunate enough to enjoy.

In World War No. 1, the Slovaks were instrumental in destroying the tyranny of the old Austro-Hungarian Empire and establishing the Czechoslovak Republic under the leadership of Thomas G. Masaryk, Milan R. Stefanik, and Dr. Edward Beneš. Masaryk pledged himself that in the newly founded republic, Slovakia would have "her own administration, her own assembly, and her own courts." But neither Masaryk nor his successor, Dr. Edward Beneš, ever made good on that promise.

What about Slovakia today and in the postwar world?

It seems to me that the watchword of the provisional government of Czechoslovakia, headed by Dr. Edward Beneš, and the Slovak National Council, just about the whole of which is made up of Communists, is, Slovakia must not be heard. The case of Slovakia must never come up before any United Nations conferences.

Much has been said and written against the absorption of Lithuania, Estonia, and Latvia in an alien system of government without their free consent. Volumes of words have been said and written about the events that have transpired in Yugoslavia, Rumania, Finland, Greece, and Italy. The case of emaciated and persecuted Poland stands out glaringly before the eyes of the civilized world. Even Czechoslovakia, into which the Slovaks were duped and in which they never gained the recognition of their national existence, occupies the minds of diplomats and writers.

Do not the events that have transpired or are transpiring in the above-mentioned countries flout the very principles for which this dreadful war is being fought—the Atlantic Charter and the "four freedoms"?

But what has been said or written about Slovakia?

Practically nothing. And, it seems to me, the powers that be simply take it for granted that the Slovaks are perfectly satisfied with the trend of events in their country. The world knows practically all that Dr. Beneš and his propaganda machine have said or written about Slovakia, but the Slovaks themselves have not been heard from. No one seems to note the fact that that unfortunate country is not even represented at the Conference of the United Nations in San Francisco. And no one seems to care.

Nevertheless, the case of Slovakia should interest all countries and all governments that are sincerely striving to attain a just and lasting peace for the world. In the light of the events taking place in Slovakia, Christians the world over may rightfully fear that we are not tending in the direction of a better postwar world, in the direction of a just and permanent peace. What has happened in Poland, Lithuania, Estonia, and Latvia is being reenacted in Slovakia, which is predominantly a Catholic country.

Reports coming out of liberated Slovakia would have us believe that the Slovaks have just about all their desires fulfilled, that the millennium is at hand. Slovakia, the Slovak National Council proclaims, will actually be free within the framework of Czechoslovakia; she will have the autonomy she demanded in vain in the years when the satisfaction of her claims undoubtedly would have strengthened the Czechoslovak Republic, and the Masaryk and Beneš regimes as well.

All such reports are made to order; they are not for home consumption, but rather for the consumption of the truly democratic countries. Their purpose is deception.

The fact still remains that the vast majority of the inhabitants of Slovakia, the Catholics, have no proportionate representation either in the Provisional Czechoslovak Government or in the Slovak National Council.

Slovak Americans strongly suspect that Communistic tactics are being applied in Slovakia in the same measure that they were applied in other countries "liberated" by the Soviet armies. The composition of the Czechoslovak Government and the Slovak National Council tells us plainly that the Communists are definitely taking advantage of the situation in Slovakia and forcefully seizing control of local and national government.

The Slovak Communist press of America, true to type, told us of the joy of the inhabitants of Slovakia on being "liberated." It hailed the return of Bishop Carsky to Kosice. "See, the Communists are not such a bad lot after all!" editorials of the Communistic press exclaimed. That happened the latter part of March, but Bishop Carsky still has not been heard from!

Slovakia has been "liberated," but we still have to get reports from our own war correspondents. The reports that have come to us originate in Moscow and in the press bureau of the Slovak National Council or the "Czechoslovak Press Bureau," which are subservient to Moscow. It is the same old story that has been repeated so often about other "liberated" countries. Foreign correspondents and neutral observers are not allowed to enter for a time, which usually means: until the "purge" is completed and the "right persons" are entrenched in the local and national government.

The eminent Anne O'Hare McCormick, writing in the New York Times of April 21, said among other things:

> But at Kosice the Slovak National Council has now been reorganized under the presidency of Dr. Letterich, a former agrarian, and Carol Smidka, a Communist. The administration is in the hands of trustees consisting of four Communists, two Social Democrats, and six Democrats and Nationalists.

It is plainly evident that even Miss McCormick could not have first-hand information. She does not mention the names of said trustees and says nothing at all whether the administrative body is representative of Slovakia or not. The reader is apt to believe that four political parties share in the administration of Slovakia. That is not so. If the parties in question were investigated, it would not surprise us to find them all headed by Communists. The latter have announced quite some time ago that all Socialist parties joined with the Communist Party and now bear its name, the other parties, however, forming one joint "Democratic Party."

The Slovak People's Party, commonly referred to as Hlinka's Party or the Catholic Party in Slovakia, has been dissolved by the Slovak national council. It is generally assumed that no former member of the Hlinka Party can be a member of the council or the "provisional Czechoslovak Government." It was the largest organized political group in Slovakia prior to 1938. One of its claims was that it helped to elect Dr. Eduard Beneš in 1937 on the promise of achieving autonomy for Slovakia within a year. Under the present set-up in Slovakia, the Catholics, representing the vast majority of inhabitants, are simply out. The whole governmental apparatus is definitely communistic. It has been forced on the populace, according to the general axiom of aggressors: Might makes right. The Hlinka Party, the Catholics of Slovakia, really are in for a cleaning.

The Czechoslovak delegation to the San Francisco Conference of the United Nations consists of 11 members, according to the report of the Czchoslovak Press Bureau. It is headed by Ján Masaryk, former London playboy and present foreign minister of Dr. Beneš' government, who once answered the query "What are you fighting for?" as follows:

> I want to read Heine. I don't want to live if I can't. I don't give a d—— what kind of economic system there is as long as I am free to indulge in the virtues and vices that do not interfere with the smooth running of the program and order.

This is the type of man that heads the Czechoslovak delegation to the San Francisco Conference. The others are definitely members of Dr. Beneš' official family—the old political clique, pawns of Beneš, who denied the Slovak Nation the inherent and God-given right to its own national existence. Is it any wonder then that Slovak Americans are asking why Slovakia is not represented as a nation at San Francisco?

No true American, no real lover of democracy, no sincere Christian will ever force the Slovaks to return to the old Czechoslovak order or believe that they want to return to that order of their own free will. And Slovakia should not and must not be forced to accept an alien system of government without the free and unfettered consent of its inhabitants.

Christian Slovakia, Catholic Slovakia, has been exploited by the Magyar chauvinism, Czech nazism, and German nazism. Today she is being overwhelmed by Red fascism—communism. Is that what the United Nations are fighting for? Is that the way to prepare for a just and lasting peace in the postwar world? No Christian, no freeman, will believe it!

For the sake of a just and permanent peace, in the name of everything that stands for justice and truth, decency and fair play, the case of Slovakia must at long last be reviewed by the United Nations. Slovakia has a natural right to freedom and its own national existence. Whosoever denies the Slovak Nation that right is not consistent with the aims and ideals of a world organization, of a world court; of him it may be truly said that he is not interested in a just and permanent peace, in the principles of democracy and justice, in the principles enunciated in the Atlantic Charter and expressed by the "four freedoms."

Slovak-Americans like to indulge in repeating the late Franklin D. Roosevelt's belief: "We believe that any nationality, not matter how small, has the inherent right to its own nationhood." Slovakia must not be an exception. She must not be forced into any political alliance; she must not be absorbed in any alien system of government without her free consent.

In the name of the ideals for which millions of young men and women, the flower of the United Nations, are fighting—for free nations in a free world, for the cause of Christianity and a just and permanent peace—for God's sake, review the case of Slovakia!

The Late Col. William Mitchell

EXTENSION OF REMARKS

OF

HON. ANDREW J. BIEMILLER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. BIEMILLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an enrolled copy of Joint Resolution No. 57–A adopted by the 1945 session of the Wisconsin Legislature memorializing Congress and the President of the United States to adopt and approve a joint resolution authorizing the President to issue posthumously to the late Col. William Mitchell a commission as major general:

Joint resolution memorializing Congress and the President of the United States to adopt and approve a joint resolution authorizing the President to issue posthumously to the late Col. William Mitchell a commission as major general

Whereas there has been introduced in the Senate of the United States, Senate Joint Resolution 34, authorizing the posthumous award to the late Col. William Mitchell of a commission as major general; and

Whereas it is a fitting tribute to the memory of William Mitchell that this award be made: Now, therefore, be it

Resolved by the assembly (the senate concurring), That the Legislature of Wisconsin respectfully memorialize Congress to expedite the adoption of Senate Resolution 34, and the President to approve the adoption of said resolution; be it further

Resolved, That properly attested copies of this resolution be sent to the President of the United States, to both Houses of Congress and to each Wisconsin Member thereof.

OSCAR RENNEBOHN,
President of the Senate.
LAWRENCE R. LARSEN,
Chief Clerk of the Senate.
DONALD C. MCDOWELL,
Speaker of the Assembly.
ARTHUR L. MAY,
Chief Clerk of the Assembly.

Ernie Pyle

REMARKS

OF

HON. NOBLE J. JOHNSON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. JOHNSON of Indiana. Mr. Speaker, a few weeks ago we were shocked at the news of the death of Ernie Pyle on the battlefield.

I shall not take the time of the House to make an additional eulogy to Ernie Pyle. His accomplishments are well known, both to those serving in our armed forces and to the general public, and his writings will always remain a sweet memory.

Ernie Pyle's home was in Dana, Ind., which is in the congressional district I have the honor to represent. This community is made up of many of the finest, most loyal, and patriotic citizens of our Nation. They are true Americans.

Ernie Pyle came from one of these fine families, and it was through his early training and his sterling character that he was able to accomplish so much and to reach such a high place in the esteem of the people.

I want to take a few minutes to announce that the citizens of Dana and vicinity have formed an organization known as the Ernie Pyle Memorial Library. It has selected Ernie's father, Mr. William C. Pyle, as honorary president, and his aunt, Mrs. Mary Bales, as honorary director.

The following have been selected as officers of the organization: Mr. John Dussing, president; Mr. Edrick Cordes, vice president; Mr. John N. Allison, secretary; Mr. Franklin R. Southard, treasurer; Mr. James Elder, Mr. Glen Randall, and Mr. H. R. Scott, directors, all of whom are highly respected citizens of the community.

It is the purpose of this organization to establish, erect, and equip, by public contributions, a memorial library at Dana, Ind., as a national shrine in honor of this great American who was loved and honored by all who knew him or read his column, that his great name and work might live on as an inspiration to future generations.

Every contributor's name will be placed on record and this record will be kept in the library when completed. I have every confidence that the millions of people who feel they have suffered a personal loss in the untimely death of Ernie Pyle will be happy to have the opportunity to participate in the construction and equipping of this memorial library and thereby have a part in perpetuating his memory and accomplishments.

This is a most worth-while undertaking, and the citizens of this community are to be congratulated.

This memorial library will be constructed and equipped as quickly as the necessary funds are received.

Keep the Pacific Islands

EXTENSION OF REMARKS

OF

HON. RICHARD J. WELCH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. WELCH. Mr. Speaker, following World War No. 1 the United States made many mistakes. The lessons we have learned from those mistakes must never be repeated.

Not the least of these mistakes was the mandating of Pacific islands to Japan which made possible the treacherous attack on Pearl Harbor engulfing us in a war that has cost thousands of lives of the flower of American manhood. Such a condition must never again be permitted to exist. If the peace of the world in the Pacific is to be maintained the United States must retain sovereignty over the islands which Japan fortified. It must never again become possible for any nation or group of nations to make an attack on the United States from these bases.

High naval authority has already asserted that these Japanese islands, bought with the blood of American soldiers, sailors, and marines, are essential to our national defense. Those responsible for making the peace when we shall have secured the unconditional surrender of Japan must recognize this necessity of national defense and not barter or give them away to become a future menace to our safety.

Mr. Speaker, my own sentiments in this regard are so admirably stated in a recent editorial appearing in the San Francisco Examiner that I include it herewith under permission to extend my remarks in the CONGRESSIONAL RECORD.

The editorial follows:

KEEP THE PACIFIC ISLANDS

When the United States marines planted the American flag on Iwo Jima and an alert photographer made a picture of the event that is already as well known and will probable be as long remembered as the famous Minute Man of Concord, they thought they were putting it there to stay.

All of the American people, in fact, have been taking it for granted that all of the Pacific islands we are taking away from the Japanese are automatically and indisputably becoming American islands.

The only possible exceptions which the American people might be in a mood to consider would be those Pacific islands over which Allied Nations had sovereignty before the war and lost it to the Japanese in the early part of the war—such as Tarawa, which was recovered from the Japanese by the American marines, but over which the British flag was subsequently restored.

But in the case of Pacific islands of Japanese ownership or mandate—the Marshalls, the Carolines, the Marianas, the Volcano group, the Ryuku chain, etc.—there should surely be no more question about permanent American occupancy than there will be about total American conquest.

This is not because the United States aspires to territorial aggrandizement from the Pacific war.

The United States would not be greatly enriched by possession of any of these islands.

Economically, most of them will be liabilities.

It is for our permanent security that permanent American possession of them is desirable.

These islands were the air and naval bases from which Japan launched its attack upon the United States.

They were armed and fortified by the Japanese.

They made possible the Japanese war against us.

They were responsible for our loss of the Philippines and of Guam and Wake.

They were the springboard for the assault on Pearl Harbor.

They supplied and supported the Japanese conquest of the entire Southwest Pacific, up to the very shores of Australia.

The only way we can ever remove this menace is to possess the islands which have constituted so grave a menace to us.

We should make them American naval and air bases, for the permanent protection of America.

Of course, we are not going to allow them to revert to Japanese ownership.

But that is not the only danger they pose.

While official quarters in Washington are strangely and ominously silent about the future control of these Pacific islands, other quarters are neither silent nor inactive.

The internationalists in Washington are already talking about international trusteeships for them, and are openly suggesting that the United Nations Conference in San Francisco should set up the structure for their control.

If ever there was warrant for unilateral action, the United States has such warrant in the Pacific islands.

This is not the business of any other nation.

It is no part of the business of the San Francisco Conference.

The United States should raise the American flag over all the former Japanese islands in the Pacific, as the Marines did at Iwo Jima, and keep it over them.

Tomorrow's Trains Today

EXTENSION OF REMARKS

OF

HON. WILLIAM A. ROWAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. ROWAN. Mr. Speaker, I ask the indulgence of the House to direct attention to an event now going on right here in Washington that I believe is a most inspiring example of how American industry is preparing to carry out its responsibilities in the future. I refer specifically to the exposition, Tomorrow's Trains Today, now on public display in the auditorium of the Department of Commerce, under the official auspices of that Department.

Here is an unusual demonstration of American ingenuity and planning. Presented with most colorful and convincing completeness, it must remove all doubt from those who wonder about America's ability to forge ahead after the cessation of hostilities. It is the precursor of one of those eagerly awaited bridges with which we will successfully span the gap in our period of reconversion and readjustment. While depicting some of the future wares and plans of only one company—those of the Pullman-Standard Car Manufacturing Co.—it effectively typifies all of the splendid foresight and conscientious endeavor that so many of our other better known industrial concerns are displaying in their preparations to provide for the human and economic needs of tomorrow.

Considered only from the angle of what they mean in the modernization of railroad service in the years ahead, Pullman-Standard postwar plans are almost beyond the imagination of the traveler, the commuter, all those other millions who depend so much on satisfactory transportation in their everyday lives. As radical as they may seem, compared to past standards, these plans are not visionary pipe dreams. Anyone who inspects the exposition will testify they are practical developments, based on sound and extensive research. Most important they can be placed on the rails of the country as actual realities only a few months after the company receives Goverment authorization to resume passenger-car construction.

In my opinion, however, there is a far deeper significance to this presentation at the Commerce Building than all that it means in more luxurious, cheaper, faster and safer service for the railroad passenger. I am thinking of what it implies in such matters as the stimulation of trade and industry; employment in the years ahead for our present workers and for our returning servicemen; business for small industries after they have completed their war jobs; the solution of many of the other economic and social problems that must be solved if the peace we are now winning at so great a price is to be worth its cost.

It would be an imposition on my listeners to recount here today how much transportation, particularly railed transportation, has meant in America's development and progress. Where the rails have led, prosperity, culture, all that have given us our leadership in world affairs have generally followed. And yet transportation must be in the years ahead an even greater factor in our economy.

If trade and industry are to forge ahead, they must have steady and rapid flows of raw materials as well as equally fast and widespread distribution of their finished wares. Contacts between towns and cities, between States—yes; and between nations—must be maintained on a basis never before known. I am thinking of such things as the great hemispheral network of roads and rails they are talking of for a better linking of the two Americas. Not only must there be free opportunity for men to travel but there must be the modernized means for shipping the output of man's varied lines of handiwork.

That foresighted companies like Pullman-Standard and the great railroads that use its products are practically ready now to furnish some of the means to bind our civilization as closely together as world affairs now in the making will permit, must be a source of gratification to all who are concerned with our national and international planning.

I stated that industrial developments like those under discussion will have far-reaching effects upon the maintenance of continued employment of the American worker. I repeat that statement. I know from the very district I represent, with its hundreds of busy factories, its great steel mills, its many nationally operating railroads—yes; and its big railroad car-building plants—what it all means.

Federal census figures show that just prior to Pearl Harbor 1 out of every 40 gainfully employed wage earners was on the pay rolls of the railroads, with thousands of others receiving their livelihood from those concerns which build our cars and other railroad equipment.

Think what the modernization of our vast railroad network will mean to all these. Think what it must mean in new jobs and other opportunities for so many countless others. American history shows that whenever we have brought forth better products more jobs have followed. Pullman-Standard, right here in Washington, this week is pointing the way in a manner that must influence the futures of millions of us.

This is no one-industry matter. Thousands of companies—companies that are so frequently termed the small businessman type of venture—have an equal interest. To construct only one railroad passenger car there must be available the wares of hundreds of apparently unrelated companies. All of these companies have pay rolls. The glass blower who makes the car windows, the steel puddler who helps supply the steel car walls, the upholsterer who finishes the seats, the paint mixer whose gay colors adorn interiors and exteriors—all these are affected.

It has been stated that to put our railroads back into first-class shape after the wear and tear they have experienced in doing such a remarkable war job thousands of new passenger cars and freight cars must be available. It will take years to catch up on the program.

It seems fitting, therefore, that this first actual demonstration in Washington of what is being done now to clear the industrial track into the post-war era should come from a company that has contributed so much to our national progress in the past.

Pullman-Standard helped make America's railroads the model for the world. Combining its years of knowing what the American traveling public wanted with its own engineering genius it gave us our first lightweight streamliner. And for the past 4 years, its busy plants have won one governmental commendation after another for their outstanding work in producing armament for the Army, ships for the Navy, aircraft parts for our flyers, and transportation equipment vital to the maintenance of our lines both at home and behind the fighting fronts. Now it comes forth here, right next to the very Halls of Congress, with another proof of what it and our other better-managed industries are ready to do in another pinch.

Gentlemen, I suggest that all of you visit the Commerce Building exposition. If we are to insure that America is going to go somewhere in the future, we cannot afford to miss the train now.

Victory for Woodrow Wilson

EXTENSION OF REMARKS

OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. REED of New York. Mr. Speaker, under leave to extend my remarks in the

RECORD, I include the following article by Peter Edson:

VICTORY FOR WOODROW WILSON

(By Peter Edson)

SAN FRANCISCO, May 8.—Woodrow Wilson died with the understanding that it was right for the United States to stay out of the old League of Nations, in 1920. And the day before his death he prophesied this country would join a new League of Nations and that it would succeed, his daughter, Eleanor Wilson McAdoo, has just revealed, breaking a family secret closely held for 21 years.

Mrs. McAdoo is in San Francisco in connection with her war-bond work and as a radio correspondent covering the United Nations Conference.

This story of her father's death, making an important new footnote to history and today's big war news, has never been told before. Eleanor Wilson consents to its being told today because this seems the right moment to bridge the gap between the end of World Wars Nos. 1 and 2; between the old League of Nations, which her father helped create, and the new United Nations organization being created at San Francisco. Had Woodrow Wilson died as Franklin Delano Roosevelt did, at the height of his victories, the end of the League of Nations story might have been different.

The day before Woodrow Wilson died, February 3, 1924, he lay on his bed in the house on Washington's S Street, where the family had moved after they left the White House in March 1921.

In the room with him, watching him, was his daughter Margaret, Eleanor's sister. The ex-President's eyes were closed. He spoke quietly:

"It was right that the United States did not join the League of Nations."

Startled, Margaret caught her breath, came to his bedside.

Woodrow Wilson opened his eyes and smiled. Again he spoke:

"You think I'm raving, don't you? I'm not.

"But I've been thinking about this for a long time."

Her father had had much time to think, says Eleanor Wilson today. In Paris he had contracted flu. Asthma had developed from that, and with it came broken sleep. The ability to sleep, to relax completely for 5 minutes or an hour, had been one of Woodrow Wilson's greatest sources of strength. From a nap, or a full night's sleep, he could wake refreshed and able to cope with any new task. But now, with one arm paralyzed and one foot dragging when he could walk, in the long days and the longer nights of wakefulness, Woodrow Wilson had done much thinking.

There was nothing the matter with his brain. Eleanor Wilson declares, and he was anything but the broken-hearted man he has been so commonly and so wrongly portrayed.

"If we had joined the League when I asked for it," he said, "it would have been a great personal victory. But it would not have worked, because deep down in their hearts the American people didn't really believe in it."

Margaret Wilson rose then and bent over her father's bed.

"The time will come when this country will join such a league, because it will know that it has to be. And then and then only will it work."

He laughed a little.

"He was really a gay soul," Eleanor Wilson recalls today. "To us he was never the cold, austere professor so many people have tried to make him. And he was never an egotist."

He was sincere, and he was a philosopher, and he was reverent at all times. But he had the grandest sense of humor, and that revealed itself in his last hours and his last words with Margaret on the League of Nations.

We Will Soon Have 80,000,000 Germans on Our Doorstep—It Is Time We Are Making Up Our Minds What We Are Going To Do With and to Them

EXTENSION OF REMARKS

OF

HON. BERTRAND W. GEARHART

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. GEARHART. Mr. Speaker, because the questions are so timely, raised on the eve of VE-day, I include, as a part of my remarks, a public-service advertisement of Time, the weekly news magazine, be spread upon the pages of the CONGRESSIONAL RECORD as a part of my instant remarks.

Is it possible, Mr. Speaker, that we are caught on this long anticipated day of victory in Europe without any plans? Is it not high time for the captains on our diplomatic front to take the American people into their confidence?

But the shortcomings of the State Department, whatever they may be, do not relieve the American people, citizens in a great democracy, of the responsibilities which are theirs. It is well that they contemplate the questions which Time poses.

The public-service advertisement to which I have just referred is the following:

You'll soon have 80,000,000 Germans on your doorstep.

What's to be done with them?

When the Big Three met at Yalta they did what they could to blueprint the reformatory in which the German people will live after the war.

But a blueprint will house no Germans. The reformatory itself is yet to be built; and meanwhile thinking on what constitutes the "right" peace for Germany will swing back and forth across a wide arc.

Some will wonder if a "tough" peace isn't just what the Nazis want—to drive the German people back to their arms again.

Others will ask if a peace as hard as Germany richly deserves can ever be enforced—will suggest that a milder, enforceable peace may be a wiser choice.

Still others will say: "Germany is rubble. She is devastated as no nation has ever been devastated; she knows now what it means to lose a modern war. Let us not be vindictive."

In any case, it will take more than just our leaders to write the peace and the punishment. It will take millions of men—and you are one of them. You have a great stake in this peace-to-come—and you will have a greater voice in its making than the citizens of any other nation.

Now, during the San Francisco Conference, you have the duty as well as the right to make your opinion known—provided you have earned that right, kept yourself informed, nourished your thinking on the raw material of the news—so your opinion will make the greatest long-term enlightened sense.

Of course, nobody has the complete answers yet—not even the experts. But perhaps these are the big questions you ought to be chewing on so you can be better prepared to "sit in" when the first decisions are submitted to you.

The Big Three said at Yalta:

"We are determined to bring all war criminals to just and swift punishment."

But who are the war criminals? Those who can be convicted of actual crimes? Or the whole Nazi leadership, SS and Gestapo, those legions especially trained for torture and brutality? And under what international laws (if any) can they be tried?

"We are determined to break up for all time the German General Staff."

But Napoleon thought he had uprooted these professional warmakers forever; Wilson, Clemenceau, and Lloyd George thought so. But the Junkers outsmarted them all. You can't get older men like these—who have practiced war all their lives—to begin to think like peaceful lawyers, doctors, tradesmen overnight. What can be done?

"We will eliminate or control all German industry that can be used for military production."

After the First World War we forbade Germany to manufacture arms—set up the best control system we could think of to enforce the ban. For years the midget German Army drilled with wooden tanks, dummy guns. But off came the mask in 1935—and we found Germany had been making arms right under our noses all along. * * * How did we fail in 1918? How can we succeed today?

"In reparation for the damage caused by Germany, Germany will be obliged to make compensation in kind, to the greatest possible extent."

But how? Do we agree with the Russians that the best way is to force masses of the German people into labor battalions to rebuild the cities they destroyed? Or can greater reparation be made with money earned by Germans working in Germany?

And what of the idea to split up Germany into two or three small, separate, individual states?

Has partition of a defeated nation ever been a real peace-keeping success? Would it make more sense to turn Germany into an international area under the management of the new world organization?

Time believes America's greatest need, now and in the coming years, is for the sovereign people to nourish their minds and speak them out on these pressing problems of our time.

To do so, citizens must keep themselves informed. So in advertisements like this Time is seeking to encourage reading, questioning, argument, and straight, hard thinking

For Time's own future is unalterably linked to a United States citizenry deeply concerned about public affairs—to a nation insistent upon seeking the truth and learning from recorded experience.

Toll-Free Bridge—Duluth, Minn., and Superior, Wis.

EXTENSION OF REMARKS

OF

HON. WILLIAM A. PITTENGER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. PITTENGER. Mr. Speaker, the people of northern Minnesota and northern Wisconsin, and particularly

those living in the city of Superior and the city of Duluth, are interested in the construction of a toll-free bridge between these two cities. For many, many years people have paid tribute to Caesar, and this has happened, not in the Middle Ages, but in this modern world of ours, in the twentieth century, and it has happened every time anyone had occasion to travel between the cities of Duluth, Minn., and Superior, Wis. When the present bridge was constructed it was generally understood that it would be a toll-free bridge, but that understanding has been dissolved in thin air many, many years ago.

In order to remedy this situation, before World War No. 2 commenced, I was the author of a bill, H. R. 6475, which became Public Law No. 333, Seventy-sixth Congress, and which authorized the construction of a toll-free bridge between these two cities. This bill was approved August 7, 1939, and subsequently amended so far as the time in which construction could be commenced. However, World War developments forced delay and plans were discontinued because it was not possible to get materials or labor while World War No. 2 was in progress.

Now that VE-day is a reality, I think it proper that we again give vigorous attention to the construction of this toll-free bridge. Public Law No. 333 was enacted after careful consideration by the governing bodies in the city of Duluth and in the city of Superior. It carefully safeguards the interests of the public, and under the terms of that law we will actually get a toll-free bridge after the expenses of construction have been paid from revenue realized from the collection of toll charges for the purpose of building and maintaining said bridge, and for no other purposes. It should be noted that this legislation imposes no burden on the taxpayers of either Duluth or Superior, or on the people of either Wisconsin or Minnesota. The project is a self-liquidating project.

In order to revive and reenact this legislation, I have today introduced a bill authorizing the construction of a toll-free bridge in accordance with the terms, conditions, and provisions of Public Law No. 333, Seventy-sixth Congress, approved August 7, 1939. The enactment of this law and the construction of this bridge will furnish employment, and I think everyone will agree that this is a proper and worth-while post-war project.

The W. F. A., the O. P. A., and the Shortage of Poultry and Eggs

EXTENSION OF REMARKS

OF

HON. CHARLES R. CLASON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. CLASON. Mr. Speaker, today the House has under debate the report of food shortages made by the Special Committee to Investigate Food Shortages. This committee has made constructive suggestions. Recently it has been necessary for the Governor of the great Commonwealth of Massachusetts to make use of extraordinary war powers by seizing truckloads of poultry for distribution to the hospitals throughout the State. Many factors, all bad, have created a deplorable situation. Failure to furnish feed at reasonable prices or at any price in some instances has led to a sharp reduction in available poultry for table use. Many farmers in New England have been forced to curtail the production of poultry and poultry products as the manpower problem on the farms became more critical month by month.

In some instances the farmers have actually gone out of business at a time when the need for more farm production is being stressed by Government officials. The War Food Administration has failed to solve the farmers' problems. At times it has seemed to some of the egg producers in western Massachusetts that the O. P. A. is endeavoring to put them out of business. For example, the O. P. A. has allowed only 1 cent per dozen more for processed eggs than for eggs in their natural state. This allowance is made in the face of a known cost of 3 cents per dozen in order to carry on the processing operation. In addition, the processing plant has to provide for shipping and other costs. Since there is a ready market for eggs the shortsightedness of the O. P. A. in this regard is likely to result in the closing down of processing plants. Since it is reported that the Army and the Navy are not receiving enough of the processed eggs, this situation marks one more case in which Government administration is not successful. To these troubles of the farmers black-market operations have arisen as a further serious menace.

The situation in Massachusetts concerning poultry has been so bad that Gov. Maurice Tobin actually called upon our State legislature to furnish him with such powers as might be necessary to protect the patients in the hospitals of Massachusetts. A resolution was passed by the General Court of Massachusetts, which is outstanding evidence of administrative failure on the part of the Office of Price Administration in New England. In addition, I have received many complaints and protests from individual constituents about the ineffective and unfair handling of the meat problems of the people of western Massachusetts. Inquiries which I have made show that New England for many weeks past has been receiving less than its share or quota of meats as compared with other sections of the United States. I regret that the latest information indicates that we must expect a further decrease in our meat supply at a time when feed for poultry, hogs, and cattle exists and could be made available to livestock producers.

I believe that the resolutions adopted by the General Court of Massachusetts on March 28, 1945, set forth one of the sharpest indictments of the inefficiency of the Office of Price Administration known to the public. The shortage of poultry in Massachusetts is said to be due to a combination of factors all of which are within or should be within the control of the Federal Government. They include unfair egg price ceilings, a serious black market in poultry, and inefficient administration of available supplies of other meats throughout the country. This break-down in Federal activities by the O. P. A. caused the General Court of Massachusetts to pass a law at the suggestion of Gov. Maurice Tobin which permitted him to secure a sufficient supply of poultry to meet the needs of hospitals in the care and treatment of their patients. It is difficult for Americans to believe that it is necessary for the Governor of a great State to cause police officials to halt trucks carrying poultry and to confiscate the poultry in order to furnish supplies for our hospitals. Yet, this happened on several occasions in different parts of Massachusetts during recent weeks. The resolutions also call attention to the need to stop unlawful practices in the sale and distribution of poultry. The outstanding feature of the resolutions, however, was the clause in the preamble of the resolutions in which the State Legislature, the General Court of Massachusetts, acting at the request of Governor Tobin, stated that it was the belief of the members of the General Court that the fundamental cause of the existing emergency was the failure of the Office of Price Administration to recognize the peculiar condition under which the New England poultry industry is forced to operate. Six weeks after these resolutions were adopted, conditions in the poultry and egg business of Massachusetts remain unsatisfactory.

Congress is now investigating the failures of the O. P. A. and the W. F. A. in connection with the critical meat shortage in the United States. I hope that these congressional committees will give consideration to the difficulties now prevalent in the poultry and egg industries. In any event, I urge the officials of the Office of Price Administration to take the steps necessary to reestablish the poultry and egg businesses on a stable basis which will bring these most essential food products within the reach of the millions of American families who rely upon them in large part for proper food. Our industrial workers require meats and eggs in their diet if they are to remain efficient at their war work. This problem is directly connected with the success of our war effort. It deserves better and more efficient administration at the hands of Government officials. May our farmers secure the cooperation from the Government agencies which they certainly have earned. I hope that special inducements shall be given to poultry producers to increase their supplies of poultry and eggs, as recommended by the special committee.

Wood Pulp Waste Converted Into Alcohol, Acetone, and Fuel

EXTENSION OF REMARKS

OF

HON. HOMER D. ANGELL

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. ANGELL. Mr. Speaker, an important discovery of chemical processes

for the utilization of sulphite liquor that is a waste product from wood-pulp manufacture has recently been made. It no doubt will have a most important bearing on the utilization of wood waste in our forestry industry. I include an article by Robert A. Barr which appeared in the April 28, 1945, issue of the Timber Operator describing this process.

The article is as follows:

WOOD PULP WASTE CONVERTED INTO ALCOHOL, ACETONE, AND FUEL

(By Robert A. Barr)

Climaxing more than 2 years of scientific research, two Seattle men announced the discovery of one of the most important chemical processes in the history of forest industries—commercially feasible means of complete utilization of the sulphite liquor that is a "waste" product in the making of wood pulp.

Experts said the discovery may be one of the greatest boons in Northwest history.

The men are Dr. Bror L. Grondal, professor of forest products at the University of Washington for nearly 30 years, and Maj. Henry W. Berger, gray-haired research chemist and expert fermentologist.

Under the process, developed through painstaking experimentation and study, Grondal said they have evolved a method of producing butyl alcohol from sulphite liquor, as well as other products, all in the course of the research.

The process evolved by the university men should not be confused with that employed by the new Bellingham, Wash., plant of the Puget Sound Pulp & Timber Co., which manufactures ethyl alcohol, as contrasted to butyl alcohol, from wood pulp byproducts.

To the casual ear perhaps what the men had to say would not mean much, but to the plastics industry, the paint and lacquer manufacturer, the fuel dealer, the pulp manufacturer, the dairy farmer, and the synthetic rubber industry, its commercial aspects would be too great for contemplation at one sitting.

For the Washington pulp manufacturer here was a way to eliminate wastage of 50 percent of every log cut in the forests for his pulp mill.

Here was the answer to a dream as old as the pulp industry.

For the pulp man, too, was an answer to one of the biggest headaches which ever harassed a major industry—pollution of Puget Sound and other water by the dumping of sulphite liquor which had precipitated bitter battles, carried against the pulp men by the fisheries interests into the courts and the State legislature. The pulp man has dug down in his pockets to the tune of $300,000 to find something to do with the sulphite.

For the plastics industry, the synthetic rubber industry, here was a brand new, cheap source of butyl alcohol from sulphite liquor, which by test tube and beaker has been changed from a major nuisance to virtual liquid gold. Formerly these industries had relied almost solely on production of the alcohol from molasses.

NEW KIND OF FUEL

For the fuel dealer, here was a completely new kind of fuel, extracted from the sulphite liquor in the form of a heavy, insoluble "fuel precipitate," with the heating qualities of wood and the appearance of finely cracked coal. This now is wasted in huge quantities.

The new fuel, Berger explained, can be ground from its original form of granules, about the size of a split pea, into powder for blowing into furnaces, or can be pressed into any size lump or log.

The substance, which burns in a manner similar to coal, contains about 6,000 British thermal units for each pound as against about 12,000 B. t. u.'s in average quality coal, or from 5,000 to 8,000 B. t. u.'s in wood, the men explained. In its original form, it would be suitable for use in stokers.

"The recovery of the substance from the liquor is so great," Berger said, "that it comprises at least 75 percent of the fuel used in the production of the pulp from which the liquor is cooked."

BOON TO DAIRY FARMERS

For the dairy farmer it will mean a new source of yeast fodder which is produced in large quantities necessary for and in the course of the production of the butyl alcohol. The yeast, high in nutritional value and vitamin content, is chemically pure and can even be used in the home for baking and by the commercial baker, it was explained.

Recovery from the liquor of the substances, Grondal said, is accomplished by comparatively simple, inexpensive, progressive processes of precipitation, fermentation, and distillation, with a sufficiently high yield of the materials to make it highly advantageous to the industrialist from an economic standpoint.

The liquor, containing about 2 percent of available sugar, which in itself would support commercially feasible operation, also is about 12 percent fuel precipitate by weight, it was pointed out.

Grondal explained that for want of practical use of the liquor, it is being dumped into Puget Sound from mills in this area at a rate of 1,700 tons a day.

MUCH FUEL LOST

This would mean that usable fuel is being discarded at a rate of 192 tons a day in this area—which has a serious fuel shortage.

Although the new-type fuel gives off a somewhat sulfurous odor when it burns, it was pointed out that its use in industrial plants, where the smoke and fumes could be treated at low expense, would release other types of fuel for residential consumers.

MUCH ALCOHOL PRODUCED

From 100 pounds of the recoverable sugar, the process produces 22 to 23 pounds of butyl alcohol; 10 to 12 pounds of acetone (used in paints, solvents, thinners, etc); and about 3 pounds of ethyl alcohol.

Grondal, who 2 years ago began the research work after retaining Berger, and who has been working constantly with Berger since, said the process now is "available to any and all who want to use it."

Grondal's praise for Berger was high. Berger, a veteran of the First World War, is a graduate of the University of Michigan, and studied fermentology extensively in Europe. Returning to this country, he became a fermentologist in the United States Bureau of Chemistry.

Berger later went into consultant work, and before his work here operated several mines in Arizona. In his office the 65-year-old chemist leaned back in his chair and chuckled, and then summed up his 2 years of work as though it had taken only 2 days.

MATTER OF DIET

"It was just a matter of diet for the bacillus that does all the work," Berger explained. "Sometimes they call it the Weissman bacillus, developed by Dr. Weissman, of London, before the last war for production of butyl alcohol from molasses.

"Another name for it is the clostridium acetobutylicum. It's a microscopic, rod-shaped bacillus that divides itself in the middle under normal development. Sulphide liquor was a pretty tough diet for it. He couldn't survive or develop normally and ferment the liquor for distillation.

"We had to add certain chemicals directly to the raw liquor, which would leave the available sugar behind, and then our problem was to get rid of the inhibiting materials which hampered normal growth of the bacillus, which in turn prevented his conversion of sugar to alcohol and acetone.

"It took a lot of work and a lot of experimenting, but we found it at last."

The research work has been under the sponsorship of the Washington State Planning Council.

Scientific Suicide Faces America

EXTENSION OF REMARKS

OF

HON. WALTER C. PLOESER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. PLOESER. Mr. Speaker, the following is a statement by Dr. Charles Allen Thomas, director of Monsanto Chemical Co.'s central research laboratories at Dayton, Ohio.

Adapted from an address which he delivered March 27 at the annual stockholders' meeting of this company, the statement sets forth his belief that "scientific suicide" will result from this country's failure to train replacements for technical men called into the armed services.

As information, Dr. Thomas has been head of Monsanto's central research organization since 1936. He is a graduate of Transylvania College and of Massachusetts Institute of Technology, and a director of the American Chemical Society:

Scientific suicide faces America unless immediate and adequate steps are taken to train replacements for technical men going into the armed services.

American college graduating classes have been reduced to 10 percent of their former level. Our Selective Service System has not only virtually eliminated the training of young scientists, but also has made it very difficult for industries and universities to retain young men already trained.

There are thousands of scientists in the Army and Navy doing work of a nonscientific character. Several thousand young scientists in uniform can do no more than several thousand other soldiers on the battlefield, but in the laboratories these young scientists may be able to create new things to hasten military victory and to assure jobs for millions of returning soldiers.

Our situation in America is all the more serious when compared with that of other countries, which are encouraging the training of scientific students. England is not making the same mistake she made in the last war, when she drafted and lost many of her brightest scientific students and young technical men. A case in point is young Henry Mosely, who, in 1913, at the age of 25, had given to the world the first direct experimental evidence for allocation of atomic numbers to the elements. He was killed in action in 1915.

Today, Cambridge and Oxford Colleges are enjoying their highest enrollments in history. England's scientific and technical schools are crowded. No scientist who is 21 years or older is permitted to engage in any work in England, military or civilian, which does not utilize his training, and ample provisions have been made to keep the young scientist in training until he is 25.

A similar attitude toward technical men exists in Russia. No less an authority than Sergi Ogoltsov, Commissar for higher education in the U. S. S. R., stated a year ago that Russia awarded 75,000 technical degrees in 1942 and that the number would be greater

in 1943 and 1944. In peacetime, America awards about 35,000 technical degrees a year.

England and Russia will emerge from this war more strongly equipped with scientists and technicians than at any previous time in history. If the war were over tomorrow, the United States would need until 1955 before our colleges would be able to make up the deficit of trained scientific men in this country.

We approach the post-war era with a pent-up demand for scientific progress and industrial applications of our science by industry, but we are making no provision for supplying scientists whom we must have in order to meet this demand.

Instead of accelerating their training, as we should in order to assure increased scientific accomplishment, we have retarded it. Unless something is done immediately, our country faces scientific bankruptcy. I believe the people of this country should be cognizant of this tragic situation.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. J. VAUGHAN GARY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. GARY. Mr. Speaker, under leave to extend my remarks, I include in the Appendix of the RECORD excerpts from the minutes of the United States Circuit Court of Appeals for the Fourth Circuit at Richmond, Virginia, Friday, April 13, 1945, on the late Franklin Delano Roosevelt:

EXCERPTS FROM THE MINUTES OF THE UNITED STATES CIRCUIT COURT OF APPEALS FOR THE FOURTH CIRCUIT, AT RICHMOND, VA., FRIDAY, APRIL 13, 1945

The court convened at 9:30 a. m., pursuant to adjournment.

Present: Hon. John J. Parker, circuit judge; Hon. Morris A. Soper, circuit judge; Hon. Armistead M. Dobie, circuit judge; Hon. Elliott Northcott, circuit judge.

Proclamation is made and the court is opened.

Senior Circuit Judge Parker, upon the opening of the court, made the following announcement:

"Since the court adjourned on yesterday, we have heard with great distress of the death of the President of the United States; and we take this occasion to give expression to our deep sense of the loss that the Republic sustains in his passing.

"In one of the most trying periods in the history of the country, he has furnished leadership which has been an inspiration to the American people. He has guided the country in the greatest war effort in which any nation has ever engaged. He has preserved unity with our allies amid the most trying circumstances. He has laid the foundations upon which we may build a world order based on law and righteousness.

"It is a tragedy that death should have come to him just as the plans for which he had labored so mightily were coming to successful fruition; but he has left the country the heritage of a great dream and a noble purpose as well as a record of great work splendidly done. He will rank as one of the very great Presidents of the United States and one of the greatest figures ever contributed by any nation to world statesmanship.

"It is not fitting that a United States circuit court of appeals should hold public sessions when the Nation is so deeply grieved by his recent passing. The court will accordingly adjourn as a token of its respect. Any matters demanding immediate attention will be considered by the judges in chambers."

A true copy.

Teste:

——, *Clerk.*

The Sovietizing of Finland

EXTENSION OF REMARKS

OF

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. O'KONSKI. Mr. Speaker, when we entered World War No. 2, we were told that we were fighting this war for the "four freedoms" and the Atlantic Charter. Supposedly for this reason, 1,000,000 of our boys have already paid with their lives. We have spent more than $400,000,000,000 for this purpose.

However, as developments occur, we find that the people of America have been fooled again. Recent developments clearly point out that all we have accomplished in this war so far is to save Europe from Hitler and hand it over to Stalin, which is just as bad. We have crushed Brown fascism but we are getting in its place Red faseism, which is just as bad, if not worse.

Present developments indicate that all of the freedom-loving people of Finland, Poland, Jugoslavia, Czechoslovakia, Austria, Hungary, Rumania, Bulgaria, Albania, Latvia, Estonia, Lithuania, and others are going to be swallowed up by Red fascism. More than 250,000,000 people of Europe will never see the light of freedom again if Red fascism is permitted to swallow up these countries and butcher the freedom-loving people in these countries.

No matter what small country we turn to in Europe we find the killing hand of Red fascism taking over just as Hitler tried to do. Unless America raises its voice we are going to find a complete communization of all Europe. Did we fight this war to hand 250,000,000 European people to slavery under Red fascism? Did we fight this war to take away the liberties and the boundaries of these freedom-loving countries? Unless the people of the world wake up that is exactly what will happen.

I wish to deal particularly today with the country of Finland to show how the killing hand of Red fascism is crushing those freedom-loving people. I might add that no nation in the world can compare in integrity, honesty, and love of America than the people of Finland. Yet we are silent while the crushing hand of Red fascism is butchering that nation.

Minnesota Mining & Manufacturing Co.—National Labor Relations Board

REMARKS

OF

HON. HAROLD KNUTSON

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. KNUTSON. Mr. Speaker, a deplorable example of the undemocratic way in which the National Labor Relations Act is being administered has recently come to my attention. From the information which I now have, it is my firm conviction that an investigation of the policies and practices of the National Labor Relations Board as now constituted is not only immediately necessary but long overdue.

Out in the capital city of my State, in the main plant of the Minnesota Mining & Manufacturing Co., one of the largest firms in St. Paul, the N. L. R. B. recently conducted an election between a C. I. O. union and an independent union. For the past 10 years the employees of this plant have bargained with their employer through their own representatives. On many occasions during this long period these employees have rejected the attempts of outside unions to become their bargaining representative.

Why? Because this company is one of the most progressive and fair-minded employers in the country in its treatment of its employees. Among its policies are liberal pension and bonus plans, employee profit-sharing, paid vacations, and wage rates which compare favorably with the best plants in the area. Under these circumstances, the employees have preferred to bargain directly with their employer because outside unions had very little to offer them.

Then came the war. More than 1,300 of these employees have entered the armed forces. The plant has greatly expanded to meet the needs of war production. Many new employees have been added to the pay rolls. Many have been added to replace those who are in the service of our country.

The C. I. O. takes this occasion of the war to put on a new drive to organize the plant. An election is eventually called, in which the employees in the armed forces are denied the right to vote. I need not remind you that these employees retain their seniority and the right to return to their former jobs when the war is over. If anyone is entitled to vote in a collective-bargaining election, it is the employees who left their jobs to enter the service in time of war. Certainly these employees have a vital interest in who will represent them when they return.

But in spite of all appeals to the N. L. R. B. the servicemen are not allowed to vote. Finally the election is conducted under the supervision of the N. L. R. B. The employees vote by secret ballot, and the independent wins by a close ma-

jority. Had the servicemen been permitted to vote, no doubt the C. I. O. would have been overwhelmingly defeated.

Then what happens? The C. I. O. trumps up a set of ridiculous charges to prevent certification of the independent. After 7 months of investigation and delay, while employee problems and grievances remain unsettled due to the lack of a certified bargaining agent, the N. L. R. B., on April 23 of this year, outlaws the election and orders a new one.

And on what grounds? Solely because two officers of the independent union tried to adjust a grievance of a returned veteran. There were no other reasons—no findings of unfair labor practice—no charges whatsoever of company domination. There was only one isolated incident where two employees tried to help out a returned serviceman. The N. L. R. B. ruled that this may have created the impression that the company favored the independent union. And thus the election won by the independent is thrown out, and the C. I. O. is given another chance.

These are the methods used by the N. L. R. B. to prevent certification of independent unions. Elections are thrown out on the slightest pretext and servicemen are denied the right to vote. This case and many others reek with partisanship in favor of the C. I. O. Can it be that the political contributions which might be forthcoming through a C. I. O. victory might have some bearing on these decisions? As free Americans we rebel against such undemocratic practices.

Let me say to you the National Labor Relations Act was enacted to protect the right of workers to choose their representatives—whether they be A. F. of L., C. I. O., or independent—or to bargain for themselves if they so desire. The biased administration of this act contravenes the right of American workers to represent themselves, and the act itself is twisted by the N. L. R. B. into a convenient tool for herding employees into the C. I. O. against their will.

The majority of workers in this plant have freely expressed their preference for an independent union by secret ballot. In refusing to certify this union as the bargaining agent, the N. L. R. B. has flagrantly disregarded the expressed purpose of the act it is charged to administer.

Fellow Americans, it is high time that the National Labor Relations Board, an agency of Government in this free land, discovers that this act of Congress it purports to administer must and shall protect the right of all American workers to bargain through representatives of their own choosing, with equal protection for the rights of those who choose to maintain their independence from the C. I. O. or any other labor group. Partisanship such as this, so clearly evident in this case, can only lead to discrediting the agencies of Government in the hearts and minds of the people. I call upon Congress to correct this evil, and to remove all vestiges of fascism in our American institutions.

Leon Fraser

EXTENSION OF REMARKS

OF

HON. RICHARD B. WIGGLESWORTH

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. WIGGLESWORTH. Mr. Speaker, a few days ago many people in America and other countries were shocked by the sudden death of Leon Fraser.

Fraser was a self-made man. He lost his mother at the time of his birth. He was brought up by foster parents on a farm in New York. Nevertheless he was to achieve outstanding success in everything to which he turned his hand.

Born in 1889, he was a lecturer and instructor in public law at Columbia University at the age of 25. He made good as a newspaper man. He was successful as a lawyer both at home and abroad. Entering World War No. 1 as a private, he emerged a major, being awarded the Distinguished Service Medal in recognition of his services. After the war he served as executive officer and Acting Director of the Veterans' Administration in Washington. Subsequently at the age of 35 he began to play a major part in the settlement of the difficult post-war problems in Europe.

In 1924 he served as legal adviser to the American delegation to the London Prime Minister's Conference. From 1924 to 1927 he acted as general counsel and Paris representative of the organizations set up under the Dawes plan. In 1929 he attended the Paris Conference of Financial Experts, which drafted the Young plan. In 1933 he served as a member of the committee of experts at the London Monetary and Economic Conference. From 1930 to 1933 he served as vice president of the Bank for International Settlements at Basel, Switzerland, and from 1933 to 1935 as its president.

On his return to this country he became vice president in 1935 and president in 1937 of the First National Bank of New York, being sometimes referred to as "the bank president who had never worked in a bank."

He served also on the Federal Advisory Council of the Federal Reserve System, as a trustee of Columbia University and other educational institutions, and as director of several of the most powerful manufacturing concerns in the Nation. He was the holder of five degrees and, in addition to the Distinguished Service Medal from his own country, was awarded decorations for his services abroad by the Governments of Belgium, France, Italy, and Yugoslavia.

It was my privilege to work closely with him for 3 years in Europe at a time when he was general counsel and Paris representative for the Dawes plan under the late Hon. S. Parker Gilbert, then Agent General for Reparation Payments, and, as such, the representative of some 12 allied nations, including America, creditors of Germany as a result of World War No. 1. I knew him intimately. I knew his brilliancy.

Fraser spoke three languages fluently. He knew and commanded the respect and confidence of the leaders in Europe.

He had the ability to reduce the most difficult problem to its simplest terms. He was tactful and resourceful in harmonizing conflicting viewpoints. He could speak effectively to a court, to a jury, or to the public.

He always approached a subject dispassionately and courageously seeking a solution which, in his judgment, would accomplish the greatest good for the greatest number.

Only recently he appeared before a group of Senators in reference to the Bretton Woods proposals. A veteran Member of the Senate told me after the meeting that Fraser was the most powerful witness he had listened to in years.

He could have been an able Secretary of the Treasury. He could have been an able Secretary of State. He could have filled any position in public life in America with ability and distinction. He was, in my judgment, one of the ablest Americans of his time.

His death at the age of 56 is a tragedy. He could have contributed immeasurably to the solution of problems which we must inevitably face in the days and years ahead.

I include as part of my remarks, Mr. Speaker, two editorials, the first appearing in the New York Times of April 10, the second appearing in the Washington Post of April 10, both of which speak eloquently of the man and his career:

[From the New York Times]

LEON FRASER

The tragic death of Leon Fraser removes one of the leading financial figures of this country and of the world. Though he was president of one of the most conservative banks in the country, the First National of New York, he was, except perhaps in external appearance, far from the conventional conception of a prominent banker. That was chiefly because he was so much more than a banker. Few men have had such a wide range of experience; few have shown their capacity to succeed in so many different careers.

At college he thought of making a career in literature, edited The Columbia Monthly, and became a newspaper reporter. He swung for a time into political science, won a Ph. D. degree at Columbia, studied law, taught it, carried on pacifist activities, then enlisted as a private in the First World War and ended as a major with the Distinguished Service Medal. After the war he became a public official here in the Veterans' Bureau. He practiced international law in Paris, helped first on the Dawes plan and then on the Young plan for German reparations, attended several international conferences and finally became president of the Bank for International Settlements at Basel.

In all the assignments that came to him he showed both extraordinary aptitude and an extraordinary capacity for work. He was distinguished as a banker for the liberalism of his outlook and for the outspoken courage with which he stated his opinions. But behind the efficient and successful banker that strangers saw, there was a deeply sensitive human being. He remained to the end of his life a student as well as a man of affairs. He never lost that wide-ranging curiosity which

he had shown as a reporter. Those who came to know him found in him a rare warmth and friendliness.

He was a city man, apparently, from sense of duty and not by preference. Always his thoughts must have turned to the farm at North Granville, in the foothills of the Adirondacks, where he had been brought up; and when his melancholia, which he concealed so successfully from the outward world, at last became so intense that he decided to take his own life, it was there, amid the scenes of his boyhood and his dearest memories, that he decided to spend his last day.

[From the Washington Post]

LEON FRASER

Leon Fraser, whose death by suicide has shocked a host of friends in many countries, shone at everything he did, and he did many things in what, in his farewell message to his country neighbors, he called a "crowded and busy life." He had a brilliant career at Columbia, where he became instructor at the average student's age. Then he won his spurs as a newspaper reporter. In his spare time he studied law and was admitted to the bar before the United States entered the last war. Enlisting as a private, he soon became known for his legal gifts, and he ended his military service as a judge advocate. As a lawyer he served in the Reparations Commission, quickly came to the notice of the top officials, and from then on worked as an administrator of German reparations. He wound up his experience in this field as president of the World Bank at Basel, a central bank for central banks. Here he started a banking career which eventually led him to the presidency of the bankers' bank, the First National of New York.

It was, in literal truth, a meteoric career, won not so much by burning the midnight oil, as his contemporary, S. Parker Gilbert, did, but by a rich talent coupled with a compelling personality. No man could excel Fraser in lucid exposition. Whatever problem arose in the interminable arguments concerning the sum of German reparations, which filled up so much of the history between wars, Fraser could reduce it to its essentials and win the respect and admiration of his listeners by his logic and articulateness. He was an ideal choice for the World Bank. Central banking is altogether different from commercial banking, being an art, not a business, and it calls for the imagination and skill in promoting a meeting of minds that Fraser brought to it. Much the same gifts were required at the First National, which caters to banker and big-money depositors, and it seems scarcely credible that beneath his buoyancy and energy there lay a melancholia which induced him, 2 years after the loss of his wife, to take his life. His almost boyish bonhomie seemed to spring from an integrated personality and an untroubled psyche. When he died he was a statesman in the American banking fraternity, and his tragic passing will be mourned far and wide.

Mandates—Trusteeship—Palestine

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. CELLER. Mr. Speaker, about a year ago, I was authoritatively informed I need not worry about Britain slamming the doors of Palestine against the Jews seeking to escape from the Nazi clutches. I was told that the infamous MacDonald white paper would be bypassed. Those words to me were balm. Apparently these words have evaporated into nothingness.

Recently, Lord Devonshire, Under Secretary for Colonial Affairs, announced in the House of Lords that the colonial office had rejected a demand by the Jewish agency for extra immigration certificates in addition to those available under the Palestine white paper. Lord Devonshire offered as an excuse what he termed "information" that a great many Jewish refugees did not want to proceed to Palestine. That statement is as ghastly as a laugh in hell. The Swiss Government recently received several thousand children and adults from various concentration camps in Nazi and satellite countries on condition that these refugees would be subsequently removed to make way for others. Now that the colonial office has refused to issue immigration certificates to Palestine, these refugees will be forced to make the trek out of Switzerland to an U. N. R. R. A. camp for refugees in Algiers. At first, when extra certificates were requested, the excuse offered was lack of ships. Now that there are ships, the British Government assumes the Marie Antoinette attitude of "Let them eat cake."

As usual, Lord Devonshire accompanied his frigid refusal with words of sympathy for the plight of the Jews and trusted that the refusal must not be taken as an indication of a lack of feeling for Jews and that certainly he acted with all good intentions. I remind Lord Devonshire that the road to hell is paved with good intentions.

Sympathy and all the pious utterances in the world did not save the 4,000,000 dead Jews. Words of pity did not save the victims of the steamships *Patria* and *Struma* who were drowned off the shores of Palestine. Phrases of compassion will not restore to the wandering dispersed Jews of Europe the sense of belonging. Common sense tells us that in those areas where when antisemitism flourished and still flourishes in Germany, in Roumania, in Hungary, for example, such antisemitism will not evaporate with military victory. Will the non-Jewish populations welcome them back? Will they find room for them in shattered economies? What should be a matter of course in the restoration of stolen property is being all knotted up by dilatory legal practices. The uprooted Jews seek a place where they can live with national dignity with the freedom and liberty which is the right of man.

To me the greatest pity of it all is the blind spot in the eyes of the leaders of the Anglo-Saxon world. The whole Anglo-Saxon world, least of all our British friends, cannot afford to overlook what a Jewish commonwealth in Palestine would mean, not only to the Jews, but to themselves and to the rest of western civilization. To those trained in world affairs, it is obvious that a Jewish Commonwealth, a democratic Jewish Commonwealth in Palestine would be the one solid bastion of western civilization in the East. The Jews with their genetic and religious background based upon the Orient are the best equipped to create the bridge between the East and the West. Yet they are a people who speak the languages of the West, whose cultural pattern has been shaped by western civilization and whose loyalties belong to what is best in occidental heritage. The Arabian world is a jungle of intrigues, of warring interests, of undercurrents of malice. Arabia is the one unknown quantity in the equation we seek to establish of one world. Remember, Arabia has always sold to the highest bidder. In this war, we ultimately proved that we, the Allies, were the highest bidder. As auctioneers of international commodities—I mean oil—they play and will continue to play a cunning game. We pay high now; the next time an aggressor nation or combination of nations will pay higher. Would it not serve Britain and the United States well to know that solidly planted in the midst of this area is a commonwealth dedicated to the interests of western civilization. You might ponder this for a while.

Let us admit, frankly, that we are facing a crisis in the whole situation of the establishment in Palestine of a national homeland for the Jews. The United Nations are at this very moment meeting at San Francisco. The Jews are not represented as such. Palestine is not represented. Pan-Arabia is well represented. But there is one question that is on the agenda that concerns us both as members of the allied nations and as Jews and that is the question of mandates. Because the whole problem is so intimately related to the problem of Palestine, I believe that tonight we must dwell on the subject for a few moments.

The war has taught us a number of lessons. Heretofore dependent or "orphaned" lands were held under a so-called stewardship by one country. Let us take for an example, the Mariana Islands, the Caroline and Marshall Islands mandated to Japan. They were to be held by Japan in trust for the League of Nations. Contrary to the letter and spirit of the mandate, Japan fortified these islands. She garrisoned and controlled them with uttermost secrecy. Our ships and those of other nations were actually precluded from entering the harbors of these islands. The tragic results for all allied nations of such selfishness on the part of the mandated power are well known.

Before I continue on the question of mandates, permit me to direct your attention to the basic thought expressed in article 22 of the Covenant of the League of Nations. It reads: "To those colonies and territories which as a consequence of the late war have ceased to be under the sovereignty of the States which formerly governed them and which are inhabited by peoples not yet able to stand by themselves under the strenuous conditions of the modern world, there should be applied the principle that the well-being and development of such peoples form a sacred trust of civilization and that securities for the performance of

this trust should be embodied in this Covenant."

Palestine and Iraq were mandated to Great Britain, Lebanon and Syria to France. Iraq, Lebanon, and Syria were endowed with independence; they are now sovereign nations. The only class A mandate (so designated by the League of Nations) not granted independence is Palestine.

Keep in mind that the only purpose of the class A mandate was to permit the mandate power to watch over the territory as a mother would over an adopted child. It was never intended for the trustee country to act as though she owned the mandated land and could, therefore, treat it as a colony or subjugated territory.

How Great Britain has failed in her trusteeship you well know. The injunctions of the mandate given in pursuance of the Balfour Declaration were and are ignored. "Unquestionably, the primary purpose of the mandate as expressed in its preamble and its articles is to promote the establishment of the Jewish national home." This unequivocal, this flat and direct statement was not made, as might be supposed, by some fervent espouser of Zionism. It was made by the Palestine Royal Commission, an official body of the British Government, appointed to investigate the administration of Palestine in 1937.

"Unquestionably," the Commission said; yet, today, it remains very much the question.

To all other mandates of the A class was given independence and national sovereignty; to the Jews was given the fatal white paper—is given continual denial of relief.

I say that the system of sole trusteeship of mandates in the interests of international good will and the shaping of a durable peace must give way to a system of international trusteeship. If, for example, three nations were to set up a cotrusteeship with an administrative staff culled from the register of an international civil service, no one nation could act for her own selfish interests. Two nations instead of three might be sufficient. In either case, such a set-up would be a deterrent to rapacious and self-serving patterns of colonial administration. Any covenant covering the terms of a mandate must include the right of inspection by a mandates international commission, and the right of redress of wrongful administration by direct petition to such commission by the inhabitants of the mandated territory. Heretofore there existed no such right of inspection and petitions for redress could only be submitted through the colonial administrator. We can safely say that had the original mandate system, which is said to have been conceived in generosity but born in sin, been so organized, the abuse of power with such dire results would not have taken place. We would not now be faced with the fatal possibility of Palestine becoming an Arab state with a Jewish ghetto attached thereto.

I know that the question is now arising in your mind concerning the possible claims of the United States to islands in the Pacific that will be wrested from Japan. I know that you question the statements made by Admiral King to the effect that we must maintain large postwar army contingents in these islands as protection against possible aggressor nations. I know you are concerned with statements in our Congress demanding immediate action on legislation to annex key Pacific bases, such as the Marshall and Caroline Islands, Iwo Jima, Saipan, and Okinawa.

These are not the views of those of us who look for a strong international organization to build and maintain the peace. We ask ourselves whether we intend to hold bases in the Philippines. Would that be consistent with Philippine independence? The United States now holds bases in New Georgia and New Britain, in Guadalcanal, and the Gilbert Islands. The first two are the possessions of Australia and the latter two of Great Britain. We hold a base in Dutch New Guinea, possessions of the Netherlands. Do we intend to argue that we must take these possessions away from the possessing country because they are necessary to our national defense? If so, we must applaud the annexation of Rumania and Poland by Russia and of Belgium and Holland by Great Britain. Certainly, they too can argue such possession is necessary for their self-defense. Australia is already putting forth her demands. Australia, as Mr. Evatt, her Minister of State for External Affairs, says: "Will naturally regard the arc of islands lying to the north and northeast of our continent" as "of crucial importance." She is "vitally concerned" about "who shall live in, develop, and control these areas so vital to her security from aggression." So with covetous eyes France gazes upon the river Rhine and the Rhineland and the Ruhr; so Britain with the Low Countries; and so Soviet Russia with the borderland with Germany and with access to the sea through the Baltic, the Black Sea, and the Persian Gulf. Are we to permit the wild scramble to begin again? Under the Atlantic Charter we are pledged "to seek no aggrandizement, territorial, or otherwise." Would not outright ownership or even sole trusteeship which has been translated by deed into outright ownership be a contravention of this basic principle recited in the Atlantic Charter? What dismal seeds of danger are we sowing thereby? We the United States, and freemen everywhere, must see to it that the Atlantic Charter shall now become a "riddle wrapped in a mystery inside an enigma." Roosevelt could not rest in his grave with such vile hands tearing asunder his Atlantic Charter. Incidentally in the Panama Canal Zone, where sovereignty lies in Panama, our interests of defense have been well served.

The answer lies not in sole possession or sole trusteeship, but in international cotrusteeship with special accommodations for the needs of the country whose area is most vitally affected. The rights of visitation must be accorded all members of the United Nations. Some compromise could be worked out as to Pacific bases where the United States might have unfettered control in military matters but we would have to respond to our cotrustees in all nonmilitary matters.

I would like to ask this question. Against whom are we so busy protecting ourselves? I mean not only the United States, but Great Britain, France, and Russia as well. Against each other? Are we starting a world peace conference in an atmosphere of mutual distrust? Are we putting our faith in international organization or into weapons of war, island bases for war, and cordons sanitaire?

To go back specifically now to Palestine, which is so intimately tied up with this problem of mandates. A cotrusteeship for Palestine, save for an immediate establishment of a Jewish democratic commonwealth, is a must.

Without fear of contradiction I say that Britain has betrayed her trust in violation of all moral and legal precepts. She violated the Balfour Declaration, the terms of the Mandate signed by 52 nations, the Anglo-American Treaty of 1924. She ignored the condemnation of the white paper by the Permanent Mandates Commission. She ignored the weight of evidence of the suffering of the Jewish people. Unlike the war of 1914, this time Britain did not have to woo the Jewish people to cast in their lot with hers. They were on her side, anyway. So, instead, she appeased the Arab world, an appeasement that bore no good fruits for her as is in the case of all appeasement. If I am harsh, I am also just.

I know you will be interested in the picture that the United States presents with reference to the Jewish problem. With the passing of Franklin Delano Roosevelt, there has gone from us a loyal friend, a true believer in the dignity of man, be he Jew or Gentile. He fervently hearkened unto the Voice of Leviticus: "Proclaim liberty throughout all the land unto all the inhabitants thereof."

He exemplified rare courage and the understanding heart when he devised the War Refugee Board which was an independent agency with no authorization from Congress. It has rendered and will continue to render unequalled service to the Jews fleeing from Festung Europa into free and liberated lands.

It was Roosevelt who, despite caustic comment and virulent opposition, set up the Free Port at Oswego, N. Y. There over a thousand who escaped the Hitler scourge are comfortably housed and protected.

It was he who set up with no aid from Congress the Fair Employment Practice Committee. He did this in the spirit of the vision of Micah: "They shall sit every man under his vine and under his fig tree; and none shall make them afraid."

It was he who in 1938, realizing that thousands upon thousands who would be rendered homeless and helpless by Nazi terrorism needed all possible outside help, issued the call for delegates to come to a conference at Evian, France. Thirty-two nations responded. The work of that conference was continued at Bermuda.

The hand that never faltered was Roosevelt's.

Now he is gone to the Valley of the Shadow. The burning torch is handed to Harry S. Truman.

Naturally we wonder what manner of man is he. Certainly we must remember that the problem of the Jews, together with its political implications, its historical associations rich in story, the 2,000-year-old trek of the Jew wandering from land to land, all these may be like a new book to him, read but not studied. Frankly I believe he will study that book and study it carefully. We take note that on a number of occasions President Truman showed his sympathy with the work of the Jewish people. He has more than once defended the Jews against those who would slander and defame them. In October 1943 he appeared at the St. Louis B'nai B'rith centennial meeting and denounced the slurs which had been made on the Jewish part in the war effort. During his term as Grand Master of the Masons in Missouri Truman appointed a rabbi as lodge chaplain.

After his inauguration as Vice President at Chicago, on March 17, 1945, President Truman made a strong plea for religious tolerance. He said:

> Bigotry and intolerance are the munitions of our enemies. Evil doctrine of discrimination frequently imported from gangster nations plague certain areas in America. Racial and religious intolerance is being preached here by agents of our enemies as well as by innocent victims of their propaganda.

These exemplary sentiments were highlighted and emphasized in his statement before the joint session of Congress on the Monday following the death of Franklin Roosevelt. The new President said:

> Our forefathers came to our rugged shores in search of religious tolerance, political freedom, and economic opportunity. For these fundamental rights they risked their lives. We well know today that such rights can be preserved only by constant vigilance, the eternal price of liberty.

However, we must mark that when Truman was asked his opinion on the then pending Palestine resolution in the Seventy-eighth Congress in the fall of last year, his published reply, while containing a degree of sympathy for the establishment in Palestine of a national homeland for the Jews, did seem somewhat uncertain because of an apparent fear of muddling in diplomatic waters at that time. He did, however, embrace the Palestine plank in the Democratic Party platform.

This leads me to this important observation. Truman, beyond doubt, has a deep and warm sympathy for the Jewish cause, but he needs much nurturing and guidance on the question of Palestine. It is incumbent upon the friends of Palestine to win his ear and pour therein the tearful prayer that he give us aid and comfort.

There is little room for complacency. There will be those who do not see eye to eye with us. They will seek to tug and pull Truman in other directions. We must be pragmatic; we shall take nothing for granted. Those of us, therefore, who are in Washington have our work mapped out for us.

But—and this I wish to emphasize and underscore—the time is past when we placed our reliance upon personalities and friendships. We have depended too much in the past upon Chaim Weizman's friendship with high-ranking officials in the British Government, upon friendships such as that of Stephen Wise for President Roosevelt. It was almost like the politician's "personal contacts" that we hear so much about. We placed too heavy a burden on the "top layers." I do not say this in criticism of these exemplary gentlemen. They are my esteemed friends. They have rendered yeoman service. I only inveigh against the system we allowed to grow up. It's time for us to translate the need for Palestine into democratic action. This means that the people, the good people of Canada, of Great Britain, of France, of the United States, must act themselves through their legislatures, through bills passed in their Congresses and Parliaments, through expression of public opinion on radio networks and forums, in newspapers not only Zionist bulletins, via editorial expression, through magazines and publications of wider scope. Enough hush-hush and enough, "Let George do it." It is a movement of the people; let it be such.

Let me go back for a moment to mandated territories. It is to be noted that there is free and open discussion on all mandated territories except in the case of Palestine. As to it, world officialdom assumes an ominous silence. Let us talk about Palestine; let us write about Palestine; let us force the discussion of Palestine into the open. Let us ask of officialdom: "What have you to say?" "What is being done?" "What shall be done?"

If the United Nations are to prove that not power will prevail, but moral law and order, then the Palestine pledge must be redeemed. By so doing, it would thereby reject for all time the noisome ideology of nazism. Smaller nations would find therein a reason for rejoicing and a basis for trust. We will know thereby that the shaping of a better world has really begun.

Should Palestine remain in the clutches of imperialism, then even the dispassionate in temperament and the judicious in mind, could he but peer into history, would quail before the verdict of posterity. Twenty-five years hence, when the record of our dark age is read, posterity will find it incomprehensible that a people should have been permitted to continue in travail when the possibility of rescue was at hand. What decent answer can be given? The small intrigues and cheap expedience in which the Palestine issue is being drawn before our eyes shall be a source of burning shame in days to come.

Almost Unbelievable

EXTENSION OF REMARKS

OF

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. O'KONSKI. Mr. Speaker, the representatives of the Polish underground government revealed themselves to the Soviet military authorities in the following circumstances:

During the first days of March the delegate of the underground government received an oral invitation to participate in a conference with the representatives of the headquarters of the first White Russian front.

On March 11, the delegate of the Government and a few other members of the underground received identical written invitations, signed by Colonel Pimienow of the N. K. W. D., stationed in Pruszkow, near Warsaw, acting in the name and on order from the commander of the first White Russian front, General Colonel Iwanow, with whom the Poles were to meet.

In his invitation Colonel Pimienow stressed the urgent necessity and the importance of this meeting and guaranteed with the word of an officer of the Red Army the personal safety of all persons of the Polish underground government who will accept the invitation.

Vice Prime Minister Jankowski dispatched an emissary to Colonel Pimienow to check the authenticity of the invitation. The emissary returned with confirmation of the previous negotiations and with additional information that: (a) The conversations with General Colonel Iwanow are in regard to the coming out of the political parties in Poland; (b) general clearing of the atmosphere; (c) inclusion of the underground political parties in the common current of the democratic forces of independent Poland.

The conference with General Colonel Iwanow was to be preceded by initial talks with Colonel Pimienow.

On March 17, Mr. Jankowski had a conference with Colonel Pimienow and informed him that:

(a) The Polish underground army has been definitely dissolved.

(b) The underground political parties would be willing to begin open activities, but the existing circumstances—which he described in detail—do not permit them to come out.

(c) It is entirely up to the Soviet authorities to create an atmosphere permitting open political activities and to assure freedom of action for all citizens.

In addition, Mr. Jankowski requested that General Iwanow elucidate on the following questions:

First. The scope of competence of the Lublin government and the N. K. W. D. and the political rights of the command of the front.

Second. Why the command of the first front and not the command of the Soviet forces is seeking contact with the Polish underground government.

Third. Is the command acting with the knowledge and approval of the Big Three commission or Mr. Molotov's?

Finally Mr. Jankowski stated that he will demand facilities for sending a delegation to London in order to consult with the Polish Government and political authorities.

On March 20 Mr. Jankowski received a note from Colonel Pimienow that, first, General Iwanow is authorized by the Soviet headquarters, of which he is a member with personal approval of Mr. Stalin, to conduct the talks; second,

Moscow is eager to settle this problem as soon as possible; third, a plane will be placed at the disposal of Mr. Jankowski to take his delegation to London; fourth, General Iwanow is willing to come to the meeting in the nearest future.

Separate talks were held by Colonel Pimienow with the representatives of the Peasant Party, the Labor Party, and the National Party. During these conversations he stated that "the Lublin government will have to agree with the decisions of the command of the front which are official."

On March 27, 1945, the following persons went to Pruszkow for conversations with General Iwanow:

Delegate and Vice Prime Minister of the Polish Government, Jankowski, Labor Party.

President of National Unity Council—the parliament of the underground—Puzak, Polish Socialist Party.

Colonel Okulicki, former commander of the underground army.

All three did not return to the meeting of the National Council which was to be held that day in the afternoon.

On March 28, the following went to Pruszkow for a meeting with General Iwanow:

Assistant delegate of the government, Adam Bien Walkowicz, Peasant Party.

Minister Jesinkowicz Opolski, National Party.

Attorney Pajda Traugutt, Polish Socialist Party.

Kazimierz Baginski, secretary of the Peasant Party.

St. Mierzwa, member of the executive committee of the Peasant Party.

Stypulkowski and Kobylanski, from the National Party.

Chacinski and Urbanski, from the Labor Party.

Czernik and Michalowski, from the Democratic Party.

Debski Jan, as an interpreter.

None of them returned; the "higher authorities" of the underground supposed that they were taken to the east in automobiles.

On March 30, three unknown civilians and one Russian officer arrived in a car in Wierzchoslawice, residence of Wincenty Witos, former prime minister and president of the Peasant Party, and took him to an unknown destination.

Undoubtedly the disappearance of the 16 leaders of the underground quickly spread throughout Poland.

The authorities sent a radio message to the Polish Government in London with a request that the British Foreign Office inquire as to the whereabouts and the fate of these leaders.

On April 25, this question was discussed in the House of Commons in London, where Minister of State R. Law said that the Foreign Office sent an inquiry to Moscow, and that this matter is occupying the earnest attention of the British Government, but he did not enter into a discussion.

On April 28, the Polish Government sent a cable to Mr. Stettinius and Mr. Eden in the United States with a request for clarification of this matter during the stay of Mr. Molotov in San Francisco.

Whether a reply was received, and if there was a reply, what was its contents—is not known.

What Goes on in Poland Today

EXTENSION OF REMARKS

OF

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. O'KONSKI. Mr. Speaker, I wish to point out how Russia treats Poland.

January 1, 1945, Lwow: At the beginning of January over 6,000 Poles were arrested in Lwow within 1 week, among them 20 professors of the university, also priests, students, employees of the gas and electric companies, and so forth.

The usual pretext for arrests is—collaboration with the Germans. The belongings of the arrested persons were stolen.

January 19, 1945, Krakow: Krakow is entirely under the control of the Soviet Army. The soldiers are looting Polish stores and warehouses and even private homes. We ask for your intervention with the Allies.

The Soviet authorities posted notices calling for the registration of all men between the ages of 16 and 65. All typewriters and mimeographs are to be registered, while arms and radio sets are to be relinquished to the Soviets.

The provisional Lublin government is the only authority for announcing mobilization. All activities of other organizations are regarded as espionage for the benefit of Germany.

January 22, 1945, Krakow: The population shows no enthusiasm toward the soldiers of the Berling army and a feeling of deep depression prevails.

The arrests have begun among the civilians for the time being.

January 24, 1945, Krakow: The Soviet armies entering our territories are plundering and looting towns and villages, every soldier is on his own. Simultaneously strong propaganda is active and mass meetings are organized.

There is news of executions of the members of the underground in Miechowa and Slomniki. Radziwill has been arrested in Balice. In the county of Miechow the Soviets arrested 40 farmers and peasants for participation or collaboration with the underground.

The Soviet offensive surprised the nation. The population's stand is very patriotic. The temporary joy over the expulsion of the Germans is combined with general distrust toward the Soviets.

In most of the cities the Communists have coordinated organizations and in localities where they were active before their action is very weak.

There is general disorganization and complete lack of administrative apparatus. The supply situation is out of control.

The N. K. V. D. began its terror with arresting all judiciaries. There is a lack of discipline within the Red army, which is looting the country and drinking heavily. The population is oppressed by steady demands of quarters for the army.

A discreet anti-British propaganda has been observed within the ranks of the Soviet Army.

January 25, 1945, Krakow: Small units from the Berling army are arriving in the city. Command posts are being installed with strong escort of the N. K. V. D. Draft to the units is expected. These units lack officers, and there are hurried courses preparing officers for duty. There is a strong propaganda among the soldiers, but nevertheless 70 percent of them are for the Polish Government in London, according to one of their officers.

January 26, 1945, Krakow: The Soviet armies have engulfed Poland. The masses of men, left without supplies, are stripping the country of all its stores of food as well as livestock. The Soviet military authorities have no regard at all for the Lublin government; they act independently. Unfriendly and hostile attitude toward the Poles is apparent.

One aspect of the propaganda is to prepare the armies for a march past Berlin—even on to London.

The Lublin government is a group of fanatics and Russian servants, without a plan, without an ability and will to govern, and without men to conduct the work. Their attitude towards Russia is servile.

The statements of the ministers delivered at the meetings in Krakow promising full sovereignty, coordinated economic system and private ownership to the Poles—are only empty phrases without the support of their masters. The Government silently agrees to the fact that a visa from the Soviet Ambassador and a permit from the Commissariat of Foreign Affairs is necessary for a trip to Lwow.

Yesterday, Zaruk, sent from Lublin under the name of Michalski, has been made the mayor of the city. A supposed Socialist, Wolas, and a Democrat, Tor, were appointed as his assistants. The city council is not completely organized and is composed of the members of the Democratic Party and unknown Socialists and members of the People's Party. The authorities for the province are similarly organized; Mr. Mitera has been named as the Governor. The new authorities had not as yet begun to function.

The stores are closed, there is no electricity and gas, there is no bread and other supplies, all means of communication are at a standstill.

The soldiers are looting homes and raping women in the streets. No one is safe.

The arrests began with judiciaries in cities and with farmers in the villages. This group of people is to be eliminated altogether as a caste.

There is a planned destruction of the underground army.

Prolongation of this state of affairs may result in a spontaneous armed revolt.

January 27, 1945, Krakow: The Soviet Army is frightfully plundering and robbing the civilian population in towns, in villages, in homes, and on the streets. They are taking food, watches, and jewelry. Women are raped by officers as well as by soldiers, who say they have a right to the Polish women for freeing Poland and shedding their blood.

Please intervene with the Allied governments because we are afraid of an armed resistance by the population.

January 30, 1945, the general headquarters: Terror against the underground army and civilian authorities is increasing. Sixteen officers of the underground have been arrested in Miechow. A number of officials were arrested in Piotrkow. Chaos is reigning everywhere without a hope for improvement. The supply and fuel situation is awful. There is a lack of communication.

The attitude of hostility toward the Red Army and the Lublin committee is increasing.

There is evidence of anti-British propaganda conducted by the Soviets and the Lublin government. During a parade staged by one of the Lublin men in Czestochowa on January 25, a banner with the words "Down with England" was carried.

January 31, 1945, Krakow: Minister Skrzeszewski expressed his thanks to the professors of the Jagiellonian University and the underground school authorities for continuing their educating program during the war.

All rights of the university will be respected, however; presidents and deans of universities will not be elected but appointed.

All teachers of secondary schools must register with the school board and must state what they did during the war. The secret classes are to be continued until February 10.

January 31, 1945, order of the commander of the underground army:

Soldiers of the underground army, I am giving you my last order. Continue your work and activities in the spirit of regaining the full independence of the Polish state and the defense of the Polish people against destruction.

Strive to be the leaders of the nation and to realize the independence of Poland. Each of you must be his own commander in this action.

In the belief that you will obey this order and that you will always be faithful to Poland and to facilitate your future work, I am dissolving the underground army with the permission of the President of Poland and releasing you from your oath.

In the name of service, I thank you for your devotion in your work. I deeply believe that our holy cause will win and that we shall meet again in a real, free, and unoccupied Poland.

Long live free, independent, and a happy Poland.

February 1, 1945, Bialystok: Between November 8 and 15, 1944, 143 boxcars filled with men were sent out from Bialystok and Grodno, that is about 8,000 men were deported to the east of Russia. The deportations of Poles continue. The soldiers of the underground are mistreated in prisons.

Enforced drafting to the Berling Army continues. Raids are conducted. Information from Wilno and Nowogrodek is just as appalling. N. K. V. D. stages bloody orgies.

The population under the leadership of the underground army resists heroically and believes in an early help from the legal Polish Government.

February 1, 1945, Lodz and Piotrkow: The Soviet soldiers are robbing the population of food, watches, money, clothing, and shoes. Wild requisitions are conducted in the villages, the peasants are tired of this practice.

Leaflets of the Lublin government and the Soviet officers announce the destruction of the underground army and the national armed forces, whom they call Fascists.

February 1, 1945, Krakow: Many farmers are being arrested in the vicinity of Krakow. The soldiers are looting the villages. Peasants are beaten, while women and girls are raped. In town the soldiers force their way into private homes, demanding quarters, food, and liquor under threat of guns. There is no difference between the action of the officers and soldiers.

The Russian soldiers have a permission to send 16-pound food packages to Russia from territories west of the Vistula River.

The Soviet quartermaster does not supply the army with food, leaving the soldiers a free hand in requisitioning, which turns out to be plain robbery.

February 5, 1945, eastern Poland: On February 5, Poles in higher posts, such as professors, doctors, and so forth, were being forced into signing a memorandum denouncing in insulting words the Polish Government and the underground, debasing it and calling them bandits and slaves of Hitler, and expressing tribute and support without reservations to the Lublin group.

This document, prepared by the Union of Polish Patriots in Moscow, is presented for signature after mass arrests and deportations, which create an atmosphere of depression; further arrests follow after.

February 6, 1945, Lodz: The food situation in Lodz is very difficult. N. K. V. D. has begun the arrests of former members of the underground. Two of the officers have been already arrested.

February 6, 1945, Piotrkow: N. K. V. D. began its activities. All food supplies have been requisitioned. Famine will come in a few weeks. Arrests of the members of the underground are increasing. All Polish life is directed and controlled by the N. K. V. D.

February 7, 1945, Czestochowa: There are at present 192 English soldiers from P. O. W. camps; among them are 2 officers, 2 noncommissioned officers, 7 sergeants, and 180 others. They are all afraid to go to Russia and ask for intervention of the British authorities, for a safe conduct to England. They are not treated as well as soldiers of other nationalities, who come from the German camps. Their food, quarters, and sanitary conditions are very poor. They are forbidden to contact the Poles, who are helping them as best they can.

I am giving the names of a few of them: Flight Lt. Hammet Patrick, R. A. A. F., Flying Officer Symington Fonn Wilson, R. A. F., Sgt. O'Dwyer Ernest, Royal Tank Regiment, Stalag 344, Sapper Orr, New Zealand Engineers, Stalag VIII–B.

March 7, 1945, Lublin: The Union of Mutual Peasants' Aid is a totalitarian organization of social and economic character. A circle is organized in every rural community and the farmers have a moral obligation to belong to it. Where the People's Party did not enter, the Polish Workers Party has control. The officers of the Warsaw province were nominated by the board of the convention from the Polish Workers Party. The government has a second set of people in case something goes wrong. The first is secret.

The department of security is directed by Radecki who is responsible to the N. K. V. D. and not to the government. Militia operates discreetly in the villages. All commanders are Russians. The administration is undecided, chaos and bureaucracy reign. Hostility toward Lublin government and the Soviets increases everywhere. The Polish Workers Party is under the control of the N. K. V. D. and is used for political intelligence service. The Soviet contingents of food are much higher than the German were. There is danger of hunger. The system of prices and wages is so corrupt that bribery is flowering.

February 8, 1945, Krakow: The impotency of the administration, the unpopular tendencies of sovietization of Poland increase the will of resistance. The population counts on the intervention of the Allies.

The general opinion may be summed up in this statement: "We were able to endure 5 years of German occupation—and we will endure these few months of liberation."

February 9, 1945, Krakow: The Lublin armed forces are of the belief that there will be a war between Russia and the western Allies—they are hoping for a junction of all armed forces of Poland under the command of the London government.

The Soviet officers who are in command of all units from a battalion up and of special units, guard the line of thought of the soldiers.

February 11, 1945, Krakow: Registration of officers is being carried on in Krakow. According to unconfirmed reports about 2,000 officers have been registered.

February 12, 1945, Krakow: A mass return of Poles from Germany has begun, most of them are completely exhausted and wretchedly poor.

A pressure through the diplomatic channels upon the Soviet Union and the Lublin committee is needed so that speedy aid is organized for those returning and those still remaining near the fronts in Germany. Clothing, food, and medical supplies are urgently needed and should be supplied by international agencies.

February 13, 1945, Krakow: Enormous migration is under way. The inhabitants of the eastern provinces taken by Russia are walking to the western regions. Many are returning from forced labor in Germany, also those freed from the concentration camps. There is a consider-

able number of Germans from labor and military camps and a large number of Hungarian Jews.

The incompetent Lublin administration cannot give sufficient aid to those exhausted and ill masses. The social agencies are also helpless because they have no money or food supplies. Aid of foreign agencies is urgently needed.

The situation of the population in Krakow is catastrophic. The prices are rising, there is no employment. Factories are either not yet opened or their production is insufficient. The ration of bread has been cut.

The Soviet army of occupation has Lublin money printed in Moscow. It is said that the soldiers received about 5 milliards of such money. Despite promises of measures for deflation, the country is at the height of inflation. Mass murders are occurring in the eastern provinces of Poland, especially in the oil region.

February 13, 1945, Radom: One of the units of the underground army, which participated in a battle with the Germans in the region of Mniszek, where about 200 Germans were killed, was surrounded and fired upon by the Soviet units, after the battle; finally it broke through, losing 30 percent of its men.

The Russians are destroying the underground from the first day of occupation. Hundreds of underground members have been arrested and accused of activities for Britain. The Russians are untiring in their efforts to find the staffs of the various units of the underground. They endeavor to find and to seize all arms, to register all commanders who will then be jailed, and to mobilize all men from the years 1911 to 1924.

The realization of this plan is giving speedy results through the use of disguised Soviet officers, who are placed within the ranks of the underground army and the enforced registration of all officers and noncommissioned officers. All officers who do not agree with the Russian proposals disappear completely. In the Sandomierz region the Soviets have arrested more Poles during the few months of occupation than the Germans during 5 years.

Officers from the Berling army are warning the men of underground not to admit their association with it, because they're doomed to destruction.

There are mass arrests of judiciaries and public prosecutors.

The press and the speakers at meetings are officially hostile toward the London Government and the underground army, whom they promise to destroy as traitors.

The various government offices are being constantly reorganized as incompetent and unable to cope with the situation. In Kielce there have already been four governors and six mayors.

The attitude of the population toward the new government is hostile. There prevails a strong attachment to the London Government and Polish forces fighting outside of Poland.

The members of the underground are depressed because their work did not bring such results as they anticipated and they themselves must now hide as criminals.

Address of Hon. James Forrestal, Secretary of the Navy, at Launching of the U. S. S. "Franklin D. Roosevelt"

EXTENSION OF REMARKS

OF

HON. SAMUEL DICKSTEIN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. DICKSTEIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address by Secretary of the Navy James Forrestal at the christening of the U. S. S. *Franklin D. Roosevelt* Sunday, April 29, 1945, New York Navy Yard, New York, N. Y.:

You were invited here today to witness the launching of a new aircraft carrier, one of the newest and largest carriers in the United States Navy, exceeding by many thousands of tons of weight, and by a substantial differential in defensive armor and antiaircraft fire power, any American carrier now sailing the seas. When your invitations were sent to you, this vessel was to be named the *Coral Sea*. With the approval of President Truman, the Navy has changed the name of this vessel and you are attending the launching of the new supercarrier, the *Franklin D. Roosevelt*.

It is a matter of deep regret to President Truman that he is unable to be with us today. When I asked him whether his engagements would permit his attendance he responded in language which he has permitted me to quote:

"Nothing in the world would please me more than to be present at the christening of that vessel. It is with the deepest regret that I deny myself that pleasure; I do so only because I deem it of paramount importance at this juncture to be constantly available at my desk in Washington."

It is appropriate that the Navy, which the late President loved and served so well, should make this ceremony one of reverent recollection of his memory.

It is appropriate that this vessel should bear the name of our dead Commander in Chief, because he was greatly interested in the design of its type, as he was in the design and building of all combatant vessels. The freshness of mind and the sweep of imagination which he brought to every naval problem, whether of construction or of logistics or of strategy, arising out of the great conflict in which we are still engaged, bore testimony to the universality of his intellect.

For example, I recall the instant approval he gave to the expanded aircraft carrier program early in 1942 when we began the building of the great fleet which has reduced Japanese sea power to a point where it is impotent even in its inland seas.

The President had great belief in the effectiveness of air power and particularly in the value of naval aviation when integrated with sea power. His quick and imaginative grasp of the possibilities of the small escort carriers played a large part in the launching of the program for their construction and later in the substantial enlargement of that program. Again his faith was justified—the baby flat-top, that mighty midget which has been so effective in the war against German submarines and some of which, like David against Goliath, survived the gunfire of heavy Japanese surface craft in the Battle for Leyte Gulf, is today a factor in practically all of our vast operations in the Pacific.

In these, as in many other matters of naval architecture and of war at sea, President Roosevelt showed a readiness to accept new ideas and an accommodation to the swiftly changing pattern of modern war which were an inspiration to the leaders of our Army and Navy.

The *Franklin D. Roosevelt* will take the sea against our Japanese enemies with a displacement of substantially over 45,000 tons; carriers of this class will be capable of housing and launching from their decks a greater number of planes than any other carriers of ours or any other nation. Their characteristics in terms of speed, fire power, and defensive armor will reflect the carefully evaluated experience of this war.

This supercarrier is a far cry from the first experiments in the use of combat airplanes from the decks of ships; experiments carried on by the Anglo-American Navies, who were responsible for the development of the carrier concept. The first flights from the deck of a ship were made from the United States cruiser *Birmingham* in 1910 while the first major ship to be converted to the carrying of planes in substantial number was His Majesty's ship *Furious*.

To the American Navy went the distinction of greatly increasing the scope and scale of this new naval weapon. That we were able to do so was due unquestionably to the fact that the United States Navy was able to develop the uses of air power as an integral part of its strength, and the British will be among the first to admit that the loss of control by His Majesty's Navy over its air power was a most serious and dangerous mistake. I think it is well to remind the Nation that the tremendous power which we now possess in the United States Navy was developed because the Navy was free to exploit sea and air power according to its own experience and traditions. Before we attempt to merge this highly individual service into a single conglomerate I believe we should take deep and serious thought.

This carrier is a symbol of our determination to prosecute the war against Japan to complete victory. In contemplating this new giant of the sea I am reminded of Woodrow Wilson's address on the day we declared war on the Central Powers: "Germany has once more said that force and force alone shall decide whether justice and peace shall reign. * * * There is, therefore, but one response possible from us: Force, force to the uttermost, force without stint or limit."

The Japs, like the Germans in 1917 and again in 1941, did not comprehend the extent of the force that we could bring to bear against them, nor did they realize how rapidly we could bring it to bear. The contrast of what we had in the Pacific in the midwinter of 1942 and what is available now may therefore be of interest to Premier Suzuki and Admiral Mitsumasa Yonai, Minister of the Japanese Navy.

In February 1942 we had in the Pacific Ocean four carriers—and by October of that same year the number was reduced to one. That was typical of the thinness of the line by which we held our long-extended communications in the Pacific and it was typical of the slender margin by which we held that pivotal point in the Pacific war, the Island of Guadalcanal.

Today we have in the United States Navy a total of 26 carriers. We have in addition to those a total of 65 escort carriers.

In early 1942, we had 16 battleships on hand as against 23 today; 38 cruisers of all types as against 67 now; 173 destroyers then and 386 now; no destroyer escorts against 368 at present; and 112 submarines compared with 240 today.

This tremendous accretion to our naval power occurred between the tense and tragic days of early 1942 and the present, a span of a little over 3 years. I doubt if we ourselves had any comprehension in those days

of the tremendous pace at which we would be able to build our military power. I am sure the Japanese did not have such knowledge.

I am equally sure the Japanese now realize that this accumulation of power and our ability to deploy it against their homeland almost at will spells the doom of their great dreams of 4 years ago, although they may fight as the Germans have fought, a desperate war of suicide and self-extinction.

For us it suffices to remember what our late President said in the enunciation of his war policy and what was repeated by his successor, President Truman, in his simple and effective opening speech before the Congress on April 16: "Our demand has been, and it remains—unconditional surrender."

In closing I am constrained to take advantage of this, as I do every other opportunity, to point out that we must keep the ability for swift and effective application of force if the peace bought at a bitter price is to be maintained.

The retention of force by the United States does not conflict with the aspirations which are taking shape at San Francisco. On the contrary, that force in our hands and in the hands of our allies in this war is essential if the events at San Francisco and the events that take place at similar meetings afterward are to have any meaning.

The Navy dedicates this vessel to the aims of the man whose name it bears: winning the war and keeping the peace.

A National Cemetery

EXTENSION OF REMARKS

OF

HON. DEAN P. TAYLOR

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 7, 1945

Mr. TAYLOR. Mr. Speaker, communications received by me from veterans' organizations and other residents of this area, requesting the establishment of a national memorial cemetery in or near Troy, indicate great enthusiasm for such a project.

I am in entire accord with such a movement, and will be happy to lend it my support. The heroic deeds of men and women of this community, both in civic and military endeavor in all the wars in which this Nation has been engaged, are recognized almost universally.

The recent unusual distinction of awarding two Congressional Medals of Honor in this community serves to magnify the glorious services rendered by the fighting forces of this area, and in my opinion is of sufficient merit to make indisputable the claim that a national memorial cemetery should be established here.

Resolved, That Trojan Post, No. 469, Veterans of Foreign Wars of the United States in regular meeting assembled in Troy, N. Y., on the fourth Tuesday in the month of April, in the year 1945, be recorded as in favor of the establishment in this area of a national cemetery; and be it further

Resolved, That the members of this post, individually and collectively, work untiringly to promote and advance the interests of this community in order that such a shrine to commemorate the sacrifices of those who, in combat with the enemy, gave their lives on the altar of service to this Nation from this vicinity, be perpetuated; and be it further

Resolved, That this resolution be forwarded to Representative DEAN P. TAYLOR, Thirty-third Congressional District, New York, with the request that he use his good office to effect and promote the creation of such national cemetery in these parts.

In witness hereof, we the undersigned have affixed our signatures and the seal of our organization this 30th day of April 1945.

[SEAL] THOMAS L. MCGOVERN,
Commander.
FREDERICK J. DOUGLAS,
Adjutant.

Poland Today

EXTENSION OF REMARKS

OF

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. O'KONSKI. Mr. Speaker, I wish to tell what goes on in Poland today.

APPRAISAL OF THE SITUATION IN POLAND

February 12, 1945, Warsaw:

First. The population is very exhausted and economically poor. At the beginning there was joy upon the expulsion of the German occupant—but the new one brought disappointment.

The sight of the Soviet soldiers, who are often in rags, their Mongolian faces, their behavior, creates the impression of having Asiatic hordes in our towns and villages. They seem infinitely below our standards and people wonder how such an army could have defeated the Germans. Plunder of stores, homes, livestock, and other supplies, and heavy drinking of the Soviet soldiers create a hostile attitude of the population.

Second. The initial activities of the Lublin government are marked by total incompetency in taking hold of the situation. There is chaos and a complete lack of plans. Even the organization of city governments meets with failure. In addition the financial state is chaotic due to the fact that the exchange of old money for new was limited to 500 zlotys per person, because sufficient amounts have not been printed. This brought a complete economic stagnation in many localities. Stores are closed, people are unwilling to work, because wages and prices are not stabilized. The Lublin government lacks men with organizational abilities, it is ignored by the Red army and totally dependent upon the N. K. V. D. A permit issued by the Red army commander is necessary to see the members of the Lublin government.

Third. The attitude of the population toward the armies of General Zymierski is marked by curiosity and pity. The soldiers are emaciated and poorly dressed, often in torn shoes. The officers, from major up, are Russians. This army is under the command of Generals Zawadzki, in charge of political education, and Korkuyc, the chief of staff. Both supposedly are members of the N. K. V. D.

These are Polish soldiers, but not a Polish army. We have information that very few men will be drafted into this army because the Soviet Government does not wish to have large Polish forces.

Fourth. The peasants, as well as the city people, are greatly disappointed. One can often hear that the Russians are worse than the Germans in some instances.

February 21, 1945, Eastern Poland: During January 3 to 15 there were mass arrests—60 percent Poles, the remainder Volksdeutsche. Among the Poles, the Russians arrested 21 professors, priests, professional men, and others. The jails are full; conditions are appalling; the prisoners are beaten and hungry. Numerous executions of various nationalities are carried out, about which no details may be obtained. Among those arrested in August 1944 and January 1945, two trainloads, about 2,000 people, were sent to labor camps in Voroshilowgrad. Postal stamps with the image of Hitler, German newspapers, or books were used as evidence against those arrested.

February 22, 1945, Bialystok: The N. K. V. D. is conducting the arrests of members of the underground with fury. The investigations are marked by bestiality, the prisoners are beaten with barbed wire, pins are stuck behind their nails, ribs are broken; all prisoners are deported to Russia. Up to January 1 the N. K. V. D. deported 5,000 men from Grodno, 10,000 from Bialystok; all were sent to the east to an unknown destination.

The Polish national committee of liberation is cooperating with the N. K. V. D. The contingents are three times as high as previously. The forests are being cut down completely. Soviet soldiers are looting and murdering the population and raping women. Soviet military propaganda announced the liberation of France by the Soviet forces and is preparing the army for a war with Turkey, Japan, and England. They are afraid of America. The drafting to the army has been called off from March 1; only volunteers will be taken.

The population trusts and supports the London Government. The commanders and soldiers of the underground remain on their posts.

Behind the Curzon line the N. K. V. D. is gathering Poles, many of whom are murdered on the spot. Those who are healthy and strong are sent to labor camps or the army. Polish families are forcibly deported to the west of the Curzon line. The White Russian population is organizing partisan units against the Russians. They want to be in Poland.

February 25, 1945, Lublin area, Radom: In Lubartow, near Lublin, the Russians opened a camp for the officers of the underground and officers from General Zymierski's army who were accused of belonging to the underground or of other political "crimes." There are 6,000 officers in the camp, which is guarded and controlled by the N. K. V. D. Sanitary conditions, food, and treatment of the prisoners are terrible. Groups of prisoners are being taken into unknown destination every few days. Most of the of-

ficers taken away are exhausted and tortured.

In the Radom region all jails are filled with soldiers of the underground; arrests continue.

We feel that after individual arrests, mass arrests will follow after the organization of our army is revealed.

Lieutenant governor of the Kielce Province, Andrzejewski, and a few other members of the London government, have been arrested at the beginning of February.

The Crimean decisions saddened the population greatly, but, regardless, the attitude toward the provisional government and the Soviet Union continues to be hostile. The people have a faith that our cause will be justly settled and that the legal Polish Government will not permit the partition of Poland and to subordinate the nation to Russia.

March 1, 1945, Lódz: The feeling toward Russia among the forces of General Zymierski, stationed in the region of Lódz, are not very friendly. Many of the White Russians voluntarily claim to be Polish.

The N. K. V. D. arrested 23 officers of the underground in the last 10 days. The majority of the population regards the entrance of the Soviet armies as Bolshevist occupation of the country. The people are waiting; no enthusiasm is shown for the forces of General Cymierski. Attitude toward the Lublin group is decidedly unfriendly. The population is exasperated, hungry, and resentful toward the chaotic administration of the Lublin government. The Russians are plundering the country.

March 1, 1945, Bialystok region: The region of Bialystok supports the legal Polish Government, the Poles as well as the White Russians; there is no question of minority. The population is following its leaders. Concessions bring bad results; the enemy is impressed by courage. Every sign of weakness results in a new wave of arrests and deportations to Russia. The population resents the decision of fifth partition of Poland.

A statement by radio of the Polish Government to the effect that the eastern provinces are still a part of Poland would lift the morale of the people. The people are different now; they suffer and fight and do not recognize weakness.

The N. K. V. D. continues mass arrests of the members of the underground. Most of them are deported to Russia. A total of 370 boxcars filled with men were deported to Russia in February from the regions of Bialystok and Grodno. If this continues no Poles will be left behind the Curzon Line within 2 months.

The prisoners are held in basements, antiaircraft dugouts, sheds—in darkness and without any bedding. During examinations and questioning the prisoners are beaten and tortured, or kept without food and clothing in the cold. They are accused of espionage for England and the Polish Government in London and collaboration with Germany. Death rate is very high. The commanders of the underground are deported to the interior of Russia or are completely lost.

Posts of the N. K. V. D. have been organized in towns and cities for the purpose of destroying the underground. The liberation committee is cooperating and aiding the N. K. V. D. in arrests. Please intervene with the Allied Governments.

March 16, 1945, Lódz: Numerous arrests of men and women by the N. K. V. D., who seek staffs of the underground units. We cannot endure very long in such conditions. The local N. K. V. D. is under the control of Raknimow. There are very few military units, only posts of the N. K. V. D.

March 16, 1945, Warsaw: Seven men and mayor of the underground administration were shot by the security department in Mniszek Mazowiecki during the night of March 2. The bodies were left in the street. Arrests continue. During examination the prisoners are beaten, kicked, and tortured.

March 8, 1945, Lwow: Unorganized draft to the Army. Evictions, plunders, contingents enforced for the third time. Many transports of forcibly evicted population.

March 10, 1945, Lwow: The Big Three conference did not change anything. Arrests and mass deportations continue. One thousand people were sent out on March 3 from Lwow, additional thousands from the villages. Ages 14 to 70 years, 20 percent are women.

The conditions of the evacuees are horrible. Many die on the way. In Russia they are represented as Germans or collaborationists and the treatment of the Russian population will speed their destruction.

If nothing can be done to stop these arrests and deportation please intervene for more humane methods.

People are completely depressed, all are willing to leave and travel behind the San River, peasants and workers as well.

We beg you to save us from destruction.

February 25, 1945, eastern Poland, belated information: The present terror surpasses all we went through and the German occupation seems mild. The prevailing conditions will result in complete liquidation of all Poles in eastern Poland.

Captured Nazi Flag

EXTENSION OF REMARKS

OF

HON. JOHN W. GWYNNE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. GWYNNE of Iowa. Mr. Speaker, I have just received today from Lt. J. C. Petrone, Jr., of Marshalltown, Iowa, a captured Nazi flag. Only recently this emblem of tyranny and horror was floating over the ramparts of our enemy; now because of the skill and courage of men like Joe Petrone, Jr., it has been torn from its standard and those who carried it are bowed down in humiliation and defeat.

Lieutenant Petrone was appointed to the Military Academy from the Third District of Iowa. While there he made an excellent record and he has been a great credit to the State and Nation. It is men like he who made possible the VE-day which we now celebrate.

The Home Guard—Prepared Address of President Truman

EXTENSION OF REMARKS

OF

HON. JOHN E. RANKIN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. RANKIN. Mr. Speaker, President Truman was scheduled to address the graduating exercises of the twenty-eighth session of the National Police Academy of the Federal Bureau of Investigation here in Washington on Saturday, April 14, but owing to the untimely death of President Roosevelt the exercises were called off.

Mr. Truman had his address prepared and has authorized its release. It is such a splendid contribution on the subject of law enforcement that I am taking the liberty of inserting it in the RECORD at this point.

It reads as follows:

It is a special privilege to be present at the graduation of you guardians of the home front. It would be more than tragic if, while fighting a world-wide war to preserve our democratic ideals, we would neglect the constant battle against evil forces at home.

Fortunately, the specialized training provided here at the National Police Academy, under the supervision of the Federal Bureau of Investigation, assures America that we will continue to have well equipped specialists to maintain peace and order within our borders.

Please permit me to pay special tribute to the man, who, in addition to founding the National Police Academy, has played such an important part in improving law enforcement throughout the United States I refer to your distinguished leader, the moving spirit behind the Federal Bureau of Investigation, my good friend, the Honorable J. Edgar Hoover.

You men have been especially fortunate in being selected for intensive training at the greatest crime clinic in the world. Here you have learned the wonders of modern scientific methods. You have acquired skill in using the latest weapons available. Even more important, here you have been taught the all-essential need of quick cooperation with all law enforcement agencies, local, county, State, and Federal. If we hope to make progress for the benefit of all society, we must carry on a well-coordinated, all-out attack on crime.

You officers have had the opportunity to study the most modern methods of crime prevention and crime detection. Your intense training here at this most efficient center, should pay you and society great dividends in the years to come. You learned not merely the use of scientific methods in combating the enemies of society, but also the urgent need of effective cooperation with all the other useful agencies. Only by a Nation-wide, coordinated campaign by all law-enforcement agents can we achieve the highest degree of efficiency, which in itself will be one of the most effective means of preventing antisocial acts. Certainty of

criminal apprehension is the most powerful check on crime.

Tremendous progress has been made in criminology during the last century. In the past the criminal was punished in a spirit of revenge, without proper consideration of the many factors which gave rise to this problem of social maladjustment. Criminals are not born such. They are usually the unfortunate product of their environment, experience, and social background.

In view of the many economic and health factors, which frequently give rise to criminal tendencies, there remains a tremendous job for society to accomplish. Our statesmen must eliminate most of the outstanding inequities in our social structure, providing greater individual security, improved health, and a better economic opportunity for all our people. Then a most important step will be taken in removing some of the main reasons for crime.

The war has greatly complicated the problems of law-enforcement agencies. In the first place, there remains the constant danger of saboteurs, spies, and enemy agents, all anxious to undermine our military power and the public morale. Fortunately, the splendid work of the Federal Bureau of Investigation, under the able direction of Mr. Hoover, has made these enemy efforts of little value. However, constant, vigilance is still necessary for the preservation of life and property at home.

Another factor which hit agencies charged with the maintenance of law and order has been the call to arms of many of our most active officers. Yet, despite all handicaps, utilization of modern scientific methods have made possible the record achieved. As in all matters mortal, there still remains room for improvement.

The most distressing aspect of the current criminal record in America is the alarming increase in juvenile delinquency. Youngsters still in their teen age constitute one of the major groups of our criminal offenders. For the average layman, it is difficult to realize that the most frequent arrests in any male age group is 17, 18, and 19 years, respectively.

In a review of the 1944 figures it is especially shocking to learn that in a democracy where the voting privilege is denied until the age of 21 our youth under 21 years committed 35 percent of all robberies, 52 percent of burglary, 35 percent of larceny and 63 percent of auto thefts. Of 110,000 crimes committed against property, fully 40 percent of the offenders were less than 21 years old. What a sad commentary upon the training of the youth of America.

As officers charged with the duty to protect society from crime, you have a most serious responsibility. You will require the active cooperation of all law-abiding citizens. For the most effective discharge of your duty, you need the help of every social agency created to improve living conditions in your community.

It is far better and cheaper to prevent crime than to pursue the criminal and, after detention, try to rehabilitate him. For example, to direct the excess energy of youth to the gymnasium of a boys' club may prevent his joining a juvenile gang.

The future of America depends upon the character and quality of our youth. The primary problem is one of home training, general education, and character building. However, as leaders in the cause of a progressive order, you should actively promote and help coordinate all welfare and social agencies which can be utilized to ease your burden.

Present social conditions naturally reflect the great dislocations caused by the war. Mothers with patriotic purposes work in war plants, while their neglected children become social problems. The strong guidance of fathers in service is missing in many homes. Children, who should be in school, are working long hours and, though helping the war effort, sometimes associate with the wrong kind of people. Many spend their salaries seeking release from wartime emotions.

Americans dare not wait until juvenile delinquency becomes more critical before combating the causes. We must act now to protect the welfare and future of our youth.

The total number of selected law-enforcement officers from every State of the Union, as well as leading foreign-police agencies, who have graduated from the National Police Academy, now total 1,049 men. These officials all know the methods taught here. They are all disciples of modern crime detection. These officers can and will be of great assistance in the fight for a decent social order.

Real peace and order cannot be obtained by vast armies of policemen merely trying to use force and arms to crush crime by old-fashioned methods. Today, more than ever before, we need quality, not just quantity, in our law-enforcing agencies. Small, but efficient groups, operating carefully and intelligently, can accomplish far more than a large untrained force. You are being sent forth to assist your community by applying the latest scientific methods placed at your disposal by this specialized training. You will guide others to appreciate the great benefits of modern techniques and efficient Nation-wide cooperation in combating crime.

Today, millions of our young men are fighting throughout the world for the preservation of democratic decency. It would be tragic indeed if they came back to find that the home front had fallen down on the job. Our veterans have the right to expect us to safeguard their homes and their relatives, despite all wartime difficulties.

In this sacred trust, the home guard will not fail.

At home here we still have a tremendous task ahead of us. The dislocation of families by war work in distant plants, the growing threat of juvenile delinquency, and the psychological reactions of individuals exposed to the emotional hardships of war, all present problems of the first magnitude. If we intend to insure the proper social climate which will permit orderly progress in keeping with our ideals, all of us must face these new problems frankly and act effectively.

The modern law-enforcement official needs far more than a nightstick and a gun to maintain peace and order. The efficient officer must know the nature and extent of local social problems. He must use scientific tests, as well as psychology. As a progressive leader he should effectively mobilize all available agencies in his locality and throughout the country for the prevention as well as the detection of crime. This is a large order, but the times call for men of large stature.

As bigger social problems are presented, America needs better trained men to solve them. You are indeed fortunate in having the opportunity of association with the best and receiving the finest training available in your specialized profession. By your conduct and character you can make your profession one of the most progressive and useful in our national life.

In a few months the National Police Academy will celebrate its tenth anniversary. During this decade tremendous things have been accomplished by its graduates. If we had time it could be shown how much money society was saved by the special training of these graduates. We could list also the arrests made, convictions obtained, and pardons recommended by these officers.

No set of statistics, however, can adequately convey the heartache averted, nor the deep-felt gratitude for crimes prevented, for lives saved, for missing people recovered, and for the countless worthy services rendered. Even the most comprehensive reporting system cannot reveal these things. For all such essential services, society is indeed grateful to the law-enforcement officers, especially to the graduates of this splendid academy.

Our fighting men on all fronts are today going through a most strenuous ordeal. They are bravely offering their lives so that we may live our democratic way. The heroes on the battlefront surely deserve all praise and credit for their noble fight.

The general public, unfortunately, does not fully appreciate the fact that right here at home other heroes are waging a relentless war against another deadly foe—the modern criminal. This public enemy is resourceful, crafty, and efficient. His attacks are frequently powerful and against the weak. Your bitter conflict against crime is endless.

To check the constant ravages of crime requires character of the highest order. As well expressed in the motto of the National Police Academy, to win your war you need "knowledge, courage, integrity." The omission of any one part of this trinity of virtues makes the other two practically useless. Like the three-legged stool, it simply cannot stand on two.

The world would be a much better place if more people possessed these great virtues—knowledge, courage, and integrity. I am confident that, after your practical experience and intensive training, you will continue to be the strong champions of law and order. With your essential character and tested ability, you will render a lasting service to your community and to your country.

Franklin D. Roosevelt: A Look at the Record

EXTENSION OF REMARKS

OF

HON. WALTER A. LYNCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. LYNCH. Mr. Speaker, under leave to extend my remarks in the RECORD, I am including an article which appeared in the Catholic magazine America under date of April 28, 1945. The author of the article is Rev. Wilfrid Parsons, S. J., one of the foremost Catholic intellectuals of the country and presently a member of the faculty of Georgetown University. It not infrequently occurs that those who teach principles and theories do not recognize their practical application. Father Parsons, as author, editor, educator, and lecturer, not only taught the principles which he has set forth in his article, but is realistic enough to recognize those principles though cloaked in the wrappings of the New Deal. The article follows:

FRANKLIN D. ROOSEVELT: A LOOK AT THE RECORD

During the first Roosevelt campaign in 1932 there was considerable discussion at Democratic headquarters in New York over what should be done about the so-called Catholic vote. Mr. Roosevelt himself was firmly convinced that there was no such thing, but he did allow that there might be much disaffection among the followers of Al Smith, and he was willing to take that into consideration. He had no anti-Catholic feeling himself; in fact he was fond of pointing out that 16 of the 17 on his immediate staff at Albany were Catholics. On the other

hand, it would be manifestly absurd to tell the Catholics how much he loved them.

A POPE SHOWS THE WAY

In August of that year this writer was asked by him to come to Albany to talk it over. I told him that the best way to attract Catholics was to talk like a Catholic in social-economic matters. With the quick uptake that was characteristic of him, he said with a laugh: "You mean that Encyclical of the Pope last year? That's much too radical to talk in a political campaign." The net result was that I was to send the "brain trust" what I considered a typical passage from Quadragesimo Anno which he could use in one of his speeches. I chose the passage in which the Pope shows the results of unrestrained competition:

"It is patent that in our days not alone is wealth accumulated, but immense power and despotic economic domination are concentrated in the hands of a few, and that those few are frequently not the owners, but only the trustees and directors of invested funds, which they administer at their good pleasure.

"This domination becomes particularly irresistible when exercised by those who, because they hold and control money, are able to govern credit and determine its allotment, for that reason supplying, so to speak, the life blood to the whole economic body, and grasping in their hands, as it were, the very soul of production, so that no one dare breathe against their will.

"This accumulation of resources and power, the characteristic note of the modern economic order, is a natural result of limitless free competition, which permits the survival of those only who are the strongest, which often means those who fight most relentlessly, who pay least heed to the dictates of conscience.

"This concentration has in turn led to a threefold struggle. First, there is the struggle for dictatorship in the economic sphere itself; then the fierce battle to acquire control of the state, so that its resources and authority may be abused in the economic struggles. Finally, the clash between states themselves."

CHARTING THE COURSE

It is, of course, the passage which Henry Wallace read in New York recently and dared the press to identify. It was spotted immediately, but nobody remembered that Roosevelt had already used it. He quoted it in his Sunday afternoon talk at the Commonwealth Club in San Francisco, and again on a Sunday in Detroit, along with similar passages from Protestant and Jewish sources. It is that Commonwealth Club speech which writers are fond of citing as containing the original blueprint of the Roosevelt New Deal. On the radio, the night of Roosevelt's death, I heard a half dozen speakers say that it marked the end of an era. They were wrong. Roosevelt's life and death together marked the beginning of an era. The end of an era came at the precise moment of that first inaugural when, with the world crashing around our ears, and sick with fear, we heard his vibrant and confident voice proclaim: "The only thing we have to fear is fear itself."

It was often called, especially in its early days, "the Roosevelt revolution." It was a shocking thing for those who tried to make themselves believe that we are not an integral part of the world and who closed their eyes to the fact that still more drastic revolutions were taking place in most countries of that world.

SIGHTS ON CENTER

Roosevelt was commonly accused of two contradictory things: he listened to people and took their advice; and he was headstrong and followed his own will. Both statements are true. He was probably the most indefatigable listener of his time. He listened to every shade of opinion. Then he saw an opening somewhere to the right or left of center (to use his own quarterback metaphor) and he shot everything through that. But he always had a good idea in his mind of where was the center. He was accused of being deflationary and inflationary at the same time. He was. And with characteristic skill he managed to keep us from going to either extreme.

I think that here lies the key to his conduct. I have never known a New Dealer—and I have known my share of them—who was not furiously angry at him at one time or another. And, of course, those who had had their way for several generations and their dupes—along the lines of the Pope's words above—were permanently angry at him. The New Dealers were more often pleased with him than the right wingers, naturally; which means that he more often shot through left of center than right. But he still never lost sight of center. The other countries of the world were not so lucky.

PERMANENT REFORMS

The result was that he left a permanent structure in the country's Government—legislative, executive, and judicial—which succeeding administrations will perhaps amend and perfect but will not abolish. He left the capitalistic system intact, though hedged around with restrictions, at which it has chafed because it had never had them, but which it has come to accept. Evidence for this is that the last two Republican platforms and candidates have substantially endorsed them.

The fundamental principle behind many of these restrictions was, for a Catholic, that impressive statement of Leo XIII, repeated 40 years later by Pius XI, on social welfare legislation:

"The function of the rulers of the state," said Pius XI, "is to watch over the community and its parts, but, in protecting private individuals in their rights, chief consideration ought to be given to the weak and the poor." And then, quoting Leo XIII, "For the richer population is guarded by its own defenses and is in less need of governmental protection, whereas the needy multitude, without the means to protect itself, relies especially on the protection of the state. Hence, since wage workers are numbered among the great mass of the needy, the state must embrace them under its special care and foresight."

The National Labor Relations Board, safeguarding the workers' right of collective bargaining; the Social Security Board, caring for the widow, the orphan, the aged, the unemployed, the disabled, the blind; the Home Owners' Loan Corporation, protecting the workers' equity in their homes; the Farm Security Administration, which has to date turned over 36,000 tenants into farm owners; the Fair Labor Standards Act, which guarantees a minimum wage, safety, and health in factories, and decent hours, and abolishes child labor in interstate industries; the Federal Housing Administration, to aid the States in clearing slums and building decent homes; the Fair Employment Practice Committee, to protect the Negro, the Jew, the Mexican, and all racial and religious minorities in their employment; these are the permanent welfare agencies which will always be connected in the memory of the American people with the name of Roosevelt.

If you asked him, he would have told you that these were and are the New Deal. But for him, they would not be in existence now. For Catholics, they are the concrete realization of American society's corporate obligation to practice the seven corporal works of mercy. I think they were such for Roosevelt, too. Both Willkie and Dewey endorsed them in their campaigns, and if Eric Johnston or Harold Stassen is the next Republican candidate, they will also endorse them. Barring upsets, these achievements of the New Deal are permanent.

On the broader economic field, there were other far-reaching reforms: the Securities and Exchange Commission, which put an end once for all to the bad old practice of using people's savings for gambling purposes; the Agricultural Adjustment Administration, which guards the welfare of the food producers in an industrial civilization; the reciprocal trade agreements, which attempt to alleviate some of the more obvious absurdities of our high-tariff policy; the withdrawal of monetary gold from private manipulation, a long-overdue reform; these, too, are New Deal, but perhaps not so permanent as the others, for the finance-capital forces whom they curb have declared war on them, and they may triumph. For all his influence, Roosevelt never did succeed in breaking the "immense power and despotic economic domination * * * concentrated in the hands of a few" of which Pius XI spoke. If anything, the war has, unfortunately, made for the strengthening of that concentration and control.

TEMPORARY CHANGES

Besides these fundamental changes in our governmental structure, there is also a multitude of smaller, overlapping agencies, which are mostly transitory in nature and which, but for the war, would have been abolished or merged with others, whose functions they largely usurp. It is these agencies (I am not speaking of the strictly war agencies, whose lives are all limited by law) which have largely given a pretext for ridicule and attack on so-called bureaucracy, as a sprawling and proliferating growth. For these Roosevelt must bear the blame along with Congress. They never were very strong and, frankly, they existed only for the purpose of affording jobs for politicians' friends. They were the price that was paid for the fundamental agencies. That is the reason I have not listed them (there are dozens and dozens of them) in this attempt to assay what is likely to be regarded as permanent in Roosevelt's policy.

IS THE NEW DEAL DEAD?

What will happen now that Harry S. Truman is President?

Nothing is more common at this present writing than to say that the New Deal is dead. But what is the New Deal? To the professional politicians, and to the newspapers and columnists that are beholden to them, it means Hopkins, Rosenman, Baruch, Niles, Frankfurter, Pepper, O'Mahoney, Wagner, Biddle, Douglas, Black—in other words, a new, mostly non-political group, who asked for and got the jobs. There will, naturally, be another set who will get the patronage and the Senate will be happier. (Much of the so-called coalition of southern conservatives and Republicans has to do with patronage. In the face of that, mere legislation is often only a plaything). In his later years, Roosevelt was mostly indifferent to patronage.

TWO NEW DEALS

To brooding conservatives, the New Deal was largely a sinister Communist plot, an essential change in our Constitution. Apart from the fact that the essential New Deal legislation I have listed above was declared constitutional, and that it was Chief Justice Hughes, no radical in his later years, who led the way in that, I think that few people have ever realized how Roosevelt, consummate politician that he was, used the Communists. There was no known Communists in his Government (or even any party-liners in any responsible position), but there always was an uncontradicted impression that Communists were all over the place. I believe that this was deliberate. If he was to get anywhere, it was necessary that there be established a force to the left of him, for legislation is always the result of compromise.

With nothing to the left to give him bargaining power, he never would have been able to reach the center.

That is why, in 1939, in a re-issue of the "Bishops' Program" of 1919, Archbishop Mooney was able to say, in his foreword, that 10 of the 11 concrete proposals made in it had been wholly or partially realized in legislation—since 1933. Of course, it also explains why the essential New Deal legislation has been accepted by every political party. The fact is there is no Communist, or Socialist, law on our statute books.

There is, however, another New Deal that must be taken into account. That is the New Deal that exists in the inflamed imaginations of some conservatives. It is the New Deal they were persuaded would come into existence if things went on as they had. This state of mind was no accident, either. It also was a Roosevelt asset, and can be, and most probably will be, discarded by President Truman. He will have the advantage of pressure from C. I. O. and P. A. C., and if he really wants to pursue a middle course also, he can always point a silent finger in their direction. So this imaginary New Deal, the one that never existed but was always feared and spoken of as if it did exist, can be said to be dead. It is doubtful if President Truman has the inclination, even if he had the skill, to use this bogey as Roosevelt did.

CREDITS AND DEBITS

Roosevelt's three terms were a turbulent time. He himself was a formidable fighter, his enemies said even a dirty fighter. It is true that he was supremely self-confident—it was his greatest fault, and led him into the worst of his mistakes, for it often turned into arrogance. He is not known to have pardoned an offense to him as a public official, and he had a long memory. This was the other side of a character which also had a deep and almost fierce feeling for the unfortunate and the underprivileged. It was this combination of aggressiveness and tenderness that drove him to the long series of legislative enactments which, as leader of his party, he had Congress adopt. Most of what was important in the work will survive. It has become a part of America.

Truman Seen Prodding Japan To Quit While Quitting Is Good

EXTENSION OF REMARKS

OF

HON. JAY LeFEVRE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. LeFEVRE. Mr. Speaker, naturally every American was happy when VE-day arrived. To know definitely that the shooting has stopped in Europe and that the Allied armies have conquered the barbarous Nazis of Germany is sufficient to bring about a day of rejoicing. On the other hand, we must realize, too, that much remains to be done before we can have complete rejoicing. Many families are sad today knowing that their sons will never return to their homes again, and many more of our youths will be sacrificed before defeating the forces of Japan. Our President put it well when he said there is work and more work ahead. There are some who feel that the planners are afraid Japan may fold too quickly and cause industrial confusion. Such ideas cannot prevail; our youth cannot be sacrificed just to provide jobs. I am sure the American people would be only too glad to tolerate industrial confusion and unemployment for a little while, if that is the price they would have to pay to save the slaughter of any more of their sons. I believe the following article by Mark Sullivan bears on this very point and is worthy of reading:

TRUMAN SEEN PRODDING JAPAN TO QUIT WHILE QUITTING IS GOOD—MARK SULLIVAN SAYS PRESIDENT SOUGHT TO EMPLOY VE-DAY TO HELP LAST ENEMY POWER REALIZE SIZE OF FORCES ABOUT TO DESCEND ON IT

(By Mark Sullivan)

WASHINGTON, May 8.—To radio listeners President Truman's VE-day speech and proclamation may have seemed largely ritualistic, the sentiments called for by the occasion. To a great extent this impression was correct. The expressions of rejoicing over peace, the allusions to the debt we owed the dead, and the expressions of gratitude to God—in President Truman's case five times repeated—were what might color any utterance by any head of state on such an occasion.

But newsmen who had been present at a preview press conference got an additional impression, strongly. A half hour before the radio address to the public Mr. Truman, to some 200 newsmen in his office, had partly read and partly summarized his speech and procalamation and the accompanying documents; and as he spoke, had interjected comment. From his comments and from the emphasis he put on portions of his speech at this informal reading one could grasp some things that obviously were much on his mind.

PREOCCUPIED WITH TALK AHEAD

Broadly he seemed less preoccupied with the accomplished past than with what remains to be done. One would say his chief concern was that the people should hold their faces to the task ahead; over and over he repeated the word "work," and once told the newsmen that this was the point to be emphasized. The strongest impression this writer got was that Mr. Truman would feel concern if America, at this half-way point in the war, permits rejoicing over present triumph to prevail over dedication to the last half of victory. What he regards as most to be borne in mind on VE-day is that we are only half way through.

In the same spirit of looking to the future it was obvious to newsmen that he wished to use the occasion to speak to Japan. More accurately, he wished the occasion of itself to speak to Japan rather than his words. He wished Japan to take warning of the concentration of military might—the greatest ever assembled in history, Mr. Truman told the newsmen—now about to descend upon it. In this there was implicit invitation to surrender, but it was implicit only. There was no spirit of threat or bluff. He merely told the Japanese and left the inference to them.

What he said we would do was an exact statement of what we are actually in course of doing, no more, no less. Mr. Truman is a factual person; in his communications he is austerely concrete.

One other impression stood out. In his radio address was a phrase, "a peace rooted in justice and in law." That was as far as Mr. Truman went in his public address, but to newsmen he emphasized and expanded upon the words. To Mr. Truman, a peace based upon law and justice is not a mere phrase; it has a specific meaning to him, differentiated in his mind from other conceptions of the coming peace, and it expresses what he wants the San Francisco Conference to produce.

In any utterance or action the substance is inseparable from the manner, and the manner is a reflection of the personality of the principal.

PRESIDENT FREE FROM STRAIN

The public, now forming its impression of a new President, got opportunity from his radio address. The newsmen, in his direct presence at the press conference, got more. It was what would have been to many men an occasion for strain. Within a few minutes, just as soon as the press conference should be over, he was to go on the radio with an address of world-wide importance. But neither the shortness of the time for what he had to say to the newsmen nor the imminence of his radio address led to any tension on Mr. Truman's part.

To most persons the mere imminence of going before the microphone, even for an ordinary address, might have been occasion for jittery anxiety. In Mr. Truman's case, not at all. In compressing what he felt he should say to the newsmen into a strictly limited 20 minutes or so, he was brisk but not hurried. In his conduct of the press conference he made an impression of businesslike command of the situation and of its details. When, a few minutes before 9, one of his aides spoke up to remind him that the time was getting close, he took the reminder in with his brain rather than with his nerves. Quickly yet carefully, and preserving complete clarity, he epitomized what he had to say to the newsmen into the necessary time. Then, again with briskness but without hurry, he, with his aides, left the office to go to the White House room in which the radio apparatus had been set up.

The Forgotten People of India Need Your Help

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. MUNDT. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement issued by American Relief for India, Inc.:

1. INDIA, VICTIM OF BOTH FAMINE AND THE WAR

India, which holds more than one-sixth of the world's population, is the forgotten nation of the world. Her impoverished millions, who even in normal times were able to eke out only a bare existence, have suffered pitifully during the past 3 years, ravaged by a combination of famine and war.

The great famine that raged through Bengal and other provinces from the middle of 1943 to February 1944 caused at least 1,000,000 deaths and left a tragic legacy. For every person who died from starvation a dozen survived. Undernourished and lacking the food to restore their health they are easy prey to diseases which daily claim victims. Malaria, amoebic, and bacillary dysentery, cholera, skin diseases, night blindness, pneumonia, and bronchial infections are the foes which old and young, their bodies wasted by hunger, are ill-prepared to fight.

Those who suffer most are the women and children. In Bengal alone the famine left 100,000 orphans, and tens of thousands of women in the ravaged areas were left destitute. They subsist principally on rice or a native variety of sweetpotato. Fish, meat, eggs, fresh vegetables, and fruit, vital to rebuilding undernourished bodies, are beyond the reach of the meager funds of these people. Many thousands of the men in rural populations, due to the war's dislocations, are without means of earning a livelihood.

India's tragic plight, moreover, has been greatly accentuated by the war. The Government, through fear of an invasion by the Japanese, put 2,000,000 natives into uniform. In addition, India was a base for concentration of tens of thousands of American and British troops. On top of all this the war cut off much rice-growing territory, upset an already frail transportation system, paralyzed the fishing industry in the mouths of the Ganges, and created countless other hardships.

Other highlights of this war-created situation are: The country's transportation system, always inadequate, is virtually monopolized by the military. Deteriorated rolling stock, depleted by shipments to the Middle East to meet the Axis threat there, moves troops and military supplies. The same is true of India's roads. Normally bad, there now is no labor, materials, or money to keep them in repair. There are too few trucks for civilian supplies. The inevitable result of this situation on railroads and highways is that movement of desperately needed food and medical supplies to stricken areas is curtailed and sometimes stymied. In one area, East Bengal, where the network of the Ganges River makes life virtually amphibious, the people are without boats because the Government requisitioned them early in the war when a Japanese invasion seemed imminent. Today the vast majority of those boats have been lost, destroyed or else have rotted into disuse. Thus there is both a complete break-down of transportation in this area and the people are deprived of the fish which formerly provided them with much of their food.

Food prices, stimulated by vast purchases by the military, have skyrocketed from three to seven times pre-war levels. Wages have lagged and an Indian laborer who earns from 8 to 20 cents day, can afford only rice or other foods deficient in vitamins. Meat, fish, fruit, and vegetables are beyond his purse. The Japanese occupation of Burma cut off one of the principal sources of India's rice supply and shipments from other countries for civilian needs have been drastically reduced as a military necessity. Thousands of war refugees who fled from Burma and other countries settled in Bengal and neighboring areas, bringing new diseases and imposing an additional strain on meager food supplies. The British and Indian Governments, in the face of the war and political tension, have found it impossible to cope effectively with the situation. India lies almost prostrate, half starving and wracked by disease.

2. AMERICANS RESPONDED TO INDIA'S S O S

The cry of the dying and starving in India was answered in 1944. On January 13, 1944, the President's War Relief Control Board was informed by the American mission in New Delhi (diplomatic representation of the United States of America in India):

1. That the relief needs of the civilian population are abnormal, due to the famine;

2. That there is extreme distress in the areas where great numbers of American forces are concentrated;

3. That it is important to demonstrate to the Indian people that America is not indifferent;

4. That supplies should be sent rather than money; and

5. That the American Red Cross or the American Friends' Service Committee (Quaker) should, with the aid of some American personnel, organize distribution of relief supplies in India.

The President's Board asked the American Friends' Service Committee to organize a relief effort in Bengal and other distressed Indian areas. The Quakers accepted this call to service with the full approval of the American Government, the Viceroy of India, the Governor of Bengal, and Indian leaders of every group.

The National War Fund promised financial support and contributed more than $540,000 up to September 1944 through the British Relief Society. When its support ceased financial aid from two other sources enabled the Quakers to carry on. The A. F. of L. and C. I. O. earmarked $200,000 of their contributions to the war fund for India relief. Governor Casey, of Bengal, one time Australian minister to the United States, gave the Quakers a substantial sum from the Bengal civil relief fund.

American Relief for India, Inc., is a citizens' committee organized late in 1944 to mobilize the necessary support to assure the continuation of the American relief program in India.

Its board of directors comprises Rufus M. Jones, honorary chairman; Henry F. Grady, chairman; J. Edgar Rhoads, president; William Phillips, vice president; Guy Emerson, treasurer; Frank Aydelotte, William Green, David Hinshaw, John Haynes Holmes, M. Albert Linton, Henry R. Luce, George Medalie, Philip Murray, Victor F. Ridder, and Sumner Welles.

3. WHAT AMERICANS HAVE DONE FOR INDIA

When the Quakers reached India to begin work they found that the famine had been halted by vigorous action in which the British Government, the Government of India, and the Provincial Governments, had collaborated. Grain, shipped from Canada and Australia, had been distributed; food rationing and price control had been instituted; canteens and medical stations established and a campaign undertaken to cultivate an additional 12,000,000 acres. The British and Indian businessmen had rallied with financial support. Essential medical supplies were lacking and were available only in the United States.

At the start the American relief workers established an organizational "blue print" and principles that contributed immeasurably to the success of their work. Few in number, even when augmented by British Quakers, the Friends Service Committee workers devoted themselves to showing the people of India how they could help themselves. Local agencies were used to distribute supplies and these outlets included such diverse groups as only India offers—Hindu, Moslem, Baptist, Red Cross—200 agencies in all maintaining 4,500 different centers. Included were 88 Christian missions, Protestant and Catholic. It was decided that supplies would be distributed without distinction as to religion, caste, or politics. The people were told that the aid had come from Americans.

American aid, administered by Americans, has brought to India's suffering humanity the food to build wasted bodies, drugs to fight disease, and funds and counsel to aid in their rehabilitation. Milk, vitamins, and sulfa drugs share with the relief workers the credit for the success so far attained. More than 150,000 daily attend canteens set up in many villages, for children and mothers, nursing and expectant. Evaporated milk sent from the United States, and some from other countries, too, is distributed by the India Red Cross under Quaker supervision.

Multivitamin tablets—30,000,000 of them from the United States—have been distributed by local committees through a distribution that is systematic and controlled. The reputation of the "little black pills" previously unknown to the natives has spread. To them it is "magic" as it builds vitality to fight disease that menaces them and combats night blindness and skin afflictions from which many suffer.

Two million sulfa tablets have served as a spectacular aid to the medical men's battle to combat streptococcal infections, dysentery, cholera, sores, and venereal disease. Other basic medicines, such as atabrine to fight malaria, have been supplied from America to supplement the Government's meager supplies.

Rehabilitation has been aided through establishment of training centers where weaving, cane making, pottery, sewing, and embroidery are taught. Widows and children eagerly attend. With small loans destitute fishermen, cane workers, carpenters, and weavers are aided to buy nets, boats, cane, tools, and thread to again become self-supporting.

4. FUNDS ARE VITAL TO SUSTAIN RELIEF PROGRAM

Approximately $100,000 monthly is needed to enable the Quakers to carry on this practical and effective humanitarian work of mercy in the name of America.

American Relief for India is making a direct appeal to the American people to contribute $1,200,000 to sustain the relief work during 1945.

This direct appeal is made necessary by the decision of the National War Fund which rejected the request of American Relief for India to allocate a share of the money contributed by American citizens for this work. The War Fund expressed the hope that "your important program may be financed adequately in some other way" but that the War Fund "must of necessity concentrate its resources on liberated areas."

The President's War Relief Control Board recognized the relief work in India as a war relief measure in authorizing American Relief for India to undertake an independent appeal for financial support. The board itself recommended the relief program to the community chests of the Nation in an unprecedented endorsement. It set forth the following reasons for approving the independent appeal:

1. The program proposed by American Relief for India must be construed as a war-relief measure.

2. Increasing importance of military operations in the China-Burma-India theater and continued presence of American forces in India make it desirable to express American interest in conditions in the areas where the American soldiers are stationed.

3. The program serves a significant humanitarian objective in addition to being important to the war effort.

4. The British and Indian authorities have expressed their approval and the American Minister in New Delhi vigorously urges continuation of the relief program.

In addition, the American Relief for India Committee's program has the endorsement of the United States State Department, the President's War Relief Control Board, the British Ambassador in the United States of America, the Indian Agent General in the United States of America, the Labor League for Human Rights (A. F. L.), the National C. I. O. War Relief Committee, the Foreign Missions Conference, and the field department of the Federal Council of the Churches of Christ in America.

The committee, responding to these requests, and in recognition of the tragic need, will make a direct appeal for funds to the American people and community chests to support this work. Solicitation will begin April 17.

Relief From Stringent Naturalization Laws

EXTENSION OF REMARKS

OF

HON. THOMAS D'ALESANDRO, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. D'ALESANDRO. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include a copy of

H. R. 511, which is similar to the bills that I introduced in the Seventy-sixth, Seventy-seventh, and Seventy-eighth Congresses. This legislation is needed more now than ever before. It would take care of the forgotten people who came to this great America in the 1890's, young, honest, industrious people who never really had the time or the opportunity to learn how to read and write. They married, had large families, and have given their best years in honest labor. Many are property owners and taxpayers. Many had sons and daughters who served our great country in World War No. 1 and are today giving their lives in the great battle in which we are now engaged for the preservation of our free institutions. The sons and daughters of others are today in the vanguard of America's progress. Yet, these same clean-living people of America cannot become citizens unless they pass an examination that would probably flunk a high-school graduate or perhaps a college graduate. If the only requirements for citizenship were contributions to national wealth through honest labor and love for democracy, almost all of our noncitizens could easily become citizens.

There are thousands of people in the United States who have made application for their first and second papers, but who failed to pass the examination. In making application they renounced allegiance to their native countries, and yet they are not citizens of the United States. They love America, they belong to America, they are willing to fight to defend America and keep it democratic and free, so why deny them citizenship?

I might add that the House took favorable action on similar bills in the Seventy-sixth and Seventy-seventh Congresses and that this legislation is needed more now than ever before. What is needed as well as tanks and planes is a united people. I wish to state that I am heartily in favor of this legislation which was reported by the Rules Committee and urge the Members of the House to act favorably on it.

The bill, H. R. 511, follows:

A bill to amend the Nationality Act of 1940

Be it enacted, etc., That the Nationality Act of 1940, approved October 14, 1940 (54 Stat. 1137), is hereby amended by adding, immediately following section 304 thereof, a new section to be numbered 304A and reading as follows:

"SEC. 304A. An alien, if eligible to naturalization, 50 years of age or over, who has resided in the United States continuously since prior to July 1, 1924, and who, on or prior to the effective date of this section, has made a declaration of intention to become a citizen which is not more than 7 years old, or who, within 2 years from the effective date of this section, shall make a declaration of intention, may thereafter file petition for naturalization and be admitted to citizenship upon full and complete compliance with all requirements of the naturalization laws, except that he shall not be required to speak the English language, sign his declaration or petition in his own handwriting, or meet other educational requirements: *Provided*, That this section shall apply only to petitions for naturalization filed within 4 years after the date of the enactment of this act."

SEC. 2. Section 326 of the Nationality Act of 1940 (54 Stat. 1150; 8 U. S. C. 726), is hereby amended by adding a new subsection, to be known as subsection (e) and reading as follows:

"(e) The provisions of this section shall not apply to any alien whose son or daughter is a citizen of the United States and has served or is serving honorably in the military or naval forces of the United States during the present war and who, if separated from such service, was separated under honorable conditions. For the purpose of this section, the present war shall be deemed to have commenced on December 7, 1941, and to continue until the termination of all hostilities in the present war."

SEC. 3. The Nationality Act of 1940, approved October 14, 1940 (54 Stat. 1137), is hereby amended by adding, immediately following section 331 thereof, a new section to be numbered 331A and reading as follows:

"SEC. 331A. A declaration of intention to become a citizen shall not be required of any alien whose son or daughter is a citizen of the United States and has served or is serving honorably in the military or naval forces of the United States during the present war and who, if separated from such service, was separated under honorable conditions. For the purpose of this section, the present war shall be deemed to have commenced on December 7, 1941, and to continue until the termination of all hostilities in the present war."

Surplus to Shortage—Where's All Our Food?

EXTENSION OF REMARKS

OF

HON. WALTER A. LYNCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. LYNCH. Mr. Speaker, under leave to extend my remarks in the RECORD, I am including an article by Malcolm Logan, entitled "Surplus to Shortage—Where's All Our Food?" which appeared in the New York Post under date of April 9, 1945. This is the first of a series of six articles written by Mr. Logan, and which I believe are of vital interest to the people of the country. We know that within 12 months the surplus of food which the people of this country enjoyed has today dwindled to a dangerous scarcity. Most people know the fact of this food stringency; few, however, know the cause. Mr. Logan knows the cause and states it in his six articles, the first of which is as follows:

SURPLUS TO SHORTAGE—WHERE'S ALL OUR FOOD?

Less than a year ago there was so much food in this country warehouses were bulging and nearly all meats and canned vegetables were taken off rationing.

Today that abundance is gone.

Col. Ralph W. Olmstead, Deputy War Food Administrator, told Senate investigators last week, "Serious shortages are rapidly developing for meats, dry eggs, sugar, and rice."

The situation, he said, is so bad that minimum lend-lease and relief needs cannot be met without a further cut in civilian rations.

Now housewives of New York are informed that things are going to get much worse.

But they were not told by Colonel Olmstead why in less than 2 months we passed from food surpluses to food shortages. They were not told how much of the blame for that situation rests upon Food Administrator Marvin Jones, Colonel Olmstead himself, and other officials responsible for W. F. A. policy.

These articles will tell that story for the first time.

PRODUCTION SOARED, AND THEN—

When we entered the war, American farmers raised food production to record heights. In 1942 we produced 24 percent more than the 1935–39 average; in 1943, 29 percent more; in 1944, 33 percent more.

But 1945 will be another story.

The goals for this year set by the Agriculture Department are roughly the same as those of 1944. Latest reports on actual plantings, however, indicate that except for oats, flaxseed, rice, and sugar beets this year's acreage will be less than last year's.

For the first time since we went to war, then, we face a decline instead of an increase in food production—and at the very time when Europe is looking to us to keep our promises and provide the food it needs until it can produce its own food again.

"COULD BE STEPPED UP"

The War Food Administration is pretty proud of our food-production record. But James G. Patton, president of the National Farmers Union, asserts:

"Total farm production could be stepped up 25 percent by efficient use of farm labor and aid to small and medium farmers."

Patton's position was supported by a special Food Advisory Committee headed by E. W. Gaumnitz of the Office of Economic Warfare in the report on Fundamentals of a Wartime Food Program sent to Agriculture Secretary Wickard on July 31, 1943.

This report was extremely critical of the Government's food program and proposed radical changes to convert agriculture to war production, as industry had already been converted.

REPUDIATED BY WICKARD

It was so critical that its very existence was kept a secret until the New York Times on August 15 published a summary of its contents. Then Wickard charged that the committee had gone far beyond its assignment and repudiated its action in proposing a thorough revision of the food program.

"The greatest opportunity for more efficient production in American agriculture," the report said, "is the small and medium-sized farm whose resources are partially wasted for lack of credit and good management.

"The potentialities of this group of farms were graphically demonstrated in 1942 by the 464,000 families who received credit and technical assistance from the Federal Government. * * *

"These families have less than 8 percent of the Nation's farms; yet their increased production in 1942 accounted for 38 percent of the Nation's increase in milk production; 5 percent of the increase for pork; 10 percent of the increase for peanuts, and 17 percent of the increase for dry beans."

TARGET OF FARM BLOC

The principal Government agency through which these farmers receive credit and technical aid is the Farm Security Administration. But the congressional farm bloc, spokesman for the big farmers, has been steadily attacking the F. S. A. ever since it was established.

The Guamnitz report urged drastic changes in the kind of farm products raised during the rest of the war years, with great increases in foods most urgently needed here and in Europe and slashes in other production, particularly short staple cotton. This was never done.

All this indicates that we could have raised more food crops than we did if Congress and the administration had gone all-out for a maximum wartime food program.

So far as meat production is concerned, we have had first a great surplus and now a severe shortage.

Frightened by surpluses, particularly by the record slaughter of hogs in the winter of 1943–44, the W. F. A. cut down its support prices sharply. Breeding of pigs and other animals fell even lower than the revised quotas.

But when last spring it became apparent that incentives had been reduced too much, the W. F. A. still refused to raise them. So on January 1 of this year the number of hogs on farms had fallen in 12 months from 83,852 to 60,660, the largest decrease in our history.

Lower incentives in 1943 and higher ones last year might have evened out production of pork, chickens, eggs, and beef. But the W. F. A. did not use its powers that way. It created a 1944 surplus and a 1945 shortage.

These food-production policies have contributed very greatly to our present troubles. But they are only the beginning of the story.

The United States and Russia

EXTENSION OF REMARKS

OF

HON. SAM HOBBS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. HOBBS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following broadcast by Raymond Moley:

I should like to underline the fact that I am not making this broadcast from San Francisco. There are good reasons for commentators to be in San Francisco, and there are many excellent commentators there. But it seemed to me that something could be gained in perspective from New York—3,000 miles away.

The point I make is well illustrated by the excitement last night over the premature report of a German surrender, when thousands of people celebrated the supposed news. The hunt for news at a large conference is highly competitive. There is limited game and many hunters—a thousand reporters for every bit of news.

In San Francisco a Senator apparently talked too much last night, which is not unusual for a Senator. But it is also clear that there was hasty and clumsy handling of the Senator's comment by the press.

President Truman's handling of the report was superb. He didn't handle it through a press representative. He didn't laugh it off. He didn't blame the press. He was direct and to the point. Yes; he heard it. Yes; he called Eisenhower. It is not true. That is all. That is a magnificent example of prompt and clear dealing with the public. His stature as President continues to grow.

In the excited atmosphere of a conference, trifles light as air become confirmations strong as Holy Writ. A small argument in a little room sounds louder than a big battle in the open. When news is scarce, it must be multiplied like the loaves and fishes in the desert.

Let's keep this in mind when we hear things about differences between the United States and Russia in San Francisco.

Those reported disagreements, heard from this spot between the Golden Gate and the Elbe River in Germany, seemed pretty small this week. To the west, in San Francisco, excited overaged men were quarreling about seats in an unborn league of nations. But in the other direction, on the Elbe River, boys from Russia and America were finishing a job without which there could be no league of nations.

Look once more, Americans, at the pictures of those boys in your Saturday and Sunday papers. There is the hope of the world. What do Tovarich Joe and his buddy Ivan care about who presides on Monday or Tuesday or Wednesday in San Francisco? They know that on last Wednesday they met some great guys on the Elbe—clean, strapping fellows who had licked the greatest army on earth all the way from Stalingrad and all the way from Normandy. In heaven's name, Americans, let's listen to those boys and, meanwhile, take our diplomats with a grain of salt.

Now, let's have a little quiet common sense about Russia. In some quarters in this country questions have been raised about the good faith of our ally. In turn, let us examine the reliability of some American Russia-haters who have been writing and talking about Russia over the past few years.

In 1939 I heard these gentlemen say that Russia would join Hitler in an attack upon western civilization. Instead of that, Russia and Germany went to war.

In 1940 I heard an otherwise important critic of Russia say that Germany could conquer Russia with 10 divisions. Russia has destroyed almost 200 German divisions.

In 1941, after Germany attacked Russia, we were told in print over and over that Russia could not last 2 months.

In 1942 our Russia-haters said Stalin would make a separate peace with Germany. Tell that to German fugitives.

In 1943 we were told that Russia would stop at the Russian borders. Tell that to the boys on the Elbe.

In 1944 we were told that Russia would stop at Warsaw. That's another one.

In 1945—3 weeks ago—we were told that Russia would stop at the Oder and make us shed our blood at Berlin.

A few days later we were told that Russia wouldn't let us take Berlin. She wanted that glory for herself.

Now these two stories are contradictory. But they both must sound strange to Americans whose sons might have died in Berlin, and to Russians, whose sons did die in Berlin.

We were also told that Russia would permit no fraternizing with Americans at the Elbe. Look at those pictures again.

They tell us now that Russia will not help us beat Japan. Wait a while and see.

All of these charges prove a case, not against Russia, but against the Russia-haters.

Now let's try to see Russia's position in this peace-making business.

Russian suspicion of the western powers is very real and very deep. She remembers that twice, in 3 years, there was created in eastern Europe a series of small states whose bitter anti-Russian sentiments were counted on to shut Russia permanently out of European affairs. Germany did this in 1917 in the enforced peace of Brest Litovsk. Germany, in that so-called peace, severed from Russia, as Churchill said, "by a great saber stroke from the Baltic to the Caspean Sea," all that Russia had acquired in 300 years. A dozen German-controlled nations were set up to wall in forever the remains of the Russian Nation.

After Germany's defeat in 1918, the process of walling in Russia began again—this time by Clemenceau and Lloyd George with the tacit consent of the United States. We participated with our allies, including Japan, in an attempted invasion of Russia, hoping by intervention to change her form of government. Some of the new states that we set up celebrated their freedom by attacks on Russia, shearing off still more of her legitimate territory. And the United States capped it all by refusing to recognize Russia for more than 15 years. This is a record that we would all like to forget.

Russia is determined never again to have a cordon sanitaire of unfriendly nations on her western borders. In their simple, realistic way, Russians believe that the alternative to a cordon of unfriendly nations is a cordon of friendly nations. Would we enjoy a concerted move by foreign powers to set up governments unfriendly to us in Canada, Mexico, and Cuba? President Monroe answered that.

In Rumania, Bulgaria, and Hungary the alternative is not democratic versus undemocratic governments. Those countries have never had real democratic governments. For the time being, it is either governments that hate Russia or governments that do not hate Russia, and Russia is determined that her neighbors shall not hate her.

On the other hand, truly democratic Czechoslovakia has welcomed a treaty with Russia. This is a test by a highly civilized government on the spot. The Czechs were sold down the river at Munich. This time they voluntarily choose to trust Russia instead.

The test of Russia cannot and must not be on the special case of Poland alone. The test will be what Russia does with Germany and what Russia has already done in Austria.

We have the answer in Austria today, and it is a good answer. Moscow has announced that a new Austrian Government has been set up in Vienna. The head of that government is Dr. Karl Renner, a former prime minister of the Republic of Austria, a leader of the social-democratic party, and a man favorably known in all freedom-loving circles of Europe. He is positively not a Communist.

The second man in the new Austrian Government is a Christian socialist, a fellow member of the Catholic party with Dollfuss and Schuschnigg. Hitler killed Dollfuss and sent Schuschnigg to a concentration camp. His death was reported recently.

The third man in the new Austrian Government is a Communist.

This is a representative government. It is not Communist. And it is not a puppet government. Dr. Renner has never been a puppet for anyone.

This indication of Russian intentions is wholly reassuring. We could not have done better ourselves.

Now, in the name of common sense, is there any evidence that Russia wants to make trouble for us? In the first place, the Russian Bear needs time to lick her wounds which are deep and painful. In this most costly of all our wars, Russia a year ago admitted four and a half million military deaths. There must be hundreds of thousands more now. If we add to that, civilian casualties of all sorts, we see that her loss has been from ten to twelve million.

In the next place, Russia needs money and credit from us for years to come. Her problem of reconstruction is immense. It will take 10 years to complete that. Whatever we contribute will not only profit us but cement a lasting friendship. Russia likes our stuff, from our jeeps to our refrigerators. She admires our industry and those who direct it.

Finally, there is a basis of friendship between us and Russia, not only in history but in geography. Of all the nations in the world, Russia and the United States have the least reason to attack each other for reasons of national gain. We are a sea power. Russia is a land power. Our spheres of influence are nowhere in conflict. We both have oil, coal, iron, gold, and wheat.

These are the basic and material grounds of friendship. Our cultural and political bonds will grow with the years.

I certainly have never, in all my life, had any preference for communism. I have opposed even the slightest subversive Communist propaganda here with everything that I could muster. But as an American I believe that Russian preference for communism is her business. Constitutional democracy is our business. But world security is everybody's business. And that is

the business at hand. Let's get on with it and stop looking under the bed.

Tonight Europe is face to face with the stupendous fact of German defeat. Legal surrender will merely signalize the practical fact. Our own reception of this fact is tempered by our awareness of our unfinished job in Japan. But to most of Europe, this is the end. And Europe, like a man emerging from long darkness, is only slowly comprehending the light. Words fail them. Their emotions choke their speech. Their hearts outrun their minds.

Think and feel, Americans, what this means to Europe. Sixty-eight bitter months ago it heard the screaming voice of Hitler announce the entrance of the heathen gods of murder, terror, and slavery. The thunder of armies shook the continent. Small nations were trampled underfoot. As months mounted into years, it seemed that no human life could endure. It seemed as if some voice from heaven had said that all truth was a myth, that all good was bad, that all the mind had learned must be forgotten, that God was not God but a magician's trick to serve the devil's purpose, and that fire, hunger, pestilence, and pain were truly the destiny of men.

It will take many years to understand that, somehow, terror has been blasted. Churchill told his people that without victory there could be no survival. But blood, toil, tears, and sweat have won at last.

We Americans still have dangers and labor ahead. We must finish Japan and, after that, prepare for our future and for that of our children.

The spectacle of a terribly beaten Germany must be clear, even to a Japanese mind. Let's tell Japan over and over what has happened in Europe. We can tell them more, besides, and in the telling strengthen our own spirit. Japan is now alone.

Our job is not over, but we have labored to the eleventh hour. We rejoice for Europe, but "we have promises to keep, and miles to go before we sleep."

"We Beg You To Save Us From Destruction," Poles Cry

EXTENSION OF REMARKS

OF

HON. ALVIN E. O'KONSKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. O'KONSKI. Mr Speaker, yesterday was VE-day. Some people celebrated, but there is no reason for such celebration. Just what is there to celebrate? The "four freedoms" and the Atlantic Charter have become a farce. The 800,000 of our boys who became casualties did so in vain.

We hear a lot about German atrocities. But bad as they were, the atrocities of today under Red fascism in Europe are worse. That seems to be the chief accomplishment of this war in Europe.

The 16 Polish patriots who were lured to Russia and arrested is a blot to all decency. These men went there after being approved by the United States of America and Britain. They are probably executed by now. But this going on is mild. Daily appeals for help from complete destruction are reaching the United States of America and Britain, but all in vain.

Reports from former leaders of the Polish underground have reached our State Department. They detail convincingly the atrocities committed by the Red army which has engulfed Poland. Facts and figures, names, dates, and places are cited, but omitted in the following excerpts:

Red army men are stripping the country of all its stores of food and livestock. Soviet military authorities treat the Poles with contempt, disregarding even the Lublin puppet regime, acting independently. The attitude of the Lublin Communists toward Russia is servile.

The stores in most cities are closed; there is no electricity or gas; all means of transport and communication are at a standstill. Looting and rape are rampant. The Polish people are starving. Soviet soldiers have permission to send 16-pound packages of food to their families in Russia. They have a free hand in "requisitioning," which turns out to be plain robbery.

A state of planned terror prevails. The underground army is being systematically destroyed by wholesale arrests, deportations, executions. Chaos reigns. The population is oppressed by mounting demands for quarters for soldiers in homes not destroyed.

There is danger of a revolt, which would only lead to murderous reprisals, following the Nazi pattern.

There is evidence of anti-British propaganda conducted by the Soviets. During a victory parade in Czestochowa on January 25, a banner read, "Down with British imperialism."

Poles in high posts, including doctors, professors, political leaders, are forced to sign statements denouncing the Polish Government in exile and the underground army as Fascists and bandits, and agents of Hitler, and supporting the Lublin regime now in Warsaw. The alternative is deportation or death. The documents are prepared by the Union of Polish Patriots in Moscow.

All Polish life is directed and controlled by the N. K. V. D.

There are 192 British solders at Czestochowa who are forbidden to contact the Poles; their food and quarters are very poor, and they are terrorized. Among them are Flight Lt. Hammet Patrick, R. A. F.; Flying Officer Symington Fen Wilson, R. A. F.; Sgt. Ernest O'Dwyer, Royal Tank Regiment, Stalag 344; Sapper Orr, New Zealand Engineers, Stalag VIII-B.

The Union of Mutual Peasants Aid is a totalitarian organization which peasants are forced to join.

The mass return of Poles from German forced-labor camps has begun. They are all utterly exhausted and wretched and add to the difficulties we face. Speedy aid alone can save the lives of hundreds of thousands. The Lublin regime, which is powerless and incompetent, cannot meet our desperate needs. The situation is catastrophic—far worse than under Nazi occupation. Lublin money printed in Moscow adds to inflation.

The Soviets has arrested more Poles during a few months than the Nazis did during 5 years of occupation.

In Warsaw the joy that arose with liberation has given place to deep despair. The conduct of the Red army soldiers has created hostility. There is economic stagnation. Trainloads of Poles are being sent to Russian labor camps. Members of the underground who fought Germans for over 5 years have again gone into hiding underground. Our only hope is intervention by Britain and America, in whom we still have faith.

Please intervene with the western democracies in our behalf. We cannot endure very much longer. We beg you to save us from destruction.

These reports come separately from Warsaw, Lwow, Krakow, Bialystok, Lodz, Piotrkow, Czestochowa, Lublin, and Radom, but all tell the same tragic story. May their voices be heard in San Francisco.

Hail the new order of slavery in Europe. To think 800,000 of our boys gave their lives for this. It is ironical that at the funeral of our late President Roosevelt the West Point Band played the Polish Funeral March, by Chopin, from the depot to the grave.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. FRANK T. STARKEY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. STARKEY. Mr. Speaker, under leave to extend my remarks, I include the following memorial to Franklin Delano Roosevelt, adopted by the St. Paul, Minn., Trades and Labor Assembly, a delegate body representing the American Federation of Labor local unions in that city:

LABOR'S GRATEFUL TRIBUTE TO THE MEMORY OF THE NATION'S FOREMOST STATESMAN AND HUMANITARIAN

A PEERLESS LEADER DIES

Whereas Franklin Delano Roosevelt, while serving his fourth term as President of the United States, and Commander in Chief of the mightiest military forces of all time, was stricken by the remorseless hand of death, at a time when the world most needs his wise leadership.

A CHAMPION FOR THE RIGHT

President Roosevelt's sympathetic understanding, his keen sense of justice, and his boundless courage qualified him to meet with vigor and success the many difficult situations that confronted him during his long official career. From his advent as President to the closing day of his life, he was beset by critical problems which taxed the vital forces of mind and body, and like a loyal soldier fighting for a great cause, he sacrificed his life in the service of mankind.

When President Roosevelt assumed the re ns of the Federal Government in 1933, he beheld a prostrate Nation. Its industrial and financia' institutions were on the brink of bankruptcy with leaders in business and Government bewildered and terrified at the appalling situation. Millions of workers were unemployed and destitute. Homes, farms, and businesses were being seized by merciless creditors. The entire structure of government and society was menaced by desperate and disappointed citizens, whose faith in their leaders was blasted, and they were filled with resentment.

VISION, UNDERSTANDING, AND COURAGE

President Roosevelt showed vision, understanding, and courage in meeting and solving the problems of industry and government; problems that baffled the master minds of public affairs. Under his guidance and inspiration, our Nation began the long journey out of despair and depression. With a happy combination of idealism and realism, President Roosevelt charted the practical course that brought prosperity to business, employment to labor, and good prices to the farmer, and hope and happiness to all.

To prevent a recurrence of the evil days that almost wrecked the Nation, President Roosevelt sponsored laws that curbed the

speculators and money manipulators, and gave protection to the independent businessman, to the farmer and the wage worker. Social security to the aged and hour-and-wage protection to the helpless, and independence to the organized worker. Gigantic public works like the T. V. A. were brought to full fruition and success, thereby laying the foundation for permanent prosperity for all the people.

A TRUSTED FRIEND OF THE PEOPLE

President Roosevelt's steadfast attitude and progressive principles and actions shocked and alienated the greedy and reactionary; but opposition and criticism never daunted him nor diverted him from the chosen course of public service. Born to wealth, position, and culture, he never was blinded by the glamor of his own place and power so he could not see and understand the plight of the vast majority of his fellow Americans. He showed by his constant planning and proposals that he recognized the obligation of government to safeguard the right of every citizen to an opportunity to earn a livelihood and enjoy the full fruits of his labors.

FORESIGHT AND EXECUTIVE ABILITY

When President Roosevelt was nearing the consummation of his program of improvement for the Nation, the peace and security of the United States and the world was menaced by the Axis Powers' war of conquest. He was the first to appreciate the far-reaching significance of the growing military conflict in Europe. He warned and virtually compelled the United States to prepare for the impending clash, in the face of bitter criticism and opposition. Mr. Roosevelt's wise foresight of the danger and magnitude of the struggle saved America and the civilized world from universal subjugation and servitude to the conquering hosts of Nazi tyrants.

ALWAYS PLANNING FOR PEACE AND PLENTY

Although bearing the burden and responsibility of the armed forces of our own Nation and of the world, the President never forgot his obligation to safeguard the welfare of the people of the United States and the world. He was preparing to bring to full realization the ideals and principles set forth in the Atlantic Charter of human rights. He had expressed definite ideas on a practical program to provide opportunity and recompense for every citizen of the Nation.

A FAITHFUL SOLDIER MUSTERED OUT

At the most vital stage of his gigantic endeavors—political, military, and diplomatic—to establish freedom and prosperity for all mankind, this tireless and unselfish soldier of the common good, before he could finish the battle in which he had fought so long and valiantly, was mustered out by the Supreme Commander for a well-earned rest and reward.

To the millions of devoted friends and followers of Franklin Delano Roosevelt in the United States and the world over his words and his deeds shall ever serve as a guide and an inspiration to them to strive faithfully and persistently to achieve the purposes and principles of their departed leader. This course of action will serve as the most enduring monument of gratitude and devotion to the memory of a great humanitarian and statesman.

Be it known that the St. Paul Trades and Labor Assembly, in expressing these views of labor on this heartfelt subject, does hereby declare that the death of President Roosevelt is the most tragic event in these crucial times in human affairs; and bespeaks the sorrowful sentiments of a bereaved humanity, whose welfare was always foremost in the thoughts and actions of our beloved benefactor.

Submitted by the legislative committee to the trades and labor assembly for adoption and incorporation in the official records of the organization as a permanent memorial.

Open Letter to Producers and Distributors

EXTENSION OF REMARKS

OF

HON. FRANK E. HOOK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. HOOK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Motion Picture Herald of April 21, 1945:

AN OPEN LETTER TO THE PRODUCERS AND DISTRIBUTORS

In the interests of mutual prosperity—which you have been enjoying with increasing abundance and which we are able to share in less and less—we, the members of the North Central Allied Independent Theatre Owners of Minnesota, feel impelled to put before you several urgent questions.

1. Do you, or do you not, believe in free enterprise?

2. Are you, or are you not, in favor of the system of business competition which has made this Nation great?

We believe you do not and are not. For if you did, the independent theater owners would not have their backs to the wall as they now have. This is the direct result of your policies which appear deliberately designed to force us out of business so that the field may be yours completely.

First-run theaters in major cities are lavishing in unprecedented prosperity, while neighborhood houses have suffered a loss in attendance of at least 25 percent. This is a paradox but nevertheless the hard truth. Pictures are kept in downtown houses for unprecedented runs and are completely "milked" by the time they are permitted to reach the suburban theaters. In spite of this loss of business by the independent exhibitor, you have enacted a confiscatory policy of high percentage and high flat film rentals.

It should hardly be necessary to call to your attention the fact that the operating costs of theaters have skyrocketed. Despite all the obstacles imposed on the exhibitors, the producers have seen fit to increase the cost of films to independent exhibitors to such a point that it is impossible for the exhibitors to make a profit. The independents have been put in a spot where the only profits in their theaters come now from the sale of peanuts and popcorn. We refuse to be reduced to the status of candy hawkers. Our business is the showing of motion pictures. The pictures we show should hardly be a sideline to the candy stand.

Many small towns have lost a large segment of their population, because of the shift to war jobs in larger communities and because of the draft. What justice is there, what equity is there, in the demand of producers that the small independent pay such high flat film rentals and percentages that you producers are now exacting? The policy you are following represents confiscation. And that, an impartial public will agree, is not America's way.

The unusually large grosses gathered at the first-run theaters in major cities apparently have intoxicated the distributors to the point where you have lost all sense of proportion and value. Certain pictures formerly rating only bottom bracket rental now are placed in the top bracket when offered to the independent exhibitor. There is no price control code in our industry as yet—but, in the name of all that's decent, isn't there a code of morals for big guys to follow in their dealings with little guys?

Gentlemen, the situation is serious. This is not crying "wolf." The facts are apparent to everyone in the industry. The independent exhibitors, as a matter of self-preservation, demand an immediate readjustment of the distributor's sales policy toward independent exhibitors. This is something of a family matter, and naturally we would prefer to settle it within the privacy of our own industry. But unless we are able to get satisfaction quickly and fully through the medium of open discussion, we intend to carry our fight to the theater-going public and enlist the support of the Nation behind our cause.

We are prepared to press the issue. If necessary, we will go to the daily press and the radio. We will enlist the aid of our various Representatives in Congress and of the appropriate Government agencies. We will, if need be, place trailers on our screens to go directly to the theater patron for his understanding and support. We have given our lifetime toward building up our business and we are not going to stand idly by watching distributors take our business away from us—which you are trying to do. We mean to stay in business and we mean to have you see the light.

We believe in free enterprise. We believe in competition. We believe in the American way. We do not believe in the octopus-like operations you are using to choke us. We pledge ourselves to use every means at our command to eradicate this evil.

Now, let's be reasonable. When do you want to start talking shop?

NORTH CENTRAL ALLIED INDEPENDENT THEATRE OWNERS, INC., OF MINNESOTA, MINNEAPOLIS, MINN.

Ratification of Treaties

EXTENSION OF REMARKS

OF

HON. LUTHER PATRICK

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. PATRICK. Mr. Speaker, it is with pride and pleasure I am able to offer for publication in the Appendix of the CONGRESSIONAL RECORD an editorial published in the Birmingham News of Alabama on last Sunday. It is an excellent statement of the case as to Joint Resolution No. 60 and in favor of its passage:

OPENING OF A GOOD FIGHT

Congress is at last coming to grips with a proposal to amend the Constitution for the purpose of making the House co-equal with the Senate in the process of treaty-making. The Lower Chamber spent several days last week in a debate on the subject. The Kefauver bill which would deprive the Senate of its exclusive authority under the Constitution and which would make approval or rejection of a treaty a matter of majority vote is now up for action.

The House is not considering this change merely to serve its own prestige. HATTON SUMNERS, chairman of the Judiciary Committee, made that clear. He said that the Chamber which is called upon for appropriations to implement treaties should have some voice in passing on the soundness or unsoundness of international agreements. This is a good point, and it does not lose its force when we realize that the House is feeling its oats and has grown weary of senatorial assumptions of superiority.

Yet it is undeniable that in moving toward equal power in the field of foreign affairs,

the House is expressing the growing public desire for some such alteration. Americans are now fully aware of the dangers which inhere in the exclusive authority which the Constitution gives the Senate. As a consequence, the Senate has come to be the graveyard of treaties which a minority of Senators objected to.

Now that our country is emerging as a full-fledged participant in world affairs, the people of the United States have become uneasy about the possibilities of obstructionism and frustration in the constitutional situation as it stands.

One of the strong arguments justifying an amendment to eliminate this sort of thing is that the constitutional provision under fire was written in to meet an emergency which the Nation has not had to face since the 1780's. It is common knowledge among historians that this provision was designed to "meet problems of the time which threatened approval of the Constitution by the original States." Since then it has been used for an entirely different purpose—all too frequently to hamper the State Department and the President in conducting foreign relations for the best interests of the Nation.

Amending the Federal Constitution is a slow process at best. It is likely to be particularly gradual in this instance, unless the Senate undergoes a great change of heart. If the House approves the Kefauver bill, it will be only the beginning of a long fight, the end of which cannot come until public opinion will have driven the Senate to agree to give up its special privilege. Conceivably, if the Senate outrages the country by acting up in connection with a security organization, that demand will crystallize swiftly. But otherwise the change will be the result of an unavoidably long-drawn-out campaign of popular education.

O. P. A. Regulations

EXTENSION OF REMARKS

OF

HON. KARL M. LeCOMPTE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. LECOMPTE. Mr. Speaker, the Grinnell (Iowa) Herald-Register recently discussed the dilemma of local merchants attempting to comply with complicated O. P. A. directives, and urged that some effort be made to simplify these orders and make it possible for honest businessmen to comply with them without being overburdened with paperwork, thought up by O. P. A. officials who have never tried to run a business themselves, particularly in wartime.

Under leave to extend my remarks in the RECORD, I include excerpts from a news story and an editorial, both from the Grinnell Herald-Register, of April 30, 1945:

MERCHANTS PROTEST O. P. A. REQUIREMENTS—DECLARE COMPLIANCE WITH NEW PRICE REQUIREMENT A NIGHTMARE

For some time past Grinnell merchants who deal in men's clothing, women's wear, or furniture have been burning the midnight oil in an effort to comply with the provisions of O. P. A. Price Regulation Order 580. The merchants have been provided with a 40-page leaflet which they are required to read and digest. Then they must check through every item in the store and make a report by May 4 "or else," which, being interpreted, means that no sales of the affected merchandise can be made unless the report is filed.

HERE'S THE REGULATION

Regulation 580 applies to all those who sell at retail men's, women's, children's, or infants' wearing apparel, apparel accessories, or shoes, or household textile items like blankets, towels, or sheets, furniture, floor coverings, lamps, or bedding, and other specified articles. It requires preparation of a "base date pricing chart." This chart consists of a list of costs and prices for the items covered by the regulation which were being sold on the base date.

After May 4, 1945, merchants may not sell this merchandise unless they have filed a chart and received an acknowledgment of it.

Sounds simple so far. But wait until the merchants have waded through 40 pages like the following paragraphs taken at random which refer to the long list of articles covered by this regulation. "These articles are grouped into 'categories' and each category is given a category number. For example, men's and boys' underwear and nightwear constitute category 116."

HERE'S A CATEGORY

Let's see what category 116 is: "This is a 'general' category, including all underwear and nightwear garments, made of either knitted or woven fabrics, except that it does not include men's shorts subject to MPR 547 or men's or boys' shorts or pajamas subject to MPR 578."

Here is another enlightening paragraph:

"Category 602: All other cotton yard goods. "This is a 'general' category, except that it does not include any cotton white goods covered by category 601, and pile fabrics, covered by category 605, and lace, net, or fancy goods covered by category 606, or any sheeting, pillow tubing, toweling, tablecloth material, or curtain, blanketing, drapery, or upholstery fabrics, covered by categories 501–504 or 507. It includes all finished fabrics, woven or knitted, of yarn containing 75 percent or more by weight of cotton or cotton waste."

And so on for 40 pages.

BUSINESS AND THE O. P. A.

Like everybody else we recognize the importance of regulated prices in times like these and consequently we recognize the inevitability of the O. P. A. and O. P. A. regulations.

We recognize also the difficulty of the task which O. P. A. is called upon to perform and we have found the O. P. A. representatives with whom we have come in contact earnest and sincere gentlemen, doing their best to handle a hard job.

We feel it only right to make this statement as a preamble and to add that to the best of our ability we have been trying to hold up the hands of the O. P. A. by giving space in this paper to some of their more important directives.

However, we have wondered and have been wondering for some time if the O. P. A. wouldn't get along a whole lot easier if it were possible to streamline and simplify some of its directives for the benefit of the hard-working businessmen who are trying to comply with them. Elsewhere in this paper appears a case in point, to wit, the recent O. P. A. order affecting dealers in men's and women's clothing and household equipment. This article, taken from another paper but applicable in every community, gives some of the reasons why it is extremely difficult for businessmen to comply with the terms of this directive.

In the first place, it is wordy. In the second place, its legal phraseology is confusing. In the third place, many businessmen are not prepared to furnish offhand the detailed information required in this report. In the fourth place, every single store that we know anything about is desperately short of help and most of the proprietors are already burdened with more detail than they can take care of without this added load.

Granting the sincerity of the O. P. A. we feel that it can be said that a large percent of the men who framed this directive have never tried to run a business themselves, particularly in wartime, and have no appreciation of the burdens which, with the best intentions in the world, they are heaping upon the already overburdened shoulders of businessmen.

There is another thing which we might mention while we are on the subject. We fail to see why businessmen who, with no intent to offend, are found a cent or so over the ceiling on maybe five or six items out of several thousand in stock, should be fined for their failure. Punishment of willful offenders is all right, but it seems to us that penalizing an honest businessman who is doing his very best to keep up with the constant flood of directives and changes is not cricket. It seems to us like abuse of power rather than exercise of power.

This is written with all the good will in the world and in a desire to be helpful rather than unduly critical. It seems to us that something ought to be said to interpret the average businessmen to those who for the present exert so great an influence over his destinies.

VE-Day Program for Postwar Construction Includes St. Lawrence Project

EXTENSION OF REMARKS

OF

HON. WILLIAM A. PITTENGER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. PITTENGER. Mr. Speaker, yesterday the House of Representatives took official notice of VE-day in Europe. For a long time there has been talk about postwar planning and postwar construction projects which would furnish employment not only for soldiers who have been discharged from Army service, but for men in this country who will soon be out of jobs when the war factories close down. The time for talk has past.

In the Seventy-seventh Congress they used the argument that we should not undertake the St. Lawrence project while the war was in progress.

When the opponents of the St. Lawrence project were forced back to a last ditch stand in their opposition, they always fell back on that stone wall, "This project will hinder the progress of the war, because it will take many men from our war industries and from the Army, and because it will take steel and other needed materials which the Army and the Navy must have." There was a lot more talk—and I think it was just talk—along these same lines. The announcement yesterday of unconditional surrender of Germany puts an end to this argument that we must delay the project on account of the war.

I believe that we should have postwar planning and that it should include worth-while projects, those that will create wealth and improve the welfare of

the American people, and remain a permanent asset to the national defense of this country. For that reason, within 24 hours after the House convened on January 4, 1945, I introduced H. R. 671, a bill to confirm the United States-Canadian agreement of March 19, 1941, and to authorize postwar construction of the St. Lawrence seaway and power project. I do not here argue the merits of this proposal. In fact, aside from objections by powerful and selfish interests, who think more of monopoly privileges than they do of the unemployed and the bread lines and other difficulties that come inevitably in the wake of war, there are no sound reasons why this project should not be undertaken.

We do not want another depression and unemployment, and other economic disasters such as followed World War No. 1. The way to prevent such conditions is to provide worth-while employment so that American labor will have an income from useful work. This can and will be spent for the products of factories and the farm so as to create and maintain a high level of production and income.

The St. Lawrence seaway and power project is ready to go now. It has been approved by the Departments of War, Navy, Commerce, and every other department which has anything to do with this development. It has been approved after public hearings by the Committee on Rivers and Harbors of this House. Moreover, the Corps of Engineers, United States Army, which has made such a magnificent record in this war, has prepared plans and specifications now available for use. The seaway project has already been completed over 90 percent of the distance from Duluth to the open sea. This is not a new project. Let us take action now to finish this job as the No. 1 postwar project on the North American Continent.

Something About the Man Who Represents the United States on the Reparations Commission

EXTENSION OF REMARKS

OF

HON. AUGUSTINE B. KELLEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. KELLEY of Pennsylvania. Mr. Speaker, under permission to extend my remarks in the RECORD, I wish to include an article from the Washington Star, of May 8, 1945. This is a column written by Mr. Lowell Mellett and is called Something About the Man Who Represents the United States of America on Reparations Commission. I, for one, am delighted to know more about the career of Mr. Pauley, and think that President Truman is to be commended for having appointed him to this most difficult assignment. I am sure that he will serve his country with credit to it and to himself.

The article follows:

SOMETHING ABOUT MAN WHO REPRESENTS THE UNITED STATES OF AMERICA ON REPARATIONS COMMISSION

(By Lowell Mellett)

Now, to pick up the pieces of a devastated continent and to try to put them together again.

Being a member of the Allied Reparations Commission isn't a job that anybody would ask for if he were merely seeking an honor. It's a job of hard, disagreeable work for which a man is unlikely to receive any recognition, whether he does it well or otherwise. So Ed Pauley has taken the job, and has the dubious pleasure of reading that his appointment is a political pay-off by President Truman. It may be timely, therefore, to tell the story of the man the President has delegated to handle this country's part in adjusting Germany's shattered economy to the needs of the rest of the world.

He was a Hoosier the first 6 weeks of his life, an Alabaman the next 16 years, but is now a Californian, having lived out there for 26 years. He is 42 years old.

WORKED IN OIL FIELDS

He worked his way through Occidental College and the University of California, partly by selling encyclopedias, whose contents he is said to have mastered, more or less, in the interest of good salesmanship, and partly by laboring in the oil fields. Beginning as a "mucker," he was promoted to be a "roughneck," and he didn't stop there. They made him a derrickman, then a driller, a crude gager, a buyer, and a refinery evaluator. By which time he knew the oil business. Then his neck and his back and 32 assorted bones were broken in an airplane accident.

He was in the hospital 1 year, spending the time reading and thinking—thinking mostly about how to pay the doctors' bills, $9,000 worth. Out of any salary it would take a long time. He decided to go into business. Persuading some others to join him, he leased an oil refinery. Out of this grew the Petrol Corporation of California, engaged in producing as well as refining, and Pauley's present fortune of several millions.

In the hospital Pauley had been inspired by the story of a New York politician who had overcome an accident even more crushing than his own. He became a Roosevelt man. He did what he could in the 1932 campaign and those that followed. In 1940 he collected the party's funds for the 11 Western States and in 1944 was notably successful as the party's national treasurer.

In 1938 Pauley was made a regent of the University of California. His special interest was the department of economics, but the university's special interest in him may have been something else. He was made chairman of the Committee on Endowments. University of California now has an endowment fund second only to that of Harvard.

Came the war and the problem of supplies. Britain needed gasoline desperately. Pauley wired the President that 100 tankers carrying gasoline for domestic use could be released to serve Britain if our rail shipments were properly routed. (His postgraduate thesis at the university had been on the subject of transportation.) The President asked him to report at the White House the next day. Pauley arrived and laid down a plan that would enable the railroads to do more of their job than they had been doing.

SENT TO ENGLAND

The plan worked. He promoted then the creation of the War Petroleum Administration, with Harold Ickes heading it. That also worked.

Drawn into the operation of lease-lend, he was sent to England. There he enccuntered Sir Arthur Salter, who will represent Great Britain on the Reparations Commission. He persuaded Salter, top British shipping man, to revise the wasteful routing of that country's own tankers.

There also he met Ambassador Maisky, who will represent Russia on the Reparations Commission. Russia had asked for a considerable amount of 100-octane gas. Pauley had a better idea. By the adoption of certain new processes Russia could obtain the needed high octane gas from her own refineries. Maisky was cold.

"Do we get the 100-octane gas?" he repeated.

"No," said Pauley.

That was the beginning of a perfect understanding between Pauley and Maisky. The new refining processes were installed by the Russians and the result was what Pauley had promised.

This is the man, not the political hack he has been pictured, whom the President has entrusted with America's part in the reparations negotiations. On his record he seems likely to do well.

The Veterans' Administration's Program for the Counseling of Veterans

EXTENSION OF REMARKS

OF

HON. HARRY R. SHEPPARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. SHEPPARD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address of Dr. Ira D. Scott, Chief, Vocational Advisement Division, Vocational Rehabilitation Service, United States Veterans' Administration, before Lodge 2, American Federation of the Physically Handicapped, National Press Club, Washington, D. C., April 18, 1945:

Mr. President, distinguished guests, and friends, I am appreciative of this opportunity to come before your federation, realizing as I do, after more than 25 years' intensive study and practice in the rehabilitation field, how important the work you are doing is and how well you have battled for all physically handicapped people.

I have been directly connected with the Veterans' Administration ever since World War No. 1, and my views regarding the counseling, training, and employment of handicapped persons is based upon many years' experience in working with the problems with which all types of disabled persons are confronted. My observations convince me that the American Federation of the Physically Handicapped manifests most admirable group intelligence by having as its national president Paul A. Strachan, a man whose ability, earnest zeal, and achievements in promoting the interests of the handicapped distinguish him as a most outstanding constructive leader in this great field, where great leadership is so much to be appreciated.

The Veterans' Administration is responsible for providing a counseling service, not only to disabled veterans who are eligible for vocational rehabilitation under Public Law 16, Seventy-eighth Congress, but also to all veterans who are entitled to and request guidance in connection with their education or training under title II of the Servicemen's Readjustment Act of 1944, Public Law 346, Seventy-eighth Congress (GI bill). A large number of returning veterans, both men and

women, will be eligible for such services under the provisions of these two statutes.

While "educational and vocational guidance" is the term used in Public Law 346 to designate this service, the Veterans' Administration has developed its counseling program with most careful regard to the fact that veterans will have greater assurance of achieving their educational objectives or occupational goals when mental conflicts, emotional maladjustments, and other types of personal problems are alleviated prior to, or parallel with, counseling and training. The plans and procedures of the Veterans' Administration, therefore, are aimed at providing such thorough and complete counseling to each veteran claimant that he may be assisted in making the adjustments necessary for a useful life as a citizen in a community of his choice. For this counseling service it is most important that competent professionally trained and otherwise well-qualified persons be employed.

For many veterans, guidance in the selection of an occupation or of an educational objective may be all that will be required. Other veterans may need assistance in handling personal problems, in resolving mental conflicts, in attaining emotional stability, or in learning how to secure and hold employment. The Veterans' Administration plans to furnish all types of counseling service which may be required in the case of an individual veteran. He will also be guided in making intelligent use of other clinical and professional services available to him through the Veterans' Administration and other agencies, for the purpose of assisting him in making and maintaining the mental, emotional, and social adjustment essential to the attainment of his objectives. Each veteran is counseled as a person, in accordance with his needs, and educational and vocational guidance are not given without reference to the consideration of the other problems which affect the life of the individual.

In such a complete counseling procedure the well-trained counselor will first explore fully the facts related to the individual, as a person, observing his attitudes and whether there may be need of any special personal adjustment counseling. In case the interview reveals evidence of tension, stress, or strain of the personality, the counseling procedure is to be conducted in such way as to effect a satisfactory adjustment, if possible. In some cases the counselor may solve some minor personal problems in the course of the interview; in other cases the problems may deal with worries connected with family relationships, financial difficulties, or other troubles which may require the assistance of some case-work agency; while the more severe cases of mental conflict or of emotional instability may require referral for conferences with specialists in psychotherapy or with psychiatrists. The Veterans' Administration counseling procedure provides for discovering all these different types of problems and for counseling each veteran according to his individual needs.

In addition to special types of counseling service to meet personal problems, there remains the essential guidance service to assist the veteran in selecting educational or employment objectives and training courses designed to lead him to an appropriate occupational adjustment. This includes ascertaining through recognized counseling techniques the veteran's interests, aptitudes, attainments, and personality traits which have the greatest significance in determining the occupational fields and educational pursuits in which he may have the greatest possibility of success, considering also the limitations imposed by physical or mental disability. The counseling techniques include interviewing, the review of records of school training, and of military or naval service, the survey of work history, and the use of objective tests. When the counselor has carefully evaluated the data concerning the veteran which have been made available through the counseling techniques mentioned, and has considered his assets and liabilities in relation to various kinds of work, he again confers with the veteran describing the occupational fields wherein his strongest abilities may be utilized. During such a conference the counselor and the veteran will usually be able to make a tentative selection of an occupational goal and of education or training courses to reach it.

When the procedure is considered with reference to meeting the outstanding purposes of the legislation, it will be observed that the Veterans' Administration procedure focuses attention upon encouraging the veteran to consider fully and carefully the factors which relate to accomplishing his occupational adjustment. This emphasis is desirable since nearly all veterans who will be counseled under the provisions of either enactment will be adults or will be regarded as adults and should generally be directed toward occupational adjustment because, for the typical veteran, this is the most important aspect of any satisfactory adjustment as a useful member of society.

In the counseling of disabled veterans with reference to vocational rehabilitation under Public Law 16, it is especially to be noted that the obligation rests upon the Veterans' Administration to do everything possible to see that the veteran's employability is restored. The Veterans' Administration must, therefore, insist upon the use of modern methods and techniques in vocational advisement so that the results of the counseling will meet present-day conditions so well that the disabled veteran will not be disappointed when, having completed his training, he seeks employment.

The Veterans' Administration plans to make the services of qualified counselors available to veterans throughout the Nation. The program, which was started in 1943 by placing vocational advisers in the 53 regional offices in the different States and which was developed by increasing the number of such counselors in these offices as the number of veteran claimants grew, is now being expanded to include Veterans' Administration guidance centers in a number of cooperating colleges, universities, and other educational institutions which have personnel qualified to render counseling services. This plan for establishing guidance centers in educational institutions will make the counseling service accessible to veterans at points near their homes; it provides for the participation in this counseling service of a number of well-qualified people in colleges and universities who would not wish to sever their relationship with their educational institutions, but who are able to contribute highly valuable service in the counseling of veterans; it will afford veterans thorough and complete counseling in a suitable setting, and it will enable the Veterans' Administration to make arrangements, in advance, with educational institutions which, because they are going concerns, will be able to start counseling service to veterans on comparatively short notice when an increase in the number of claimants makes it desirable to have a larger number of guidance centers in any regional territory.

The fact that a veteran is requested to report for counseling at a Veterans' Administration guidance center located at any particular educational institution places no obligation upon him to take educational or training courses at that institution. Each Veterans' Administration guidance center will provide counseling service to any eligible veteran who may apply if he resides within the area to be served by the guidance center, and any veteran may take his training wherever he can secure courses appropriate to the attainment of the educational or occupational objectives he has selected. For example, it would be possible for a veteran to be counseled at a guidance center in New York and to take his training in an approved educational institution or industrial establishment in California if that seemed to be the best way to secure the education or training which he needs and desires. In most cases he will select a training institution or establishment near his home, but the location of the Veterans' Administration guidance center at which he receives counseling service should in no way limit or influence his selection of an educational or training course or of a place of training.

One of the most important advantages of the plan for establishing guidance centers in educational institutions is the way it provides for a continuing supply of trained counselors, so that when the time comes to expand the service still further and to extend it from the nuclear points at the colleges and universities to the communities more remote from these, it may be possible to make this expansion without reducing in any way the quality of the counseling service to be provided. Considering the probability that before long it may be necessary to provide counseling service at some 400 guidance centers at educational institutions and then to prepare to expand the service still more by supplying trained counseling personnel for 500 or more branch offices, it becomes apparent how important it is to make provision for a practical program of counselor training.

In preparing to furnish such a thorough and complete counseling service to so large a number of people as the group of veterans who are, or will be, entitled to such services, the Veterans' Administration has found it necessary to look beyond the immediate needs and to envisage the probable number of claimants who will seek counseling when the peak of demobilization may be reached. By providing counseling service to veterans now, through guidance centers in cooperating educational institutions, the present is being used as a time of preparation. During the time when the number of veterans to be referred to a guidance center remains comparatively small, the college personnel will not only have time to learn thoroughly the procedure for counseling effectively all types of veterans with their widely varying problems, but they will also have time to teach others counseling principles, techniques, and procedures so that they may be prepared to do effective counseling when the number of veterans to be counseled increases.

For this purpose the guidance center plan which locates the practical work of counseling in the educational institutions which provide counselor training is, in many ways, ideal. The colleges and universities are able to train counselors not only through their usual classroom instruction, but they are in position to combine with this instruction observation of actual counseling, and as the new counselors develop, they can be given closely supervised practice in all of the counseling techniques. Thus the established guidance centers not only provide veterans with the services of well-qualified and experienced counselors, but they also make it possible to increase the number of trained counseling personnel in geometric ratio. This plan will make counselor training easily accessible to qualified persons in different parts of the country, and at the same time it will make it possible to maintain the counseling service at the highest possible level as the demand for it increases, so that every type of counseling that may be needed will be available to each counselee at each counseling center.

The guidance-center plan has been developed because, in considering any other plan for providing a counseling service to veterans, certain undesirable alternatives were presented. In order to provide personnel who are qualified and adequately trained to do effective counseling it would be necessary to secure the release of a large number of such personnel from colleges and universi-

ties or other agencies and to place such qualified people in the counseling centers in the different communities, or to delay the establishment of counseling service until extensive counselor training courses could be given to an adequate number of people. The only other alternative would be, to staff such centers for the most part, by people, who are either untrained or inadequately trained to render an effective counseling service. The first of these alternatives, if the difficulties in getting the personnel to accept full-time employment as counselors could be overcome, would probably be successful in providing adequate counselor services for veterans at the present time, but it would not be desirable because the loss of such personnel would destroy or greatly impair the ability of the colleges and universities to continue to train counselors to meet the future demands of such service. The second alternative is not practical because it is desirable to provide adequate counseling service without delay to veterans who apply for it now. The third alternative might result in setting up a great number of makeshift counseling centers readily accessible to veterans, but unable to meet the real needs of veterans because most of their personnel would lack the thorough preparation which is essential to becoming effective counselors.

The plan for providing complete and thorough counseling service to veterans by establishing guidance centers in cooperating colleges and universities utilizes the services of qualified counselors and thus gives to veterans the best service the country has to offer now; it enables these counselors to improve their techniques through practical service; it offers them an unusually practical setting for training other counselors; and it furnishes the personnel in institutions of higher learning an exceptional opportunity to come to know and understand the feelings, the aspirations, and the everyday problems of the returning veterans. This should result in more effective future service by such institutions, not only to veterans but to other students and to other citizens who may be interested in the permanent improvement of adult counseling services in their own communities.

In deciding to decentralize the counseling service to veterans by utilizing qualified personnel in colleges and universities, the Veterans' Administration has adhered to the point of view that the counseling of veterans should be on the highest professional level and should utilize the most competent, well-trained, and highly qualified persons available. It was felt that colleges and universities were the best source of potential advisers, since among their faculty members could be found many persons with graduate training in the fundamental fields of psychology, business, and industrial personnel administration, public personnel administration, labor problems, labor market analysis, tests and measurements, social work and community organization, education, rehabilitation of the handicapped, vocational psychology, mental hygiene and psychiatry. In addition, a number of the persons so trained have had practical experience in counseling students and adults in the community. It was believed that such persons would be most adaptable and could be trained in the shortest period of time in the use of compendia of occupational information and in other specific counseling equipment and techniques to be prescribed by the Veterans' Administration for counseling veterans.

It is hoped that this policy will pay dividends in high quality of the service to be rendered veterans. No doubt there could have been found able persons, well-intentioned, highly motivated, and eager to be of service in helping the veterans, and some of them might have been trained in a relatively short period to do the work. In the long run, however, they could not be depended upon to render the complete professional counseling service, with all of its ramifications. The emergency has required a lowering of standards in many areas, but the Veterans' Administration is hopeful of maintaining professional qualifications for the people who are to perform the complex function of dealing with the human relationships of the men whose lives and plans have been so sorely upset by our wartime society. Even the most highly qualified professional counselors will find the job a challenge for their technical skills, personal abilities, and most ingenious efforts.

I thank you.

Treaty of Versailles

EXTENSION OF REMARKS

OF

HON. CARL HINSHAW

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. HINSHAW. Mr. Speaker, much has been said concerning the "willful minority" that prevented ratification of the Treaty of Versailles with the Covenant of the League of Nations. The Congressional Library has furnished me, at my request, with a record of the votes taken in the Senate on this matter.

Following are the roll-call votes referred to:

TREATY OF VERSAILLES [1]—VOTES ON RATIFICATION IN THE UNITED STATES SENATE

I. November 19, 1919: Vote on the treaty with 14 reservations:

FOR RATIFICATION

Democrats, 4: Thomas P. Gore, Oklahoma; John K. Shields, Tennessee; Hoke Smith, Georgia; David I. Walsh, Massachusetts.

Republicans, 35: L. Heisler Ball, Delaware; William M. Calder, New York; Arthur Capper, Kansas; LeBaron B. Colt, Rhode Island; Albert B. Cummins, Iowa; Charles Curtis, Kansas; William P. Dillingham, Vermont; Walter E. Edge, New Jersey; Davis Elkins, West Virginia; Joseph S. Frelinghuysen, New Jersey; Frederick Hale, Maine; Warren G. Harding, Ohio; Wesley L. Jones, Washington; Frank B. Kellogg, Minnesota; William S. Kenyon, Iowa; Henry W. Keyes, New Hampshire; Irvine L. Lenroot, Wisconsin; Henry Cabot Lodge, Massachusetts; Porter J. McCumber, North Dakota; George P. McLean, Connecticut; Charles L. McNary, Oregon; Knute Nelson, Minnesota; Harry S. New, Indiana; Truman H. Newberry, Michigan; Carroll S. Page, Vermont; Boies Penrose, Pennsylvania; Lawrence C. Phipps, Colorado; Reed Smoot, Utah; Selden P. Spencer, Missouri; Thomas Sterling, South Dakota; Howard Sutherland, West Virginia; Charles E. Townsend, Michigan; James W. Wadsworth, Jr., New York; Francis E. Warren, Wyoming; James E. Watson, Indiana.

AGAINST RATIFICATION

Democrats, 42: Henry F. Ashurst, Arizona; John H. Bankhead, Alabama; J. C. W. Beckham, Kentucky; George E. Chamberlain, Oregon; Charles A. Culberson, Texas; Nathaniel B. Dial, South Carolina; Duncan U. Fletcher, Florida Edward J. Gay, Louisiana; Peter G. Gerry, Rhode Island; William J. Harris, Georgia; Pat Harrison, Mississippi; Charles B. Henderson, Nevada; Gilbert M. Hitchcock, Nebraska; Edwin S. Johnson, South Dakota; Andrieus A. Jones, New Mexico; John B. Kendrick, Wyoming; William H. King, Utah; William F. Kirby, Arkansas; Kenneth McKellar, Tennessee; Henry L. Myers, Montana; John F. Nugent, Idaho; Lee S. Overman, North Carolina; Robert L. Owen, Oklahoma; James D. Phelan, California; Key Pittman, Nevada; Atlee Pomerene, Ohio; Joseph E. Ransdell, Louisiana; James A. Reed, Missouri; Joseph T. Robinson, Arkansas; Morris Sheppard, Texas; Furnifold M. Simmons, North Carolina; Ellison D. Smith, South Carolina; John Walter Smith, Maryland; Marcus A. Smith, Arizona; A. Owsley Stanley, Kentucky; Claude A. Swanson, Virginia; Charles S. Thomas, Colorado; Park Trammell, Florida; Oscar W. Underwood, Alabama; Thomas J. Walsh, Montana; John Sharp Williams, Mississippi; Josiah O. Wolcott, Delaware.

Republicans, 13: William E. Borah, Idaho; Frank B. Brandegee, Connecticut; Bert M. Fernald, Maine; Joseph I. France, Maryland; Asle J. Gronna, North Dakota; Philander C. Knox, Pennsylvania; Robert M. La Follette, Wisconsin; Medill McCormick, Illinois; George H. Moses, New Hampshire; George W. Norris, Nebraska; Miles Poindexter, Washington; Lawrence Y. Sherman, Illinois; Hiram W. Johnson, California (Republican and Progressive).

NOT VOTING

Democrats, none.

Republicans, 1: Albert B. Fall, New Mexico.

Vacancies, 1.

(CONGRESSIONAL RECORD, vol. 58, pt. 9, p. 8786; Congressional Directory, 66th Cong., 1st sess., July 1919.)

II. November 19, 1919: Vote on the treaty without reservations:

FOR RATIFICATION

Democrats, 37: Henry F. Ashurst, Arizona; John H. Bankhead, Alabama; J. C. W. Beckham, Kentucky; George E. Chamberlain, Oregon; Nathaniel B. Dial, South Carolina; Duncan U. Fletcher, Florida; Edward J. Gay, Louisiana; Peter G. Gerry, Rhode Island; William J. Harris, Georgia; Pat Harrison, Mississippi; Charles B. Henderson, Nevada; Gilbert M. Hitchcock, Nebraska; Edwin S. Johnson, South Dakota; Andrieus A. Jones, New Mexico; William H. King, Utah; William F. Kirby, Arkansas; Kenneth McKellar, Tennessee; Henry L. Myers, Montana; John F. Nugent, Idaho; Lee S. Overman, North Carolina; Robert L. Owen, Oklahoma; James D. Phelan, California; Key Pittman, Nevada; Atlee Pomerene, Ohio; Joseph E. Ransdell, Louisiana; Joseph T. Robinson, Arkansas; Morris Sheppard, Texas; Furnifold M. Simmons, North Carolina; Ellison D. Smith, South Carolina; John Walter Smith, Maryland; Marcus A. Smith, Arizona; A. Owsley Stanley, Kentucky; Claude A. Swanson, Virginia; Oscar W. Underwood, Alabama; Thomas J. Walsh, Montana; John Sharp Williams, Mississippi; Josiah O. Wolcott, Delaware.

Republican, 1: Porter J. McCumber, North Dakota.

AGAINST RATIFICATION

Democrats, 7: Thomas P. Gore, Oklahoma; James A. Reed, Missouri; John K. Shields, Tennessee; Hoke Smith, Georgia; Charles S. Thomas, Colorado; Park Trammell, Florida; David I. Walsh, Massachusetts.

Republicans, 46: L. Heisler Ball, Delaware; William E. Borah, Idaho; Frank B. Brandegee, Connecticut; William M. Calder, New York; Arthur Capper, Kansas; LeBaron B. Colt, Rhode Island; Albert B. Cummins, Iowa; Charles Curtis, Kansas; William P. Dillingham, Vermont; Walter E. Edge, New Jersey; Davis Elkins, West Virginia; Bert M. Fernald, Maine; Joseph I. France, Maryland; Joseph S. Frelinghuysen, New Jersey; Asle J. Gronna, North Dakota; Frederick Hale, Maine; Warren G. Harding, Ohio; Wesley L. Jones, Washington; Frank B. Kellogg, Minnesota; William S. Kenyon, Iowa; Henry W. Keyes, New Hampshire; Philander C. Knox, Pennsylvania; Robert M. LaFollette, Wisconsin;

[1] The Covenant of the League of Nations was included as part of the Treaty of Versailles. In fact, it was to the Covenant that most of the Senate debate on the treaty was directed.

Irvine L. Lenroot, Wisconsin; Henry Cabot Lodge, Massachusetts; Medill McCormick, Illinois; George P. McLean, Connecticut; Charles L. McNary, Oregon; George H. Moses, New Hampshire; Harry S. New, Indiana; Truman H. Newberry, Michigan; George W. Norris, Nebraska; Carroll S. Page, Vermont; Boies Penrose, Pennsylvania; Lawrence C. Phipps, Colorado; Miles Poindexter, Washington; Lawrence Y. Sherman, Illinois; Reed Smoot, Utah; Selden P. Spencer, Missouri; Thomas Sterling, South Dakota; Howard Sutherland, West Virginia; Charles E. Townsend, Michigan; James W. Wadsworth, Jr., New York; Francis E. Warren, Wyoming; James E. Watson, Indiana; Hiram W. Johnson, California (Republican and Progressive).

NOT VOTING

Democrats, 2: Charles A. Culberson, Texas; John B. Kendrick, Wyoming.

Republicans, 2: Albert B. Fall, New Mexico; Knute Nelson, Minnesota.

Vacancy, 1.

(CONGRESSIONAL RECORD, vol. 58, pt. 9, p. 8803; Congressional Directory, 66th Cong., 1st sess., July 1919.)

III. March 19, 1920: Final vote on the treaty with 15 reservations:

FOR RATIFICATION

Democrats, 21: Henry F. Ashurst, Arizona; J. C. W. Beckham, Kentucky; George E. Chamberlain, Oregon; Duncan U. Fletcher, Florida; Thomas P. Gore, Oklahoma; Charles B. Henderson, Nevada; John B. Kendrick, Wyoming; William H. King, Utah; Henry L. Myers, Montana; John F. Nugent, Idaho; Robert L. Owen, Oklahoma; James D. Phelan, California; Key Pittman, Nevada; Atlee Pomerene, Ohio; Joseph E. Ransdell, Louisiana; Hoke Smith, Georgia; John Walter Smith, Maryland; Park Trammell, Florida; David I. Walsh, Massachusetts; Thomas J. Walsh, Montana; Josiah O. Wolcott, Delaware.

Republicans, 28: L. Heisler Ball, Delaware; William M. Calder, New York; Arthur Capper, Kansas; LeBaron B. Colt, Rhode Island; Charles Curtis, Kansas; William P. Dillingham, Vermont; Walter E. Edge, New Jersey; Davis Elkins, West Virginia; Joseph S. Frelinghuysen, New Jersey; Frederick Hale, Maine; Wesley L. Jones, Washington; Frank B. Kellogg, Minnesota; William S. Kenyon, Iowa; Henry W. Keyes, New Hampshire; Irvine L. Lenroot, Wisconsin; Henry Cabot Lodge, Massachusetts; George P. McLean, Connecticut; Charles L. McNary, Oregon; Harry S. New, Indiana; Carroll S. Page, Vermont; Lawrence C. Phipps, Colorado; Reed Smoot, Utah; Selden P. Spencer, Missouri; Thomas Sterling, South Dakota; Howard Sutherland, West Virginia; James W. Wadsworth, Jr., New York; Francis E. Warren, Wyoming; James E. Watson, Indiana.

AGAINST RATIFICATION

Democrats, 23: Braxton B. Comer, Alabama; Charles A. Culberson, Texas; Nathaniel B. Dial, South Carolina; Edward J. Gay, Louisiana; Carter Glass, Virginia; William J. Harris, Georgia; Pat Harrison, Mississippi; Gilbert M. Hitchcock, Nebraska; Edwin S. Johnson, South Dakota; William F. Kirby, Arkansas; Kenneth McKellar, Tennessee; Lee S. Overman, North Carolina; James A. Reed, Missouri; Joseph T. Robinson, Arkansas; Morris Sheppard, Texas; John K. Shields, Tennessee; Furnifold M. Simmons, North Carolina; Ellison D. Smith, South Carolina; A. Owsley Stanley, Kentucky; Claude A. Swanson, Virginia; Charles S. Thomas, Colorado; Oscar W. Underwood, Alabama; John Sharp Williams, Mississippi.

Republicans, 12: William E. Borah, Idaho; Frank B. Brandegee, Connecticut; Bert M. Fernald, Maine; Joseph I. France, Maryland; Asle J. Gronna, North Dakota; Philander C. Knox, Pennsylvania; Robert M. La Follette, Wisconsin; Medill McCormick, Illinois; George H. Moses, New Hampshire; George W. Norris, Nebraska; Lawrence Y. Sherman, Illinois; Hiram W. Johnson, California (Republican and Progressive).

NOT VOTING

Democrats, 3: Peter G. Gerry, Rhode Island; Andrieus A. Jones, New Mexico; Marcus A. Smith, Arizona.

Republicans, 9: Albert B. Cummins, Iowa; Albert B. Fall, New Mexico; Warren G. Harding, Ohio; Porter J. McCumber, North Dakota; Knute Nelson, Minnesota; Truman H. Newberry, Michigan; Boies Penrose, Pennsylvania; Miles Poindexter, Washington; Charles E. Townsend, Michigan.

Vacancies, none.

(CONGRESSIONAL RECORD, vol. 59, pt. 5, p. 4559; Congressional Directory, 66th Cong., 2d sess., May 1920.)

Mr. Speaker, examination of these votes will disclose that on the first call of the roll there were only 39 votes, less than a majority, for ratification with 14 reservations and 55 votes against such ratification.

On the second vote, a vote on ratification without any reservations, there were 38 votes in favor, not a majority, and 53 votes against ratification.

On the final vote a bare majority of the whole Senate favored the treaty with 15 reservations, the vote being 49 votes for ratification and 35 votes opposed. As 84 votes were cast ratification would have required 56 favorable votes and only 28 votes opposed. It is interesting to note that on the final vote the opposition to ratification was composed of 23 Democrats and 12 Republicans.

A Bad Example

EXTENSION OF REMARKS

OF

HON. MICHAEL A. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. FEIGHAN. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include an editorial which appeared in the Cleveland Plain Dealer on May 7, 1945:

A BAD EXAMPLE

A government which for the last 12 years has never ceased to impress upon private employers their obligations to their employees has been guilty of shameful neglect of one of its oldest, most loyal, and hardest-working groups of Government employees.

It is now more than 20 years since the postal workers have had any increase in their basic pay. In those two decades the wages and salaries of most other workers, both public and private, have soared, in most instances keeping pace with, if not pacing, the rise in the cost of living.

Two years ago, while still refusing to face the real issue in this case, Congress did grant the postal workers a temporary annual bonus of $300. This was supposed to make up for the increased living costs and the vast increase in the amount of work performed in the war period. Actually, it did neither. Furthermore, this bonus will die a natural death in June, unless Congress takes further action and the postal workers will be forced to go back to their 1925 wages.

Your mailman, who has done so much to maintain public morale in these dark months, is not asking for a renewal of the bonus. He is asking for the passage of the Burch bill, now pending in Congress, which will grant a permanent increase of $400 a year in the basic pay of the postal workers, reclassify the service for the first time in two decades, provide an incentive for remaining in the service by granting annual increases over a limited term of service, and provide regular time and a half pay for overtime.

Congress should pass this bill as an act of simple justice. The Government should practice what it preaches.

The Dregs of a Nation

EXTENSION OF REMARKS

OF

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. PRICE of Illinois. Mr. Speaker, under leave to extend my remarks in the RECORD, I am including an article written by Mr. Sam Tucker, a Washington newspaper correspondent representing several large Illinois daily newspapers, and which appeared in the East St. Louis (Ill.) Journal on April 26, 1945.

I have been well acquainted with Mr. Tucker for more than 15 years. He is one of the leading journalists in Illinois. In 1933 he broadened his scope of writing experiences by coming to Washington as representative for both the East St. Louis Journal and the Decatur (Ill.) Herald-Review. His work is well known throughout Illinois, and he is considered by thousands of readers as an interesting interpreter of national news.

The following article is particularly typical of Mr. Tucker's accurate interpretation of situations:

THE DREGS OF A NATION

(By Sam Tucker)

WASHINGTON.—Never before in all the long, generally sordid, record of human history has there been any other episode so hideous as that of the Nazi regime in Germany. No other ruling caste has ever murdered so many human beings, inflicted so much torture and suffering.

In comparison, all the Christian martyrs tortured to death in the Roman arena numbered only a few hundreds. If the legend of St. Ursula's 11,000 virgins is true, the sacrifice amounted to less than a week's toll in a single Nazi concentration camp—one among many. The nearest parallel, perhaps, was in the ancient Aztec empire. The Spanish soldiers under Hernando Cortes were not squeamish and not unaccustomed to the sight of death, but their stomachs were turned and they were moved to fury when they saw the blood-crusted temples of the Aztecs.

LACKED SCIENCE

At that, the Aztec ceremonial slaughter was performed by a small group of the priesthood and with hand weapons. They lacked the German scientific equipment, the machine guns and gas chambers. Although they claimed to have sacrificed 10,000 victims on occasion, for the glory of their god, probably they were bragging. Human arms, operating only with stone knives, would have been sooner exhausted.

The murders by the Nazis total millions. Americans have seen the evidence of it only in the last week, and are horrified. It is so nearly unbelievable that Eisenhower has de-

manded witnesses, German witnesses, and American Congressmen. What they will see is nothing new. It is something that was begun the very day Hitler came into power and has been continued every year since. For every corpse found by American troops in Buchtenwald and Belsen, for every act of bestiality committed in these torture camps now opened to world inspection there were several others in Warsaw, in Czechoslovakia, and in Austria.

President Roosevelt knew about this, and so did many other well-informed people. It was one of the reasons for the conclusion, while Americans still clung to the hope of keeping out of war, that the Nazi system and the American system could not both continue to exist in the same world.

A WARNING

The magnitude of the horror is so great that civilized indignation now will be tempted to fall unconsciously into the Nazi error—the theory that human beings can be judged by their race, and that certain races are inherently evil. Upon this theory the German race would have to be held the most barbaric and evil in all human experience. We must avoid the temptation to that easy verdict.

What happened in Germany was that the dregs of the nation, the criminals crawling out of the cellars and sewers, managed to get possession of the Government. After terrorizing their own people they attempted to take possession of the world. There are thousands of Nazi criminals to be dealt with, but they must be dealt with as individuals for personal crimes. To judge them because they picked Germans as parents would be to repeat the Nazi fallacy.

Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. AUGUSTINE B. KELLEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. KELLEY of Pennsylvania. Mr. Speaker, with permission to extend my remarks, I wish to include in the RECORD an editorial which appeared on the 13th day of April in the Washington Post. It gives expression to the thoughts and feelings of millions of people throughout the world in much better fashion than I could do it.

The successful conclusion of the war in Europe brings to our minds the irony that the man who had carried the burden of it so long was not here to witness its conclusion. The time is propitious for us to review his talents, and to reevaluate his stature among the great.

The editorial follows:

MR. ROOSEVELT

All the politics of the moment are stilled by the overwhelming news from Warm Springs. F. D. R. is dead. The flash came over one's desk stark and simple. It recorded the end of the life cycle of a single individual. But, as one looked at it, the three words seemed to grow bigger and bigger, and one groped to clothe them with meaning. The groping will go on for many a day. For the news comes like a bolt from Jove, and the thunder is still echoing and reechoing through the diameter of our planet. The shock is felt with a poignant sense of personal loss by men and women of every race and color. It is as if a presence has been removed from the daily lives of all nations. A minute before the stabbing news came through the ether and over the wires, the busy world had been lost in its work and its wars. Then there was this silence, this solitude, while men everywhere looked at each other bewildered. The sepulcher of this man who has died is, indeed, the whole earth.

At this time the general performance of the President is in all our minds. Franklin Delano Roosevelt has put a stamp upon history which may well be unique in recorded time. Four times elected President of his country, he has a place all his own in our American annals. He dies as his country stands at a dizzy height of puissance. No nation, not even ancient Rome, has ever attained such eminence, and the entire world looks to the United States for guidance in bringing the war in both oceans to a victorious end, and for aid in putting the world in the way of recovery from its awful travail. Franklin D. Roosevelt was the leader of this arbiter of the world's destinies. To many millions of people he personified the United States. The record puts Mr. Roosevelt in the company of the very greatest back to Pericles.

A man who has made such an imprint on the pages of history is never easy to assess. Franklin Delano Roosevelt is no exception. Oliver Wendell Holmes said that a man is this, and not that; but Mr. Roosevelt was this-and-that, and you could find every human quality and trait in his character. Perhaps all great men are unanalyzable, unfathomable. At any rate, there is no biographer of Mr. Roosevelt who has ever been able to sum up the manifold personality of our late President.

"Give me a place to stand!" said Archimedes. One can almost hear Mr. Roosevelt saying, "Give me a place to stand" after he had emancipated himself at 28 from the life of the idle rich which he inherited. It was at that age that he made two discoveries. One was that his career belonged to politics, the other that the object of government is the welfare of the people. He followed these stars unswervingly. They led him to the conviction that he must give to humanity what he was giving in all fullness and with amazing versatility to the United States.

So he grew to the Titan role which he filled at the day of his death. He will be written of in years to come as the war's greatest casualty. For he died in war's service, and to Mrs. Roosevelt in this hour of her grief will go the sympathy of men and women from the farthermost corners of the earth. May it be her consolation that countless hearts are bowed down over her bereavement. She deserves great honor today, for it was she who organized her husband's life for the tasks that she felt, in spite of the affliction which cut him down 20 years ago, were marked out for him by Providence. In death he will reinforce the unity among nations which he strove to achieve in his lifetime.

O. P. A.

EXTENSION OF REMARKS

OF

HON. CHARLES R. ROBERTSON

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. ROBERTSON of North Dakota. Mr. Speaker, every phase of that instrumentality known as the O. P. A., whose job it was to hold the line against inflation, is under bitter attack. Particularly does it face universal disapproval because of the manner in which it has handled food, particularly beef and pork.

The effort of the W. P. B. in M-388, issued in collaboration with O. P. A., which deals specifically with fabrics and has for its purpose the channeling of goods into garments to satisfy the cheaper buyers, is meeting with some difficulty.

I quote here a statement from one of the New York papers, as follows:

Just as the New York fashion designers became resigned to the worst shortage of fabric they've ever known (because such immense quantities of rayon, cotton, and woolen yardage have been sent to France, England, and the rest of Europe on lend-lease), they are visited by French salesmen representing textile firms in Lyons, France, bearing fat sample books of wonderful and varied fabrics all ready for prompt delivery. Who's looney now?

My Choice for American Hero No. 1

EXTENSION OF REMARKS

OF

HON. ALBERT THOMAS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. THOMAS of Texas. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by J. Leslie Witt entitled "My Choice for American Hero No. 1," appearing in the February 2 issue of the War Production Sentinel, a publication of various war plants in Houston. Mr. Witt is connected with the Emsco Derrick & Equipment Co., Houston.

The article is as follows:

MY CHOICE FOR AMERICAN HERO NO. 1

(By J. Leslie Witt)

Webster's definition of a hero is: "A person of distinguished valor in danger, or of fortitude in suffering." I prefer to place the latter interpretation upon the word.

Our front pages are filled with the names of men who by long training and brilliant ability have been able to effect remarkable achievements in the face of emergencies, when they no doubt had no other choice except to do what they did. On a momentary impulse of fanatic patriotism, men have challenged Fate, and heroic deeds have been done that brought glory and renown to the hero. All of this is grand and commendable, and is the background of most of our heroes.

But I think that the real test of true heroism is measured by the spirit that inspires the deed, the courage and fortitude required to perform the deed, and the good that is accomplished by it.

I visualize a mother who sends her son into the service of her country at war. The memory of his warm baby breath upon her breast; the emotions of her long years of tender care throughout his childhood; and the proud realization that now he is a grown man, the reincarnation of her own self, the culmination of her life's dream—all of these memories crowd into her mind and heart as she hears the call for him to go away to war, to privation and suffering, and perhaps to death. And yet, with full knowledge of these consequences, she sends her boy away with a kiss and a smile, leaving all the love in her body pushed up into her throat.

She makes the supreme sacrifice of flesh of her flesh, heart of her heart, and soul of her soul, with no thought of glory for herself, but with the one desire that in years to

come other mothers might be spared the agony of such a sacrifice.

My choice for American hero No. 1 is an American mother of a boy in service.

Address of Fleet Admiral William D. Leahy

EXTENSION OF REMARKS

OF

HON. E. L. BARTLETT

DELEGATE FROM ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. BARTLETT. Mr. Speaker, yesterday, on May 8, the four major radio networks of this country presented, among many other outstanding features, special remarks addressed to the Nation and the armed forces overseas by the chiefs of the armed services, headed by Fleet Admiral William D. Leahy, the senior military officer of the United States on active duty. The address by Admiral Leahy, who is chief of staff to the Commander in Chief of the Army and Navy, was a summary of what we are all thinking and feeling today. Coming from a leader who has served with supreme distinction in both military and civilian capacities—as Governor of Puerto Rico and Ambassador to France—and from one whose views on the war have been heard only rarely, it will be of especial interest to the entire country.

Incidentally, in my humble judgment, Fleet Admiral Leahy is not often enough given the exalted credit due him for his brilliant but modest chairmanship of the Joint Chiefs of Staff, the Supreme High Command of the United States armed forces.

Admiral Leahy's address follows:

We cannot help being overawed by the great event in which we share today. We have seen now all but the final act of the stupendous drama of the past decade. That decade witnessed an attempt by the remorseless forces of barbarism to overrun and enslave the peace-loving peoples of the earth. The attempt almost succeeded, but finally it has failed. We record today the unconditional surrender of the barbarians of the west.

Our ability to comprehend this in its true proportions is small. We can feel but we cannot yet understand. The perspective of time is needed to evaluate it in its full grandeur. Roughly we know what has happened. The giant of German militarism, arrayed in revolutionary armor, arrogant in its power and contemptuous of the values of civilization and democracy, lies destroyed before us. We and our allies have destroyed it. Millions of our men and women, although hating war, found the strength and skill to wage war more successfully than those brutal belligerents who worshipped war. In the vast Atlantic theater, we are now unconditionally victorious, and we move on, with all our might and power, to confront the still strong but already doomed enemy in the Pacific.

In this historic struggle, in which every nation on the earth was involved in some degree, the United States has played a major role. Each Allied nation has lent itself, without stint or measure, to the common struggle and the final victory. Never in the world's military history has there been such a successful demonstration of coalition war. The list of heroic achievements of our allies is long. For our part, we may recognize the eminent achievements of our own arms and of our own Nation. Our armies, our naval fleets, and air forces have dealt crushing and fatal blows to the enemy in Europe, while at the same time hammering their way across the Pacific to the gates of Japan. While we mobilized, we sustained our allies with food and the materials of war, and continued to supply them, even while our vast forces struck and struck again at the enemy.

But it is certain that the one circumstance without which victory would have been impossible was the combined strength of the Allied coalition. In that Allied unity we take our greatest pride. Without that unity, without the coalition of all our forces, our Nation today would stand in dreadful peril.

Today it is fitting that we pay reverent tribute to the master architect of that unity, as he was also the master architect of our own military accomplishments, our late beloved Commander in Chief, Franklin D. Roosevelt.

That great spirit understood the world's peril long before it took the open form of war. He prepared his Nation for it, within the limits of feasibility, and early threw our moral and material weight into the scales. At that moment, the forces of aggression were doomed, even while they were winning victories. When the Axis Powers in their anguish for conquest, threw caution to the winds and launched what they thought would be the final assault, our brave Commander in Chief addressed words of courage to the Congress—words which emboldened and refreshed all the world's forces of resistance—"With confidence in our armed forces, with the unbounded determination of our people, we will gain the inevitable triumph, so help us God." That brave pledge is now fulfilled in part. With victory over Japan, it will be wholly accomplished.

I may say today that President Roosevelt's wisdom and amazing grasp of world geography and military capacities played an all-important part in leading the forces of the coalition, and our own, to victory. We who were privileged to serve under him in high staff and command posts, today salute this brave soldier who fell in battle, in the same sense that we salute those millions of others, of our own and of other lands, who died that this Nation, and its neighbors across the seas might fulfill their destinies in peace, freedom, and friendship.

The millions of men in the ranks who fought this war have earned our undying gratitude. Their deeds speak for themselves much better than I can speak for them. We are proud as well as grateful for their sacrifices, their endurance under unspeakable conditions, their courage and their valourous maintenance of all the highest traditions of this Nation. And for those who died, there are no words at all. We grieve for them, and in our sorrow we are more firmly resolved to achieve in full the purposes for which they died.

Victory in this war was won, not by navies and armies alone. The war has been waged and won by entire peoples. We must acknowledge in our own land the contribution of those millions at home who converted our factories, farms, and workshops into an arsenal of unprecedented productivity. From that arsenal we supplied our own forces and those of our allies. Labor and management share fully in today's victory.

For the military waging of this war, it became necessary to provide an effective coordination of the various arms and branches of the services. For amphibious warfare, and for coordinated air, sea, and land attacks on many far-flung fronts it was imperative to bring about an intimate association of the forces of the Army, of the Navy, and of the air. This was achieved not without difficulty, but it was achieved. Today on the fighting fronts, there is no distinction, except in function, among the personnel of the different services. Operational command has been unified. There has been a complete alliance of our own arms, and for this, high credit is due to my three colleagues of the Joint Chiefs of Staff—Gen. George C. Marshall, Admiral Ernest J. King, and Gen. Henry H. Arnold.

Now, with the hosts of evil and barbarism vanquished in Europe, we must turn our full attention to the Far East. There we still have a powerful enemy, who boasts that he is willing and ready to fight on for 100 years if necessary. We assure him it will not take that long. Still he has powerful legions of troops in his home islands and on the coast of China, perhaps 7,000,000 of them. Although the vast circumference of his Empire has been shrunk by our assaults, his naval power destroyed, and his air forces crippled, we have a long road to travel before victory.

Japan must be beaten into defeat, into unconditional surrender. The reconquest of the Philippines was a step in that direction. The remaining steps must and will be taken. We have no intention of relaxing until the eastern barbarian share the fate of his partner. We have not forgotten Pearl Harbor. We know that the American people, with equal devotion and sacrifice, will support their sons and brothers, who will be fighting our savage enemies in the far Pacific until the final victory is won.

Increase of Salaries of Postal Employees

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I wish to include the following resolution adopted by the Senate and House of Representatives of the Commonwealth of Massachusetts, urging the immediate adoption of a plan to increase the salaries of postal carriers and clerks of Massachusetts in particular, and the Nation in general:

Resolution that Congress be memorialized in favor of the immediate adoption of the plan to increase the salaries of postal carriers and clerks of Massachusetts in particular and the Nation in general

Resolved, That the General Court of Massachusetts, foremost in the enacting of legislation beneficial to working and living conditions of its citizens, and anxious to start a parade of States petitioning Congress to take immediate action in rectifying the substandard working conditions and wages of the postal clerks and postal carriers, hereby urges the Congress of the United States to adopt the plan of the National Postal Employees Association and provide funds necessary in carrying out this great humanitarian piece of legislation; and be it further

Resolved, That copies of these resolutions be sent forthwith by the State secretary to the President of the United States, to the presiding officer of each branch of Congress,

and to the Members thereof from this Commonwealth.

In house of representatives, adopted April 26, 1945.

LAWRENCE R. GROVE,
Clerk.

In senate, adopted, in concurrence, May 2, 1945.

IRVING N. HAYDEN,
Clerk.

A true copy. Attest:
[SEAL] F. W. COOK,
Secretary of the Commonwealth.

There Is Some Sense to It

EXTENSION OF REMARKS
OF
HON. CLARE E. HOFFMAN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 9, 1945

Mr. HOFFMAN. Mr. Speaker, from the Washington Post of this morning comes the following editorial, the first three paragraphs of which contain some constructive thought:

NOW JAPAN

The impact on Japan of the unconditional surrender of Germany will be considerable. In following up the blow, political warfare should now be employed to the fullest extent. Specifically, Japan should be told her fate immediately so that she may be encouraged to throw in the sponge. Up till now all she knows is what she hears from such fire-eaters as Admiral Halsey and Mr. McNutt. The extermination ideas of men like these two have doubtless been spread through Japan by the Japanese themselves in order to ginger up a last-ditch fight. Better to die fighting than surrender to be destroyed.

What we are suggesting, to be sure, is conditional surrender. What of it? Unconditional surrender was never an ideal formula. It was absolutely essential in the case of Germany because unconditional surrender was the only common denominator of inter-Allied agreement. Even now we have many points of difference with the Russians on the occupation of Germany. How, then, could you ever have got agreement on inter-Allied terms on conditional surrender from Germany while the war was going on?

No such problem among the Allies is involved in the case of Japan. The war in the Pacific is an Anglo-American affair, with the Americans doing the lion's share. It would not be difficult to get agreement on terms for Japan; in fact, agreement could be got overnight, so that the Japanese could be told without delay.

We urge, therefore, that the task of compiling the terms for Japan and informing the Japanese of them should not be delayed. Already both Britain and America must have an understanding that Japan should be pared down to its volcanic core. But, of course, it is not enough to say that. We must expand upon the Cairo agreement, which is the nucleus of peace with Japan, and spell out what we require of Japan as the condition of surrender.

The Cairo agreement would return Japan to the condition prior to 1895; that is to say, before Japan launched war on China and took Formosa as a prize. This means that Japan would be pretty well stripped of her conquests. Beyond that, there must be more demands before we can be satisfied that the possibility of a resurgent militarism in Japan has been ended. It is not a hard peace that we are interested in. It is an effective peace. In our view this means a Japan where, at the end of the road, we shall not find utter chaos, as we are finding in Germany, but a going concern with a native administration still in operation within Japan.

VE-Day

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 9, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I wish to include the following very excellent editorial on VE-day which appeared in the May 8, 1945, issue of the Boston (Mass.) Daily Record:

VE-DAY

VE-day, the long-awaited capitulation and unconditional surrender of the Axis in Europe, has come at last.

We are tempted to rejoice and release our pent-up emotions in the traditional manner of war-weary people.

But we cannot.

The victory has been too costly in the blood of our loved ones, too dissipative of the progress of the past, too destructive of the hopes and promises of the future.

We are glad for the lives that have been spared by the cessation of hostilities in and about Germany.

But we cannot forget the lives that have been lost.

Nor can we lose sight of the grim truth that the war is not over for us.

We still must meet and defeat Japan.

We still must overcome and overwhelm the worst menace to our western civilization.

What has really happened in consequence of the collapse of Germany and the extinction of the Nazi tyranny is that we are finally enabled to turn our whole attention as a nation and as individuals to our war.

The battles of Europe had to be fought and won.

But no American fails to remember how we got into that conflict.

Whatever the Germans or the Italians might eventually have done to compel us to go to war with them, it was the Japanese who stabbed us in the back at Pearl Harbor.

It was the Japanese who shattered our peace on that December morning nearly 4 years ago, and despoiled our soil and desecrated our flag.

Because we had to fight Germany and Italy, too, we could not fight back at the Japanese effectively.

In fact, we very nearly lost the war with Japan as a result of our electing to fight and crush the Germans and the Italians first.

The decision was a dangerous gamble, as military authorities knew and acknowledged.

Fortunately, it succeeded.

But, in the meantime, the Japanese had swiftly overrun the Pacific basin and had conquered the Philippines and Guam and Wake Island, and were strongly based in the Aleutians, and were only barely stopped at the shores of Australia.

Slowly and painfully and bloodily we pushed the Japanese out of the advanced parts of their stolen empire.

Finally we drove them out of the Philippines and Guam and the Aleutians.

And now we are steadily reducing the inner fortress of Japan itself.

But all this we have done—and have been forced to do—with what could be spared from the bitter conflict in Europe.

As long as such a situation prevailed we could not hope utterly to defeat and destroy Japan.

Which is what we can and will and must do now.

And until it is done our war is not over.

Our American boys are not coming home in great numbers until it is done.

They are going on fighting and dying until it is done.

This is a triumphant day and a memorable day. But it is also a stern and solemn day.

Only a part of our job is done.

The biggest, hardest, worst part still remains.

Japan is the enemy of all the world and particularly the enemy of the United States now more than ever.

Only the United States stood between Japan and her master plan for conquest.

Only the United States possesses the determination and the strength and the weapons completely to subdue her.

Let us therefore get on with the bitter struggle against Japan.

Let us put all our resources and energy into it and win it.

Then, and then only, will America "end the war victoriously, make the peace permanently, and bring our boys home promptly," which are the things for which we are fighting.

There Is Still Japan

EXTENSION OF REMARKS
OF
HON. HUGH DE LACY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 9, 1945

Mr. DE LACY. Mr. Speaker, as I have said repeatedly on this floor, the war workers of this Nation have no equal in their devotion to victory. Even as the historic announcement of VE-day yesterday was in the making, the men and women who build the giant B–29 Superfortresses in Seattle were seriously thinking of the meaning of that day to them.

In this connection, Mr. Speaker, I am pleased to include with my remarks an editorial from the April 26, 1945, edition of the Aero Mechanic. This is the official newspaper of the Aero Mechanics Lodge 751 of the International Association of Machinists, A. F. of L., representing every worker of Boeing, builders of bombers.

The editorial, written by Richard H. Powell, executive vice president of the union, expresses the determination of these workers to continue at their benches and beside their machines until VE-day has become final victory day. His eloquent message follows:

With General Patton's tanks thundering up the hills of Hitler's Berchtesgaden hideout, and Russian troops fighting through the ruins of Berlin, the German conflict might end momentarily.

But that does not mean the war will be over.

The yellow hordes of Japanese military might must be snuffed out for all time. The Pacific war is still far from victory, and all

of our efforts, and all of our thoughts must be concentrated on smothering Japan effectively and decisively.

As Aero Mechanic members, we have been building the main weapon for assault against Japan—the mighty B–29 Superfortress. Termination of hostilities in Europe should not be a cause or reason for us to celebrate; rather, it should be an added incentive for all of us to renew our determination to stay on the job and get our phase of this nightmarish war over as quickly as possible.

There have been fears expressed by government officials that war workers will rush from their workbenches and production machine when word is flashed in war plants that Hitler's regime has been crushed. I do not believe that Aero Mechanic members will do this.

Our members are extremely aware of the important part they have in prosecution of the Pacific war. Nearly all of our members have a relative, a close member of their family and of their heart, in the armed forces, and many of these fighting GI's are aiming their guns at the heart of Nippon. It is for them that we must stay on the job, and for ourselves and the millions of other peace-loving persons of the world who are determined to stamp out aggression.

Excellent Article by John Griffin, of Boston Sunday Post

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I wish to include the following article by Mr. John Griffin which appeared in the May 6, 1945, issue of the Boston (Mass.) Sunday Post:

AIR POWER WAS RESPONSIBLE IN LARGE MEASURE FOR ALLIED VICTORY OVER NAZI ARMIES—VON RUNDSTEDT VERSION OF DEFEAT GIVES EMPHASIS TO CLAIMS OF THOSE WHO INSISTED ON VALUE OF BOMBING

(By John Griffin)

A couple of years ago there was a great dispute as to the value of air power in the present war. The advocates of air power insisted that their branch would win the war, and the generals on the ground scorned the idea. The latter believed that the Infantry only could win the war because only the infantry could take enemy territory and hold it.

The argument was rather futile, for it was obvious even then that the war could only be won by the best use of all branches of the service. One could not win without the other, but the argument will probably go on forever.

The airmen now have their chance to crow as a result of the remarkable summary made by the German Field Marshal von Rundstedt, as reported in an interview with Associated Press writer Louis P. Lochner.

THE PRIME FACTOR

Marshal von Rundstedt, explaining the defeat of the German armies, said that air power was the prime factor, and what he said coincided with the claims made by Allied airmen long ago. They held that Germany's industrial potential could be destroyed by air power, and that her communications could be ruined.

That is just what Von Rundstedt said after he had been taken, and his statements appeared to reflect the considered judgment of the military man speaking of military things as a scientific problem.

Bridges had been destroyed by allied air power, railroads ruined, and it was impossible during the critical periods for the Germans to move any of their men and equipment by day. Bombardments of industrial plants and oil centers made it difficult, if not impossible, for the panzer divisions to function properly.

This was of the greatest importance at the time of the German counter offensive in Belgium last winter. Marshal von Rundstedt said that he thought he had a chance at that time of holding in the west, but all his reinforcements had to be brought up on foot because aerial bombardment had destroyed the mobolity of the mechanized groups.

At the same time General Patton and other American generals had full opportunity of moving around rapidly on wheels and could get to the critical points in plenty of time to put an end to the German advances.

OVERWHELMING EXCELLENCE

"The unheard of superiority of your air forces," Von Rundstedt said, was the really important factor in the allied victory. This made daytime movement impossible. Second in importance was the lack of motor fuel for the panzer divisions, which can also be traced to allied air offensive. Third was the systematic destruction of all railway communications, also a result of air bombardment.

Thus comes early corroboration of the claims of the airman, made 3 years ago, and incorporated by the Allied general staff, that Germany could be beaten down from the air.

That didn't mean, as many people believed it did, that surrender could be forced upon the Germans simply by aerial bombardments and without an invasion by land armies. It meant that full and efficient use of air power would make the Germans relatively soft for invading forces.

The German armies were composed of professionals, generals who have been planning for many years and soldiers who had been well trained, who had in fact been brought up from childhood with the idea that they would make war for Germany.

They were not soft pickings, by any means, for the Allied armies that did land on the continent. But they were at full efficiency at no time after the landing in Normandy, because the Allied air power had robbed them of their strength and had deprived them of the necessary equipment.

VALUABLE RAIDS

Remember the air raid on Schweinfurt that cost the lives of many American airmen? These men were told at the time that if their raid was successful, the war would be shortened by several months. Apparently that statement was correct, and those gallant fliers did not die in vain.

For that great raid, one of the outstanding exploits of the war, cut down the production of vital materials for the German air force. The all-important items needed by the luftwaffe were not forthcoming, and the German air arm was rendered almost helpless.

And the big raids on the Ploesti oil fields, raids in which American Flying Fortresses dropped their bombs from only several hundred feet and had to fly directly into a rain of antiaircraft shells? What about those?

Well, Von Rundstedt offers as one of the chief reasons for Germany's defeat the loss of materials from Rumania. This was one of the greatest oil-producing areas the Nazis had, and when it was badly damaged, Nazi panzer outfits hundreds of miles to the west came to a halt.

When they halted, and when the luftwaffe was grounded through lack of equipment and fuel, and when the bridges went down under Allied bombs and the railroads were helpless, the great Allied armies landed in Normandy as the first step on the road to the heart of Germany.

TRIBUTE TO GENERALS

It was through the eyes of a man in the position of Von Rundstedt that Americans may gain an even more impressive idea of the wonderful work their armies and air fleets and navy have done. Von Rundstedt speaks of the terrible bombardment of the American and British Navies at the time of Normandy, which indicates the great cooperation between all the Allied branches.

And then, finally, the German marshal talks about American generals, and he is "amazed." He can hardly understand how we could have so many able military leaders. "It is terrific," he said. "Your mobility, your ability to detect and exploit the enemy weaknesses is as modern as were our operations in France in 1940."

One wonders if men like Von Rundstedt will ever realize what suckers they are to pick a fight with the United States and to fight a war of mechanized might. That is our strength, as Germany has learned, and Japan is learning.

One wonders if they will ever get a true appreciation of the fighting qualities of a free people who will fight with more determination and more spirit for the very fact that they are free.

Our success and our ability, as testified to by Von Rundstedt, ought to be a great example to the peoples of the world who are still oppressed, who still long for freedom, and also to those nations who think that only dictatorships can produce great spirit.

The War in the Pacific Is Not Over

EXTENSION OF REMARKS

OF

HON. CLARE E. HOFFMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. HOFFMAN. Mr. Speaker, from the morning press comes the following:

THERE'S A WAR OFF, BUT NOT ON OKINAWA

(The following dispatch, by Gordon Cobbledick, war correspondent for the Cleveland Plain Dealer, tells of Okinawa on VE-day.)

OKINAWA, May 8 (via Navy radio).—We stood in the rain this morning and heard the voice from San Francisco, only half believing. There had been so many false reports. But this seemed to be the McCoy.

"Confirmed by General Eisenhower's headquarters," the voice was saying. "Prime Minister Churchill proclaimed May 8 as VE-day."

Artillery thundered and the planes roared low overhead and we couldn't hear all that the voice was saying:

"President Truman—Marshal Stalin announced—the Canadian government at Ottawa — unauthorized announcement—American new agency—"

So this was VE-day. It was VE-day in the United States and Great Britain and Russia but on Okinawa the ambulances skidded through the sticky red mud and bounced over rutted rocky coral roads. Some of the men who rode them gritted their teeth behind bloodless lips and let no cry escape them. Some stared into space through eyes that were dull with the look of men to whom nothing mattered greatly. Some screamed with pain that the morphine couldn't still. And some lay very quiet under ponchos that covered their faces.

It was VE-day all over the world but on Okinawa. Two doughboys lay flat behind a jagged rock and one said, "I know where the bastard is and I'm going to get him."

He raised his head and looked and then he stood, half crouched, and brought his Garand into position.

When he tumbled backward the rifle clattered on the rocks. The boy looked up and smiled sheepishly and said, "I hurt my arm when I fell," and the blood gushed from his mouth and ran in a quick torrent over the stubble of beard on his young face, and he was dead.

It was VE-day at home, but on Okinawa men shivered in fox holes half filled with water and waited for the command to move forward across the little green valley that was raked from both ends by machine gun fire.

It was VE-day, but on Okinawa a staff officer sat looking dully at the damp earthen floor of his tent. A young lieutenant, his green field uniform plastered with mud, stood awkwardly beside him.

"I was with him, sir," the lieutenant said. "It was a machine-gun bullet, sir. He never knew what hit him." He paused. "He was a good marine, sir."

The staff officer said, "He was the only son we had."

It may be you had a son in the war.

Wisconsin Soldiers, Sailors, and Marines Establish Enviable Record

EXTENSION OF REMARKS

OF

HON. LAWRENCE H. SMITH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 8, 1945

Mr. SMITH of Wisconsin. Mr. Speaker, with great pride, I call attention to the enviable record made in this war, thus far, by the fighting men of Wisconsin. True to the traditions established by the famous Iron Brigade in the Civil War, and the Thirty-second Division in the last war, our sons and daughters are carrying on to final victory over Japan.

Mr. Speaker, as part of my remarks, I insert herein an article that appeared in the Milwaukee Journal on this subject:

WISCONSIN NAMES HIGH ON HONOR ROLL OF HEROES—STATE HAS SENT MAN TO EVERY THEATER OF WAR; SOME HAVE RECEIVED HIGH DECORATIONS

From the moment the first explosives dropped from the sun-bathed Hawaiian skies upon the runways of Hickam Field and the nearby naval installations of Pearl Harbor, Wisconsin men and women in uniform have added new luster to the State's military record.

Wisconsin soldiers, sailors, marines, and coast guardmen—some 300,000 of them—have fought in the jungles of New Guinea and Burma, among the hedge rows of Normandy, on Tarawa, in Italy. They have flown tons of destruction against the enemy and sailed the world's oceans with Allied supplies.

Some Wisconsin heroes have been awarded the Nation's highest military honors; others, unnamed and unsung, have uncomplainingly endured the fox holes and hardships and braved death a thousand times.

There were Wisconsin men on Wake, in the Philippines, in Iceland, and other far-off bases on December 7, 1941. The Wisconsin National Guard was on maneuvers in Louisiana; it had been reactivated as the Thirty-second Division of World War No. 1 fame and soon sailed to the South Pacific against the Japanese.

RUSH OF VOLUNTEERS

When the word came that we were at war, thousands of young men and many young women rushed to the recruiting stations, and the draft machinery set up a year before hurried new men day after day to the Milwaukee induction station. In some of those earlier months, Wisconsin enlistments topped the Nation, on a per capita basis.

Casualty reports trickled in at first, a few from Pearl Harbor, a few from the Philippines. Then came the Buna-Gona campaign, with the Thirty-second Division spearheading our first offensive against the enemy, and the lists of the killed, wounded, missing, and prisoners were more frequent.

At times, some Wisconsin communities were harder hit than others as the news was received that units drawn from certain cities or villages were bearing the brunt of front-line fighting.

JANESVILLE MEN FIRST

The first American killed in the Japanese attack on the Philippines was Ensign Robert G. Tills, of Manitowoc, pilot of a PBY bomber in the famous Patwing 10. He was killed when his plane was sunk in the Gulf of Davao by Jap dive bombers. A Navy escort ship has been named in his honor.

At the very outset of the war, a Janesville tank company which had been detached from the Thiry-second Division and sent to the Philippines was plunged into action. There were 106 Janesville men in the company, which played a heroic role in the defense of the Bataan peninsula. Some will never return to their Janesville homes, while the rest have been prisoners of the Japanese for almost 3 long years.

And there is no more heroic Wisconsin chapter in the war than that written by Company K from Milwaukee's south side in the jungles of New Guinea. This unit, composed almost entirely of men of Polish ancestry, battled the Japanese under almost incredible conditions for days until, when these men from the south side were taken out of the front lines, there were scarcely a dozen able to walk.

New names were added to the list of the State's military heroes from the very outset of the war.

Capt. Franklin Van Valkenburgh, of Milwaukee, was officially named by the late Secretary of the Navy Knox as "the outstanding hero at Pearl Harbor." Commander of the *Arizona*, Captain Van Valkenburgh was fatally wounded but refused to be carried to safety and directed the fire of the doomed battleship. He was posthumously awarded the Nation's highest honor, the Congressional Medal of Honor, and a destroyer now bears his name.

CITY CLAIMS MAC ARTHUR

Gen. Douglas MacArthur, whose name became known to every American for his defense of the Philippines and later as commander in chief of all land forces in the Pacific, is a Milwaukeean. Under his planning and leadership American forces first stopped the Australia-bound Japs and then carried the battle to the enemy.

In the Philippines was Joseph Bangust, son of Mrs. Betty Ann Massouras, 922 W. Clybourn Street, who died a hero's death with the Navy's famous *Patwing 10*. Bangust, a waist gunner on a plane, was seriously wounded but continued to fire upon Japanese Zero fighters until enemy bullets killed him at his post.

Maj. Jack L. Jerstad, of Racine, and Capt. Cassin Young, of Milwaukee, were both awarded the Congressional Medal of Honor. Jerstad helped lay the plans for the first low-level bombing attack on Rumania's Ploesti oil fields and then volunteered to lead the way. He never returned. Captain Young, commander of the famous cruiser *San Francisco*, was killed in a furious night naval battle in the Solomon Islands.

Other Congressional Medal of Honor winners were Sgt. Elmer J. Burr, of Menasha, and Sgt. Kenneth E. Gruennert, of Helenville, who both died on Christmas Eve, 1942, near Buna in New Guinea. Sergeant Burr smothered a hand grenade with his body, saving the lives of his commanding officer and other soldiers, and Sergeant Gruennert in daring fashion led an attack on two Jap pillboxes.

The list of Wisconsin winners of the Congressional Medal also included General MacArthur himself; Corp. Eric G. Gibson, Rice Lake; Lt. Beryl R. Newman, Baraboo; Maj. Richard I. Bong, Poplar; Sgt. Truman C. Olson, Cambridge; and S. Sgt. Gerald L. Endl, Janesville.

Major Bong was the first American ace to break Capt. Eddie Rickenbacker's World War No. 1 record of 26 enemy planes shot down in combat. His total finally reached 40 Jap planes knocked down in the Southwest Pacific. He was then reassigned to duty in the United States.

The first enlisted man to win the Distinguished Service Cross in the north Africa campaign was a Milwaukeean—Corp. Sanford (Sandy) Forbes, son of Mr. and Mrs. Raymond Forbes, of 205 North Thirty-fourth Street. Corporal Forbes was later killed.

Other Wisconsin men who have distinguished themselves in the war include Vice Admiral Marc A. Mitscher, of Hillsboro, under whose leadership Task Force 58 scourged the Japanese throughout the far reaches of the Pacific; T. Sgt. Robert L. Holliday, of Milwaukee, and Lt. Comdr. Louis J. (Bullet Lou) Kirn, of Milwaukee, both veterans of air combat, and Lt. Willis A. Carpenter, of Milwaukee, who died storming the beaches of Tarawa.

Many other Milwaukee and Wisconsin names appeared from day to day in stories detailing the exploits of our men in the front lines and in the less heroic but equally important supply jobs behind the lines.

And then that host again of unnamed heroes—the foot sloughing doughboys who took the best that the Germans and Japs could offer and then punched back with devastating effect; the intrepid paratroopers, the sailors who braved the elements and enemy action, the merchant seamen, and the airmen, the tank crews, and the artillerymen, the WAVES, the WAC's, the women marines, and the SPARS.

Fighting men and women, every last one of them.

Expedite Payment of Claims by Veterans' Administration

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD, I wish to include the following resolution adopted by the Senate and House of Representatives of the Commonwealth of Massachusetts, urging that the necessary steps be taken

to expedite payment of compensation claims by the Veterans' Administration:

Resolutions memorializing Congress to provide for expediting the payment of claims by the Veterans' Administration

Whereas great inconvenience, and in some cases severe hardship, is being caused by the unreasonable delay in the payment by the Veterans' Administration of claims for compensation, particularly the claims of the dependents of those who had died while serving in the armed forces and the claims of disabled veterans; and

Whereas persons entitled to such compensation are in many instances deprived of their sole means of subsistence and are forced to rely upon public welfare assistance for their support; and

Whereas immediate action should be taken to remedy the deplorable condition to which persons entitled to the benefits above-mentioned are unjustly and unfairly subjected: Therefore be it

Resolved, That the General Court of Massachusetts hereby respectfully urges the Congress of the United States to immediately take such action as may be necessary in order to expedite the payment of compensation claims by the Veterans' Administration; and be it further

Resolved, That copies of these resolutions be forthwith transmitted by the State secretary to the President of the United States, to the Administrator of Veterans' Affairs, to the presiding officer of each branch of Congress, and to the Members thereof from this Commonwealth.

In house of representatives, adopted, April 26, 1945.

LAWRENCE R. GROVE, *Clerk*.

In senate, adopted, in concurrence, May 2, 1945.

IRVING N. HAYDEN, *Clerk*.

A true copy. Attest:

[SEAL] F. W. COX,

Secretary of the Commonwealth.

Equal Rights Amendment

EXTENSION OF REMARKS

OF

HON. FRANCES P. BOLTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mrs. BOLTON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following articles from the Cleveland (Ohio) News and an article from the National Women's Trade Union League of America:

SATURDAY TOWN MEETING—EQUAL RIGHTS FOR WOMEN?

(By Grace B. Doering, member, legislative committee, Business and Professional Women's Club)

Will Rogers said, "We're all ignorant, only on different subjects." Don't women have equal rights with men now that they have the right to vote? No; that is the only right which is guaranteed to them under the Constitution of the United States. Amazing?

Aren't women guaranteed the equal protection of the law (meaning the protection of equal laws) under the fourteenth amendment, because it forbids States to discriminate against citizens and persons? No; women are not really "persons," "citizens," or "people." Following a principle laid down in its early decisions, the United States Supreme Court (*Smith* v. *Alabama* (124 U. S. 465)) has so interpreted such provisions that women are guaranteed under the Constitution only such rights as the English women enjoyed in 1789 because "its provisions are framed in the language of the English common law."

Those rights are described by Blackstone in his Commentaries (1765). A married woman could not contract for the spending of her own money, even though it had been given to her by her own parents or earned by her own labor. She owned no personal property, not even the clothes she wore, nor the jewels her husband gave her. She could not sue in the courts for injury to her person. She could not make a will. Her husband could chastise her or restrain her of her liberty. In short, she was her husband's lovely slave, dependent upon his whims, without appeal to any court—and penniless. She could, however, be punished for her crimes.

STATE LEGISLATION IS INADEQUATE

Why don't the women, with their vote since 1920, get these discriminating laws removed? It is a slow process. Only about 150 have been eliminated in those 25 years. It would take 150 years at that rate. Moreover, what one legislature rights, the next can undo, unless there is one supreme law of the land. Had "sex" been included along with "race, etc.," in the fifteenth amendment adopted after the Civil War, American women would have been granted 50 years sooner the right to vote which came with World War No. 1.

The movement for the freedom of women is a serious one. It is gathering momentum with the passion for democracy which is sweeping the world. Women are overcoming personal whims and past stands and are uniting in an effort to obtain passage of the equal-rights amendment now, while they work at forge and under battle fire for freedom for others. It is indorsed by 31 national women's organizations with a membership running into millions. Governors of at least 25 States have approved wholeheartedly. Mary Pickford, Pearl Buck, Gladys Swarthout, Katharine Hepburn, presidents of universities both women and men economists, historians—the list of active supporters grows hourly.

ALIMONY WORKS BOTH WAYS

The opposition worries, too, that the "age of consent" would have to be made the same for man and woman. We have done that in Ohio without detriment. Each State would set its own age.

Husbands and wives would be treated equally with respect to their responsibilities for the support of the other spouse and children. Already in 13 States either husband or wife may be allowed alimony at the discretion of the court.

And what of the mothers' pension? Social security laws call it aid to dependent children; and the children of a widower, as well as those of a widow, or orphans, are benefited. And maternity legislation? Such laws apply to a limited number of women over a short period of time and are no more discriminatory than medical care for war veterans. All men are not veterans.

Protection against long hours never did apply to mother and houseworkers; nor does protection against night work apply to nurses, war workers, and office cleaners. The first of such discriminatory laws (1836) was recommended partly because women were a competitive menace to men. Here in Cleveland it has been discovered that such laws protect the woman against the better job, and in times of scarce employment, against any job. She is protected from working the extra hour or hours required of an executive and protected from time-and-a-half pay for emergency rush jobs.

DEMOCRACY MEANS EQUALITY

Once (in 1923), *Adkins* v. *Children's Hospital* (261 U. S. 525) our United States Supreme Court said, "We cannot accept the doctrine that women of mature age, sui juris, require or may be subjected to restrictions upon their liberty of contract which could not lawfully be imposed in the case of men under similar circumstances," but the next year (1924) the old doctrine was reverted to. The Justices, too, could change their minds; there was no equal-rights amendment.

And what is meant by rights under the law? The word "right" is used frequently in the first 10 amendments, commonly known as the Bill of Rights. It has a distinct meaning to all liberty-loving Americans.

The principle that equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex is vital. It is a matter of natural justice and equity which should require no argument for its approval. America cannot honestly be a vigorous democracy while full equality is withheld from one-half of its citizens.

(By Mrs. Charles Bang, president, Ohio League of Women Voters)

"Certainly I believe in equal rights for women," you say. But wait a minute. Let's look a little closer at the fancy label of this package which is being so temptingly offered to American women. The advertising slogans sound wonderful—but do they really mean what they say?

The League of Women Voters believes that "equality of rights" are mischievous words to put into the Constitution because they are abstractions. Do they refer to both rights and duties? What does "equal" mean? Each of us may have a very clear idea of what we mean by "equal" and "rights," but our concept is probably not a legal one.

Once a part of the Constitution, these vague words become the law of the land, likely to cause infinite trouble for years to come. Not only are these words more vague than any now in the Constitution, but they cover a greater variety of fields of law.

All laws treating men and women differently would be in question until, through endless litigation, the Supreme Court had finally arrived at the interpretation of what "equal rights" or "equality of rights" under the law means.

The amendment would not substitute new legislation for the laws that are now in force. The State legislatures would have to do this, just as they are free to do now and are doing. This is recognized in some literature prepared by the Woman's Party which points out that under the amendment 5 years is given to the States after the final adoption of the amendment to make their laws conform to it.

LAWS ARE SUBJECT TO CHALLENGE

The trouble is that even after the States changed their laws each new one would be subject to challenge in the court until meaning has been given to the amendment through court decision.

Granted that we want to remove any discrimination against women that remains in the laws of the various States and that we want women to have equality of opportunity, the argument is not over the objective but over the method.

Will the so-called equal-rights amendment eliminate all discrimination which handicaps women in industry, the professions, in civil life? Definitely not. These discriminations (not getting equal pay for equal work, lack of opportunity in certain professions, difficulties married women have had in getting jobs) are not legal but traditional and emotional. Education and legislation can eradicate them, but a constitutional amendment cannot guarantee jobs to women if employers want to replace them with men.

As a matter of fact, in several States laws have already been passed forcing employers to grant equal pay for equal work. The proposed amendment does not make the passage of such laws by the States mandatory. It is not necessary for their future enactment by other States.

LEGAL STATUS WILL REMAIN

Will the amendment wipe out all the differences in the legal status of men and women arising from marriage and family responsibility? Definitely not.

For example, in the average American home the husband is the wage earner and the wife the homemaker. In the society in which we live it is taken for granted that it is the man's legal obligation to be responsible for the support of his wife and family. Under the equal-rights amendment, to which status would the word "equality" occur? Would women be required to support their husbands? What would happen to the thousands of women who are deserted by husbands? Would the man have no financial responsibility in these cases?

We know that a few parasites have used alimony to further their own selfish ends but what would happen to the many who need this protection—the middle-aged whose husbands leave them and who are not able to support themselves. In instances such as these the application of the equal rights amendment would scarcely be equality.

Actually it could eliminate the right of married women to be supported by their husbands, a right we can ill afford to abandon so long as the family is the basic unit of our society.

LAWS RECOGNIZE DIFFERENCE

Those legal discriminations which are unreasonable and obsolete should be removed by legislation in the States, and through testing in our courts. To attempt to remove them by constitutional amendment would make unconstitutional every labor law that does not apply equally to men and women. It would leave nothing in their place.

These laws recognize certain facts which mark the essential difference between man and woman—woman's child-bearing function, her dual job as homemaker and worker, her lesser strength, her greater susceptibility to fatigue. The amendment would set the clock back 100 years from the point of view of progressive social legislation. It would actually prohibit the enactment of any legislation for the safeguarding of women alone.

The league and many other women's organizations believe we should not add specific prohibitions which would violate the integrity of the Constitution. This is an attempt to get something we are equipped as citizens to achieve through the orderly development of legislation.

Careful analysis of the amendment has convinced us that it is a delusion and a snare—a veritable Pandora's box for the unsuspecting purchaser.

WHY TAKE OFF YOUR HEAD TO CURE A HEADACHE

This is what we are being asked to do. A so-called equal rights amendment has been before the Senate and the House for over 20 years. It has been and still is opposed by most of the large women's organizations and by the trade-union movement of the country. Yet its proponents hysterically cry "Pass the equal rights amendment; wipe out all differences in law between the sexes and women will be made free and equal."

Indeed, while some of the discriminatory laws against women may thus be cured, we would kill at the very same time, through the proposed drastic equal rights amendment, the very laws that are enabling women to progress and advance to real equality Yes; the equal rights amendment treatment is akin to curing your headache by taking off your head.

WHAT IS THE EQUAL RIGHTS AMENDMENT?

It is a misnamed proposal to amend the United States Constitution as follows:

House Joint Resolution 1: Men and women shall have equal rights throughout the United States and every place subject to its jurisdiction.

"Congress shall have power to enforce this article by appropriate legislation."

"Senate Joint Resolution 25 (as revised by Senate Judiciary Committee): Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

"Congress and the several States shall have power within their respective jurisdictions, to enforce this article by appropriate legislation.

"This amendment shall take effect 5 years after the date of ratification."

WOULD THIS AMENDMENT GIVE WAGE-EARNING WOMEN EQUALITY?

This amendment gives nothing to anyone. It will not give women equal pay for equal work. It will not give women greater opportunity for work according to their individual abilities. It will not increase their opportunity for education. It will not remove a single disadvantage now in existence. On the contrary, it takes away from women their hard-earned industrial gains which have given them a better standard of living.

WHAT IS THE REAL PURPOSE OF THE PROPOSED AMENDMENT?

The real purpose of this amendment is to make it impossible for the State or Federal Governments to ever pass a law that applies to women alone regardless of how necessary and desirable such a law might be.

WHAT IS BASICALLY WRONG WITH THE AMENDMENT?

The amendment fails to take into account that there are physical and functional differences between men and women. These differences require special consideration (such as laws prohibiting the employment of women in mines and quarries).

WHAT WILL BE THE IMMEDIATE EFFECT OF THE PROPOSED AMENDMENT IF PASSED?

It would wipe out completely all the good laws that have been enacted to improve the working conditions of women. It would also make forever impossible the passage of any law bettering the employment conditions of women alone.

WHAT NECESSARY LEGISLATION FOR WAGE-EARNING WOMEN WOULD BE THROWN OUT BY THIS AMENDMENT?

1. Minimum wage laws for women: 26 States, the District of Columbia, Alaska, Hawaii, Puerto Rico, have minimum-wage laws. Four million women in hotels, restaurants, laundries, and other service industries are now assured through minimum-wage laws that they must be paid a wage which will, at least, give them a decent standard of living.

2. Maximum-hour laws: 43 States have laws that limit the number of hours that a woman may be required to work daily and weekly. Many working women have responsibility of home and family. This is especially true today. If these hour laws for women are destroyed, women would again have to work long hours in order to keep their jobs.

3. Other regulations concerning women have to do with providing proper sanitary facilities and other conditions of employment to safeguard their health. These regulations are especially necessary for the well-being of the woman worker.

HOW DO PROPONENTS OF THE AMENDMENT ATTEMPT TO ANSWER THE ARGUMENTS THAT THE AMENDMENT WOULD DESTROY THE LABOR LAWS FOR WOMEN?

1. Proponents argue that by invalidating the special labor legislation for women we will succeed thereby in somehow getting these laws for both men and women alike.

WHAT IS WRONG WITH THEIR ANSWER?

At present there is nothing to prevent a State from making its minimum-wage law or other legislation pertain to men as well as women. But the fact is no State has done it as yet—and the proposed amendment is now 20 years old.

To believe that this amendment will mysteriously inspire State legislatures to make all their labor legislation affecting women apply to men alike may be satisfying to the woman of leisure, but to the woman who works in a laundry or restaurant or hotel there is small comfort in this nonsensical illusion.

Of course, it would be desirable to have some of these laws made applicable to men, but until we can succeed in passing such laws for men, why should we destroy the legislative gains which women have achieved thus far?

2. Some proponents further argue that the labor laws for women, instead of helping them, restrict their chances for employment. Is this argument true? No.

It is completely false. Figures compiled by the Women's Bureau, United States Department of Labor, clearly show that the number of women employed in industry has increased steadily during the past 25 years, the time during which these laws were enacted. Not only have greater numbers of women been working during these years but because of these very labor laws women are working under better conditions of employment. Their health and efficiency to continue working is being safeguarded and they are earning better wages.

ARE THOSE OPPOSED TO THIS AMENDMENT AGAINST REAL EQUAL RIGHTS FOR WOMEN?

Of course not. We have always favored and worked for legislation that will secure full civil and political equality for women and men. However, we believe that the Nation and the States must have power to make allowances for the physical and functional differences existing between the sexes. Only by recognizing and providing for such differences can real equality be established between men and women.

NATIONAL WOMEN'S TRADE UNION LEAGUE OF AMERICA.
WASHINGTON, D. C.

Bretton Woods

EXTENSION OF REMARKS

OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. REED of New York. Mr. Speaker, the National City Bank of New York has made some pertinent observations in its May 1945 report relating to Bretton Woods. Under leave to extend my remarks in the Appendix of the RECORD, I include the report on Bretton Woods and the American Bankers Association:

THE AMERICAN BANKERS' ASSOCIATION AND BRETTON WOODS

"Why is the American Bankers' Association opposing the Bretton Woods program?"

From the number of times this question is asked and the variety of answers given by critics of the A. B. A. position, it is evident that, despite all the talking and writing on the subject, there is still very little real understanding of what the argument is about.

With Treasury officials and other Bretton Woods advocates constantly preaching in public addresses, through the press, and over the radio that the Bretton Woods plan is indispensable to post-war currency stability

and abandonment of discriminatory exchange practices, it is small wonder that people ask, "Why are the bankers opposed?"

The answer is that the bankers are not opposed, in the sense of being against what Bretton Woods stood for. They are just as much in favor of currency stability and elimination of discriminatory exchange practices as the Treasury or the delegates to the Conference. But being in favor of objectives is not enough. There must be a practicable plan. Too often in their zeal to sell the American people, the Bretton Woods enthusiasts have talked as though their particular plan offered practically a guaranty of post-war currency stability and freedom from exchange controls. Actually, of course, it does no such thing. No plan could; and certainly it needs but a casual glance through the extended and complicated provisions for changing exchange rates and maintaining exchange controls to see that Bretton Woods is no exception.

Yet such has been the force of propaganda that a large section of public opinion takes criticism having to do wholly with matters of method and technique as evidence of lack of sympathy with objectives. Not to go along with the official program in every particular has been to invite charges of ulterior motives, isolationism, and being a reactionary.

ACCUSATIONS AGAINST INTERNATIONAL BANKERS

There is, for example, the charge that bankers are opposing Bretton Woods because they want to make profits out of unstable exchanges. This follows an old familiar formula, based on appeal to popular prejudice and the fact that it is always possible to impress some people by attacking the bankers, especially the "international bankers of Wall Street."

Curiously enough, at the same time that bankers are being attacked by one group of critics for wanting to perpetuate unstable exchanges for selfish reasons, they are being accused by another group of seeking to drag an unwilling world back prematurely to the gold standard and rigid exchanges. Obviously one of these accusations must be wrong, and it so happens that both are.

No group in the community has stood more consistently—even obstinately—for stable and orderly exchanges than the bankers. Bankers, almost to a man, opposed the departure from gold in 1933, and have overwhelmingly favored every approach to gold ever since. They were among the strongest advocates of repeal of the President's power to devalue the dollar. The fault, if any, in their attitude is that they have been too orthodox in their advocacy of the gold standard and fixed exchanges, which accounts for some of the criticism mentioned above, although anyone taking the trouble to read the American Bankers Association report on Bretton Woods should be aware that the association neither proposes nor expects any general return to the gold standard in the near future. To charge now that bankers suddenly have become obstructionists to stabilization proposals for the sake of profits is to totally ignore this traditional viewpoint.

The fact is that bankers have very good and selfish reasons for not wanting fluctuating exchanges. The profits that can be made out of unstable exchanges are risky and speculative, and are quite as likely to turn out to be losses. Where banks make their surest and most money in exchange is in financing a large volume of foreign trade—a condition that thrives best under stable currencies. Mr. Edward E. Brown, president of the First National Bank of Chicago, member of the American delegation to Bretton Woods and a warm supporter of the proposed international monetary fund, dealt effectively with the charge that banks want unstable exchange for profit when, in appearing before the House Banking and Currency Committee recently, he said:

"It is to the advantage of our bank to have exchanges that are stabilized, because the profits of our foreign-exchange department are based on the interest and exchanges that we get on handling foreign-exchange transactions, and stable exchange promotes foreign trade and the more foreign trade there is, why, the more money we make. We do not make any speculative profit on our exchange position."

NATURE OF THE ISSUES

In attempting to define the real issues posed by Bretton Woods it might be useful to begin by stressing, for a change, the large area in which there is already agreement.

In the first place, there is—as stated above—already agreement upon objectives. The association wants free and stable exchanges, and an international monetary organization to help achieve these conditions. Its record in this respect is clear and consistent. More than a year and a half ago, when the first Keynes and White currency stabilization proposals were under discussion, it said in a report by its economic policy commission:

"Some international institution is desirable: To help nations in stabilizing their currencies; to provide a meeting place for the discussion of monetary questions; to collect information which is a necessary basis for sound decisions; and to make arrangements for stabilization credits in cases where they are justified."

That the association is still in favor of these objectives is shown in its report on the Bretton Woods proposals issued on February 1 last, and in statements by association representatives in hearings on the Bretton Woods Agreement Act before the House Banking and Currency Committee in March.

Secondly, the association favors an important part of the particular machinery proposed at Bretton Woods for accomplishing these objectives. It endorses the International Bank for Reconstruction and Development as sound and desirable, and recommends its adoption with few changes.

Thus we come to the International Monetary Fund as embodying the main points of disagreement between the A. B. A. and the Treasury. What the A. B. A. wants primarily is more assurance that the fund will be operated as a stabilization fund should be—that is, concerned only with short-term credits required to iron out temporary irregularities in exchange fluctuations. It fears that the fund, as proposed, is too elaborate and complicated, and by its system of quotas in an international money pool, managed by an international board, would make credit granting too easy and automatic, leading to bad loans, overborrowing, and postponement in countries experiencing exchange difficulties of those corrective internal measures necessary to insure real currency stability.

For such reasons the Bankers Association does not favor a separate international monetary fund, but recommends that certain proposed functions of the fund be merged with the international bank to be set up as soon as possible. Such an institution would be equipped to supply the kind of credit most needed in the reconstruction period, and such credits would be made selectively and after proper investigation. The United States in the case of the bank would have a veto power over loans floated in dollars, just as other countries would have such power in respect to loans in their currencies.

The bank, in the opinion of the A. B. A., could readily serve as the center for consultation and agreements between countries on currency matters, and provide stabilization credits where necessary and under proper safeguards. The association believes that arrangements of this kind go as far as is practicable now in getting countries to really commit themselves as to currency policies and practices during the reconstruction period, and would be simpler, less costly, and more workable than the proposed monetary fund.

TREASURY OPPOSITION TO A. B. A. PROPOSALS

Treasury opposition to these proposals has been mainly on three counts:

1. That the Bretton Woods agreement, having been adopted by 44 countries, cannot be changed without calling another conference.

2. That adequate safeguards against the misuse of the fund feared by the A. B. A. are already embodied in the articles of agreement. Thus, Treasury officials point out that, apart from quantitative limitations restricting (except upon special permission by the fund) a member's net borrowing to a maximum of 100 percent of its quota, with no more than 25 percent in any one year, the fund has authority both to postpone inauguration of exchange transactions with any member whose circumstances are such as might be considered likely to lead to improper use of the fund, and to suspend exchange dealings at any time with a member deemed to be making improper use of the fund. It is contended that these provisions refute the charge of easy and "automatic" lending, and were inserted with the purpose of insuring the same high standards of careful lending and liquidity emphasized in the A. B. A. proposals.

3. That merging the fund with the bank, in the manner proposed by the A. B. A., would "wreck the entire program" by doing away with the elaborately-worked-out formulas for dealing with changes in exchange rates and discriminatory exchange controls. As Mr. Dean Acheson, Assistant Secretary of State, recently put the argument:

"The heart of the Bretton Woods proposal is that there must be some action to get the nations to agree to abandon methods of economic warfare—such methods as competitive exchange depreciation, multiple currencies, and exchange controls.

"If you can't get countries to abandon these practices, it does no good to make stabilization loans."

Of these three objections, point No. 2—Is the lending sound?—must surely be considered of paramount importance. For without sound lending everything else goes by the board, regardless of how many nations may have signed or how solemn or sweeping their promises on currency policies and practices may be. Not only will the money of the lenders be frozen, but no favor will be done the borrowers who, instead of taking the basic steps necessary to correct their balance of payments, will be encouraged to go on borrowing and getting deeper and deeper in debt.

This suggests one of the several fallacies in the argument that because we spend hundreds of billions for war we can afford to risk two and three-fourths billion dollars (United States subscription to the fund) for peace. It all depends upon the plan. While two and three-fourths billion dollars might not be too much to pay for a good plan for international monetary stability, it would be a high price to pay for a bad plan.

If, as the Treasury insists, there is really agreement with the banking community on fundamental principles of how the fund should operate, it ought not to be too difficult to find a means to express that agreement in ways that both parties can subscribe to, and which will be acceptable abroad as well. As now drawn the articles of agreement contain so many obscurities and ambiguities of language on critical points that it is hard to tell what they really mean. Since the task of administering a fund of this kind will be a most formidable one at best, the management will have need of the clearest possible mandate as to what principles should govern.

A SUGGESTION BY THE C. E. D.

As a move in the direction of greater clarity may be cited the recent suggestion by the

Committee for Economic Development that the proposed international bank be given express authority to make stabilization and general-purpose loans in cases where they are justified. Foreseeing the same danger envisioned by the A. B. A., viz, that the fund—particularly in the post-war transition period—may become involved in loans which are of essentially long-term stabilization character, the committee has proposed that the phrase in the provision of the bank agreement that "loans made or guaranteed by the bank shall (except in special circumstances) be for specific projects of reconstruction and development" be interpreted as definitely authorizing loans of the character just indicated. While it is true that the bank managers might so construe the present language, if they chose to do so, the suggestion of the C. E. D. has the merit of making the language perfectly clear and removing all possible doubt as to what the powers may be.

The fact that the Treasury has indicated a receptive attitude toward the C. E. D.'s suggestion is encouraging evidence of recognition that the Bretton Woods document can still be changed to advantage, notwithstanding the much-harped-on "agreement by 44 nations." The suggestion itself is good so far as it goes, but does not go far enough. While it opens up the bank for a type of stabilization loan that belongs there rather than in the fund, it does not at the same time necessarily imply a tightening up of the operations of the fund. There is still serious question as to the adequacy of safeguards provided to assure proper discrimination in granting fund credits.

WILL OTHER COUNTRIES ACCEPT CHANGES?

The question of the willingness of other countries to accept changes in the articles of agreement is, of course, pertinent and deserves comment.

The first thing to be said is a reminder that the Bretton Woods plan has not been agreed upon by 44 nations, as so often loosely stated, but represents merely a set of proposals which the Bretton Woods delegations agreed to submit to their respective governments for consideration. The delegations did not even recommend the adoption of the proposals; and, in addition to this general reservation, there were specific reservations on a number of points by several delegations. The governments themselves remain entirely uncommitted.

The second point that needs bringing out is the evidence from comments abroad that other countries are going to take a good long look, including all the fine print, before signing on the dotted line. While the bank has found general acceptance abroad, the fund has met with a good deal of criticism and demand for clarification.

The British Chancelor of the Exchequer has characterized it as "a difficult document, inevitably long and technical." "There are," he said, "some obscurities of language in it which have led to misunderstanding and must be clarified."

Two leading British trade organizations—the London Chamber of Commerce and the National Union of Manufacturers—have issued statements severely critical of the fund, while the Federation of British Industries, though approving the "broad objectives and principles" of the plan, calls attention to various "defects" and asks for interpretation of certain obscurities (for example, the term "fundamental disequilibrium"). The Federation further proposes an interim trial period of perhaps 4 years before the Government definitely commits itself to a universal multilateral system.

The London Economist, one of Britian's leading financial weeklies, observes in its issue of December 2, "The bank is less controversial than the fund and more urgently needed. In the final act the two are tied together, but if the bank could be untied and set up separately, great advantage would result."

The following is from an editorial in the London Times of September 25:

"Legitimate anxiety has been expressed over the possibility of a divergence of interpretation and of consequent misunderstanding on what may be a matter of vital concern to this country; and, whether arrangements of the kind described are contemplated in the immediate future or not, Parliament will rightly desire to be assured that other prospective parties to the draft scheme share without reservation the view of its effect taken by the Chancelor of the Exchequer and Lord Keynes. * * *

"This country is most anxious to cooperate loyally in any international arrangement, but it can hardly afford to face the alternative of either appearing as a defaulter or running into insoluble difficulties and failing to counter mass unemployment caused by the development of a slump elsewhere. The credit facilities provided by the fund are, as one correspondent showed, a wholly inadequate safeguard against this contingency; for any sudden depression in the United States—such as occurred in 1929 and, with even greater rapidity, in 1937—would almost instantaneously lead to exhaustion of Britain's credit with the fund. It would seem difficult for any government which has accepted the prime responsibility of maintaining a high and stable level of employment in the future to ratify the Bretton Woods agreement without further clarification of this issue."

The London Times comment raises a key question which has bothered a good many people, namely, whether there has been any real meeting of the minds between British and Americans on post-war currency policies, or whether we have been using language to create an impression of agreement without the substance. The British want a plan which leaves them plenty of room for flexibility in dealing with their post-war currency problems; we want a plan which puts more emphasis upon stability and firmer commitments. In an attempt to reconcile these differing viewpoints there has been produced a document which has been taken to mean one thing on this side of the Atlantic and another thing on the other side.

Thus we hear the plan spoken of in this country as giving us something of the assurance of stability usually associated with the gold standard; while in England Lord Keynes has spoken of it as "the opposite of the gold standard." The impression that is left is of a kind of double talk which, however well intended, may be hurtful of real international understanding in the end.

WHY NOT ANOTHER CONFERENCE?

It is, of course, desirable to arrive at an understanding with other countries on monetary problems, if we can, without calling another conference. But why—if we have to have it—should we dread another conference? We are having two conferences to deal with security proposals—Dumbarton Oaks and San Francisco; and maybe more. In the economic area, other conferences must be held and will be useful in learning each other's point of view. One such conference is essential before long to consider trade arrangements, because trade quotas, tariffs, export bounties, bilateral agreements and the like could completely defeat any program for monetary stabilization. As Assistant Secretary of State W. L. Clayton recently told the Congress, in testifying on the reciprocal trade agreements program, the Bretton Woods monetary agreement and other plans won't make sense without action in the tariff field. Trade policies and monetary policies should logically be considered together.

While we want to do all possible to capitalize and build on the progress of international monetary cooperation already begun, a program as important and complicated as this calls for much more than mere formal inspection and approval by the Congress. We need to give it the same careful study that other countries are going to give it, to the end that we reach an agreement that appeals to public opinion in this and other countries as both fair and practicable and to which people can give their continuing support.

A True Majority Vote

EXTENSION OF REMARKS

OF

HON. FRANCIS CASE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. CASE of South Dakota. Mr. Speaker, the so-called Schwabe amendment is an important contribution to the resolution before us. Instead of proposing ratification of treaties by a simple majority vote of the Members present in each body, House and Senate, it requires a majority of the membership of each body to vote affirmatively on a treaty. That moves in the direction of the two-third rules, and in some respects is better.

As has been pointed out, under this method we would not have joined the League of Nations as originally proposed, but we would have joined it with the Pepper reservations, assuming the House voted as did the Senate. We would have proclaimed adherence to the World Court, a step that was recommended by Presidents Wilson, Harding, Coolidge, and Hoover, and such Secretaries of State as Henry Stimson, Elihu Root, and former Chief Justice Charles Evans Hughes.

The Schwabe plan has been spoken of as a compromise between the simple majority and the two-thirds rule. To see how accurate this is we might apply it to the most recent two-thirds question in the House, the vote on overriding the President's veto on the draft bill. The motion to override received 185 votes, with 177 against, getting a majority of those voting, but not two-thirds of those present, which would have been 242. A majority vote of the House membership would have been 219, which is 60 percent of the 362 who were present and voting on that question.

There is much to be said for participation by the House of Representatives in the making of treaties. Consideration in the House committees and debate on the floor of the House, with the attendant publicity and study throughout the Nation, will afford some replacement for the safeguards offered by the present two-thirds rule in the Senate. Not enough, I have thought, to warrant the change to a simple majority of a quorum in each body. But enough, I believe, to warrant the change if an actual majority of total membership in each body is required as contemplated by the Schwabe amendment.

We are living in a different world than did the framers of the Constitution. Communication is faster. Transportation is faster. There are more newspapers and magazines to inform the people. And we have radio. There is reason to think that these things will insure a better understanding of questions involved in treaties.

And whether we wish or not, the United States is living in a world where it cannot escape decisions on world questions. To ignore them is not to escape them. It seems to me important that we strive for more flexibility in our handling of international questions—the establishment of a more positive approach without loss of the wisdom that thorough consideration should give.

Our present rule of a two-thirds vote in the Senate provides a negative safeguard against precipitate action, but leaves something to be desired when affirmative action is wanted by the Nation that is so much more completely represented in the House.

The amended resolution seems to be the best proposal to accomplish the double purpose of thorough consideration with opportunity for action either affirmatively or negatively, and my vote is cast accordingly.

Ratification of Treaties

EXTENSION OF REMARKS

OF

HON. JOE HENDRICKS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. HENDRICKS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Orlando Morning Sentinel of May 7, 1945:

FLORIDA LEADS TREATY FIGHT

(By Allen Morris)

TALLAHASSEE.—It well may be Florida has—as United States Senator CLAUDE PEPPER says—done something historic. At least the State has started rolling a ball which could change the Constitution of the United States.

Congress will get soon a resolution by which the Florida Legislature applies for a convention to allow ratification of treaties by a majority of both Houses, instead of two-thirds of the Senate alone.

Since the Senate was unlikely ever to submit to the States an amendment to take away its veto power, the reverse procedure is being tried with Florida taking the lead in the Nation.

Drafters of the Constitution provided two channels for its amendment; one in which the Congress sends proposed amendments to the States for ratification, and the other in which the States required Congress to call a convention.

If 31 other States join Florida in the adoption of a resolution "applying"—that's the constitutional word—for a convention to phrase the amendment, Congress has no alternative but to do so.

Senator PEPPER, who urged the Florida Legislature to take its action, explained the two-thirds rule gave as few as 17 Senators the power to defeat any treaty, and 33 Senators could do so at any time.

"At present," said Senator PEPPER, "the House of Representatives, the body in the Congress closest to the people, is necessary to a declaration of war. But it has no part in making a treaty of peace or in our joining an international organization to keep the peace. Only the Senate has anything to say about that.

"But even the Senate cannot agree to a treaty or to any organization like the United Nations unless two-thirds of the Members of the Senate present when such a matter is considered agree to such proposal.

"That provision defeated the League of Nations and contributed to the present awful war. For there is no doubt that a majority of the Senate and the House of Representatives would have agreed to the League of Nations as recommended by President Wilson if they had had the power to do so."

Declaring the time had come to modernize the country's peace-making machinery, Senator PEPPER argued:

"Both Houses of Congress represent the people; both Houses declare war; both Houses have to pass legislation which is usually necessary to carry out any treaty we make; both Houses have to make any appropriations necessary to carry out any treaty.

"Both Houses, therefore, should speak for the people in making agreements with other nations, not just two-thirds of the Senate, whose Members are not answerable to the people except every 6 years."

H. R. 2652

EXTENSION OF REMARKS

OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. REED of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement of Norris E. Phillips, chairman, Tile Council of America, before Committee on Ways and Means, House of Representatives, re H. R. 2652:

My name is Norris E. Phillips. My full-time job is that of vice president of the Olean Tile Co., Olean, N. Y. I am appearing today as chairman of the Tile Council of America, an organization of 18 floor- and wall-tile-manufacturing companies representing more than three-quarters of the total volume of the industry. Several of the other members of the industry are also here with me.

We are seriously concerned about the impact of lowered tariffs for tile upon our industry. We appreciate this opportunity of presenting to you the reasons for our concern. We hope that you will be mindful of them in your deliberations on this proposed legislation.

At the outset I should like to say that we do not purport to be economic experts. We don't pretend to be familiar with the intricacies of international trade and commerce.

We are well aware that there are several large volumes, running to millions upon millions of words, of testimony given before this committee in the past several years. We know that there are libraries packed with learned treatises on foreign trade.

It is impossible to scan the testimony of hearings held before your committee without a profound respect for the time and study you gentlemen have devoted to this complicated question. We cannot attempt to match that knowledge.

We come before you simply as American tile manufacturers. We are small-business men. We have come to our conclusions with honesty and sincerity. After examining the facts relating to our industry, we find no other conclusions possible.

We are businessmen. But we are, first and most important, Americans. We have an abiding faith in our country. America's future is our future.

More than anything else we want a world in which we and our children and their children can live at peace. We are conscious of the fact that wars have their roots deep in economic disturbances, and that the seeds of this war grew and matured in the fertile fields of poverty and discontent throughout the world.

Our overriding consideration, therefore, in asking you to hear us, is the preservation of future peace. With any national policy devoted to that end, we are in entire accord.

We know that in debating and passing upon laws affecting the lives and hopes of all Americans, you gentlemen have a difficult and often thankless task. We take it for granted that your first goal is the welfare of the entire Nation. We know you are trying to achieve this with due consideration for the impact of national policy upon the groups and segments making up the total economy.

We are convinced that America cannot long be economically healthy and militarily secure in an impoverished world—a world ripe for every dictator and demagogue that comes along.

We believe that America can make a very great contribution to the progress of the world by setting an example of working peacefully together among ourselves, with a constantly better standard of living for our people, and with hope and confidence in the future.

That is why we have left our businesses to come to Washington and set forth our views for your consideration. The American tile industry has made outstanding contributions to higher living standards for the people of this Nation—contributions out of all proportion to the size of the industry itself. We do not believe it will be in the natural interest to sacrifice this industry through a policy of further lowering tariffs to the point where we are driven out of business.

As I have said, we are small business. How small is best shown by facts set forth in an exceptionally able study of our industry made by Mr. Ray T. Watkins, Mr. Carl J. Whelan, and other members of the staff of the United States Tariff Commission. This study is known as Earthen Floor & Wall Tiles, Report No. 141, second series, and was published by the Tariff Commission in 1941.

A table on page 38 shows that, according to the United States Bureau of the Census, there were in 1936 57 manufacturing establishments, producing 55,551,463 square feet of floor and wall tile, valued at $13,748,332. By 1939, the last year for which any figures are available, the industry presented the picture described on page 2—some 55 plants operated by about 50 companies, with capital ranging from a few thousand dollars to over a million dollars per company—a total industry capitalization of from twenty to twenty-five million dollars. The industry's production was valued at $17,200,000, and employment stood at somewhere over 6,000 people, ranging from 10 to 500 per plant.

Thus the average company in the floor- and wall-tile industry employed 120 people and did a volume of $344,000.

Our plants are located mostly in New York, New Jersey, Pennsyvania, Ohio, Indiana, West Virginia, and California.

According to the best available estimates, our products are distributed through some 3,500 tile contractors and wholesalers and are installed by 10,000 tile setters and 10,000 tile helpers throughout the country. The entire industry thus provides employment for about 30,000 people.

The ramifications of our supply system are such that anything that affects our sales is

directly reflected in other industries in a great many States. Our various manufacturers by raw materials—clays, silicas, feldspars, refractory materials, stains and glazes, natural and propane gas, lumber and other supplies—from companies in Kentucky, Tennessee, Florida, North Carolina, South Carolina, Georgia, Ohio, Pennsylvania, Washington, California, Maine, New Hampshire, Connecticut, Virginia, North Dakota, New York, New Jersey, Missouri, Maryland, Delaware, Oklahoma, and Texas.

We realize that we constitute a very small segment of American industry. But we have been assured that no action will be taken by our Government that will injure any American industry. We submit that ours is one of the industries that will be seriously injured by a reduction in tariffs.

Moreover, it will serve no national interest to adopt such a policy for the tile industry. If there had been no domestic tile industry during the years 1924 to 1939 and the amount of tile manufactured in the United States during that period had been imported, it would have increased total United States imports by only three-fifths of 1 percent.

Not only that, but the American people would not have had the advantages of better quality and greater values.

One of the obvious measures of a people's standard of living is their homes and their public buildings, and we are proud of the contributions we have made to the beauty, the cleanliness, and the colorfulness of America's homes and buildings. It is our tile that has helped to make possible finer schools and hotels, more hygienic hospitals, moisture-proof subways and tunnels, durable factory floors, attractive swimming pools, beautiful bathrooms, kitchens, and sunrooms.

We want to continue to make these contributions to better living standards in the future. But, more than most other American industries, ours is a hand craft industry. Labor comprises a large part of our product's value. We cannot compete with foreign labor paid as little as one-twelfth of American rates.

Our labor costs run three to four times as much as the average labor cost for all United States manufacturing industry of 16 percent in 1935. The manufacture of tile is not mechanized in the degres that many American industries are mechanized. This is largely due to the nature of the product. The greater portion of the tiles made must, under present methods of production, be individually handled several times in the course of manufacture, inspection, packing, and shipping.

Although no Government figures for the past 10 years are available, our individual members state that their labor costs today are running somewhere between 55 and 65 percent, and on some items as high as 75 percent. But whatever the percentage, the fact is that our American labor is in direct competition with foreign labor paid at greatly lower wage rates. For example, here are figures on wages paid in the ceramics industries of several countries in 1938 and 1939, as shown in a Tariff Commission study of the pottery industry, which the Commission has told us are comparable.

Year	Country	Weekly wage	Hours per week	Hourly rate
				Cents
1939	United States	$22.46	36.6	61.4
1938	Great Britain	8.78	46.0	19.1
1938	Germany:			
	Men	10.20	48.0	21.2
	Women	6.20	48.0	12.9
1938	Japan	3.00	60.0	5.0

We want to pay our own people as much as we can possibly afford to pay them. We want to do everything possible to enable them to enjoy more and more of the goods and services that life in the United States makes possible. But to do that we are dependent upon our ability to sell our products—and our ability to sell depends upon adequate tariff protection against cheaply made foreign products.

To put the problem even more specifically, one of our companies has figured that the average unit value of floor and wall tile sold by the company during 1937 was 32.8 cents per square foot, yielding to the company on its normal operation a net profit of 4 percent on sales before Federal income taxes. During this year, considerable floor and wall tile was imported from Japan, the average unit value of which was 10.2 cents per square foot. Even with the 1930 tariff which required duties of 70 percent, the total price in the United States of Japanese tile was only 17.3 cents a square foot, giving the Japanese manufacturers an advantage of 15.5 cents per square foot. Thus the price of American-made tile in 1937 had to exceed the price, including duty, of that imported from Japan by 90 percent. On the basis of the present tariff, this differential would be 138 percent.

Another example: Before the war, Japanese declarations on tile coming into this country showed a cost of ¾-inch tile of 5 cents a foot in Japan. Under the tariff law, this came under the minimum cost in the United States and called for a 70 percent ad valorem. Therefore, the Japanese paid a duty of 3½ cents which, plus freight, brought the price to 9 cents a square foot delivered in New York City. This valuation was about equal to the cost of our raw materials before they were even put into the kilns to be burned.

If we are to remain in business and provide our fair share of the postwar employment that Americans must have, we cannot be subject to this vicious competition. Because of the highly specialized character of the manufacturing operations, our tile factories cannot be converted to other types of goods when the market for tile goes bad. This is why we, in our industry, have suffered so materially from depressions and the war.

The Tariff Commission study, page 59, sets forth our operating profits to net sales, and I cite this as an indication of the lack of flexibility with which we are faced. During the 15-year period from 1921 to 1935 (figures since 1935 are not available), the industry operated 9 years from 1921 to 1929 with a simple average net profit of 15.7 percent of net sales. The other 6 years, from 1930 to 1935, it operated with a simple average net loss of 25.5 percent of net sales.

In spite of this we have continuously improved the quality of our products. Research and development work has improved the product itself, reduced manufacturing costs, improved installation methods, reduced installation costs, and developed new designs, shapes, and colors. Subjection to low-cost foreign competition will reduce and likely eliminate such work, the prime objective of which is to give the American consumer a better product for less money.

The price structure of the tile industry is such that low-price foreign imports can quickly wreck the domestic market. If this happens, it will throw out of work thousands of American workmen who depend upon the domestic industry for their livelihood. It will deprive millions of Americans of their ability to get the quality and the quantity of the various kinds of tile they will want, to improve and beautify their homes and buildings.

Competition from foreign imports is felt primarily in the New York and California markets, which together constitute nearly half of the total tile sales of the Nation. Anything that depresses this market quickly causes depression in markets throughout the country.

This is why even a relatively small volume of imports, priced so low as to break the New York and California markets, constitutes a definite threat to the continued existence of our domestic industry.

Another fact that might be considered is that foreign tile producers analyze the American market for volume items—the "bread and butter" types of tile—which they then concentrate on sending in. It is these same items that new American plants would have to produce to start in business. Therefore, if foreign tile of this type is allowed to flood the American markets, it will effectively bar the establishment of any new American tile businesses.

The fact that you gentlemen take time from your many broad and important duties to take note of the problems of one small industry like the tile industry is bound to be reassuring to the other small businesses of the Nation. For the postwar period, it must be the national policy to give every encouragement to small businesses, such as those comprising the tile industry, who must become a major source of employment for millions of Americans. These businesses, like those of the tile industry, stand ready to begin postwar expansion to meet anticipated postwar demands—but they cannot go forward with those plans without favorable consideration from the Congress.

In summary, I should like to make these points:

1. We are one of America's small industries that will be materially affected by lower tariff rates on foreign products with which we must compete. On behalf of the thousands of people whose working lives have been devoted to this industry, and on behalf of the millions of American consumers who will benefit from our products in the future, we ask that we be given the protection of tariff rates sufficient to equalize competition between foreign-made and domestic tile. We do not seek to prevent all imports; we do seek to equalize competition so that American factories can pay ever-increasing wages, and finance the cost of the socially desirable services that all of us regard as an essential part of the American standard of living.

2. We are seriously concerned with any establishment of tariff rates which permit sales of foreign tile at prices with which we cannot possibly compete—concerned lest a policy set now become part of the Nation's tariff policy and eventually prove ruinous to our industry.

3. We should like to point out that the reciprocal agreements are not reciprocal so far as tile is concerned. For example, on December 23, 1942, the United States signed a trade agreement with Mexico which cut the tariff on floor and wall tile by 50 percent. The cut is shown by the following tables:

Tariff Act of 1930		Trade Agreement No. 50797, Mexico	
Value bracket (cents per square foot)	Rate of duty	Value bracket (cents per square foot)[1]	Rate of duty
Not over 14.3 cents	70 percent ad valorem	Not over 14.3 cents	35 percent ad valorem.
Over 14.3 but not over 20 cents	10 cents per square foot	Over 14.3 but not over 20 cents	5 cents per square foot.
Over 20 but not over 40 cents	50 percent ad valorem	Over 20 but not over 40 cents	25 percent ad valorem.
Over 40 cents	60 percent ad valorem	Over 40 cents	30 percent ad valorem.

[1] Does not include ceramic mosaic tiles and quarries or quarry tiles.

On the other hand, a decree of the Mexican Government, published in the Official News of March 27, 1943, to take effect 30 days later, raised the duty on floor and wall tile as shown by the following table:

Item	Duty (gross kilogram)		
	Old duty	New duty	Percent increase
Wall tile:	*Centavos*	*Centavos*	
White, weight up to 140 grams	8	35	337½
White, weight over 250 grams	8	30	275
Colored, weight up to 250 grams	8	42	425
Colored, weight over 250 grams	8	37	362½
Inserts, up to 250 grams	8	80	900
	Duty (per square foot)		
Wall tile:	*Cents*	*Cents*	
White	3	13	337½
Colored	3	15½	425

Thus the Mexican Government, through use of the trade agreement, has severely handicapped United States products, while securing extremely favorable conditions for sales into this country. Now we understand that Mexico has imported considerable tile-manufacturing machinery and has expanded her facilities. With cheap Mexican labor, they will be able to produce tile at costs which constitute a definite threat to our domestic industry.

4. We face the fact that war has increased our manufacturing costs while it will probably decrease costs for foreign manufacturers. During the last war most of the tile manufacturing plants of Belgium and France were destroyed. After the war, they were rebuilt with the most modern machinery and equipment, which, of course, lowered their production costs. There is every reason to believe that the same pattern will be repeated after this war. With new and more efficient facilities, and with wage rates drastically below ours, these plants will constitute an even more serious threat to our domestic plants and to the thousands who are dependent upon them for their livelihood.

5. We are agreeable to an extension of the Reciprocal Trade Agreements Act for not more than 1 year, but we protest the granting of authority to make further reductions in the tariffs on tile which are already too low.

At the end of 1 year, when world events are in clearer focus, we suggest that the Congress reconsider this whole question. We feel that this is no time to change policy and that this Nation has much to gain and nothing to lose by waiting another 12 months to put into effect new and untried lowered tariff policies.

Expense Allowance for Members of Congress

EXTENSION OF REMARKS

OF

HON. JOHN W. BYRNES

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. BYRNES of Wisconsin. Mr. Speaker, I would like to explain the reason for my voting against the provision in H. R. 3109, which would allow the sum of $2,500 to Members of Congress to assist in defraying expenses relating to his official duties.

I am in sympathy with the need for increasing the remuneration of Members of Congress either by way of a salary increase or by way of an expense allowance, but there has been a long-established policy in Wisconsin against increasing the compensation of any person elected to public office during his terms of office. In fact the constitution of the State of Wisconsin provides in part that the compensation of any public officer shall not be increased during his terms of office. I do not, Mr. Speaker, feel justified in acting contrary to that policy.

I would be one of the first to vote for the allowance contained in this bill, provided the increase were to become effective for Members of the Eightieth Congress, who will be elected in November 1946. However, Mr. Speaker, I do not, as a new Member of Congress from Wisconsin, feel justified in voting myself this increase.

There is also another factor to which I must give consideration. Before my election to the House of Representatives I served 4 years as a member of the Wisconsin State Senate. Members of the Wisconsin Legislature receive $100 per month. I know how inadequate that amount is. The Wisconsin Legislature within the last few weeks refused to make a very modest allowance for expenses of the members in attending legislative sessions. I have great confidence in the men and women serving in the State legislature of my State. If they cannot see their way clear to increase the very nominal amount which they receive for their services and expenses, I certainly cannot justify voting for an expense allowance for myself at this time.

Goering—War Criminal

REMARKS

OF

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. FLOOD. Mr. Speaker, with no reflection upon the brave and heroic officers and men of our armed forces who effectuated the capture, I protest with all the force at my command the treatment and recognition of the Nazi Goering as a prisoner of war and demand that he be classed and treated as one of the arch criminals of this war.

I was incensed with the Alphonse-Gaston act that the Associated Press reported resulted from the surrender of this vile member of the unholy three of Nazidom.

Still pompous, strutting, and arrogant, this obscenely obese buffoon and charlatan demanded and was granted the privilege of a bath and a change to one of his grotesque musical comedy uniforms before he would condescend to have his picture taken by his captors.

I protest this fantastic mockery of justice; I protest in the name of the 100,000 peaceful citizens and the destroyed city of Rotterdam wiped out in 20 minutes from 12 noon to 12:20 by this evil bird of prey. Goering and his Luftwaffe—this was cold-blooded murder by order of this fat friend after the brave Dutch had capitulated—a horror warning of things to come from Goering the Goon. I protest in the name of the dead of Warsaw—the city and its brave Polish men, women, and children—dominated by the orders of this airminded devil from the hell that was Potsdam. I protest in the name of a long list of peoples, cities, and nations done to death by his "schweinehunds" and his evil crew.

Instead of being wined and dined as a privileged character, this overstuffed museum piece should have been shot on sight as any other mad dog.

The only thing Hitler ever did that I agreed with was to order the immediate execution of successor-designate to Hitler, marshal of greater Germany, supreme war-economic authority, president of the Reichstag, chairman of the Council for the Defense of the Reich, commissioner in control of transportation, chairman of the wartime ministerial council, Governor of Prussia, chief of the Prussian secret police, infantry general of the Reichswehr, minister of forests, minister of aviation, Premier of Prussia, minister without portfolio, member of the secret cabinet council, director of state theaters and operas, and field marshal general. He also rejoiced in the positions of hunting master of Germany and chief forester of Germany.

This very day the joint committee of Congress sent to view the atrocity camps in Germany returned to the United States and in statements to the press emphasized the revolting horrors of the Germans and demanded punishment for war criminals.

Blithely ignoring these facts so recently revealed to the world, Goering the Evil demanded food and drink, to quote him, "because I am hungry and want to eat." Shades of the millions of starved and starving slave laborers of Europe—victims of this foul and unregenerate rascal.

As a warning to the world at large, as assurance to the people of liberated nations, as a guaranty to the armed forces of the United Nations, and out of respect for the memory of the legion of the dead by his vile hand, the swashbuckling Goering, he of the Grand Cross of the Knights Cross of the Iron Cross, with crossed swords of diamonds and brilliants, chief of the double-cross, should receive a court martial without further delay.

Reciprocal Trade Agreements

EXTENSION OF REMARKS

OF

HON. A. WILLIS ROBERTSON

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. ROBERTSON of Virginia. Mr. Speaker, under leave to extend my re-

marks in the RECORD, I include the following questions and answers on reciprocal trade agreements:

TRADE AGREEMENTS QUIZ—FIFTEEN QUESTIONS AND ANSWERS

Expiration on June 12 of the Reciprocal Trade Agreements Act brings up for public review and congressional action a tested American policy just when representatives of the peace-loving nations of the world are convening at San Francisco to write the charter for a new world organization.

We have learned through bitter experience that the road to enduring peace is a three-lane road and that all three lanes must be kept in good repair. One handles the political relations among nations; another cares for the international flow of development financing, and the middle lane carries the main traffic of trade which makes for economic stability. Whatever nation places, for whatever purpose, roadblocks in this middle lane will cause dislocations and congestion that will spread into the other two and throw nations apart instead of pulling them more closely together.

It is with this perspective that we Americans must re-appraise the trade-agreements program which implements a policy initiated in 1934. We must remember that this policy has been in force and has been at least tacitly accepted as a continuing force in the progression of international understandings which began with the Atlantic Charter and now culminates at San Francisco. And we must therefore weigh our action as to the future of the Trade Agreements Act in the balance of our hopes for Dumbarton Oaks and San Francisco.

Originally adopted in 1934, the present act has been extended in 1937, 1940, and 1943, the last time by a definitely bi-partisan vote in both House and Senate. Hence, the basic questions of constitutionality, delegation of authority, protection of business interests and the like have been thoroughly examined and approved. Further, the performance record under the act from 1934 to 1939, when war interrupted the normal flow of international trade, has shown substantial benefits well spread across our Nation.

Now the Doughton bill (H. R. 2652) has been introduced to extend the act for another 3 years and in so doing to resharpen it as an essential tool for post-war commerce. The House Ways and Means Committee started hearings on the bill on April 18, and the testimony being given by Government and private witnesses indicates the importance attached to this measure.

As the American people have gone deeper and deeper into World War No. 2 and now finally see light ahead, they have shown an ever stronger grasp of the key position which an expanding volume of trade has in the structure of stable relations among nations. The bipartisan vote by which the Reciprocal Trade Agreements Act was extended in 1943 is a significant milestone in that trend. As we now approach the next milestone in the further extension and modernization of the act, we are confident that the American people will expect Congress again to give it broad support.

The following questions and answers are offered as an aid to those who may have lost contact with the trade-agreements program.

CLARK H. MINOR,
Chairman, Executive Committee,
The Committee on International
Economic Policy, United States
Chamber of Commerce.

NEW YORK, *May 1, 1945.*

WHAT IS THE TRADE-AGREEMENTS POLICY?

It is a grant by Congress to the Executive of power within certain prescribed limits and for a specific period of time to overcome the rigidity of tariff walls by reciprocally adjusting the duties on specific products of both the United States and other countries to the mutual benefit of each. The reciprocal adjustments are made through bilateral agreements under our traditional most-favored-nation policy; they are extended to all nations which do not discriminate against United States goods, thus serving to protect American exports against discrimination in foreign markets.

GOOD WILL OR GOOD BUSINESS?

The trade-agreements policy is both, and therefore is a valuable, two-edged tool. Trade agreements have created good will by demonstrating our willingness to buy foreign goods so that other nations can buy from us, thus promoting world economic cooperation. Trade agreements are good business because they have increased the markets for the products of our farms and factories by aiding in doubling our export trade from its low point of $1,611,000,000 in 1932 to $3,177,000,000 in 1939. In fact, this policy has proved to be the No. 1 tool in expanding our foreign commerce.

HOW DO TRADE AGREEMENTS TIE INTO THE PEACE STRUCTURE?

The charter for an international peace organization is to be written and agreed upon by United Nations representatives in session at the San Francisco Conference. This charter is to serve as a guide to world political and economic order as against chaos and warfare. International economic chaos results when the various nations, each acting wholly on its own, erect more and ever higher barriers against each other's commerce. The trade-agreements policy helps to bring about international cooperation through the reciprocal reduction of existing barriers to peaceful trade and the discouragement of new tariffs, quotas, and other impediments. The policy is therefore seen as a vital forerunner of, and effective aid to, the charter of peace being developed at San Francisco.

WHY BRING TRADE AGREEMENTS UP NOW?

The trade-agreements program will expire automatically on June 12 unless renewed by Congress prior to that date. Consequently, the Doughton bill, now before Congress, is of immediate concern to all those who are writing in San Francisco the charter for a new world organization.

WHAT DOES THE DOUGHTON BILL PROVIDE?

The Doughton bill (H. R. 2652) provides for a 3-year extension of the reciprocal trade-agreements policy, and for the power to reduce within the limit of 50 percent any specific duties in effect January 1, 1945, which can be reduced without impairment to efficient American production and with benefit to our over-all trade. In this way the Doughton bill revitalizes our 11-year-old trade policy and resharpens a tool for effective use under current world conditions.

WHY THE NEED FOR RESHARPENING THIS USEFUL TOOL?

The tools of peace must be as up to date as the tools of war. We are not winning this war with tanks and planes of Pearl Harbor vintage, and we can't construct the economic basis of the peace with an instrument forged in 1934 and blunted in the essential work it has accomplished since then. Resharpening this tool will make it possible, for one thing, to bargain with Great Britain and Canada—our two largest markets—for a further modification of the trade barriers which favor British over United States goods in British Empire markets. As the trade-agreements program now stands, we have used up most of our bargaining power with Great Britain and Canada, as well as with some other countries.

DOES THE DOUGHTON BILL SLASH ALL DUTIES BY 75 PERCENT?

No. The bill does not provide for an automatic reduction in tariffs nor for a wholesale reduction in tariffs. The Doughton bill permits greater latitude of action in meeting certain specific situations. It permits a maximum reduction of 50 percent in any duty which was in effect January 1, 1945. Some of these rates do reflect up to 50 percent reductions from the original 1930 tariff schedule, but it is estimated that the categories in which the full permissive 50-percent reductions had been made prior to the beginning of this year constitute less than half (42 percent) of our total pre-war dutiable imports. They represent 373,000,000 in dollar value, or less than 2 percent of our national production.

In considering this matter of tariff reduction it should be remembered that it is being made from the highest schedule of duties in the history of the United States, that of 1930. The epidemic of tariff and trade barriers which swept the world in the decade before World War No. 2 was detrimental to the United States and to the world at large.

It should also be remembered that duty reductions are made only where found feasible, and selectively, product by product, rather than in one horizontal cut. Thus, a reduction of 5 percent in the duty on one item may result in the stimulation of trade, whereas a reduction of as much as 50 percent on some other item may have a negligible effect on commerce. United States duties are reduced only when negotiation with a foreign country results in concessions important to us.

DO TRADE AGREEMENTS BENEFIT UNITED STATES INDUSTRY?

Yes. Countries with which we have negotiated trade agreements have lowered trade barriers on almost 50 percent of all the manufactured products they buy from us. Nonagricultural United States exports in 1937–38 were $935,000,000 above the 1934–35 volume. Nonagricultural United States imports in 1937–38 were $356,942,000 above the 1934–35 volume.

To help provide full employment after the war, many of our largest and most important industries must expand their foreign markets. Here are some pre-war figures on the importance of export trade to United States industry:

Industry:	*Percent of output sold abroad*
Automobiles	14
Agricultural implements and machinery	17
Tractors	28
Power-driven, metal-working machinery	20
Printing and bookbinding machinery	18
Sulfur	36

DO TRADE AGREEMENTS BENEFIT UNITED STATES FARMERS?

Yes. Trade-agreement countries have granted vital concessions on almost 75 percent of all the farm products they buy from us; consequently, United States farmers are able to sell much more abroad. We have, however, made duty reductions on less than 25 percent of our agricultural imports under the program.

Millions of United States farmers—for example, the cotton, apple, and tobacco growers—have a vital stake in expanding our export markets through the reduction of world-trade barriers. Furthermore, the benefits from increased exports of our manufactured products are also shared by our farmers through the sustained purchasing power of the factory workers who buy more and better foodstuffs.

DO TRADE AGREEMENTS BENEFIT UNITED STATES LABOR?

Yes. In 1937, after 3 years of the program, United States manufacturers were employing 8,569,231 wage earners. This topped 1929 and represented an increase of 2,000,000 jobs over the depression period. An expanding foreign trade makes jobs, particularly in the high-wage, efficient, export industries. As the accompanying chart shows, United States industries with important foreign markets pay

the highest average wages in the country; whereas protected industries tend to pay lower wages.

Average weekly wages, 1939

PROTECTED INDUSTRIES

Cotton goods	$14.26
Silk and rayon	15.78
Pottery	22.75
Carpets and rugs	23.25

DOMESTIC INDUSTRIES

Based on statistical abstract of the United States.

DO TRADE AGREEMENTS BENEFIT UNITED STATES CONSUMERS?

Yes. They help to make available to United States consumers a wider variety of goods, thus enriching our standard of living.

DO TRADE AGREEMENTS HELP TO MAINTAIN OUR MERCHANT MARINE?

Yes. The expansion of two-way trade through reciprocal trade agreements will provide cargoes for the United States merchant marine.

DO TRADE AGREEMENTS HELP TO CONSERVE VITAL UNITED STATES RESOURCES?

Yes. By stimulating the import of vital raw materials into this country, trade agreements help to protect our own supplies from being completely exhausted. Many of our essential raw-material resources have already reached a dangerous low, as the following table indicates:

Raw material:	*United States supply, in years*
Copper	34
Zinc	19
Petroleum (based on proven reserves only)	18
Cadmium	16
Lead	12
Bauxite	9
Vanadium	7
Antimony, mercury, and asbestos	3
Manganese	2

IS THE TRADE-AGREEMENTS POLICY PARTISAN?

By no means. It was renewed by an overwhelmingly bipartisan vote in both the House and the Senate in 1943. And it was endorsed by the last two Republican candidates for President—the late Wendell Willkie in 1940, and Gov. Thomas E. Dewey in 1944.

WHAT DOTH IT PROFIT?

The bitter history of the last 25 years proves unmistakably that high tariffs, economic warfare, and isolationism lead to war. We may well ask ourselves the question posed by the News of Greensboro, N. C., "What doth it profit us to protect some privileged industries or producers, only to lose our dear ones, our way of living, and our civilization?" The late President Roosevelt summed up the alternatives for us in one of his last messages to Congress:

"The coming total defeat of our enemies and of the philosophy of conflict and aggression which they have represented gives us a new chance and a better chance than we have ever had to bring about conditions under which the nations of the world substitute cooperation and sound business principles for warfare in economic relations * * * The point in history at which we stand is full of promise and of danger. The world will either move toward unity and widely shared prosperity or it will move apart into necessarily competing economic blocs. We have a chance, we citizens of the United States, to use our influence in favor of a more united and cooperating world. Whether we do so will determine, as far as it is in our power, the kind of lives our grandchildren can live."

BENEFITS SHARED WIDELY

The over-all benefits from the stimulation of our foreign commerce by the trade agreements program have flowed back to every State in the Union, according to a statistical analysis filed with the House Ways and Means Committee at the request of one of its members. This analysis cites the substantial gains in export sales of major products of each State; in addition, many States produce parts and other materials which find their way into foreign trade through assembly in automobiles, machine tools, office equipment, food, and a wide range of additional products exported from other States.

Direct participation in important categories of foreign trade is herewith shown for typical States in various sections of the Nation:

Typical States	Example of stake	To—	United States sales before and after agreements			
			Year	Amount	Year	Amount
Connecticut	Textiles	Canada	1935	$6,476,450	1938	$9,272,715
	Electrical apparatus	do	1935	4,823,740	1938	7,121,273
California	Wood, paper	do	1935	8,259,663	1938	14,208,740
New Jersey	Paint, varnish, pigments	Cuba	1933	15,000	1938	257,000
Missouri	Hog lard	do	1933	536,000	1938	3,969,000
Minnesota	Wheat flour	do	1933	2,935,000	1938	5,565,219
	Agricultural machinery	Brazil	1935	543,000	1938	1,533,000
Massachusetts	Refrigerator apparatus	do	1935	906,000	1938	1,238,000
	Cotton and cotton manufactures	Canada	1935	2,709,000	1938	4,154,000
Louisiana	Rice	Cuba	1933	114,000	1938	5,175,000
	Petroleum and petroleum products	Canada	1935	5,065,368	1938	10,729,739
Kansas	Wheat	The Netherlands	1934	1,124,000	1938	10,408,000
Michigan	Automobile parts	Belgium	1934	2,713,000	1938	7,895,000

Our Flag

EXTENSION OF REMARKS

OF

HON. BEN F. JENSEN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. JENSEN. Mr. Speaker, the flag—our flag—which our fighting men raised victoriously over Mount Suribachi on Iwo Jima, flies solemnly and gloriously today over the Capitol of the United States.

Every red-blooded American thrills at the sight of our grand old flag. Never before have I experienced such a feeling of pride and thanksgiving, because like every American I can proudly say, "That is my flag"—the symbol of everything big and fine and good, the ideals of true Americanism.

But as we gaze with pride at that flag, with tear-filled eyes, we remember the great sacrifices, the blood and the tears of American men and women on the fighting fronts, and many on the home front, too, who have made possible our many blessings.

From the landing of the Pilgrims at Plymouth Rock we have had a succession of historical events by which our Nation under God has gone forward to greater accomplishments. To the brave men who raised that flag on Iwo Jima, and to all their buddies, alive and dead in this war, and all previous wars in which our Nation has participated, we pledge to you with grateful hearts to keep the faith always.

Mr. Speaker, I ask unanimous consent to read a good and timely editorial by Stanley Norris, editor of the Stanton Zephyr, of Stanton, Iowa, which to me describes so well in written words our thoughts as we look heavenward today and see that flag—our flag—waving in all its beautiful glory over the Capitol of our free land. God help us to be worthy of everything for which it stands.

The editorial follows:

A TRIBUTE TO AMERICA'S PROGRESS

We doubt if anyone has missed that classic picture of American Marines raising the Stars and Stripes over Mount Suribachi on Iwo Jima. What a gripping picture it is! What a thrilling story it tells! Brave men, struggling to take to the most God-forsaken places on earth the beautiful and refreshing symbol of freedom, justice, liberty, and social progress. We swelled with the kind of pride that only an American can experience when we first saw that picture. We saw with it many another classical scene which predicated it in our great country's colorful and proud past. We could see The Spirit of '76, Washington at Valley Forge, and we could vision the great but humble Lincoln as he delivered his mighty speech at Gettysburg. Then imagination hastily took us through the comparatively few but eventful years in which the land of the free has become not only the melting pot of the world but the guiding light of the world. We could see Independence Hall in Philadelphia, the Liberty Bell with its historic crack. There were the Colonial garbed founding fathers, Thomas Jefferson, Benjamin Franklin, and others, affixing their signatures to our immortal basic documents. We could see Robert Fulton's little steamboat braving it way up the Hudson River. James Watt's locomotive which resembled an overgrown teakettle on wheels. We could hear the light-hearted colored folks singing in the cotton fields of Dixie, we saw the begrimed Iowa farm lad emerging from a cloud of dust on his roaring tractor as he tilled the fertile ground between the two great rivers. We saw the twinkling of miners' lamps, the reddened skies from Gary's blast furnaces, and the smoking stacks of River Rouge. We heard the cry of coyotes of our great plains country and thrilled at the majestic beauty of Mt. Rainier. There were ox-drawn prairie schooners headed westward and great river packets riding the crests of our waterways. We saw the Wright brothers take off from the sand dunes of Kitty Hawk, and actually fly in an overgrown box kite, drawn from the earth in a vacuum produced with a crude propeller driven by a gasoline engine. There was Samuel F. B. Morse tapping out "What hath God wrought" on a simple telegraphic instrument over wire he had patiently gathered ahead of fashionable ladies who had hoped to have it for their hooped skirts. We heard the ringing of the woodman's ax and

witnessed Henry Ford demonstrating his horseless carriage with Barney Oldfield blowing into the gasoline tank in order to keep its engine running. We saw Thomas Edison at Menlo Park, working on the incandescent electric light and heard recorded music from his phonograph. We stood with the crowd and stretched in the seventh, just after Babe Ruth had poled out a home run, and cheered lustily as Joe Louis put away another white opponent. We bought chances on a quilt at a Catholic church bazaar and were fitted with a new suit of clothes by a knowing Jew. A Greek made hot-dog sandwiches for us and an Italian barber cut our hair. We hunted and fished in the northern wilds, assisted by Indian guides. Yes, in that great picture we could see and hear a pageant—a pulsating, impatient, and impulsive pageant if you please. It lived as a great and living reminder of all the truly great things for which America is fighting today. Lt. Bob Malmberg was there to witness that stirring sight. So was Capt. Don Beck and perhaps others who are near and dear to people living right here in Stanton community. The raising of the flag there was witnessed by many a brave young man who will never be able to tell his children the thrilling story—a story which will be decisive in our march to Tokyo. We think it most fitting that the Treasury Department has decided to use this powerful picture as its principal theme for the forthcoming Seventh War bond campaign.

Governor Dewey's Second Report to the People

EXTENSION OF REMARKS

OF

HON. CHARLES M. LaFOLLETTE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. LAFOLLETTE. Mr. Speaker, under leave to extend my remarks in the RECORD, I am including hereafter the second radio report to the people of the Honorable Thomas E. Dewey, Governor of New York, delivered on May 4, 1945.

I have included this second report of the Governor of the State of New York because it includes an excellent statement of the history, philosophy, purposes, and anticipated operation of the recently enacted State legislation creating a Fair Employment Practice Commission.

The report follows:

Since last week, when I made the first half of my annual report on the progress of your State government, mighty events are culminating in the triumph of freemen over the Nazi forces of slavery and darkness. The complete collapse of the Nazi armies indicates more clearly than any formal announcement can do that victory in Europe is substantially complete.

I earnestly hope that the people of our State will signalize victory in Europe when it is formally announced by prayers of thanksgiving to Almighty God, prayers for our noble dead, for swift victory over our Japanese enemies, and for the safe return of our ghting men. I hope and have asked that there shall be no interruption of production for victory or of the ceaseless efforts of everyone in our total war effort.

POSTWAR PROBLEMS PRESSING

With the ever-hastening end of hostilities our postwar problems come closer to us. Millions of New York workers will be displaced in the change-over period from war to peace, and 1,500,000 New Yorkers will come home from the armed services.

I discussed with you last week our great veterans program, the building of our essential surplus and the projected highway and mental hospital construction. In addition, the State Postwar Public Works Planning Commission has a broad program ready. It has approved some $14,500,000 of work on State educational institutions and has allocated money for plans for necessary projects in 399 communities of our State, estimated to cost over $200,000,000.

Also in progress is the program to combat the continuing erosion of our shore line by the Atlantic Ocean. Our 200 miles of ocean front is a region of homes, bathing beaches, and summer cottages, as well as of industry and fisheries. This whole shore line has been endangered by storms and wearing away by the action of the sea. So $1,000,000 of State funds have been appropriated to match a similar amount to be put up by the communities, to stop this destruction of our Atlantic coast line and to insure the lives, property, and continuous enjoyment of our people of that great section of the State.

CONCERNING THE ANTIBIAS LAW

One of the laws enacted at this session of the legislature made history not only for the State but for the Nation. That was the antidiscrimination bill, which has probably aroused more misunderstanding than any law passed in our time.

It has been criticized bitterly by persons it will not affect at all. There are those who believe the antidiscrimination bill is designed to fix by law the tastes, the habits, the associations, or the special lives of people. Others believe it is a law to tell you who you may have in your home as domestic help or guests or roomers, or that it will tell employers who they may hire and who they may not hire, or that it is designed to discriminate in favor of one group against another. Of course it is none of these things.

The bill establishes by law the simple principle that in business and industrial employment there shall be no discrimination on grounds of race, creed, color, or national origin. It translates into law what is inherent in our Constitution, and is the very essence of our free society.

SAYS NAZIS LIVED ON HATRED

We are, you know, a nation of minorities. If we allow discrimination against one group, we open the door to discrimination against others until the whole Nation is poisoned by dissensions and hatred. The dying Nazi movement rose to power and lived on hatred and prejudice against all religion and all minorities. It is the ultimate example of the self-destruction of its hateful creed. Discrimination against any minority is, in truth, a threat to the freedom of all.

So a bill was introduced in the closing days of the session last year, in an attempt to meet the problem. However, the bill was clumsily drawn, and introduced so late that no action was then possible. Had it passed, its defects would have destroyed the great objectives we were seeking.

The legislature, therefore at my suggestion, created the temporary State commission against discrimination, under the distinguished leadership of Assemblyman Irving Ives, the majority leader of the assembly. The commission labored successfully and well for almost a year, taking the utmost pains. They held many hearings and heard the opinions of civic, religious, and business groups all over the State.

NEW BILL IS BETTER, HE SAYS

As a result, the commission bill was introduced this year. It was well drawn and designed to meet every sound objection. After some rather bitter opposition, the bill was passed and I was happy and proud to sign it as an act which gives living reality to the great principles upon which our country was founded.

Look at the casualty lists you see printed in the newspapers, the lists of those Americans who gave their lives for our freedom. You will notice that their names stem from England, from Russia, Ireland, Poland, from Italy, and almost every other nation in the world.

They are Catholics, Protestants, and Jews. They are white and Negro. But they did not fight and die as Irish or Poles or Italians, as white or Negro, or as Catholic or Jew or Protestant. They fought as Americans. They died as Americans. They were fighting for freedom, for the dignity of the individual, for equality before the law and for equality of opportunity. Those who come home have a right to expect that they will find here the everliving reality of the principles for which they have fought abroad.

The antidiscrimination bill is a simple and practical measure to make good that expectation for all our people—to make good the sacred guarantees of our Constitution. The new commission has a broad educational job to do.

In addition, if business or industrial employment be denied to an applicant and it is clearly established that this is not because of his incompetenece or on good grounds, but on grounds of prejudice, we have set up a forum, a place to go where both parties can work out the problem by the orderly processes of a civilized society.

Already most large employers in our State have broken down the bars of prejudice in plants and factories, in offices and shops. I have visited factories and shops, all over the State, where people of every race and religion worked happily together.

We want to keep this successful habit of working together. In the end it will bring a better understanding between our people, and I am sure that every one of our citizens will be happy to live in a State which has proudly proclaimed that no man shall be deprived of the right to earn his bread by reason of his race, his religion, or his national origin.

CHANGES IN DELINQUENCY TREATMENT

Major improvements have been made this year in our treatment of delinquency and parole. Years ago as a district attorney I made the decision that some day, if I ever had the opportunity, I was going to do something definite about the tragic spectacle of these youngsters who are put through our criminal courts by a process they do not understand and sent to prison, often to be made worse rather than better.

As a result, some 2 years ago I asked a group of the members of my cabinet whose work was closest to that field to form an interdepartmental committee on delinquency and parole to study the entire problem. Their report, which was filed this year in two parts, is, I believe, one of the most intelligent and progressive studies of the whole field of delinquency and parole ever prepared.

The first step was the creation for the first time of a State Youth Commission to bring together and concentrate on this problem the efforts of all our great volunteer social agencies, of our police departments, schools, and of other agencies of our cities, counties, towns, and villages. Our first task is to find the child before he gets into trouble and get him in the hands of trained people who will solve his problems before they overwhelm him.

In addition, there is a broad program to find the right kind of treatment for boys and

girls who have run afoul of the law, before they are sent to institutions where, all too often, neither the kind of treatment available nor the associations will do them anything but harm. In other words, this is a broad attempt not to fit the punishment to the crime but to fit the treatment to the child, to give him new hope, a new future.

STATE AID FOR EDUCATION

In the fields of State aid for the blind, for epileptics and others of the mentally and physically handicapped, broad new liberal provision was made this year. We are, I believe, at last giving a real future to those who, through no fault of their own, are deprived of the natural opportunity or equipment to grow up as useful, well-adjusted citizens.

So also was great progress made in the field of education by cooperative action of the State and the localities. New York provides the greatest support for its public school system of any State in the Union. Nevertheless, we must not only maintain New York's high standing, but all of us want to take the lead in making sure that our children have the best of all possible opportunities to grow up to be good and useful citizens.

So, after extensive study, we adopted this year a new formula, for distribution of the State's share of the cost of education. It will result in something over $18,000,000 more of State money going annually to our school districts. This is a very large increase and it is my earnest hope that these additional funds will be used in the interest of ever better education for the children of our State.

All these and many other advances in the better service by the State to its people were achieved, I am happy to say, without increased taxation. We were able to continue the 25-percent reduction in State income taxes, resulting this year in a saving of $44,000,000 to our income taxpayers. Local real estate taxpayers and home owners were helped through distributing the State utility tax and $5,000,000 of State aid for snow removal.

In our social services, in the continuing fight to bring equality of opportunity to all our people, in aid to business and agriculture, this has been, I believe, a memorable year in the history of our State. It will be many years before we will harvest the rich fruit of the sound and forward-looking program achieved at this session of the legislature.

I know I speak for all the people of the State when I express my warm gratitude to the members of both houses of the legislature and their leaders for their high-minded approach to the difficult problems we have faced and their great diligence in the public service. In this critical and, we hope, last year of total war we have built broadly for the future—for a better future for all our people.

Expense Allowance for Members of Congress

EXTENSION OF REMARKS

OF

HON. ELLSWORTH B. BUCK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. BUCK. Mr. Speaker, I oppose this rule on H. R. 3109, since I am opposed to the $2,500 expense grant to Members of Congress.

I believe Congressmen are underpaid, and that at the proper time their salaries should be increased. This is not the proper time, however, because of the insistence of the Congress and the administration that wage and salary levels be held within the limitations of the Little Steel formula. This $2,500 is a "fringe" salary increase, and I oppose fringe increases because they accomplish by indirection that which has been frowned upon by direction.

There should, in my opinion, be a positive enactment which would make allowable as income-tax deductions the reasonable expense of a Congressman incidental to the fulfillment of his duties. The legitimate expenses of every businessman, inclusive of living expense away from home, are tax-deductible without question. There is no reason why Members of Congress should suffer discrimination in this particular.

Let us attack congressional remuneration directly, not indirectly.

Needed—A Department of Peace

EXTENSION OF REMARKS

OF

HON. KARL E. MUNDT

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. MUNDT. Mr. Speaker, under leave granted me by the House, I call attention to the following editorial from the Rochester (N. Y.) Times-Union of April 21, 1945:

TWO DEPARTMENTS FOR WAR BUT NOT ONE FOR PEACE

Jan Christiaan Smuts, grand old warrior and peacemaker of the Union of South Africa, believes the world is ripe for a change of heart. On his way to San Francisco, he envisages a world weary of war, ready to break with its past and begin a new epoch in history.

With him in this latest quest will go the hopes of us all.

Yet, in overdramatizing the San Francisco Conference there is danger of expecting too much. San Francisco is not a peace conference. The most that can be hoped for there is that the United Nations will set up a mechanism for settlement of future disputes without resort to force.

But no machinery is sufficient in itself. In 1928 the nations of the world solemnly renounced war as an instrument of national policy. Eleven years later the most brutal and widespread of all wars began.

The Pact of Paris failed because it was negative. One doesn't find happiness by saying there shall be no unhappiness. Neither has the world been able to find peace by outlawing war. For peace is a positive, not a negative, condition.

The simplest way to attain peace is to make peace, not by treaties, although they are important and necesary, but by a cementing of peoples themselves.

We have a Department of War and a Navy Department; why not a department of peace?

But it will be protested: What is the State Department for? That one is easy. The Department of State, like the foreign ministries of every nation, conducts the relations of our Government with the governments of other peoples.

Nominally, all such ministries are agencies for peace, but actually their duty is to attempt to make national policies prevail by diplomatic means. That is to say, they are traders and schemers, for that is the way of diplomacy.

Their failure as agencies for peace is written in the tragic pages of all history.

And the reason is that they deal between governments, not between peoples. Again and again peoples have wanted peace but could not have it.

A department of peace could bring peoples together. We have consuls in nearly every foreign city of consequence to maintain commercial contacts. Representatives of a department of peace in every city are just as important.

Such representatives would not be agents of Government but of the people. They would have no national policy to carry out, save the most important one of explaining America, its manner of life, its ideals, its ways of solving its problems, the elements in its population, and how they work together for the common good.

If we want peace, we shall have to work for it positively. A department of peace could channel all such efforts.

I would like to add, Mr. Speaker, that this morning the House Committee on Foreign Affairs began hearings on H. R. 215, which is a bill I introduced for the purpose of establishing an international office of education. Hearings will be continued next Tuesday morning at 10 o'clock. Such an office would in reality serve to fulfill the functions of a department of peace.

The Plight of the Philippines

EXTENSION OF REMARKS

OF

HON. HAROLD C. HAGEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. HAGEN. Mr. Speaker, on April 17, 1945, Gen. CARLOS P. ROMULO made an eloquent address in the House of Representatives. He told us of the atrocities which were inflicted upon his people by the Japanese.

On the night of Sunday, April 29, 1945, the National Broadcasting Co. presented the Pacific Story, which was written and produced by Arnold Marquis. A Filipino member of the Philippines Commission assisted the National Broadcasting Co. in presenting the Pacific Story.

It was a most interesting story and contained factual information which I feel every Member of Congress should know. As a member of the House Committee on Territories, I am very glad to insert a part of the radio script abovementioned. It is as follows:

ANNOUNCER. The National Broadcasting Co. and its affiliated stations present—the Pacific Story.

This is the story of the Pacific and the millions of people who live around this greatest sea * * * the drama of the peoples whose destiny is at stake in the Pacific war. This is the background to the war in the Pacific, and its meaning to us and to the generations to come.

Tonight's Pacific Story—The Philippines Come of Age, comes to you from Hollywood

and Washington, D. C., as another public service with drama of the past and present, and commentary by the Honorable MILLARD E. TYDINGS, Senator of the State of Maryland and Chairman of the Philippine Rehabilitation Commission.

NARRATOR. A lone Filipino stands at dawn among the shattered and blackened ruins of Manila. A solitary silhouette against the tangled destruction.

JUAN. Out of this will rise a new nation.

NARRATOR. The Filipino people, still bleeding and still suffering, stand on the threshold of independence. But with the realization of this long-sought independence comes a welter of problems.

JUAN. We have waited more than 300 years for our independence. The Tydings-McDuffie Act of 1934 promised independence on July 4, 1945. And in 1944 the American Congress promised independence before 1946.

VOICE 1. The President of the United States is hereby authorized, after the normal functions of government have been restored, and after consultation with the President of the Commonwealth of the Philippines, to advance the date of the independence of the Philippine Islands by proclaiming their independence as a separate and self-governing nation prior to July 4, 1946.

NARRATOR. Today as the battles go on to redeem the Philippines, and the day approaches when the Filipinos will take over their own government, the problems of this new nation are coming more sharply into focus.

OBSERVER. The United States Government stands in the difficult position today of being obliged to keep its word to grant the Filipinos their independence, and at the same time morally to be responsible for the welfare of the Filipinos until they are on their feet.

VOICE 2. If assistance is withdrawn from the Philippines as soon as the Japanese are thrown out, chaos would sweep the islands.

VOICE 3. Yes. Not only is the country devastated, but its economy has been upset. And what about defending itself from aggression?

NARRATOR. Filipino Rehabilitation Commission was appointed to deal with these very problems.

VOICE 1. The Commission shall investigate all matters affecting post-war economy, trade, finance, economic stability, and rehabilitation of the Philippine Islands, including the matter of damages to public and private property and to persons occasioned by enemy attack and occupation.

NARRATOR. That's the wording of the resolution creating the commission which is composed of nine representatives of the Government of the United States, and nine representatives appointed by the President of the Commonwealth of the Philippines.

OBSERVER. It must be realized that among the population of 17,000,000 Filipinos there are a number of different types of people. There are, for example, the Negritos who were in the islands before the Malays came. And there are Indonesians and Chinese, and all these intermixed in the passing years.

VOICE 2. But that's what happened in the United States, too, isn't it? The Filipinos must be able to control their own internal affairs.

OBSERVER. It must be remembered that the Filipinos were held down by the Spaniard for centuries. Only in the last half century have they been given the opportunity to emerge. Some of the Filipinos, before the war, lived on an aristocratic scale. A somewhat larger group made up the middle class, but the vast majority—the group called the taos—lived on big estates, and were more or less at the economic mercy of landowners like feudal lords.

NARRATOR. While the Filipinos are rebuilding their war-torn land, they must still eat. At the same time, they must take their place, along with the other nations of the world, outside the tariff wall of the United States. For years the products of the Philippines were inside the American tariff wall. As a result, the Philippines were dependent on the American market. Before the war, 75 of the Filipino exports went into the United States tariff free. Under the law, tariff taxes must be paid on these exports after the Philippines get their independence.

OBSERVER. During one 3-year period before the war the Philippines sold to the people of the United States some $520,000,000 worth of goods—cane sugar, coconut oil, hemp, and so on. Nearly all of this was sold without the payment of any tax whatever. The tax on these goods amounted to some $440,000,000. If this tax had been paid, the Filipino producers and the Filipino laborers would have received only $80,000,000 for these products, or a loss of $440,000,000. Now, unless some special arrangement is made, after the Philippines get their independence, they will have to pay these taxes the same as any other independent nation.

NARRATOR. The Philippines were to have had a 6-year transitional period to prepare gradually to pay such taxes.

VOICE 3. Starting in 1941, the Filipinos were to pay 5 percent of the regular tax on goods sold in the United States. In 1942, they were to pay 10 percent. In 1943, 15 percent, and so on—5 percent more each year until it reached 25 percent in 1946. Then in 1947, after the Philippines had been given their independence under the Tydings-McDuffie Act, they were to pay the same export tax as any other nation.

NARRATOR. That was the plan. But the war in the Pacific changed all that. There was no transitional period.

OBSERVER. That means that, under the law as it now stands, the Philippines will have to pay full export taxes on goods sold in the United States almost as soon as they get their independence.

VOICE 2. Will the Philippines be able to pay this right off the bat? I mean, at the same time their country is being rehabilitated?

OBSERVER. That's a grave question. The only way they could pay it would be to lower the cost of production.

VOICE 2. Could that be done?

OBSERVER. Not without lowering wages and living standards. And, if anything, wages and living standards must be raised in the Philippines.

NARRATOR. Before the war the Philippines sold nearly all of their products to the United States tax free.

VOICE 1. Ninety-nine percent of the Philippine sugar was sold to the United States.

VOICE 3. Ninety-four percent of the coconut oil.

VOICE 4. Ninety-nine percent of the embroideries.

VOICE 1. One hundred percent of the canned pineapple.

VOICE 3. One hundred percent of the desiccated coconut.

VOICE 4. One hundred percent of the pearl buttons.

OBSERVER. To put it another way—of the $128,000,000 worth of goods exported annually by the Philippines to all countries, $100,000,000 worth of it was exported to the United States. And after the Philippines get their independence they will have to pay taxes on every dollar's worth that comes into this country.

NARRATOR. As a result of this some of the Philippine industries would cease to exist so far as selling to the United States is concerned. In addition to facing the problems that will arise with the ending of free trade between the Philippines and the United States, Juan, the average Filipino, faces the problems of internal policies. For years the Philippines virtually had a one-party monopoly. He actually had little say in the affairs of his government. When his country gets its independence he will, in all likelihood, have more of a say. But until this comes about he will not have the same opportunities as many in the classes above him, especially the professional politicians.

VOICE 3. The average Filipino will have to take a more active part in the affairs of his government if he is to benefit by having his country get its independence. But is he able to do this?

OBSERVER. It must be remembered that the Philippines have been influenced by many peoples and many cultures. They were influenced by the early oriental empires, long before the first white man arrived. Then they were controlled by Spain for more than three centuries while Portugal and the Netherlands and England tried to gain a foothold in the islands. Since 1898 they have been occupied by Americans. It must be recognized that the Filipinos have been a dependent people for about 500 years. The average Filipino has had little opportunity to put his natural skill into practice. This will come.

NARRATOR. But before the body politic of the Philippines as a whole becomes operative, the enormous problem of a new statehood must be faced.

VOICE 4. Are the Philippines going to be able to defend themselves?

VOICE 2. How much responsibility is the United States going to assume for the defense of the Philippines?

VOICE 4. With the economic conditions they face, how can the Filipinos afford a strong military?

NARRATOR. These questions, long in the consciousness of leading Filipinos, will come sharply into focus when the Philippines become a sovereign nation.

FILIPINO 1. It will not be an immediate problem.

NARRATOR. So say the Filipino leaders.

FILIPINO 1. When the war in the Pacific is over, the Japanese will not be an aggressive threat for many years to come.

VOICE 1. But ultimately, the Philippines must be in a position to defend themselves.

FILIPINO 1. With at least a generation of peace, we shall be able to defend ourselves as well as any small nation is able to defend itself. We have shown in this war that we are able to take military responsibility, and our men have fighting qualities equal to those of men of any other nationality. Besides, there is the over-all matter of peace in the Pacific.

VOICE 1. You mean that the United States and Britain will keep peace in the Pacific?

FILIPINO 1. Yes, if a small nation, such as the Philippines, is in danger, then the largest nations on earth are in danger. We learned that in this war. For the preservation of world peace, the big powers cannot stand by and permit small nations to be swallowed up by aggressors.

VOICE 1. It should be remembered, that when the American flag is lowered over the Philippines, and the Filipino flag goes up, that the responsibility for defense of the islands must be assumed by the Philippines.

FILIPINO 1. That is true. But in the larger sense, all the nations of the Pacific represented on the Pacific Council, must be committed to keeping the peace. For many years to come, it will be necessary for the United States and the other nations of the United Nations to maintain strong land and air and sea bases throughout the Pacific. Some of these bases will be in the Philippines. This does not mean that the United States will take over the defense of the Philippines. It means that we are cooperating against aggression. For we shall have an army to put into the field as large, proportionate to our population, as other nations.

VOICE 4. The United States bases in the Philippines could imply that we are, actually, assuming responsibility for your defense.

FILIPINO 1. No; not any more than the American bases in Trinidad and Bermuda and Dutch Guiana imply the same thing for those places. What it means is that, in the

interest of peace, nations are beginning a new era of cooperation. And, even more than that, it means that in the Philippines the United States has a loyal friend in the Far East, and this will go a long way toward the protection of American interests in this part of the world.

OBSERVER. In the broad sense, the coming independence of the Philippines will usher in a different kind of cooperation between the two nations. Each must be responsible for its own defense, but each, for mutual protection, must help the other.

NARRATOR. The question of American bases in the Philippines is covered in the Tydings-McDuffie law.

VOICE 1. The President of the United States is authorized to enter into negotiations with the government of the Philippines not later than 2 years after the independence of the islands to settle all questions relating to United States naval reservations and fueling stations in the islands.

OBSERVER. So, exactly what bases the United States will have in the Philippines will be settled within 2 years after the islands get their independence.

NARRATOR. The Government of the Commonwealth of the Philippines has asked that the complete independence of the Philippines be proclaimed on August 13, 1945 * * * the first anniversary of the landing of American troops on Leyte. To help make this transition, the Philippine Rehabilitation Commission is studying the great, complex problem, and gathering all possible data. But before it loom vital questions.

VOICE 2. How can they tell the extent of the damage or the amount of relief that will be needed until the Philippines are completely conquered?

VOICE 3. How are they going to handle the matter of money, with much of the pre-war money destroyed, the islands flooded with Japanese pesos, and newly printed American currency now being used?

VOICE 2. How long a transitional period will be set up, and what kind of provisions will be made to facilitate the transition, and how will it be integrated with the United Nations Relief and Rehabilitation Administration?

FILIPINO 1. We will establish an office here in the Philippines.

NARRATOR. This is a Filipino member of the Philippines Commission who has already returned to his home islands.

FILIPINO 1. We are now in the process of organizing a complete staff of clerical and legal experts. This staff will carry out the work of the nine Filipino members of the Commission.

NARRATOR. A similar office will be established in the United States.

OBSERVER. The American members of the Commission, for the most part, will operate in the United States. And the two offices will report to the Governments of the Philippines and the United States.

VOICE 4. Just what powers will this Commission have?

OBSERVER. Its job will be to investigate and recommend. It may recommend, for example, that a preferential trade agreement running over a period of, say, some 20 years, be enacted to help the Filipinos get on their feet. Such a trade agreement, of course, would have to be enacted by the Congress of the United States. Or, it may recommend that rehabilitation to a certain extent, agreeable to both the Philipino members and the American members, be undertaken.

VOICE 4. There's a possibility of conflict within the Commission about problems of that kind, isn't there?

OBSERVER. Yes. There will be differing political views among the members, and, besides that the Commission may be in conflict even with the agencies of the Commonwealth Government and the Government of the United States. But whatever the difficulties, they will have to be resolved. For the Philippines stand as the first nation voluntarily to be freed, and as such stands as a symbol of hope for all the oppressed peoples of the world.

NARRATOR. A lone Filipino stands at dawn among the shattered and blackened ruins of Manila * * * a solitary silhouette against the tangled destruction. This is Juan who, at last, stands on the threshold of freedom.

JUAN. Out of this will rise our new nation.

Resolution of the Wisconsin Legislature

EXTENSION OF REMARKS

OF

HON. ANDREW J. BIEMILLER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. BIEMILLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to state that there has been a mistaken opinion that the people of Wisconsin are isolationist and opposed to the Dumbarton Oaks and Bretton Woods agreements. Actually there has never been any basis for this mistaken belief. Concrete evidence to the contrary was shown recently by the introduction of Joint Resolution 68S in the Wisconsin Legislature by Senators Laird (Republican), Tehan (Democrat), and Risser (Progressive). Both the State senate and the assembly passed this resolution unanimously. It reads as follows:

Resolution extending cordial greetings to the United Nations Conference at San Francisco and pledging support to the objectives of the Conference

Whereas the United Nations are gathering in San Francisco on April 25, 1945, to build a world organization for security and lasting peace on the basis of the Dumbarton Oaks proposals; and

Whereas the unity of the Allies and the United Nations which insured us victory in this people's war over Fascist barbarism must be continued and strengthened to prevent future wars; and

Whereas the hopes of all freedom-loving peoples are centered around the San Francisco Conference where the United Nations organization will be established for the cooperation of all peace-loving nations in a world of peace and order; and

Whereas the American people resolved upon the death of Franklin D. Roosevelt that the success of the San Francisco Conference must be assured as a living monument to his memory; and

Whereas the Bretton Woods agreement constitutes an important part of the plan for world cooperation and lays an economic basis for increased foreign trade, full production, full employment, and better world-wide living conditions, all of which are essential to the establishment of a lasting peace: Now, therefore, be it

Resolved by the senate (the assembly concurring), That this legislature extends a most cordial greeting to the delegates to the United Nations San Francisco Conference, expresses its best wishes for the success of the Conference, and pledges its support to the objective of the Conference, namely, to establish a world security organization, based upon the Dumbarton Oaks and Bretton Woods proposals, to prevent aggression and build a peaceful and prosperous world: Be it further

Resolved, That properly attested copies of this resolution be forwarded to the presiding officer of the United Nations San Francisco Conference and to each member of the United States delegation to said Conference.

Mr. Speaker, I am confident that the views expressed by the people of the great State of Wisconsin will prevail and that we will soon have before us a report from the Committee on Banking and Currency for passage of the pending legislation on the Bretton Woods agreements and that the Dumbarton Oaks proposals now under consideration at the San Francisco Conference will be before the Senate before very many more weeks go by. Certainly if we are to build a peaceful and prosperous world both of these measures should pass the Congress with expedition.

Experience of a Red Cross Worker Seeking Reemployment

EXTENSION OF REMARKS

OF

HON. CHARLES M. LaFOLLETTE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. LaFOLLETTE. Mr. Speaker, the attached article which appeared in This Week, March 11, 1945, setting out the experience of a Red Cross worker seeking employment, was handed to me by a young naval officer who has been seriously injured as a result of 2 years' of service on mine sweepers in the Pacific.

I am introducing this article into the RECORD as a startling example of the thing that we do not want to happen in America as this war enters its final stage nor after its conclusion:

BACK TALK

Best letter of the week is this one from a Red Cross girl. We were so impressed that we are giving it all our Back Talk space:

"DEAR SIR: After 18 months in Asia with the American Red Cross, I recently returned to the United States on a medical recommendation. I could not go overseas again for at least 4 months, since it takes one a little time to get over malaria. And so it occurred to me that I should get a desk job while waiting.

"Yesterday I started looking for a job similar to the one I had before going overseas. My first call was on one of New York's leading employment agencies. I walked into a luxurious room entirely empty of applicants and was immediately granted an interview with a smartly-clad female executive. She handed me the usual questionnaire.

"(I wrote: College graduate, business course, 1 year studying advertising copy and layout, 5 years' experience in the advertising department of a leading national publication.) She asked where I had been for the last 2 years. I told her.

"You will find this hard to believe, but it's true. She twirled her novelty wrist watch, looked out of the window and said, 'You must realize that while you've been overseas, the girls at home have been getting experience which makes them much more qualified for the salary you ask. I suggest you take a cut in salary, since your business value has slipped. In a year you may work up to where you were before.'

"I thought. 'This is actually happening! The soldiers in Burma and India and China said it could, and they worried about it. We

discussed the soldier's future employment status, his ability to take up where he had left off—or, for the younger ones, to start out against experienced workers.

"So I wondered if this was a typical reception and if it was awaiting all those boys. 'Your value has slipped.'

"GOOD REASON TO BE MAD

"I looked at the employment executive's half-inch nails and smug face and was mad. Of what use those hands in making a fire from the rot of the jungle! Washing a thousand coffee cups each day in chlorinated water! Tucking in the mosquito netting of a sick soldier. My business value had slipped doing that!

"And so when she consolingly said, 'Don't be discouraged,' my reply was, 'I am discouraged—but not with myself. It's with you and those like you who have something very important, very delicate to handle. Is this what awaits our returning servicemen? "Your value has slipped." If they get this reception now, when employment is booming, what are you going to say to them later on, when it isn't?'

"The lady had no answer, and I left her office. A cold wind was blowing outside—and I still feel cold.

"Today they are the men of the First Army and the Third Army and the Fourteenth Air Force. Remember, they're fighting with grim determination now, and you like to hear that on the radio. Tomorrow they will be ex-soldiers looking for a job, and they won't lose that grim determination in fighting—not for a while. And America had better be prepared.

"M. J.

"NEW YORK, N. Y."

The Arkansas Story

EXTENSION OF REMARKS

OF

HON. OREN HARRIS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 9, 1945

Mr. HARRIS. Mr. Speaker, we are very anxious that the people throughout the Nation know all about Arkansas—our development, our progress, and our opportunities.

The Governor of our State, the Honorable Ben Laney, is giving a most excellent account of the facts regarding Arkansas today in Chicago. He gave this story to a large audience in New York last week. As it is so expressive of the heritage, courage, and determination of the people of our State, I ask leave to extend my remarks in the RECORD and include therein this excellent presentation of Governor Laney on the Arkansas story.

I invite the attention of every Member of the House and the people throughout the Nation to it:

Mr. Chairman, gentlemen, you have extended me an opportunity, here, to tell you the Arkansas story. For this I personally am grateful. And I can express to you also the gratitude of all of my people in Arkansas.

There are 2,000,000 of us. We feel we have a story to tell. It is not the old "down in Arkansas" story which you may have heard so often in the past.

No; this one is altogether different.

The old story never was any too factual. This new story has been documented.

In the beginning, I should like to apologize and ask your indulgence of my use of the personal pronoun in a few personal references which I think are pertinent to the first part of this story.

Something is happening in Arkansas. No one man has brought it about. No one man, be he Governor or magician, is going to see it through, single handed, to its ultimate fulfillment. The success of the movement rests preponderantly in the hands and on the shoulders and in the minds of the people of Arkansas, our John Doe's and the Mr. John Q. Public's. The sons and daughters of those great men and women who started with nothing at the end of the Civil War. The men and women who endured poverty and oppression without losing their spirit and determination to build a great State. They have given to us a rich heritage and the people of Arkansas today are proving themselves worthy of that heritage.

Last summer I campaigned for the office of Governor of Arkansas. I was a businessman. I still am. It wasn't an easy matter to leave my personal affairs in other hands for months and put all of my thought and energy into such a campaign. My decision to do just that had been reached only after several years of close observation of the operation of our State government.

As a businessman, as a taxpayer, and as the father of three sons, I had finally become alarmed at what I saw.

But there didn't seem to be any remedy. Talking to my business associates and contemporaries; viewing with alarm; going up to the capitol at Little Rock and registering a personal squawk—these measures accomplished absolutely nothing.

Every year or two, this tax, or that tax, would be boosted. Every year, the operating budget of our State government increased. Year by year, new commissions, new agencies, appeared. And the State government pay roll climbed like Jack's fantastic bean stalk, up and up and up.

In all these things Arkansas was by no means setting a precedent. I think you all can agree with me on that. The trend in Arkansas, and I must say elsewhere, was toward higher taxes, mounting cost of government, pyramiding departments and commissions; and despite the ever-mounting pay roll, there was noticeable to me upon close observation, a very definite deterioration of efficiency in the necessary functions and services of government.

So I took the big step. I announced my candidacy for governor. In my campaign I went to the people and reminded them that everybody had always talked about how wonderful it would be to have a businessman in the governor's office—just once. I promised the people of Arkansas to do two very simple things: Improve the efficiency and lower the cost of government.

Not a single political observer considered my candidacy seriously.

But on election day last July the people of Arkansas gave my simple two-plank platform such an overwhelming endorsement that my election was assured.

From that day until my inauguration 6 months later, I studied.

After arranging my personal business affairs, I put every moment into a study of all phases of the job I was to undertake and also a study of the State which I was to serve as chief executive. To assist me in these studies, and in drafting the subsequent plans of my administration, I summoned a group of business and professional men whom I considered to have two attributes in common: a willingness to render a public service; and a distaste for receiving money or political favors for that service.

Yes, we have many men in Arkansas in that category, as you shall see.

We selected as our first subject for study, the actual government of the State—forgetting for the moment the broader aspects of the job.

Well, we were in debt, but our State income was high—higher than in history—and we had accumulated treasury balances, in cash and securities, totaling $44,000,000.

Yet some of our State operated institutions and services were suffering for money. The tax revenues earmarked for their use had dwindled at the source.

Other funds were as rich as a Midas could have made them—far exceeding the normal need of the services maintained by them.

Our State government as a whole was indulging in prosperity spending.

We found the State pay roll to be staggering under the oppressive weight of approximately 6,000 jobs. We found in existence, 10 commissions numbering some 65 members assigned to handle the State's fiscal affairs. We found 7 separate agencies of government engaged in a confusing, overlapping, and inefficient effort to develop Arkansas' natural resources.

We discovered two costly regulatory agencies with not enough work to keep both of their large staffs busy, and with their fields of work closely allied. These were our corporation commission and our department of public utilities, both studded with high-priced personnel.

We found the system for tax revenue allocation and distribution to have the amazing total of approximately 100 separate funds. This was a patchwork, hydra-headed system which had been built up through 50 years of changing ideas and tugs-of-war between the special-interest groups. It had finally become a burden on every single function and service of government, a millstone around the necks of the long-suffering taxpayers.

I believe you will join with me when I say again that this situation which we found in my State is not peculiar to Arkansas. In my study of the record at home and of the records of many other States, I didn't find all of the remedies. Some we had to originate ourselves.

There wasn't anything we could do with our highway indebtedness except to make it more secure. But there was something that could be done with our other seven and one-half million-dollar bonded debt. We could get the money ready to pay that. And that is what we did in the Arkansas General Assembly last January and February.

We couldn't use the accumulated $44,000,000 cash and securities in the special accounts in the treasury. But we could certainly set it aside as a protective interest-drawing backlog. We did that.

The flow of money into this backlog of special accounts we cut off entirely, and we directed it into a single fund which eliminated all of the one hundred-odd funds—the overlapping, complex, archaic allocation machinery which was choking up our State functions and services.

That was a pretty drastic innovation, I'll tell you. But when once understood, it drew the support of everybody. This was one of the remedies we had to originate. The act was called the revenue stabilization law.

Simply stated, the act rearranges the allocation and distribution of State funds so that no function or service of our Government is dependent upon any one certain tax source; with the exception, of course, of our highway debt service, which is maintained by the State tax on gasoline and motor vehicle license fees; and self-supporting agencies.

The act earmarks a yearly minimum of $1,500,000 and a maximum of $3,600,000, depending on the level of tax revenue, for retirement of our nonhighway bonded debt. This will be accomplished in from 3 to 4 years.

And when this debt has been liquidated, the tax revenue previously earmarked for it will not be needed. So why not then begin a program of tax reduction. Well, such a

tax reduction program is an automatic feature of the bill.

In order that the legislators and the public could have a simplified exposition of the revenue stabilization plan, we drew up an explanatory folder. Some are available for those of you who would like to have one.

Before we even introduced this stabilization bill in the general assembly, we consolidated 10 commissions dealing with the State's fiscal affairs, creating one new agency, the State board of fiscal control. The Governor is chairman of the board, with a vote only in case of ties. Eight other top State officials make up the board.

Some of the functions are to: determine the amount of ad valorem taxes necessary, and to certify the State rate to the respective counties for collection; to set the amount of surety bonds of all officers and employees of the State and counties; to supervise the depositing of all public funds of the State of Arkansas; to make all investments of State treasury funds, and of the reserve fund created to secure the payment of our highway bonds; to prosecute the plan to retire our nonhighway bonded debt in advance of maturity; to handle all refunding and other matters affecting the bonded debt of the State; to pass upon all petitions of departments, agencies, and institutions of the State, for funds to be used for emergencies; to sit as a quasi-judicial body for hearing all claims against the State of Arkansas, over which it has exclusive jurisdiction; and to handle many other important matters of a fiscal nature.

Legislation was enacted to merge the corporation commission and the department of public utilities into one agency, the public service commission. In this a substantial savings was effected. For example, the consolidation eliminated three commissioners in the high salary bracket and a number of employees. And the combined docket of the new agency is current. No person having business with either of the old agencies has been delayed or inconvenienced. As a matter of fact, all the functions are being carried on more efficiently.

I gave a great deal of study to our development and conservation agencies—seven of them—and I studied the plans of a great many other States. What we did, finally, was to consolidate the seven development and conservation agencies into one, the Arkansas Resources and Development Commission.

The new commission absorbed the geological department, the parks commission, the forestry commission, the flood-control commission, the soil-conservation services, the agricultural and industrial commission, and the planning board. A substantial savings was effected here, too. And an improved efficiency is already being manifested. We now have 15 commissioners, where we used to have 54.

In addition, we eliminated other unnecessary agencies. We completely overhauled two of our most important departments—the comptroller's office and the revenue department. As a matter of fact, we went through the entire set-up of administrative and functional machinery and tightened up, pruned, and abolished.

I find it quite satisfying to tell you that just before leaving my office I had a report from my comptroller which revealed that 543 jobs had been abolished during the first 3½ months of my administration—jobs ranging from the lowest to the highest brackets.

I also find it quite satisfying to tell you that we already have reduced taxes in Arkansas. Two of the last bills I proposed to the legislature—after our consolidations and eliminations had indicated their soundness—were tax-reduction measures.

First, an act to eliminate the State tax of $9 on the second $1,000 of valuation on all homesteads. The savings to taxpayers of Arkansas won't be tremendous in the aggregate, but the satisfaction in this act comes from the reversal of the trend of ever-mounting taxes.

Second, an act which, in effect, eliminated the State inheritance tax.

Very likely you are all familiar with the fact that the Federal Government allows a credit for State inheritance taxes paid in an amount not exceeding 80 percent of the basic Federal estate tax. Under Arkansas law, our inheritance tax is an amount equivalent to 80 percent of the basic Federal tax insofar as the estate of a deceased resident is concerned. As to nonresidents, the State collects an amount equivalent to that proportion of the Federal estate-tax credit that the value of the real and tangible personal property having a situs in Arkansas bears to the total value of the estate of such deceased nonresident. Or, stated in another way, the total death taxes, both State and Federal, which would be levied upon the estate of either a resident of the State of Arkansas or a nonresident having real and tangible personal property situated in Arkansas would be no more than such estate would be required to pay in Federal estate taxes alone if the deceased were a resident of a State which imposed no death tax whatever.

The larger, long-range tax-reduction program incorporated in our revenue stabilization law will finally eliminate all State tax on real and personal property. I'm one of those local government advocates. I believe that all units of government should stand on their own feet in every sense of the word. It is my opinion that in Arkansas the ad valorem or property tax field should be left to counties, municipalities, and school districts. On the other hand, I believe the income and inheritance tax fields should be left entirely to the Federal Government. I want to see our State income tax eliminated, and I believe that this hope can be realized within a few years if our goal for industrial development and a higher per capita income for all of our citizens is attained.

This concluded my legislative program for changes which, you might say, were under the dome of the capitol building. My other field of study, which I mentioned at the beginning, was the State of Arkansas, as distinguished from the government.

I already had considerable knowledge of this subject. In fact, I had worked with some of our basic natural resources all my adult life. My farms had made money in food and feedstuffs; from other parcels of my land I had brought in petroleum; I had maintained paying beef cattle herds on my pastures; and I had in a business way handled many other resources. For years I had been a member of civic committees, both State and local.

And I had always had a great pride in my native State.

Here is what my study of the State of Arkansas showed:

One of the great agricultural States—third in production of cotton; second in yield per acre; third in rice; third in spinach; sixth in soybeans; fourth in snap beans; fifth in peaches; in fact, high in most of the products of the soil. I found that Arkansas had soil that would grow anything produced in the United States.

One of the great timber States—third in the South in production of timber, ninth in the Nation. We have 20,000,000 acres of timber, and this resource now is perpetual. Arkansas has more forest land under growth-and-cutting management than any State in the Nation, not excepting even Washington and Oregon. In fact, Arkansas pioneered the growing of timber as a crop.

One of the great mineral States—with the greatest array of mineral wealth anywhere on earth. We have all of the fuel minerals. In petroleum we rank high in the midcontinent area; our natural-gas reservoirs are vast beyond description; we have almost 2,000,000,000 tons of bituminous and semi-anthracite coal which sells at premium prices throughout the Midwest; and we have lignite in great quantities.

The story of our metal minerals is amazing. We supply 97 percent of the Nation's production of aluminum ore; we have been contributing substantial quantities of the Nation's production of mercury, manganese, titanium, zinc, and lead. Among our nonmetallics are barite, gypsum, limestone, mica, novaculite (incidentally, the only novaculite in the Nation), quartz crystals for radio oscillators, slate, chalk, glass sand, tripoli, phosphate rock, marble, asphalt sands, and some 40 others of less economic importance.

One of the great water resources States—for navigation, for irrigation, for hydroelectric power. Our nine highland streams, including the great White; the Arkansas which traverses the middle of our State; the Ouachita; the Red; and the Mississippi which forms our eastern border—these streams constitute one of the richest water resources in the Nation. We have only to further develop their potentials.

One of the great recreational States—with 2 magnificent mountain ranges, with the highest peaks between the Appalachians and the Rockies, 2 of the greatest of America's national forests, the oldest and finest national park in America, 8 State parks, and 500 private resort establishments scattered throughout our Ouachitas and Ozarks. We had 4,000,000 visitors in Arkansas in 1940, the last normal year for tourists and vacationists.

One of the great arsenal States of our Nation at war—with five tremendous arsenal establishments including the largest rocket plant on earth and the Army's No. 1 firebomb plant.

I found that Arkansas wasn't altogether an agricultural State. One of our aluminum plants, for instance, was producing twice as much of the silvery metal as the entire Nation used in the last pre-war year. And I found, incidentally, that the cost of unit production in this plant was lower than in any other similar operation in the Nation. We have 1,600 timber processing and woodworking plants including furniture manufacturers known throughout the country; our ceramics and pottery industries have national markets; Arkansas cheese made by Kraft and Cudahy and others is as fine as ever came out of any State.

Other things manufactured in Arkansas are too numerous to catalog here, but a few are: Baseball bats of a recognized brand name; handles for all kinds of implements; textiles, such as work clothes material and broadcloth of the finest quality; garments, shoes, hose, shirts, ties; boxes and crates and toys; bows and arrows for archery; canned vegetables and fruits; and a thousand and one other things.

The greatest need in the State of Arkansas, as I saw it in my preinauguration studies, was for the mobilization of a force for the further development of our natural resources and the exploitation of our many unusual attractions. It was obvious that we needed to increase our income from manufacturing and thereby obtain a more desirable balance in our agriculture-industry economy.

As the spearhead for this job, the logical agency was the new resources and development commission. I appointed one of Arkansas' most successful businessmen to the nonsalaried job of chairman of the commission, and as his advisory board, I selected 14 additional outstanding businessmen, mainly on the basis of their specialized knowledge and experience with the various categories of our resources.

I intended that this commission be a working commission, not the usual window dressing. Not only has it functioned as a working commission for 2 months; it has fulfilled

my most cherished hope. For this Arkansas Resources and Development Commission has now mobilized a large segment of our human resources into a movement which has been called aptly Arkansas Business Men in Action.

This is the "something" of which I spoke in the beginning. The working nucleus of the movement is 1,000 business and professional men. Groups of them are organized in every county in the State, in virtually every community. They are all members of the State economical council—chamber of commerce. Surrounding them in their respective communities are other hundreds, so that this civic agency ultimately may mobilize the whole human resources of Arkansas.

Every single one of its activities is tied tightly to our government agency, the resources and development commission. Among its membership are the officials of all of the State's leading industries, and many of these industries have research laboratories which now will be coordinated with the overall development program; also we have established a research bureau in our university whose findings will furnish us with new ideas in processing, manufacturing, and utilizing our raw materials.

Last month, in Little Rock, these Business Men in Action met and pledged to me, as Governor, and the resources and development commission, as their spearheading agency, the full resources of their organization.

Our plan for the further development of Arkansas' resources is directed into two fields. We are endeavoring to attract big industry to Arkansas, and we shall certainly try to obtain the conversion of a half dozen big war production plants.

But the emphasis in Arkansas is on the small manufacturing and processing plant with from 25 to 250 employees. We are going to sectionalize the State and catalog the raw materials in each section. Then we are going to prepare engineering studies or prospectuses on 15 or 20 different small-plant possibilities in each section, utilizing the raw materials at hand. Our business colleagues in the various sections of the State are going to do a local selling job and investing on their own, so that these small manufacturing projects will have a closer than usual tie to their communities.

The plan is already working. A few weeks ago a new shoe factory began operating in Jonesboro, Ark. This is in the heart of our livestock and cotton area. The major share of the capital was supplied by the St. Louis concern whose brand name will be on the shoes, but a substantial part of the capital was subscribed by Jonesboro people.

Arkansas laws are, we think, an asset to the movement toward industrialization which we have begun. Our workmen's compensation law is one of the best in the Nation. The Governor and our new resources and development commission are empowered to waive State property taxes up to 10 years for new industries or additions to existing industries.

One of our greatest assets in the industrialization plans is the availability of good, dependable labor. Arkansas war industries alone represent factory capacity of nearly a billion dollars investment. Most of this production required skilled labor. Arkansas furnished virtually all of this labor. Our men and women were found to be unusually adaptable. Another advantage has been the history of harmony between our labor and management, and between competing labor organizations in Arkansas. There have been practically no strikes in the past 4 years.

The dexterity of 150,000 pairs of hands developed in Arkansas by 4 years of such meticulous tasks as loading fuses, detonators, shells, and bombs offer a rich reward for industrialists who locate in our State.

Yes; there is great promise in the new movement for development in Arkansas. I think the promise is brighter than usual, mainly because, for the first time in my memory, business and Government are working as a team, with full confidence and trust in, and yes, admiration for, each other.

That promise and the facts behind it which I have related constitute the Arkansas story.

There have been many old moss-backed stories circulated throughout the Nation which we in Arkansas have not liked. There once grew an opinion among the uninformed that Arkansas was a backwoods State.

Actually, we spend more of our State tax dollar on education than many richer States; actually a larger percentage of our children go to school than the percentage in 22 other States. And we stand at the top of the South in the literacy of our citizens, leading 11 other States.

The native of no State on earth has greater cause for pride than has the man from Arkansas. The last portion of my inaugural address was devoted to this subject—State Pride. In it, I urged my people to implement their State pride with knowledge about their State, and then manifest it everywhere they went and in every way they could devise. That is the way we can best combat the old Down in Arkansas story.

Indulge me one admonition in closing, and I present it with all due respect: The time for selling Arkansas short has long since passed. While a vast section of our country has been bled of its natural, God-given wealth, Arkansas has been busy discovering her's.

While the North and Northeast have built an economy largely on importation of raw materials, Arkansas has been getting wise. The inventory of our raw materials is now complete. And we have begun to apply the wisdom gained.

If you want to get rich and live a happy, healthy, tranquil life, you might well consider Arkansas. For besides being one of the richest in resources, Arkansas is the healthiest State in the entire Nation. Number one for health. And the documentation for this may be found in the latest statistics of the United States Bureau of the Census.

That is the story of Arkansas, a story of progress under extreme handicaps and difficulties, progress in times of depression or prosperity, progress in times of peace, progress under the stress of war, progress initiated, developed, and achieved by determined, courageous, God-fearing native Arkansans.

On behalf of 2,000,000 industrious, intelligent, healthy, and proud Americans in Arkansas, I thank you again for this opportunity.

The Illusion of Subsidies—Farm Business Prospects

EXTENSION OF REMARKS

OF

HON. CHARLES A. PLUMLEY

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. PLUMLEY. Mr. Speaker, under leave heretofore granted, I am including as an extension of remarks two very worth-while editorials from the St. Johnsbury (Vt.) Caledonian of Tuesday, May 8, 1945, the first entitled "The Illusion of Subsidies" and the other "Farm Business Prospects," as follows:

THE ILLUSION OF SUBSIDIES

According to figures released by the War Food Administration, a total of $3,314,170 was paid to 26,342 New England dairymen in the form of milk subsidies in November and December 1944. Vermont dairymen received almost half of the New England total payments, or about $1,250,000.

Notwithstanding this beneficence of the Federal Government, leaders of agriculture in New England are aware of the fact that subsidies are the great American illusion. Not more than 2 months ago, Dr. H. P. Young, manager of the Northern Farms Cooperative, wrote to a correspondent: "We have emphasized time and again to our members who favor subsidies that we thought it was a bad program for milk producers for the principal reason that we never know when it will be cut out from under us."

This practical viewpoint of the unsoundness of subsidies may be amplified on a broader economic basis. Consumers are now paying only a part of the cost of living. The rest is paid by the United States Government, whose source of income for subsidy payments is taxes collected from all the people and money borrowed from them. The practical result is that food costs are not based upon ability to pay. The rich and well-to-do who are amply able to meet the real costs of living, pay no more than the less-fortunate possessors of wordly goods.

Federal contributions to consumer living costs have now reached huge sums. Estimate for subsidy payments to producers of milk throughout the Nation now reach the staggering total of $350,000,000. More than 20 commodity programs have resulted in Government losses. Subsidies create only an illusion of saving. They will be discontinued when the full burden of war costs is felt by the people.

With such a result inevitable, agricultural leaders will do well to plan effective measures to cushion the shock of discontinuance of subsidy payments. Dr. Young of the Northern Farms has the right idea—to secure the adoption of an amendment to the Federal order "that will equal the present returns to producers, including the present subsidy."

Such a program would have the effect of substituting straight pricing for subsidies. It affords the logical way out of an unsound economic means to support agriculture. A price level sufficient to cover the entire cost of producing fluid milk plus a reasonable profit is not disproportionate to the buying power of consumers under present conditions immediately to be foreseen. If a price level covering costs and profit should prove too high in the post-war era, far better a reduction on a straight pricing basis than entanglement with Santa Claus subsidies which may be discontinued on short notice.

FARM BUSINESS PROSPECTS

A recent review of Vermont farm business prospects compiled by Dr. R. S. Beck, extension economist, summarizes matters of vital interest to the agriculturalist.

Dr. Beck believes that this is still a good time to produce milk and predicts a favorable continuance of the milk-feed ratio throughout the year. Significant is the statement that a part of the 3 percent increase in milk production in Vermont in 1944 was the result of better care and heavier grain feeding. Yet a word of caution is given with regard to dairy stock. The extension economist expresses the opinion that prices of dairy cows hit a peak in August of 1943 and suggests that "only good dairy heifers should be raised, as calves started this year are likely to be worth less when they become cows than cows of the same quality are worth now."

No easing of the farm labor situation is predicted for the current year. It is believed that for seasonal help, farmers must continue to rely upon high school students, volunteers from the cities, and older men and women. Still higher farm wages are indicated. To save labor, there must be more

skillful planning on the farm and a greater use of labor-saving devices.

Reference charts compiled by Dr. Beck show a striking contrast in prices received by Vermont farmers during the past decade. In 1933, milk in the 200-mile zone of the Boston milkshed brought $1.50 per hundredweight. Including subsidy, the price received in 1944 was $3.95. Cows sold at $47 per head in 1933 and at $137 in 1944. Eggs per dozen rose from 23 to 39 cents; potatoes from 81 cents to $1.72 per bushel and apples from 94 cents to $2.53 per bushel during the same period.

But prices alone do not tell the whole story. It is the adjustment of prices to farm costs that counts and upon this adjustment depends the true prosperity of agriculture. From 1930 to 1941, farm prices were low, relative to costs. Since 1941, farm prices have regained a favorable balance in relation to costs. The task in post-war days will be to maintain this favorable balance.

Only through high consumption, high production and high employment throughout the country will this favorable balance be maintained. If a great volume of jobs can be provided for the industrial workers by free private enterprise, the farmers will remain prosperous. If the initiative and skillful planning used in wartime fail to carry over into the days of peace, nothing can prevent drastic price declines for the farmer.

Reconversion will present problems challenging the best minds of the country. In the accomplishment of the tasks that lie ahead, agriculture must play a full part. It has the men to do the job—men who must now study their own particular problems and make immediate plans for the adoption of measures necessary to insure a continued prosperity for the farmer.

Post-war Compulsory Military Training

EXTENSION OF REMARKS

OF

HON. BURTON K. WHEELER

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. WHEELER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a letter written by a soldier from my State, Thaddeus W. Hunt, to the editor of the Stars and Stripes, on the subject of post-war compulsory military training.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TENDER SPOT

DEAR EDITOR: In Mail Call of February 9 issue of the Stars and Stripes, J. R. Halcac stuck his pen in my tenderest spot, and I'm forced to protest.

As he is wholeheartedly in favor of post-war universal compulsory military training, I'm against it.

Every day in the life of an individual or a nation can be considered an emergency. All those prone to cry "wolf" and those who have lost faith in America's ability to cope with emergencies need a refresher course in freedom from fear.

Professional, trained, and experienced armies start wars and may win a battle, but they have never won a final victory or a lasting peace. Twice in my life the civilian youths of America have been called on to save the world from the avaricious ambitions of professional armies. Twice they have defeated the greatest professional armies of Europe, with no thought of conquest or military grandeur. They did it to live in peace as civilians and not under a militant regimentation.

Caesar wasn't satisfied with defeating his enemies in Italy. Napoleon wasn't content with restoring peace after the French Revolution. And Hitler's ambitions were obvious. Should an unscrupulous leader in America find himself in possession of a great army, we may see ourselves walking in the footsteps of those conquerors who only brought disaster and destruction to their nations. Military might from within is as hazardous as military might from without. Germany is a dying example.

Universal conscription in time of peace is un-American. It's an invitation and a challenge for other nations to remain militant. No man trained today will be familiar with the deadly, modern, currently invented weapons of tomorrow's war. And by the time the world has recuperated sufficiently from this war to try another one, our Nation will have been bled dry by military might in idleness.

We will survive longer in peace than in war, and great armies don't make for a peaceful world.

T–5 THADDEUS W. HUNT, T. D.

Proposed United Nations Charter Preamble and an Appeal for Support by the People

EXTENSION OF REMARKS

OF

HON. HAROLD H. BURTON

OF OHIO

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. BURTON. Mr. President, a good example of constructive thought and vigorous support of the cause of international peace, justice, and security is found in the recent action of the Committee on World Order of the Unitarian Laymen's League.

They have proposed a preamble to the United Nations' new world charter, and by this time have no doubt presented it for consideration by the proper committee of the San Francisco Conference. It seeks to proclaim objectives for which the United Nations are struggling and which will deserve widespread support after the war.

The preamble so proposed, and the appeal currently being made to the general public by this committee urging universal vigorous support of a program to maintain international peace, justice, and security, I ask to have printed in the Appendix of the RECORD.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

PREAMBLE FOR UNITED NATIONS CHARTER

We the people of the United Nations, in order to secure for ourselves and for our children the blessings of liberty and peace, do solemnly affirm our faith in the rule of law as the only adequate basis for justice among men, expressed through governments of free and independent nations united in common endeavor to advance the welfare of all mankind; and we do solemnly promise to maintain the institutions created for this purpose with an unalterable and loyal determination, pledging to one another, to the sacred dead, and to the generations yet to come our last full measure of devotion for the achievement of a united world, with liberty and justice for all.

WORLD SECURITY IS UP TO YOU

While 11,000,000 young Americans are carrying this war into the heart of Germany and to the streets of Tokyo, several other million Americans, not so young, are remembering the battle that went against us in the days after 1918. In simple words, we lost the peace.

It is the memory of that final battle that has steeled the wills of a whole generation of middle-aged Americans, many of them veterans of World War No. 1. They are determined that this time the peace shall be won as well as the war.

This means one thing today: The establishing of a world security organization as planned at Dumbarton Oaks, and a structure to insure economic stability as planned at Bretton Woods.

While it is true that Republicans and Democrats, Catholics, and Protestants, and Jews are supporting the plans for a world security structure, it is by no means safe to assume that the job undertaken at San Francisco is already done. This hope of mankind for an effective organization can be sabotaged, and by men who say they are for it, but who may intend to defeat it by reservations, amendments, and the fatigue of good men.

The committee on world order of the Unitarian Laymen's League believes that the proposals drafted at Dumbarton Oaks and Bretton Woods demand your full support. The plans in their totality are not too ambitious. They can easily be compromised to death through timidity and the fearful attitude of playing safe.

Courage and the spirit of adventure have marked all advances in recorded history. They brought Columbus to his New World. They will as surely bring us to ours—if we will let them strengthen our hearts and our hands.

The whole edifice of world organization and of lasting peace must rise upon foundations of popular support. You, a citizen of one of the contracting nations, can give—or withhold—such support. By your vigorous action—or by your apathy—the fateful balance may be turned. It is important that during the weeks through which the great conference deliberates at San Francisco, those sitting around the council tables shall directly or indirectly hear from you. We urge all Americans to make their support known today to President Truman, to the Senators and Representatives, to the American delegates at San Francisco. They want and need your help. They never needed it more. You can offer it in many ways. This is a period in history when even writing a series of letters can be as effective as the capture of an enemy gun emplacement, or the precision bombing of a rail center. Let us fight this battle together.

It all adds up to this: Whether there is to be a World War No. 3 is up to you.

The Case Against Compulsory Peacetime Military Training

EXTENSION OF REMARKS

OF

HON. LISTER HILL

OF ALABAMA

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. HILL. Mr. President, at my request Col. Lewis Sanders, of the United States Army, has prepared a review of

the pamphlet written by Lt. Col. Roscoe S. Conkling entitled "The Case Against Compulsory Peacetime Military Training." I ask that the review be printed in the Appendix of the RECORD.

There being no object, the review was ordered to be printed in the RECORD, as follows:

REVIEW OF THE CASE AGAINST COMPULSORY PEACETIME MILITARY TRAINING

(By Lt. Col. Roscoe S. Conkling—Review by Col. Lewis Sanders, F. A.)

The author stresses as a major argument the self-interest of the officers of the Regular Services in promoting compulsory military training. He uses adjectives as hand grenades to throw at the opposition rather than as descriptive words to clarify his meaning. For example, he writes of the high-ranking officers of the Army and Navy that they "desperately sponsor" this legislation, but he cites no actions justifying such a description. Those familiar with the matter know that such a description is completely misrepresentative of the War Department atmosphere in the matter.

In a foreword to the pamphlet Dr. Alonzo F. Myers describes Lieutenant Colonel Conkling as "eminently qualified to write on this subject." Lieutenant Colonel Conkling's record as stated by Dr. Myers, however, does not indicate any experience that would specially qualify him. The record does not indicate that he has ever had any contact with military training, either in receiving it or in giving it to others. It is true that he served with the draft boards and with national headquarters of the draft in World War 1, and at national headquarters of Selective Service in World War 2. Neither of these activities has any contact with military training; they are concerned solely with determining the liability of citizens to serve in the armed forces. This reviewer can speak of this from his own knowledge, having received military training prior to the United States entering that war, been an instructor to both officer candidates and troops, an officer with combat service in World War 1, a Reserve officer between wars both giving and receiving instruction, and terminated 3 years of duty at national headquarters of Selective Service during World War 2 in October 1944.

The technique of the pamphlet is to create a hostile or prejudiced atmosphere for the consideration of the subject of military training rather than to discuss it on its merits. The War and Navy Departments are charged with muzzling officers opposed to peacetime military training, and the author cites his own experience in being unable to obtain permission to publicly oppose it. He treats this as a unique and undemocratic attitude on the part of these organizations.

Of course, the War Department will not allow an officer to publicly oppose a policy of the Department, but neither will any civilian branch of the Government permit subordinates to publicly oppose departmental policies, nor will any other organized group permit such activities. No business will retain in its employ a man who goes about campaigning against its policies; no church will retain a minister or priest who preaches against its dogmas. The offender is tried for heresy and expelled. A college does not permit a member of the faculty to carry on a public campaign contrary to its philosophy. A college fraternity has recently expelled a woman member for writing a magazine article critical of fraternities.

He urges that consideration of the subject of military training should be postponed until the 10,000,000 men in the armed forces are free to talk, intimating that they are against it, but he refuses to accept the favorable attitude expressed by the veterans of World War No. 1, who are perfectly free to talk. He dismisses their opinion with:

"The Legionnaires present, having had their military training, albeit a quarter of a century ago, promptly obeyed and recommended the legislation." Apparently the opinions of soldiers are weighty if Lieutenant Colonel Conkling thinks they may join him in opposing peacetime military training but should be disregarded if they are favorable to it. As a matter of fact a poll taken among the troops in this war shows them to be as overwhelmingly in favor of it as are the veterans of the last war.

Obviously the opinions of the veterans of World War No. 1 should constitute our best-informed public opinion. They have seen the results of our being twice involved in major wars when unprepared due to our following the advice of the same groups still opposing military training. They have personally experienced what it is to go into battle for an unprepared nation, and they have sons repeating their experience in a second war. They now bring to evaluating their experiences a mature judgment and they have shown themselves overwhelmingly in favor of a permanent military-training system.

Lieutenant Colonel Conkling repeatedly mentions plans to train 1,000,000 to 1,500,000 youths of 18 years of age annually and makes all his computations on the basis of 1,500,000 trained annually. But our population does not contain 1,500,000 youths becoming 18 years of age each year—only 1,200.000. Also, Army and Navy plans have never contemplated training even 1,000,000 youths annually. Too many of the statements in this paper do not accord with known facts. Motives and intents are imputed to proponents of universal military training that rest on nothing stronger than unsupported assertions.

In an attempt to show that history proves that we do not need military training it is stated:

"When called upon its hosts of civilian soldiery sweep their enemies before them, establish peace, and at once return to their peacetime pursuits." And again:

"Isn't the complete answer to the proponents of universal military service that America's five major foreign wars have been decisively won without it, the greatest of which were against nations prepared by years of the most exacting compulsory military training of their youths?" Let us examine these statements against the historic facts. Our five major foreign wars have been, the Revolution, the War of 1812, the Mexican War, World War No. 1, and World War No. 2. During the Revolution the Colonies used a total of 395,853 men, at one time or another, against a British force of 62,196 men. It required 7 years and the assistance of the French to secure our independence from a Nation whose people had so little heart in conquering their own kinsfolk that their government had to complete their forces with hired alien troops.

In the War of 1812 we used a total of 527,654 men passing through our forces to face a force of 81,502 British. During 4 years we lost every battle fought on land, except one, and many of them under disgraceful circumstances. Only at sea did we distinguish ourselves and there we fought with trained men.

In spite of the large number of men we used during the Revolution and the War of 1812 we were never able to keep more than small poorly trained forces in the field at any one time due to lack of a sound military policy.

The Mexican War was not against a military power and we were the aggressor.

In World War No. 1 our civilian soldiers did not rush out and sweep the enemy before them, as stated. When drawn into that war we were unable to fight at all, even with a token force. It was more than a year before we could place even a small force in battle and some 18 months before we could mount an offensive. During all that time we were sheltered by the armies of our allies. When we did finally go into battle it was to take over a portion of a line the major part of which was still manned by our allied troops. Had any such situation existed as Lieutenant Colonel Conkling pictures the result would have been a complete military disaster and it would have been the American Army that would have been swept away, not the enemy army.

World War No. 2 is a repetition of World War No. 1. Pearl Harbor found us unprepared and if the Japanese had not been attempting to conquer China and take the British and Dutch colonies in the Far East, all at the same time, they could have taken Hawaii and invaded our Pacific Coast. We were unable to do any serious fighting for more than a year and again prepared for war under the protection of allied armies.

History shows that not only is their no foundation in fact for Lieutenant Colonel Conkling's statement but that, on the contrary, four times in 150 years we have escaped destruction, because of our unpreparedness, by little short of a miracle.

The author also states:

"For modern warfare relies more and more upon mechanical instrumentalities and less and less upon great masses of men." This statement is wide of the facts. Although mechanization in this war is far more complete than in World War No. 1, it has also required far greater masses of men, not less, as Lieutenant Colonel Conkling implies. To anyone familiar with military matters it is obvious that the greater the use of mechanical equipment the greater the number of men that will be used. The reason is simple; war entails a maximum effort on the part of the nations engaged. Mass-production methods have permitted the equipment and supply of much larger bodies of troops than ever before and armies promptly increased to the largest size made possible by the new production facilities.

When mass production permitted the constuction of large numbers of cannon and the production of huge quantities of ammunition the amount of artillery on the battlefield and the quantity of artillery fire leaped to unheard-of heights because neither side could afford to let the other outmatch it. But this did not decrease the need for infantry.

The mechanization of the battlefield itself, particularly in transportation and communications, still further increases the number of troops who can be supplied and controlled and therefore forces the use of still larger numbers of men, not less as stated.

The airplane has still further increased the need for military manpower. While it is impossible to win a war without an adequate air force neither the war nor even a battle can be won by air power alone; that still has to be done by the ground troops. The air force has, therefore, become mainly an addition to the size of the armed forces rather than a substitution for other troops. Our Army Air Force alone, in World War No. 2, exceeds in number of men the entire American forces in France in World War No. 1. The same holds true in the Navy. In spite of a large and efficient naval air force the Navy has required more regular naval craft and men than ever before.

In short, in World War No. 2, although we have increased the use of machines in battle some 300 or 400 percent over World War No. 1, we have also had to call three times as many men to serve in the Army and Navy as we did in that war. According to Lieutenant Colonel Conkling's thesis, we should have used fewer men.

The argument is advanced that we will not need to train any men for several years after this war because its veterans will be available to be called back to service in the event of an emergency. There is neither democracy or equity in the suggestion that the youth of the Nation be exempted from taking

military training at the expense of the men who already have carried the burden of a major war. All of the objections which Lieutenant Colonel Conkling raises to training the youth of the Nation apply with far greater force to calling the veterans of this war back to service.

Inconsistently with his argument for calling back the veterans he states that universal military training would be of little value as the men would lose all their training within 2 years and it is, therefore, wasted effort to train men in advance of a war. If such were the case it would be an added argument in favor of universal military training as it would be the only way in which we could always have a body of suitably trained men ready to defend the country.

Actually men will not lose the value of their military training for a considerable period, probably 5 to 8 years. (This is based on the reviewer's personal observations after World War No. 1.) While it is true that the art of war constantly changes in its technique, it changes little in basic principles. The individual soldier in World War No. 2 is, as to probably 75 percent of his activities, doing the same things that he would have done if a soldier in World War No. 1. He is doing them better because we have been able to give him more thorough instruction before he goes into battle. The veteran of World War No. 1, if still physically fit, could have been retrained for the new techniques of World War No. 2 in a fraction of the time it took to train green men. In the matter of physical fitness, a man who has once been conditioned can be reconditioned much more quickly than a man of the same age can be conditioned for the first time.

The balance of the paper creates a prejudiced atmosphere in which to consider the subject of universal military training. Aspersions are cast upon the honesty of purpose of all Army and Navy officers favoring the proposition. Without shadow of proof, it is repeatedly charged that when these officers had said one thing they have meant something different and the "something different" is put into their minds. He repeatedly challenges the right of the Army and Navy to advocate or be listened to on national-defense policy because they are tainted with self-interest. He says nothing about their competency to advise the Nation on its defense requirements or their legal and moral responsibility for so doing. Neither does he indicate where we can obtain other competent advice.

Of course the officers of the Army and the Navy have a personal interest in our post-war military establishment but their situation is no different from that of most experts upon whom the public must call for guidance. The physician is affected by a self-interest in public-health problems; the engineer has a self-interest in flood control, highways, and other public works; the lawyer has a self-interest in laws dealing with many subjects; yet our State and national legislative bodies contain many lawyers.

Intelligent and competent people are able to make effective use of the advice of experts even when affected with a self-interest because they follow the arguments and facts set forth and make allowance for any conclusions that are not properly supported. If Lieutenant Colonel Conkling's reasoning were followed to its logical conclusion and our professional soldiers and naval men thrown out of court because of their personal interest in the outcome we would have to exclude from consideration also the views of all men of military age and their close relatives since they are tainted with an even greater self-interest through being subject to the military training.

Lieutenant Colonel Conkling's knowledge of the proposals for universal military training appear to be confined to what has appeared in the press since his paper shows no knowledge of War Department studies or policy on the subject.

Typical of Lieutenant Colonel Conkling's approach to this subject is the following statement:

"And, incidentally, observing the unusually large number of newly made 'administrative' Army and Navy officers appearing on the streets of the Nation's Capital, and elsewhere, one wonders why so many of this multitude holding commissioned rank and performing office duties are and have been from the beginning of their service well within the younger brackets of the draft ages. Certainly a great majority, when first commissioned, were and probably are now between the ages of 21 and 31, or 35 at most, while not so fortunate men between 35 and 45 with dependent families and settled and important home community interests have been inducted into the armed services in droves."

The above, with several other statements which it is unnecessary to quote, create the impression that through favoritism large numbers of young men succeeded in securing unearned commissions for which their principal qualification was influence. He also infers that a military autocracy needlessly snatched away from dependent families and important jobs large numbers of men between 35 and 45 years of age.

When examined against the records the statements and implications fall to the ground. First consider the men over 35 years of age inducted into the service since Lieutenant Colonel Conkling, through his service at National Headquarters of Selective Service, is charged with some personal knowledge of this subject. The Army and Navy are without power to induct a single man through their own selection. Such selections are not made by officers of the armed services or even by commissioned civilians in the Selective Service System. Every man inducted has been selected, as is perfectly well known to all, by a board of civilians who are his neighbors. Men with dependents were not called until after the Congress had passed legislation providing financial assistance for dependents and even then, until we faced a tight manpower situation, such men were called last in their groups. Men engaged in important activities were deferred until they could be replaced. The Army, before Pearl Harbor, released about 100,000 men over 28 years of age, most of these being recalled after we were attacked. At a later date the War Department permitted men over 38 years of age, who could show that they had a war job awaiting them and whose commands could spare them, to return to civil life. Something over 200,000 men were released under this policy.

Lastly, the number of men over 35 years of age inducted into the armed forces was determined by the requirements of the war and the manpower situation and not by the choice of the Army and Navy since the services do not want men of this age. The population does not contain a sufficient number of suitable younger men to meet the military manpower demands of this war.

As to officers commissioned, one would assume from Lieutenant Colonel Conkling's statement that a major part were commissioned direct from civil life through either favoritism or being on the ground and knowing the ropes. The facts are that only 10 percent of the officers were commissioned directly from civil life. Of this 10 percent 54.8 percent were commissioned in the Medical Corps, Dental Corps, Sanitary Corps, Medical Administrative Corps, Veterinary Corps, and Chaplains. That is professional men commissioned in their own specialty and for which there is no other means of obtaining the required officers. An additional 18.8 percent were commissioned in the Transportation Corps, Chemical Warfare Service, Corps of Engineers, Ordnance Department, Signal Corps, and Judge Advocate General's Department. Commissioning in these departments is based on technical training or business experience or both and much better qualified officers can be obtained for these departments direct from the comparable civilian occupations than can be obtained by a training course in the short time available. Or 73.6 percent of the 10 percent were commissioned because their civilian technical training or experience fitted them for the jobs and there was no other comparable source for procuring such officers.

There is left then only 26.4 percent of the 10 percent or 2.6 percent of all commissioned officers who might have been commissioned for other reasons than that they were from the logical and best source for obtaining such officers. But it has been a prerequisite to issuing any commission to a man directly from civil life that he be shown to have specific qualifications for the assignment for which he is intended. Anyone familiar with the issuing of such commissions in this war knows that about the only part friendships have played is where those in administrative posts knew men specially qualified to handle jobs to which it was necessary to assign an officer and have recommended the man. This is the way most men are secured for executive jobs in civil life and no one has yet found a more efficient way. While some men may have secured commissions through favoritism or influence this writer is sure that those familiar with the issuing of commissions will agree that in this war they have been kept as near zero as is humanly possible.

The Army obtained the majority of its officers from the following sources: Regular Army 2 percent, National Guard 2.3 percent, Officers' Reserve Corps 25.3 percent, former officers recommissioned 2.5 percent, enlisted men commissioned after passing through an officers training school or directly from the ranks 51.6 percent.

The picture presented by this pamphlet does not stand up when tested by the facts.

Parties, Politics, and Peace

EXTENSION OF REMARKS

OF

HON. THEODORE FRANCIS GREEN

OF RHODE ISLAND

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. GREEN. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an admirable article entitled "Parties, Politics, and Peace," written by Christopher Dawson, and published in the February 1945 issue of the Sword of the Spirit.

There being no objection, the article was ordered to be printed in the Appendix of the RECORD, as follows:

PARTIES, POLITICS, AND PEACE

(By Christopher Dawson)

Recent events in Greece and elsewhere have shown us that victory alone is not enough to restore peace to Europe. The sufferings that the occupied countries have endured have weakened the whole tradition of civilized order and have accustomed men's minds to violence and lawlessness. Moreover social conflicts and ideological differences have been deliberately fostered by those tactics of disintegration which are the most diabolical weapons of totalitarian warfare. How is it possible to restore parliamentary democracy when any party struggle is apt to degenerate into a display of totalitarian

thuggery? And if we do not do so, how can we honor our pledges under the Atlantic Charter? This is our present dilemma, and in order to solve it we shall need more clear thinking as well as firm action.

PARTIES AND IDEOLOGIES

In the first place there is a certain confusion of public opinion with regard to the real nature of the war. Is it a struggle for world power between rival states, or is it a conflict between two rival ideologies or political theories, named democracy and fascism? The answer is that this is not a true dilemma, since from the beginning it has been the policy of Hitler to use the ideology of national socialism as a weapon of power politics and consequently our resistance to his international aggression inevitably involves a resistance to his ideology and a defense of our own political ideals. It is impossible to fight this war as though it were a straightforward national conflict of the old style. It is essentially an ideological war, but since we are not a totalitarian state and consequently do not possess an official state-imposed uniform political doctrine, we are at a disadvantage as compared both with our Fascist enemies and our Communist allies. When, therefore, we say that we are fighting for democracy, we do not mean that we are fighting to impose a watertight system of political ideas on the rest of the world, but merely that we are defending our political and social freedom against the mass tyranny which is seeking to destroy it.

DEMOCRACY AND THE PARTY SYSTEM

Now, political freedom, according to our tradition, involves the existence of political parties. The party system, which has been evolved in Britain and America, is an elaborate and delicate mechanism which makes it possible to change the government without the necessity of revolution. It is like a balance that allows the weight of public opinion to determine the position of political power. A single party system, such as is characteristic of all the totalitarian states, removes one arm of the balance and essentially changes the nature of the mechanism. The single party is in fact no longer part of a balance; it is a sheer weight which concentrates the whole power of the state in one direction, so that public opinion does not influence the government but is influenced and formed by it. The strength of such a system depends entirely on the efficiency of the ruling group and their servants. It has the strength and weakness of a despotism irrespective of the size of the dominant party. It can claim to be democratic, because it can, theoretically at any rate, force everybody and anybody into its ranks, but it can never be democratic in the same sense in which we in the West understand the term.

PSEUDO-DEMOCRATIC PARTY SYSTEMS

At the same time we must recognize that our conception of party is not the only one. Our conception involves of necessity a limited measure of cooperation between the parties and the recognition of a superpolitical basis of agreement and loyalty on which the state stands. But there is another type of party which is essentially noncooperative and exclusive and which refuses to admit the right of other parties to exist. The victory of such a party is usually followed by the proscription or liquidation of its opponents, so that every election becomes a potential civil war. This has been the tradition of the revolutionary parties in the past, and in some cases, as with the French Jacobins, it produces a party dictatorship like that of the totalitarian states. But at other times this revolutionary tradition has been combined with the other Anglo-Saxon tradition of alternating parties, with surprising results, as we see in nineteenth century Spain, where Progressives and Moderates staged alternate coups d'etat and an eminent liberal could declare on his deathbed that he had no enemies to forgive since he had killed them all!

DEFINING OUR TERMS

Hence it is clear that it is not enough to talk about democracy and fascism unless we define our meaning pretty clearly. If by fascism we understand that particular form of mass tyranny which has arisen on the Continent between the two wars, and if by democracy we mean a constitutional regime of political and personal liberty, then it is correct to say that the defense of democracy against fascism is our essential war aim. But we must remember that there is an alternative sense to both these terms and that many people will not accept our definitions.

THE RIGHT AND LEFT FALLACY

Thus, many people today use the terms "fascism" and "democracy" as equivalent to what are known as the right and the left, so that any political ideas or social elements which are regarded as conservative or reactionary or capitalist or monarchist are described as Fascist, while anything that is regarded as revolutionary or progressive or socialist is spoken of as democratic. The result of this division is to obliterate the distinction between constitutional and totalitarian parties, and to force every shade of political opinion into alliance with some extremist totalitarian party which inevitably tends to become the predominant partner. And this is no remote imaginary danger. It is a real situation which has been exploited again and again to the advantage of the totalitarian powers in the course of the present struggle. Wherever this division between left and right has been carried to its logical conclusion, it has led to the weakening or collapse of the society concerned; while the survival of Great Britain in 1940 was due above all to our rejection of this left-right ideology, and to the cooperation of all the constitutional parties in defense of their common national existence and freedom.

CAN DEMOCRACY SURVIVE?

Where parties are incapable of doing this, parties cannot exist, and some form of authoritarian or totalitarian state is bound to take over control. Now it may be argued with some plausibility that this is what is happening in the world today, and that the Anglo-American system of constitutional liberty is incapable of surviving in a world of mechanized mass powers. But if so, this means that democracy, as we have understood it, is finished, and that we have been fighting for a lost cause. This is not a conclusion that we can readily accept, since our political system has stood up to the strain of total war more successfully than any of our critics expected. But the making of peace may prove an even more difficult test than war, since it brings western democracy face to face not only with the problems of a Europe that has been disintegrated by years of Fascist exploitation, but also with the massive power of our Soviet allies which represents the most complete and far-reaching single-party system in existence. It is clear that no stable peace can be reached unless it is possible to find some modus vivendi between Anglo-American democracy and Russian communism, and in order to do so it is not sufficient to gloss over their essential differences by an equivocal use of the term "democracy." It is an immensely difficult task and one which demands exceptional qualities of statesmanship and moderation. But though it is difficult, it is not impossible, and since the peace of the world and the survival of civilization depend upon it, it is in the interests of both parties that it should be solved. That must be the basic aim of Allied statesmanship and the more fully public opinion in the various countries realizes the true issues the better are the chances of reaching this goal.

Communications for Peace

EXTENSION OF REMARKS

OF

HON. ERNEST W. McFARLAND

OF ARIZONA

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. McFARLAND. Mr. President, I ask unanimous consent to have printed in the RECORD an address entitled "Communications for Peace," delivered by Hon. Paul A. Porter, Chairman of the Federal Communications Commission, at a dinner by the Baltimore chapter of the Morse Telegraph Club of America, at Baltimore, Md., on April 27, 1945.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

I was brought up to believe that America is the land of opportunity, and I'm delighted to see that there are opportunities open even for you ex-Morse telegraphers. Victims of technological unemployment in your chosen trade, like the lamplighters and hostlers of another generation, you nevertheless seem to be eking out an existence as railroad presidents, steel corporation vice presidents, or at whatever other similar job turns up.

I wish that I could hold out hope that the future might restore you to your old jobs. I wish I could assure you that the Federal Communications Commission was in a position to order the junking of these newfangled gadgets, the telephones and tickers and automatic transmission devices of all kinds, so that you old Morse telegraphers could leave your present jobs and return to your chosen profession—getting the message through—though the calluses sprout.

But that is not the burden of my talk tonight. On the contrary, I am here to emphasize what you all know anyway, that still further communications progress lies ahead. For it is an essential feature of our kind of society that it cannot stand still. Some decades hence I hope I may be invited to talk to a reminiscent get-together of today's young radar specialists, their heads turned bald or greying, as they think back to the good old days when radar was being used, and was even considered quite up to date.

What are these newer technological developments which already loom on the postwar communications horizon? Those of you who have turned from Morse telegraphy to broadcasting know about FM, television, and facsimile broadcasting, which will bring into our homes programs for the ear and for the eye. Those of you who have taken to working on the railroads know that FM and facsimile are being increasingly tested in your rail communications systems. The reliance of aviation on radio communications is little short of its reliance on wings and propellers.

But tonight, meeting as we do at a time when the thoughts of the world are centered on San Francisco, I want to talk chiefly about international communications. For if our country has learned one lesson from the war in which we are engaged, it must be that America can never again live by itself. We are a nation among other nations, and our domestic tranquillity is dependent upon the peace of the whole world. International communications—direct, fast, safe, cheap communications—are one cornerstone upon which a structure of world peace and world cooperation can be built.

It is not enough that sitting at your desks in Baltimore you can pick up your phone and talk to Athens, Ga., or Paris, Ill., or

Moscow, Idaho, or that you can send a telegram to any of those points. Until communications are fast, inexpensive, and efficient with Athens, Greece, Paris, France, and Moscow, Russia, the contribution which communications can make to world order will not be complete. Our newspapers must have rapid, economical means of gathering news in unprecedented volume throughout the world, and newspapers abroad must have ready access to a continuous flow of news from the United States. Businessmen here and abroad should have no more difficulty in communicating with one another than businessmen in Baltimore and New York. International broadcasting which has proven itself so potent an instrument of psychological warfare, can effectively be used for the purposes of peace.

The oldest means of rapid international communication, the cable, still carries the bulk of the traffic along such heavily burdened routes as that from New York to London. Challenging its leadership is the radiotelegraph and radiotelephone. In our own homes, we listen to the overseas broadcasts of the B. B. C., while the English hear the best that our broadcasters have to offer. And radio fascimile, which enables this afternoon's newspapers to carry pictures of this morning's happenings on the other side of the earth, is already a significant factor. These are the available techniques; will we have the social inventiveness to harness them to the purposes of world news, world trade, and world peace?

Some weeks ago, when our late President reported to the Congress on his visit to Yalta, he called attention to the significance of such techniques. He said:

"Far away as I was, I was kept constantly informed of affairs in the United States. The modern miracle of rapid communications has made the world very small; we must always bear in mind that fact when we speak or think of international relations."

In discussing international communications tonight, I want first to enter a plea of confession and avoidance. As a newcomer to this field, I make no pretense to that sort of expertise which sometimes lends authority and on other occasions breeds dogmatism. Nor do I subscribe to the conclusion that a person must have been a classmate of Marconi to have an opinion about the subject. With these reservations, I repeat the observation of President Roosevelt that we must bear in mind the fact of communications when we speak or think about international relations and to it I add a question as to whether the United States is prepared to assume its proper post-war role in this field.

The Congress and the several agencies of Government concerned with the question of international communications have over the years given detailed consideration to the problem of a more effective system and, as you know, have as yet reached no final agreement upon policy. Hearings are now in progress before the Senate Interstate Commerce Committee.

As one who followed the problem casually prior to having some official responsibility with the policies, I had assumed, and I think the public generally must have assumed, that here is a field of enterprise offering great advantages to those who operate it. Because of the public familiarity with the great names of the carriers involved, most of us had presumed that a vast financial empire was involved. Here were interests and investments which captains of industry were striving to protect and maintain and develop. I presumed this until I looked at the books and accounts of the competing carriers.

What are the facts? The total remaining investments involved are less than the cost of a single battleship. According to our data, the principal carriers in the international field have aggregate net investments of $57,000,000. Of course, I do not deprecate this as an insignificant sum even in these days of multi-billion-dollar appropriations. But, as I shall undertake to show in a moment, the financial stake involved even from the standpoint of existing investments or prospective revenues is greatly outweighed by considerations of national interest in effectuating an efficient system of world-wide communications.

Then, you may ask, Why have Congress and the interested agencies of Government become so concerned about this relatively small segment of our economic system? Here are six companies with remaining investments of less than your major department stores in Baltimore. Yet weeks of hearings and much effort and energy are now being expended in seeking a solution to the problem. The answer is found, I think, in the words of President Roosevelt, that we must always bear in mind the fact of communications when we speak or think of international relations.

That our present or post-war system is inadequate is evidenced by the fact that leading executives of the international communications companies are seeking a coordinated national policy, and although differences of opinion exist, it is obvious that those who operate our present systems are not satisfied that this Nation can assume its proper leadership under the policies and practices that existed prior to the war.

Moreover, it is readily apparent that if the hopes and aspirations of humanity are realized at San Francisco—and they must be—we must completely revise our thinking about international communications. No longer can we be content with merely satisfactory service to centers of heavy traffic. A vast expansion in facilities, in volume and in techniques, must be developed. The only relevant issue is how can this best be accomplished.

The evidence of the inadequacy of our existing system is abundant. About a year ago the distinguished commentator, William L. Shirer, observed:

"If there is to be any order or sense or cooperation or understanding or peace in our post-war world, something has got to be done about international communications, which, though few Americans know it, are at present in a rather lamentable state."

Mr. Shirer further concluded:

"It will be news to most citizens, I think that despite our undoubted achievements in science and technology and industrial organization, despite our alleged Yankee push we have been positively bashful and backward in playing our proper role in the international communications business."

I do not propose tonight to dwell upon the factors which warrant the conclusion reached by Mr. Shirer. Those who are engaged in international communications are completely aware of the shortcomings of the existing system—the wasteful allocation of frequencies and duplication of circuits, the irrational pattern of rates, the need for a unified policy in dealing with foreign companies and foreign administrations at the other end of the circuit. I wish to emphasize that this problem must be approached from the standpoint of what policies will give the American people an effective system of world-wide communications that will best foster and promote our democratic ideals and serve as the instrument of free exchange of news and ideas, and as an alert handmaiden to our commerce and trade. Obviously the interests of those who presently operate this business are subordinate to those they seek to serve. To my mind, there should be erected no philosophic barriers which will prevent the United States from having the greatest communications system that it is possible to devise.

In a field which is inherently monopolistic in character, and which is affected with such a broad public interest, I can see no violation of our traditional democratic concepts if we take realistic measures to develop this great utility to its maximum usefulness. If such a result calls for a consolidation of all of our international communications resources, and I believe it does, we should not hesitate to adopt such a plan.

There are, of course, debatable questions in any field of public policy. But I would summarize my own views with the observation that it is preferable to have a strong and profitable monopoly, with appropriate safeguards to protect the public interest, than to continue with a relatively small number of weaker companies at the sacrifice of efficiency and service.

The more I study the problem, I am convinced that if the present companies were operating exclusively in the international communications field, without collateral and supporting interests, the processes of competition would result in insolvency for some of them. If, as we hope, the art of communications is going to bring the light of democracy in many dark corners of the world, I do not believe the Nation should assume the risk that may be inherent in divided effort by the existing companies.

We recall that, particularly in the field of radiotelegraphy, the principal carrier began as an organization exclusively interested in international communications. Limited competition and a relatively small volume of traffic caused it to exert its energy and talents in other and more profitable fields. Others in the field, including cable companies, had domestic interests that were more profitable and were developing to a greater extent. The result is that today we have the pattern in which the important function of international communications is only a side line of the principal business of those who control these companies.

A few figures may be enlightening. The principal American carriers engaged in international telegraph service are controlled, as I have said, by companies engaged in other activities. The three principal companies have assets, after deducting reserves, of about $900,000,000. Their American subsidiaries handling international traffic have net investments in cables and radio-transmitting equipment of about $30,000,000, or about 3⅓ percent. The net income of these three companies approximates $70,000,000 annually before Federal taxes, and their American operating subsidiaries have net income from international communications of $8,100,000, or about 11½ percent.

Of course, I do not assert that international communications are a kind of a hobby of the large institutions which have developed it. What I do urge is that the time has now come when international communications should stand on their own feet as the principal and exclusive business of those who operate them, and that the only way in which that can successfully be accomplished is through an appropriate consolidation of existing facilities.

I do not know how long those presently engaged in the business will want to continue upon the basis of the division of relatively small profits; I have no way of predicting how long the incentives of prestige, as distinguished from competition, will provide the impulse to further lower rates and improve service. But I do suggest that were it not for the fact that our existing international carriers have strong and beneficent parents, failure to consolidate might ultimately result in the necessity for Government operation.

I am, therefore, hopeful that from all of the discussion that has been under way upon this problem there shall emerge a program which will give to the people of America a strong, aggressive international communications carrier, exclusively engaged in this important function, that will be able to hold its own throughout the world, and cooperating with other governments and

foreign correspondents give to America the eminence in this field which its leadership in world affairs and its responsibilities for the world of tomorrow so amply justify.

In developing such a program there are four important considerations:

1. International communications must be cheap and uniform.
2. They must be rapid.
3. They must be available to and from even the remotest points.
4. They must travel by direct routes, unrelayed, wherever possible.

I place low cost first, because by and large the volume of news and intelligence is dependent upon cost. No one except the newspaper itself cares particularly whether the 500-word dispatch from its correspondent at S. H. A. E. F. this morning cost $10 or $1,000; but every newspaper reader is vitally concerned that he get that full 500 words instead of merely 50 words or 10. Only by lowering rates and then lowering them again and again can we be sure that full reports rather than mere hints of what has happened will reach us.

Businessmen, too, must have low rates if world trade is to flourish. Some of you may recall the New York partner in a business enterprise who had not had a letter from his partner in Brazil for many days. Eventually he decided to cable; but after considering the costs, he cut his message to just one word: "Well?"

The partner in Brazil received that query, and composed a copious answer. Exchange rates, his message said, somewhat complicated closing the transaction he had under way. There was also the question of credit. And the articles in question would have to be sized on the metric scale rather than in inches.

Then the partner in Brazil thought of the cost, and began to cut his message down. He left out the exchange rates. He eliminated the reference to credit. The metric measurement point he dropped. What he finally cabled in reply was also just one word: "Well?"

When the New York-London cable first opened in 1867, the rate was set at $10 a word. And newspaper readers found few 500-word dispatches in their morning papers.

Today the cost of a full-rate message between New York and London is 20 cents a word, and the press rate under certain circumstances is only 3 cents a word. But to Russia the full-rate from New York is now 30 cents, to Montevideo 45 cents, to Australia 60 cents, to China 88 cents, and to Borneo $1.05 a word.

The American Telephone & Telegraph Co. has proposed a post-war New York-London telephone rate of $12 for 3 minutes, which means that a business man could pick up his phone and talk to London for the present cost of a 30-word cable plus a 30-word reply. Under this same company proposal, a 3-minute conversation in which 300 words or more can be readily spoken would not cost more than $15 to any point on earth. You could talk to French Indochina, for example, at less than the present telegraph rate for a 3-word name, a 3-word address, the 1-word message, "Well?" and a 2-word signature, plus a similar reply. The international airmail, too, will have a profound effect in increasing the volume of international messages and in keeping telecommunications rates in line.

In the past, rates between different parts of the world have grown up largely on the basis of the costs of cable operations, and the resulting pattern has been one in which distance has determined the relative amount of the rates. In the world of tomorrow, we must recognize that the barriers which have existed between nations, because of distance, must disappear. I strongly feel that the uniformity of international communications rates to all corners of the globe would go a long way toward removing these barriers. This principle has been in effect with respect to mail rates for the past three-quarters of a century and has proved its worth. Fortunately, we have in radio the means by which this goal can be attained, for the economies of radio are reflected in the relatively insignificant differences in costs of operation as between a circuit to London, a circuit to Moscow, or a circuit to Chungking. And important strides toward this end are being made. On May 1, present rates from New York to all countries in continental Europe and to all countries in South America will be reduced to a uniform 20-cent full rate. Other classes of messages to these points will be lower and similarly uniform. This means that not only will a substantial measure of uniformity of international rates be achieved, but that sizable reductions will be made. Thus, the present 30-cent rate to Moscow and the present 45-cent rate to Montevideo will come down to the level of the present rates to London.

We cannot, of course, regard these rate changes as the ultimate in our efforts. Much remains to be done by way of extending the idea of uniformity to other areas of the world and making the uniform rate even lower, if it is possible.

In addition to being cheap, international communications must, of course, be rapid—and that means consistently and reliably rapid. Back in 1919, when the last peace conference was sitting in Paris, Walter S. Rogers—President Wilson's adviser on communications—wrote to Secretary of the Navy Josephus Daniels:

"One of the tragedies of the present peace conference lies in the fact that great sections of the world have no chance to learn what is going on there. For instance, it now takes from 8 to 14 days for a message to reach the Far East, and the rates are virtually prohibitive. This means that that great section of the world is cut off from contact with the great events taking place."

Tonight at San Francisco, special facilities have been organized by which the representatives of the United and friendly nations can immediately communicate with their governments. President Truman in opening the conference said that "man has learned long ago that it is impossible to live unto himself. This same basic principle applies today to nations. We were not isolated during war. We dare not become isolated in peace."

And it is through the modern miracle of communications that isolation is bridged in fact as well as in spirit.

The third specification for a sound post-war telecommunications structure is that it must afford fast, cheap service between any two points—not just on the major routes like that from New York to London. The importance of communications to and from such out-of-the-way places as Teheran, Okinawa, and Arnhem should be obvious to a generation which has seen the spotlight of world attention move so rapidly from continent to continent and from island to island.

By means of radio, any point can be as closely linked to the United States as London and Paris are now linked, if the equipment is available at the far end of the circuit. One of our major concerns, accordingly, must be to devise means whereby improved communications equipment will be readily available to the remotest parts of the world.

Communication is a two-way matter; and it profits little to have the finest communications equipment here in the United States if the other ends of the circuits with which we communicate are still tapping out their messages by hand or have no transmitters at all. It is to our benefit, accordingly, to encourage other countries to use equipment as good as our own and to arrange for the purchase of American made apparatus at the earliest practicable date.

Finally, let me suggest that to the fullest extent possible, post-war international communications should be direct, rather than relayed through a few communications bottlenecks where the possibilities of delay, interruption, or favoritism are ever present. The Federal Communications Commission, and I think also the Congress, has been concerned with the need for direct communications routes to every part of the world, and some progress in this direction has already been made.

In recent testimony before the Senate Committee on Interstate Commerce, I have urged that the prompt merger of the many companies which now render international cable and radio service would do much to ensuring the United States a cheap, rapid, efficient, and direct communications service to and from all parts of the world. This is a basic question of national policy which must be wisely—and promptly—decided if the United States is to emerge from the war ready to play its part in the world order now being framed in San Francisco, and in the world trade which will follow. A single American international communications organization, pledged to build without delay the kind of worldwide communications structure which our role in world affairs required, appears to me to be a prerequisite if other plans for a peaceful, prosperous world order are fully to materialize.

Democracy in Decline?

EXTENSION OF REMARKS

OF

HON. HUGH BUTLER

OF NEBRASKA

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. BUTLER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an article entitled "Democracy in Decline?" by Rev. James M. Gillis, which appeared in the May issue of Washington News Digest.

There being no objection, the article was ordered to be printed in the RECORD as follows:

DEMOCRACY IN DECLINE? [1]

(By Rev. James M. Gillis)

One friendly critic has upbraided me for saying that democracy is now at its lowest ebb in the United States.

Another has gently jibed at me for holding to the belief that democracy can still survive.

A third tells me that I may as well admit that the American Republic as such is already gone.

It reminds me once again of a favorite passage in G. K. C.'s Orthodoxy concerning critics of the church and the clergy.

Christianity, they say, is pacifist; Christianity has deluged the world with blood; the pope is a shrewd politician; the pope knows nothing about affairs of state; the clergy live in an ivory tower; the clergy are too much in public; preachers remain aloft in a metaphysical cloud; preachers foolishly attempt to apply the gospel to politics, diplomacy, business.

In somewhat similar fashion critics of these editorial comments say "you are too pessimistic about democracy"; "you are too optimistic"; and "why be either optimistic or pessimistic, why not be realistic?"

[1] This article is part of an editorial from the Catholic World by the editor, a famous Paulist Father and one of America's greatest orators.

Since the subject seems to interest at least some readers, will others be indulgent while I briefly renew my profession of political faith, and then I promise we shall go on to something more important than personal opinion.

I have not abandoned belief in democracy. On the contrary, the more I see of dictatorship, the more I love democracy.

As for being realistic and admitting that the Republic is dead—to me that would be a kind of apostasy. I do not, of course, believe that the Republic is invulnerable and immortal. It may die or it may undergo such a metamorphosis as to be no longer recognizable for what it used to be.

But it hasn't perished yet. Please God it will not perish. Ours would be a sad and tragic world with no forms of government remaining but empires, dictatorships and a few moribund monarchies. I should not like to be like Charles Maurras and Léon Daudet, interested in the resurrection of the monarchy that used to be.

As for the new type of monarchy, "the rule of one," that is to say a dictator, such an alternative to democracy is so revolting that I am horrified to see my own country slipping into any similarity with it. Yet the most obvious temptation of Americans at the present time is to think that we have something to learn from at least one form of dictatorship—the Russian—and that we had better trim our sails to catch the wind of the new ideology.

The idea seems to be growing that the amazing military prowess of the Soviets is proof positive that there must be some virtue in their political system. There is no truth in that notion.

History shows that when martial power develops, political purity declines. While Pompey and Crassus and Caesar and Antony piled up victories and annexed kingdom after kingdom, the republic was slipping and the end of all that was good in the Roman system was approaching.

If military success were the measure of political merit, we should have to hold that the barbarians who conquered Rome had a better political system than that of Rome; that Alaric, Attila, Genseric were greater statesmen than Marcus Aurelius, Trajan, Augustus, Cicero, Cato; that Alexander meant more to civilization than Aristotle; and that the supreme political geniuses of all time were Genghis Khan and Tamerlane.

Speaking of those savage conquerors, I wonder how much of the military genius of the present-day Russians is due to the inheritance of Mongol and Tartar blood. Let's dodge that question for fear of wounding the feelings of our valiant but sensitive Soviet ally.

But I hope that those who think there must be something superior in the Russian political system because it produces admirable results on the field of battle, will see to what a mad conclusion their argument leads.

Obviously we have dropped the unimportant consideration of my views about the status of democracy in the United States, and we have reached the most crucial of all political questions now confronting the American people. That question—a double one—is, have we been gravitating away from democracy toward collectivism and is it well that we do so?

It may be superfluous to explain that "German thought and German practice" of which Dr. Frederick A. Hayek writes, in The Road to Serfdom, is essentially the same as Russian thought and Russian practice.

Marxian Socialism was made in Germany in the 1880's, exported into Russia in 1917 and returned to Germany in 1933.

Communism, as Lenin insisted, is pure Marxism, and Stalin has sworn upon the corpse of Lenin that he would be faithful in carrying on what the master handed down.

Hitler likewise has repeatedly declared that nazism is socialism. The Russian brand and the German brand are at least as much alike as the American and English brand of democracy.

To say "at least" is to be too conservative. Russian communism and German nazism are in aim and method, in theory and practice, identical.

Hayek is alarmed at the infiltration of nazism; Americans will do well to be alarmed at the infiltration of communism. The danger is the same—call it nazism or communism or fascism, it all adds up to statism.

We are not yet Communists; still less are we Nazis or Fascists. But we have become to an alarming degree "Statists."

Further than that, we have made considerable advance toward lodging the power of the state in the hands of one man. That danger has always been present in our system.

It is notorious that the American President, in peace and in war, within or without the framework of the Constitution, has such powers as are possessed by no other leader in the world of democracy.

In the last generation, and particularly in the last decade, that power has developed abnormally. For this reason alone, I have deplored the present tendency to surrender political power into the permanent keeping of one party and to concentrate more and more authority in the hands of one man.

I believe in the axiom of Lord Acton: "Power tends to corrupt; absolute power corrupts absolutely."

My own conviction against concentration of power is based upon psychology, rather than upon history. No man is good enough, wise enough, modest and humble enough, no man in the natural order is sufficiently self-effacing to be immune against the temptation of too much power.

It is for that reason that democracy wisely distributes power, breaks it up, interrupts it by insisting on rotation in office. Democracy encourages home rule, States' rights, local self-government. Democracy functions best when every State and every city, town, village, hamlet, takes care of the greater part of the job of governing itself.

The Confederate States were not all wrong. They "had something." It's a pity they sold it for a mess of patronage. Insistence upon States' rights is indispensable to the continued existence of the Union.

Let Us Not Ask Too Much of San Francisco

EXTENSION OF REMARKS

OF

HON. H. ALEXANDER SMITH

OF NEW JERSEY

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. SMITH. Mr. President, I ask unanimous consent to have printed in the RECORD an address entitled "Let Us Not Ask Too Much of San Francisco," delivered by my friend and former colleague, Dr. Harold W. Dodds, president of Princeton University, at United Nations Forum, Princeton, N. J., on April 13, 1945.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

There is grave danger that we shall lose the peace through the mistakes of those who most desire to win it. One of the most serious threats to the evolution of a new basis of international collaboration is the sincere but uncompromising perfectionist who is playing directly into the hands of the isolationist. Indeed the isolationist is picking up the perfectionist's arguments and repeating on every favorable occasion the charge of the perfectionist that our allies are playing dirty power politics and that America must keep away from the whole sorry mess. The isolationist would not attempt anything; the perfectionist demands too much. If the Nation accepts either viewpoint we shall fail. The effect on public opinion of both is the same, viz, a defeatist attitude toward the possible because the impossible cannot be achieved.

Americans have great faith in the power of legislatures and constitutional conventions to change things. This faith imputed to other nations blinds us to the historic obstacles to international federation and makes us intolerant of their unwillingness to entrust their security to an international government. In our haste we forget that social institutions like government cannot be created overnight, for they all root in the past, in habit, consent, and custom; in emotions as well as in will. We recall the origin of our own Federal Constitution and we are often unable to understand why other peoples hesitate to apply this example to relations between nations as we did between the Thirteen Colonies. We too often fail to dig deep enough to learn that the analogy of our Federal Constitution is no analogy at all and that it is, therefore, false and misleading.

Let us fix our eyes on the possible; let us refuse to be divided or diverted by intolerant insistence on the impossible.

To be more specific, let us be realistic about force in international affairs. Let us not exaggerate unrealistically the present possibilities of an international police force as an agency on which to rely to keep the peace. Too many good people are doing so, forgetful that this is beginning at the wrong end as the long evolution of law and government proves. Let us realize that any supra-national organization must begin modestly. Let us not insist on a supra-government so all-embracing and unfamiliar that nations would not be prepared emotionally to participate. Let us concentrate on an international organization limited in scope and simple in operation, directed to those areas in which world interdependence is strongest and in which international friction is most easily generated. This much I think is possible if we keep our eyes on a limited objective and refuse to be severed from it. Let us remember the terrible consequences if we fail through expecting and demanding too much.

Thoughtful people are much worried about American public opinion after the war. After the last war we endorsed the League of Nations until its opponents started to work in the Senate. But let us understand that the League failed largely because its members were at no stage willing to trust in it for security. It is important also that we understand how short was the step taken at Dumbarton Oaks, and how unwilling the world is today to abandon time-honored methods for achieving security. Dumbarton Oaks is not an implementation of the Atlantic Charter by any means. I sincerely wish it were and I deplore all efforts of our statesmen to make it appear that it is. Efforts to over-sell it today will bring harmful repercussions later, because it promises to be all we shall have to build on. Let us be sure to exploit its possibilities to the utmost.

Let us not be dismayed by examples of power politics such as we have witnessed in Poland. Historically considered there are equities on both sides of this particular issue. Let us be reconciled to the fact that the nations which will manage the immediate post-war world are the ones which have

the dominant force. They are the only powers that can keep the peace in that period, and keeping the peace for even another 25 years is going to be very important of itself if international collaboration is to have a chance to develop. Let us not despair if the terms of the peace contain the familiar concepts of buffer states, naval and air bases, trade routes and spheres of influence. It is obvious from the course of recent events that nations are not yet willing to entrust their future security to an overall world organization with its own police power. They are further along than they were after World War No. 1, but there is still a long distance to go. It is highly important to the future development of a world organization that the nations be able to enjoy after the war a sense of security which the Versailles Treaty did not afford. Without this feeling of security no world organization of any importance can be built and put to work. Not even the sketchiest would have a chance to function. Unless we get a settlement that will in itself be more trusted and stable than the one after the last war there will be no environment in which to develop and experiment with any significant agencies of international collaboration.

It is true that Dumbarton Oaks provides little more than an organization for discussion between states. But such an organization is fundamental. We must have this much; on that we cannot compromise. Without it we shall certainly have lost the peace. The Food Conference a Hot Springs, the Financial Conference at Bretton Woods, the Air Conference at Chicago are modest examples of subjects which can become matters of discussion and agreement when a continuing international organization is set up. I regret that they were not originally made parts of a single international organization, but from this seed there can grow in time a more comprehensive organization to establish the reign of law among states. An organization for discussion in a climate favorable to collaboration is at this moment more important than all the debates over the Security Council. Failing this, another great war is inevitable. Let us all compose our differences and unite on this platform, despite our disappointments and criticisms as to the limited scope of the new international agencies now evolving. Let us understand that the attainment of the reign of law among nations will be a long process and that we cannot depend upon any statesmen performing a miracle to achieve it in a world of starved, broken, and cynical people. Over and over again, nature demonstrates to the doubter that giant oaks from little acorns grow.

A Missouri Soldier's Attitude Toward Furloughs

EXTENSION OF REMARKS

OF

HON. FRANK P. BRIGGS

OF MISSOURI

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. BRIGGS. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a brief letter addressed to me by a Missouri soldier, in which he states his attitude toward furloughs and sending the boys home, and suggests that the War Department be allowed to proceed in its regular course.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

From: Corp. Thomas C. Cauley. Public Relations Office, Sixth Army Headquarters, A. P. O. 442, Postmaster, San Francisco.

DEAR SENATOR: The letter written by my family concerning a furlough for me was done without my knowledge or consent. Naturally, when I learned about it I was both angry and embarrassed.

I know that you must receive many letters of this kind from the well-meaning folks at home. They have what we call "localitis." They believe that their son or husband is the only one fighting the war. The other ten million are just along for the ride.

The fact is, I have been one of the more fortunate soldiers over here. Although I have been with a combat-engineer unit in four campaigns, I have never been sick or wounded. My present assignment requires that I interview soldiers in both combat and service units. After talking to wounded veterans of 40 months' service overseas, I feel like a combination U. S. O. Commando and male WAC.

I have written my family to stop bothering you with letters concerning my welfare. I know you have more important things to do. I want to assure you that I neither want nor expect any special favors.

Sincerely yours,

Corp. THOMAS C. CAULEY.

The Late President Roosevelt and President Truman

EXTENSION OF REMARKS

OF

HON. FRANK P. BRIGGS

OF MISSOURI

IN THE SENATE OF THE UNITED STATES

Thursday, May 10 (legislative day of Monday, April 16), 1945

Mr. BRIGGS. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a brief statement signed by a number of distinguished sons of Missouri relative to the late Franklin D. Roosevelt and President Harry S. Truman.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

HONOR FRANKLIN D. ROOSEVELT IN DEEDS

STATEMENT BY OFFICERS OF ST. LOUIS LOCALS, UNITED ELECTRICAL, RADIO, AND MACHINE WORKERS OF AMERICA, C. I. O., APRIL 13, 1945

In the deep sorrow we all feel for a truly great man who was our friend, we ask the members of the U. E. to do honor to his memory not in mere words, but in deeds. We must rededicate ourselves to the great principles for which he stood, and do our full, unstinting part to make a reality of his aim of lasting peace and security for the peoples of the whole world.

During his entire 12 years in office, working people have known that Franklin D. Roosevelt was their friend. They have come to realize that he was also one of the few really great men of history, a peerless world leader for freedom and democracy, for the abolition of Fascist tyranny and aggression. In our sorrow at his death we are one with the whole freedom-loving people of all lands.

In honor and gratitude to Franklin Delano Roosevelt, we must redouble our contributions to the war effort—in loyal effort on the production line in support of our victorious fighting fronts, to the final victory over Germany and Japan—and carrying out labor's responsibility to help unite the American people and the United Nations for victory and peace.

Upon Harry S. Truman, of Missouri, has fallen the mantle of President Roosevelt. He is our President, our Commander in Chief, our member of the United Nations Big Three. We know that he will fill that role worthily and effectively with full devotion to the principles and leadership of his dead Chief.

Harry Truman needs the full support of all Americans in carrying out that program. He assumes office at a critical period in history, when the final and decisive battles are being fought against German and Japanese fascism, when decisions must be made which will affect the future of our country and the world, the peace and well-being of the people, for generations to come. Taking over the duties of President Roosevelt after his leadership of 12 years is a tremendous responsibility for any man.

It is our duty as working people to close our own ranks and help unite the whole Nation in uncompromising unity behind President Truman. Let us not tolerate the enemies of unity, nor the carping critics and the loose-tongued whose careless talk would undermine the leadership of our new President. Let us go on with full confidence in his high office and his leadership.

Behind President Truman we shall work with greater determination than ever to see this fight through—the fight to complete victory in the war and unity with our allies in the councils of the United Nations for a world of freedom, democracy, and prosperity.

In the spirit of Franklin D. Roosevelt we carry on.

Signed: William Sentner, general vice president; Robert B. Logsdon, international representative; Eustius Brendle, president, Local 1102; James Click, business agent, Local 1102; J. W. McConnell, president, Local 825; Archie Wayne, recording secretary, Local 825; Orville Munzer, vice president, Local 825; Frank Lenhardt, president, Local 1108; Ray Mertens, president, Local 1104; Louis Wagner, vice president, Local 1104; Lowell Waldron, secretary-treasurer, Local 1104; R. J. Bergman, president, Local 816; Clarence Bingaman, president, Local 810.

Willow Run Bomber Plant

EXTENSION OF REMARKS

OF

HON. EARL C. MICHENER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. MICHENER. Mr. Speaker, it is my privilege to represent the Michigan congressional district in which the Ford Willow Run bomber plant is located. It is in this plant that the B–24 Liberator bombers are manufactured. It is the apparent purpose of the War Department to cease the manufacture of these Liberators in this plant on or about August 1. This is to be one of the first major reconversion war projects in the

country. Not only the present employees of the plant and the feeder plants, but the local community, are vitally interested in what disposition is to be made of this Government-owned project when in the opinion of the War Department it is no longer needed in war activities. It is fundamentally to the interest of both employees and community that an early and definite decision be made by Government agencies as to final disposition.

Army-Navy E award ceremonies were held at the Ford Willow Run plant on May 4, 1945. Addresses were made by Henry Ford II and by Col. Nelson A. S. Talbot. These addresses were also broadcast over a national hook-up, and because of the national interest I include these addresses in my remarks. They are as follows:

ADDRESS OF HENRY FORD II

Colonel Talbot, Captain Velz, fellow workers, it is certainly with mixed emotions that we meet here today. We are proud that you men and women of the Willow Run bomber plant have won for yourselves the coveted "E" award for excellence in war production. We are proud of the job you have done in manufacturing these B–24 bombers which have played an important part in bringing one phase of this global war to an end and in helping to terminate more quickly the Pacific phase.

To the representatives of the War and Navy Departments here today I wish to express the sincere appreciation of my grandfather and the rest of us for this award, and to the men and women who have earned this award I offer my sincere congratulations on this recognition of your spirit of cooperation, patriotism, and skill.

Four years ago this spring there was no Willow Run. This land, 1,800 acres of it, covered today by a gigantic monument to industrial might, was producing agricultural products. But war was upon the world and our country's participation was nearing. It was decided by the Army Air Forces to bring the Ford Motor Co. into the heavy bomber production plan. Mass production of the B–24 Liberator bomber, then the largest, fastest, and hardest-hitting of them all, was handed to us as our job. Our engineers and production men were masters of the art of making automobiles flow from the assembly lines. But they had no experience in the airplane business and much criticism was heaped upon the Ford idea of trying to build huge bombers as we had built automobiles. But I think the record speaks for itself.

In March 1941 the Ford Motor Co. was awarded its first educational contract for B–24 parts. On March 28 the initial job of clearing the land for the plant began. On April 18 of that same year ground-breaking and excavation was begun, and then just 4 years ago this week, my father announced plans for the enlargement of Willow Run on only the verbal assurance from Army Air Force officials that we would be allowed to build completed bombers as well as subassemblies.

On May 15, 1942, the first Ford-assembled B–24 bomber put together at Willow Run was delivered for flight tests at the plant. Since then the climb in production has been steady and we are proud of the record—for 20 consecutive months Willow Run has been ahead of schedule, and we have made the schedule we set long ago of a bomber an hour.

The credit for the record of Willow Run belongs not only to the people of our organization but to many others. It belongs to General of the Army Henry H. Arnold, who stood with us during the storms of controversy. It also belongs to the President of the United States, Harry S. Truman. When the obstacles seemed insurmountable, when the vicious criticism was piling high about us, when our actual problems were many, Mr. Truman, then head of the Senate War Investigating Committee, made a special trip to Willow Run with members of his gorup on February 19, 1943. They had been swamped with accusations about the inefficiency of Willow Run. They were determined to learn the truth and to get the actual facts. Mr. Truman and the comembers of his committee placed investigators in the plant to work alongside other employees—to make careful notes of actual conditions. After checking and rechecking their findings, the then Senator Truman gave a clean bill of health for Willow Run. Willow Run was completely absolved by this Government agency. We firmly believe that the lift it gave employee morale and the halt it placed on further meddling in the plant's operations, formed the turning point in the production battle at Willow Run.

A great deal of the early accusations concerning Willow Run centered around the social problems created by a new plant of this size and location. The management of the Ford Motor Co. was perfectly aware that such a plant could not be built and operated without encountering such problems. We took the stand that this was a war plant, constructed to meet a war need, just as a carrier, a battleship, or a bomber. Actually, if this plant has hastened the end of the war, it is as expendable as a battleship—and no more expensive, either.

We are not in the least reluctant to see this plant or any plant discontinue making implements of warfare—once the war need ceases. On the other hand, we feel we have a definite responsibility to our Willow Run employees. Naturally, we have been intensively planning in whatever spare time we had for our postwar operations. We want to employ in our various plants in peacetime production as many people as we possibly can.

We expect to be able to offer to you people of Willow Run jobs somewhere in the Detroit area just as soon as we receive the necessary go-ahead from the Government. There will be many problems, but I am confident they can be solved. We do not intend to solicit additional war work for Willow Run. However, if the Government of its own volition places war work here, we'll handle it as we have before.

We have no plans for the future use of Willow Run. The Army Air Force in conjunction with the Defense Plant Corporation, owners of the plant, have decided that the wartime utility of the plant has been fulfilled. We have not disputed that decision because we believe that they, not we, are the best judges of what use should be made of Willow Run.

We also agree that to extend the operation of such a gigantic plant as this any at all beyond the actual need of it for the pursuit of the war is an unnecessary waste of plant, personnel and the taxpayers' money. Since all of us are taxpayers, it would seem to be worth while to take this viewpoint.

Just as all champion teams must face the day of dissolution and the teammates must go their different ways, Willow Run's production team must be dispersed when the job is done and the work at hand has been finished. You can be absolutely assured that we will use all reasonable means at our disposal to disperse this team in such a way as to create another championship team—a peacetime champion.

The pride in being able to fashion such a team, such a plant and such a system of production, will last long after we are all at work elsewhere. It is just another proof that in America we can do the impossible, and that the impossible always proves the nemesis of those enemies of peace and progress who attempt every so often to upset our relentless struggle upward toward a better world for all men everywhere.

In closing, I know that you men and women who have created the record that this plant has made can take great pleasure in seeing the fruits of your efforts used to help terminate this war; and again I offer you my sincere congratulations.

ADDRESS OF COL. NELSON S. TALBOTT

Men and women of the Ford Motor Co., Willow Run bomber plant: Today you are gathered here at this ceremony to receive your country's highest award for production—the Army-Navy E award for excellence. As a representative of the Army Air Forces and the Under Secretary of War, it is a great honor to be present when you raise the E pennant over this world-famous bomber plant. You have earned it—every one of you—and we are just as proud of each of you as we are of our boys overseas.

I think the greatest tribute we can pay you is to give you an idea of the terrific job your product, the B–24 Liberator bomber, is doing in the combat zone. One example, which is one of General Arnold's favorites, illustrates how the B–24 holds up. This is what happened over Iwo Jima to a B–24 named the *Chambermaid* by its enthusiastic crew:

Coming in low over Iwo Jima, the bombs were released on the designated target. In quick succession, flak hit the nose compartment and knocked out the hydraulic lines; a 20-mm shell from a Jap fighter plane hit behind the copilot and wounded him; the throttle controls were shot off the two left engines and they ran wild; another engine began throwing oil; a shot blew off the top turret and wounded the gunner in it; the plastic dome flew off and tore a hole in the rudder; another shell ripped a hole in the top of the left wing gas tank; the navigator and observer were wounded, and all the way home the pilot had to fight a tropical storm.

Then, coming in over their base, thinking themselves safely home, they found that only the right landing gear would crank down. Jap fire had severed the cable of the other. The loss of the hydraulic system left them without brakes. The crew, however, threw out two parachutes to serve as brakes, and they came in on one wheel only to hit a trailer and a revetment. When the *Chambermaid* came to rest, they found a hole 2 feet wide in the fuselage and the tail section so bent that it made an oblique angle with the rest of the plane.

That gives you an idea of the quality of the great bomber you have been building here. It is tough, it is rugged, and because of these characteristics, it is serving in 15 of our air forces. Throughout the world, the B–24 has become a trade-mark of United States production.

Another reason this bomber is known in every country of the world is because you have not only built them well, but by the thousands. Four years ago, when the Government said: "We want a place to build bombers," the land we stand on here was soybean field and woodlands. Through the ingenuity of both management and labor, this was converted into the mightiest bomber plant in the world. This 67-acre building was constructed, land was cleared and concrete laid for this airport, and thousands of inexperienced workers were trained. Finally, in the fall of 1942, the first of the all-Ford bombers began coming off the 5,400-foot assembly lines.

Early in 1943, the bombers really started rolling—in the first quarter 200, the next quarter 600, until in the final quarter the mark of 1,000 had been attained. When 1944 came around, Willow Run hit its stride. During the first half, you turned out over 1,800—doubling your previous production. At your peak, you were producing approximately 1 every hour, or about 100 every week. That is some record.

On March 13 of this year, you completed your eight thousandth Liberator which you aptly dubbed "Ford's V-8,000." In short, you have turned out more four-engine bombers than any other aircraft plant, and besides, have built the equivalent of more than 1,000 B-24's in spare parts. For 15 months you consistently exceeded your monthly production quotas. That is a production record to be proud of and I'm sure you are.

And then, a month later, came a blow which struck everyone of you. You were told, "Willow Run's job is done. It has won its campaign ribbons and is ready for an honorable discharge." That was hard to take, I know, for when you have thrown your heart and soul into a job like this one, and done it well, it is not easy to be told that your services are no longer needed.

But let's not look at it that way. We are not grieved when we are told a brother or a husband is getting his discharge from the Army. We rejoice with him that his part in the war is over and that he can come home. So should all of us have cause to rejoice that the war is reaching the stage when we no longer need so many weapons of war, and that some of us at least, can return to peaceful pursuits.

That, however, does not mean that all of us may. For, just as many of our boys must carry on the war in the Pacific, so will many of you have to carry it on here, in Detroit, in the great industries that are still forging these weapons.

Remembering then, that the war is still upon us, let us raise this proud E award pennant today as a tribute to the service you of Ford Willow Run have rendered your country for the last 2½ years. Let it fly there as a symbol of America's vast and mighty production which is making victory in Europe possible and is bringing victory in Japan constantly nearer.

Greetings to the Delegates at San Francisco

EXTENSION OF REMARKS

OF

HON. LOUIS C. RABAUT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. RABAUT. Mr. Speaker, under leave to extend my remarks in the RECORD, I include herein a resolution which was adopted by the Legislature of the State of Michigan greeting the delegates attending the United Nations Conference on International Organization now meeting in San Francisco.

House Concurrent Resolution 40

Concurrent resolution greeting the delegates from all nations attending the San Francisco Conference

Whereas the people of all lands for centuries have been faced with wars and the threat of war; and

Whereas gathered at San Francisco are delegates from all of the United Nations for the purpose of establishing a permanent peace; and

Whereas President Truman has asked for the support of all the American people in the promoting of peace efforts: Now, therefore, be it

Resolved by the house of representatives (the senate concurring), That we greet the delegates from all nations attending this historic San Francisco Conference and wish them well in their deliberation; and be it further

Resolved, That one copy of this resolution be sent by telegram to the delegates assembled at the San Francisco Conference, and copies of this resolution be sent to the President of the United States, to the President of the Senate and Speaker of the House of Representatives of Congress, and to the Michigan Members in the Senate and House of Representatives of Congress.

Adopted by the house of representatives April 25, 1945.

Adopted by the senate April 25, 1945.

NORMAN E. PHILLCO,
Clerk of the House of Representatives.

FRED I. CHASE,
Secretary of the Senate.

VE-Day

EXTENSION OF REMARKS

OF

HON. SAMUEL A. WEISS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. WEISS. Mr. Speaker, the unconditional surrender and humiliating defeat of Germany is a great victory for righteousness, yet we celebrate but solemnly. It is a heart-rending hour for the 1,000,000 families whose sons and daughters are casualties of this tragic war. The hard, rugged road that lies ahead before we attain final victory against the ruthless forces of barbarism prohibits extreme joy over VE-day. We stand at a solemn hour in world history. In thanks for VE-day, let us rededicate ourselves to God for His guiding hand and His great mercy. We thank God for this victory and we pray for divine guidance and protection to complete the great task which remains before us on the perilous road to Tokyo and VJ-day. Daily prayers will pave the way.

As part of my remarks, I am happy to include the victory VE-day prayer prepared by the Reverend Dr. Joseph D. Piper, pastor of the First Methodist Church, McKeesport, Pa., which was used in all McKeesport public schools:

VICTORY DAY PRAYER

Almighty and everlasting God, who maketh wars to cease unto the ends of the earth, we praise and magnify Thy great mercy, which has brought us to this hour. We bless Thy holy name that earth, sea, and sky are safe again in Europe; that the guns are silent; and that Thou has brought us to this long expected hour. By Thy grace keep us humble in victory; forbid that we should harbor hatred or revenge and guide us for Thy name's sake.

Almighty God, who in former times didst lead our fathers; give Thy grace, we humbly beseech Thee, to us, their children, that we may always approve ourselves a people mindful of Thy favor and glad to do Thy will. Bless our land, defend our liberties, preserve our unity. We dedicate to Thee our country, to a purer life, an unselfish patriotism, a deeper loyalty to Thy kingdom.

Eternal God, grant to the President of the United States and to all in authority wisdom, strength, and guidance. Send forth Thy spirit, we beseech Thee, into all the world, that all leaders of men everywhere may be instructed in the ways of peace, kept clean of evil ambitions, and so guided that they may make Thy ways known upon the earth, Thy saving health among all nations.

Gracious God, we pray Thee to join us in mind and heart with all those who have endured battle for our cause. In Thy great love bless our victorious forces in Europe and our armed forces in the Pacific. May peace speedily come there also. Grant that we at home may not shrink from the fellowship of suffering with those who yet carry our destiny into battle.

We remember before Thee the dead, the wounded, the saddened hearts, the weary minds. We commend all to Thy loving care. We pray that we shall not lightly accept our blood-bought heritage.

We pray for our native land and what we pray for her we pray for all nations. May the time come when "men shall brothers be," when men "shall beat their swords into plowshares and their spears into pruning hooks and nation shall not lift up sword against nation, neither shall they learn war any more." Amen.

Put the Likeness of the Diamond of Democracy on Every Dime: Franklin Delano Roosevelt

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 10, 1945

Mr. DOYLE. Mr. Speaker, under leave to extend my remarks in the RECORD, I desire to briefly speak and to include in my remarks a copy of a letter I received from the Director of the Mint, Nellie Tayloe Ross, dated May 1, 1945; also a copy of my letter to the Director of the Mint, dated May 3, and also copy of my letter dated May 10 on the same subject.

It is entirely appropriate and in keeping with national policy and with the use and purpose of our currency that the likeness of our late great President, Franklin Delano Roosevelt, be placed on one side of the dime. This would make the American people very happy and proud. My estimate is it will actually increase the use and circulation of that popular coin by millions of dollars a year. As my letter to the Director of the Mint, May 3, shows, the likenesses of other great American Presidents were promptly placed on American coins following the demise of each. I am aware that the list of Presidents whose likenesses are on coins and currency of our great Nation is not complete, in my letter of May 3; but it is nevertheless proof of my statement that it can be done and is in line with established national policy.

I have had nothing but favorable response to this suggestion from all sources. I think my letters sufficiently set out the purpose and program suggested. I call particular attention to the suggested desirability, by me, of a national and even international recognition and observation of this appropriate use and development of this popular American coin the dime. I believe there could be appropriately conducted a special or additional March of Dimes in connection with this, and

which would bring many millions of dollars into the treasury of the infantile paralysis program. If inadvisable to have an additional observation, it could be as it now is in observation of his birthday and also tied in to the placement of his likeness on the dime. Such dual observation would, undoubtedly, be a very popular observation not only in our own Nation but throughout the world. I respectfully submit copies of the correspondence:

TREASURY DEPARTMENT,
Washington, May 2, 1945.

HON. CLYDE DOYLE,
House of Representatives,
Washington, D. C.

MY DEAR MR. DOYLE: In reference to your telephone call to this office, you are advised that during the past 10 calendar years, 1935 through 1944, the United States mints have produced domestic coin as follows:

Denomination:	*Pieces*
50 cents	323,532,776
25 cents	745,753,475
10 cents	1,771,859,648
5 cents	1,787,201,167
1 cent	7,762,131,385

The mints and Federal Reserve banks do not maintain large inventories of coins and the deliveries of coins are approximately equal to the amount produced.

Very truly yours,
NELLIE TAYLOE ROSS,
Director of the Mint.

MAY 3, 1945.

Re: To have the likeness of our late President Franklin Delano Roosevelt placed on the dime.

DIRECTOR, BUREAU OF THE MINT,
Department of the Treasury,
Washington, D. C.

MY DEAR FRIEND: A few days ago I received from you in compliance with my request the listing of the relative place in our currency circulation of the first three coins. I note the time is No. 3. Thank you for this information.

As we stated in asking you therefor, I had in mind that it would be proper to have the likeness of our great President, Franklin Delano Roosevelt, placed on the dime. I say "proper" for the following reasons, amongst others: First. The dime was made famous over the world because of the triumph by our great beloved President of great spirit, heart, mind, and soul over physical infirmities and handicaps. Second. It was made famous over the world because of the March of Dimes which was sponsored by him in order that the terrible disease of infantile paralysis might be eliminated in the experience of all mankind. The millions of dollars received has actually achieved a great deal in this worthy objective. Third. Other coins of our great Nation have had the likenesses of our great Presidents and citizens placed upon them. Fourth. The circulation of the dime, while No. 3 now in our Nation, is so rapidly increasing that it has become almost the most popular coin in business. Fifth. The dime has become a piece of money for which the average American has real affection because of the identity thereof with the March of Dimes.

The other most commonly used coins each have the head of a great American past President, to wit: The penny, Abraham Lincoln; the nickel, Thomas Jefferson; the quarter, George Washington. It would be very appropriate to have the replica of this great American on one side of the dime and the replica of the Goddess of Liberty on the other side.

I do not purpose to offer a bill on the floor of the House in this regard, because I anticipate that a simpler and more efficient process of doing this timely act would be by your Department deciding so to do. If I am in error in this important thought, I shall appreciate your advising in the premise.

I will say, from the Eighteenth Congressional District of California, which I have the honor to represent, there come frequent and very large numbers of requests that this development in honor of this great American take place as promptly as possible.

If there is any reason why this cannot be done by you, kindly call my attention thereto by reply mail.

I have the honor to be,
Sincerely yours,
CLYDE DOYLE,
Member of Congress.

MAY 10, 1945.

DIRECTOR, BUREAU OF THE MINT,
Department of the Treasury,
Washington, D. C.

Put a diamond on every dime.

MY DEAR FRIEND: You were good enough on May 1 to answer my inquiry of a few days before with reference to the circulation of the dime and other American coins. Thank you for the information.

On May 3 I briefly wrote you on the subject of my earlier phone communication to you. I see in my letter of May 3 that I did not there include a sixth item, which I had intended to do. So I do it now, and urge this sixth point to your attention as to why the dime should have placed on one side thereof, the likeness of our great President, Franklin Delano Roosevelt. It is as follows:
